AV MOUNTING **MADE SMART**

What once started as a graduation assignment from only one student in Industrial Engineering & Management is now a thriving company with 50+ employees, dedicated to develop smart mounting solutions for the professional AV market.

There is more to our mounts than just metal:
we supply not just any piece of metal to mount your valuable audiovisual and multi media equipment to, we supply smart mounting solutions made of metals: *"SmartMetals Mounting Solutions".*

Smart does not only apply to the functionality of our products, smart also applies to the way we work. By closely following the evolutions and needs of the audiovisual market, listening to and closely working together with our customers we stay ahead of the game.

We take great pride in the fact that all our products, from standard to custom-made, are of Dutch design. Developed in house and manufactured in the Netherlands. Our products distinguish themselves in quality, ease of use and functionality.

Despite the fact we have grown into a prominent international supplier it does not mean we have forgotten where we came from: underneath the shimmering successes we remain simple humans. We care. Not just about making innovative products but above everything we care about you and your business.

All team members of

The SmartMetals Team

ABOUT US

SmartMetals explained

SmartMetals Mounting Solutions is one of the leading international suppliers of audiovisual mounting solutions. Established and based in the Netherlands, we deliver high quality solutions for professionals.
Resources devoted to R&D translate in great responsiveness in the development of innovative products, closely following the evolutions and needs of the audiovisual market and offering quality in design.

Our complete product range includes fixed and mobile mounting solutions, motorized or manually in height adjustable or on a fixed height for projectors, flat screens and whiteboards. We offer a free warranty of 5 years on all our products.

Last but not least we develop custom made solutions for audiovisual installation, including flat panel housings and kiosks, for indoor and outdoor use.

WHY CHOOSE US?

Quality & Functionality

Our goal is to reach true functionality in all our products by combining innovative product design with high quality materials and craftsmanship.

Flexibility & Innovation

We respond to our customers' requests in a flexible way and timely manner.
Developing and improving our products and services is a dynamic and continuous process.

Quick & easy installation

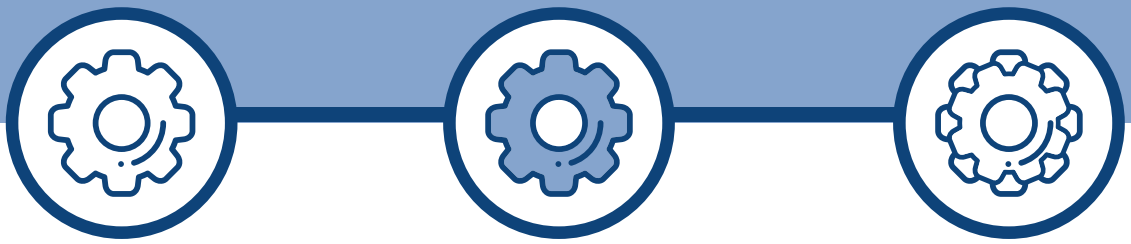
All our products are designed to ensure quick and trouble-free installation in any environment.

Honest business

We believe in honesty. We believe in caring. We treat our customers, partners, suppliers as well as our employees the way we would want them to treat us. As simple as that.

Just because you don't find it, doesn't mean we don't have it.

We have all sorts of smart mounting solutions, ranging from standard to customised to completely custom-made ones. Not every project benefits from our standard solutions, nor does every customer settle for standard. When you are involved in a project where demands go beyond what our standard products have to offer, please contact us:
We hear what you ask, listen to what you need and supply you with a solution that embodies just that.



STANDARD

We have a vast product range as presented to you in this catalogue: all standard mounting solutions for your flat panels, projectors and whiteboards, usually available from stock or within a few days after order.

CUSTOMISED

When you require a slight deviation of our standard product, like for example an other colour or an other length, we happily customise our standard product to meet your wishes.

CUSTOM-MADE

Although you have taken inspiration from our standard product range, you want something totally different. It is our pleasure to develop a custom-made product for you to accommodate your needs perfectly.

FROM CONCEPT TO COMPLETION

STEP 1
Product request.

You contact us with your request for a custom-made product. Together we determine product requirements and we provide you with an offer. Upon order we move on to the next step.

STEP 2
Specification drawing.

After order we will convert your demand and, if any, concept drawing into a detailed specification drawing. Upon presentation you check details and we will process minor changes if any. When you are satisfied with the results, you give us your approval for production.
Process duration: 1-2 weeks

STEP 3
Production.

Materials are purchased. Individual make parts are produced after which they are subjected to a provisional quality check.
Process duration: 2-4 weeks

STEP 4
Finishing and assembly.

All manufactured metal make parts are galvanized or powder coated after which they are subjected to yet again a quality check. Then assembly starts followed by final testing the end-product. Remains only packing before collection by you or the carrier.
Process duration: 1-2 weeks

Easy install, safe use

The SmartMetals range of flat panel wall mounts is extensive. Suitable for landscape and portrait positioning of flat panels with a maximum weight of 160 kg.

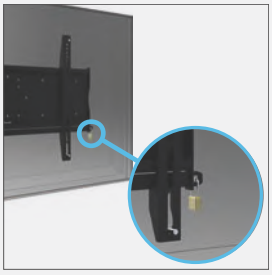
Installation is a breeze as all mounts are supplied including mounting materials for the flat panel. And since safety and security come first (both people and properties need to be kept safe), we made securing your installation easy: simply lock the safety bar with a padlock.

The 052.xxxx Series wall mounts, except for the 052.1200 project wall mount, are part of our modular system. With the 170 x 140 mounting pattern they combine perfectly with for example our floor stands and ceiling mounts.

WALL MOUNTS

Benefits & Applications

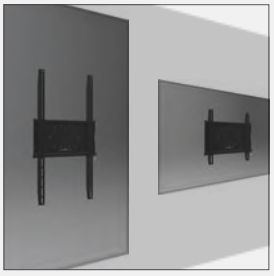
✓ Anti-theft



✓ Minimal depth

✓ Tiltable

✓ Landscape & portrait



Modular designed to offer multiple application options

WALL

Easily install your flat panel to the wall. We offer models for landscape and for portrait use. All models can be secured with a pad lock.

WEAK WALL

In case a wall is too weak to install a flat panel and wall mount and space is too limited to place a floor stand the solution is a floor to wall stand. The floor supports the weight of the monitor in this case instead of the wall.
The maximum load of the stand head is 100 kg.

CEILING

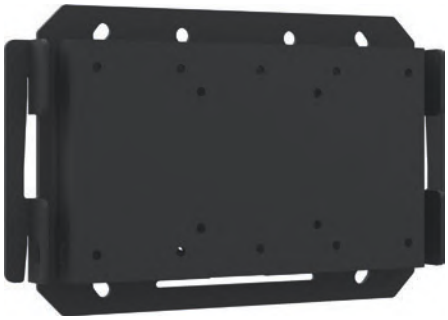
It is possible to mount all VESA and universal screen mounts to the ceiling by using SmartMetals tube sets. The tube sets are available in three standard lengths which can be shortened on location. One or two flat screens (on top of one another or back-to-back) can be mounted to the tubes.

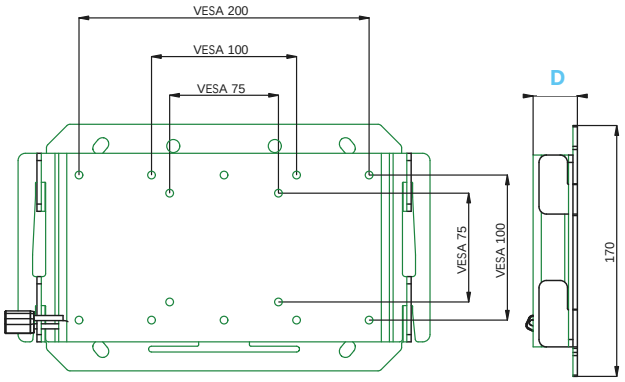
FLOOR

To install a flat panel on the floor you combine a wall mount and floor stand.
We offer two types of flat panel wall mount: with a three-point-coupling mounting system, ideal for rental purposes (see our rental catalogue) or a 170 x 140 mm mounting system for fixed installations.

VESA WALL MOUNTS

VESA WALL MOUNT, MAX. 200 x 100





Article code	Tilt function	Depth (D)
052.3000	-	30 mm

UNIVERSAL WALL MOUNTS

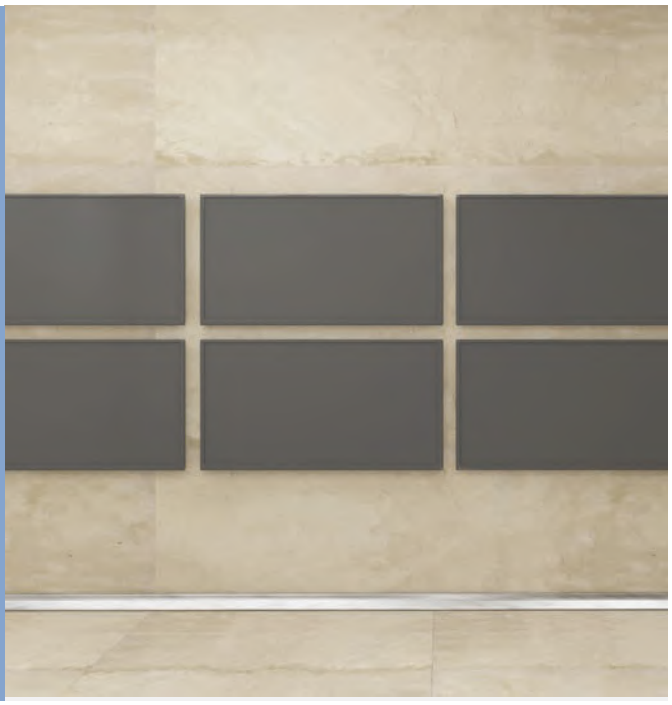
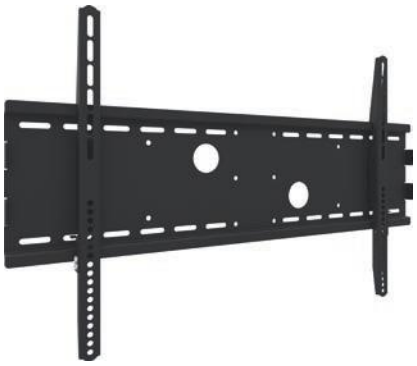
Project wall mount

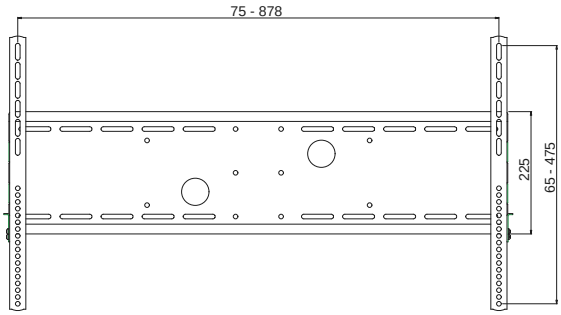
COST EFFICIENT

Our project wall mounts, like all other wall mounts, are easy to use and install flat panels with a maximum weight of 75 kg. Particularly interesting is its budget friendly price.

This wall mount falls outside our modular system lacking the specific 170 x 140 mounting pattern neccessary for combination with our floor stands, ceiling mounts and other products.







052.1200

Project wall mount: max. 878 x 475 mm

A clear view for everyone

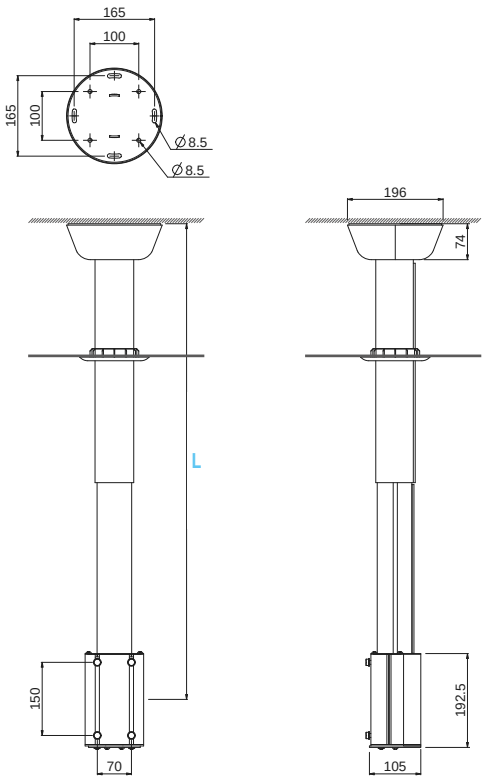
When your wall space is limited or the wall is too weak for mounting, you may want to consider a ceiling mount.
Ceiling mounting your flat panel with the SmartMetals Ceiling Mount Series offers a clear view for everyone in the room.

