	Nytro 3031 SAS SSD Series	Nytro 1000 SATA SSD Series
Key Benefits	Enterprise performance and reliability	More computing, better value
Ideal for	Mission-critical enterprise applications	Cloud; web servers; boot applications
Interface	SAS Dual Port 12 Gb/s	SATA 6 Gb/s
Capacity	400 GB to 15 TB	240 GB to 3.84 TB
Form factor	2.5-in	2.5-in
Endurance	Up to 10 DWPD	Up to 3 DWPD
Performance	Up to 2.2 GB/s, up to 240K IOPS	Up to 560 MB/s, up to 98K IOPS
Security	SED and FIPS models available	SED models available
Limited warranty	5 Years	5 Years

Hyperscale Efficiency, Lowest TCO

The Seagate® Exos® X class of enterprise hard drives are designed for hyperscale efficiency and ever-evolving security mandates. Rely on Exos X for maximum capacity, density, scalability, power efficiency and security. Exos X uses the latest nanoscale technology to further deliver foundational capabilities for the rapidly-evolving cloud and large-scale data centre architectures. Innovative technology advancements like helium, PowerBalance™, PowerChoice™, Seagate Secure™, and Seagate RAID Rebuild® provide improved TCO.

5-YR LIMITED WARRANTY

2.5 M HOUR MTBF

He HELIUM SEALED DRIVE

Best-Fit Applications

- Hyperscale applications/cloud data centres
- Massive scale-out data centres
- High-capacity density RAID storage
- Mainstream enterprise external storage arrays
- Enterprise NAS systems
- Distributed file systems, including Hadoop and Ceph
- Enterprise backup and restore — D2D, virtual tape
- Centralised surveillance

The Seagate Advantage

Exos X Enterprise Drives

Best-in-Class Enterprise Features

- FastFormat™
- Enhanced Caching
- PowerChoice™ and PowerBalance™

Delivers peace of mind with diverse set of security options

Store up to 17 PB of data in a single 42U rack for scalable storage infrastructure and low TCO

The Most Versatile High-Capacity Drives in the Datasphere.

The Seagate® Exos™ E class of enterprise hard drives deliver the massive capacity to realize the power of the datasphere. With exceptional storage densities, efficiency and value for demanding 24x7 operations, Exos E hard drives enable data center architects and IT professionals to deliver trusted performance, rock-solid reliability and ironclad security. Purpose-built for a multitude of enterprise applications and workloads, Exos E drives improve storage tiering and maximize storage efficiency.

Best-Fit Applications

7E8 & 7E2

- Hyperscale applications/cloud data centers
- Massive scale-out data centers
- Mainstream enterprise external storage arrays (SAN, NAS, DAS)

7E2000

- Storage-hungry business applications
- Hyper-converged infrastructures

Best-Fit Applications

- High-availability server virtualization
- OLTP databases
- Software-defined storage
- All-flash arrays
- SAS HDD or SATA SSD data centers
- High security workloads

The Seagate Advantage

NyTRO 3031 SAS SSD

Robust Enterprise Features

- Power-loss data protection
- End-to-end data protection
- Advanced ECC algorithm

Delivers peace of mind with diverse set of security options

Broad endurance portfolio

- Up to 15TB
- Four endurance classes up to 10 DWPD

Maximum Capacity and Consistent High Performance.

Exos X ultra-dense intelligent array system for max capacity, performance and TCO. Exos E for efficient growth, performance, and capacity for all-in-one price.

Exos X 2U12

Seagate Exos X 2U12 delivers advanced data protection, capacity, and performance at an entry-level cost.

- Save space but maximize capacity by expanding up to 120 drives
- Deliver data fast with 7GB/s throughput in an all-HDD configuration
- Rebuild drives faster than ever and reduce downtime with Seagate ADAPT data protection technology
- Opt for replication and snapshot features to meet critical enterprise requirements

Exos X 2U24

Seagate Exos X 2U24 is the datasphere's favorite entry-level solution for right-sized storage performance at an exceptional price point.

