VPL-FH60 and VPL-FH65 3LCD installation projectors

Crisp, detail-packed
WUXGA images

At a glance

- 6,000 lumens brightness (VPL-FH65)
- 5,000 lumens brightness (VPL-FH60)
- WUXGA (1920 x 1200) 16:10 resolution
- Supports HDBaseT
- Blend in, attractive design

Key Features

- **High quality BrightEra 3LCD projection**
The energy-efficient lamp source is coupled with our acclaimed BrightEra 3LCD projection engine to ensure high brightness with vivid, natural colour reproduction.
- **Wide choice of lenses**
Installation flexibility is increased by a wide range of compatible lenses to suit virtually any size of room and throw requirements.
- **Energy saving lamp dimming mode**
Gradually reduces lamp brightness and power consumption without compromising picture quality.

High quality projection for everyone

Because no two organisations are alike, our installation projector range meets the diverse requirements of business and education environments with our lamp based models. The VPL-FH65 and VPL-FH60 projectors offer cost-effective options that deliver high-quality performance with 6,000 / 5,000 lumens brightness respectively, WUXGA resolution images, plus our unique panel technology to reproduce natural and vivid colour.

Installation friendly

These models feature a built-in HDBaseT interface, enabling easier connectivity and reducing costs. A single cable runs all the video, audio, control, and IP signals up to 100 m. These projectors also have a new, integrated terminal cover design which allows installation without any visible cables.

Wide lens shift

Generous lens shift adjustments give more flexibility for positioning the projector where you need it: close to ceilings or even horizontally offset; while bayonet lens mounting systems allow for quick and easy lens changes for when the projector is used for multiple purposes and locations.

Choice of picture modes

New Picture Mode ensures great-looking presentations in a wide range of operating conditions, displayed content or applications. Select Standard, Dynamic, Brightness Priority or Multi Screen mode for optimised image quality.

High image quality

Crisp, detail-packed WUXGA resolution images

These projectors feature amazing WUXGA resolution (1920 x 1200) plus our unique 3LCD technology to deliver exceptional detail.

Advanced picture technologies

See extreme clarity in every pixel

These projectors feature Sony's advanced Reality Creation technology, designed and perfected in our 4K Home Cinema projectors. Reality Creation is a proprietary digital signal processing algorithm and pattern recognition database technology that allows image upscaling from the original for "Picture Perfect" images.

Dynamic images with high contrast

Contrast Enhancer is a technology developed from our Home Cinema projectors that is now also available for for these models. The average picture level is analysed in real time, correcting the dark and bright levels to enhance the contrast quality.

Low TCO & energy efficient

Hassle-free automatic filter cleaning

Now you can focus on great-looking images instead of arduous maintenance tasks. A new automated filter cleaning system removes dust every 100 hours.

Picture muting

Picture muting is a common feature in projectors, but our models both "blank" any signal output temporarily from viewing, as well as almost completely reducing light output. This in turn minimizes lamp usage and energy consumption.

User advantages

Simple setup with new friendly installation menu

Use the remote commander to easily adjust projector settings, including warping and edge blending.

Project side-by-side

Project images from two inputs at the same time; ideal for applications such as video conferencing and medical training.

Network and control

Controls and monitors projector status; compatible with various control systems.

Bright, beautiful images with low running costs, minimal maintenance, and flexible installation

Installation advantages

Lens shift function*

Using this function, the position of the projected image can easily be moved vertically by -32% to +32% and horizontally by -5% to +60% during installation. With this exceptional shift range, the projectors can be installed in ways that maximise performance, even in the most difficult environments.

Simple installation with HDBaseT

Save costs and simplify your installations with HDBaseT; all with just a single cable.

Project onto non-flat surfaces with Image warping

Correct image geometry easily for natural-looking projections, even on convex or concave surfaces. It's easy to correct corners and edges with the supplied remote and on-screen menu.

Create supersized displays with edge blending

Seamlessly join colour-matched images from multiple projectors, to create stunning, supersized displays for retail, corporate, and live event applications.

Super quiet operation noise

Low fan noise** ensures discreet, unobtrusive operation in quiet environments, from museums and galleries to lecture theatres.

Professional calibration

The projectors offer a professional calibration function to adjust the hue, saturation and brightness of each target colour to get exactly the picture you want. With this capability, images can be tweaked to perfection.
