Cisco Aironet 1570 Outdoor Access Points

The Cisco Aironet 1570 Series outdoor access point is ideal for both enterprise and carrier-class network operators looking to extend Wi-Fi coverage outdoors.
 It's the industry's highest- performing outdoor AP and supports the latest Wi-Fi standard, 802.11ac, with data connection speeds up to 1.3 Gbps.
This industrial-grade AP supports 4x4 multiple-input and multiple- output (MIMO) smart antenna technology and three spatial streams for optimum pe
The Aironet 1570 provides higher throughput over a larger area with more pervasive coverage. The AP is also well suited to high-density environments where many
in close proximity generate RF interference that needs to be managed.

The Cisco Aironet 1570 Series meets the demanding needs of customers across a broad range of industries spanning enterprises and service providers.
 It offers a scalable and secure mesh architecture for high-performance Wi-Fi services. It also addresses the expanding demand for Wi-Fi
access services, network-to-network mobility, video surveillance, and cellular data offload to Wi-Fi.

You can learn more about the Cisco Aironet 1530 Outdoor Access Point on Cisco's website at the following URL:

Cisco Aironet 1530 Outdoor Access Points

The Cisco® Aironet® 1530 Series Outdoor Access Points incorporate a low-profile design that is aesthetically pleasing, yet they can withstand the most rugged outdoor conditions.Cisco brings engineering innovation to the platform with unique Cisco Flexible Antenna Port technology that allows the same antenna ports to be used either for dual-band antennas to reduce the antenna
 footprint or for single-band antennas to optimize radio coverage. This flexibility allows antenna changes to be made on the fly, and saves on sparing costs. And the Cisco Aironet 1530 Series brings all the same robust Wi-Fi features that operators have come to expect from Cisco, including radio resource management, BandSelect to automatically take advantage of the 5‑GHz band,
and VideoStream for high-quality video performance over Wi-Fi. Only Cisco delivers all of these features in a hardened outdoor access point that is ideal for any urban setting.

Cisco Aironet 2600 Series Access Point

Designed with rapidly evolving mobility needs in mind, the Cisco Aironet 2600 Series Access Point helps ensure an interference-free, high-speed wireless application experience. Based on the 802.11n standard, it includes 3 x 4 multiple input, multiple output (MIMO) technology with three spatial streams, plus Cisco CleanAir, ClientLink 2.0, and VideoStream.

The new access points sustain reliable connections at higher speeds farther from the access point than competing solutions, increasing the availability of 450 Mbps data rates. Optimized for consumer devices, the 2600 Series also accelerates client connections and consumes less mobile device battery power than competing solutions.

You can learn more about the Cisco Aironet 2600 Series Access Point on Cisco's website at the following URL:

Cisco Aironet 2700 Series Access Point

The Cisco® Aironet® 2700 Series of Wi-Fi access points (APs) delivers industry-leading 802.11ac performance at a price point ideal for plugging capacity and coverage gaps in dense indoor environments. The Aironet 2700 Series extends 802.11ac speed and features to a new generation of smartphones, tablets, and high-performance laptops now shipping with the faster, 802.11ac Wi-Fi radios.

The Aironet 2700 series supports 802.11ac "Wave 1" In its first implementation, providing a theoretical connection rate of up to 1.3 Gbps. That's roughly triple the rates offered by today's high-end 802.11n APs. The boost helps you stay ahead of the performance and bandwidth expectations of today's mobile worker, who usually uses multiple Wi-Fi devices instead of just one. As such, users are adding proportionally larger traffic loads to the wireless LAN, which has outpaced Ethernet as the default enterprise access network.
High Density Experience (HD Experience)

Building on the Cisco Aironet heritage of RF excellence, the 2700 Series APs run on a purpose-built, innovative chipset with a best-in-class RF architecture. This chipset provides a high-density experience for enterprise networks designed for mission-critical, high-performance applications. The 2700 is a component of a Cisco series of flagship, 802.11ac-enabled APs that delivers a robust mobility experience based on the following product features:

● 802.11ac with 3x4 multiple-input multiple-output (MIMO) technology supporting three spatial streams. This architecture offers a sustained 1.3-Gbps rates over a greater range for more capacity and reliability than competing APs.
● Cross-AP Noise Reduction, a Cisco innovation that enables APs to intelligently collaborate in real time about RF conditions so that users connect with optimized signal quality and performance.

