

**Specker Memorial Library
Student Research Guide**

Or

The “Oh My Gosh, I have a Research Paper to Do! What Do I Do Now?” Guide

Purpose of this Research Guide

Greetings CCSJ Students!

The purpose of this guide is to:

- Familiarize you the student with the essential steps needed to write a well thought out research paper
- Assist students with the development of search strategies to locate print books and database articles on your chosen or assigned topic utilizing the electronic resources available at the Specker Memorial Library (SML)
- Make students aware of the variety of databases available to them at the SML
- Provide students with a step by step approach for accessing, printing, and emailing database articles
- Guide students to more effectively understand the key components of an academic article
- Assist students with developing a critical eye when it comes to evaluating articles from online sources
- Differentiate among the several different citation styles available when accessing database articles

Essential Steps for a Successful Research Paper

(based on information obtained from *The Best Schools.org*)

1. Know Your Task

- It's very important to understand what your instructor or professor is asking for **before** you start writing your research paper
- Spend time going over the assignment
- If you aren't sure, ask your instructor or professor for clarification

2. Pick Your Topic

- Use the guidelines given by your instructor or professor to help pick your paper topic

3. Research Your Topic

- Skim. Identify key points and arguments without getting bogged down and reading every word.
- Find reliable resources. Check out the sources on the article, use keywords from your internet search to search an academic database, or ask an expert whether or not what you learned is valid and if it is, where you can find a reliable source stating the same thing. Work to understand all of the different viewpoints and schools of thought on your topic. This can be done by reading a variety of articles, reading a book or article that gives an overview of the topic and incorporates different points of view, or talking to an expert who can explain the topic in depth.
- Be a critical reviewer of the information you recover and strive to understand multiple viewpoints on the topic

4. Organize Your Research

- Begin creating your bibliography.
- Bookmark electronic resources you will be using
- Use sticky notes or notecards if you prefer a printed list of sources

5. Form a Thesis

- Develop your thesis – a short statement to your readers on what you intend to prove or explain
- Avoid making your statement personal; i.e. "My paper is going to prove that...."
- Take advantage of the **CCSJ Student Success Center** to check on appropriateness of your thesis. A poorly constructed thesis is not a good way to begin your paper!

6. Create an Outline

- Unless your instructor is asking you to construct a particular style of outline and turn it in, don't be so concerned about adhering to a rigid pattern. Organize the information for your paper in a manner that fits the assignment and the information you have.

7. Write

- For your initial draft, focus on the writing and less on grammar and being perfect
- Review your research before starting to write
- Work from your own ideas on the subject while utilizing your research. You will less likely fall into plagiarism traps.
- Word-for-word quotes will require citations however common facts such as "*the Earth is the third planet from the Sun*" does not require citing

8. Edit for Content

- Examine your paper to see if the structure, organization, wording, and length is appropriate and meets the requirements of the assignment
- Once again consider utilizing the services of the **CCSJ Student Success Center** to look over this stage of your paper – a second set of eyes is always useful

9. Edit for Grammar and Check Those Citations

- Check your paper for proper grammar and punctuation. There are several print sources available in the CCSJ library collection for assisting with this task:

Publication Manual of the American Psychological Association 7th Edition

Chicago Manual of Style 17th edition

MLA Style Manual 9th edition 2021

Associated Press Style Book 55th edition 2020

in addition to several online resources such as *Grammarly*. Be sure to check with your instructor to see if there is a specific style resource you should be following for citations.

10. Re-read and Submit Your Research Paper

- Plan on turning your paper in early in case an "emergency" comes up such as your printer is not working