All models are telescopically adjustable in height and rotatable -90° - +90° and the ones with VESA bracket are tiltable max. 15° as well. Cables can run through the cable duct all the way up into the supplied ceiling rose or into the suspended ceiling which is neatly finished with the included ceiling finishing ring.

The biggest benefit of this range is the saving of precious installation time due to the telescopic adjustment for a price where others offer you a cuttable fixed length.

CEILING MOUNTS

Heavy Duty Series



CEILING MOUNT

Telescopically adjustable and rotatable from -90° to +90°. Supplied including ceiling rose for architectural ceiling and ceiling finishing ring for a suspended ceiling. Please add a universal wall mount (which at the same time serves as a monitor bracket) to mount your flat panel to the tube set.

STANDS & TROLLEYS

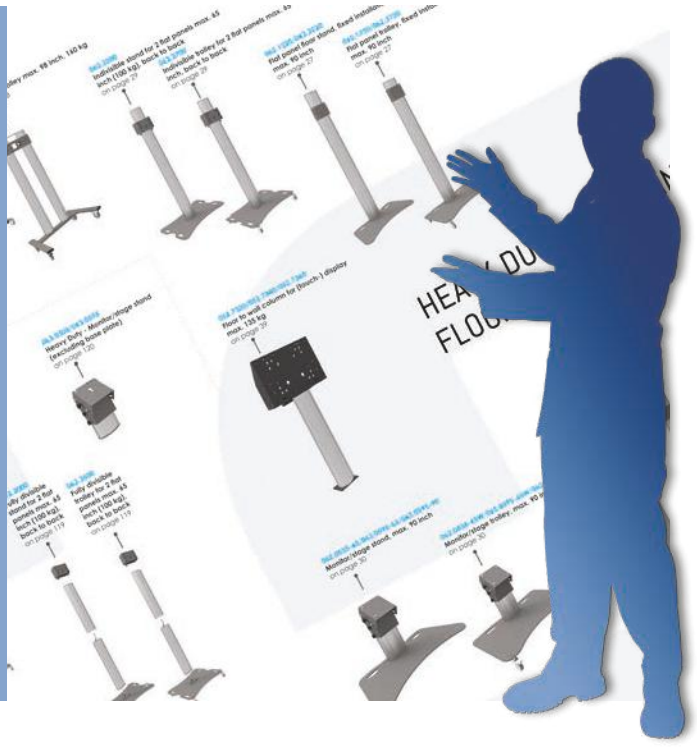
Benefits & Applications

A MODEL FOR EVERY PURPOSE

SmartMetals offers a wide range of floor stands: with or without wheels, for one or more screens, for light or heavy weight screens.

The Light Series stands are supplied with a smart VESA bracket.

The Heavy Duty Series are fitted with the 170 x 140 modular mounting system to combine with one of our universal wall mounts (see page 9) offering clearance-free mounting.



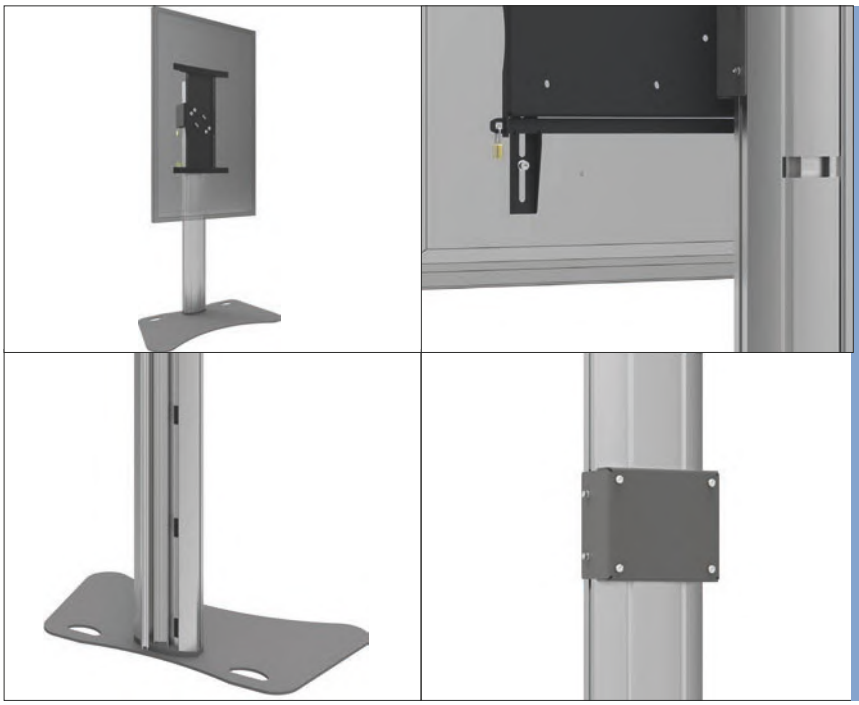
Applications

ON A BASE PLATE

For a (semi) permanent freestanding installation of your monitor a floor stand on a base plate is what you are looking for. Our extensive range offers floor stands for light weight LED screens of max. 30 kg up to the heavy weight flat panels up to 160 kg.

NEW

You might also want to take a glance at the stands and trolleys from our latest **Installation Series** on page 37:
The smart flat panel mounting you are used to, but now with maximum user friendliness.



BENEFITS

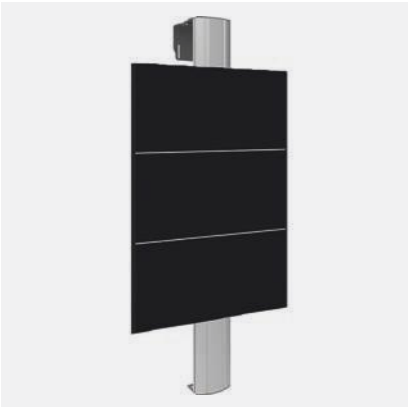
- ✓ For portrait and landscape screen position
- ✓ Suitable for displays up to 98 inch, max. 160 kg
- ✓ All solutions offer the possibility to protect your flat panel against theft
- ✓ All stands come with hidden cable management
- ✓ Clearance free mounting with the 170 x 140 modular mounting system

ON WHEELS

For the most flexible use of your floor stand in different spots and/or rooms the choice for a floor stand on wheels or so called trolley is obvious. Here also applies that our trolleys are available in Light and Heavy Duty models.

BACK TO BACK

In our product range you will also find a floor stand for a freestanding back to back installation. This back to back floor stand is fitted with a stand head with three-point-coupling mounting system, to which a rental monitor bracket is easily mounted on both sides.

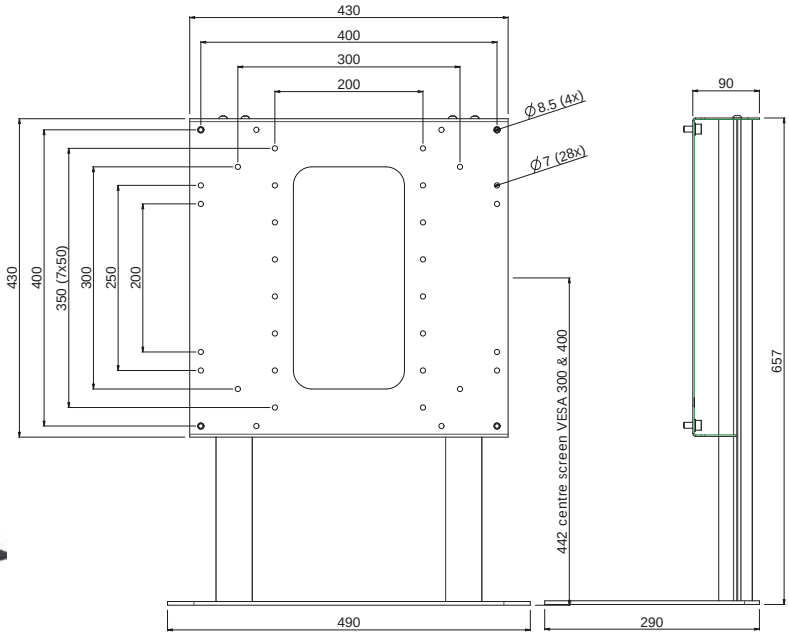


MULTIPLE MOUNTING

Just add some extra mounting heads and wall mounts to easily extend your installation from a single flat panel to multiple flat panels, one above the other.

DESK STAND

For flat panels 32 - 55 inch



INFORMATION UPON ENTRY

This desk stand is suitable for mounting your touch or regular flat panel on a desk, side cabinet or counter to for example inform visitors immediately when they enter a hall or office.

It includes a VESA bracket with VESA 200, 300, 400 and 400 - 200 and it is suitable for flat panels 32 – 55 inch, max. 40 kg.

Colour	●
Max. load	40 kg

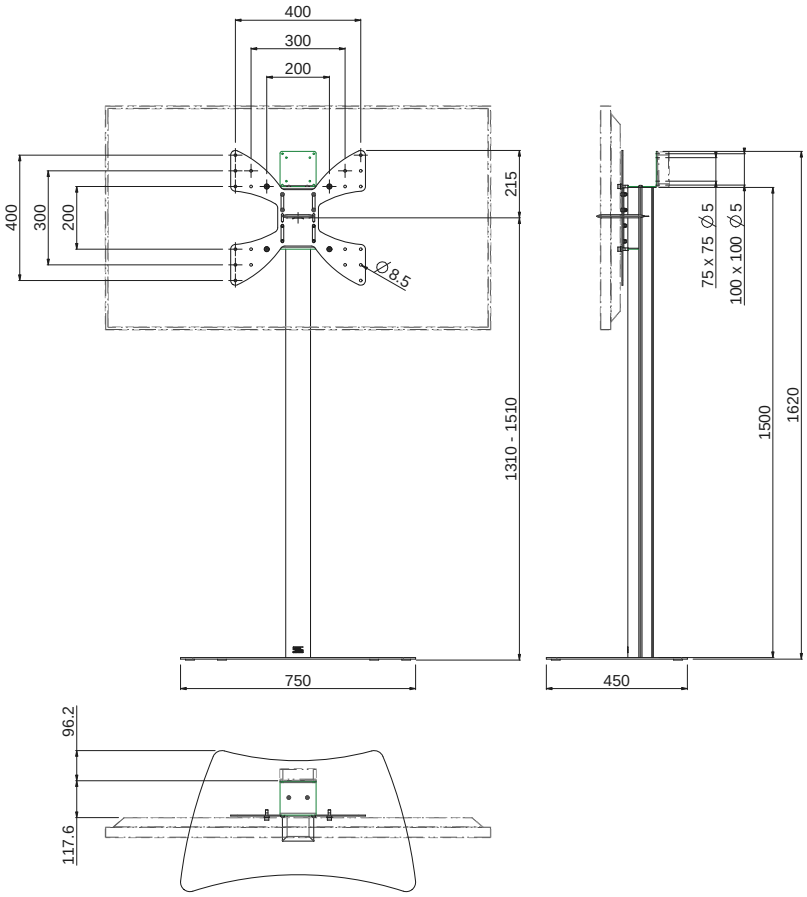
062.0540

DESIGN STAND

For flat panels max. 55 inch, 30 kg



AESTHETICS IN THE BOARD ROOM

Also in a compact board room or meeting room with weak walls, it is possible to install a flat panel or monitor in an aestetic way, using this design floor stand.

The 062.0550 can be used for monitors up to 30 kg and 55 inch. The monitors position is manually in height adjustable, and offers a viewing height between 130 and 150 cm (centre panel) which is the ideal height from sitting position by the meeting table.

