(b) **SUPPORT FOR YOUTH ORGANIZATIONS.**—

(1) **DEFINITIONS.**—In this subsection—

(A) the term "Federal agency" means each department, agency, instrumentality, or other entity of the United States Government; and

(B) the term "youth organization"—

(i) means any organization that is designated by the President as an organization that is primarily intended to—

(I) serve individuals under the age of 21 years;

(III) promote the development of character and ethical and moral values; and

(ii) shall include—

(I) the Boy Scouts of America;

(II) the Girl Scouts of the United States of America;

(III) the Boys Clubs of America;

(IV) the Girls Clubs of America;

(V) the Young Men's Christian Association;

(VI) the Young Women's Christian Association;

(VII) the Civil Air Patrol;

(VIII) the United States Olympic Committee;

(IX) the Special Olympics;

(X) Campfire USA;

(XI) the Young Marines;

(XII) the Naval Sea Cadets Corps;

(XIII) 4-H Clubs;

(XIV) the Police Athletic League;

(XV) Big Brothers—Big Sisters of America; and

(XVI) National Guard Youth Challenge.

(2) IN GENERAL.—

(A) SUPPORT FOR YOUTH ORGANIZATIONS.—

(i) SUPPORT.—No Federal law (including any rule, regulation, directive, instruction, or order) shall be construed to limit any Federal agency from providing any form of support for a youth organization (including the Boy Scouts of America or any group officially affiliated with the Boy Scouts of America) that would result in that Federal agency providing less support to that youth organization (or any similar organization chartered under the chapter of title 36, United States Code, relating to that youth organization) than was provided during the preceding fiscal year. This clause shall be subject to the availability of appropriations.

(ii) YOUTH ORGANIZATIONS THAT CEASE TO EXIST.—Clause (i) shall not apply to any youth organization that ceases to exist.

(iii) WAIVERS.—The head of a Federal agency may waive the application of clause (i) to any youth organization with respect to each conviction or investigation described under subclause (I) or (II) for a period of not more than 2 fiscal years if—

(I) any senior officer (including any member of the board of directors) of the youth organization is convicted of a criminal offense relating to the official duties of that officer or the youth organization is convicted of a criminal offense; or

(II) the youth organization is the subject of a criminal investigation relating to fraudulent use or waste of Federal funds.

(B) TYPES OF SUPPORT.—Support described under this paragraph shall include—

(i) holding meetings, camping events, or other activities on Federal property;

(ii) hosting any official event of such organization;

(iii) loaning equipment; and

(iv) providing personnel services and logistical support.

(c) SUPPORT FOR SCOUT JAMBOREES.—

(1) FINDINGS.—Congress makes the following findings:

(A) Section 8 of article I of the Constitution of the United States commits exclusively to Congress the powers to raise and support armies, provide and maintain a Navy, and make rules for the government and regulation of the land and naval forces.

(B) Under those powers conferred by section 8 of article I of the Constitution of the United States to provide, support, and maintain the Armed Forces, it lies within the discretion of

Congress to provide opportunities to train the Armed Forces.

(C) The primary purpose of the Armed Forces is to defend our national security and prepare for combat should the need arise.

(D) One of the most critical elements in defending the Nation and preparing for combat is training in conditions that simulate the preparation, logistics, and leadership required for defense and combat.

(E) Support for youth organization events simulates the preparation, logistics, and leadership required for defending our national security and preparing for combat.

(F) For example, Boy Scouts of America's National Scout Jamboree is a unique training event for the Armed Forces, as it requires the construction, maintenance, and disassembly of a "tent city" capable of supporting tens of thousands of people for a week or longer. Camporees at the United States Military Academy for Girl Scouts and Boy Scouts provide similar training opportunities on a smaller scale.

(2) SUPPORT.—Section 2554 of title 10, United States Code, is amended by adding at the end the following:

"(i)(1) The Secretary of Defense shall provide at least the same level of support under this section for a national or world Boy Scout Jamboree as was provided under this section for the preceding national or world Boy Scout Jamboree.

"(2) The Secretary of Defense may waive paragraph (1), if the Secretary—

"(A) determines that providing the support subject to paragraph (1) would be detrimental to the national security of the United States; and

"(B) reports such a determination to the Congress in a timely manner, and before such support is not provided."

(d) EQUAL ACCESS FOR YOUTH ORGANIZATIONS.—Section 109 of the Housing and Community Development Act of 1974 (42 U.S.C. 5309) is amended—

(1) in the first sentence of subsection (b) by inserting "or (e)" after "subsection (a)"; and

(2) by adding at the end the following:

"(e) EQUAL ACCESS.—

"(1) DEFINITION.—In this subsection, the term 'youth organization' means any organization described under part B of subtitle II of title 36, United States Code, that is intended to serve individuals under the age of 21 years.

"(2) IN GENERAL.—No State or unit of general local government that has a designated open forum, limited public forum, or nonpublic forum and that is a recipient of assistance under this chapter shall deny equal access or a fair opportunity to meet to, or discriminate against, any youth organization, including the Boy Scouts of America or any group officially affiliated with the Boy Scouts of America, that wishes to conduct a meeting or otherwise participate in that designated open forum, limited public forum, or nonpublic forum."

SEC. 8127. REGULATIONS TO CLARIFY GIFT ACCEPTANCE POLICY FOR SERVICE MEMBERS AND THEIR FAMILIES. (a) REGULATIONS.—The Secretary of Defense shall prescribe regulations to provide that, subject to such limitations as may be specified in such regulations, members of the Armed Forces described in subsection (c), and the family members of such a member, may accept gifts from non-profit organizations, private parties, and other sources outside the Department of Defense, other than foreign governments and their agents. Such regulations shall apply uniformly to the Army, Navy, Air Force, and Marine Corps, and, to the maximum extent feasible, to the Coast Guard, and shall apply uniformly to the active and reserve components.

(b) AUTHORITY.—A member of the Armed Forces described in subsection (c) may accept gifts as provided in the regulations authorized in subsection (a), notwithstanding section 7353 or title 5, United States Code.

(c) COVERED MEMBERS.—A member of the Armed Forces is described in this subsection in the case of a member who is on active duty and

who on or after September 11, 2001, and while on active duty, incurred an injury or illness—

(1) as described in section 1413a(e)(2) of title 10, United States Code; or

(2) in an operation or area designated as a combat operation or a combat zone, respectively, by the Secretary of defense in accordance with the regulations prescribed under subsection (a).

(d) DEADLINE FOR REGULATIONS.—Regulations under subsection (a) shall be prescribed not later than 90 days after the date of the enactment of this Act.

(e) RETROACTIVE APPLICABILITY OF REGULATIONS.—Regulations under subsection (a) shall, to the extent provided in such regulations, also apply to the acceptance of gifts during the period beginning on September 11, 2001, and ending on the date on which such regulations go into effect.

TITLE IV.—HURRICANE EDUCATION
RECOVERY ACTSubtitle A—Elementary and Secondary
Education Hurricane Relief

Sec. 101. FINDINGS; DEFINITIONS.

(a) FINDINGS.—Congress finds the following:

(1) Hurricane Katrina and Hurricane Rita have had a devastating and unprecedented impact on students who attended schools in the disaster areas.

(2) Due to the devastating effects of Hurricane Katrina and Hurricane Rita, a significant number of students have enrolled in schools outside of the area in which they resided, including a significant number of students who enrolled in non-public schools because their parents chose to enroll them in such schools.

(3) 372,000 students were displaced by Hurricane Katrina. Approximately 700 schools have been damaged or destroyed. Nine States each have more than 1,000 of such displaced students enrolled in their schools. In Texas alone, over 45,000 displaced students have enrolled in schools.

(4) In response to these extraordinary conditions, this subtitle creates a one-time only emergency grant for the 2005-2006 school year tailored to the needs and particular circumstances of students displaced by Hurricane Katrina and Hurricane Rita.

(5) The level and type of assistance provided under this subtitle, both for students attending public schools and students attending non-public schools, is made available solely because of the unprecedented nature of the crisis, the massive dislocation of students, and the short duration of the services or assistance.

(b) DEFINITIONS.—Unless otherwise specified in this subtitle, the terms used in this subtitle have the meanings given the terms in section 9101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801).

SEC. 102. IMMEDIATE AID TO RESTART SCHOOL OPERATIONS.

(a) PURPOSE.—It is the purpose of this section—

(1) to provide immediate services or assistance to local educational agencies and non-public schools in Louisiana, Mississippi, Alabama, and Texas that serve an area in which a major disaster has been declared in accordance with section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170), related to Hurricane Katrina or Hurricane Rita; and

(2) to assist school administrators and personnel of such agencies or non-public schools with expenses related to the restart of operations in, the re-opening of, and the re-enrollment of students in, elementary schools and secondary schools in such areas.

(b) PAYMENTS AUTHORIZED.—From amounts appropriated to carry out this subtitle, the Secretary of Education is authorized to make payments, on such basis as the Secretary determines appropriate, taking into consideration the number of students who were enrolled, during the 2004-2005 school year, in elementary schools and secondary schools that were closed on September 12, 2005, as a result of Hurricane Katrina or on October 7, 2005, as a result of Hurricane Rita, to State educational agencies in Louisiana, Mississippi, Alabama, and Texas to enable such agencies to provide services or assistance to local educational agencies or non-public schools serving an area in which a major disaster has

been declared in accordance with section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170), related to Hurricane Katrina or Hurricane Rita.

(c) **ELIGIBILITY, CONSIDERATION, AND EQUITY**—

ELIGIBILITY AND CONSIDERATION.—From the payment provided by the Secretary of Education under subsection (b), the State educational agency shall provide services and assistance to local educational agencies and non-public schools, consistent with the provisions of this section. In determining the amount to be provided for services or assistance under this section, the State educational agency shall consider the following:

(A) The number of school-aged children served by the local educational agency or non-public school in the academic year preceding the academic year for which the services or assistance are provided.

(B) The severity of the impact of Hurricane Katrina or Hurricane Rita on the local educational agency or non-public school and the extent of the needs of each local educational agency or non-public school in Louisiana, Mississippi, Alabama, and Texas that is in an area in which a major disaster has been declared in accordance with section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170), related to Hurricane Katrina or Hurricane Rita.

(2) **EQUITY.**—Educational services and assistance provided for eligible non-public school students under paragraph (1) shall be eligible in comparison to the educational services and other benefits provided for public school students under this secretary, and shall be provided in a timely manner.

(d) **APPLICATIONS.**—Each local educational agency or non-public school desiring services or assistance under this section shall submit an application to the State educational agency at such time, in such manner, and accompanied by such information as the State educational agency may reasonably require to ensure expedited and timely provision of services or assistance to the local educational agency or non-public school.

(e) **USES OF FUNDS.**—

(1) **IN GENERAL.**—A local educational agency or non-public school receiving services or assistance from the State educational agency under this section shall use such services or assistance for—

(A) recovery of student and personnel data, and other electronic information;

(B) replacement of school district information systems, including hardware and software;

(C) financial operations;

(D) reasonable transportation costs;

(E) rental of mobile educational units and leasing of neutral sites or spaces;

(F) initial replacement of instructional materials and equipment, including textbooks;

(G) redeveloping instructional plans, including curriculum development;

(H) initiating and maintaining education and support services; and

(I) such other activities related to the purpose of this section that are approved by the Secretary.

(2) **USE WITH OTHER AVAILABLE FUNDS.**—A local educational agency or non-public school receiving services or assistance under this section may use such services or assistance in coordination with other Federal, State, or local funds available for the activities described in paragraph (1).

(3) **SPECIAL RULES.**—

SEC. 1. SHORT TITLE.

This division may be cited as the “Public Readiness and Emergency Preparedness Act”.

SEC. 2. TARGETED LIABILITY PROTECTIONS FOR PANDEMIC AND EPIDEMIC PRODUCTS AND SECURITY COUNTERMEASURES.

Part B of title III of the Public Health Service Act (42 U.S.C. 243 et seq.) is amended by inserting after section 319F-2 the following section:

“SEC. 319F-3. TARGETED LIABILITY PROTECTIONS FOR PANDEMIC AND EPIDEMIC PRODUCTS AND SECURITY COUNTERMEASURES.

“(a) LIABILITY PROTECTIONS.—

“(1) IN GENERAL.—Subject to the other provisions of this section, a covered person shall be immune from suit and liability under Federal and State law with respect to all claims for loss caused by, arising out of, relating to, or resulting from the administration to or the use by an individual of a covered countermeasure if a declaration under subsection (b) has been issued with respect to such countermeasure.

“(2) SCOPE OF CLAIMS FOR LOSS.—

“(A) LOSS.—For purposes of this section, the term ‘loss’ means any type of loss, including—

“(i) death;

“(ii) physical, mental, or emotional injury, illness, disability, or condition;

“(iii) fear of physical, mental, or emotional injury, illness, disability, or condition, including any need for medical monitoring; and

“(iv) loss of or damage to property, including business interruption loss.

Each of clauses (i) through (iv) applies without regard to the date of the occurrence, presentation, or discovery of the loss described in the clause.

“(B) SCOPE.—The immunity under paragraph (1) applies to any claim for loss that has a causal relationship with the administration to or use by an individual of a covered countermeasure, including a causal relationship with the design, development, clinical testing or investigation, manufacture, labeling, distribution, formulation, packaging, marketing, promotion, sale, purchase, donation, dispensing, prescribing, administration, licensing, or use of such countermeasure.

“(3) CERTAIN CONDITIONS.—Subject to the other provisions of this section, immunity under paragraph (1) with respect to a covered countermeasure applies only if—

“(A) the countermeasure was administered or used during the effective period of the declaration that was issued under subsection (b) with respect to the countermeasure;

“(B) the countermeasure was administered or used for the category or categories of diseases, health conditions, or threats to health specified in the declaration; and

“(C) in addition, in the case of a covered person who is a program planner or qualified person with respect to the administration or use of the countermeasure, the countermeasure was administered to or used by an individual who—

“(i) was in a population specified by the declaration; and

“(ii) was at the time of administration physically present in a geographic area specified by the declaration or had a connection to such area specified in the declaration.

“(4) APPLICABILITY OF CERTAIN CONDITIONS.—With respect to immunity under paragraph (1) and subject to the other provisions of this section:

“(A) In the case of a covered person who is a manufacturer or distributor of the covered countermeasure involved, the immunity applies without regard to whether such countermeasure was administered to or used by an individual in accordance with the conditions described in paragraph (3)(C).

“(B) In the case of a covered person who is a program planner or qualified person with respect to the administration or use of the covered countermeasure, the scope of immunity includes circumstances in which the countermeasure was administered to or used by an individual in circumstances in which the covered person reasonably could have believed that the countermeasure was administered or used in accordance with the conditions described in paragraph (3)(C).

“(5) EFFECT OF DISTRIBUTION METHOD.—The provisions of this section apply to a covered countermeasure regardless of whether such countermeasure is obtained by donation, commercial sale, or any other means of distribution, except to the extent that, under paragraph (2)(E) of subsection (b), the declaration under such subsection provides that subsection (a) applies only to covered countermeasures obtained through a particular means of distribution.

“(6) REBUTTABLE PRESUMPTION.—For purposes of paragraph (1), there shall be a rebuttable presumption that any administration or use, during the effective period of the emergency declaration by the Secretary under subsection (b), of a covered countermeasure shall have been for the category or categories of diseases, health conditions, or threats to health with respect to which such declaration was issued.

“(b) DECLARATION BY SECRETARY.—

“(1) AUTHORITY TO ISSUE DECLARATION.—Subject to paragraph (2), if the Secretary makes a determination that a disease or other health condition or other threat to health constitutes a public health emergency, or that there is a credible risk that the disease, condition, or threat may in the future constitute such an emergency, the Secretary may make a declaration, through publication in the Federal Register, recommending, under conditions as the Secretary may specify, the manufacture, testing, development, distribution, administration, or use of one or more covered countermeasures, and stating that subsection (a) is in effect with respect to the activities so recommended.

“(2) CONTENTS.—In issuing a declaration under paragraph (1), the Secretary shall identify, for each covered countermeasure specified in the declaration—

“(A) the category or categories of diseases, health conditions, or threats to health for which the Secretary recommends the administration or use of the countermeasure;

“(B) the period or periods during which, including as modified by paragraph (3), subsection (a) is in effect, which period or periods may be designated by dates, or by milestones or other description of events, including factors specified in paragraph (6);

“(C) the population or populations of individuals for which subsection (a) is in effect with respect to the administration or use of the countermeasure (which may be a specification that such subsection applies without geographic limitation to all individuals);

“(D) the geographic area or areas for which subsection (a) is in effect with respect to the administration or use of the countermeasure (which may be a specification that such subsection applies without geographic limitation), including, with respect to individuals in the populations identified under subparagraph (C), a specification, as determined appropriate by the Secretary, of whether the declaration applies only to individuals physically present in such areas or whether in addition the declaration applies to individuals who have a connection to such areas, which connection is described in the declaration; and

“(E) whether subsection (a) is effective only to a particular means of distribution as provided in subsection (a)(5) for obtaining the countermeasure, and if so, the particular means to which such subsection is effective.

“(3) EFFECTIVE PERIOD OF DECLARATION.—

“(A) FLEXIBILITY OF PERIOD.—The Secretary may, in describing periods under paragraph (2)(B), have different periods for different covered persons to address different logistical, practical or other differences in responsibilities.

“(B) ADDITIONAL TIME TO BE SPECIFIED.—In each declaration under paragraph (1), the Secretary, after consulting, to the extent the Secretary deems appropriate, with the manufacturer of the covered countermeasure, shall also specify a date that is after the ending date specified under paragraph (2)(B) and that allows what the Secretary determines is—

“(i) a reasonable period for the manufacturer to arrange for disposition of the covered countermeasure, including the return of such product to the manufacturer; and

“(ii) a reasonable period for covered persons to take such other actions as may be appropriate to limit administration or use of the covered countermeasure.

“(C) ADDITIONAL PERIOD FOR CERTAIN STRATEGIC NATIONAL STOCKPILE COUNTERMEASURES.—With respect to a covered countermeasure that is in the stockpile under section 319F-2, if such countermeasure was the subject of a declaration under paragraph (1) at the time that it was obtained for the stockpile, the effective period of such declaration shall include a period when the countermeasure is administered or used pursuant to a distribution or release from the stockpile.

“(4) AMENDMENTS TO DECLARATION.—The Secretary may through publication in the Federal Register amend any portion of a declaration under paragraph (1). Such an amendment shall not retroactively limit the applicability of subsection (a) with respect to the administration or use of the covered countermeasure involved.

“(5) CERTAIN DISCLOSURES.—In publishing a declaration under paragraph (1) in the Federal Register, the Secretary is not required to disclose any matter described in section 552(b) of title 5, United States Code.

“(6) FACTORS TO BE CONSIDERED.—In deciding whether and under what circumstances or conditions to issue a declaration under paragraph (1) with respect to a covered countermeasure, the Secretary shall consider the desirability of encouraging the design, development, clinical testing or investigation, manufacture, labeling, distribution, formulation, packaging, marketing, promotion, sale, purchase, donation, dispensing, prescribing, administration, licensing, and use of such countermeasure.

“(7) JUDICIAL REVIEW.—No court of the United States, or of any State, shall have subject matter

jurisdiction to review, whether by mandamus or otherwise, any action by the Secretary under this subsection.