KEEP
CALM
AND
WRITE YOUR
RESEARCH PAPER

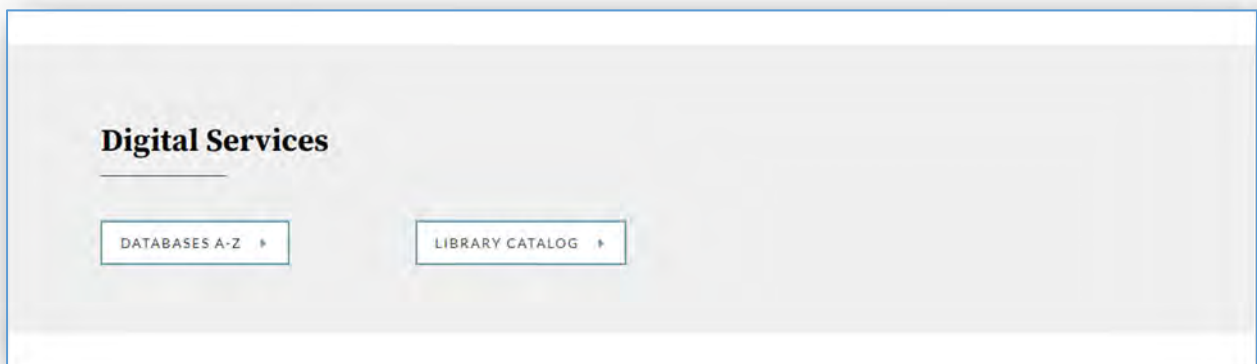

Locating Research Material in the CCSJ Library

Research material in the CCSJ library is of two types: print and online. To access books/videos in our collection for your research topic, please follow the steps outlined below:

1. Go to the CCSJ.edu website:

- Click on the “Academics” link
 - Locate the “Specker Library” link on the pull down menu.
2. To access the online catalog to obtain print and digital media housed in the library, click on “**Library Catalog**”:

3. The online catalog can be searched using various approaches:
 - **Basic** – locates materials that contain the words you type in

- **Advanced** – Allows you to utilize “Boolean” logic which enables you to refine your search using qualifiers such as AND, OR, or NOT
- **Subject** – locates materials by using predefined Library of Congress Subject Headings. For example, for materials on the Civil War you would need to use the subject heading “united states civil war” not “war between the states”. Library of Congress Subject Headings are available at <https://www.loc.gov/aba/publications>
- **Author** – allows you to locate all the print holdings the library has by a particular author
- **Course Reserve** – if your instructor has put an item on reserve for your class, you can locate it through this search alternative:

Pegasus 

Search My Searches My List My Account

Basic Search
Search all items in Specker Memorial Library

Basic Advanced Subject Author Course Reserve

Search: within

Records per page:

Search Reset

Search Tips: enter words relating to your topic, use quotes to search phrases: "world wide web", use + to mark essen

4. Library books are shelved by the Library of Congress call number system, in a combination of alphabetic and numerical order. DVDs (both popular titles and academic) are shelved on the first floor of the library near the circulation desk alphabetically by title. They are available for check out by the campus community. The entries that come up for your search will tell you if the item is available for check out and also its location. Locations usually include:

- **“Stacks”** – the four shelving floors located to the right and past the Collaboration Rooms
- **“On Reserve-Inquire at Circulation Desk”** – These are materials that instructors have placed in a special reserved section at the circulation desk. Check with the circulation desk for details on obtaining these items
- **“First Floor-Reference”**- These materials include encyclopedias, dictionaries, and subject specific quick reference books. Their use is usually limited to in-house use only but special arrangements can be made with the librarian to check them out overnight

- **“Fiction-1st Floor”** - here you will find a sampling of the fiction works in our collection. These are shelved alphabetically by author.
- **“Rare Book Collection”**, - located next to the fiction area on the 1st floor and include books from around the world usually dating prior to 1900.

Below is a typical read-out based on a search in the online catalog:

The screenshot shows a library catalog search results page. At the top, it says "Titles" and "Search all items in Specker Memorial Library". Below that, it indicates "8 results found" and "All Fields(great gatsby)". There are buttons for "Edit Search" and "Save Search".