The inconspicuous design with black matte base plate and slim round, satin gloss white column fits in nearly any interior; other colours are available on request. The cabling can be run through the column at the back side. The mounting plate offers mounting at maximum VESA 400 and includes a fixation for a mini/NUC PC (VESA 75 and 100); to offer a quick and complete solution behind the monitor.

Confident performance

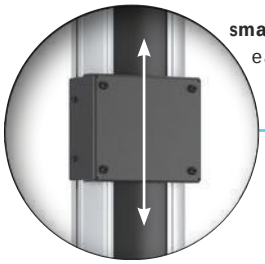
Our monitor/stage stands and trolleys are the perfect support whenever a confident performance is required.

Whether you are a public speaker, a priest who celebrates his Mass in church, a professor who teaches his class in an auditorium, anywhere you need a confidence monitor you will find our products to be particularly useful offering a perfect viewing height and angle and stability.

All models arer available in two heights and offer an adjustable viewing angle between 35° and 55°.

INSTALLATION SERIES

Flat panel mounting with maximum user friendliness

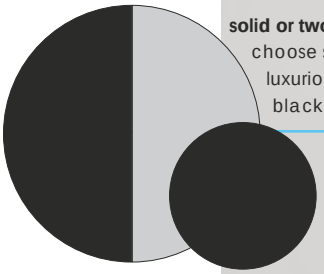


small or tall, height does not matter:
easily adjust the monitor to accomodate the best working height

fits any screen:
combine with one of our universal mounting brackets

keep everything nearby:
mount power sockets, audiovisual control panels, USB ports and more to the 4-way integration panel (universal built-in size; 60 mm)

solid or two-tone:
choose stylish black or luxurious aluminium and black



keep cables neatly organised:
hide them within the column, behind a strylish plastic cover strip that is easily cut to size

Multi purpose eye-catcher

The name already says it all, this design technically eye-catching solution can be utilized for many purposes: static flat panel mounting, flat panel mounting with electric height adjustment, with or without wheels, interactive presentations, video conferencing, single flat panel mounting (up to 98 inch!), dual flat panel mounting and VideoWall mounting.

Besides a luxurious look and feel the Multi Purpose Business Trolleys offer sufficient space to easily place your peripherals out of sight within the body. All trolleys have a standard recess for power supply and Neutric/other connection panels and various accessories are available to further extend the already very complete functionality.

FLAT PANEL LIFT SYSTEMS

Manual & Electrical

ANTI-THEFT

Store and safeguard your valuable peripherals by adding a lockable back cover to your lift system.

BETTER SAFE THAN SORRY

With anti-collision on electrical lift systems, also called anti-pinch protection, you rule out the risk of someone getting hurt or materials damaged when a lift bumps into an obstacle and continues its movement. Anti-collision causes a lift to stop and safely move back up again the moment it experiences resistance.

MULTI PURPOSE CABINET

- ✓ it serves as monitor mounting
- ✓ it offers ample storage for peripherals
- ✓ it has VESA 100 for NUC/mini PC mounting
- ✓ it has a cut-out for a standard flush-mounted box for mounting for example a button panel.

Work smarter

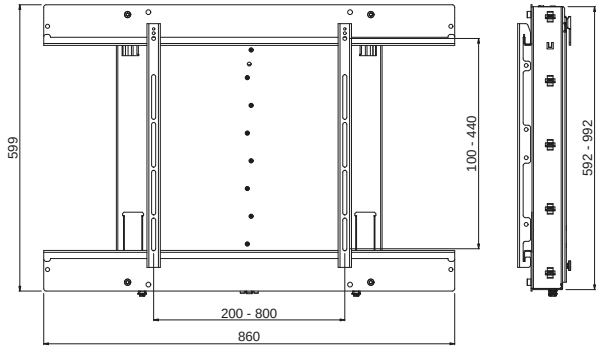
A SmartMetals lift system allows you to easily adjust your touchscreen suitable to your height, manually or electrically. Ideal in a classroom or when you need your screen to be higher up for a presentation. Our lift range is quick and easy to assemble and supplied including flat panel mounting materials. It is designed to accomodate almost all touch screens and offers both cabling and peripherals to be kept completely out of sight yet accessible where it is needed. Most of the lift systems standard come with an integrated anti-collision protection. For the ones that do not anti-collision is optionally available as well as a wide range of other accessories to further extend the functionality of the lift.

MANUAL LIFT SYSTEMS

Wall mounted

The demand for mounting solutions that allow a touchscreen to be adjusted quickly and repeatedly increases. Touchscreens are getting bigger, which means that users can not reach the upper part and therefore can not operate it.

The BalanceBox lets you quickly and effortlessly move a touchscreen to the right work and presentation height, regardless your height, or if you are in a (wheel)chair. Optimal accessibility and therefore a continuously pleasant and especially healthy posture when writing and drawing contribute to a perfect presentation.



BALANCEBOX 400

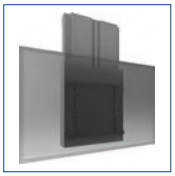
For touchscreens 37 - 90 kg, including mount max. VESA 800 x 400.

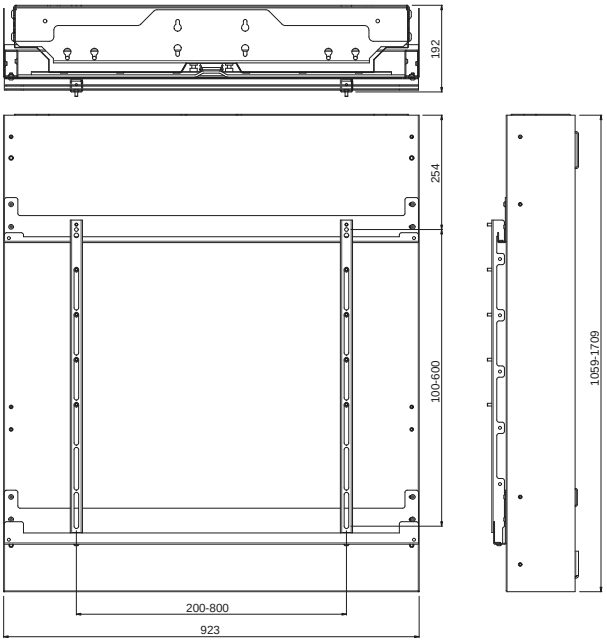
Position	Landscape
VESA	800 x 400
Accessories	See next page
Stroke	400 mm

Article code	Maximum load
BBW.0400-38	19 - 38 kg
BBW.0400-65	37 - 65 kg
BBW.0400-90	62 - 90 kg

HOW DOES IT WORK?

The BalanceBox is a mounting system with a built-in spring mechanism that balances heavy weights like a touchscreen, so that it appears to be “weightless”. Manually moving up and down becomes child’s play.





BALANCEBOX 650

For touchscreens 30 - 164 kg, including mount max. VESA 800 x 650.

Position	Landscape
VESA	800 x 650
Accessories	See below
Stroke	650 mm

Article code	Maximum load

ELECTRICAL LIFT SYSTEMS

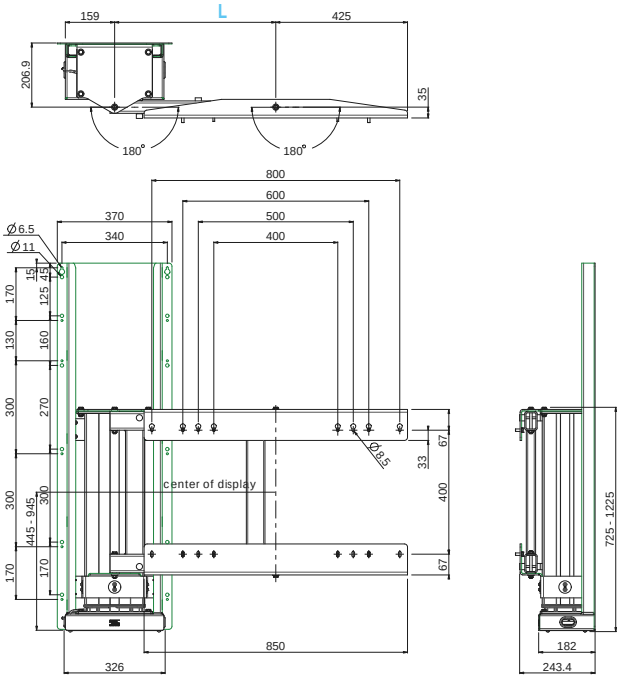
Wall mounted



OPTIMAL FLEXIBILITY WITH 180° TURNABLE SWING

The wall mounted Swing has an electric height adjustment of 500 mm for (touch) screens up to 86 inch.
In addition to the electrical height adjustment, the monitor can be moved forward manually with a 180° turning motion and back to the wall again. When the monitor is pulled forward it can also be turned 90° to the left and right. The Swing offers the most flexibility for an optimal positioning of your (touch) screens.

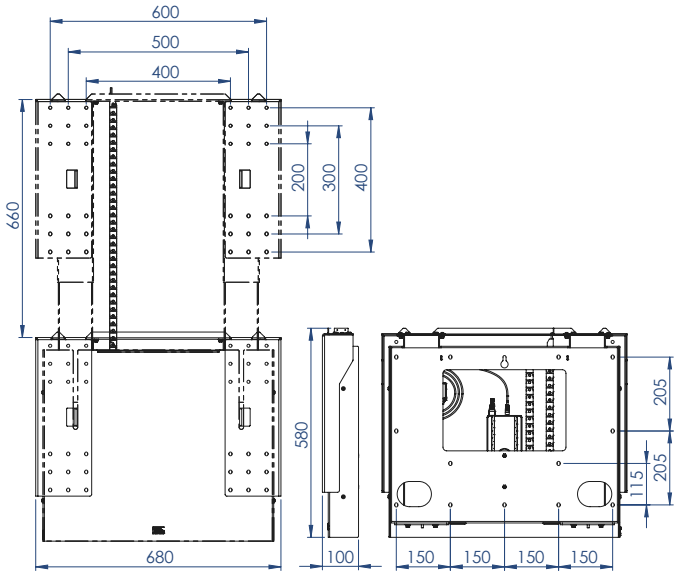
052.7445	Floor support 965 mm

NEW



FREE FLOATING DESIGNED WALL LIFT FOR TOUCH SCREENS MAX. 86 INCH

The latest newcomer in our product range is this ultra-shallow wall lift system for touch screens of max. 86 inch: build-up between wall and touch screen is only 90 mm. With this lift your touch screen is mounted seemingly free floating in front of a wall, thus preserving aesthetics in the room. As with all lifts in our range, assembly and installation are quick and easy.

LIFT MOUNT WITH ROTATION
max. 800 x 600 mm, max. load 100 kg

052.5080

LARGE WALL PLATE
for 052.7110

052.7130

LAPTOP SUPPORT
for 2-column lifts with anti-collision

With 2x recess for Neutrik connectors and hidden cable entry.

052.7145

WALL BRACKET
for 052.7200 & 052.7250

To support floor lifts 052.7200 and 052.7250 against a wall.
Combined with the large wall plate (052.7235) you create a sturdy fixation to a weak wall.
Combine it with the wall fixation kit (052.7230), in case you cannot bolt to the floor.
One piece of this wall bracket is standard included with our lift systems.

052.7227

FLOOR SUPPORT
for 052.72x0, 062.727x & 062.729x

When you need to place your lift system higher this support takes care of it. Also ideal for branding purposes.

MOUNTING KIT INCL. WHITEBOARDS FOR TOUCH SCREENS

Our whiteboard mounting kits come with enamel or laquered steel whiteboards custom-made for your touch display or (interactive) whiteboard model. Compared to lacquered steel, enamel steel offers no usage stains of the markers on the whiteboard and we offer 25 years warranty on the surface of an enamel steel whiteboard. Combine this mounting kit with a wall mount, floor lift or floor lift trolley and you have an educational tool with optimal ease of use.