“(8) PREEMPTION OF STATE LAW.—During the effective period of a declaration under subsection (b), or at any time with respect to conduct undertaken in accordance with such declaration, no State or political subdivision of a State may establish, enforce, or continue in effect with respect to a covered countermeasure any provision of law or legal requirement that—

“(A) is different from, or is in conflict with, any requirement applicable under this section; and

“(B) relates to the design, development, clinical testing or investigation, formulation, manufacture, distribution, sale, donation, purchase, marketing, promotion, packaging, labeling, licensing, use, any other aspect of safety or efficacy, or the prescribing, dispensing, or administration by qualified persons of the covered countermeasure, or to any matter included in a requirement applicable to the covered countermeasure under this section or any other provision of this Act, or under the Federal Food, Drug, and Cosmetic Act.

“(9) REPORT TO CONGRESS.—Within 30 days after making a declaration under paragraph (1), the Secretary shall submit to the appropriate committees of the Congress a report that provides an explanation of the reasons for issuing the declaration and the reasons underlying the determinations of the Secretary with respect to paragraph (2). Within 30 days after making an amendment under paragraph (4), the Secretary shall submit to such committees a report that provides the reasons underlying the determination of the Secretary to make the amendment.

“(c) DEFINITION OF WILLFUL MISCONDUCT.—

“(1) DEFINITION.—

“(A) IN GENERAL.—Except as the meaning of such term is further restricted pursuant to paragraph (2), the term ‘willful misconduct’ shall, for purposes of subsection (d), denote an act or omission that is taken—

“(i) intentionally to achieve a wrongful purpose;

“(ii) knowingly without legal or factual justification; and

“(iii) in disregard of a known or obvious risk that is so great as to make it highly probable that the harm will outweigh the benefit.

“(B) RULE OF CONSTRUCTION.—The criterion stated in subparagraph (A) shall be construed as establishing a standard for liability that is more stringent than a standard of negligence in any form or recklessness.

“(2) AUTHORITY TO PROMULGATE REGULATORY DEFINITION.—

“(A) IN GENERAL.—The Secretary, in consultation with the Attorney General, shall promulgate regulations, which may be promulgated through interim final rules, that further restrict the scope of actions or omissions by a covered person that may qualify as ‘willful misconduct’ for purposes of subsection (d).

“(C) TEMPORAL SCOPE OF REGULATIONS.—The regulations under this paragraph may specify the temporal effect that they shall be given for purposes of subsection (d).

“(D) INITIAL RULEMAKING.—Within 180 days after the enactment of the Public Readiness and Emergency Preparedness Act, the Secretary, in consultation with the Attorney General, shall commence and complete an initial rulemaking process under this paragraph.

“(3) PROOF OF WILLFUL MISCONDUCT.—In an action under subsection (d), the plaintiff shall have the burden of proving by clear and convincing evidence willful misconduct by each covered person sued and that such willful misconduct caused death or serious physical injury.

“(4) DEFENSE FOR ACTS OR OMISSIONS TAKEN PURSUANT TO SECRETARY’S DECLARATION.—Notwithstanding any other provision of law, a program planner or qualified person shall not have engaged in ‘willful misconduct’ as a matter of law where such program planner or qualified person acted consistent with applicable directions, guidelines, or recommendations by the Secretary regarding the administration or use of a covered countermeasure that is specified in the declaration under subsection (b), provided either the Secretary, or a State or local health authority, was provided with notice of information regarding serious physical injury or death from the administration or use of a covered countermeasure that is material to the plaintiff’s alleged loss within 7 days of the actual discovery of such information by such program planner or qualified person.

“(5) EXCLUSION FOR REGULATED ACTIVITY OF MANUFACTURER OR DISTRIBUTOR.—

“(A) IN GENERAL.—If an act or omission by a manufacturer or distributor with respect to a covered countermeasure, which act or omission is alleged under subsection (e)(3)(A) to constitute willful misconduct, is subject to regulation by this Act or by the Federal Food, Drug, and Cosmetic Act, such act or omission shall not constitute ‘willful misconduct’ for purposes of subsection (d) if—

“(i) neither the Secretary nor the Attorney General has initiated an enforcement action with respect to such act or omission; or

“(ii) such an enforcement action has been initiated and the action has been terminated or finally resolved without a covered remedy.

Any action or proceeding under subsection (d) shall be stayed during the pendency of such an enforcement action.

“(B) DEFINITIONS.—For purposes of this paragraph, the following terms have the following meanings:

“(i) ENFORCEMENT ACTION.—The term ‘enforcement action’ means a criminal prosecution, an action seeking an injunction, a seizure action, a civil monetary proceeding based on willful misconduct, a mandatory recall of a product because voluntary recall was refused, a proceeding to compel repair or replacement of a product, a termination of an exemption under section 505(i) or 520(g) of the Federal Food, Drug, and Cosmetic Act, a debarment proceeding, an investigator disqualification proceeding where an investigator is an employee or agent of the manufacturer, a revocation, based on willful misconduct, of an authorization under section 564 of such Act, or a suspension or withdrawal, based on willful misconduct, of an approval or clearance under chapter V of such Act or of a licensure under section 351 of this Act.

“(ii) COVERED REMEDY.—The term ‘covered remedy’ means an outcome—

“(I) that is a criminal conviction, an injunction, or a condemnation, a civil monetary payment, a product recall, a repair or replacement of a product, a termination of an exemption under section 505(i) or 520(g) of the Federal Food, Drug, and Cosmetic Act, a debarment, an investigator disqualification, a revocation of an authorization under section 564 of such Act, or a suspension or withdrawal of an approval or clearance under chapter 5 of such Act or of a licensure under section 351 of this Act; and

“(II) that results from a final determination by a court or from a final agency action.

“(iii) FINAL.—The terms ‘final’ and ‘finally’—

“(I) with respect to a court determination, or to a final resolution of an enforcement action that is a court determination, mean a judgment from which an appeal of right cannot be taken or a voluntary or stipulated dismissal; and

“(II) with respect to an agency action, or to a final resolution of an enforcement action that is an agency action, mean an order that is not subject to further review within the agency and that has not been reversed, vacated, enjoined, or

otherwise nullified by a final court determination or a voluntary or stipulated dismissal.

“(C) RULES OF CONSTRUCTION.—

“(i) IN GENERAL.—Nothing in this paragraph shall be construed—

“(1) to affect the interpretation of any provision of the Federal Food, Drug, and Cosmetic Act, of this Act, or of any other applicable statute or regulation; or

“(II) to impair, delay, alter, or affect the authority, including the enforcement discretion, of the United States, of the Secretary, of the Attorney General, or of any other official with respect to any administrative or court proceeding under this Act, under the Federal Food, Drug, and Cosmetic Act, under title 18 of the United States Code, or under any other applicable statute or regulation.

“(ii) MANDATORY RECALLS.—A mandatory recall called for in the declaration is not a Food and Drug Administration enforcement action.

“(d) EXCEPTION TO IMMUNITY OF COVERED PERSONS.—

“(1) IN GENERAL.—Subject to subsection (f), the sole exception to the immunity from suit and liability of covered persons set forth in subsection (a) shall be for an exclusive Federal cause of action against a covered person for death or serious physical injury proximately caused by willful misconduct, as defined pursuant to subsection (c), by such covered person. For purposes of section 2679(b)(2)(B) of title 28, United States Code, such a cause of action is not an action brought for violation of a statute of the United States under which an action against an individual is otherwise authorized.

“(2) PERSONS WHO CAN SUE.—An action under this subsection may be brought for wrongful death or serious physical injury by any person who suffers such injury or by any representative of such a person.

“(e) PROCEDURES FOR SUIT.—

“(1) EXCLUSIVE FEDERAL JURISDICTION.—Any action under subsection (d) shall be filed and maintained only in the United States District Court for the District of Columbia.

“(2) GOVERNING LAW.—The substantive law for decision in an action under subsection (d) shall be derived from the law, including choice of law principles, of the State in which the alleged willful misconduct occurred, unless such law is inconsistent with or preempted by Federal law, including provisions of this section.

“(3) PLEADING WITH PARTICULARITY.—In an action under subsection (d), the complaint shall plead with particularity each element of the plaintiff’s claim, including—

“(A) each act or omission, by each covered person sued, that is alleged to constitute willful misconduct relating to the covered countermeasure administered to or used by the person on whose behalf the complaint was filed;

“(B) facts supporting the allegation that such alleged willful misconduct proximately caused the injury claimed; and

“(C) facts supporting the allegation that the person on whose behalf the complaint was filed suffered death or serious physical injury.

“(4) VERIFICATION, CERTIFICATION, AND MEDICAL RECORDS.—

“(A) IN GENERAL.—In an action under subsection (d), the plaintiff shall verify the complaint in the manner stated in subparagraph (B) and shall file with the complaint the materials described in subparagraph (C). A complaint that does not substantially comply with subparagraphs (B) and (C) shall not be accepted for filing and shall not stop the running of the statute of limitations.

“(B) VERIFICATION REQUIREMENT.—

“(i) IN GENERAL.—The complaint shall include a verification, made by affidavit of the plaintiff under oath, stating that the pleading is true to the knowledge of the deponent, except as to matters specifically identified as being alleged on information and belief, and that as to those matters the plaintiff believes it to be true.

“(ii) IDENTIFICATION OF MATTERS ALLEGED UPON INFORMATION AND BELIEF.—Any matter

that is not specifically identified as being alleged upon the information and belief of the plaintiff, shall be regarded for all purposes, including a criminal prosecution, as having been made upon the knowledge of the plaintiff.

“(C) MATERIALS REQUIRED.—In an action under subsection (d), the plaintiff shall file with the complaint—

“(i) an affidavit, by a physician who did not treat the person on whose behalf the complaint was filed, certifying, and explaining the basis for such physician’s belief, that such person suffered the serious physical injury or death alleged in the complaint and that such injury or death was proximately caused by the administration or use of a covered countermeasure; and

“(ii) certified medical records documenting such injury or death and such proximate causal connection.

“(5) THREE-JUDGE COURT.—Any action under subsection (d) shall be assigned initially to a panel of three judges. Such panel shall have jurisdiction over such action for purposes of considering motions to dismiss, motions for summary judgment, and matters related thereto. If such panel has denied such motions, or if the time for filing such motions has expired, such panel shall refer the action to the chief judge for assignment for further proceedings, including any trial. Section 1253 of title 28, United States Code, and paragraph (3) of subsection (b) of section 2284 of title 28, United States Code, shall not apply to actions under subsection (d).

“(6) CIVIL DISCOVERY.—

“(A) TIMING.—In an action under subsection (d), no discovery shall be allowed—

“(i) before each covered person sued has had a reasonable opportunity to file a motion to dismiss;

“(ii) in the event such a motion is filed, before the court has ruled on such motion; and

“(iii) in the event a covered person files an interlocutory appeal from the denial of such a motion, before the court of appeals has ruled on such appeal.

“(B) STANDARD.—Notwithstanding any other provision of law, the court in an action under subsection (d) shall permit discovery only with respect to matters directly related to material issues contested in such action, and the court shall compel a response to a discovery request (including a request for admission, an interrogatory, a request for production of documents, or any other form of discovery request) under Rule 37, Federal Rules of Civil Procedure, only if the court finds that the requesting party needs the information sought to prove or defend as to a material issue contested in such action and that the likely benefits of a response to such request equal or exceed the burden or cost for the responding party of providing such response.

“(7) REDUCTION IN AWARD OF DAMAGES FOR COLLATERAL SOURCE BENEFITS.—

“(A) IN GENERAL.—In an action under subsection (d), the amount of an award of damages that would otherwise be made to a plaintiff shall be reduced by the amount of collateral source benefits to such plaintiff.

“(B) PROVIDER OF COLLATERAL SOURCE BENEFITS NOT TO HAVE LIEN OR SUBROGATION.—No provider of collateral source benefits shall recover any amount against the plaintiff or receive any lien or credit against the plaintiff’s recovery or be equitably or legally subrogated to the right of the plaintiff in an action under subsection (d).

“(C) COLLATERAL SOURCE BENEFIT DEFINED.—For purposes of this paragraph, the term ‘collateral source benefit’ means any amount paid or to be paid in the future to or on behalf of the plaintiff, or any service, product, or other benefit provided or to be provided in the future to or on behalf of the plaintiff, as a result of the injury or wrongful death, pursuant to—

“(i) any State or Federal health, sickness, income-disability, accident, or workers’ compensation law;

“(ii) any health, sickness, income-disability, or accident insurance that provides health benefits or income-disability coverage;

“(iii) any contract or agreement of any group, organization, partnership, or corporation to provide, pay for, or reimburse the cost of medical, hospital, dental, or income disability benefits; or

“(iv) any other publicly or privately funded program.

“(a) ESTABLISHMENT OF FUND.—Upon the issuance by the Secretary of a declaration under section 319F-3(b), there is hereby established in the Treasury an emergency fund designated as the ‘Covered Countermeasure Process Fund’ for purposes of providing timely, uniform, and adequate compensation to eligible individuals for covered injuries directly caused by the administration or use of a covered countermeasure pursuant to such declaration, which Fund shall consist of such amounts as emergency appropriations under section 402 of H. Con. Res. 95 of the 109th Congress, this emergency designation shall remain in effect through October 1, 2006.

“(b) PAYMENT OF COMPENSATION.—

“(1) IN GENERAL.—If the Secretary issues a declaration under 319F-3(b), the Secretary shall, after amounts have by law been provided for the Fund under subsection (a), provide compensation to an eligible individual for a covered injury directly caused by the administration or use of a covered countermeasure pursuant to such declaration.

“(2) ELEMENTS OF COMPENSATION.—The compensation that shall be provided pursuant to paragraph (1) shall have the same elements, and be in the same amount, as is prescribed by sections 264, 265, and 266 in the case of certain individuals injured as a result of administration of certain countermeasures against smallpox, except that section 266(a)(2)(B) shall not apply.

JOINT EXPLANATORY STATEMENT DIVISION A

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2006

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2863), making appropriations for the Department of Defense for the fiscal year ending September 30, 2006, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The conference agreement on the Department of Defense Appropriations Act, 2006, incorporates some of the provisions of the House and Senate versions of the bill as well as some matters under the jurisdiction of the Subcommittee on Military Quality of Life and Veterans Affairs, and Related Agencies of the House Committee on Appropriations that were addressed in the House in H.R. 2528. The language and allocations set forth in House Report 109-119 and Senate Report 109-141, and the relevant language and allocations set forth in House Report 109-95, should be complied with unless specifically addressed in the accompanying conference report and statement of managers to the contrary.

The Senate amendment deleted the entire House bill after the enacting clause and inserted new language. The conference agreement includes revised language.

DEFINITION OF PROGRAM PROJECT, AND ACTIVITY

The conferees agree that for the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119) and by the Budget Enforcement Act of 1990 (Public Law 101-508), the term program, project, and activity for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2006, the accompanying House and Senate Committee reports, the conference report and accompanying joint explanatory statement of the managers of the Committee of Conference, the related classified annexes and reports, and the P-1 and R-1 budget justification documents as subsequently modified by Congressional action. The following exception to

the above definition shall apply: for the Military Personnel and the Operation and Maintenance accounts, the term “program, project, and activity” is defined as the appropriations accounts contained in the Department of Defense Appropriations Act.

At the time the President submits his budget for fiscal year 2007, the conferees di-

rect the Department of Defense to transmit to the congressional defense committees budget justification documents to be known as the “M-1” and “O-1” which shall identify, at the budget activity, activity group, and subactivity group level, the amounts requested by the President to be appropriated to the Department of Defense for military

personnel and operation and maintenance in any budget request, or amended budget request, for fiscal year 2007.

REPROGRAMMING AND REPORTING GUIDANCE FOR BASIC ALLOWANCE FOR HOUSING

The conferees direct the Department of Defense to provide budget execution data for Basic Allowance for Housing funding to the Subcommittee on Military Quality of Life and Veterans Affairs, and Related Agencies and the Subcommittee on Defense of the Committee on Appropriations of the House of Representatives and the Subcommittee on Defense of the Committee on Appropriations of the Senate. Such budget execution data shall be provided through the DD-COMP(M) 1002 accounting form and delivered no later than forty-five days past the close of each quarter for the fiscal year. The Reserve Component accounts do not provide budget line item data for Basic Allowance for Housing; therefore, the Department is directed to provide comparable DD-COMP(M) 1002 detail when submitting quarterly execution data.

The conferees further direct the Department to distinctly identify Basic Allowance

for Housing funding on all prior approval reprogramming requests (Form 1415) submitted to the Congress. All prior approval reprogramming requests affecting Basic Allowance for Housing funding should be submitted to the Subcommittee on Military Quality of Life and Veterans Affairs, and Related Agencies and Subcommittee on Defense of the Committee on Appropriations of the House of Representatives and the Subcommittee on Defense of the Committee on Appropriations of the Senate.

COMPOSITE PAY RATES

For a number of years, the Government Accountability Office (GAO) has used the Department of Defense's draft composite pay rates in its military personnel strength analysis to estimate the financial impact of work year variances on the Services' military personnel budget requests. Although this information has been important to the congressional defense committees in their budget

analysis, the conferees believe that GAO's estimates would be more accurate if their estimates used the Services' DoD approved composite rates. Therefore, the conferees believe that DoD should review, approve, and publish the Services' budget year composite pay rates not later than 60 days after the President's budget request is submitted to the Congress.

RESERVE COMPONENTS BUDGET STRUCTURE CHANGE

The conferees agree to a one year test of a consolidated budget structure for the Reserve components' military personnel appropriations. This test will evaluate the budget structure presented in the President's budget request reflecting a single budget activity for execution purposes in fiscal year 2006. The test will conclude with the closure of fis-

cal year 2006. The conferees direct the Department of Defense to submit its fiscal year 2007 budget request using the two budget activity structure, and the final structure will be addressed in the fiscal year 2007 defense appropriations act. The conferees understand the reasoning behind the Department of Defense's request to provide additional financial management flexibility for the Reserve components to execute their respective appropriations. Given this, the congressional defense committees still require visibility over the movement of funds within the accounts of the Services' appropriations. Therefore, the conferees direct the Department of Defense to provide a semi-annual report to the congressional defense committees showing transfers within the Reserve component military personnel appropriations. The report format will provide separate explanations for all transfers in and out of each appropriation line item that equal, exceed, or cumulate to \$5,000,000. Reports will be due 30 days following the end of the second quarter and the fiscal year. The conferees expect the Department of Defense to work with the congressional defense committees on the details of the report format.

RESPONSE OF FEDERAL GOVERNMENT TO
DISASTERS

The conferees direct the Director of the Office of Management and Budget, in coordination with the Secretary of Defense and the Secretary of Homeland Security, to conduct a study on improving the response of the Department of Defense and other Federal Government agencies to disasters. In conducting the study the Director should consider mechanisms for coordinating and expediting disaster preparation and response efforts; examine the role of the Department of Defense for participating in disaster response, including planning, logistics, relief and reconstruction assistance; and assess the role of the United States Geological Survey in enhancing disaster preparation measures. The Director shall submit a report on the study to Congress by May 1, 2006. The findings should include recommendations for improving the response of the Department of Defense and other Federal Government agencies to disasters and identify any legislation or regulations that the Director determines necessary to implement such recommendations.

