Proven >B< Press technology now available in stainless steel

The >B< Press family is now complete

Conex Bänninger >B< Press is the quick and easy-to-use plumbing fitting with a permanent 3-point press joint. The fittings are both user friendly, very quick and easy to install, leading to time and cost savings. >B< Press offers the advantage of a flame-free installation, eliminating the need for solder, adhesives or additional jointing materials therefore posing no on-site fire risk.

Conex Bänninger is now pleased to present its high quality stainless steel press fitting to the family of products. With high aesthetic appeal >B< Press Inox completes the range. Whether its copper, bronze, carbon steel and now stainless steel - Conex Bänninger offers the perfect fitting for your application.

# Press fittings made of stainless steel - Hygienic and versatile.

Conex Bänninger now introduces fittings made of high quality stainless steel in sizes 15mm to 54mm.

>B< Press Inox, with its famous >B< profile, can be used in almost all domestic supply systems, such as plumbing, heating, cooling, and rainwater systems, as well as for many other industrial applications.

The material is chloride and corrosion resistant and made from AISI 316L. It is hygienic and suitable for potable water. Our high quality EPDM seal provides an accurate and proven joint on the full range of fittings.

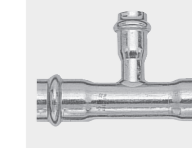

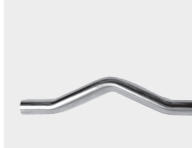

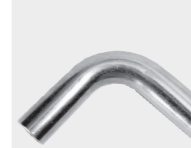

To complete our >B< Press Inox range we also provide stainless steel tubes made of AISI 316L and AISI 444 as a nickel-free alternative.

Our >B< Press Inox fittings can be used with tubes in accordance with BS EN10312 series 1 and 2.

>B< Press Inox is a perfect addition to the Conex Bänninger press fittings range.

**A choice of press tools:** >B< Press Inox is installed in the same way as our other >B< Press ranges, so all of the tools approved for these products can be used.