- Expand a data center seamlessly with flexible hard drive and hybrid flash configuration options
- Efficiently manage hot and cold data with real-time data tiering feature option
- Deliver unfettered data access with dual redundant controllers capable of achieving up to 7GB/s sequential read, 5.5GB/s sequential write performance
- Rebuild drives faster than ever and reduce downtime with Seagate ADAPT data protection technology
- Opt for replication and snapshot features to meet critical enterprise requirements

Best-Fit Applications

- Capacity data systems
- Data analytics tools
- Data centre expansion

Best-Fit Applications

- Data analytics solutions
- Data streaming
- Actionable surveillance

Performance is Paramount

The datasphere's super high performance platform for maximum IOPS. Achieve higher IOPS and higher density with small form factor drives that provide enviable IOPS per unit of rack storage.

Nytro X 2U24

Seagate Nytro X 2U24 is the datasphere's affordable all-flash array (AFA) system for critical workloads that demand the highest performance.

- Deliver unfettered data access with extremely low 250 microsecond latency.
- Ensure data is consistently available with next-gen Seagate ADAPT data protection for up to 95% faster rebuilds than traditional
- RAID configurations Easily upgrade capacity and speed with hot-swappable Seagate SSDs
- Save time with quick 5-step setup and low maintenance support design
- Rely on factory-tested components that are qualified before delivery

Best-Fit Applications

- Enterprise, edge
- Security
- Video
- Standard density storage requirements

Nytro E 2U24

Seagate Nytro E 2U24 is the datasphere's high-performance, exceptional-capacity platform utilizing the latest SAS SSDs for maximum data access speed at a minimum TCO.

- Save space with up to 24 SSDs in a 2U rackmount enclosure
- Simplify overall product portfolio with this unique storage building block
- Safeguard data with intelligent fault diagnosis, resolution capabilities, persistent error logging, and monitoring
- Deliver data fast using Seagate SSDs Ensure data is available with N+1 PCMs, I/O modules, and dual data paths to all drives
- Maximum of 28.8GB/s in a dual controller configuration

Best-Fit Applications

- Data centre
- Virtualisation workloads
- Heavy transaction, heavy streaming, and low-latency requirements

Efficient. Agile. Scalable.

Seagate® Exos® E 4U106 Datasphere's largest building block

Exos E 4U106 offers industry-first capacity and density without sacrificing data access speed. This very high density platform allows you to: effortlessly scale your data center; increase the amount of data that fits in a 4U rack by leveraging up to 106 of our high-capacity hard drives in a single enclosure that holds up to 1.7PB of business intelligence; eliminate efficiency-draining acoustic interference with the proprietary noise attenuator; and minimize footprint and power consumption while maximizing storage space.

Best-Fit Applications

- Enterprise and private clouds
- High-performance computing
- Multi-petabyte storage

Integrated. Efficient. Intelligent.

Seagate® Exos™ X 5U84 is the datasphere's ultra-dense, intelligent solution for maximum capacity and performance at an exceptionally low TCO.

Exos 5U84 is the datasphere's ultra-dense, intelligent solution -for maximum capacity and performance at an exceptionally low TCO.

- Maximum Capacity and Consistent High Performance – Throughputs reaching 7 GB/s sequential read, 5.5 GB/s sequential write
- Cost-Optimized Architecture – High density, high capacity unit
- Easy to Set Up, Maintain, and wand – Frus, PCMs, controllers, and software are interchangeable between systems and hot swappable
- Get Data to Applications Fast and Protect Valuable Assets – 99.999% data availability promise

Best-Fit Applications

- Data archiving
- High-density & high-throughput
- Capacity planning

Seagate Storage Systems

Optimized for the future of data center storage

Seagate 4U106

Seagate 5U84

Seagate focuses on a system-based approach.

Features an ASIC-based architecture:

- Efficient cost structure with Predictable High Performance
- Industry Proven Quality
- Competition uses expensive CPUs and Memory to squeeze out performance

Leverages a deep software stack:

- Market-validated
- Strong foundation of features with ongoing innovation and unique data protection
- Competition requires complex and expensive software add-ons

Mid-Range Storage Competitive Landscape

Enterprise Features

Virtual Pools

Streamline management by automatically creating storage pools

Thin Provisioning

Save on storage costs by dedicating storage only when needed

Async Replication

Replicate between arrays for business continuity/disaster recovery

Auto Tiering

Accelerate performance while providing cost and capacity benefits of HDD

Snapshots

Reduce RPO/RTO and mount snapshots for development and testing

ADAPT

Improved storage management and much faster rebuild times

Compute & Storage – EXOS AP Series

Exos AP 4U100

The growth of the private cloud means enterprises of all sizes need storage solutions. Dedicated space is often limited and expensive. With the Exos AP 4U100, the data center footprint is dramatically reduced, saving real estate investment and reducing heating and cooling costs. Other storage center racks must house both storage and servers. This system's unique design and precision engineering allow both the intelligent compute of a server and a whopping 1.6PB of data storage.