REIMBURSEMENT FOR PROTECTIVE, SAFETY,
AND HEALTH EQUIPMENT FOR MEMBERS OF
THE ARMED FORCES

The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 authorized the Department of Defense to reimburse members of the Armed Forces for the cost of purchasing protective, safety, or health equipment for use in Operation Noble Eagle, Operation Enduring Freedom, and Operation Iraqi Freedom. In order to more adequately address this situation, the conference agreement amends Section 351 of that Act to extend this authority until April 1, 2006.

In addition, the conferees are concerned that certain types of equipment are not included in the guidance issued by the Department of Defense on October 4, 2005. Therefore, the conferees direct the Department to revise the guidance to include summer gloves, knee pads and elbow pads, deltoid and

auxiliary protectors, and side plate body armor. The conferees further direct the Military Departments to implement guidance for submitting and processing these claims not later than January 31, 2006.

GROUND SOURCE HEAT PUMPS

The conferees direct the Secretary of Defense to submit a report to the congressional defense committees by July 1, 2006 on the use of ground source heat pumps at Department of Defense facilities. The report should include a description of the types of facilities that use ground source heat pumps, an assessment of the applicability and cost effectiveness of using ground source heat pumps in different geographic regions of the United States, and an assessment of the applicability to use ground source heat pumps for new construction and retrofitting Department of Defense facilities.

MILITARY TO CIVILIAN CONVERSIONS

The conferees recognize the Military to Civilian Conversion program as an important tool to alleviate stress on the force by replacing uniformed service members in non-military essential positions with federal civilian or contractor personnel. However, the conferees are concerned that budget justification materials do not adequately describe the Department's Military to Civilian Conversion program and that the Department lacks a clear methodology for developing its budget estimates. Therefore, the conferees have reduced the Military Services' budget request for Military to Civilian Conversions by \$282,000,000 due to poor budget justification. These reductions should not be interpreted to limit the number of conversions completed in fiscal year 2006 if sufficient resources are available. The conferees direct the Department to include comprehensive data on the Military to Civilian Conversion Program in future budget justification materials. The budget materials should include: the number of conversions completed in the two fiscal years prior to the budget request year, the mix of positions filled by civilian contractors or government

employees, the number of conversions expected to occur in the budget year, the mix of civilian contractors and government employees expected to be hired, and a detailed explanation of the cost estimates used in developing the budget request.

REPROGRAMMING AND REPORTING GUIDANCE
FOR FACILITIES SUSTAINMENT, RESTORATION
AND MODERNIZATION

The conferees direct the Department of Defense to provide budget execution data for Facilities Sustainment, Restoration and Modernization funding to the Subcommittee on Military Quality of Life and Veterans Affairs, and Related Agencies and the Subcommittee on Defense of the Committee on Appropriations of the House of Representatives and the Subcommittee on Defense of the Committee on Appropriations of the Senate. Such budget execution data shall be provided through the DD-COMP(M) 1002 accounting form and delivered no later than forty-five days past the close of each quarter for the fiscal year. The Operation and Maintenance, Defense-Wide account does not provide budget line item data for Facilities Sustainment, Restoration and Modernization: therefore, the Department is directed to provide comparable DD-COMP(M) 1002 detail when submitting quarterly execution data.

The conferees further direct the Department to distinctly identify Facilities Sustainment, Restoration and Modernization funding on all prior approval reprogramming requests (Form 1415) submitted to the Congress. All prior approval reprogramming requests affecting the Facilities Sustainment, Restoration and Modernization funding should be submitted to the Subcommittee on Military Quality of Life and Veterans Affairs, and Related Agencies and the Subcommittee on Defense of the Committee on Appropriations of the House of Representatives and the Subcommittee on Defense of the Committee on Appropriations of the Senate.

INDUSTRIAL MOBILIZATION CAPACITY

The conferees recognize the critical importance of the Industrial Mobilization Capacity program for offsetting costs to maintain wartime capabilities at Department of Defense depots, arsenals, and ammunition

plants. The conferees recommend an additional \$7,000,000 for this program at Rock Island Arsenal. The amount provided is in addition to \$8,962,000 currently budgeted for Industrial Mobilization Capacity at Rock Island Arsenal. The conferees understand the requirement for Industrial Mobilization Capacity funding may decline during fiscal year 2006 due to increased workloads attrib-

utable to ongoing contingency operations. The conferees direct that any Industrial Mobilization Capacity funding designated for Rock Island Arsenal that is not required for its intended purpose be used for other activities or projects which will create efficiencies or improve operations and work conditions at the Arsenal.

F-117 NIGHTHAWK	
The conferees provide an additional \$9,400,000 to maintain 52 F-117 aircraft in fiscal year 2006. The conferees believe it is premature to retire any F-117 aircraft at this time. The F-117 provides a unique capability to the combatant commanders and remains the only tactical stealth aircraft capable of delivering certain types of precision munitions.

SERVICE-WIDE SAFETY ALCOHOL BREATH DETECTORS

The conferees agree to provide \$7,270,000 for service-wide alcohol breath detectors in operation and maintenance accounts. In addition to the guidance provided in House Report 109-19, the conferees direct that these detectors be FDA-cleared, be housed in unbreakable pocket-size containers, and be capable of carrying a Service's safety program imprint.

NATIONAL GUARD YOUTH CHALLENGE PROGRAM

The conferees provide an additional \$13,000,000 for the National Guard Youth Challenge Program, which includes \$1,700,000 only for preparation of facilities at Joint Forces Training Base Los Alamitos to expand the California National Guard Grizzly Program.

UNIQUE ITEM IDENTIFICATION

The conferees are encouraged by the promise of the Unique Item Identification (UID) program at the Department of Defense to make acquisition, repair, and deployment of items faster and more efficient through unique identification technologies. The conferees direct the Under Secretary for Defense for Acquisition, Technology & Logistics to provide a report to the Appropriations Committees no later than October 1, 2006 on the benefits and progress of UID efforts within DOD. The report should include goals for enhanced operations capabilities, support for the warfighter, and improved financial controls.

DEFENSE PRISONER OF WAR/MISSING PERSONNEL OFFICE

The conferees are aware that the Defense Prisoner of War/Missing Personnel Office (DPMO) provides information and communication to families, veteran's organizations and the public on issues pertaining to personnel recovery and accounting for Americans from past conflicts. The conferees encourage this office to continue its outreach efforts, annual conferences, and meetings

with the POW/Missing Personnel families to ensure those family members have updated information concerning the status of the recovery of their loved ones.

REPROGRAMMING REPORTING REQUIREMENTS

The conferees share the concerns raised in the report accompanying the House version of the fiscal year 2006 Defense Appropriations bill regarding the need to improve the reporting of reprogrammings by the Department of Defense. In the Statement of the Managers accompanying the fiscal year 2005 Defense Appropriations Act, the Department of Defense was directed to evaluate current procedures governing the department's financial practices. In response, the Department issued a report proposing several reporting improvements. The conferees direct the Under Secretary of the Department of Defense, Comptroller, to begin implementing all three of the proposals identified in the report under the heading of "Improved Reporting". The conferees further direct that the quarterly, spreadsheet based DD 1416 reports proposed in the Department's recommendations shall be submitted for service and defense-wide accounts in titles III and IV of this Act and shall also include the reason for which funds are available for reprogramming, the account to which the funds have been reprogrammed, and the requirement for the funds to be reprogrammed.

SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase "only for" or "only to" in this report are congressional interest items for the purpose of the Base for Reprogramming (DD 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, or a revised amount if changed during conference or otherwise specifically addressed in the conference report. These items remain special interest items whether or not they are repeated in a subsequent conference report.

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The conferees direct the Department of Defense to continue to follow the reprogramming guidance specified in the Statement of Managers on the fiscal year 2005 Department of Defense Appropriations Act (House Report 108-622). Specifically, the dollar threshold for reprogramming procurement funds will remain at \$20,000,000, and at \$10,000,000 for research, development, test and evaluation. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the speci-

fied dollar threshold or 20% of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative. Therefore, if the combined value of transfers into or out of a procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Department of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

C-130J/KC-130J

The conferees agree to provide \$690,000,000 for the procurement of eight C-130J aircraft and \$384,200,000 for the procurement of five KC-130-J aircraft. The conferees are aware that the current FAR Part 12 multiyear contract for these aircraft is being changed to a more traditional FAR Part 15 contract structure. The conferees expect that all 13 aircraft will be procured under a multiyear contract arrangement that will maximize savings to the taxpayer.

**GUIDED MULTIPLE LAUNCH ROCKET SYSTEM
(GMLRS) UNITARY**

The conferees are aware of the recent successful deployment of the GMLRS Unitary Rocket in support of Operation Iraqi Free-

dom. In the missions in which it has been deployed, GMLRS Unitary has demonstrated both very high accuracy and low collateral damage. Accordingly, the conferees urge the Army to maximize the procurement of GMLRS Unitary Rockets from the

\$124,814,000 provided in the conference agreement. The conferees further direct that this amount is a congressional special interest item for the base for reprogramming as described elsewhere in this statement.

**OBJECTIVE INDIVIDUAL COMBAT WEAPON
(OICW) INCREMENT I**

The conferees understand that following a review by the Department of Defense Inspector General (IG) which identified several management issues with the OICW program, the Army has terminated the OICW I request for proposals. However, recognizing the important capabilities that OICW brings to the war fighter, the conferees direct the Army to

resolve the management concerns identified in the IG report and obtain joint validation of the OICW Increment I family of weapons requirements through the Joint Requirements Oversight Council. The conferees strongly encourage the Program Manager to subsequently conduct source selection and award a contract in fiscal year 2006.

The conferees direct the Program Manager to provide the congressional defense commit-

tees a written report detailing the program's updated requirements, acquisition strategy—to include the Army's strategy for replacing existing weapons—and detailed schedule no later than thirty days after enactment of this Act. Furthermore, the conferees direct the Program Manager to provide quarterly updates on the program's status to the congressional defense committees.

LIFE CYCLE MANAGEMENT COMMANDS (LCMC)

The conferees support the goal of the Army's LCMC pilot program to establish integrated business enterprises to better support the warfighter. Currently, there is a geographically separated but strategically important life cycle management plan for ammunition management. Given that the Secretary of Defense has recommended, and the Base Realignment and Closure Commission has endorsed, that Picatinny Arsenal

become the home for a joint integrated weapons and armaments specialty site for guns and ammunition, the conferees believe the Army must evaluate how this organization should be structured.

The conferees understand that the Army will submit a report to the Office of the Secretary of Defense (OSD) detailing its implementation of LCMC programs by December 2005. Accordingly, the conferees direct the Secretary of Defense to submit a report to

the House and Senate Committees on Appropriations providing its assessment of the value of the LCMC construct by February 1, 2006. In addition, by the same date, the Secretary of the Army shall provide a report to the House and Senate Committees on Appropriations that provides a summary of the Army's LCMC review, and that rationalizes the relationship between each component of the life cycle management of ammunition.

LIVE FIRE TRAINER SHOOT HOUSE
DEVELOPMENT

The conferees believe that America's Army Live Fire Trainer, using "America's Army" software and thermal image ballistic tracking and weapon middleware will improve training of soldiers, sailors, and marines in critical urban combat skills. Of note, current U.S. Army live fire urban combat shoot houses will be upgraded to replace paper targets with fully engagable virtual targets, representing enemy, friendly, and non-combatant personnel. As a result, this platform

has a tremendous capability to improve marksmanship, adaptive thinking, and critical combat related tasks in a live-fire environment.

BATTLEFIELD OPERATING SYSTEMS

The conferees direct the Secretary of the Army to provide a report to the congressional defense committees, no later than February 15, 2006, detailing the Army's plan to close the information-sharing gap across Battlefield Operating Systems and provide increased information awareness from multiple domains to the commands and forces

engaged in Operation Iraqi Freedom. The conferees also direct that this report provide information regarding the return on investment of expanding or redirecting resources to the operation and expansion of net-centric information-sharing applications such as Federated Search, Alerts, and FusionNet, delivered by the Horizontal Fusion program. Finally, the conferees direct that this report provide information about the architecture and development of net-centric services that will improve battle command in Operation Iraqi Freedom.

MH-60R HELICOPTER PROGRAM

The conference agreement provides \$438,821,000 for the MH-60R helicopter program. The conferees note that, as the MH-60R moves into full rate production, the

Navy would be able to realize long term cost savings through a multiyear procurement of this aircraft, as is being accomplished with other Navy aircraft, including the MH-60S. The conferees urge the Department of the

Navy to examine the business case for a multiyear procurement of the MH-60R helicopter and, if warranted by the analysis, to implement a multiyear procurement as soon as possible to maximize program savings.

JOINT DIRECT ATTACK MUNITION LASER
CAPABILITY

The conferees understand that combatant commanders in OEF/OIF have requested the

addition of a laser capability to existing Joint Direct Attack Munition (JDAM) weapon kits. This change could provide improved JDAM operational flexibility and time-sensitive target capability. Therefore, the con-

ferees agree with Senate language encouraging the Department to consider laser JDAM testing to provide these increased capabilities to the warfighter.

COST GROWTH RESOLUTION PLAN

The conferees are concerned over the unanticipated cost growth on existing Navy shipbuilding contracts, and agree that the plan directed by the House on this subject is to include details on the cost growth for all existing shipbuilding and conversion efforts. The plan is to be submitted to the congressional defense committees not later than

February 1, 2006, and shall make recommendations on mechanisms to resolve the cost growth, including the option of converting the remaining work to fixed-price contracts.

LHA(R) FUNDING

The conferees do not agree with House direction urging the Navy to reconsider split funding for the LHA(R) Program. The con-

ferees agree to consider either split funding or full funding if proposed by the Administration.

SSBN TRANSIT PROTECTION SYSTEM

The conference agreement provides \$70,700,000 in new budget authority for the SSBN Transit Protection System. The following table summarizes conference actions on this program:

Appropriation	Budget line	Conference agreement
Other Procurement, Navy (rescission of fiscal year 2005 funds)	13	-\$43,000,000
Other Procurement, Navy	24	45,300,000
Weapons Procurement, Navy	30	5,200,000
Operation and Maintenance, Navy	N/A	19,200,000
Operation and Maintenance, Defense-Wide	N/A	1,000,000
Total, new budget authority		70,700,000

The conference agreement provides \$70,700,000 for the Navy's restructured SSBN Transit Protection Program, including

\$45,300,000 in Other Procurement, Navy for the procurement of two 87-foot escort cutters and 11 medium escort vessels, and \$5,200,000 in Weapons Procurement, Navy for weapons for larger screening vessels. In addition, the conferees provide \$19,200,000 in Operation and Maintenance, Navy for the lease of not less than two large screening vessels during fiscal year 2006. The conferees would not oppose efforts by the Navy to provide additional resources to the program during fiscal year 2006 from existing Navy funds. However, while the conferees share the Navy's force protection concerns and provide significant funds for these efforts throughout this Act, the conferees are concerned about aspects of this approach created by the Navy's revised concept of operations. Given programmatic changes over the past year, the conferees be-

lieve it would be important to have an independent review of the current concept of operations. Therefore, the conferees direct the Office of Program Analysis and Evaluation to oversee a study that analyzes the Navy's concept of operations and explores alternatives to the current design, and include \$1,000,000 in Operation and Maintenance, Defense-Wide for that purpose. The Office of Program Analysis and Evaluation is directed to present the results of its analysis to the congressional defense committees within 180 days of enactment of this Act.

Senate direction to withhold the obligation of funds (Senate Report No. 109-141) pending submission of a report on this program was satisfied when such report was submitted on October 12, 2005.

**FUTURE YEARS PROCUREMENT STRATEGY FOR
THE F/A-22 RAPTOR**

The conferees direct the Secretary of Defense to report to the congressional defense committees, by March 30, 2006, on alternatives for the continued acquisition of the F/A-22. The report should consider, but not be limited to, the following: analyses of the advantages of a multiyear procurement program, of extending the F/A-22 procurement profile, and of the effects of F/A-22 procurement on the Joint Strike Fighter production line.

F/A-22 TITANIUM REQUIREMENTS

The conferees are aware of the potential impact that industry trends in the titanium market could have on the production timelines for the Lot 8 F/A-22 aircraft. The conferees are sensitive to this issue and encourage the Department of Defense to propose a comprehensive solution to the congressional defense committees not later than 90 days after enactment of this Act.

PREDATOR B

The conferees direct the Secretary of the Air Force, in conjunction with the Joint

Staff, to provide the congressional defense committees a detailed written report on the deployment status of the MQ-9 in Iraq and the weaponization plan for the aircraft by February 3, 2006.

OPERATIONAL SUPPORT AIRCRAFT

The conferees direct that the Department of Defense maintain the current allocation of Operational Support Aircraft (OSA) assets to support Combatant Commanders and that the congressional defense committees be notified at least 30 days prior to any alteration of such assignments.

JOINT AIR-TO-SURFACE STANDOFF MISSILE

The conferees agree to provide \$100,000,000 for the Joint Air-to-Surface Standoff Missile (JASSM) as proposed by the Senate. Of the funds provided, the conferees direct the following: that not more than \$70,000,000 shall be for the purpose of maintaining missile hardware procurement at a minimum sustainable production rate; that of the remaining funds, not less than \$20,000,000 shall be for testing and reliability improvement; that an additional 4 test shots be added to the JASSM weapons system evaluation program to evaluate the reliability of Lot 1 and Lot 2 missiles in storage; and, that the Program Manager submit to the congressional defense

committees an updated JASSM test schedule no later than 30 days after the enactment of this Act, to include the requirements established in this paragraph.

EVOLVED EXPANDABLE LAUNCH VEHICLE
(EELV)

The conferees support contracting procedures that facilitate competition, assure access to space, and lead to "best value" procurements. The conferees note that the Air Force is transitioning to a new EELV acquisition strategy that contractually splits launch services (including launch vehicles) from launch infrastructure. The conferees direct that launch services contracts provide

an annual opportunity for companies to present their qualifications to meet objective criteria for reliability, mission assurance, oversight, and cost credibility, and compete based on their ability to meet these criteria. The conferees further direct the elimination of multi-year "allocations" "pre-awards," and "block buys" from Buy 3 and future EELV launch services contracts.

Concerning space launch infrastructure, the conferees understand the business case to maintain the EELV infrastructure and support the Buy-3 contracting procedure to award launch capabilities (infrastructure) contracts on a bi-annual basis.

ADVANCED SEAL DELIVERY SYSTEM (ASDS)

Since program inception ASDS has experienced design, construction, performance, and reliability challenges. Since November of this year, the conferees have been made aware of additional reliability concerns with the first ASDS. Based on these concerns, Special Operations Command has again decided to delay construction of the second

ASDS. The conferees find this decision prudent and thus recommend a realignment of the resources provided in both the House and Senate bills for advance procurement of the second ASDS. The conferees recommend increasing research and development funding by \$21,160,000 to conduct critical system reviews, address obsolescence and improve technologies. The conferees recommend increasing procurement funding by \$8,650,000 to

address modernization, and equipment shortfalls and operation and maintenance funding by \$10,100,000 for unforeseen depot and fleet maintenance. The conferees continue to be frustrated by the chronic problems with the ASDS and expect both the Command and the Navy to dramatically increase the level of technical engineering and management oversight dedicated to this program.