The results are displayed in a table-like format with three items:

	Print	Export	Add to List	Select	Page
1		Great Gatsby [videorecording] / directed by Baz Luhrmann ; screenplay by Baz Luhrmann & Craig Pearce ; produced by Baz Luhrmann ... [et al.] ; executive producers, Barrie M. Osborne and Bruce Berman, Shawn "Jay Z" Carter ; a Warner Bros. Pictures presenta			
					2013 DVD 339 ✓available, On Reserve- Inquire at Circulation Desk
2		Great gatsby.			
					Fitzgerald, F. Scott (Francis Scott), 1896-1940. 1953 PS3511 .I19 .G7 1953 ✓available, 1st FI Fiction
3		Great Gatsby / by F. Scott Fitzgerald.			
					Fitzgerald, F. Scott (Francis Scott), 1896-1940. 1974 PZ3.F5754 Gr2 ✓available, Stacks

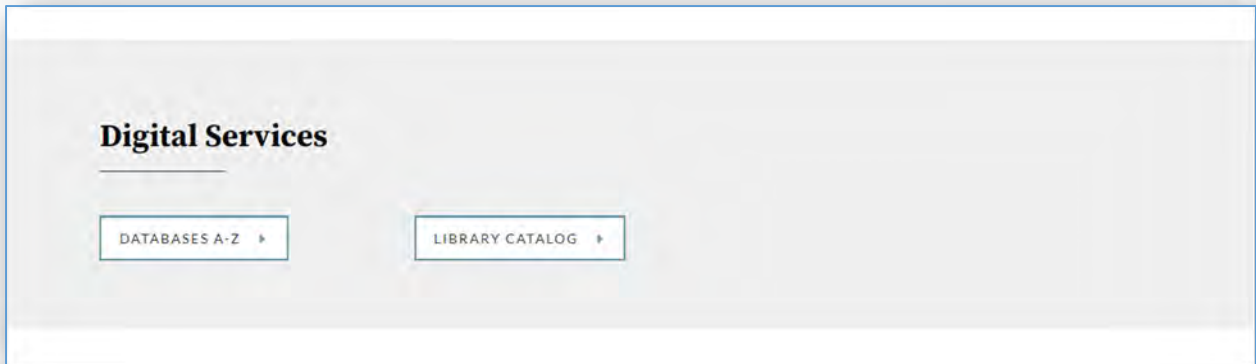

All three of the items shown are available for check-out at the circulation desk.

To access online materials through our database offerings for your research topic, please follow the steps outlined below:

1. If you wish to explore the databases:

- Click on **“Databases A-Z”**.
- Be prepared to enter your student Wave ID which is the first initial of the first name + full last name + last 5 digits of the student ID#.
- Then enter your password which is your 9-digit student ID number.

The library has a significant collection of online journal articles provided by EBSCO, one of the largest database vendors in the world. When you have learned how to use the Specker Library databases, you will be able to search EBSCO Databases at any public or academic library.

- 2.
- After clicking on the “Databases A to Z” link, enter your student Wave ID which is the first initial of the first name + full last name + last 5 digits of the student ID#.
 - Then enter your password which is your 9-digit student ID number.

STUDENT ACCESS
The student WaveID is the first initial of the first name + full last name + last 5 digits of the student ID#. The Password is the 9-digit student ID number.

FACULTY/STAFF ACCESS
The faculty/staff WaveID is the user name used to login to Windows/Outlook/Office 365. The Password is the 9-digit employee ID number.

SIGN IN WITH GOOGLE DOES NOT WORK-- ONLY SIGN IN WITH WaveID AND PASSWORD.

3. While there are several specialized databases and research assistants available from this page, it is suggested that you start your research by clicking on the “**EBSCOhost Web**”. This will take you to the main page containing the databases.

4. There are two major types of databases available: **multidisciplinary** and **subject-specific**
- Multidisciplinary databases give you access to articles that are published across a wide variety of disciplines but they may lack the depth you need for your research assignment.
 - Subject-specific databases usually limit their coverage to journals for a specific discipline. The depth is much improved over multidisciplinary sources but you may find a lack of results.

[Academic Search Complete](#)

Academic Search Complete is the world's most valuable and comprehensive scholarly, multi-disciplinary full-text database, with more than 8,500 full-text periodicals, including more than 7,300 peer-reviewed journals. In addition to full text, this database offers indexing and abstracts for more than 12,500 journals and a total of more than 13,200 publications including monographs, reports, conference proceedings, etc. The database features PDF content going back as far as 1887, with the majority of full text titles in native (searchable) PDF format. Searchable cited references are provided for more than 1,400 journals.

