Ultimate Picture Quality in WUXGA Projection Delivering an Outstanding Brightness

Packing the most advanced projector technologies into a low-profile design, the VPL-F30 Series projectors are an excellent choice, delivering an outstanding brightness of 5,200 lumens* (VPL-FH36) and 4,300 lumens* (VPL-FH31 and VPL-FH30) and ultra high-quality images with WUXGA resolution.

These projectors also deliver amazing installation flexibility and hassle-free maintenance in a stylish design that blends into any decor. They are equipped with an excellent lens shift function and a standard 1.6x zoom lens, making image adjustment easy. They are also compatible with the optional lenses designed for the Sony VPL-F40 Series, extending the range of installation choices. The maintenance cycles of the lamp and cleaning filters are synchronized and exceptionally long, which helps to reduce maintenance time and cost. Overall, the VPL-F30 Series delivers a low total cost of ownership, and includes energy efficient features such as a long-lasting lamp and low power consumption.

* ISO 21118

Ultra-high WUXGA Resolution with Full-HD Compatibility

The VPL-F30 Series projectors deliver an amazing resolution of WUXGA (1920 x 1200), which exceeds Full-HD resolution (1920 x 1080).

Need to scroll during discussion

simulated images

Extremely clear and detailed high-quality images are projected, even on a large screen, and native Full-HD images can be projected full screen. The VPL-F30 Series projectors are the ultimate tool for projecting images in a range of applications requiring exceptional detail.
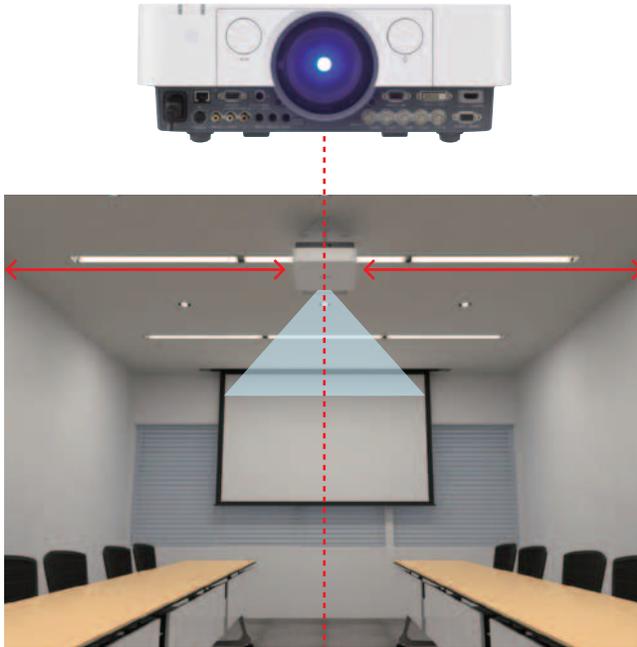

Installation Advantages

Lens Shift Function

The VPL-F30 Series projectors have a Lens Shift function. Using this function, the position of the projected image can be moved vertically by up to 60% and horizontally from -32% through to +32%. Images can be easily adjusted to the desired settings during installation.

VPL-FH36
VPL-FH31
VPL-FH30
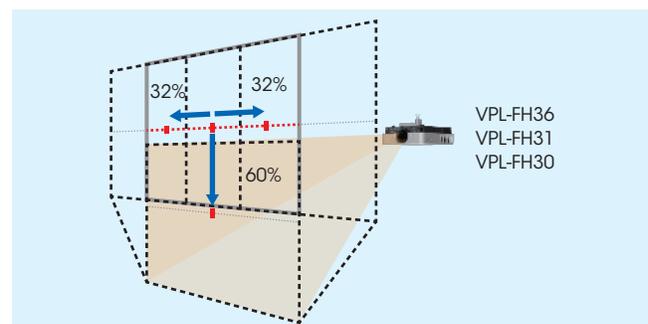

Centered Lens Design

The centered lens provides symmetry for a balanced installation, and makes setup very simple.

Balanced and symmetrical installation

Advanced Geometric Correction

Each corner and side can be grabbed and fitted squarely to the desired position. This feature is useful when an offset projection is necessary.

Four corners correction   Four sides correction

For the VPL-FH36 and VPL-FH31.

simulated images

Edge Blending

Edge Blending enables the installation of multiple projectors to create one large image. With this built-in technology, the image can be seamless and uniform.