NATIONAL GUARD AND RESERVE EQUIPMENT

The conferees agree that National Guard and Reserve forces are integral to our efforts in Iraq and Afghanistan and play a critical role in our Nation's response to national disasters. The conferees are aware that the equipment needs of our Reserve Component forces far exceed the amounts provided in the budget request for those items and agree to provide a total of \$4,131,653,000 for guard and reserve equipment. The funding provided in the conference agreement is located in the following accounts: \$2,654,353,000 as requested in the budget throughout the procurement accounts; \$265,000,000 in addition to the budget request throughout the procurement accounts; \$32,300,000 in the operation and maintenance accounts; \$180,000,000 in the National Guard and Reserve Equipment account; \$100,000,000 for Army Reserve equipment in Title IX for contingency operations; \$700,000,000 for the Army National Guard in Title IX; and \$200,000,000 for the Air National Guard in Title IX.

The House provided specific funding in many of the procurement accounts as requested in the Budget. The Senate provided funding in the National Guard and Reserve Equipment account. The conferees agree to provide the funding identified above in the Guard and Reserve Equipment account and in Title IX, and expect the Department to provide at a minimum the following amounts to the Guard and Reserve components in the following procurement accounts:

Aircraft Procurement, Army	\$317,750,000

AMPLIFYING FLUORESCENT POLYMER-BASED IED DETECTION DEVICES

The conferees have been advised that a fluorescent polymer-based technology for IED detection has shown great promise in Iraq and has had some very significant inde-

pendent test results demonstrating that it can be beneficial in the war on terror. Therefore, the conferees direct the Technical Support Working Group to review these tests and the technology to determine its applicability to the mission of defeating IEDs. The Technical Support Working Group is to re-

port back to the congressional defense Committees within 60 days of enactment of this Act regarding the technical feasibility of the technology and its status in the acquisition process.

SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” in this report are congressional interest items for the purpose of the Base for Reprogramming (DD 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, or a revised amount if changed during conference or otherwise specifically addressed in the conference report. These items remain special interest items whether or not they are repeated in a subsequent conference report.

REPROGRAMMING GUIDANCE FOR RESEARCH, DEVELOPMENT, TEST AND EVALUATION ACCOUNTS

The conferees direct the Department of Defense to continue to follow the reprogramming guidance specified in the Statement of the Managers on the fiscal year 2005 Department of Defense Appropriations Act (House Report 108-622). Specifically, the dollar threshold for reprogramming procurement funds will remain at \$20,000,000, and at \$10,000,000 for research, development, test and evaluation. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20% of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative. Therefore, if the combined value of transfers into or out of a procurement (P-1) or research, development, test and evaluation (R-1) line exceeds⁵ the identified threshold, the Department of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the

application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

JOINT TACTICAL RADIO SYSTEM (JTRS)

The conferees direct the Secretary of Defense to submit a report to the congressional defense committees not later than January 30, 2006, on the status of JTRS. The report shall include the following elements: mitigation plans of the Military Services to compensate for the restructuring of the JTRS program including a detailed description of the legacy or other radios required as well as detailed estimates of the cost of these plans; an explanation of Army plans to meet Future Combat System requirements associated with all developmental spirals as a result of the JTRS program revisions, to include a detailed description of the compatibility between legacy radios and the Army’s Warfighter Information Network-Tactical (WIN-T) as well as the compatibility between JTRS and WIN-T; and a summary of DoD acquisition decisions including the results of the Defense Acquisition Board (DAB) meetings held in August and November 2005 to rebaseline this program. In addition, the conferees direct the Government Accountability Office (GAO) to continue its ongoing review of the JTRS program to include a review of technical, management, cost and schedule issues associated with the program.

In addition, the conferees urge the Department to formally establish the Joint Program Executive Office (JPEO) organization for JTRS, specify its authorities, and resource it appropriately to accomplish its mission. The conferees also urge the Department to establish associated operation and

maintenance funding to establish and provide for the operating expenses of this organization. Finally, the conferees direct the Secretary of Defense to provide a report on the organization, authorities, and plan to resource the JPEO within 90 days of enactment of this Act.

JOINT COMMON MISSILE (JCM)

The conferees support continuation of this program noting that this is the first program to have successfully completed the requirements determination process implemented in the Joint Capabilities Integration and Development System (JCIDS). The conferees recommend that the Department of Defense reevaluate the decision to terminate this program and, accordingly, provide \$30,000,000 above the budget request to continue development of the JCM. Of this amount, \$26,000,000 is provided in Research, Development, Test and Evaluation, Army, and \$4,000,000 is provided in Research, Development, Test and Evaluation, Navy. In addition, the conferees direct the Secretary of Defense to submit a report to the congressional defense committees no later than January 30, 2006, that explains how the Department of Defense will mitigate the capability gaps identified in the JCIDS analysis and provides a cost comparison analysis of continuing the JCM program versus JCM termination and continued procurement of legacy air-to-ground missiles to fulfill mission requirements.

FUTURE COMBAT SYSTEM (FCS)

The Statement of the Managers accompanying the Department of Defense Appropriations Act for fiscal year 2005 (House Report 108-622) established a structure for budget preparation and execution for FCS which included broadly defined projects within the Armored Systems Modernization program element. In addition, the statement directed the Army to establish separate program elements for the Non Line of Sight Launch System (NLOS-LS) and the Non Line of Sight Cannon (NLOS-C). The conferees believe that this remains a reasonable structure, and direct the Army to continue to use this as the basis for executing appropriations provided by the Congress, and as the basis for preparing the fiscal year 2007 and subsequent budget submissions. This funding structure includes the following components:

Program Element 0604645A Armored Systems Modernization to include the following projects:

- F52—FCS Reconnaissance Platforms & Sensors
 - F53—FCS Unmanned Ground Vehicles
 - F54—Unattended Sensors
 - F55—Sustainment
 - F57—F57 Manned Ground Vehicles
 - F61—System of Systems Engineering and Program Management
- Program Element 0604646A Non Line of Sight Launch System (NLOS-LS)
 Program Element 0604647 A Non Line of Sight Cannon (NLOS-C)

The conferees direct the Secretary of the Army to report to the congressional defense

committees within 30 days of enactment of this Act on the plan to distribute the \$2,785,829,000 provided by the conference agreement for the Armored Systems Modernization program element (PE 0604645A) to each of the projects listed above. The conferees designate these projects as congressional special interest items for the purpose of prior approval reprogrammings as discussed elsewhere in this report. The NLOS-LS and NLOS-C program elements are subject to normal prior approval reprogramming procedures as described elsewhere in this report. In addition, the conferees direct the Army to provide a report to the congressional defense committees not later than January 15, 2006, which provides a detailed list and description of the systems and technologies to be included in each of the FCS developmental spirals.

NON-LINE-OF-SIGHT CANNON (NLOS-C)

The conferees note that the Army provided the congressional defense committees with a report on September 28, 2005, pursuant to language included in the report accompanying the House-passed version of the fiscal year 2006 Department of Defense Appropriations Act. The conferees find the report encouraging because it indicates that the Army plans to produce a self-propelled Future Combat System non-line-of-sight cannon indirect fire capability to equip the future force as required by section 216 of the National Defense Authorization Act for fiscal year 2003, and section 8121 of the Department of Defense Appropriations Act for fiscal year 2003. The conferees note that each annual Department of Defense Appropriations Act since 2003 has included similar language. The conferees are further encouraged by the Army's plan to produce a quantity of eight pre-production prototypes, and to begin fielding these guns starting in 2008. Accordingly, the conference agreement provides \$148,387,000, an increase of \$40,800,000 above the budget request, to enable the Army to continue this effort.

MULTI-SENSOR ARCHITECTURE

The conferees agree to recommend additional funding for obtaining, evaluating, and integrating new sensors into the Cerberus architecture. These would include fiber optic perimeter sensors, medium range millimeter wave radars, and low cost thermal imaging surveillance sensors. Evaluation and integration of these sensors are to be managed by the Army Night Vision Electronic Sensor Division.

FLEXIBLE ELECTRONICS RESEARCH INITIATIVE FOR ARMY SOLDIERS (FERIAS)

The conferees recognize the importance of developing new materials for flexible electronics technologies that will have broad impact for multiple military applications. The

combination of these new materials and technologies will lead to soldiers receiving information in real time on maps and displays, improving both military communications and soldier safety. The resiliency of these devices could also increase the lifetime and reliability of current display applications in harsh environments, including the battlefield.

The conferees direct the Army Research Laboratory (ARL) to continue to aggressively pursue and take all necessary steps to develop new technologies that will enable flexible electronics to become an integral part of the Army's transformation. The conferees also direct ARL to collaborate with the leading developers of flexible display technology to fully develop the Flexible Electronics Research Initiative for Army Soldiers (FERIAS).

APPLIED AND CLINICAL PROSTHETIC RESEARCH

The conferees support the Army's effort to sustain a collaborative applied and clinical prosthetic research activity at the Walter Reed Army Medical Center Amputee Care Center, and provide \$5,500,000 to further develop this program to advance prosthetic technological achievement through applied and clinical research activities. Included in this amount is funding for continuation of the effort to improve and harden micro-processor knee componentry.

PREVENTIVE MEDICINE

The conferees remain concerned about rising personnel costs, especially health care costs, as a percent of the total Department budget. Eliminating or reducing health care services to our military members, retirees, and their families, however, is not a viable alternative to reigning in future increases in health care costs. As such, the conferees applaud the preventive medicine programs being undertaken by the tri-service community, and see these programs as vital to controlling the rising costs of treating diseases, including cardiovascular diseases, cancer, and diabetes. The conferees encourage the continuation and future development of programs that stress early detection and individual lifestyle changes to promote a healthier military community.

CHIROPRACTIC CARE

The conferees note military personnel receive chiropractic health care benefits. Further, chiropractic medicine is an established and sought after form of treatment in military medical facilities. The conferees, therefore, encourage the Army to evaluate establishing a research facility that supports chiropractic medicine for military applications.

ADVANCED SUBMARINE SYSTEM DEVELOPMENT

The conference agreement includes a program reduction of \$20,000,000 as proposed by the Senate. In fiscal year 2006 budget deliberations, the Department of Defense added \$600,000,000 over the future years defense plan (FYDP) for development of an advanced undersea superiority system. The conferees reduce this project by \$20,000,000, and direct the Office of the Secretary of Defense, in consultation with the Department of the Navy, to submit a comprehensive plan describing the scope, objectives, schedules, and project costs for this program over the FYDP. In addition, the report should discuss how these additional efforts fit in with ongoing Navy and DARPA programs in both advanced submarine development and antisubmarine warfare. This plan should be sub-

mitted to the congressional defense committees not later than March 1, 2006.

JOINT TACTICAL RADIO SYSTEM—NAVY

The conference agreement includes a reduction of \$80,800,000 to the Joint Tactical Radio System (JTRS)—Navy program, instead of \$50,766,000 as proposed by the House and \$30,000,000 as proposed by the Senate. The conferees agree that none of this reduction should be applied against the Multifunctional Information Distribution System (MIDS) project.

UNIVERSITY NATIONAL OCEAN LABORATORY
SYSTEM FLEET

The conferees agree that, if funds are requested in fiscal year 2007 for recapitalization of the University National Ocean Laboratory System (UNOLS) fleet of research vessels, such funds should be requested in

the Shipbuilding and Conversion, Navy (SCN) appropriation.

MILITARY DENTAL RESEARCH

The conferees remain deeply concerned about the provision of quality medical care to our injured troops as they return from conflict in Iraq and Afghanistan. Head and neck trauma account for almost 50 percent of these injuries and are presenting the most difficult long-term morbidity challenges, particularly for our military's oral surgeons. Army and Naval researchers at the U.S. Army Dental Trauma and Research Detachment at the Great Lakes facility are developing innovative protective equipment and rapid-read diagnostic tests to help reduce the severity and number of casualties. The conferees are encouraged by this research and provide \$3,400,000 to further the development of these and other protective measures.

SPACE RADAR

The conferees have reviewed the authorization and appropriation language of the various committees of jurisdiction for the Space Radar program and note that there appears to be broad congressional consensus on many key issues. First, in the absence of a major breakthrough, there is significant concern across the board regarding the ultimate cost and affordability of the Space Radar program. Second, there is concern about the space acquisition workforce and the Air Force and industry's ability to manage expensive and complicated satellite programs such as Space Radar. Finally, there is broad agreement that the Air Force should place greater emphasis on maturing technologies, seeking out new technical breakthroughs, experimenting with existing radar assets (such as airborne surrogates), and developing critical ground processing capabilities instead of focusing so heavily on near term satellite system development. The conferees agree that the funds provided are only for the elements of congressional consensus described above. Further, the conferees agree with the House direction requiring submission of a spend plan prior to obligation of fiscal year 2006 funds.

TRANSFORMATIONAL SATCOM (TSAT)

The conferees support the Defense Department's concept for global high-speed communications and recognize the value that TSAT-like capabilities would provide to world-wide military operations. However, the conferees are concerned about the state of technical maturity for the key subsystems and do not support the program's aggressive schedule for acquisition. The conferees are also concerned that DoD may have prematurely ruled out the possibility of evolving Advanced EHF (AEHF) and the Wideband Gapfiller System (WGS) programs to provide TSAT-like capabilities. Therefore, the conferees agree to reduce the program by \$400,000,000 and direct the program to focus on technology maturation for the key subsystems, particularly laser communications and the processor router. Transition to a formal acquisition program should be deferred until the technologies are mature and have been demonstrated in a relevant environment.

Of the remaining \$436,769,000, the conferees direct that no more than \$316,769,000 may be

obligated until DoD submits to the congressional defense committees the results of an independent review that: (1) determines whether additional AEHF or WGS satellites will be required and how many; and (2) whether it is feasible, taking into consideration cost, risk, contract requirements, and other factors, to insert advanced capabilities by evolving the AEHF or WGS programs. In the event the Department determines a fourth AEHF is required, \$120,000,000 shall be available for advance procurement and research and development activities in support of the fourth AEHF. In the event the Defense Department determines a fourth AEHF is not required, the \$120,000,000 shall be available to support expanded system development and maturation of the key TSAT technologies.

JOINT UNMANNED COMBAT AIR SYSTEMS (J-UCAS)

The conferees are concerned over whether the Navy and Air Force share the same requirements and concept of operations for the J-UCAS. Given that the Department of Defense proposes to make substantial investments in the J-UCAS program, exceeding \$5 billion for development alone, it is important to ensure from the outset that there is stability in the program. Given these concerns, the conferees have reduced the budget request by \$40,090,000 and direct the Department of Defense to conduct an independent study to objectively review the J-UCAS program for both Navy and Air Force technical, military operations, and test and evaluation requirements, as well as options for cost savings. The conferees direct that the report include a schedule and budget for the J-UCAS program, to include entering system development and demonstration, and an evaluation of the Air Force as the Executive Agent. The conferees further direct that the report provide an analysis and recommendation on whether the Air Force and Navy programs are sufficiently different in their respective requirements and level of development to merit separation into service unique programs. The report should be provided to the congressional defense committees not later than May 3, 2006.

COMBAT SEARCH AND RESCUE (CSAR-X)

The conferees are concerned that a major development effort for the CSAR-X program could be cost prohibitive and would not yield

a sufficient number of helicopters to replace the Air Force's current aging fleet in a timely manner. Due to these concerns, the conferees expect the Air Force to select an existing aircraft that will require minimum research and development to field and that presents an overall "best value" to the government, giving full consideration to military utility and costs in the contract selection process. The conferees agree to reduce the request by \$42,000,000 due to a delay in the request for proposal and contract award date. The conferees further agree to restrict \$66,069,000, of the available \$71,825,000, pending the submission of a report to the congressional defense committees with detailed cost and schedule estimates for development and production. The report shall be submitted following contract award and also include estimated operation and support costs, necessary military configuration modifications, and a test and evaluation plan.

JOINT SURVEILLANCE AND TARGET ATTACK RADAR SYSTEM (JOINTSTARS) RE-ENGINEING

The conferees have provided \$12,500,000 to begin the non-recurring engineering (NRE) activities associated with re-engineing the JointSTARS aircraft fleet and expect the Secretary of the Air Force to include funding for NRE activities in the FY 2007 budget request. The conferees note that in January 2005 the Under Secretary of Defense for Acquisition, Technology, and Logistics announced the Department's intent to request updated quotes from industry on the costs to modify JointSTARS aircraft with new engines, and that the Department is currently in the process of evaluating these quotes. Upon completion of this activity, the conferees direct the Secretary of the Air Force to submit to the congressional defense committees an evaluation of potential development and acquisition options for re-engineing all or part of the JointSTARS aircraft fleet.

REAL-TIME MEASUREMENT WEIGHT AND BALANCE SYSTEM

The conferees direct the Under Secretary of Defense, Comptroller, to transfer fiscal year 2005 Air Force Research, Development, Test and Evaluation funding for the "Real-Time Measurement Weight and Balance System" to Research, Development, Test and Evaluation, Navy, Line 182, Aviation Improvements.

INITIATIVE FUNDS

The conferees direct the Secretary of Defense to provide quarterly reports beginning the first fiscal quarter after the enactment of this Act to the congressional defense committees detailing the specific programs that are funded from the Quick Reaction Special Projects, the Counter Terrorism Technology Support Program and the Combating Terrorism Technology Task Force funds. The reports should include project descriptions with their respective schedule and funding requirement, transition plans to the services for further development and lessons learned from completed projects. The conferees further direct the Secretary to provide the reports to the Director of National Intelligence and the Secretary of Homeland Security.

CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM

The conference agreement provides an increase of \$21,000,000 for the Chemical and Biological Defense Initiative. The Secretary of Defense is directed to allocate these funds among the programs that yield the greatest gain in our chem-bio defensive posture. The conferees further direct that such funds may not be obligated until 15 days after a report, including a description of projects to be funded, is provided to the congressional defense committees.

OPERATIONALLY RESPONSIVE SPACE

The conference agreement includes an increase of \$39,000,000 for Operationally Responsive Space (ORS) projects. Of this amount, \$20,000,000 is only for standardized bus development, and \$19,000,000 is only for operationally responsive payload development.

ASYMMETRIC MISSILE THREAT

The conferees are increasingly concerned about the possibility of an asymmetric missile threat against the United States home-

land where terrorists would move short-range missiles closer to the United States on sea-based platforms. The conferees recommend \$10,000,000 to conduct a comprehensive analysis on the need for and deployment of an asymmetric missile defense capability, including both land and sea-based solutions, against the full range of asymmetric missile threats. Accordingly, the Director of the Defense Intelligence Agency shall provide a report to the congressional defense committees not later than March 1, 2006, which examines this threat and assesses its validity. Based on those findings, the Director of the Missile Defense Agency, in consultation with U.S. Northern Command and U.S. Strategic Command, shall provide a report to the congressional defense committees not later than June 1, 2006, that provides its recommendations for deployment options of an asymmetric missile defense capability that would protect population centers, use mature technologies, and include progressions for spiral technology upgrades that would enhance missile defense capabilities over time.

KINETIC ENERGY INTERCEPTOR

The conference agreement provides \$215,952,000 for the Kinetic Energy Interceptor instead of \$202,246,000 as proposed by the House and \$104,952,000 as proposed by the Senate. The conferees direct the Missile Defense Agency to execute the program as proposed in the fiscal year 2006 President's Budget.

NFIRE

The conferees encourage the Missile Defense Agency to continue development and mission integration of the deployable NFIRE Kill Vehicle.