[Title List](#) [More Information](#)

At the above page, you will have a choice of searching a single database, a group of databases or all databases.

- Selecting **“all databases”** means you will be searching all of the available databases simultaneously. Before you have learned and understood thoroughly the content and coverage of the databases associated with your academic area of interest, it is recommended that you select **“all databases”**. Making that selection may sometimes slow down the search rate however.
- Click **“Continue”** when you have completed your selection.
- If you would like more information on a particular database, you can consult the **“Specker Library Database Resources”** which is available at the end of this research guide.
- You can also view the brief descriptions of each database from the page shown here as well.
- If you are interested in which journals a particular database indexes (journal titles that the database has pulled articles from), you can also get that information by clicking on the **“Title List”** for any database shown in the listing.

Find any of my search terms

SmartText Searching [Hint](#)

Apply related words

Also search within the full text of the articles

Apply equivalent subjects

- After you have clicked “continue” at the previous page if you are searching all available databases at once or click on the name link of a specific database, you will come to the page above, where you will see 6 search boxes.
- The left three are for you to put in key words. Keywords are the main points of your topic. For example if your research topic is *“Hunger in Asia as a result of the cultural revolution led by Mao Zedong”*, you would not enter this entire phrase. Instead you would perhaps enter *hunger, Asia, cultural revolution, Mao Zedong*.
- The three on the right are for you to choose areas you want to search, for example, if you want to search your topic in title, the entire article, in abstract, or in the subject area. Databases typically employ Boolean Logic. This allows you to expand or refine your topic search using **AND, OR, NOT**. For example if you entered the topic “nuclear energy” in the first box but you wanted to limit your search to nuclear fission not fusion, you could click **AND** and enter “fusion” in the second box and then click **NOT** and enter “fission”.

In addition to choosing from a variety of search modes such as Boolean Logic, you can also add search limiting definers to make your search for articles more efficient.

- You will normally want to select **“full text”** so that you not only pull up a summary or abstract of the article, but you also have instant access to the whole article in its entirety.

- If your instructor wants you to limit the journals that you obtain articles from to sources that have a more authoritative reputation in your subject area, you can select **“scholarly (peer reviewed) journals”**.
- Sometimes an instructor may restrict you to obtaining articles from a specific journal. In that case, you can select **“publication”** and type in the publication name in the blank provided.
- Instructors often will request that you only obtain articles from a specific time period, such as 2010 to 2020. You can specify the time period to search in by entering the appropriate years in the **“published date”** section of the page.
- What if you looking for a specific article title you heard about in class? If you know the journal name and time it was published, you can use the **“publication”** and **“date published”** to locate the article fairly quickly.

The screenshot shows a 'Search Options' panel with a 'Reset' button in the top right corner. The panel is divided into several sections:

- Search Modes and Expanders:**
 - Search modes:** Radio buttons for 'Boolean/Phrase' (selected), 'Find all my search terms', 'Find any of my search terms', and 'SmartText Searching [help](#)'.
 - Apply related words:**
 - Also search within the full text of the articles:**
 - Apply equivalent subjects:**
- Limit your results:**
 - Full Text:**
 - Scholarly (Peer Reviewed) Journals:**
 - Publication:** A text input field.
 - Document Type:** A dropdown menu with options: All, Abstract, Article, Bibliography.
- References Available:**
- Published Date:** A date range selector with fields for 'Start month' (Month), 'Start year' (), 'End month' (Month), and 'End year' ().
- Publication Type:** A dropdown menu with options: All, Periodical, Newspaper, Book.
- Language:** A dropdown menu with options: All, Afrikaans, Arabic, Azerbaijani.

- After you have selected your search terms and parameters, simply click **“search”** and you will next see the results of your inputs. As you can see for this search shown below, 849 results came up.
- If the number of articles that comes up is too large to manage, you can enter some additional search terms or alter your search parameters.
- If you click on an article title, you will usually see a summary or abstract of the article. Reading through this information can help you decide if the article might be one to hang onto.