● Optimized AP Roaming to ensure that client devices associate with the AP in their coverage range that offers the fastest data rate available.
● Cisco ClientLink 3.0 technology to improve downlink performance to all mobile devices, including one-, two-, and three-spatial-stream devices on 802.11ac. At the same time, the technology improves battery life on mobile devices.
● Cisco CleanAir technology enhanced with 80MHz channel support. CleanAir delivers proactive, high-speed spectrum intelligence across 20-, 40-, and 80-MHz-wide channels to combat performance problems due to wireless interference.

● MIMO equalization capabilities, which optimize uplink performance and reliability by reducing the impact of signal fade.
The Cisco Aironet 2700 Series sustains higher-speed connections farther from the AP than competing solutions. The result is up to three times greater availability of 1.3-Gbps rates in the Cisco environment for optimum mobile device performance and user experiences.

Cisco Aironet 2800 Series Access Point

Cisco Aironet 2800 Series access points bring 802.11ac Wave 2 functionality to mid- and large-sized enterprises, with many state-of-the-art, industry-leading features.

Use these new access points to reduce data bottlenecks and slow speeds in your network. The Aironet 2800 Series offers:

802.11ac Wave 2 support with Multi-User MIMO (MU-MIMO) - Provides better client device performance by delivering data to clients simultaneously.
Flexible Radio Assignment - Optimizes your wireless network for high density conditions in real time.

Dual 5-GHz Support - The Cisco Aironet 2800 access points offer two times the scale of 5-GHz mobile devices so you gain a significant increase in performance in high-density environments.

Cisco Aironet 3600 Series Access Points

Delivering up to three times more coverage versus competition for tablets, smartphones and high performance laptops, the industry's only 4x4 MIMO, 3 spatial stream access point delivers mission critical reliability. Current solutions struggle to scale to meet demands on the wireless networks from the influx of diverse mobile devices and mobile applications. The new Cisco Aironet 3600 Series sustains reliable connections at higher speeds further from the access point than competing solutions, resulting in up to three times more availability of 450 Mbps rates, and optimizing the performance of more mobile devices. Cisco Aironet 3600 Series includes Cisco ClientLink 2.0 to boost performance and range for clients and includes Cisco CleanAir spectrum intelligence for a self-healing, self-optimizing network.

Building on the Cisco Aironet heritage of RF excellence, the 3600 Series is a flagship access point, delivering industry-leading performance for secure and reliable wireless connections. Enterprise-class silicon and optimized radios deliver a robust mobility experience which includes:

802.11n with 4x4 multiple-input multiple-output (MIMO) technology with three spatial streams, which sustains 450 Mbps rates over a greater range for more capacity and reliability than competing access points; MIMO equalization, which optimizes uplink performance and reliability by minimizing the impact of signal fading; Cisco ClientLink 2.0 technology to improve downlink performance to all mobile devices including one-, two-, and three spatial stream devices on 802.11n; Cisco CleanAir technology, which provides proactive, high-speed spectrum intelligence to combat performance problems due to wireless interference. All of these features help ensure the best possible end-user experience on the wireless network. Cisco also offers the industry's broadest selection of 802.11n antennas delivering optimal coverage for a variety of deployment scenarios.

You can learn more about the Cisco Aironet 3600 Series Access Point on Cisco's website at the following URL: http://tinyurl.com/cisco-ap3600

Cisco Aironet 3700 Series Access Points

With the industry's only enterprise class 4x4 MIMO, three-spatial-stream access points that support the IEEE's new 802.11ac specification, the Cisco® Aironet® 3700 Series delivers industry-leading performance and a High Density Experience (HD Experience) for both the enterprise and service provider markets. The Aironet 3700 Series extends support to a new generation of Wi-Fi clients, such as smartphones, tablets, and high-performance laptops that have integrating 802.11ac support.
In its first implementation, 802.11ac provides a rate of up to 1.3 Gbps, roughly triple the rates offered by today's high-end 802.11n access points. This provides the necessary foundation for enterprise and service provider networks alike to stay ahead of the performance and bandwidth expectations and needs of their wireless users. Due to its convenience, wireless access is increasingly the preferred form of network connectivity for corporate users. Along with this shift, there is an expectation that wireless should not slow down users' day-to-day work, but should enable a high-performance experience while allowing users to move freely around the corporate environment.