Edge blending

Overlapping image edges

Without edge blending   With edge blending

Available with the VPL-FH36 and VPL-FH31.

"Blend-in" Design

The VPL-F30 Series projectors showcase a newly designed low-profile chassis, so the projector appears to blend into the ceiling or wall on which it is mounted. The connector panel is located on the front of the unit so its cables cannot be seen by the audience.

VPL-FH36 and VPL-FH31 units are available in white or black.

Portrait Mode

The VPL-FH31 and VPL-FH30 are suitable for not only normal installation, but also portrait installation, which enables projection of a vertically long screen.

Good TCO, Energy Efficient Design

Long-lasting Lamp

By incorporating a newly developed high-performance lamp and advanced lamp-control technology, the VPL-FH31 and VPL-FH30 offer a recommended lamp replacement time of approximately 4000 hours. [1]

Energy Saving Design

The VPL-F30 Series projectors offer remarkably low power consumption, helping users to save on their electricity expenses.

ECO MODE Key

With a single push of the ECO MODE key on either the projector or the supplied Remote Commander unit, users can select an energy-saving setting from the ECO Mode menu.

ECO MODE key

Lamp and Filter Synchronized Maintenance

When the air filter must be cleaned, a timely message is displayed on screen. The lamp and the filter are accessible from the same side, so their maintenance can be performed without uninstalling the projector. With typical usage, the filters have an approximate 15000-hour cleaning cycle. This is achieved by a Quad Filter system which means the filters only need to be cleaned when the lamp is changed, even in harsh conditions. This helps to save on maintenance time and cost.

## High Picture Quality

Brilliant Color Performance

By combining a new-generation optical system that uses Sony BrightEra® with Long Lasting Optics technology™ and a 3LCD projection system, the VPL-F30 Series projectors offer a high brightness of 5,200 lumens (VPL-FH36) and 4,300 lumens (VPL-FH31 and VPL-FH30).

* BrightEra with Long Lasting Optics is the Sony brand name for a new generation of optical system, which uses a more advanced version of Sony's original BrightEra technology. In addition to adopting LCD panels that have pixels with large aperture ratios and inorganic alignment layers, BrightEra with Long Lasting Optics technology also uses an inorganic layer for polarization plates to greatly enhance reliability.

Other Features

Picture-by-Picture

With this feature, users can project two different images at the same time, greatly expanding creative possibilities and enabling exciting new applications.
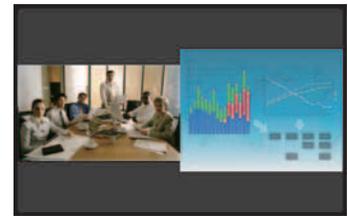

simulated image

DICOM GSDF Simulation*

The VPL-F30 Series projectors are equipped with a new gamma mode, called DICOM GSDF Simulation. This is ideal for viewing digital medical imagery for non-diagnostic applications.

* Conforms to GSDF (Grayscale Standard Display Function) medical standards for DICOM (Digital Imaging and Communications in Medicine).
* This function is for training and reference only, and cannot be used for medical diagnosis.
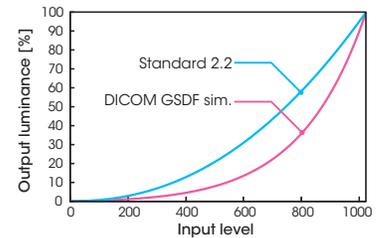

Gamma curve

Standard 2.2

DICOM GSDF simulation

simulated images

Screen Aspect

When screen and image aspect ratios do not match*, this function fits the projected image to the screen. So, even when images are switched between different aspect signals, the projected image can always fit the screen.

* Using the same aspect ratio between screen and projector is ideal.

Quiet Noise Operation

Low noise fans designed to produce lower frequency sounds to be less obtrusive

Closed Captioning

Official teletext broadcasting, developed by the NCI, USA

Security Pack

Security lock (password and mechanical), security bar, panel key lock, and security label

Test Pattern Key

For easy screen adjustment

ID Mode

For individual control of multiple projectors

Freeze Function

Freezes the projected image

Smart APA
Auto pixel alignment

Direct Power On/Off
Direct power control using the circuit breaker on the switch board

High Altitude Mode
For projector operation at high altitude

Network and Control
Controls and monitors projector status
Compatible with various control systems