Nuclear fusion in the deuterated cores of inflated hot Jupiters.

Authors: Ouyed, Rachid¹ r.ouyed@ucalgary.ca; Jaikumar, Prashanth²

Source: Astrophysics & Space Science. Mar2016, Vol. 361 Issue 3, p1-10. 10p.

Document Type: Article

Subject Terms: NUCLEAR fusion; DEUTERATION; HOT Jupiters; CORE-mantle boundary; DEUTERIUM; GAS giants

Author-Supplied Keywords: Planetary systems; Planets and satellites: general; Planets and satellites: interiors

Abstract: Ouyed et al. (Astrophys. J. 501:367,) proposed Deuterium (DD) fusion at the core-mantle interface of giant planets as a mechanism to explain their observed heat excess. But rather high interior temperatures ($\sim 10^5$ K) and a stratified D layer are needed, making such a scenario unlikely. In this paper, we re-examine DD fusion, with the addition of screening effects pertinent to a deuterated core containing ice and some heavy elements. This alleviates the extreme temperature constraint and removes the requirement of a stratified D layer. As an application, we propose that, if their core temperatures are a few times 10^4 K and core composition is chemically inhomogeneous, the observed inflated size of some giant exoplanets (hot Jupiters) may be linked to screened DD fusion occurring deep in the interior. Application of an analytic evolution model suggests that the amount of inflation from this effect can be important if there is sufficient rock-ice in the core, making DD fusion an effective extra internal energy source for radius inflation. The mechanism of screened DD fusion, operating in the above temperature range, is generally consistent with the trend in radius anomaly with planetary equilibrium temperature T_{eq} , and also depends on planetary mass. Although we do not consider the effect of incident stellar flux, we expect that a minimum level of irradiation is necessary to trigger core erosion and subsequent DD fusion inside the planet. Since DD fusion is quite sensitive to the screening potential inferred from laboratory experiments, observations of inflated hot Jupiters may help constrain screening effects in the cores of giant planets. Anatomy of an Academic Article

(Adapted from UNCW's Writing Services)

An academic article is written in a quite different format from let's say an article you find in *People* magazine. Below are the key items usually found in most academic, research based articles that you will need to base your paper on:

The infographic is titled "Anatomy of an Academic Article" in a black cursive font at the top. Below the title is an illustration of a pair of hands holding an open book with a blue cover and white pages. The background is divided into three horizontal sections: a top yellow section with the title and illustration, a middle purple section for the "ABSTRACT", and a bottom yellow section for the "INTRODUCTION".

ABSTRACT

Tells you briefly what experiment was done and what was found.

INTRODUCTION

Explains motivation and importance of research, provides background information.

LITERATURE REVIEW

Reviews a variety of the most pertinent sources on the topic at hand, as determined by the author. They can be a standalone academic article on its own, or a “mini literature review” can be part of a paper’s Introduction that helps establish context.

METHODOLOGY

Ideally describes the experimental design, techniques, materials and/or participants, and steps needed to replicate the data-gathering process.

RESULTS

Provides the raw data you might need for your own research. Figures and tables provide the data in a compact format for easy viewing.

DISCUSSION

Highlights important findings/interpretations from the raw data, presents opposing views/limitations, and places the discussion within the field at large.

CONCLUSION

Gives reasons for conclusions based on results, reinforces major claims. May also suggest areas where further research is needed.

WORKS CITED / REFERENCES

Regardless of citation style, all references pages point back to where the author found the information used in their research. Readers often use the Works Cited or References as a way to find even more published research related to the topic at hand.

Disclaimer: Each academic article is different, and different disciplines emphasize different components (and citation styles). Some of the above components might be missing from your article, in a different order, or your article might include components not mentioned above. That’s okay! You can still use what you already know to help figure out any new sections you encounter.