By utilizing a purpose-built innovative chipset with the best-in-class RF architecture for a High Density Experience (HD Experience), the new Cisco Aironet 3700 Series sustains reliable connections at higher speeds farther from the access point than competing solutions, resulting in up to three times more availability of 1.3-Gbps rates and optimizing the performance of more mobile devices. The 3700 Series carries forward the modular architecture first introduced with the Aironet 3600 Series and offers unparalleled investment protection, with support for the Cisco Aironet Wireless Security and Spectrum Intelligence Module and the upcoming Cisco 3G Small Cell Module. The Cisco Aironet 3700 Series includes Cisco ClientLink 3.0 to boost performance and range for all clients including those that support 802.11ac and features Cisco CleanAir Spectrum Intelligence for a self-healing, self-optimizing network.

Cisco Aironet 3800 Series Access Point

The Aironet 3800 Series extends 802.11ac speed and features to a new generation of smartphones, tablets, and high-performance laptops,

The Aironet 3800 Series supports 802.11ac Wave 2, providing a theoretical connection rate of up to 5.2 Gbps—that's roughly four times the rate

Building on the Cisco Aironet heritage of RF excellence, the Cisco Aironet 3800 Series Access Points run on a purpose-built, innovative chipset

With two radios built into each access point, the Aironet 3800 Series is more versatile than any access point currently on the market. These radios

Cisco Wireless LAN Controllers

The Cisco® 5500 Series Wireless LAN Controller is a highly scalable and flexible platform that enables systemwide services for mission-critical wireless in medium to large-sized enterprises and campus environments. Designed for 802.11n performance and maximum scalability, the 5500 Series offers enhanced uptime with the ability to simultaneously manage 250 access points; superior performance for reliable streaming video and toll quality voice; and improved fault recovery for a consistent mobility experience in the most demanding environments. Optimized for next-generation wireless networking, the 5500 Series offers improved mobility and prepares the business for the next wave of mobile devices and applications. The 5500 Series supports a higher density of clients and delivers more efficient roaming, with at least nine times the throughput of existing 802.11a/g networks. The 5500 Series automates wireless configuration and management functions and allows network managers to have the visibility and control needed to cost-effectively manage and secure their wireless networks. As a component of the Cisco Unified Wireless Network, this controller provides real-time communication between Cisco Aironet® access points, the Cisco Wireless Control System (WCS), and the Cisco Mobility Services Engine to deliver centralized security policies, wireless intrusion prevention system (IPS) capabilities, award-winning RF management, and quality of service (QoS).

You can learn more about the Cisco 5500 Series Wireless LAN Controllers on Cisco's website at the following URL:
http://tinyurl.com/cisco-wlc5500

The Cisco Flex 7500 Series can manage wireless access points in up to 500 branch locations and allows IT managers to configure, manage, and troubleshoot up to 2000 access points and 20,000 clients from the data center. The Cisco Flex 7500 Series controller supports secure guest access, rogue detection for Payment Card Industry (PCI) compliance and in-branch (locally switched) Wi-Fi voice and video. The Cisco Flex 7500 Series Cloud Controller provides centralized control, management, and troubleshooting. It supports the Cisco FlexConnect solution for a lean branch network using access points connected to controllers in the data center over a wide area network. Data traffic from the access points are switched locally at the branch; so in the rare event of a WAN failure at the branch, the wireless clients remain connected on the network with access to local resources within the branch.
The Cisco Flex 7500 Series Cloud Controllers automate wireless configuration and management functions and allows network managers to have the visibility and control needed to cost-effectively manage, secure, and optimize the performance of their branch networks. As a component of the Cisco Unified Wireless Network, this controller provides real-time communication between Cisco Aironet® access points, the Cisco Wireless Control System (WCS), and the Cisco Mobility Services Engine, and is interoperable with other Cisco controllers. With integrated Cisco CleanAir technology, the Cisco Flex 7500 Series provides the industry's only self-healing and self-optimizing wireless network for branches. Cisco Flex 7500 Series licensing offers the flexibility to add additional access points (up to 2000 access points) as business needs grow.