Article code	Description
152.0110-ES	Mounting kit incl. whiteboards enamel steel for touch screen 55-70 inch, max. 1750mm x 1050mm (LxH)
152.0110-LS	Mounting kit incl. whiteboards lacquered steel for touch screen 55-70 inch, max. 1750mm x 1050mm (LxH)

“SmartMetals: The Smarter Way of Mounting”

SmartMetals Mounting Solutions

ELECTRICAL LIFT SYSTEMS

On wheels with table & tip function

Our Tip & Touch Series for flat panels and touch screens offer the most flexible way of use:
The trolley can be safely moved from one room to another, it has a table function and from there can be tilted 90° to an upright position to then be adjusted 660 mm in height electrically.
The Tip & Touch offers perfect usabilty for example in a classroom or anywhere where users vary in length.

BENEFITS

- ✓ Easily and safely movable
- ✓ Monitor to be used in both a table and upright position
- ✓ Also available in models specifically designed for little children (lower) and wheelchair users (wider)
- ✓ Perfect usability for users with different lengths

TIP & TOUCH STAND

Stand on wheels with anti-collision for touchscreens max. 75 inch. Supplied including mount max. VESA 600 x 400.

ELECTRICAL LIFT SYSTEMS

Cabinet mounted

By implementing a cabinet mounted lift system you elevate the integration of your flat panel. Whether dedicated to a meeting room or cozy interior, the cabinet mounted lift systems on these pages are a must for collaborative or fun use and the smartest solution combining functionality and design to retain interior aesthetics.

BENEFITS

- ✓ Interior aesthetics are retained by hiding the flat panel when not in use
- ✓ The flat panel is raised to desired height with a simple push of a button
- ✓ The cabinet lift offers ultimately safety due to integrated anti-collision

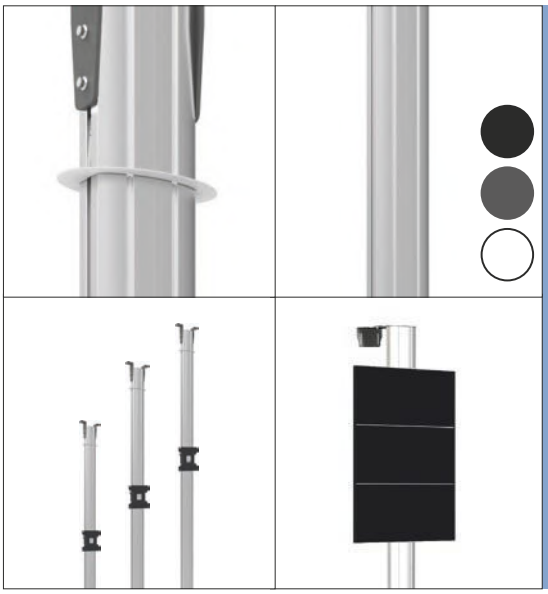
FLOOR, FLOOR TO CEILING & FLOOR TO WALL COLUMNS

It happens quite often that a fixed installation of one or more monitors in a room is desired while the wall or ceiling are not strong enough to mount the monitor(s) or in window enclosed rooms.
For these situations we have developed a wide range of solutions, based on our standard floor stands, that can be mounted to the wall and floor or between floor and ceiling. Depending on the size and weight of your monitor(s) we offer the choice between the Light Series or the standard Heavy Duty Series. Also a fixed mounting to the floor only is an option we can offer you.
The Light Series models are supplied as a complete package deal, including a VESA bracket. The standard Heavy Duty Series should be combined with one of the monitor brackets as mentioned from page 9.

All the in this chapter mentioned solutions have an invisible duct for organised cable management and are supplied including a trim ring to easily and neatly finish the cut out in a suspended ceiling or computer floor.



BENEFITS

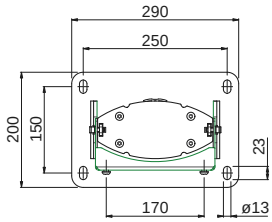
- ✓ Enables mounting in places difficult to access
- ✓ Stable solution
- ✓ Supplied complete with ceiling and/or floor trim ring
- ✓ Other lengths up to 6000 mm possible
- ✓ Other colours possible to perfectly fit the interior
- ✓ With additional mounting heads you can mount multiple screens above one another
- ✓ Because of the multiple custom options always a suitable solution to every situation

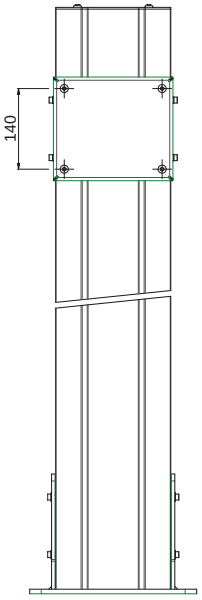
NEW

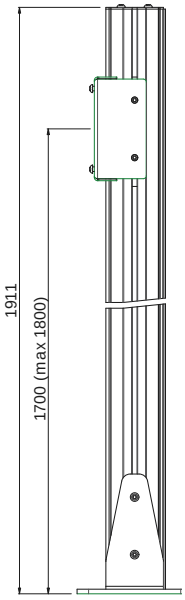
You might also want to take a glance at the floor to wall/ceiling columns from our latest **Installation Series** on page 38:
The smart flat panel mounting you are used to, but now with maximum user friendliness.

FLOOR COLUMNS

Floor mounted







WHEN FLOOR SPACE IS MINIMAL

Sometimes there just is not enough room to install a freestanding floor stand with a floor plate. That is where this column for fixed mounting to the floor could be the perfect solution:
It has a small floor plate that can be bolted to the floor.
With its slim looks this column blends in in every interior.

This column also forms the base of our VideoWall VW2.
Without floor plates it is possible to build VideoWalls with monitors smaller than 950 mm as well.
Read more about our VideoWalls from page 76.

Uncluttered conferencing

The best decor for a videoconferencing room is plain and simple with the camera's field of view as uncluttered as possible. But not just, an uncluttered view for participants within the room keeps their focus optimal as well.

Based on our standard floor stands we offer a varity of video conference solutions. For one or two screens, with wheels or fixed to floor and wall and they all come with a small support for the camera and/or codec.

For locations where aesthetics of the room need to be retained consider our video conferencing furniture. It offers ample storage space for equipment and other peripherals.

VIDEOWALLS

From wall, to floor and ceiling mounted

A challenge when mounting a row of displays or a matrix configuration (compared to a single display installation) to a wall is that the larger the mounting surface the more chances of the wall not being 100% evened. Not to worry: the VideoWall mount serves serve as a completely level mounting surface to which the screens can be installed. Thanks to its aluminium profiles, the mounting challenge, to properly align the displays horizontally as well as vertically and in depth, is met.
Maintenance to the VideoWall is hassle free as is the replacement of the screens.

SmartMetals offers a complete package, giving installers the choice of three different types of mounting arms and a wide variety of wall or floor components, for both large and small VideoWalls.

BENEFITS

- ✓ Easy installation and adjustment
- ✓ For landscape and portrait
- ✓ Solve your mounting problems when the surface is not 100% levelled
- ✓ Push to open mounts for easy and quick service access
- ✓ Custom made solutions possible, even in curved configuration

VIDEOWALLS

Floor mounted

SmartMetals offers 6 different floor mounted VideoWalls as can be seen in the pictures below.

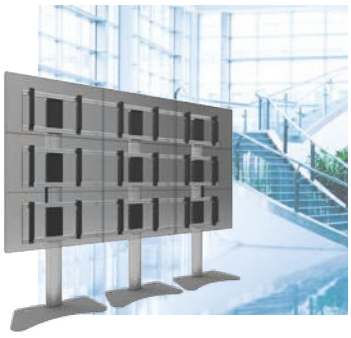
All VideoWall solutions have their own maximum horizontal and vertical rows of displays; depending on size, weight and distance from floor to bottom first row of screens. In this catalogue we present the most popular configurations of each solution, with variations in mounting arms for the displays (explained in the previous chapter).

Composition of the article code: VW1.12246-080

1 2 3 4 5

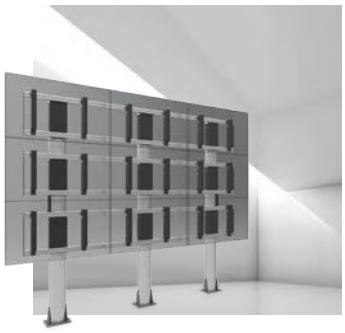
1.	VW 1-6	type VideoWall
2.	1-2- or 3	type mounting arm 172.0**1**00 / 172.0**2**00 / 172.0**3**00
3.	11, 22, 33 or 54	display configuration: 2 x 2, 3 x 3 or 4 x 2
4.	46, 55 or 60	inch size
5.	-080	distance in cm between floor to bottom first row of screens

If you need a different VideoWall configuration, please do not hesitate to contact us to help with your enquiry.



VIDEOWALL 1

With large base plates free standing on the floor

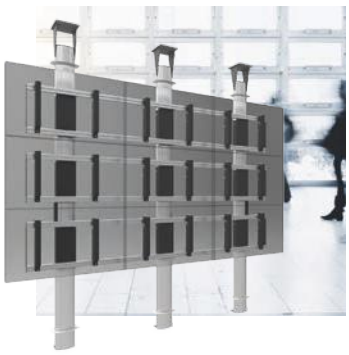


VIDEOWALL 2

With small base plates fixed mounted on the floor

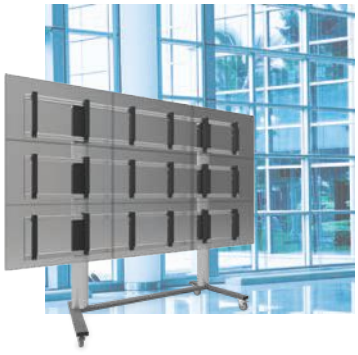
VIDEOWALL 3

With small floor and wall plates, fixed mounted on he floor and to the wall



VIDEOWALL 4

With small floor and ceiling plates, fixed mounted on the floor and to the ceiling



VIDEOWALL 5

With open frame on wheels

VIDEOWALL 6

With closed frame and cover on wheels

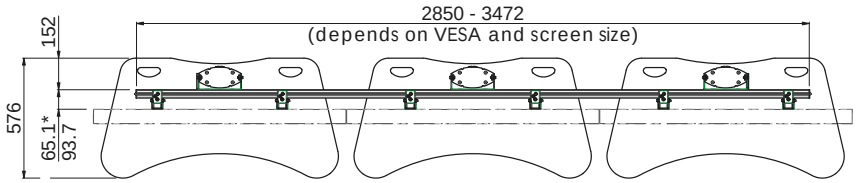
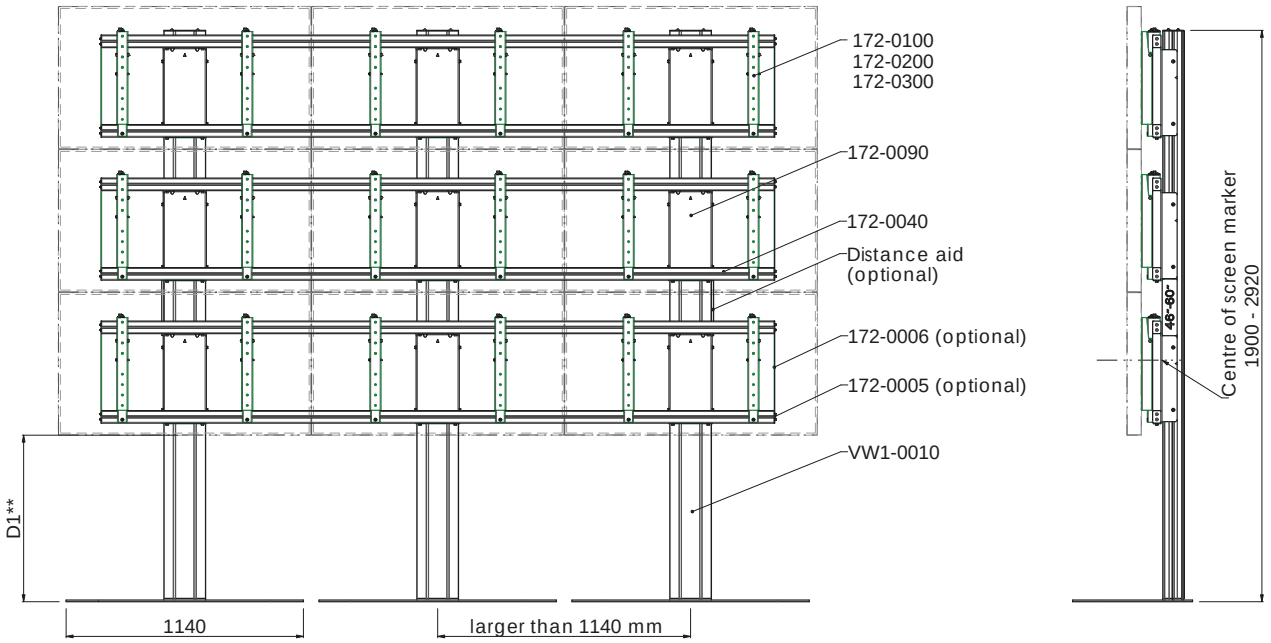
SmartMetals has a technical drawing available of all VideoWall solutions in a 3x3 configuration.
We can create a custom technical drawing of the VideoWall of your choice.
Ask us for more information.