The screenshot shows a search interface for Calumet College of St. Joseph. The search term is "nuclear fusion". The results list two items:

- 1 The Plasma Compression Fusion Device—Enabling Nuclear Fusion Ignition.**
 By: Pais, Salvatore Cezar. IEEE Transactions on Plasma Science. Nov2019, Vol. 47 Issue 11, p5119-5124. 6p. DOI: 10.1109/TPS.2019.2942997.
 Subjects: NUCLEAR fusion; TOROIDAL magnetic circuits; PLASMA density; ELECTROMAGNETS; PLASMA confinement; INERTIAL confinement fusion; TOROIDAL plasma; Switchgear and switchboard, and relay and industrial control apparatus manufacturing.
 Request this item through interlibrary loan.
- 2 Nuclear fusion in the deuterated cores of inflated hot Jupiters.**
 By: Cuyed, Rachid, Jaikumar, Prashanth, Astrophysics & Space Science. Mar2016, Vol. 361 Issue 3, p1-10. 10p. DOI: 10.1007/s10509-016-2672-9.
 Subjects: NUCLEAR fusion; DEUTERATION; HOT Jupiters; CORE-mantle boundary; DEUTERIUM; GAS giants.
 PDF Full Text (920KB)

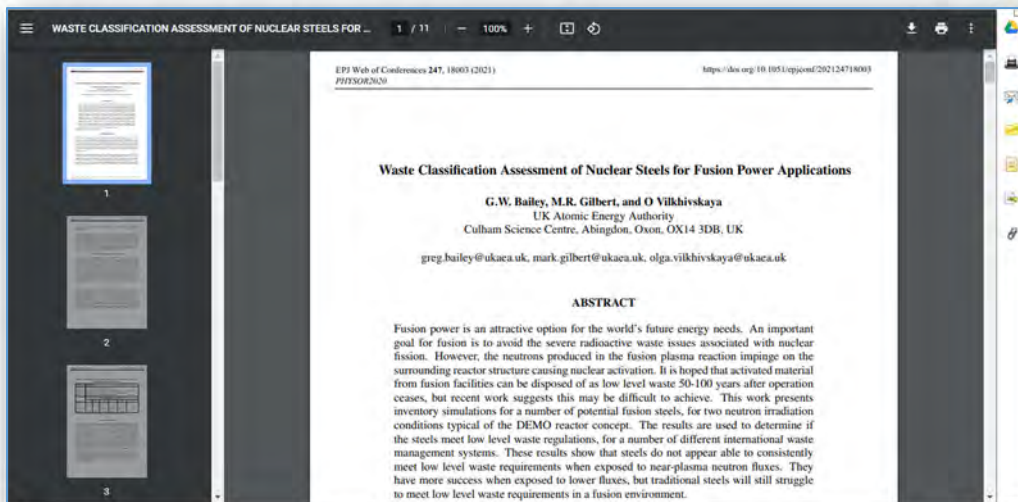

From our previous result list, shown again above, we can see that the first article comes from a journal from which the article is not available in its entirety.

- If you would like access to the whole article, simply click on **“request this item through interlibrary loan”**.
- A new window will open that you will have to fill out in an attempt to obtain the article from another library.
- The second article shown is available as a PDF full text. The second article shown above is full text and is available for your use. If after reading through the article abstract, you decide that the article may be useful to your research, click on the:

link (or sometimes it will say *“HTML Full Text”*) located to the left of the abstract information.

After clicking on the full text article, the following will appear:

- Above is shown the full text article which is normally shown as it was from the original source. As you can see, this particular article is 11 pages long.
- If the article is especially long or you would rather not have to print it off at this time, you can email it to yourself by clicking on the “**email**” icon located to the right of the document and right below the “**printer**” icon. The following will then appear:

An "E-mail" dialog box with the following fields and options:

- Number of items to be e-mailed: 1
- E-mail from: support@ebSCO.com
- E-mail to: [text input field]
- Separate each e-mail address with a semicolon.
- Subject: [text input field]
- Comments: [text input field]
- Send in plain text format
- Buttons: Send, Cancel
- Include when sending:
 - PDF as separate attachment (when available)
 - Standard Field Format
 - Detailed Citation and Abstract
 - Citation Format
 - ABNT (Brazilian National Standards)
 - Customized Field Format

- Type the email address the article is to go to.
- In the subject line, it would be a good idea to label the article if you are going to be accessing and emailing several articles. Then click send and you are done!