You can learn more about the Cisco Flex 7500 Series Cloud Wireless LAN Controllers on Cisco's website at the following URL:
http://tinyurl.com/cisco-wlc7500

The Cisco 8500 Series Controller provides centralized control, management, and troubleshooting for high-scale deployments in service provider and large campus deployments. The 8500 series provides flexibility to support multiple architectures in the same controller - centralized controller switched for campus, Cisco FlexConnect™ for lean branches managed over the WAN as well as mesh support for deployments where full Ethernet cabling is unavailable.

Cisco 8500 Series Controllers automate wireless configuration and management functions and allow network managers to have the visibility and control needed to cost-effectively manage, secure, and optimize the performance of their branch networks. As a component of the Cisco Unified Wireless Network, this controller provides real-time communications between Cisco Aironet® access points, the Cisco Prime™ Infrastructure, and the Cisco Mobility Services Engine, and is interoperable with other Cisco controllers.

The Cisco 8500 Series Controller has integrated Cisco CleanAir™ technology, providing the industry's only self-healing and self-optimizing wireless network for branches.

You can learn more about the Cisco 8500 Series Wireless LAN Controllers on Cisco's website at the following URL:
http://www.cisco.com/en/US/prod/collateral/wireless/ps6302/ps8322/ps12722/data_sheet_c78-713207.html

The Cisco Virtual Wireless Controller is a virtual form-factor controller that enables flexible and cost-effective deployment for small and medium-sized deployments. The controller allows IT managers to configure, manage, and troubleshoot up to 200 access points and 3000 clients. The Cisco Virtual Wireless Controller supports secure guest access, rogue detection for Payment Card Industry (PCI) compliance, and in-branch (locally switched) Wi-Fi voice and video. The Cisco Virtual Wireless Controller provides centralized control, management, and troubleshooting. It supports the Cisco FlexConnect solution. Data traffic from the access points are switched locally. The Cisco Virtual Wireless Controller automates wireless configuration and management functions and allows network managers to have the visibility and control needed to cost-effectively manage, secure, and optimize the performance of their wireless networks. As a component of the Cisco Unified Wireless Network, this controller provides real-time communication between Cisco Aironet® access points, the Cisco Prime Infrastructure, and the Cisco Mobility Services Engine, and is interoperable with other Cisco controllers. With integrated Cisco CleanAir technology, the Cisco Virtual Wireless Controller provides the industry's only self-healing and self-optimizing wireless network for branches. Cisco Virtual Contoller licensing offers the flexibility to add additional access points (up to 200 access points) as business needs grow.

Cisco Aironet 1700 Wireless Access Points

Building on the Cisco Aironet heritage of RF excellence, the 1700 Series APs run on a purpose-built, innovative chipset with a best-in-class RF architecture. The 1700 is a component of Cisco's series of flagship, 802.11ac-enabled Aironet Series Access Points that deliver robust mobility experiences

The Cisco Aironet 1700 Series is a component of our flagship, 802.11ac-enabled Aironet Series Access Points that deliver high-performance, comprehensive mobility experiences. The series offers

Entry-level access points for small to midsize organizations
An attractive price and performance for migrating to 802.11ac
802.11ac Wave 1 support with 3x3 multiple input, multiple output (MIMO) equalization
Cisco CleanAir Express Spectrum Intelligence across 20-, 40-, and 80-MHz-wide channels
Optimized Roaming intelligently decides proper access points as people move

You can learn more about the Cisco Aironet 1700 Series Access Point on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/wireless/aironet-1700-series-access-points/index.html

