The Hon'ble National Green Tribunal (NGT) vide its order dated 28.10.2013 had directed that no completion certificate shall be issued by the Authority concerned for such buildings being constructed within 10 Km radius of Okhla Bird Sanctuary till the Ministry of Environment & Forests (MoEF) in consultation with National Wildlife Board issues Notification for declaring Eco Sensitive Zone area around Okhla Bird Sanctuary & the matter is finally decided by the Supreme Court of India. The said order has restrained the New Okhla Industrial Development Authority (NOIDA) from issuing the completion certificate for the completed Units ready for handing over the possession to the customers. This also led to increase in the finished inventory and declining Real estate sales which adversely affected the cash flow of the Company. The stalemate continues at the time of adoption of accounts. Particulars of Energy Conservation, Technology Absorption and Foreign Exchange Earnings and Outgo required under the Companies (Accounts) Rules, 2014

A. Conservation Energy

The Company has been engaged in development & construction of real estate, mainly comprising residential, commercial & institutional buildings. It has always been the endeavour of the Company to look for ways and means to achieve energy conservation in every possible way.

In line with the Company's commitment to give its clients and customers quality products and services, it has been constantly seeking to adopt latest in technology which are relevant, and strive to integrate the same into the overall scheme of things, resulting in sustainable cost savings, energy conservation and more reliability.

Major energy conservation initiatives taken during the FY 2014-15

1. Rationalization of no. of Bollard & Pole Lights

Increased distance between adjacent lighting fixtures and providing energy efficient lights with better optics in street lights, bollard, spike and footpath lights, we have achieved appropriate lux level. This has resulted in confirmed savings of Rs. 1.5 cr. in capital investment and subsequent recurring energy conservation.

2. Basement Ventilation (Under revision by NBC)

Reduction in ACPH (Air Changes per Hour) of Axial flow fans & Jet fans in emergency mode from 30 ACPH to 18 ACPH (under revision) and static pressure reduction from 25mm to 20mm has resulted in corresponding reduction of motor sizes & their capacity as well as in deletion of fresh air fans (wherever required) in basement of buildings, culminating in substantial energy savings.

3. Air Conditioning

Adopted VRV System of air conditioning to optimize the individual outdoor & indoor units and also substituted the Ductable splits in the rooms with High Wall Split units, wherever applicable, achieving significant energy savings due to reduction of equipment capacity and removal of ducts. Energy efficient star rated split air conditioners have been proposed to be installed in the flats.

4. Lift Speed Optimization

Optimized the Lift speed, numbers & carrying capacity, within the permissible parameters of handling capacity & average waiting period.

5. Rationalization of Electrical Points

Reduced the number of Electrical Points provided in Residential Towers by maintaining minimum permissible lux level in flats which will cut down electricity consumption by ~15-20% varying from project to project.

6. Master Plan Services

Being an integrated township, the central DG stations have been put up at two places instead of providing individual DGs for each cluster. This resulted in saving of space in providing diesel tanks at individual cluster level. The DGs will be synchronized through PLC system thus running at optimum load as per the requirement.

7. Panels (Additional Capacitor Bank & STATCON)

Using Additional Capacitor bank & Statcon has improved Power factor from 0.95 to 0.99 thereby reducing energy consumption and bringing in substantial and recurring savings of energy in times to come.

8. Block Work

The shift from Conventional Bricks to FAB/HCB/CLC Blocks which provides better Thermal insulation is expected to considerably reduce running of Air Conditioners and consequent energy conservation.

9. Lights in Basement & Common Areas

The basements of all the residential towers have been provided /proposed with T5/T8 energy efficient tube light fixtures and the common areas with CFL/LED lights instead of conventional lamps, paving the way for consistent energy saving throughout the year.

10. VFD Driven Motors

The VFD system has been provided on the heavy power consuming motors so as to regulate energy consumption as per load requirement. This will provide substantial power saving in case of air conditioning, ventilation system & heavy duty fire pumps.

11. Solar Water Heating & Lights

Solar hot water system has been provided for Kitchens in case of all units of various towers. Solar lights have been provided for the common areas such as service centers, road lighting, parks, switching stations, grid stations, STPs etc. for energy conservation efficacy.

12. Road Lighting System

The road lighting system has been provided with the dual dial preset timers to achieve energy saving during the night at preset timing thus resulting in everyday energy saving.

13. Occupancy Sensors and Blind Axial Vanes

Office and institutional buildings are provided with Occupancy Sensors and Blind Axial Vanes for automatic switching off/on of lights & fans as per occupancy in the areas to avoid energy consumption when not occupied.

B. Technology Absorption

Major efforts made towards technology absorption

1. FTTH over Cables

Adopted FTTH (Fibre-To-The-Home) technology for data transmission through Single Optical fiber cable for TV, data & telephony entailing much less running cost and better user experience over conventional data cables with conventional technology.

2. Rising Mains over conventional cabling

Using Rising Mains over conventional cabling for transmission of electricity from Electrical Substation to residential towers, making maintenance free technology available for more reliability and reduced Amperes rating in top floors. This has opened up another avenue for significant energy & cost saving.

