MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Your Directors have pleasure in presenting the Management Discussion and Analysis Report for the year ended on March 31, 2017.

1. FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements based on certain assumptions and expectations of future events. The Company, therefore, cannot guarantee that these assumptions and expectations are accurate or will be realized. The Company's actual results, performance or achievements can thus differ materially from those projected in any such forward-looking statements. The Company assumes no responsibility to publicly amend, modify or revise any forward looking statements, on the basis of any subsequent developments, information or events.

2. INDUSTRY STRUCTURE AND DEVELOPMENTS

GTV Engineering Ltd is a Hi-Tech Heavy Steel Fabrication & Machining Company working as sub-contractors for various Giant Engineering companies and is engaged in the execution of several Infrastructural Projects (Power / Mineral / Cement / Railways & Metros projects). We do fabrication as per customer's designs & specifications. The Company is building up its network to play a significant role from time to time.

3. BUSINESS OVERVIEW AND OUTLOOK

The fabrication sector forms a sub segment of the engineering industry and is one of the smallest in terms of turnover. This is a highly fragmented and labor intensive sector with medium & small scale industries heavily dependent on job work. Fabrication applies to the building of machines, structures and other equipment, by cutting, shaping and assembling components made from raw materials by using various mechanical processes such as welding, soldering, forging, brazing, forming, pressing, bending and stress removal. Welding is a major process input in most fabrication jobs. Since the demand for fabrication sector comes from the engineering sector, especially capital goods, the growth of fabrication industry largely depends on the overall industrial scenario. The fabrication industry mainly caters to the sectors such as transportation, packaging, consumer products, and construction. The major user industry for the fabrication sector is the general structural fabrication followed by the railway & shipping, machine building and construction. Transportation sector also continues to be one of the largest markets for sheet metal fabrication followed by construction. Major players in the fabrication sector in India are – Larson and Toubro (L&T), Southern Structural's, Bellary Steels, Binny Engg, Triveni Structural's, Burn Standard and Ispat Profiles.

The raw material for the fabrication industry is easily available in India, only special steel needs to be imported, which is cheaper than indigenously available steel. However, with prices of steel increasing on global and domestic level, slowing demand and manufacturers in the engineering sector planning a reduction in production capacity, the growth of this industry is likely to undergo a moderation in the near term.

4. MARKETING

The Company is setting up a good marketing team to enter to increased turnover.

5. SWOT

STRENGTHS:

- **Diversified Product Portfolio:**

The company's manufacturing facilities and operations are quite versatile in nature and can cater to the wide range of EPC contractors in many sectors like Power (Hydro / Thermal / Nuclear), Railways, Cement, Minerals, Oil & Gas, Chemicals and other infrastructural projects. In-house Plant & Machineries and Technology with existing workforce can cater all the fabrication requirements to all these sectors.

- **Experienced Management Team:**

Besides the Promoters being Top Class Techno-Commercial professionals, the key working team of all the technicians and skilled workforce is quite experienced with adequate technical know-how in the fabrication of several varieties of Plant & Machineries required by EPC companies in diversified sectors. This is a great asset with the company.

- **Robust & Scalable Business Model:**

The infrastructure sector in India is ever-growing irrespective of any political scenario. Each sector i.e. Power / Railway / Cement / Minerals / Oil & Gas is in expansion mode. All these sectors provide enough potential for growth in multiples to all the players who provide manufacturing support. The company is well equipped to expand in multiples with suitable business opportunities. Expansion & Diversification – Both are quite possible in the company.

- **Strong Marketing & Distribution Network:**

By virtue of long experience and association with all the major EPC Companies operating in India (MNCs and Indian both), the company is well placed as regards to Marketing. All the customers provide strong support to the company.

WEAKNESSES:

- **Working Capital Intensive Business:**
The large working capital requires bank credit / LC & BG limits which is quite manageable.
- **Limited Geographical Reach:**
Since the company is located in the central region of the country, the company is not adversely affected by any geographical constraints.

OPPORTUNITIES

- **Huge Growth Potential:**
Due to high growth in all the infra-sectors i.e. Power Generation & Distribution, Mineral & Cement, Oil & Gas, Steel & Railways, the company has got high growth potential because the company caters to all the EPC corporate engaged in these infra-sectors.
- **Potential to provide other value Added Services:**
Presently the company is engaged in shop-manufacturing activities. The company can further take-up the site erection & commissioning activities and thus there is a great potential to provide value added services to the same customers.

THREATS:

- **Increased Competition from Local & Big Players:**
Competitors are quite limited because company is not into general fabrication, but it is into hi-tech & specialized fabrication of sophisticated & critical equipments. Most of the time, the demand is more than the facilities & capacities available.
- **Change in Government Policy affecting subsidy payment:**
Ir-respective of any political scenario every government keeps the “Power Generation / Railways / Minerals & Cement / Oil & Gas” Sectors on priority; hence these projects are always on Fast Track. In this view there is no any significant impact on the business of the company due to change in any political scenario.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