VIDEOWALLS

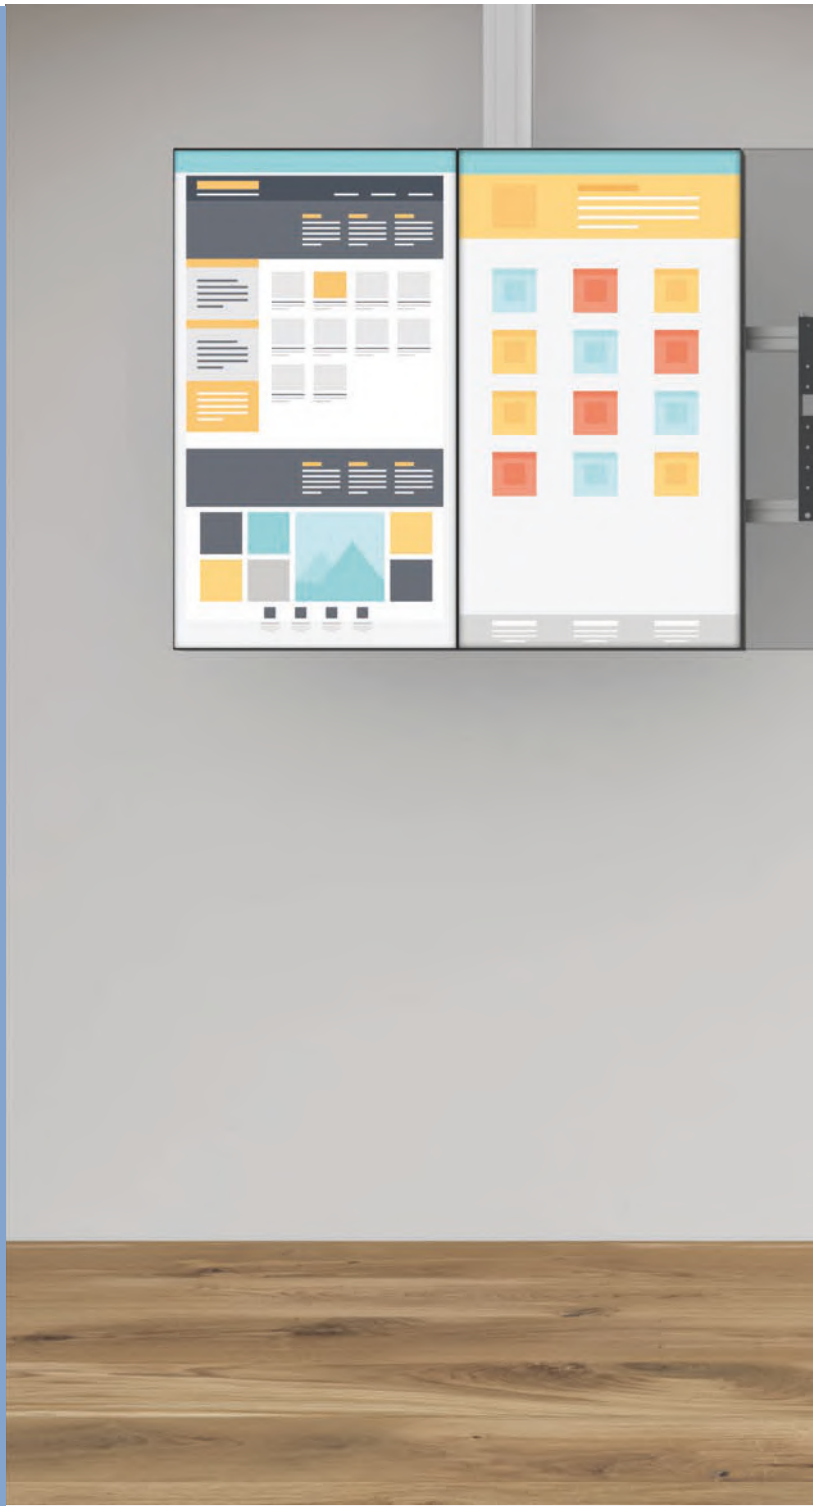
Ceiling mounted Lightweight VideoWall

SmartMetals has a modular mounting system for flat panel VideoWalls, that can be freely composed as wall or floor solution of any configuration.

The compositions are made with aluminium profiles over the full width of the VideoWall, to offer an easy horizontal alignment of the flat panels. Furthermore a selection of economy, full alignment or push to open mounting arms can be made to fit the maintenance requirements on location. As for the model we offer a wide choice between various floor supports to meet the design wishes of the architect or end user: models range from freestanding to between floor and wall/ceiling to mobile.

With accessory 172.0082, custom configurations can be made to install multiple monitors to the ceiling. For example a configuration of two monitors to a single ceiling mount in landscape, or 3 monitors to two ceiling mounts in portrait.

Please feel free to contact us with the configuration of your preference and we will help you with an offer to suit your demand.

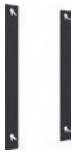


ACCESSORIES

For VideoWalls

SET FINISHING PLATES
for aluminium profile

172.0005



PORTRAIT ADAPTER SET
VESA 600

172.0008

SET CONNECTOR BRACKETS
for aluminium profiles

The connector brackets are an addition for the SmartMetals VideoWall - Floor solutions for fixed installation.
With the brackets the aluminium construction becomes more rigid and they prevent twisting. Besides that, they create a nice finishing on the sides of the profiles.

172.0006

ADJUST. ANGLE HINGES
for aluminium profiles

With these hinges curved VideoWall are created. They allow angular adjustment between the floor stands and rigidify the construction. For an ultimate gain in installation time we also offer custom made alignment aids and curved brackets (see next page).

172.0007

Article code
172.0010 - 172.0050

ALUMINIUM PROFILE, STANDARD LENGTHS 1000 - 5000 MM

The aluminium extruded profile is supplied in the length required for each row of displays; in one piece or multiple pieces joined by connector pins. For weak or uneven walls you could use two aluminium profiles per row of displays (with additional wall brackets) to create a perfect flat mounting surface for your VideoWall with an extra rigid construction.
The profile has slots through which the wall brackets and display mounting arms easily slide from left to right, to simply obtain horizontal alignment.

COUPLING PIN
for aluminium profiles

172.0015

COUPLING SET
for aluminium profiles

172.0017

WALL BRACKET

172.0080

ANGLE BRACKETS
for Light Series

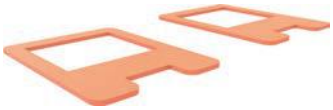
To create a Light Series VideoWall.

172.0082

STAND HEAD
for 2 aluminium profiles

To hold two aluminium profiles to mount a row of displays to.

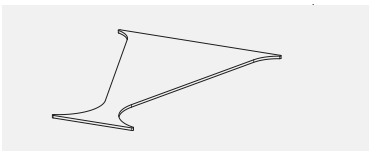
172.0090



LOCKING PLATES
set, for 172.0100

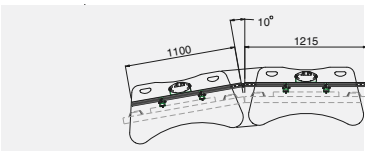
To lock monitors installed with the push-to-open mounting arms.

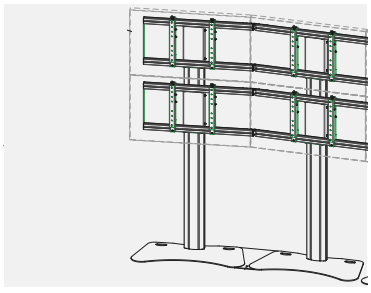
172.0110



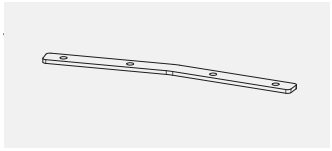
ALIGNMENT AID
for curved VideoWalls

To gain installation time we offer a custom made (fabricated to your monitor brand and type and required angle) alignment aid helping you to correctly position your floor stands.





CUSTOM



CURVE BRACKET
for curved VideoWalls

With custom made (fabricated to your monitor brand and type and required angle) curve brackets, to use instead of the angle hinges you save precious installation tme.

CUSTOM

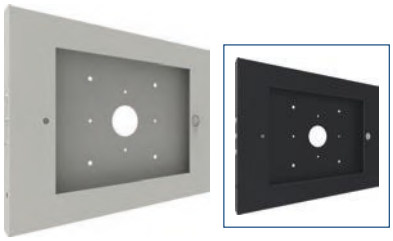
We've got you covered!

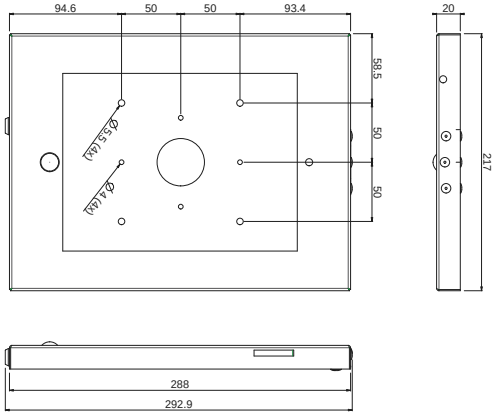
One time you just want to cover up your flat panel, protect it the other time. If you want your flat panel to blend in nicely in the interior, you are looking for a cover. If you want to install a flat panel outdoors you are looking for 24/7 protection from wheather, vandalism and theft.

We supply covers, housings and kiosks for any purpose and any size.

IPAD STANDS & HOUSINGS

For indoor use





LOCKABLE WALL MOUNTED IPAD HOUSING

Suitable for iPAD 2/3/4, AIR 1/2 and iPad Pro 9.7 inch.

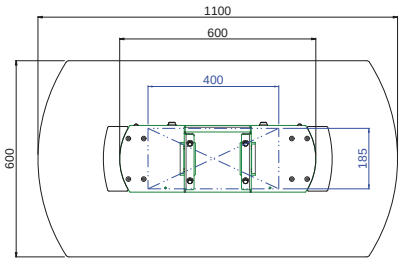
TOUCHTABLE

For indoor use

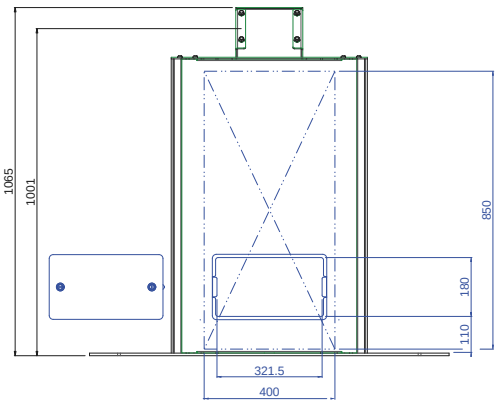
POS/POI STATIONS

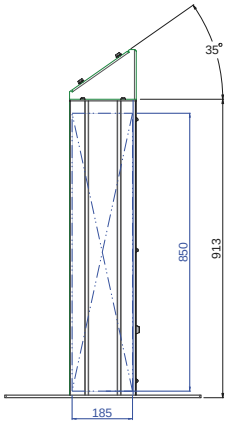
Whether you are aiming for more brand awareness or would like to improve customer experience, our TouchTable, in combination with a touch screen, is just the solution you would benefit from in a Point of Information or Point of Sale.

This solid but elegant solution holds your flat panel under a fixed angle of 35° and has ample storage space for your a media player or other peripherals which are easily accessible through the rear lockable hatch.