3. Grass Crete paver over Concrete pavers

Usage of Grass Crete pavers over Concrete pavers in Landscaping & Fire Tender Areas promotes conversion of Carbon dioxide (Green House Gas) into Oxygen and has an "Air Conditioning Effect". It also contributes in cooling the atmosphere & reducing "Urban Island Effect". Grass Crete pavers are even 100% recyclable & have the ability to clean pollutants by bioremediations, reduce soil erosion & soil migration.

4. Pranav Shuttering/Mivan Shuttering over Conventional Shuttering

Using Pranav & Mivan Shuttering over conventional shuttering, resulting in improved slab cycle, better surface quality & finish.

5. Block work

Usage of Blockwork improves strength of structure thus reducing consumption of a resource (Steel) by 0.2-0.3 kg/ sqft

6. Zero Discharge

Zero Discharge Policy is being followed. Sewer is treated in STPs and treated water is used for flushing & horticulture.

C. Foreign Exchange Earnings and outgo

The particulars regarding Foreign Exchange Earnings and Outgo appear at Note no. 33 of Notes to the standalone financial statements.

As a part of Jaypee Group, we are committed to making continuous efforts to adopt and adhere to the best practices of Corporate Governance. We believe that every Corporate Strategy needs to be dynamic, vibrant and responsive to the changing economic scenario and flexible enough to absorb environmental and fiscal fluctuations. It must be capable of harnessing inherent strengths of available resources and materials and have the capacity to learn from

success or failure and more importantly, ensure growth with human face. This has always been the guiding philosophy in the Company and will continue to be so in future, as we continue to perceive Corporate Governance as an upward moving target that we collectively strive towards achieving.

MANAGEMENT DISCUSSION & ANALYSIS REPORT

Forward-Looking Statement

The report contains forward-looking statements, identified by words like 'plans', 'expects', 'will', 'anticipates', 'believes', 'intends', 'projects', 'estimates' and so on. All statements that address expectations or projections about the future, but not limited to the Company's strategy for growth, product development, market position, expenditures and financial results, are forward-looking statements. Since these are based on certain assumptions and expectations of future events, the Company cannot guarantee that these are accurate or will be realised. The Company's actual results, performance or achievements could thus differ from those projected in any forward-looking statements. The Company assumes no responsibility to publicly amend, modify or revise any such statements on the basis of subsequent developments, information or events.

Macro-economic Environment

The fiscal 2014 was particularly a difficult year for the Indian economy with the GDP growth rate falling to its lowest level in a decade. A receding economy, rising inflation combined with heightened interest rates had an adverse impact on the savings ability of the population leading to a decline in demand for housing and real estate.

With a stable political environment, this is probably the most conducive period for a steady pace of implementation of policy reforms. This will create the platform to utilize the country's advantageous demographic potential and lay the foundations for real GDP growth to move to higher levels.

Indian Economy is looking-up with brighter prospects amongst the world's major economies today. A clear political mandate for reform and a benign external environment is expected to propel India on to a double digit trajectory. Indian economy appears to have now gone past the economic slowdown, persistent inflation, elevated fiscal deficit, slackening domestic demand, external account imbalances and oscillating value of the rupee. Further declines in inflation and the resulting monetary easing will provide policy support for growth both by encouraging household spending in interest-sensitive sectors and reducing the debt burden of firms.

Industry Structure and Development Relating to Company's Lines of Business

Expressways

Expressways are the highest class of roads in the Indian road network. The efficient and extensive transport linkages are necessary to improve economic efficiency and expand the growth frontier. Given the heavy reliance on roads for both freight and passenger movements, investment in the road infrastructure in India can pave the way to growth and other economic objectives. Such an investment has a multiplier effect on crucial sectors of the economy; for example, cement & construction. India has an extensive road network of 4.86 Million kms which is the second largest in the world. More than 60% of freight and 90% of passenger traffic in the country is handled by road. The private sector has emerged as a key player in the development of road infrastructure.

Real Estate

The real estate industry is considered a growth engine of the economy and plays a vital role in overall growth and development. The real estate sector is a major employment driver, being the second largest employer next only to agriculture. This is because of the chain of backward and forward linkages that the sector has with the other sectors of the economy, especially with the housing and construction sector. About 250 ancillary industries such as cement,

steel, brick, timber, building materials etc. are dependent on the real estate industry.

Before the global financial crisis, the domestic real estate sector was booming. The global financial crisis and the ensuing slowdown led to businesses calling off/postponing expansion plans. Banks and foreign investors started withdrawing money from the market due to an uncertain economic situation. These factors led to drying up of credit, leading to a slowdown in the real estate sector. However, as the economy started to gain strength, the real estate sector also saw some improvement with property prices resuming upward movement and there has been improvement in credit and liquidity conditions and private final consumption expenditure as well.