Cisco Aironet 1850 Series Wireless Access Points

Cisco's next generation access point supporting 802.11ac Wave 2 with 4x4 MIMO with four spatial streams
Ideal for small- to medium-sized networks
Supports MU-MIMO with three spatial streams for Wave 2 clients
Supports Cisco Mobility Express Solution for networks under 25 access points
Transmit beam-forming for a better client experience
Flexible deployment modes.
Controller-based deployments support small and medium networks
Integrated and external antenna models are available for various deployment environments
For solutions of up 25 access points, Cisco Mobility Express Solution provides an easy to set up solution that does not require a controller applianc
Better Wi-Fi coverage and performance with the latest Wi-Fi technology.
Supports 802.11ac Wave 2 (dual radio, 80 MHz channel size) and 4X4 MIMO
Improved client performance with multi-user multiple input and multiple output (MU-MIMO).
Get MU-MIMO with three spatial streams for 802.11ac Wave 2 clients
Transmit beam-forming for a better client experience
The 1850 Series provides two Gigabit Ethernet ports to support Link Aggregation Group (LAG).

Cisco Aironet 700 Series Access Points

The Cisco® Aironet® 700 Series offers a compact access point for value-minded customers looking to modernize their networks to handle today's increasingly complex wireless access demands. With 802.11n dual-radio 2 x 2 multiple-input multiple-output (MIMO) technology providing at least six times the throughput of existing 802.11a/g networks, the Cisco Aironet 700 Series offers the performance advantage of 802.11n quality at a competitive price. As Part of the Cisco Unified Wireless Netowrk, the 700 Series Access Point provides low total cost of ownership and investment protection by integrating seamlessly with the existing network.

Building on the Cisco Aironet heritage of RF excellence, the 700 Series Access Point delivers secure and reliable wireless connections with:
● Simultaneous dual band, dual radio with support for 2.4GHz and 5GHz
● Optimized antenna and radio designs: Consistent network transmit and receive for optimized rate versus range
● Radio resource management (RRM): Automated self-healing optimizes the unpredictability of RF to reduce dead spots and help ensure high-availability client connectinos
● Cisco BandSelect improves 5-GHz client connections in mixed-client environments
● Advanced security features including Rogue Detection, wIPS and Context-Aware

The Cisco Aironet 700 Series is a component of the Cisco Unified Wireless Network, which can scale to up to 18,000 access points with full Layer 3 mobility across central or remote locations on the enterprise campus, in branch offices, and at remote sites. The Cisco Unified Wireless Network is the industry's most flexible, resilient, and scalable architecture delivering secure access to mobility services and applications, and offering the lowest total cost of ownership and investment protection by. integrating seamlessly with the existing wired network.

Cisco Meraki Cloud Based Wireless Products

Cisco Meraki access points are built from the highest grade components and carefully optimized for a seamless user experience. The outcome: faster connections, greater user capacity, more coverage, and fewer support calls.

The Entire Network Under A Single Pane Of Glass

Powerful and intuitive multi-site management via the cloud, while eliminating the cost and complexity of traditional on-site wireless controllers.The Cisco Meraki dashboard gives visibility into the network users, their devices, and their applications. Armed with rich analytics, administrators can quickly create access control and application usage policies, optimizing both the end-user experience and network security.

Built for Performance

Enterprise-class 802.11ac and 802.11n APs feature high power radios and enhanced receive sensitivity. MIMO and integrated beamforming maximize capacity without sacrificing range. Features include:
Enhanced CPU for line-rate deep packet inspection
Flash memory provisioned for cloud management
Custom RF design for enhanced performance

Cisco Meraki Cloud Managed Indoor Access Points
802.11n and 802.11ac indoor access points ranging from value-priced to high-performance models for high-density environments
Enterprise-grade security with guest access and BYOD support built in
Integrated application traffic shaping to prioritize critical apps and throttles, or to block unwanted apps
Built-in wireless intrusion detection and protection services, mesh routing, Power over Ethernet support, and more

Cisco Meraki Cloud-Managed Outdoor Access Points
802.11n outdoor access points designed for harsh, rugged, and outdoor environments (IP-67 rated)
Enterprise-grade security with guest access and BYOD support built-in
Integrated application traffic shaping prioritizes critical apps, throttles or blocks unwanted apps
Built-in WIDS/WIPS, mesh routing, PoE support, and more Compatible with N-type external antennas
Compatible with N-type external antennas