Dimensions in blue indicate the maximum available space for peripherals.





Colour	- White body - Dark-grey base and top plate and mounting head - Aluminium sides
Max. load	90 kg (screen + mount)
Position	Landscape
Required	Screen mount (052.1000, 052.2000 or 052.6000), see from page 9
Notes	- Make sure your flat panel is suitable for positioning under a fixed 35° angle - Other colours and branding on request

Article code	Description
132.1000	TouchTable for flat screens (supplied excl. mount), max. load 90 kg

KIOSKS

For indoor use

Our SmartKiosk was designed for Digital Signage and informational purposes in public areas.

The kiosk is fitted with a universal mounting bracket which is adjustable in depth and height. Within the body of the kiosk there is room to store your media player or other peripherals which are easily accessible via a lockable service hatch in the back.

The standard colour of the kiosk is RAL 9006 silvergrey but can be supplied in other RAL colours as well.

Customization options

- logo placement
- full wrapping of the kiosk
- back-to-back kiosk
- window of toughened glass
- kiosk on wheels
- UV foil

Powerful communication

To optimize powerful communication in shop windows SmartMetals developed a mounting solution for Samsung OMN-D Series dual sided display, both for 46 inch and 55 inch displays. Whether you need a floor mounted solution (fixed and freestanding), a ceiling mounted solution or a floor-to-ceiling mounted solution, you can create any configuration with just 3 components and installation is clear and simple.

LED WALL & CURVED OLED MOUNTING

SUPERIOR VISUAL TECHNOLOGY DESERVES SMART MOUNTING

With visual technology taking a flight with LED and Curved OLED as a result we stepped in offering smart mounting solutions as flexible as the flexibility in application of LED and Curved OLED of itselves. Based on our proven VideoWall concept we can supply any solution you need, no matter the size or curvatures.

BENEFITS

- ✓ Quick and easy installation
- ✓ Accurate adjustment
- ✓ Flexibility in placement:
  - to the wall
  - freestanding on the floor
  - fixed mounted to the floor
  - floor and wall mounted
  - floor and ceiling mounted
  - movable on wheels
  - hanging
  - curved
  - etcetera
- ✓ Height and configuration can easily be adapted to special customer requirements.
- ✓ Based on standard materials which result in short lead times.

PORTRAIT MOUNTING KIT
(for 002.156x wall mount)

Combine this kit with a wall mount from the 002.156x series mounts to use your projector in portrait position mounted to the ceiling. The kit allows a perfect alignment of your projector by just adjusting the nuts on the mounting kit.

Additionally required: projector-specific bracket (art. no.: 002.1001).

002.1550

STAINLESS STEEL MIRROR KIT
(for 002.156x wall mount)

This mirror kit allows a neat installation by positioning the projector above the ceiling, projecting via a mirror mounted directly underneath the suspended ceiling; the ball joint ensures projection in the proper angle. All visible parts below the ceiling are made of stainless steel.

Additionally required: projector-specific bracket (art. no.: 002.1001).

002.2000

ACCESSORIES

For wall mounts

PROJECTOR BRACKET
projector-specific, for 002.15xx and 002.10xx

The projector-specific bracket is custom-made for your brand and type of projector. With the design, we have taken into account the position of the lens and the projectors centre of gravity. Valuable time and money will be saved with the use of projector-specific brackets.

Please mention projector brand and type upon order.

002.1001

PROJECTOR BRACKET
universal, for 002.156x

This universal projector bracket fits every projector with mounting holes within a reach of max. 385 mm Ø.

RENTAL PLATE WITH QUARTER TURN LATCHES

A product typically used in the audiovisual rental business but very useful for educational purposes as well in case you need to use one projector in more than one room: Mount a ceiling or wall mount in each room in combination with this rental plate and combine the projector with a projector-specific bracket.
This rental plate allows a quick installation as you only need to loosen and fasten the quarter turn latches without the further need of tools.

003.1121

WOODEN BEAM ADAPTER

For mounting a standard ceiling mount to a wooden beam which is smaller than the ceiling mounting plate.

003.2126

RENTAL BALL JOINT LOCKING RING

A product typically used in the audiovisual rental business but very useful for educational purposes as well. Easily fixate the ball joint by just turning the wing, no tools needed.

003.1151

STABILIZER KIT

for tube sets over 2000 mm

Attaches to tube set and structure to stabilize projector. Kit includes anchor wires, eye bolts, wire strainers and conduit clamps.

003.1250

DOUGHTY TRIGGER CLAMP

003.1128

ANGULAR ADJUSTMENT

For mounting a ceiling mount to a slope ceiling. Tilt function: +90° / -90°.

003.1180

CEILING PLATE

for sheet-pile profile

Suitable for mounting a standard tube set to the sheet pile profile at the top floors of buildings.

003.2124

FIXED SPACERS

stainless steel

A product typically used in the audiovisual rental business but very useful for educational purposes as well: it is the perfect solution to keep all materials together in situations where you have to regularly detach the projector from the projector mount.

003.1125

SHOCK ABSORBER

for L1-L6, max. 30 kg

With the shock absorber attached between ceiling mount and structure vibrations are isolated to keep your projected image as still as possible.

003.2130

ANTI-THEFT KIT WHITE

With this anti-theft kit, theft of a projector is made considerably more difficult. The suspension points of the projector are shielded with a heavy steel cable. The steel cable runs through the cable duct to the ceiling where it is secured in a special module. This module is then closed with a disc lock. This set can be used with both universal and projector-specific brackets.

003.2220

I-BEAM MOUNTS

To mount SmartMetals ceiling mounts (projector and flat screens) to an I-beam.

Article code	Model	Description
072.2010	small	Adjustable 80 - 180 mm
072.2020	large	Adjustable 160 - 310 mm

Untouchable & secure

At all time you want your valuable projector secured against theft or vandalism. At the same time you care about hasslefree installation and maintenance. SmartMetals projector housings got your back.

PROJECTOR HOUSINGS

Universal projector housing

PROTECT YOUR VALUABLE PROJECTOR

Our projector housings keep your projector protected against theft and damage. Because of the smart design, the housings accommodate about any projector whether the lens is positioned on the left, middle or right and they come in three different sizes. They are supplied with a universal bracket and combined with our ceiling or wall mount you obtain flexibility in orientation.

Projector housings are installed easily, and allow quick access to the projector when maintenance is required: just remove the lock set and lower cover of the housing. During maintenance the projector remains aligned to the projection surface.

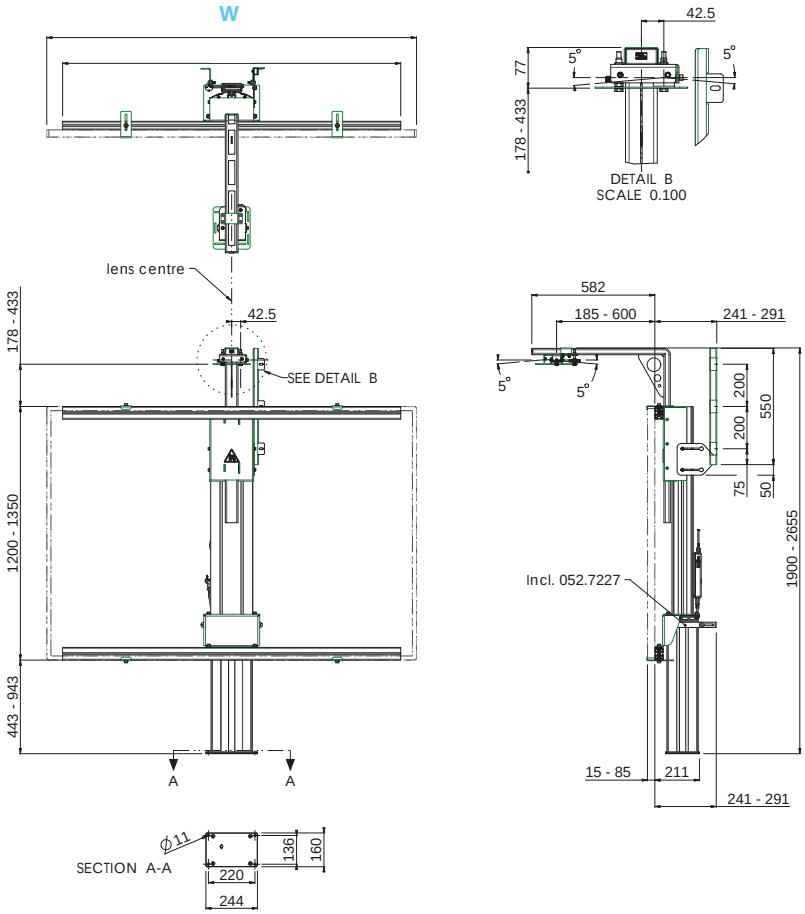
Ultimate engagement

With interactive whiteboards being a game changer in classrooms, allowing teachers to engage more directly with interactive content, another need arose: an easily in height adjustable solution to accomodate both teacher and students, suitable for mounting any short throw projector and stable enough when the whiteboard is touched or written on. We fulfilled this need with following (interactive) whiteboard liftsystems, for both fixed and mobile use.

ELECTRICAL LIFT SYSTEMS

(Interactive) whiteboard lift systems



FLOOR LIFT FOR INTERACTIVE WHITEBOARD

This lift is a quick and easy to install floor lift, allowing electrical height adjustment of your interactive whiteboard and projector. The lifts are fitted with universal whiteboard fitting, making it suitable for almost every IWB.

The lift requires positioning close to a wall to which it can be attached with its adjustable wall bracket.
The floor lift comes with a remote control to adjust the whiteboard 500 mm in height.

Please specify your whiteboard and projector upon order.

Colour	◐

CUSTOM-MADE SOLUTIONS

Get inspired

INVENTORY

You contact us with your request for a custom-made product. Together we determine product requirements and we provide you with an offer. Upon order we move on to the next step.

CONCEPT

After inventory and order we enter the stage of product engineering.
We will convert your request into a concept, carefully taking into account requirements, practicabilty, location, suitable aesthetics and last but not least ease of installation.

COMPLETION

A project never ends at the delivery of the finished product. It speaks for it self that we are available for 100% after care even after installation.
Make sure to contact us in case of questions.

You ask, we deliver

Not every project benefits from our standard solutions, nor does every customer settle for standard. When you are involved in a project where demands go beyond what our standard products have to offer, please contact us:
We hear what you ask, listen to what you need and supply you with a solution that embodies just that.

On the following pages you will find a few prominent projects to get you inspired.

‘IN CONTROL’ WITH LED

Inspiration: 27x3 LED wall in a control room environment

SmartMetals participates at a high level in the upcoming market of LED walls. Our solutions are based entirely on our VideoWall concept that has extensively proven itself in practice in the past years. The advantage is that we are not only able to realize a standard LED mounting system to the wall, but also are we able to convert the construction simply and cost efficiently to freestanding, or hanging from the ceiling or mounted to our standard floor/ wall columns.

There always will be situations where we cannot implement our standard solutions. As was the case for a project with SAMSUNG indoor LED (1.5 mm) where a LED wall had to be realized of approx. 13 x 1.5 meter. This particular wall could only be mounted to the existing structural columns. The distance between these columns was approximately 5.5 meter. We have created special supports that were mounted to these columns. Of course, due to the large distance between them, the deflection of the construction has been taken into account, so that optimal and accurate installation of the LED modules was assured.

Of course we can help you with your LED wall mounting projects, of any brand and in any way possible.

ANGLE IS KEY FOR CREATIVITY

Inspiration: Flat panel FoldUp Lift in an atelier

For a prominent fashion brand, we have been asked by the AV System integrator to develop a solution to raise a monitor from a tabletop at an angle so that an ideal working position is created for the use of a touch screen. In this case, the back of the monitor had to be finished neutrally and in colour, to entirely hide cables and such.

Based on this enquiry, we have offered a flat panel FoldUp lift of which the design was approved of almost immediately by the user. This FoldUp lift became the fundamental solution for virtually all brands of monitors up to a size of no less than 70 inches.

Besides the use during a creative process of a fashion brand, for example, this product is also ideal for use in boardrooms, meeting rooms. Even in courts where the judge should see both the monitor and the suspect, the SmartMetals FoldUp lift can be perfectly implemented.
The concept has been standardized but is always custom-made to fit your monitor brand and type and application, matching your interior perfectly.