HIGH PERFORMANCE COMPUTING

The Fiscal Year 2002 Defense Appropriations Act directed the Secretary of Defense

to submit a development and acquisition plan for a comprehensive, long-range, integrated, high-end computing program to Congress by July 1, 2002. The report, "High Performance Computing for the National Security Community", was submitted to Congress on April 9, 2003. The letter accompanying the report stated that, "Over the next 6 months, the Department will develop an appropriate implementation plan for high-end computing, working in close coordination with other government agencies." The conferees are concerned that the Department has not developed an implementation plan as promised. Therefore, the conferees direct the Office of the Secretary of Defense to submit to Congress no later than 90 days after enactment of this Act a report outlining plans for implementing and funding the Integrated High-End Computing (IHEC) Program and for creating a Joint Program Office to oversee the program. The conferees encourage the Secretary of Defense to include and fully fund a complete IHEC program in the President's Budget for FY 2007.

IDENTITY AUTHENTICATION

The conferees are aware that the Department of Defense has a pressing need to acquire and deploy systems that authenticate the identities of individuals seeking access to its installations. The conferees believe that acquisition of such systems should be based on sound performance requirements and take advantage of the innovation and capabilities of the commercial marketplace. Such systems should draw on a variety of bona fide data sources (including those maintained by the Department) to permit access only to those who require it.

The conferees recommend an appropriation of \$1,154,940,000 for the Defense Working Cap-

ital Funds as proposed by the Senate instead of \$1,154,340,000 as proposed by the House.

NATIONAL DEFENSE SEALIFT FUND

The conferees agree to provide a total of \$1,089,056,000 for the National Defense Sealift

Fund instead of \$1,599,459,000 as proposed by the House and \$579,954,000 as proposed by the Senate.

T-AKE DRY CARGO/AMMUNITION SHIP

The conferees agree to provide \$380,143,000 to purchase one T-AKE cargo ship, as requested by the Department of Defense. The House version of the bill included additional funds to purchase one more T-AKE ship,

whereas the Senate proposed eliminating funding for this program.

The conferees understand that approving the Department's request will likely cause a break in the contract between the Navy and the shipbuilder. As such, the conferees in-

tend to closely monitor possible contract renegotiations on this program to ensure that any cost increases are justified by legitimate changes in Navy requirements or other legitimate equitable adjustments.

REPROGRAMMING GUIDANCE FOR THE DEFENSE HEALTH PROGRAM

Any additional funds provided by the conferees for programs and/or activities above the budget request are to be considered as congressional special interest items for the purpose of the Base for Reprogramming Form (DD 1414). Therefore, each of these items must be submitted to the Subcommittee on Military Quality of Life and Veterans Affairs, and Related Agencies of the Committee on Appropriations of the House of Representatives and the Subcommittee on Defense of the Committee on Appropriations of the Senate on a DD 1414 at the stated amount.

REPROGRAMMING GUIDANCE FOR THE DIRECT (IN-HOUSE) CARE BUDGET ACTIVITY

The conferees remain concerned regarding the transfer of funds from Direct (or In-house) Care to pay for contractor-provided medical care. To limit such transfers and continue oversight within the Defense Health Program operation and maintenance account, the conferees have included bill language which limits the funds available for Private Sector Care under the TRICARE program subject to prior approval reprogramming procedures. In addition, the conferees also designate the funding for the Direct Care System as a special interest item, as defined elsewhere in this report. Any transfer of funds from the Direct (or In-house) Care budget activity into the Private Sector Care Budget activity will require the Department of Defense to follow prior approval reprogramming procedures. The bill language and accompanying report language included by the conferees should not be interpreted by the Department as limiting the amount of funds that may be transferred to the direct care system from other budget activities within the Defense Health Program.

In addition, the conferees direct the Department of Defense to provide budget execution data for all of the Defense Health Program accounts. Such budget execution data shall be provided quarterly through the DD-COMP(M) 1002 accounting form and delivered to the Subcommittee on Military Quality of Life and Veterans Affairs, and Related Agencies of the Committee on Appropriations of the House of Representatives and the Subcommittee on Defense of the Committee on Appropriations of the Senate not later than one week after the conclusion of the quarter.

PRIVATE SECTOR CARE

During the fiscal year 2006 budget briefs the documentation presented was wrought with errors making it extremely difficult to follow specifics regarding the total program requirement. Therefore, the conferees direct the Department to notify the Subcommittee on Military Quality of Life and Veterans Affairs, and Related Agencies of the Committee on Appropriations of the House of Representatives and the Subcommittee on Defense of the Committee on Appropriations of the Senate on the movement of dollars within the private sector care budget activity group on a quarterly basis beginning in the first quarter of fiscal year 2006. The quarterly reports are to be delivered not later than one week after the conclusion of the quarter.

GAO REPORT REQUEST ON THE DEPARTMENT OF DEFENSE PHARMACY PROGRAM

The conferees direct that the Government Accountability Office (GAO) conduct a review of the Department of Defense's Pharmacy Program. The review should include, but not be limited to the following: (1) Fed-

eral pricing controls implemented for retail pharmacy; (2) pharmacy growth above inflation, increased demand and utilization; (3) comparison of to the National rate and the Department of Defense rate and; (4) assumed savings in fiscal years 2005, 2006 and 2007 from Federal pricing. Further, the review should be made available to the congressional defense committees not later than April 1, 2006.

PEER REVIEWED MEDICAL RESEARCH PROGRAM

The Senate recommended \$50,000,000 for a Peer Reviewed Medical Research program. The conferees agree to provide \$50,000,000 for this program, and recommend the following projects as candidates for study: advanced proteomics; alcoholism research; autism; blood-related cancer research such as leukemia, lymphoma, and multiple myeloma; childhood asthma; chronic pain and fatigue research; childhood cancer research; diabetes research; Duchenne's disease research; eye and vision research; fibromyalgia; Interstitial Cystitis Syndrome; kidney cancer research; Lupus Research; osteoporosis and bone-related diseases; polycystic kidney disease; pulmonary hypertension; Padgett's disease; post traumatic stress disorders; social work research; and autoimmune diseases such as scleroderma and Sjogren's syndrome.

The conferees direct the Department to provide a report by March 1, 2006, on the status of this Peer Reviewed Medical Research Program.

DEFENSE AND VETERANS HEAD INJURY PROGRAM FUNDING

The conferees are concerned with the management of the funds for the Defense and Veterans Head Injury Program (DVHIP). Therefore the conferees direct that the President's Budget request of \$7,000,000 for DVHIP, as well as any other funds directed to this program, be transferred from the Uniformed Services University of the Health Science (USUHS) to the Army Medical Research and Materiel Command (AMRMC) at Fort Detrick beginning in fiscal year 2006.

BLAST INJURY PREVENTION, MITIGATION, AND TREATMENT INITIATIVE

The Military Health System has seen an increase in the number of traumatic brain and head injuries to servicemembers as a result of ongoing combat operations. Therefore, the conferees have provided \$12,600,000 for the Blast Injury Prevention, Mitigation, and Treatment Initiative to increase research, diagnosis and treatment for servicemembers afflicted with these types of injuries. The conferees also expect the Defense and Veterans Head Injury Program (DVHIP) to have a substantial role in the use of these funds as the DVHIP has been an integral part of research, diagnosis, and treatment since 1991.

SMOKING AND TOBACCO USE CESSATION

The House and Senate both expressed concern over the costs associated with smoking and tobacco cessation products and that they are not reimbursable under TRICARE Prime. Additionally, the conferees are concerned that the Department has not been aggressively incorporating suggested pilot programs.

The conferees direct the Department to report to the congressional defense committees not later than March 1, 2006 on the Department's plan to address these concerns. The report should include, but not be limited to, the following subjects:

—Pilot projects to be incorporated with the TRICARE Prime benefit;

—Measures that will be taken by the military services to expedite tobacco use preven-

tion and cessation programs available to all military personnel;

—A plan that the Secretary of Defense determines appropriate for improving the out of pocket costs to military personnel for smoking cessation products; and

—A plan for continuing the "Healthy Choices for Life" demonstration program.

DIRECTED MISSION UPGRADES OF THE DEFENSE MEDICAL LOGISTICS STANDARD SUPPORT SYSTEM (DMLSS)

The Department of Defense has mandated that its suppliers use Radio Frequency Identification (RFID) on all cases in the supply chain by 2008. For this to happen, RFID technology must be integrated into the DMLSS by January 1, 2007. The conferees are disturbed that the Office of the Secretary of Defense (OSD) mandated this policy initiative while at the same time allowing the TRI-CARE Management Activity to cut the budget for this program in fiscal year 2006. This action reduces the DMLSS development budget for new capabilities and defers development to fiscal year 2010 and deployment to fiscal year 2011.

Therefore, the conferees have provided \$4,300,000 to help prevent this program from slipping further and direct the Department to fully fund this initiative in the fiscal year 2007 budget and beyond to ensure the Department's established goal is reached.

SPECIAL MENTAL HEALTH CARE—TRICARE SOUTH REGION

The conferees are aware of the growing need for post traumatic stress disorder (PTSD) and special mental health care treatment and the growing number of Active and Reserve Component soldiers returning to the southeast region requiring such specialized care. The conferees direct the Assistant Secretary of Defense for Health Affairs, in conjunction with the TRICARE Regional Director for the South to report, not later than March 1, 2006 to the congressional defense committees with a plan to expand existing capabilities to ensure that potential regional PTSD and related mental health challenges in this area are adequately addressed, to include Phoebe Putney Memorial Hospital.

DOD/VA PATIENT RECORDS

The conferees are aware that the Department of Defense and the Department of Veterans Affairs do not presently share in real time the medical records of patients that transfer between their two systems, despite existing technology which could allow such sharing. The conferees are concerned that patient care may be compromised as a result and understand that the Navy has proposed a memorandum of understanding (MOU) between Bethesda Naval Hospital and a regional polytrauma VA hospital to allow two physicians at each institution to have unlimited electronic access to the medical records of patients they have shared or are about to share. The conferees direct the Secretaries of Defense and Veterans Affairs to establish a similar system of medical record sharing which will allow physicians at Bethesda, Walter Reed or other DoD medical facilities, and hospitals in the VA system real time access to the records of their patients at each of the other institutions.

The conferees further direct the Secretary of Defense and the Secretary of Veterans Affairs to report to the congressional defense committees not later than April 1, 2006 on a plan, including cost, to achieve medical record sharing.

The conferees note this is a one-time exception to assist the Department of Defense to re-start the critical

work that must be accomplished at these two sites in order for the Nation to comply with the Chemical Weapons Convention (CWC) Treaty. Further, the conferees direct the Department of Defense to request the appropriate authorizations and appropriations in order to continue and complete the Blue Grass and Pueblo sites, and that these requirements be reflected in its fiscal year 2007 budget submission.

HOME STATION READINESS TRAINING AND LOGISTICS

In this title the conferees recommend \$50,000,000,000 as a "bridge fund" in support of ongoing contingency operations related to the Global War on Terror, including \$33,217,848,000 in the operation and maintenance accounts. Substantial funding will be required to support continuing combat and security operations in Afghanistan and Iraq. The conferees understand that substantial amounts will be needed as well in support of unit mobilizations, specialized pre-deployment training, transportation to and from the areas of operation, home station recovery and reset, and post-deployment training to ensure recovery to established readiness standards for full spectrum combat oper-

ations around the world. Specialized training before deployment, and retraining after deployment, with the associated transportation, base operations, logistical, maintenance and reset costs, though accrued at home station, should be attributed to the continuing combat and peacekeeping operations. To the extent that such training, maintenance and reset activities displace normal peacetime training events, the amounts provided in home station operation and maintenance lines have been reduced. The Department of Defense should allocate title IX operation and maintenance funding accordingly, to ensure full support for pre-deployment and post-deployment operations, as well as for continuing combat and security operations in support of the Global War on Terror.

IRAQ FREEDOM FUND

The conference agreement includes \$4,658,686,000 for the Iraq Freedom Fund. Of this amount, \$1,360,000,000 is for the IED Defeat Task Force, \$3,048,686,000 is for classified activities described further in a classified annex to this report, and \$250,000,000 is for emergent needs for the Global War on Terror. Additionally, the conference agreement provides that up to \$100,000,000 shall be available for the Department of Homeland Security, "United States Coast Guard, Operating Expenses".

NATIONAL GUARD AND RESERVE EQUIPMENT

The conferees agree to provide \$1,000,000,000 in title IX for National Guard and Reserve Equipment, to be distributed as follows: \$700,000,000 for the Army National Guard; \$200,000,000 for the Air National Guard; \$100,000,000 for the Army Reserve. The conferees agree that to the maximum extent possible, the National Guard equipment pro-

vided in title IX should be equipment identified by the Chief of the National Guard Bureau to the House and Senate Appropriations Committees in the September 22, 2005 document entitled “National Guard Equipment Requirements, Protecting America at Home and Abroad”. The conferees direct the Chief of the National Guard Bureau and the Chief of the Army Reserve to submit to the con-

gressional defense committees a report specifying the items to be procured with this funding and a fielding plan for this equipment not later than 30 days after the enactment of this Act.

INTEROPERABLE COMMUNICATIONS IN DISASTER RESPONSE

The conferees recognize the need to ensure rapid and uninterrupted communications between Federal, state, and local first responders and the National Guard. As recently demonstrated in the response to Hurricane Katrina, communications breakdowns limit the Guard's ability to respond effectively and rapidly in either a man-made or natural disaster. The conferees fully support the National Guard Bureau's initiatives to develop interoperable and reliable communications. Of particular interest is the Joint CONUS Communications Support Enterprise team concept. As a part of this initiative, the conferees are aware that the National Guard Bureau has developed a concept called the National Guard Bureau Incident Area Communications Program. This program would deploy a software-based solution that improves interoperability by enabling disparate communications devices and networks to work together. Therefore, the conferees urge the Department of Defense to fully fund this initiative to ensure a robust interoperable solution for the National Guard to meet its first responder communications needs.

JOINT NETWORK NODES

The conferees agree to provide \$175,000,000 for procurement of the Joint Network Nodes (JNN) program in title IX, Other Procurement, Army, within the Bridge to Future Networks line. The House and Senate continue to support the procurement of JNN based on the Army requirement to respond to the urgent needs of ground forces for tactical communications. The conferees are concerned, however, that the Army is not evolving its network communications programs at a sufficiently fast rate from JNN to objective WIN-T capability. For example, JNN funding contained in title IX could resource a JNN+ capability that moves network communication capability closer to the WIN-T requirement. Therefore, the conferees direct the Army to submit a report not later than January 15, 2006, detailing its plans to procure evolutionary capability in its network communications programs.

IMPROVISED EXPLOSIVE DEVICE COUNTERMEASURES

The conferees support DoD efforts to provide the strongest possible defense against the Improvised Explosive Device (IED) threat faced in theater, and provide not less than \$1,360,000,000 in the Iraq Freedom Fund (IFF) for this purpose. The conferees are aware of several specific Service requirements along these lines and direct the Joint IED Task Force to fully fund validated Army and Marine Corps requirements for Backscatter Radars and related equipment, and H2K ICE Jammers. In addition, the conferees direct the Task Force to provide quarterly updates to the congressional defense committees, to include assessments of the evolving threat posed to war fighters by IEDs, individual Service requirements to counter this threat, and a report on the execution of funds provided to the Joint IED Task Force.

In addition, the conferees recognize and commend the ongoing effort of the Department of Defense to develop the next generation of countermeasures for IEDs. Furthermore, the conferees note that current counter-IED systems deployed in Operation Iraqi Freedom and Operation Enduring Freedom provide an important force protection capability. The conferees, therefore, direct the Department to continue procurement of sufficient quantities of currently deployed counter-IED technologies and, where applicable, to provide those systems with available upgrades.

GENERAL PROVISIONS—THIS TITLE

The conferees include a general provision (Section 9001) as proposed by the House and the Senate which provides that appropriations made in this title are available for obligation until September 30, 2006, unless otherwise so provided in this title.

CLASSIFIED PROGRAMS

Adjustments to classified programs are addressed in the classified annex accompanying this Joint Explanatory Statement.

REPORTING REQUIREMENTS

The conferees direct the Secretary of Defense to provide a report to the congressional defense committees within 30 days of enactment of this legislation on the allocation of the funds within the accounts listed in this chapter. The Secretary shall submit updated reports 30 days after the end of each fiscal quarter until funds listed in this chapter are no longer available for obligation. The conferees direct that these reports shall include: a detailed accounting, by programs and sub-activity groups, of obligations and expenditures of appropriations provided in this chapter for the continuation of relief and recovery operations from the storm damage; and a listing of equipment procured using funds provided in this chapter.

The conferees expect that in order to meet unanticipated requirements, the Department of Defense may need to transfer funds within these appropriations accounts for purposes other than those specified in this chapter. The conferees expect the Department to follow normal prior-approval reprogramming procedures should it be necessary to transfer funding between different appropriations accounts in this chapter.

being provided. All such costs shall be subject to review, audit, and validation by appropriate management officials of the military service, including the Government Procurement Contracting Officer and service audit teams. Approved costs will be reimbursed as they are incurred with no application of general and administrative overhead or profit.

The conference agreement provides emergency funding to address water resource projects damaged by Hurricanes Katrina, Rita, Ophelia and Wilma. The funding provided in this chapter is based on Corps of Engineers' estimates of the requirements of all areas of the Nation impacted by these hurricanes. The conferees expect the funds provided herein shall be expended substantially in accordance with those estimates.

INVESTIGATIONS

Funds totaling \$37,300,000 are provided to expedite ongoing studies in the areas recently affected by recent hurricanes, as shown below:

Louisiana Coastal Area Ecosystem Restoration, LA	\$11,000,000
Hurricane Protection, LA	12,000,000
Hurricane Protection, MS	10,000,000
Plaquemines Parish, Urban Flood Control, LA	1,200,000
St. Bernard Parish Urban Flood Control, LA	1,200,000
St. Charles Parish Urban Flood Control, LA	1,100,000
Southwest Coastal Louisiana, LA	500,000

Bouge Banks, NC	100,000
Hatteras and Ocracoke Islands, NC	100,000
Surf City and North Topsail Beach, NC	100,000

The conference agreement includes \$11,000,000 for the Louisiana Coastal Area Ecosystem study. These funds, together with \$10,000,000 provided in the Energy and Water Development Appropriations Act, 2006, provide the amounts necessary to continue the Louisiana Coastal Plan this fiscal year. Within these amounts, funds are provided for hurricane or storm damage assessment, including coastal data collection.

The conference agreement includes a provision that withholds funding provided for the Louisiana Hurricane Protection Study in this Act until the State of Louisiana establishes a single state or quasi-state entity to act as the local sponsor for construction, operation and maintenance for all hurricane, storm damage reduction and flood control projects in the greater New Orleans and southeast Louisiana area. The conferees expect that no funds shall be available for the final report after the completion of the preliminary technical report until a functioning single entity is established by the State to meet local responsibilities for Federal projects.

CONSTRUCTION

Funds totaling \$101,417,000 are provided to repair flood and storm damage reduction, commercial navigation and other projects damaged by Hurricanes Katrina, Rita, Ophelia and Wilma.