Assessing Articles and Sources

- Once you have obtained a particular source or article that you may wish to use in your paper, you will want to assess the credibility and authority of the article. Your instructor may require you to only use “peer reviewed” articles in your paper. This is a parameter

you can set when you are entering your search terms into the database. Peer reviewed articles are written by scholars or experts in the field. The article will also usually contain an extensive footnote and bibliography section as well so that you see from where they based their research on. These types of articles also assume the reader has some background in the subject matter of the article. Your instructor may also ask that you include primary and secondary sources in your research.

- Primary sources provide the reader with a first-hand account of an event or experience. Examples of these include diaries, letters, interviews, photographs, creative works, oral histories, newspaper articles, etc.
- Secondary sources are those that are produced by other persons at a later time that did not experience the event first-hand. Examples of these sources include: books, magazine and journal articles, textbooks, biographies, encyclopedias, dictionaries, literature reviews, etc.

Popular sources can give you a good general background on a subject and are usually easier to read. However these sources will need to be evaluated by you for credibility and they often do not include citations. Such sources include newspaper articles, magazines, blogs, Twitter feeds, web sites, etc.

When evaluating popular sources, consider the following:

1. Authority

- Who is the author; is it an individual or organization?
- What are the author's professional qualifications in the field?

2. Accuracy

- What is the purpose of the content?
- Does the content appear well researched?
- Are there references to the sources of information used in the article?
- If websites are suggested, are they quality sites?

3. Currency

- When was the item written or published?
- Is timeliness of information important to your assignment?
- If the information is from a website, has it been updated recently?

4. Publisher

- Where is the content from?
- If it is from a website, what is its domain? Domain names are used as identification labels to indicate ownership or control of a resource. Here is a list of common domains:

Domain Code	Source
.com	commercial site
.gov	U.S. government site
.org	non-profit organization site
.edu	educational site

Citation Styles

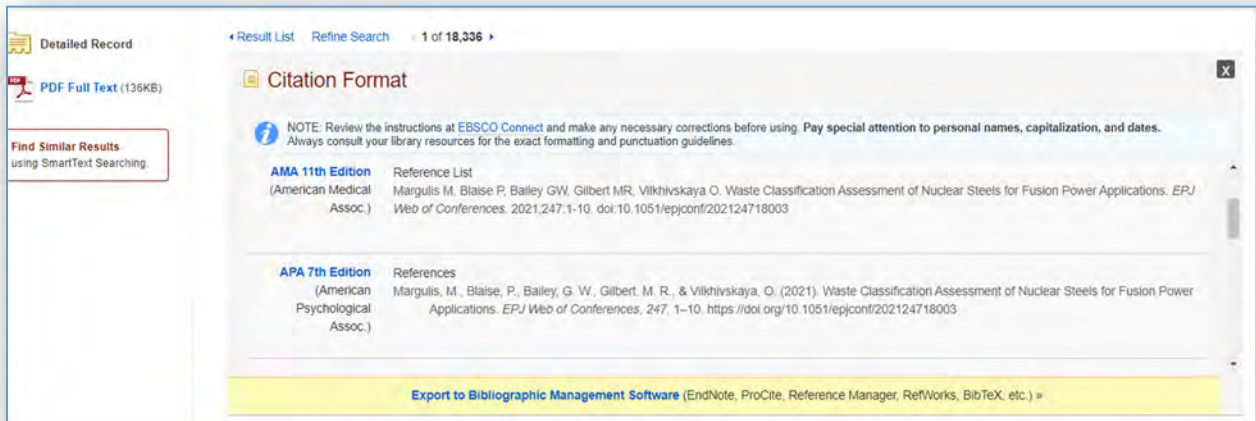

Often times, the information in the articles you pull up will become part of a paper that you will be turning in. As part of that paper, you will usually have to provide a bibliography or works cited page for your assignment. EBSCO databases offer a variety of citation forms such as AMA, APA, and MLA.

