ARS for Needle Decompression

Sterile - Latex Free

Item No:	BR-0005
Manufacturer:	North American Rescue Products
Certificates:	CE, NTOA, Sterile
Size:	(14GA) x 8,2cm
Color:	Red
Country of origin:	USA
NSN no:	6515 01 541 0635
Tariff:	90183190
Weight:	17g

The ARS® Needle Decompression Kits are designed to provide the appropriate length needle/catheter to penetrate the pleural space in 99% of patients. With its built-in failsafe characteristics, the ARS® improves the probability of success when treating casualties who present with signs and symptoms of a tension pneumothorax.

Now also available with the same quality and reliability as our current 14 gauge version, the new 10 gauge ARS® provides the option of a needle/catheter that is approximately 60% larger in diameter for those customers looking for a larger gauge needle/catheter. The brown color-coded sterilization band and the catheter hub help to distinguish it from the original 14 gauge version, which is orange.

BOA, IV Constricting Band

Item No:	CL-0018
Manufacturer:	North American Rescue Products
Certificates:	CE, Latex Free Red Tip Technology
Lengths available:	19 to 45cm 25 to 68cm
Country of origin:	USA
NSN no:	6515-01-537-2611
Tariff:	90189084
Weight:	42g

Increase the proficiency in gaining direct IV access with the BOA® Constricting Band, a now-critical component of successful IV cannulation.

Not since constricting bands were first conceived has the design been so fundamentally altered as it has been with the BOA®.

For improved central venous access every time, the BOA® uses a rolling action to transfuse venous blood to the distal veins while still allowing arterial flow. (For maximum effect, the BOA® is placed as high up on the extremity as allowable.) This technique distends the veins to make IV access quicker and more effective even in the most challenging patients.

The BOA®'s patented design features a Quick Click connector and two-finger Quick Release for added efficiency. No longer do healthcare professionals need to tie (and often re-tie) a constricting band. The BOA® decreases "time on task" for treating combat casualties, civilian trauma patients, or medical patients with poor vascular access.

NAR Saline Lock Kit

Item No:	LS-10
Manufacturer:	North American Rescue Products
Certificates:	CE, Latex Free
Gauze Size:	13,9 x 8,2 x 2,5cm
Color:	N/A
Country of origin:	USA
NSN no:	6515-01-537-4094
Tariff:	30059099
Weight:	36g

Allowing for quick and effective extremity venous cannulation under the most demanding conditions, this system for starting and securing a saline lock has proven reliable and extremely effective during casualty treatment and evacuation where it is common for saline locks and IV lines to become dislodged.

Using the NAR RAPTORTM IV Securing Device (also available separately in a pack of 6), the NAR Saline Lock Kit can be secured in place without the need for tape. The Kit is low-cubed packaged in a vacuum-sealed, rugged pouch, keeping the contents of the kit in prime condition until needed.

Polycarbonate Eye Shield

Item No:	CL-9
Manufacturer:	North American Rescue Products
Certificates:	CE
Product Size:	7,5 x 6 x 1,5 cm
Color:	Red/Orange
Country of origin:	USA
NSN no:	6515-01-647-5456
Tariff:	90019070
Weight:	6 g

The Polycarbonate Eye Shield meets current military pre-hospital guidelines for the treatment of traumatic eye injury in the field. This convex rigid eye shield allows the user to protect the injured eye and blocks external pressure from being applied directly to the injury, preventing further damage.

Made of a high strength, translucent orange polymer, the PES is shatterproof and will not flatten or disfigure when pressure is applied. Holes in the eye shield provide ventilation, and it designed for use over either eye. The outer shell has engraving that states "Tape over eye this side out. Nothing under shield".