Citing a lack of authorization, the conferees did not provide the request of \$250,000,000 for coastal mitigation; however, a total of \$96,000,000 is available in fiscal year 2006 for activities related to improving the Gulf Coast coastal wetlands to reduce the risk of storm damage to the greater New Orleans metropolitan area. In this Act, \$11,000,000 is provided to further the Louisiana Coastal study in the Investigations account, together with \$10,000,000 provided in the Energy and Water Development Appropriations Act, 2006. In addition, \$75,000,000 is provided in this Act in the Operations and Maintenance account for authorized activities to preserve and maintain existing wetlands, enhance estuarine habitat and provide erosion protection for hurricane protection projects. The conferees encourage the Administration to submit a legislative proposal to the appropriate authorizing committees for full and further consideration.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES, ARKANSAS, ILLINOIS, KENTUCKY, LOUISIANA, MISSISSIPPI, MISSOURI AND TENNESSEE

Funds totaling \$153,750,000 are provided to repair levees; remove hazards to navigation; cover the increased cost of mat laying operations due to storm impacts; repair damaged training works, including dikes; and repair damaged levees to provide protection from riverine flooding resulting from Hurricanes Katrina and Rita.

OPERATION AND MAINTENANCE

Funds totaling \$327,517,000 are provided to restore navigation channels and harbors to pre-storm conditions and to repair flood damage reduction and other projects in states affected by Hurricanes Katrina, Rita, Ophelia and Wilma. Of this amount, \$75,000,000 is provided for authorized operation and maintenance activities to enhance estuarine habitats through monitoring and control of marine and river flow and reef building initiatives and providing foreshore bank protection in the form of revetment and rock placement to protect endangered wetlands and provide erosion protection for

hurricane protection projects along the Mississippi River-Gulf Outlet Channel. The expenditure of funds shall be limited to those activities necessary for the protection of existing wetlands, navigation, flood and storm damage reduction projects along the Mississippi River-Gulf Outlet Channel and funds shall not be expended on any project that would otherwise preclude or foreclose any final disposition of the navigation channel; funds are not available to conduct any dredging of the Mississippi River-Gulf Outlet Channel.

FLOOD CONTROL AND COASTAL EMERGENCIES

Funds totaling \$2,277,965,000 are provided to continue repairs to flood and storm damage reduction projects in states affected by Hurricanes Katrina, Rita, Ophelia and Wilma. Funds are provided to fund at full Federal expense repairs to non-federal levees and pumps and to construct levees and floodwalls to original design levels rather than pre-storm conditions. Within the funds provided, \$75,000,000 shall be available to accelerate completion of authorized projects in the State of Mississippi along the Mississippi Gulf Coast.

Further, this amount includes \$544,460,000 to accelerate the completion of unconstructed portions of authorized hurricane, storm damage reduction and flood control projects in the greater New Orleans and south Louisiana area, as follows:

New Orleans to Venice, LA West Bank and Vicinity, LA	\$32,487,000 147,614,000
Lake Pontchartrain and Vicinity, LA	120,554,000
Southeast Louisiana, LA ...	224,755,000
Larose to Golden Meadow, LA	4,026,000
Grand Isle, LA	15,024,000

The conference agreement includes \$70,000,000 to prepare for flood, hurricane and other natural disasters and support emergency operations, repairs, and other activities in response to flood and hurricane emergencies, as authorized by law. Funding is provided to cover annual recurring costs of the program as well as costs related to recent natural disasters. The Army Corps of Engineers is directed to include recurring annual funding requirements for this program in its fiscal year 2007 budget request and to address event-related costs in the appropriate emergency supplemental requests.

The conference agreement includes approximately \$468,000,000 to reimburse projects from which funds were transferred to meet emergency requirements.

GENERAL EXPENSES

Funds totaling \$1,600,000 are provided for additional oversight and management costs associated with Hurricanes Katrina and Rita.

CHAPTER 4

DEPARTMENT OF HOMELAND SECURITY

OFFICE OF THE SECRETARY AND EXECUTIVE

MANAGEMENT

OFFICE OF POLICY

The conferees agree to clarify Public Law 109-90 does not include an increase of \$1,512,000 and 3 full-time equivalent positions for the Embassy Baghdad Initiative requested in the President's Fiscal Year 2006 Budget. Public Law 109-90 does include the transfer of \$5,176,000 to the Office of Policy for the Border and Transportation Security Policy Office and Operations staff. Any fiscal year 2005 funding for a Department of Homeland Security (DHS) attaché in Baghdad included in this amount is continued in fiscal year 2006 at the fiscal year 2005 level. The conferees prohibit the use of any funds available to the Department for increasing re-

sources for the Embassy Baghdad Initiative beyond the fiscal year 2005 level without approval of a reprogramming notification submitted pursuant to Section 503 of Public Law 109-90. The conferees provide this clarification to ensure the Department's actions are consistent with the intent of the Committees as indicated in the Statement of Managers accompanying the fiscal year 2006 appropriations conference report. The Department is directed to submit within 15 days of enactment of this Act to the House and Senate Committees on Appropriations a fiscal year 2006 program, project, and activity breakdown of the funding and staffing level of the Office of Policy including the \$5,176,000 transfer for the Office of Policy.

CUSTOMS AND BORDER PROTECTION

SALARIES AND EXPENSES

The conferees agree to provide \$24,100,000 instead of \$27,100,000 as proposed by the President to repair and replace critical information technology, equipment, and property damaged by Hurricane Katrina and other natural disasters.

CONSTRUCTION

The conferees agree to provide \$10,400,000 for planning, engineering, and other equipment for structures damaged by Hurricane Katrina and other natural disasters instead of \$26,700,000 as proposed by the President. The conferees are aware of uncertainty associated with the replacement of various facilities damaged by recent hurricanes and direct Customs and Border Protection to submit to the House and Senate Committees on Appropriations a detailed estimate of the total cost of replacing these facilities once relocation sites and total costs are determined. Funds are available until expended.

IMMIGRATION AND CUSTOMS ENFORCEMENT

SALARIES AND EXPENSES

The conferees agree to provide \$13,000,000, instead of \$13,848,000 as requested by the President to repair and replace critical information technology, communications equipment, and facilities damaged by Hurricane Katrina and other natural disasters.

UNITED STATES COAST GUARD

OPERATING EXPENSES

The conferees agree to provide \$132,000,000 instead of \$139,300,000 as requested by the President for clean-up and repair needs at facilities damaged by Hurricane Katrina and other natural disasters; activation of reservists to assist in hurricane recovery efforts; and repair and replacement of equipment, materials, and supplies lost due to these hurricanes. Funds are available until expended.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

The conferees agree to provide \$74,500,000 instead of \$136,660,000 as proposed by the President for major repair and reconstruction projects at facilities damaged by Hurricane Katrina and other natural disasters, and for damage to vessels currently under construction. The conferees are aware of uncertainty associated with the replacement of the New Orleans Integrated Support Command. The conferees agree to provide funding for the survey, planning, and engineering costs related to this facility and direct the Coast Guard to submit to the House and Senate Committees on Appropriations a detailed estimate for the total cost of replacing this facility once a relocation site is determined. Funds are available until expended.

OIL SPILL LIABILITY

The conferees understand over 3,800 oil spills have been caused by Hurricanes Katrina and Rita, with more than 8 million gallons of oil spilled from Hurricane Katrina alone. Currently, oil pollution response costs

are being funded from the Federal Emergency Management Agency (FEMA) Disaster Relief Fund (DRF). However, the DRF will not pay for long-term oil removal costs and natural resource damages, leaving a significant funding gap not addressed in the supplemental request. While oil removal costs and damage claims may be eligible under the Oil Spill Liability Trust Fund (OSLTF), costs related to Hurricane Katrina are expected to easily exceed \$1,000,000,000, leaving the existing balance of \$750,000,000 in the OSLTF in jeopardy. The Department is directed to provide the House and Senate Appropriations Committees an analysis of the projected impacts to the OSLTF for any Oil Pollution Act removal and damage costs resulting from Hurricanes Katrina and Rita, and a plan to address the expected funding shortfall. This report is due no later than March 15, 2006.

UNITED STATES SECRET SERVICE

SALARIES AND EXPENSES

The conferees agree to provide \$3,600,000 for equipment, vehicle replacement, and personnel relocation due to damage caused by Hurricane Katrina and other natural disasters.

OFFICE FOR DOMESTIC PREPAREDNESS

STATE AND LOCAL PROGRAMS

The conferees agree to provide \$10,300,000 for replacement equipment for the Prepositioned Equipment Program utilized during Hurricane Katrina.

The conferees agree notification required by Section 508 of Public Law 109-90 shall include any announcements of grant eligibility in which the Department limits the number or type of potential grantees.

FEDERAL EMERGENCY MANAGEMENT AGENCY

ADMINISTRATIVE AND REGIONAL OPERATIONS

The conferees agree to provide \$17,200,000 instead of \$87,100,000 as requested by the President to repair and improve warning and crisis communication systems, and to ensure proper controls are in place over the expenditure and management of funds for hurricane response and recovery.

PUBLIC HEALTH PROGRAMS

The conferees are concerned about the National Disaster Medical System (NDMS). The conferees direct the Chief Medical Officer to provide a report to the House and Senate Committees on Appropriations by April 30, 2006, outlining the goals of NDMS, the ability of the current program to meet these goals, the resources (people, training, and funding) required to maintain a system design to rapidly meet nationwide disaster medical needs, and the appropriate roles of DHS and the Department of Health and Human Services in the oversight and management of this critical program.

The conferees are aware of FEMA's intention to use the authority provided by Public Law 109-62 to transfer up to \$100,000,000 for the NDMS to support medical care as authorized by Public Law 107-188. The conferees direct FEMA to provide to the House and Senate Committees on Appropriations by February 28, 2006, a spend plan for the amount transferred, including the amounts obligated and expended as of the date of the report, the methods used for allocating funds, and the rules established regarding the expenses eligible for payment from this appropriation.

DISASTER RELIEF

(TRANSFER OF FUNDS)

The conferees agree to transfer \$1,500,000 from the Disaster Relief Fund for administrative expenses of the Community Disaster Loan program. This funding is in addition to the \$1,000,000 made available for transfer in

Public Law 109-88. The conferees agree the Department shall notify the House and Senate Committees on Appropriations no later than 15 days after a community disaster loan has been awarded. Such notification shall include the amount of the loan, a brief assessment of the borrower's financial position, reasons for the necessity of the loan, and a description of the essential services to be provided through the loan.

The conferees believe a comprehensive long-term recovery plan is critical for the rehabilitation of the Gulf Coast and should be implemented as quickly as possible. The conferees direct the Department to provide this plan to the House and Senate Committees on Appropriations by February 28, 2006. The plan should be prepared in coordination with state and local officials as well as other Federal agencies involved in recovery efforts.

The conferees are concerned with the lack of guidance on housing assistance. Within two weeks from the date of enactment of this Act, the Director of FEMA shall issue guidance used to determine continued eligibility for housing assistance under the Section 408 program. Consistent with current FEMA regulations, such guidance shall include the extension of assistance if the recipient is unable to afford local housing at the Fair Market Rent level.

GENERAL PROVISION—THIS CHAPTER

Sec. 401. The conferees include a general provision allowing the Secretary of Homeland Security to permit active duty personnel who performed duties in response to the hurricanes to carryover accumulated leave until the end of fiscal year 2007.

CHAPTER 5

DEPARTMENT OF THE INTERIOR

UNITED STATES FISH AND WILDLIFE SERVICE

CONSTRUCTION

The conference agreement provides \$30,000,000 for construction costs of the United States Fish and Wildlife Service related to Hurricanes Katrina, Rita, Wilma, and Ophelia. These funds will be used for repair and reconstruction and operational costs incurred in responding to and cleaning up from the storms. In addition to repair and reconstruction of Federal facilities, the funds should be used to repay construction projects from which funds were transferred on an emergency basis. They also are available to pay for un-reimbursed overtime and operational costs.

NATIONAL PARK SERVICE

CONSTRUCTION

The conference agreement provides \$19,000,000 for construction costs of the National Park Service related to Hurricanes Katrina, Rita, and Wilma. These funds will be used for repair and reconstruction and operational costs incurred in responding to and cleaning up from the storms. In addition to repair and reconstruction of Federal facilities, the funds should be used to repay construction projects from which funds were transferred on an emergency basis. They also are available to pay for un-reimbursed overtime and operational costs.

UNITED STATES GEOLOGICAL SURVEY

SURVEYS, INVESTIGATIONS, AND RESEARCH

The conference agreement provides \$5,300,000, as requested, for surveys, investigations, and research costs of the United States Geological Survey. The funds are for facility and equipment repair and replacement needs, including stream gage repair and replacement, at Survey sites in the Southeast that were damaged by Hurricanes Katrina and Rita.

MINERALS MANAGEMENT SERVICE ROYALTY AND OFFSHORE MINERALS MANAGEMENT

The conference agreement provides \$16,000,000 for royalty and offshore minerals management. The funds are provided for the temporary relocation of the Minerals Management Service's Gulf of Mexico regional office from Louisiana to Houston, TX; including immediate recovery costs to purchase new equipment, locate temporary offices and additional personnel, and operational costs incurred as a result of the hurricanes during the first six months after the events.

ENVIRONMENTAL PROTECTION AGENCY LEAKING UNDERGROUND STORAGE TANK PROGRAM

The conference agreement provides \$8,000,000 for the leaking underground storage tank program. These funds will be used to address the most immediate underground storage tank needs in areas affected by Hurricanes Katrina and Rita; including site assessments of leaking tanks to identify problems and initiate appropriate corrective actions.

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

STATE AND PRIVATE FORESTRY

The conference agreement provides \$30,000,000 for State and private forestry instead of providing the \$50,000,000 requested for a new forestry disaster assistance fund. The managers believe that the proposed new fund is unnecessary in that the activities that would be funded, including assistance to timber land owners for debris removal, timber salvage, wildfire mitigation, and wildlife habitat stabilization, are more appropriately funded within authorized activities under the existing State and private forestry account. The funding provided should be used for urgently needed activities associated with Hurricanes Katrina and Rita recovery, clean-up, and restoration. The managers direct the Secretary of Agriculture to notify the House and Senate Committees on Appropriations on the proposed distribution of funds at least ten days before allocating these funds to the field.

NATIONAL FOREST SYSTEM

The conference agreement provides \$20,000,000 for the national forest system for urgently needed activities associated with Hurricanes Katrina and Rita recovery, clean-up, and restoration. A portion of these funds may be used for hazardous fuels reduction activities on national forest system lands. The managers direct the Secretary of Agriculture to notify the House and Senate Committees on Appropriations on the proposed distribution of funds at least ten days before allocating these funds to the field.

CAPITAL IMPROVEMENT AND MAINTENANCE

The conference agreement provides \$7,000,000 for capital improvement and maintenance to repair roads and to repair or replace hurricane damaged bridges and other facilities in National Forests affected by Hurricanes Katrina and Rita.

CHAPTER 6

DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

TRAINING AND EMPLOYMENT SERVICES

The conference agreement includes a supplemental appropriation of \$125,000,000 for the Employment and Training Administration to award national emergency grants related to the consequences of hurricanes in the Gulf of Mexico in calendar year 2005. These funds may be used to replace grant funds previously obligated to the impacted areas.

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

The conference agreement includes language that extends the availability of funds provided under this heading in Public Law 108-447, which have been allocated to the States of Alabama, Louisiana, and Mississippi. The funding shall remain available for obligation by those States through September 30, 2006 and funds used for automation by those States shall remain available through September 30, 2008.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

ADMINISTRATION FOR CHILDREN AND FAMILIES SOCIAL SERVICES BLOCK GRANT

The conference agreement includes a supplemental appropriation of \$550,000,000 for the Social Services Block Grant (SSBG). The conferees note that the hurricanes in the Gulf of Mexico in calendar year 2005 have imposed extreme demands for social and health care services in affected States. States may use SSBG funds for a wide array of human services.

In addition to other uses, the conferees intend these funds to be available to help meet the health care needs of people affected by the hurricanes in the Gulf of Mexico in calendar year 2005 and lacking health insurance or other adequate access to care, and to help health care "safety net" providers restore and resume their operations. Accordingly, the conferees have included bill language intended to remove any uncertainties as to the eligibility of health care providers and facilities (including mental health providers and facilities) to receive Social Services Block Grant funds from this appropriation. Examples of institutions that could receive these funds include community health centers, rural hospitals and clinics, community mental health centers, public hospitals, and other providers with substantial percentages of uninsured patients. In addition to helping meet health care needs arising from the hurricanes, funds may be made available for repairs or reconstruction needed to allow health centers and similar providers to resume or expand operations, or to help key providers meet salary and other costs associated with resuming or restoring health services.

The conferees are concerned about the mental health impact of the hurricanes in the Gulf of Mexico in calendar year 2005. The Centers for Disease Control and Prevention (CDC) reports that as many as 500,000 Gulf Coast residents might need mental health care. The conferees encourage the Secretary to work with State governments in the region to ensure that adequate funding is available, within the amounts appropriated, for community safety net providers to meet this emerging public mental health crisis.

CHILDREN AND FAMILIES SERVICES PROGRAMS

The conference agreement includes a supplemental appropriation of \$90,000,000 for Head Start to serve children displaced by the hurricanes in the Gulf of Mexico in calendar year 2005 and to cover costs associated with renovating Head Start facilities, which were affected by the hurricanes, to the extent that FEMA and insurance companies do not fully cover such costs.

DEPARTMENT OF EDUCATION

The conference agreement includes a supplemental appropriation of \$750,000,000 for immediate aid to restart school operations and reimburse States for costs already incurred in reopening schools affected by the Gulf hurricanes. This funding is to be distributed to State educational agencies in Louisiana, Mississippi, Alabama, and Texas for assistance to schools that were impacted

by the hurricanes in the Gulf of Mexico in calendar year 2005. The State educational agencies shall provide services and assistance to local educational agencies and non-public schools consistent with provisions outlined in section 102 of title IV, division B of this Act.

The conference agreement includes a supplemental appropriation of \$5,000,000 for assistance for homeless children and youths displaced by the hurricanes in the Gulf of Mexico in calendar year 2005 consistent with provisions outlined in section 106 of title IV, division B of this Act.

The conference agreement includes a supplemental appropriation of \$645,000,000 for temporary emergency impact aid for displaced students during the 2005–2006 school year. This funding is to be distributed to eligible schools that serve students who were displaced by the hurricanes in the Gulf of Mexico in calendar year 2005. Public, private, and charter schools are eligible for assistance consistent with provisions outlined in section 107 of title IV, division B of this Act.

The conference agreement includes a supplemental appropriation of \$200,000,000 to assist college students and higher education institutions with unanticipated expenses associated with the hurricanes in the Gulf of Mexico in calendar year 2005. Within the amount provided, \$95,000,000 is for the Mississippi Institutes of Higher Learning for additional student financial aid for students

and families impacted by the Gulf hurricanes. The conferees intend for these funds to be made available for assistance to any eligible student attending a title IV eligible institution, including independent colleges and universities, private institutions, community colleges, junior colleges, and graduate institutions.

Of the amount provided, \$95,000,000 is for the Louisiana Board of Regents, which may be used to provide emergency assistance for student financial assistance, faculty salaries, or any purpose authorized under the Higher Education Act, to institutions of higher education that are located in an area affected by the Gulf hurricanes. The conferees intend for these funds to be used only for authorized purposes at the impacted institutions of higher education; allocated only to affected postsecondary educational institutions that were forced to suspend operations for 30 days or more; and distributed primarily to those institutions demonstrating that they were not able to re-open in existing facilities or fully re-open to pre-Gulf hurricane levels. The conferees intend for these funds to supplement and not supplant any portion of an institution's State support. In allocating these funds, the conferees strongly urge the Board to consult with the presidents or chancellors of the eligible colleges and universities and equitably allocate funding, within 45 days, based only

on the need criteria agreed to by these officials.