Feel free to ask us about the possibilities.

GRAND COMMUNICATION

Inspiration: 5x4 back-to-back VideoWall in a public venue

The end customer's need was to create communication on a large format screen.
Given the desired location of the object and specific environmental characteristics a back-to-back configuration has been chosen.
The final solution we developed is a 5x4 back-to-back VideoWall which is fully mounted to the ceiling.

In collaboration with several parties, a highly secure situation has been realised as required in public venues.
During the approach of the project, the choice was made to optimise the viewing angle for the visitors. As a result, both sides of the VideoWall have a 10° tendency.

‘SUITABLE’ KIOSKS MAKE CONVINCING MANNEQUINS

Inspiration: Flat panel kiosks in retail

A fast growing Dutch suits brand wanted to work, besides its traditional mannequins, with digital mannequins in new to be opened international establishments. Together with the supplier of the monitors they approached the right size by placing two monitors on top of one another (in portrait position) of 55 inch with a very narrow bezel.

Since such ‘bare’ monitors on a simple stand are not that pretty in the attractive new interiors, SmartMetals was called upon to design a kiosk that fits the interior design. In close cooperation with the interior architect we have come to a fitting design that meets the following requirements:

- High level of finishing level of stainless steel with mirror plinth
- As minimalistic as possible to retain the thin edge of the monitor
- To be implemented as back to back and singe sided solution
- Able to be shipped in compact parts all over the world
- Quick and easy to assemble and install by interior builders
- Sufficient alignment options in the foot to absorb unevenness
- To provide space for a media player and a voltage distributor

Based on above demands, SmartMetals has developed the product as shown alongside. By supplying compact pre-assembled parts, the interior builder can suffice by mounting just 3 parts as base frame. In the base frame the monitors are hung with supplied spacers for the correct positioning. Finally, the two stainless steel side panels are fitted and the top plate with ventilation is mounted. All composed of just 6 parts to guarantee a short installation time on location.

COMMUNICATION AT ITS LARGEST

Inspiration: Easy to install LED wall solutions

In the past period we have contributed with various system integrators to beautiful, easy-to-install LED wall solutions. Our mounting solutions are located in various control rooms, showrooms, presentation/ meeting rooms, stores and TV studios.

We do not limit ourselves to one brand, we have recently done installations for the LED solutions of, among others, Absen, LG and Samsung. For the latter we have made the solution for the Experience Store in Utrecht (the Netherlands). The challenge was to create a seamless 26x4 LED wall with an outside angle of 105 degrees. The result is satisfactory as you can see in the picture on the right. We do a lot of this kind of customized solutions, but of course we also offer standard solutions.

DIGITAL SIGNAGE

Customized solutions

IT IS ALL ABOUT EFFECTIVE PRESENTATION

Get inspired by our Digital Signage solutions for wall, ceiling and floor installation on following pages.

With Digital Signage opportunities are infinite for promotional, informational and entertainment purposes. Not just strong, attractive and pursuasive content is important. At least just as much important is the 'package' it all is presented in. And that is where SmartMetals happily steps in. We offer customized solutions like kiosks and housings for in- and outdoor applications to give your digital content even more cachet.

Not one project is the same: our solutions characterize by an eye for detail. We do not just focus on requirements and objective given by our customer, keeping in mind practicability, but also do we focus on the environment of application and proper aesthetics. Last but not least our goal for every project is ease of installation. All this is what we believe what makes a mounting solution a smart one.

SMART STRONG & SAFE

SmartMetals Mounting Solutions

WALL-TRUSS MOUNTS

The SmartMetals flat panel wall and truss solutions can be implemented in several ways: as a temporary installation of one flat panel, as a VideoWall solution with multiple flat panels, to a wall, in a truss or flying.

All solutions have been developed with focus on practicality and ease of use.

BENEFITS

- ✓ For portrait and landscape
- ✓ Quick and easy to install
- ✓ Easy alignment

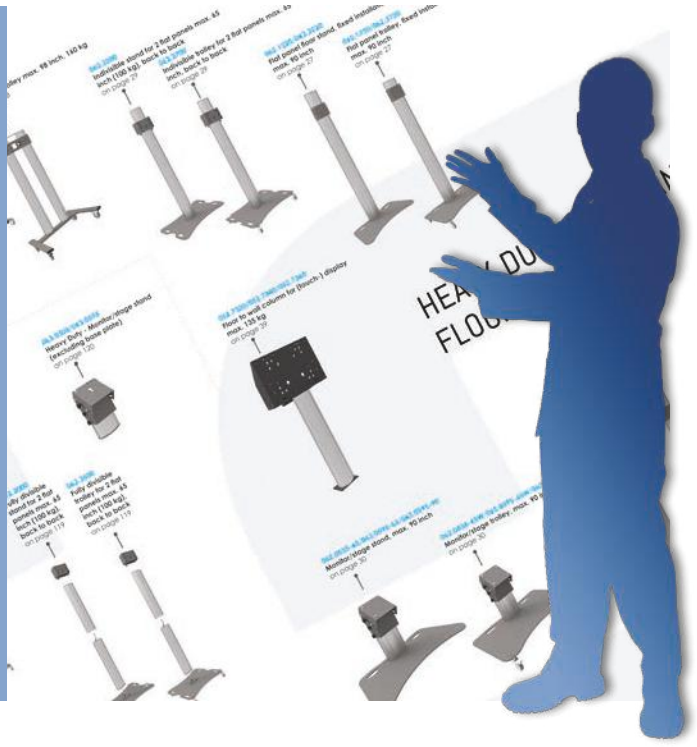
STANDS & TROLLEYS

Benefits & Applications

SmartMetals offers a wide range of floor stands for rental purposes.

All stands and trolleys are fully divisible. Assembly is done without any tools and the stands are easily stored in a flightcase together with the flat panel for compact, practical and safe transportation.

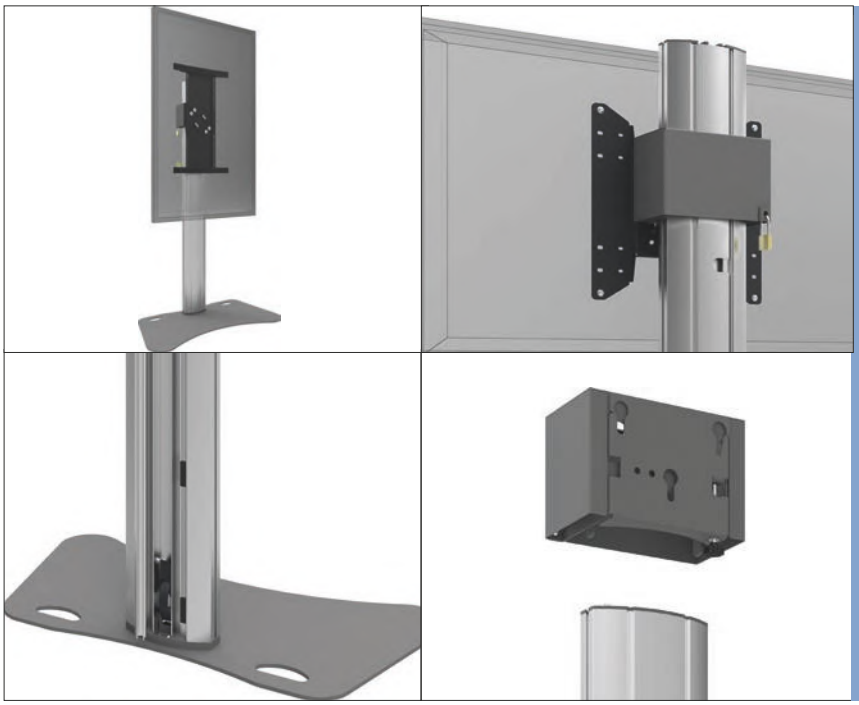
All stand heads have three integrated keyholes which correspond to the three coupling bolts on our monitor brackets. The flat panel therefore is easily hung into the stand head.



Applications

ON A BASE PLATE

For a freestanding installation of your monitor a floor stand on a base plate is what you are looking for. Our extensive range offers floor stands for light weight LED screens of max. 30 kg up to the heavy weight flat panels up to 160 kg.



BENEFITS

- ✓ For portrait and landscape screen position
- ✓ Suitable for flat panels up to 98 inch, max. 160 kg
- ✓ All solutions offer the possibility to protect your flat panel against theft
- ✓ All stands come with hidden cable management
- ✓ Short installation time thanks to three-point coupling
- ✓ Easy to level

ON WHEELS

For the most flexible use of your floor stand in different spots and/or rooms the choice for a floor stand on wheels or so called trolley is obvious. Here also applies that our trolleys are available in Light and Heavy Duty models.

BACK TO BACK

In our product range you will also find a floor stand for a freestanding back to back installation. This back to back floor stand is fitted with a stand head with three-point-coupling mounting system, to which a rental monitor bracket is easily mounted on both sides.

Confident performance

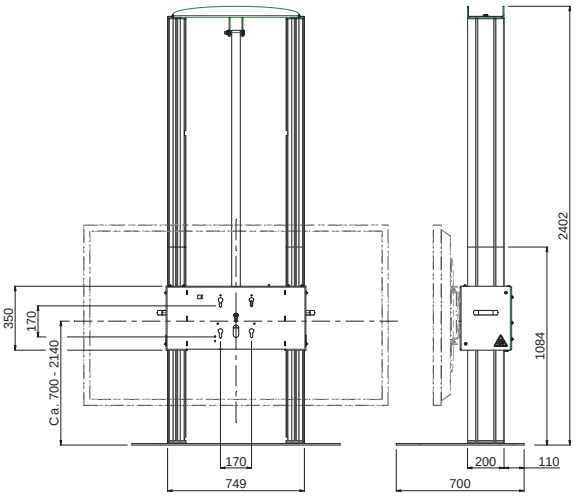
Our monitor/stage stands and trolleys are the perfect support whenever a confident performance is required.

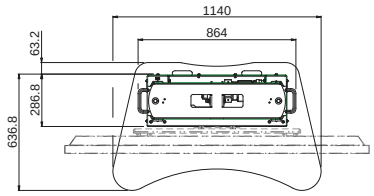
Whether you are a public speaker, a priest who celebrates his Mass in church, a professor who teaches his class in an auditorium, anywhere you need a confidence monitor you will find our products to be particularly useful offering a perfect viewing height and angle and stability.

All models are available in two heights and offer an adjustable viewing angle between 35° and 55°.

ELECTRICAL DIVISIBLE STAND

Smart Screen Hoister with flightcase





USE AND TRANSPORT OF LARGE FORMAT DISPLAYS MADE EASY

This fully divisible stand with its flightcase is the perfect aid to transport and electrically hoist flat panels with a maximum weight of 120 kg.
With the integrated electrical hoist system it is very easy to hoist the monitor out of the flightcase up to the preferred height.
Add product 052.5075 with rotation function and you will also be able to rotate the screen from landscape to portrait position.

Benefits

- ✓ Easy to install
- ✓ Health & Safety responsible use
- ✓ Effortless hoisting up to 120 kg
- ✓ Perfect aid to transport up to 120 kg load

063.0110	Surface 300 x 190 mm

MEDIA HOUSING
max. 450 x 377 x 114 mm

Protect your valuable equipment by placing it in this lockable media housing. Cables can be run through the back side into the column and the position of the housing can be adjusted continuously over the full length of the column.

063.0700

MINI-PC/THIN CLIENT HOUSING
max. 397 x 218 x 100 mm

Your mini-PC is safely installed and protected from theft and vandalism in this solid steel housing. Cables can be run through the upper side into the column and the housing can be adjusted in height continuously.
Important benefit of this housing is that this housing is placed behind the flat panel.

063.0710

- ✓ TÜV Certified
- ✓ DGUV Certified (former BGV-C1)
- ✓ Installation without tools
- ✓ Perfect alignment
- ✓ Compact transport in custom developed flightcases

Safe & flexible

Besides VideoWall solutions for permanent installation, we also offer solutions with flexibility to install a VideoWall in rental applications.
First of all a matrix construction can be built from divisible stands; where we offer connector bars, tiltable stand heads and a wider mounting pattern to allow utmost stability.