- To obtain the cite options for your particular article, simply click on the article title which will take you to the page you see above.
- Then click on the “cite” button on the right hand side tool bar as shown in the picture below:

The screenshot shows a search result page for an article titled "A COMPARISON OF OXIDE DECAY HEAT SIMULATIONS AND NUCLEAR DATA LIBRARIES WITH FUSION IRRADIATION EXPERIMENTS." The authors listed are Maurizio M. Baccari, Marco L. V. de Paoli, Antonio M. Maurizi, Maurizio Angeloni, Marco Gilbert, Stefano Zoni, Stefano Zoni, Chiara Nobile, Maria Pilon, Maria Pilon, and J. C. Subir. The source is identified as "EPJ Web of Conferences" 2021, Vol. 247, p4-6. The document type is "Article" and the subject terms are "NUCLEAR fusion" and "NUCLEAR reactors". On the right side, there is a "Tools" menu with options: Google Drive, Add to Folder, Print, E-mail, Cite (highlighted with a yellow circle), Export, Create Note, and Permissions.

- Upon clicking the “cite” button, you will be taken to the screen above where you can scroll through the available bibliographic citing versions.
- You can then print these out or cut and paste into another document to hang onto them.
- Be sure to consult with your instructor to see if they have a particular citing version they require you to use. If you want more information on a particular citing method, just click on the citing method highlighted in blue on the page.

At the conclusion of this research guide, you will find a listing of the more than 70+ databases that are available to you on the CCSJ campus:

Specker Library Database Resources

1. Academic Search Complete

Academic Search Complete is the world's most valuable and comprehensive scholarly, multi-disciplinary full-text database, with more than 8,500 full-text periodicals, including more than 7,300 peer-reviewed journals. In addition to full text, this database offers indexing and

abstracts for more than 12,500 journals and a total of more than 13,200 publications including monographs, reports, conference proceedings, etc. The database features PDF content going back as far as 1887, with the majority of full text titles in native (searchable) PDF format. Searchable cited references are provided for more than 1,400 journals.

2. AHFS Consumer Medication Information

AHFS Consumer Medication Information is a trusted source and recognized standard for patient drug information, available in both English and Spanish. Published by the American Society of Health-System Pharmacists, AHFS includes more than a thousand drug information monographs written in lay language for consumers and has been a Top Ten Award Winner in the Department of Health and Human Services National Consumer Education Materials Contest. This content is updated monthly.

3. Alt HealthWatch

This database focuses on the many perspectives of complementary, holistic and integrated approaches to health care and wellness. It offers libraries full text articles for more than 180 international, and often peer-reviewed journals and reports. In addition, there are hundreds of pamphlets, booklets, special reports, original research and book excerpts. *Alt HealthWatch* provides in-depth coverage across the full spectrum of subject areas covered by complementary and alternative medicine. This database features indexing and abstracts going back as far as 1984, and full text going back as far as 1990.

4. APA PsycArticles

APA PsycArticles[®], from the American Psychological Association (APA), is a definitive source of full text, peer-reviewed scholarly and scientific articles in psychology. It contains articles from journals published by the American Psychological Association (APA), its imprint the Educational Publishing Foundation (EPF), and from allied organizations including the Canadian Psychological Association and the Hogrefe Publishing Group. It includes all journal articles, book reviews, letters to the editor, and errata from each journal. Coverage spans 1894 to the present and nearly all APA journals go back to Volume 1, Issue 1.

5. Biography Reference Bank (H. W. Wilson)

Wilson's largest biography database has combined the in-depth, original profiles of Wilson Biographies Plus Illustrated, plus the thorough periodicals coverage of Biography Index, full-text articles, page images, and abstracts from the complete range of Wilson databases (including

biographical profiles, feature articles, interviews, essays, book reviews, performance reviews, speeches, or obituaries). With links to every article focused on any individual in nearly every WilsonWeb database, Biography Reference Bank offers a breadth and depth of information you'll find in no other biography database. It covers over 500,000 people and includes over 36,000 images!

6. Biography Reference Center

Biography Reference Center offers a comprehensive collection of more than 460,000 full-text biographies, including the complete full-text run of *Biography Today* and *Biography*, as well as thousands of narrative biographies that are not available in other databases.