The Committees on Appropriations of the House and Senate request that the Department submit a report not later than March 1, 2006 on the obligation and allocation of these supplemental funds provided under the Higher Education Act.

CHAPTER 7
DEPARTMENT OF DEFENSE
MILITARY CONSTRUCTION

Military Construction Projects Repaired Using Operation and Maintenance Funds.—The conferees understand that all military construction projects requested by the President which have not been included in the agreement have been, or will be, repaired using operation and maintenance funds, rather than requiring replacement through military construction. Each military Service or Defense agency shall notify the Committees on Appropriations of both Houses of Congress, within seven days after the decision to execute, if a repair project is carried out with operation and maintenance funds in lieu of a project appropriated in this chapter.

MILITARY CONSTRUCTION, NAVY AND MARINE CORPS

The agreement provides \$292,500,000 for the construction of a new hospital at Biloxi, Mississippi consistent with the recommendations of the Capital Asset Realignment for Enhanced Services report, to replace the facility destroyed at Gulfport, Mississippi. The agreement does not include full funding for a replacement hospital at New Orleans, Louisiana at this time because there is insufficient information to determine the actual cost. The agreement does include funding of \$75,000,000 for advance planning and design associated with construction of a replacement hospital in the New Orleans area.

The Department is directed to report to the Committees on Appropriations of both Houses of Congress by February 28, 2006 on the long term plans for the construction of a replacement hospital in New Orleans, Louisiana.

Of the amount provided, \$45,000,000 is to be used to begin the process of advanced planning and design for the reuse of the Gulfport, Mississippi facil-

ity. Within 60 days of enactment of this Act, the Armed Forces Retirement Home is to provide a report to the Committees on Appropriations of both Houses of Congress outlining in detail the expected use of these funds and long-term plans for renovations and construction at both the Washington and the Gulfport facilities.

GENERAL PROVISIONS—THIS CHAPTER

The agreement includes a provision that waives the limit on the amount of Federal funds that can be provided for Army National Guard readiness center projects appropriated in this chapter.

The agreement includes a provision relating to the disposal of Navy property on the Gulf Coast.

The agreement includes four provisions, all requested in the reallocation request of October 28, 2005. The provisions give the Department the authority to address specific limitations that currently inhibit the ability of the Department to address emergent needs of veterans in the areas affected by hurricanes in the Gulf of Mexico. The expanded authority granted by these provisions will expire on September 30, 2006.

The amount provided will allow the Small Business Administration (SBA) to make disaster loans to individuals and businesses in the wake of recent Gulf Coast hurricanes. The conferees expect the SBA to make not less than \$50,000 available to increase call center capacity and respond fully to questions from loan applicants, including providing applicants with reasons for denying their applications.

The conferees are concerned about the SBA's slow pace of approving disaster loan applications in the Gulf Coast hurricane-affected region. The conferees encourage the SBA to deliver disaster assistance as quickly as possible without jeopardizing program integrity. The SBA shall immediately report to the Committees on Appropriations on specific ways it will expedite the disaster loan

approval process, improve information flow to disaster loan applicants, and expand the disaster loan program to assist the widest population possible.

**GENERAL PROVISIONS—THIS CHAPTER
(INCLUDING TRANSFER OF FUNDS)**

SEC. 801. The conference agreement includes language regarding Manufacturing Extension Centers serving hurricane-affected areas.

SEC. 802. The conference agreement includes language requiring the Department of Justice to transfer funds made available for the purchase of portable and mobile radios to the Narrowband Communications/Integrated Wireless Network account.

CHAPTER 9

DEPARTMENT OF TRANSPORTATION

**FEDERAL AVIATION ADMINISTRATION
FACILITIES AND EQUIPMENT
(AIRPORT AND AIRWAY TRUST FUND)**

The conference agreement provides \$40,600,000 for the Federal Aviation Administration's (FAA) facilities and equipment account for emergency hurricane-related response activities. Multiple FAA facilities including control towers, buildings and navigation aids were damaged by the recent hurricanes and need to be repaired or replaced.

**FEDERAL HIGHWAY ADMINISTRATION
EMERGENCY RELIEF PROGRAM**

The conference agreement provides \$2,750,000,000 to the Department of Transportation (DOT) for repairing and rebuilding highways, roads, bridges, and trails damaged by Hurricanes Katrina, Rita, Wilma, and prior disasters that are eligible for assistance under the Federal Highway Administration's Emergency Relief (ER) program.

Within the funds provided, up to \$629,000,000 is available to repair and reconstruct the I-10 bridge connecting New Orleans and Slidell, Louisiana. These funds may be used to rebuild the bridge to current design standards as allowable under Section 125 of title 23, United States Code.

The funds provided are available until expended. The conference agreement waives the State matching share requirements for all of the ER projects related to these hurricanes and exempts projects for these hurricanes, Hurricane Dennis, and the 2004-2005 winter storms in the State of California from the ER program's \$100,000,000 per State per event cap.

The conference agreement allows DOT to spend any excess funds on other ER projects. The conferees permit DOT to promptly allocate up to \$550,000,000 of the funds provided to address the existing backlog of ER projects to the extent the funds are needed to contend with damages caused by natural disasters or catastrophic failures from external causes that occurred prior to Hurricane Wilma, provided that such projects are ready to proceed to construction or are otherwise eligible for reimbursement.

**MARITIME ADMINISTRATION
OPERATIONS AND TRAINING**

The conference agreement provides an additional \$7,500,000 to the Department of Transportation to repair and reconstruct the Poland Street pier and warehouse in New Orleans, Louisiana, damaged as a result of Hurricane Katrina. These assets are owned by the Maritime Administration and are used in conjunction with the U.S. Navy to support the Ready Reserve Force Fleet.

**DEPARTMENT OF HOUSING AND URBAN
DEVELOPMENT**

**PUBLIC AND INDIAN HOUSING
TENANT-BASED RENTAL ASSISTANCE**

The conference agreement includes \$390,299,500 for tenant-based rental assist-

ance. The conferees agree to limit the use of funds to those individuals and families who were receiving federal assistance or were homeless or in emergency shelters in the declared disaster area prior to Hurricanes Katrina and Rita.

**COMMUNITY PLANNING AND DEVELOPMENT
COMMUNITY DEVELOPMENT FUND**

The conference agreement includes \$11,500,000,000 for necessary expenses related to disaster relief, long term recovery, restoration of infrastructure and mitigation in communities in any declared disaster area in Louisiana, Mississippi, Alabama, Florida, and Texas related to Hurricanes Katrina, Rita or Wilma. Not more than five percent of the funds granted may be used for administrative and overhead expenses.

The conference agreement emphasizes the requirement that the States with the most impacted and distressed areas in connection with the Gulf of Mexico hurricanes receive priority consideration in the allocation of funds by HUD.

Of the amounts made available under this heading up to \$40,000,000 may be made available for LIISC and the Enterprise Foundation for activities authorized under section 4 of the HUD Demonstration Act of 1993 and section 11 of the Housing Opportunity Program Extension Act of 1996.

The conference agreement requires HUD, upon request by the state and a finding by the Secretary that the waiver would not be inconsistent with the overall purpose of the program, to issue certain waivers and to review the waivers after two years. The conference agreement also includes several notification and reporting requirements prior to and during the period in which any waiver is in effect.

The conferees note that the Lower Manhattan Development Corporation (LMDC), which was established as the entity to plan and execute most of the redevelopment of the area impacted by the September 11, 2001 terrorist attack in New York City, has worked well to ensure an effective and efficient use of emergency funds made available for site redevelopment. The conferees encourage States to use the LMDC as a model for implementing the provision in this Act, which mandates that funds allocated under this heading be administered through entities designated by the Governor of each state.

ADMINISTRATIVE PROVISIONS

Section 901 permits the Secretary during calendar year 2006 to authorize a public housing agency in the areas most heavily impacted by Hurricanes Katrina and Rita to combine their Capital Fund, Operating Fund and Section 8 tenant-based monies to more effectively assist families receiving assistance prior to Hurricanes Katrina and Rita.

Section 902 directs HUD to preserve assisted housing to the maximum extent possible considering costs and feasibility.

THE JUDICIARY

**COURTS OF APPEALS, DISTRICT COURTS, AND
OTHER JUDICIAL SERVICES**

SALARIES AND EXPENSES

The conference agreement provides \$18,000,000 for direct hurricane recovery costs for affected Gulf Coast courts, as reflected in the Judiciary's revised supplemental appropriations request. The conferees deny the request for \$10,641,000 to cover the costs of future preparedness activities and direct the Judicial Conference to include these items in the fiscal year 2006 financial plan.

INDEPENDENT AGENCY

GENERAL SERVICES ADMINISTRATION

FEDERAL BUILDINGS FUND

The conference agreement provides \$38,000,000 for the General Services Adminis-

tration's federal buildings fund to be available until expended. This includes funding for emergency building operations, in support of cleaning, assessing damage and repairing Federal buildings and United States Courthouses damaged in the wake of Hurricanes Katrina and Rita. These funds will be used for the unplanned costs for equipment and additional professional and nonprofessional contract staffing to support GSA personnel in the field with damage assessment, recovery efforts and facilities operations and maintenance, debris removal and clean-up activities. In addition, this funding level will provide, to the extent possible, for the short- and long-term repair and alterations of the following buildings impacted by Hurricanes Katrina and Rita, under the repairs and alterations account: Courthouse—Mobile, AL; Federal Building—Mobile, AL; Federal Building Courthouse—Hattiesburg, MS; Post Office/Courthouse—Jackson, MS; McCoy Federal Building—Jackson, MS; Federal Building/Courthouse—Gulfport, MS; Courthouse Annex—Gulfport, MS; Gulfport Mechanical Building—Gulfport, MS; U.S. Courthouse—Pensacola, FL; Customs House—New Orleans, LA; FE Hebert Federal Building—New Orleans, LA; JM Wisdom Courthouse; Hale Boggs Federal Building—Courthouse; Border Patrol Sector Headquarters (multiple buildings); New Orleans Post Office (leased)—New Orleans, LA; and Harahan Depot (three buildings)—Harahan, LA.

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

The conference agreement provides \$20,000,000 for the Food and Drug Administration (FDA), Salaries and Expenses account, to enhance the FDA regulatory science base to facilitate the production of new influenza

vaccine drugs and diagnostic products. This funding is to be directed toward expediting the development, evaluation, and licensure of influenza vaccines; enhancing the manufacturing capacity of vaccine drug and diagnostic products; ensuring and monitoring the safety and effectiveness of vaccines; ensuring the quality of the vaccine manufacturing process, and developing better, more rapid tests and assays.

The conferees direct the Secretary of Health and Human Services to provide the Committees on Appropriations with quarterly reports on the expenditure of the funds provided for the Food and Drug Administration in this Act for pandemic influenza preparedness. The reports shall also include details on any reimbursements received by the agency from any other federal agencies for expenses incurred for pandemic influenza preparedness. Account	Request	Conference
Avian flu:		
Operation and Maintenance, Defense-Wide	10,000	10,000
Defense Health Program	120,000	120,000
Total Pandemic Flu	130,000	130,000

OPERATION AND MAINTENANCE

OPERATION AND MAINTENANCE, DEFENSE-WIDE

The conference agreement provides \$10,000,000 for Operation and maintenance, Defense-wide, for response preparedness and training activities, as well as diagnostic, surveillance, and communication equipment.

CHAPTER 3

UNITED STATES AGENCY FOR INTERNATIONAL DEVELOPMENT (USAID)

The conference agreement includes \$131,530,000 for USAID for activities associated with planning for and responding to the avian influenza virus.

GENERAL PROVISIONS—THIS CHAPTER

The conference agreement includes a provision that requires the United States Agency for International Development submit a report to the Committee on Appropriations detailing the use of funds provided to the Agency in this Act.

CHAPTER 4

DEPARTMENT OF HOMELAND SECURITY

OFFICE OF THE SECRETARY AND EXECUTIVE MANAGEMENT

The conferees agree to provide \$47,283,000, to remain available until expended, for necessary expenditures related to planning for the consequences of a pandemic flu outbreak. Funds are available for transfer to other appropriations accounts subject to requirements for the reprogramming and transfer of funds in Section 503 of Public Law 109-90.

The additional funds will allow for training of Department of Homeland Security personnel in emergency response procedures and protocols related to the potential outbreak of a highly pathogenic pandemic influenza,

preparedness planning within the Department, protection of Department employees, modeling capabilities of likely patterns of pathogen dispersion, and equipment to isolate potentially exposed individuals. Recognizing pandemic influenza is not the only pathogenic threat that may enter the Nation, the Department should leverage its pandemic influenza activities to guard against other highly infectious and deadly diseases.

CHAPTER 5

DEPARTMENT OF THE INTERIOR

UNITED STATES FISH AND WILDLIFE SERVICE RESOURCE MANAGEMENT

The conference agreement provides \$7,398,000, as requested, for resource management to increase field monitoring for avian influenza.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM

The conference agreement provides \$525,000, as requested, for operation of the National Park System to coordinate surveillance and monitoring of wild birds for avian influenza within national parks.

UNITED STATES GEOLOGICAL SURVEY

SURVEYS, INVESTIGATIONS, AND RESEARCH

The conference agreement provides \$3,670,000, as requested, for surveys, investigations, and research for an interagency effort to detect avian influenza in wild birds, with an initial focus on early detection activities in areas with a high potential for contact between Asian and North American birds.

CHAPTER 6

DEPARTMENT OF HEALTH AND HUMAN SERVICES

OFFICE OF THE SECRETARY

PUBLIC HEALTH AND SOCIAL SERVICES EMERGENCY FUND

The conference agreement provides \$3,300,000,000 to prepare for and respond to an influenza pandemic, of which \$3,204,000,000 is to remain available until expended. Section 8116 of the Senate bill included \$3,913,000,000 for this purpose to remain available until expended. In addition, the Senate included \$8,158,589,000 for pandemic influenza in H.R. 3010, the appropriations bill for the Department of Health and Human Services, of which \$8,095,000,000 was to remain available until expended.

The conference agreement includes bill language designating \$350,000,000 for upgrading State and local response capacity, particularly the planning and exercising of pandemic response plans by State and local officials. Section 8116 of the Senate bill proposed \$600,000,000 for this activity. The conferees are aware that any successful response to a pandemic influenza must include an effective response at the State and local levels. This will require pre-established partnerships and collaborative planning by public health officials, law enforcement officials, hospital administrators, and community leaders, who have considered a broad range of scenarios and participated in realistic response exercises. These planning and response exercises should enable public health and law enforcement officials to establish procedures and locations for quarantine, surge capacity, diagnostics, and communication. The conferees intend that most of these funds be put toward planning and exercises. The conferees intend that these funds be provided accompanied by established benchmarks and that a portion of the funding be made available based on meeting performance objectives at both the State and local levels.

The conference agreement includes bill language designating \$50,000,000 for labora-

tory capacity and research at the Centers for Disease Control and Prevention (CDC). Section 8116 of the Senate bill included \$125,000,000 for this purpose. The conferees intend that a portion of these funds go to address a critical lack of influenza laboratory capacity, which has resulted in delays in processing influenza virus samples and the sharing of DNA sequence information with outside laboratories in a timely manner. The conferees also recognize that the proper laboratory and research assets are vital to definitively characterize virus strains and determine best practices among protective public health measures. Finally, the conferees encourage the development of an evidence base for the effectiveness of policies and technologies to reduce respiratory disease transmission, modeling means of social distancing, and accelerating the development of rapid field diagnostic tests suitable for both domestic and international use, particularly in developing nations.

The conference agreement includes bill language designating \$246,000,000 for international activities, disease surveillance, vaccine registries, research, and clinical trials. \$150,000,000 of this amount is designated in bill language to CDC and is available until expended to carry out global and domestic disease surveillance, laboratory diagnostics, rapid response and quarantine. The conferees recognize that increased international surveillance to track influenza strains, implementation of surveillance and quarantine measures at U.S. points-of-entry, and enhanced domestic surveillance are key elements to the pandemic response plan. An integrated global and domestic surveillance and control system will serve to slow introduction of a pandemic influenza strain into the general population, thereby increasing the amount of time available for preparing and deploying appropriate countermeasures.

The balance of the funds provided, \$2,750,000,000 are available to support, at the Secretary's discretion, other core preparedness activities, such as expanding the domestic production capacity of influenza vaccine, developing and stockpiling pandemic vaccine, and stockpiling antivirals and other medical supplies necessary to protect and preserve lives in the event of an outbreak of pandemic influenza.

The conference agreement does not contain specific earmarks of \$3,080,000,000 for the stockpiling of antivirals and medical supplies, \$33,000,000 for global surveillance, and \$75,000,000 for risk communication as was included in section 8116 of the Senate bill.

The conferees encourage CDC to partner with industry to ensure it has the proper diagnostic "surge capacity" in place for both surveillance and pandemic response. The conferees also request that the Secretary be prepared to report on a plan for using diagnostics in early-stage clinical response to an emerging pandemic during the hearings on the fiscal year 2007 budget.

The conferees believe that HHS should give priority to research and development activities that could realistically be translated into vaccine production or pandemic detection, diagnosis, or treatment regimes in the near to medium term. The conferees encourage HHS to allocate funding to such areas as vaccine development, testing, and production, including cell culture technologies and cell line development; antivirals, including dosing, timing, and efficacy screening; alternative vaccine technologies, including synthetic vaccines and vaccines composed of virus-like particles; antiviral delivery mechanisms; improved diagnostics and surveillance tools for influenza; enhanced tools and methods for the molecular analysis of viruses, virus subtypes, and host immunological response; antigen-sparing,

heterosubtypic immunity protective measures; and research into modes of influenza transmission. The Secretary is strongly encouraged to use the simplified acquisition authorities provided under sections 319F-1 and 319F-2 of the Public Health Service Act in awarding contracts, grants, and cooperative agreements.

The conferees support the elaboration of novel adjuvant, antigen-sparing and multivalent technologies that can bolster the effectiveness and scope of vaccines based on adaptive or innate immunological response.

The conferees are aware of the key role migratory bird tracking has played in predicting the spread of avian influenza. The conferees encourage CDC to ensure that this important activity is part of its surveillance activities.

The conferees understand that smoking substantially increases both the incidence and severity of influenza because it compromises the upper respiratory system. One study found that smoking more than doubles the risk of developing clinical influenza. The conferees encourage CDC to provide information about the link between smoking and an increased risk for influenza infection and severity of illness through existing quitlines and to collaborate with other countries to assess the role of smoking in flu epidemics.

The conferees encourage HHS to procure for the Strategic National Stockpile essential supplies that may be needed in the event of a pandemic including syringes, ventilators, respirators, diagnostic equipment, surgical masks, and gloves.

To prevent co-infection, the conferees urge the Secretary to promote the widespread vaccination against seasonal influenza.

The conferees encourage the Centers for Medicare and Medicaid Services to establish standards for the measurement of use by beneficiaries under the Medicare and Medicaid programs of adult immunizations for influenza and to conduct a study to determine the feasibility and advisability of including adult immunization for influenza as a performance measure under quality initiatives conducted by the Secretary under the Medicare and Medicaid programs. The study should also consider as a requirement of accreditation of a provider of services compliance with recommended adult immunizations.