Seagate Exos AP 4U100 has the datasphere's highest density of compute and storage in a single system.

- Maximize your investment with this low-TCO compute and high-density integrated storage system
- Retain valuable space with a 4U rack height that offers 96 × 3.5-in drive and 4 × 2.5-in drive capacity
- Leverage dual Intel Xeon Scalable CPUs on each controller
- Deliver maximum data throughput with two 12G SAS redundant application controllers
- Future-proof your data center with support for current and nextgeneration HDDs and SSDs
- Enable full drive performance in all slots with built-in technology to minimize drive performance degradation

Best-Fit Applications

- Private clouds
- High-density use cases
- High-throughput use cases

Exos AP 5U84

Minimize your TCO and store up to 1.344PB of data with an enclosure that leads the industry in both density and cost-for-performance while enabling easy change in functionality by swapping to EBOD expansion controllers or hardware-based RAID controllers. This flexible enclosure includes support and capabilities to manage cables, universal ports, self-configuration controls, and standardized zoning while helping you accelerate market introduction of new technologies and significantly simplify development and testing of storage implementations.

Seagate Exos AP 5U84 is the datasphere's affordable application platform for growth, performance, and high capacity.

- Maximize your investment with this low-TCO integrated compute and high-density storage system
- Leverage industry-leading CPU technology with dual Intel Xeon E5 v4 Family CPUs on each controller
- Efficiently manage your data center with a 5U rack-mount enclosure and unique drawer design that provides easy access to drives
- Future-proof your data center with support for current and nextgeneration HDDs and SSDs
- Reduce power consumption with 80 PLUS Platinum certified power supplies and adaptive cooling technology

Best-Fit Applications

- Private clouds
- Fast input/output data speeds
- Innovation-ready scalability

Exos X Hard Drive Products

Exos® X Class Hard Drives

- Maximum storage capacity for the highest rack space efficiency
- Ideal for massive scale-out storage environments
- 5-year limited warranty and 2.5M-hour MTBF

Exos Systems

Exos® – Capacity is Critical

Build a private cloud. Future-proof any enterprise for exponential data growth with up to 106 16 TB drives. Our expandable platforms and next-gen data protection systems solve tomorrow's storage capacity management challenges today.

SAS SSD Products

Nytro® 3031 SSD Series

- Multiple capacity, performance, with endurance up to 10 DWPD
- Ideal for high-performance computing, databases, online transaction processing, cloud computing, and big data analytics
- 5-year limited warranty

Nytro Systems

Nytro® – Performance is Paramount

Get data to the people who need it, when they need it. From drive to chassis, these fully optimised building blocks ensure fast, 99.999% data availability while balancing the cost for performance equation.

SATA SSD Products

Nytro® 1000 SATA SSD Series

- Storage performance and reliability for cloud servers and data center applications without requiring upgrades to infrastructure. Includes Seagate DuraWrite™, Seagate Secure™, and tunable capacity features
- Ideal for cloud, web-servers, databases. Mixed and read-intensive workloads, all flash-arrays
- 5-year limited warranty

Exos, Nytro, Lyve Drive and the Lyve Drive logo, Seagate Secure, and Durawrite are either trademarks or registered trademarks of Seagate Technology LLC or one of its affiliated companies in the United States and/or other countries. All other trademarks or registered trademarks are the property of their respective owners. When referring to drive capacity, one gigabyte, or GB, equals one billion bytes and one terabyte, or TB, equals one trillion bytes. Your computer's operating system may use a different standard of measurement and report a lower capacity. In addition, some of the listed capacity is used for formatting and other functions, and thus will not be available for data storage. Quantitative usage examples for various applications are for illustrative purposes. Actual quantities will vary based on various factors, including file size, file format, features, and application software. Actual data rates may vary depending on operating environment and other factors. Seagate reserves the right to change, without notice, product offerings or specifications. SC668.3-1907US, March 2020