India has huge potential to attract large foreign investments into real estate. With real estate reaching a point of saturation in developed countries and the demand and prices falling, global real estate players are looking at emerging economies such as India for tapping opportunities in real estate. Indian real estate will stay attractive due to its strong economic fundamentals and demographic factors.

Review of Operations

The Yamuna Expressway was opened for public on 09.08.2012 and commenced toll collection wef 16.08.2012. The Average Annual Daily Traffic (AADT) and Toll revenue has registered a CAGR 29.16% and 33.88% respectively since commencement of the commercial operation on 16.08.2012.

Your Company is developing five integrated Townships over 25 million square meters of land for commercial, amusement, industrial, institutional & residential purposes etc. across five different locations along the Yamuna Expressway - one in Noida, two locations in District Gautam Budh Nagar (part of NCR) and one location in each district Aligarh & District Agra, Uttar Pradesh. The Company has commenced development of its Land Parcel-1 at Noida, Land Parcel-3 at Mirzapur and Land Parcel -5 at Agra. The Company has launched approx. 113.06 million sq.ft. area and has sold approx. 107.10 million sq.ft area till 31.03.2015 aggregating to sales value of Rs.21943 Crores.

The Highlights of Financial Performance of the Company for the year 2014-15, are already given in the Director' Report.

The Jaypee Hospital, the flagship hospital of the Jaypee Group, being developed by the Company's subsidiary-Jaypee Healthcare Limited (JHCL) is committed to meet the healthcare needs of the population of the region being a super specialty hospital with advance healthcare facility, the latest diagnostic services and state of the art equipment.

Outlook

The development of Yamuna Expressway has ushered a new era of economic development in the region across different segments – Residential, Commercial, Institutional, Industrial & Recreational.

A stable political environment could be a trigger for enhanced transactions in the real estate and an expected notification by Ministry of Environment notifying the eco-sensitive zone around the Okhla Bird Sanctuary will finally pave the way for the Competent Authority to start giving completion certificates to the developers, who will then begin the process of handing over the developed Units to the buyers.

Besides, the economic drivers such as upcoming Metro link from Noida to Greater Noida and the proposed Noida- Jewar metro alignment; Eastern Periphery Expressway; 650 acre Tech Zone being developed by Yamuna Expressway Industrial Development

Authority near Company's land parcels 2 & 3 and host of educational and sport entertainment faculties being developed by the State and other Entrepreneurs are further expected to provide value addition to the Company's Real estate development. The future outlook of the Company is bright.

Opportunities

The Yamuna Expressway region is emerging as the next node for large-scale developments such as integrated townships, logistics & warehousing hubs. The policy initiatives taken by the Government has created a new hope for new phase of growth in the real estate sector be it commercial and residential segment.

With the operational Motor Racing track and upcoming facilities like the Cricket Stadium, Night Safari, Proposed International Airport and Metro link will be the source of the next wave of development, which will expand the city boundaries. These initiatives are expected to be the key factors in providing an added impetus to the overall development of the region as well as play a vital role in attracting real estate activity going forward. The initiatives taken by the government would provide further impetus for conclusive urban development in the region.

Threats

The Company's business is significantly dependent on the general economic condition, market sentiments and government policy relating to urban development projects. The real estate development industry is highly fragmented. Moreover, the Company is operating in a highly competitive environment where demand and supply in the urbanized sector may influence the external business environment in which the Company operates.

Besides, historically the operation and maintenance of the Yamuna expressways are faced with inherent threats from the farmers and inhabitants of the areas through which the expressway passes. The Company is always seized of such threats and has worked out various probable solutions to the same for timely control.

Risks and Concerns

The company's ability to foresee and manage business risks is crucial in achieving favorable results. While management is positive about

Company's long term outlook, the initial traffic on the expressway and the annual traffic growth shall need to be monitored closely with due focus on delivery of its projects being undertaken on "Land for Development".

Given the huge gap between demand and supply in a rapidly growing economy like India, all businesses relating to urban infrastructure, power, roads & water, education, health, recreation etc. would witness significant growth over a sustained period.

Segment-wise/product-wise performance

The Company has only one segment i.e. Yamuna Expressway Project, an integrated project which inter alia includes construction, operation and maintenance of Yamuna Expressway and right for land development of 25 million square meter along the Expressway.

Financial Performance with respect to Operational Performance

The financial performance of the Company with respect to operational performance is satisfactory ensuring the Company's commitments of servicing its debts and enhancing the value for Shareholders.

Internal Control system and its adequacy

The Company has a proper and adequate system of internal controls to ensure that all assets are safeguarded and protected against loss from unauthorized use or disposition, and that the transactions are authorized, recorded and reported correctly.

Internal controls are supplemented by an extensive programme of internal audits, review by management and documented policies, guidelines and procedures. These controls are designed to ensure that financial and other records are reliable for preparing financial information and other reports, and for maintaining regular accountability of the Company's assets.

Material Developments in Human Resources/Industrial Relations.

The timely availability of skilled and technical personnel is one of the key challenges. The Company maintains healthy and motivating work environment through various measures. This has helped the Company to retain and recruit skilled work force resulting into the timely completion of the projects.