In case a rental company requires to be even more flexible and wishes to select from its rental fleet per location, a wall, truss or floor solution, the Smart Rental Frame offers most flexibility. This frame is available in a 46 or 55 inch ultra narrow bezel solution, with flat panel specific mounting sets. The frame can work as small as a 2 flat panel wide/high solution, to as large as a 4 panel wide/high solution. Of course fully TÜV certified to guarantee a safe installation.

VIDEOWALLS

Freestanding on the floor

The accessories below offer the possibility to build a VideoWall configuration from your fully divisible stands.
The stand extension piece of 950 mm (063.0295) is available to extend the fully divisible stands to 2850 mm. Ideal to raise your flat panel above the public, or to use it for a 3x3 VideoWall configuration. By connecting the stands with our stabilizing bars (063.0900) the set will offer a strong and easy to build up VideoWall construction. Always use two bars between two stands.
A stand head with five-point coupling mounting system (063.1025) is especially developed for our fully divisible stands which are used in a VideoWall configuration. A bracket with three point coupling (063.03xx) can be added, which by adding the additional coupling bolts can be used as five-point coupling mounting system. A tilt function of +1° till -4° is integrated which helps to align the displays on the stand.

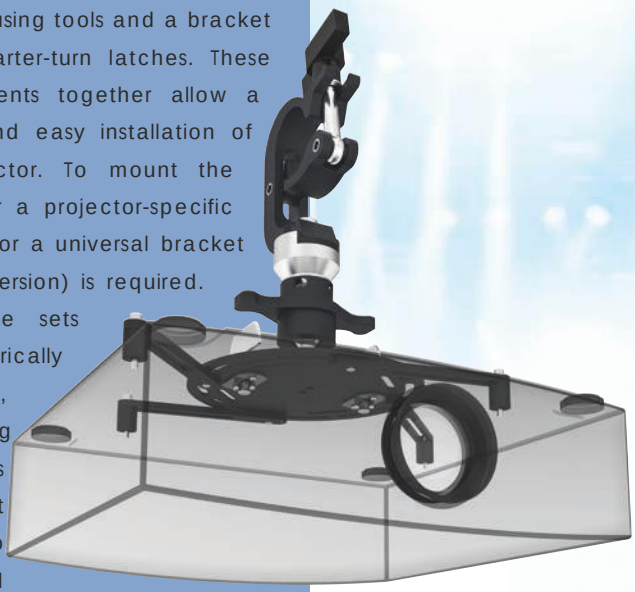
- ✓ No stand head required
- ✓ VESA 200, 300, 400 and 600 in one bracket

TRUSS MOUNTS

Our product assortment includes several solutions to hang a projector from a truss.

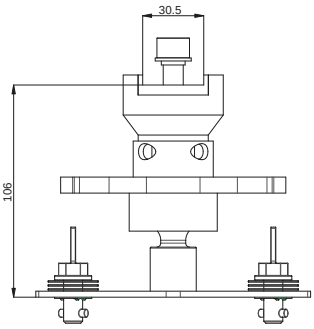
The solutions for projectors up to 25 kg include a ball joint, a ball joint clamp incl. handles to fasten without using tools and a bracket with quarter-turn latches. These components together allow a quick and easy installation of a projector. To mount the projector a projector-specific bracket or a universal bracket (rental version) is required. The tube sets are electrically insulated, meaning the truss does not need to be taped to prevent screen problems. Furthermore the tube set is fitted with lifting eyes for safety lines.

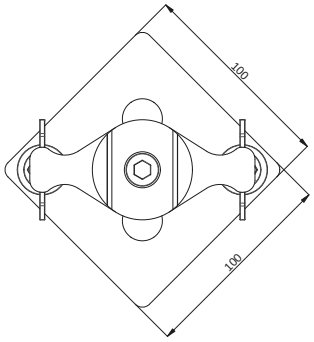


A projector fine adjustment is added to our assortment for accurate installation.This solution allows a fine adjustment (-20° till +20°) and a 90° degrees rotation is included. With our threaded fine adjustment it is possible to continuously pan and tilt the projector. This set allows direct mounting of the projector with its projector-specific bracket or using a bracket with quarter-turn latches in between. The projector fine adjustment can be mounted to a truss using two trigger clamps.

TRUSS MOUNTS

With ball joint





RENTAL SET 1, 130 MM FIXED
FOR TRIGGER CLAMP, EXCLUDING BRACKET

Colour	●

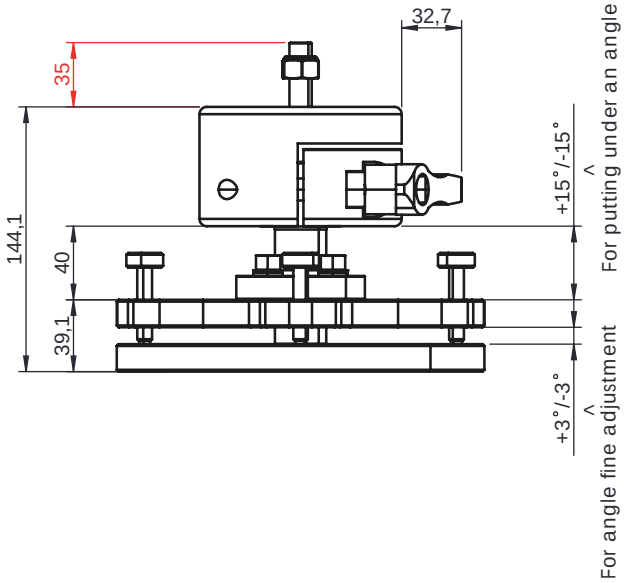
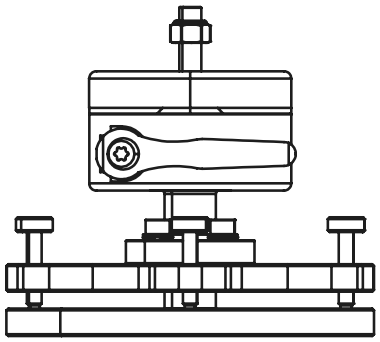
HEAVY DUTY TRUSS MOUNTS

With fine adjustment

TÜV & DGUV Certified





RENTAL MOUNT 150 MM FOR PROJECTOR MAX. 250 KG

Our rental mounts ensure a quick and easy installation of projectors in rental situations. The 002.4600 is a heavy duty projector mount for installation of projectors with a maximum weight of 250 kg in a truss.
It offers a tilt function of +15° until -15° and a further fine adjustment +3° until -3°. The rental mount has to be combined with a projector-specific bracket, please contact us for the one that fits your projector.
The mounting pattern 100 x 100 mm makes it standard suitable to the most Panasonic and Barco stack frames.

This rental mount is thoroughly tested and has TÜV certification.

ACCESSORIES

For truss mounts

FIXED MOUNTED SPACERS
for rental set 1-4

The perfect solution for keeping all material together in situations where you have to regularly detach the projector from the mount.

003.1125

DOUGHTY TRIGGER CLAMP
for rental set 1-4, 002.1650 and 002,1670-90 series

This Doughty Trigger Clamp can be used for truss mounting with the SmartMetals rental mounts (002.16xx, 002.2441, 002.2041) and the wall/truss module (art. nr.: 063.0460).

003.1128

PROJECTOR-SPECIFIC BRACKET
for rental set 1-4, 002.1650 and 002.1670-90 series

The projector-specific bracket is custom-made for your type and brand of projector. With the design, we have taken into account the position of the lens and the projector's centre of gravity. Valuable time and money will be saved with the use of projector-specific brackets.

002.1001

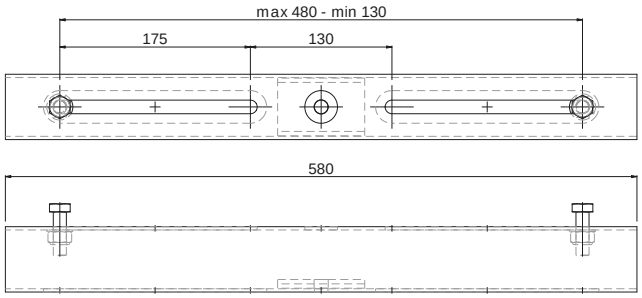
UNIVERSAL BRACKET
for rental set 1-4, max. Ø 378 mm

Besides the projector specific bracket (custom-made to projector brand and type) a universal bracket is available as well.

002.1003

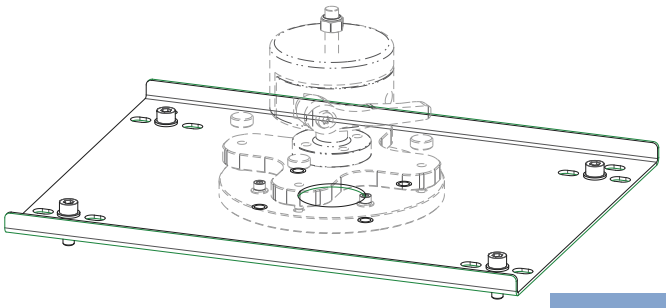
TÜV & DGUV Certified

TRUSS MOUNTING BAR
for rental mount 002.4600



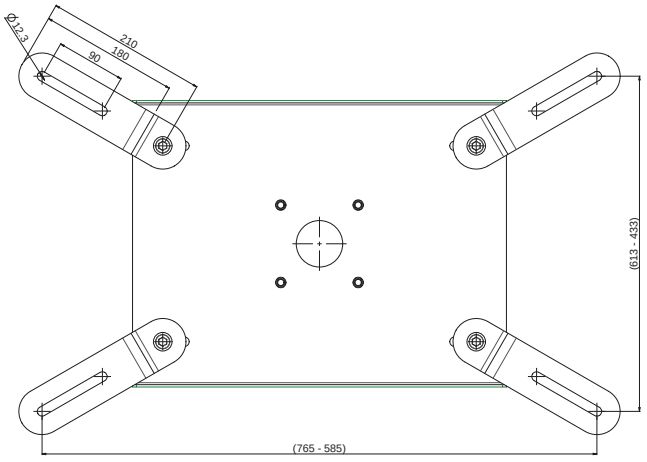
002.4610

BRACKET FOR BARCO HDX AND HDF SERIE FRAMES (MAX. 250 KG)
for rental mount 002.4600



002.4620

LARGE UNIVERSAL BRACKET
for frames mounted to 002.4600



002.4621

- ✓ TÜV Certified
- ✓ DGUV Certified (former BGV-C1)
- ✓ Lightweight
- ✓ Better manageable
- ✓ Easier to transport
- ✓ Also available for the Epson L and NEC PA Series

Stacking 2.0

Aluminium, lightweight, solid, fitted with a removable front, fine adjustment over 3 axes and still the most affordable frame on the market. This is the summary of a new line SmartMetals stack frames. The stack frames are available in different standard sizes and can be used independantly with a projector specific mount. By means of the removable front, all models can be combined with projectors which are fitted with ultra-short throw or wide angle lenses. The frames are connected easily and are fitted with a 100x100mm mounting pattern for an adjustable truss adapter (002.4600). Using the 112.1019 truss mounts the stack frames can also be installed for a floor as well as portrait projection.

(40 x 40 tubes)

112.1019

SCAFF PIPES, Ø 48 mm

This tube with a diameter of 48 mm can be mounted to the trigger clamps and then with a double truss clamp to most trusses.

Article code	Description
112.1015	Scaff pipe small 600 mm
112.1016	Scaff pipe large 1000 mm

PROJECTOR FLOOR STAND

The projector support 063.0150 has a tilt function from -15° till + 15° and dimensions 600 x 600 mm, making it suitable for most projectors with a maximum weight up to 30 kg.

Combined with a SmartMetals back to back stand (062.2200 for fixed installations or 062.2000 for rental purposes) the support becomes a projector floor stand.

Through the cable entry in the support the cables are ran into the hidden cable ducts of the floor stand.
After installation the projector can be secured to the platform with straps.

The support and stand 062.2000 can be stored in a flightcase for compact, easy and safe transport.

BENEFITS

- ✓ Anti slip surface
- ✓ Projector support is tiltable -15° / + 15°
- ✓ Projector descured to support
- ✓ Stable floor solution