The conferees direct the Secretary to provide on a semi-annual basis to the House and Senate Appropriations Committees a report identifying the disbursements of funds received under this heading and a listing of the governments, companies and organizations that received funding. The report should include the amount and purpose of each grant or other form of assistance. Finally, the report should include the cumulative obligations by activity of the funds made available under this heading for pandemic preparedness, as well as any remaining unobligated balances.

CHAPTER 7

DEPARTMENT OF VETERANS AFFAIRS
VETERANS HEALTH ADMINISTRATION

“(B) credit such excess amount toward the payment of subsequent assessments until such credit is exhausted.

“(2) DIVIDENDS FROM EXCESS AMOUNTS IN DEPOSIT INSURANCE FUND.—

“(A) RESERVE RATIO IN EXCESS OF 1.5 PERCENT OF ESTIMATED INSURED DEPOSITS.—If, at the end of a calendar year, the reserve ratio of the Deposit Insurance Fund exceeds 1.5 percent of estimated insured deposits, the Corporation shall declare the amount in the Fund in excess of the amount required to maintain the reserve ratio at 1.5 percent of estimated insured deposits, as dividends to be paid to insured depository institutions.

“(B) RESERVE RATIO EQUAL TO OR IN EXCESS OF 1.35 PERCENT OF ESTIMATED INSURED DEPOSITS AND NOT MORE THAN 1.5 PERCENT.—If, at the end of a calendar year, the reserve ratio of the Deposit Insurance Fund equals or exceeds 1.35 percent of estimated insured deposits and is not more than 1.5 percent of such deposits, the Corporation shall declare the amount in the Fund that is equal to 50 percent of the amount in excess of the amount required to maintain the reserve ratio at 1.35 percent of the estimated insured deposits as dividends to be paid to insured depository institutions.

“(C) BASIS FOR DISTRIBUTION OF DIVIDENDS.—

“(i) IN GENERAL.—Solely for the purposes of dividend distribution under this paragraph, the Corporation shall determine each insured depository institution's relative contribution to the Deposit Insurance Fund (or any predecessor deposit insurance fund) for calculating such institution's share of any dividend declared under this paragraph, taking into account the factors described in clause (ii).

“(ii) FACTORS FOR DISTRIBUTION.—In implementing this paragraph in accordance with regulations, the Corporation shall take into account the following factors:

“(I) The ratio of the assessment base of an insured depository institution (including any

“(D) NOTICE AND OPPORTUNITY FOR COMMENT.—The Corporation shall prescribe by regulation, after notice and opportunity for comment, the method for the calculation, declaration, and payment of dividends under this paragraph.

“(i) a significant risk of losses to the Deposit Insurance Fund exists over the next 1-year period; and

“(ii) it is likely that such losses will be sufficiently high as to justify a finding by the Board that the reserve ratio should temporarily be allowed—

“(I) to grow without requiring dividends under subparagraph (B); or

“(II) to exceed the maximum amount established under subsection (b)(3)(B)(i).

“(F) CONSIDERATIONS.—In making a determination under subparagraph (E), the Board shall consider—

“(i) national and regional conditions and their impact on insured depository institutions;

“(ii) potential problems affecting insured depository institutions or a specific group or type of depository institution;

“(3) ONE-TIME CREDIT BASED ON TOTAL ASSESSMENT BASE AT YEAR-END 1996.—

“(A) IN GENERAL.—Before the end of the 270-day period beginning on the date of the enactment of the Federal Deposit Insurance Reform Act of 2005, the Board of Directors shall, by regulation after notice and opportunity for comment, provide for a credit to each eligible insured depository institution (or a successor insured depository institution), based on the assessment base of the institution on December 31, 1996, as compared to the combined aggregate assessment base of all eligible insured depository institutions, taking into account such factors as the Board of Directors may determine to be appropriate.

“(B) CREDIT LIMIT.—The aggregate amount of credits available under subparagraph (A) to all eligible insured depository institutions shall equal the amount that the Corporation could collect if the Corporation imposed an assessment of 10.5 basis points on the combined assessment base of the Bank Insurance Fund and the Sav-

ings Association Insurance Fund as of December 31, 2001.

“(C) ELIGIBLE INSURED DEPOSITORY INSTITUTION DEFINED.—For purposes of this paragraph, the term ‘eligible insured depository institution’ means any insured depository institution that—

“(ii) is a successor to any insured depository institution described in clause (i).

“(D) APPLICATION OF CREDITS.—

“(i) IN GENERAL.—Subject to clause (ii), the amount of a credit to any eligible insured depository institution under this paragraph shall be applied by the Corporation, subject to subsection (b)(3)(E), to the assessments imposed on such institution under subsection (b) that become due for assessment periods beginning after the effective date of regulations prescribed under subparagraph (A).

“(ii) TEMPORARY RESTRICTION ON USE OF CREDITS.—The amount of a credit to any eligible insured depository institution under this paragraph may not be applied to more than 90 percent of the assessments imposed on such institution under subsection (b) that become due for assessment periods beginning in fiscal years 2008, 2009, and 2010.

“(iii) REGULATIONS.—The regulations prescribed under subparagraph (A) shall establish the qualifications and procedures governing the application of assessment credits pursuant to clause (i).

“(F) SUCCESSOR DEFINED.—The Corporation shall define the term ‘successor’ for purposes of this paragraph, by regulation, and may consider any factors as the Board may deem appropriate.

“(4) ADMINISTRATIVE REVIEW.—

“(A) IN GENERAL.—The regulations prescribed under paragraphs (2)(D) and (3) shall include provisions allowing an insured depository institution a reasonable opportunity to challenge administratively the amount of the credit or dividend determined under paragraph (2) or (3) for such institution.

“(B) ADMINISTRATIVE REVIEW.—Any review under subparagraph (A) of any determination of the Corporation under paragraph (2) or (3) shall be final and not subject to judicial review.”

“(A) provide cost sharing (instead of the level of cost sharing otherwise permitted under section 1916, but subject to paragraphs (2) and (3)) with respect to drugs that are not preferred drugs within a class; and

“(B) waive or reduce the cost sharing otherwise applicable for preferred drugs within such class and shall not apply any such cost sharing for such preferred drugs for individuals for whom cost sharing may not otherwise be imposed under subsection (b)(3)(B).

“(2) LIMITATIONS.—

“(A) BY INCOME GROUP.—In no case may the cost sharing under paragraph (1)(A) with respect to a non-preferred drug exceed—

“(B) LIMITATION TO NOMINAL FOR EXEMPT POPULATIONS.—In the case of an individual who is otherwise not subject to cost sharing due to the application of subsection (b)(3)(B), any cost sharing under paragraph (1)(A) with respect to a non-preferred drug may not exceed a nominal amount (as otherwise determined under section 1916).

“(C) CONTINUED APPLICATION OF AGGREGATE CAP.—In addition to the limitations imposed under subparagraphs (A) and (B), any cost sharing under paragraph (1)(A) continues to be subject to the aggregate cap on cost sharing applied under paragraph (1) or (2) of subsection (b), as the case may be.

“(3) WAIVER.—In carrying out paragraph (1), a State shall provide for the application of cost sharing levels applicable to a preferred drug in the case of a drug that is not a preferred drug if the prescribing physician determines that the preferred drug for treatment of the same condition either would not be as effective for the individual or would have adverse effects for the individual or both.

“(4) EXCLUSION AUTHORITY.—Nothing in this subsection shall be construed as preventing a State from excluding specified drugs or classes of drugs from the application of paragraph (1).”

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to cost sharing imposed for items and services furnished on or after March 31, 2006.

SEC. 6043. EMERGENCY ROOM COPAYMENTS FOR NON-EMERGENCY CARE.

“(e) STATE OPTION FOR PERMITTING HOSPITALS TO IMPOSE COST SHARING FOR NON-EMERGENCY CARE FURNISHED IN AN EMERGENCY DEPARTMENT.—

“(1) IN GENERAL.—Notwithstanding section 1916 and section 1902(a)(1) or the previous provisions of this section, but subject to the limitations of paragraph (2), a State may, by amendment to its State plan under this title, permit a hospital to impose cost sharing for non-emergency services furnished to an individual (with one or more groups of individuals specified by the State) in the hospital emergency department under this subsection if the following conditions are met:

“(A) ACCESS TO NON-EMERGENCY ROOM PROVIDER.—The individual has actually available and accessible (as such terms are applied by the Secretary under section 1916(b)(3)) an alternate non-emergency services provider with respect to such services.

“(B) NOTICE.—The hospital must inform the beneficiary after receiving an appropriate medical screening examination under section 1867 and after a determination has been made that

the individual does not have an emergency medical condition, but before providing the non-emergency services, of the following:

“(i) The hospital may require the payment of the State specified cost sharing before the service can be provided.

“(ii) The name and location of an alternate non-emergency services provider (described in subparagraph (A)) that is actually available and accessible (as described in such subparagraph).

“(iii) The fact that such alternate provider can provide the services without the imposition of cost sharing described in clause (i).

Nothing in this subsection shall be construed as preventing a State from applying (or waiving) cost sharing otherwise permissible under this section to services described in clause (iii).

“(2) LIMITATIONS.—

“(A) FOR POOREST BENEFICIARIES.—In the case of an individual described in subsection (b)(1), the cost sharing imposed under this subsection may not exceed twice the amount determined to be nominal under section 1916, subject to the percent of income limitation otherwise applicable under subsection (b)(1).

“(B) APPLICATION TO EXEMPT POPULATIONS.—In the case of an individual who is otherwise not subject to cost sharing under subsection (b)(3), a State may impose cost sharing under paragraph (1) for care in an amount that does not exceed a nominal amount (as otherwise determined under section 1916) so long as no cost sharing is imposed to receive such care through an outpatient department or other alternative health care provider in the geographic area of the hospital emergency department involved.

“(C) CONTINUED APPLICATION OF AGGREGATE CAP; RELATION TO OTHER COST SHARING.—In addition to the limitations imposed under subparagraphs (A) and (B), any cost sharing under paragraph (1) is subject to the aggregate cap on cost sharing applied under paragraph (1) or (2) of subsection (b), as the case may be. Cost sharing imposed for services under this subsection shall be instead of any cost sharing that may be imposed for such services under subsection (a).

“(3) CONSTRUCTION.—Nothing in this section shall be construed—

“(A) to limit a hospital's obligations with respect to screening and stabilizing treatment of an emergency medical condition under section 1867; or

“(B) to modify any obligations under either State or Federal standards relating to the application of a prudent-layperson standard with respect to payment or coverage of emergency services by any managed care organization.

“(4) STANDARD REGARDING IMPOSITION OF COST SHARING.—No hospital or physician shall be liable in any civil action or proceeding for the imposition of cost-sharing under this section, absent a finding by clear and convincing evidence of gross negligence by the hospital or physician. The previous sentence shall not affect any liability under section 1867 or otherwise applicable under State law based upon the provision of (or failure to provide) care.

“(5) DEFINITIONS.—For purposes of this subsection:

“(A) NON-EMERGENCY SERVICES.—The term ‘non-emergency services’ means any care or services furnished in an emergency department of a hospital that the physician determines do not constitute an appropriate medical screening examination or stabilizing examination and treatment required to be provided by the hospital under section 1867.

“(2) LIMITATION.—The total amount of payments under this subsection shall not exceed \$50,000,000 during the 4-year period beginning with 2006. This subsection constitutes budget authority in advance of appropriations Acts and represents the obligation of the Secretary to provide for the payment of amounts provided under this subsection.

“(3) PREFERENCE.—In providing for payments to States under this subsection, the Secretary shall provide preference to States that establish, or provide for, alternate non-emergency services providers or networks of such providers that—

“(A) serve rural or underserved areas where beneficiaries under this title may not have regular access to providers of primary care services; or

“(B) are in partnership with local community hospitals.

“(4) FORM AND MANNER OF PAYMENT.—Payment to a State under this subsection shall be made only upon the filing of such application in such form and in such manner as the Secretary shall specify. (C) the State will continue to make available, so long as the State operates its qualified HCB program consistent with applicable requirements, home and community-based long-term care services to each individual who completes participation in the MFP demonstration project for as long as the individual remains eligible for medical assistance for such services under such qualified HCB program (including meeting a requirement relating to requiring a level of care provided in an inpatient facility and continuing

to require such services, and, if the State applies a more stringent level of care standard as a result of implementing the State plan option permitted under section 1915(i) of the Social Security Act, meeting the requirement for at least the level of care which had resulted in the individual's admission to the institution).

(7) REBALANCING.—The application shall—

(A) provide such information as the Secretary may require concerning the dollar amounts of State Medicaid expenditures for the fiscal year, immediately preceding the first fiscal year of the State's MFP demonstration project, for long-term care services and the percentage of such expenditures that were for institutional long-term care services or were for home and community-based long-term care services;

(B)(i) specify the methods to be used by the State to increase, for each fiscal year during the MFP demonstration project, the dollar amount of such total expenditures for home and community-based long-term care services and the percentage of such total expenditures for long-term care services that are for home and community-based long-term care services; and

(ii) describe the extent to which the MFP demonstration project will contribute to accomplishment of objectives described in subsection (a).

(8) MONEY FOLLOWS THE PERSON.—The application shall describe the methods to be used by the State to eliminate any legal, budgetary, or other barriers to flexibility in the availability of Medicaid funds to pay for long-term care services for eligible individuals participating in the project in the appropriate settings of their choice, including costs to transition from an institutional setting to a qualified residence.

(9) MAINTENANCE OF EFFORT AND COST-EFFECTIVENESS.—The application shall contain or be accompanied by such information and assurances as may be required to satisfy the Secretary that—

(A) total expenditures under the State Medicaid program for home and community-based long-term care services will not be less for any fiscal year during the MFP demonstration project than for the greater of such expenditures for—

(i) fiscal year 2005; or

(ii) any succeeding fiscal year before the first year of the MFP demonstration project; and

(B) in the case of a qualified HCB program operating under a waiver under subsection (c) or (d) of section 1915 of the Social Security Act (42 U.S.C. 1396n), but for the amount awarded under a grant under this section, the State program would continue to meet the cost-effectiveness requirements of subsection (c)(2)(D) of such section or comparable requirements under subsection (d)(5) of such section, respectively.

(10) WAIVER REQUESTS.—The application shall contain or be accompanied by requests for any modification or adjustment of waivers of Medicaid requirements described in subsection (d)(3), including adjustments to the maximum numbers of individuals included and package of benefits, including one-time transitional services, provided.

(A) a plan satisfactory to the Secretary for quality assurance and quality improvement for home and community-based long-term care services under the State Medicaid program, including a plan to assure the health and welfare of individuals participating in the MFP demonstration project; and

(B) an assurance that the State will cooperate in carrying out activities under subsection (f) to develop and implement continuous quality assurance and quality improvement systems for home and community-based long-term care services.

(12) OPTIONAL PROGRAM FOR SELF-DIRECTED SERVICES.—If the State elects to provide for any home and community-based long-term care services as self-directed services (as defined in subsection (b)(8)) under the MFP demonstration

project, the application shall provide the following:

(A) MEETING REQUIREMENTS.—A description of how the project will meet the applicable requirements of such subsection for the provision of self-directed services.

(D) OVERSIGHT OF RECEIPT OF SERVICES.—Satisfactory assurances that the State will provide oversight of eligible individual's receipt of such self-directed services, including steps to assure the quality of services provided and that the provision of such services are consistent with the service plan under such subsection.

Nothing in this section shall be construed as requiring a State to make an election under the project to provide for home and community-based long-term care services as self-directed services, or as requiring an individual to elect to receive self-directed services under the project.

(13) REPORTS AND EVALUATION.—The application shall provide that—

(A) the State will furnish to the Secretary such reports concerning the MFP demonstration project, on such timetable, in such uniform format, and containing such information as the Secretary may require, as will allow for reliable comparisons of MFP demonstration projects across States; and

(1) IN GENERAL.—The Secretary shall award grants under this section on a competitive basis to States selected from among those with applications meeting the requirements of subsection (c), in accordance with the provisions of this subsection.

(2) SELECTION AND MODIFICATION OF STATE APPLICATIONS.—In selecting State applications for the awarding of such a grant, the Secretary—

(A) shall take into consideration the manner in which, and extent to which, the State proposes to achieve the objectives specified in subsection (a);

(B) shall seek to achieve an appropriate national balance in the numbers of eligible individuals, within different target groups of eligible individuals, who are assisted to transition to qualified residences under MFP demonstration projects, and in the geographic distribution of States operating MFP demonstration projects;

(C) shall give preference to State applications proposing—

(i) to provide transition assistance to eligible individuals within multiple target groups; and

(ii) to provide eligible individuals with the opportunity to receive home and community-based long-term care services as self-directed services, as defined in subsection (b)(8); and

(D) shall take such objectives into consideration in setting the annual amounts of State grant awards under this section.

(3) WAIVER AUTHORITY.—The Secretary is authorized to waive the following provisions of title XIX of the Social Security Act, to the extent necessary to enable a State initiative to meet the requirements and accomplish the purposes of this section:

(A) STATEWIDENESS.—Section 1902(a)(1), in order to permit implementation of a State initiative in a selected area or areas of the State.

(B) COMPARABILITY.—Section 1902(a)(10)(B), in order to permit a State initiative to assist a selected category or categories of individuals described in subsection (b)(2)(A).

(A) **NUMERICAL BENCHMARKS.**—The State must demonstrate to the satisfaction of the Secretary that it is meeting numerical benchmarks specified in the grant agreement for—

(i) increasing State Medicaid support for home and community-based long-term care services under subsection (c)(5); and

(ii) numbers of eligible individuals assisted to transition to qualified residences.

(B) **QUALITY OF CARE.**—The State must demonstrate to the satisfaction of the Secretary that it is meeting the requirements under subsection (c)(11) to assure the health and welfare of MFP demonstration project participants.

(4) **PREVENTING DUPLICATION OF PAYMENT.**—The payment under a MFP demonstration project with respect to qualified expenditures shall be in lieu of any payment with respect to such expenditures that could otherwise be paid under Medicaid, including under section 1903(a) of the Social Security Act. Nothing in the previous sentence shall be construed as preventing the payment under Medicaid for such expenditures in a grant year after amounts available to pay for such expenditures under the MFP demonstration project have been exhausted.

(5) **MFP-ENHANCED FMAP.**—For purposes of paragraph (1)(A), the “MFP-enhanced FMAP”, for a State for a fiscal year, is equal to the Federal medical assistance percentage (as defined in the first sentence of section 1905(b)) for the State increased by a number of percentage points equal to 50 percent of the number of percentage points by which (A) such Federal medical assistance percentage for the State, is less than (B) 100 percent; but in no case shall the MFP-enhanced FMAP for a State exceed 90 percent.

(F) **QUALITY ASSURANCE AND IMPROVEMENT; TECHNICAL ASSISTANCE; OVERSIGHT.**—

(1) **IN GENERAL.**—The Secretary, either directly or by grant or contract, shall provide for technical assistance to, and oversight of, States

“(2) **PERMISSIBLE USES OF FUNDS.**—The following are examples of innovative methods for which funds provided under this subsection may be used:

“(B) Methods for improving rates of collection from estates of amounts owed under this title.

“(C) Methods for reducing waste, fraud, and abuse under the program under this title, such as reducing improper payment rates as meas-

ured by annual payment error rate measurement (PERM) project rates.

“(D) Implementation of a medication risk management program as part of a drug use review program under section 1927(g).

“(E) Methods in reducing, in clinically appropriate ways, expenditures under this title for covered outpatient drugs, particularly in the categories of greatest drug utilization, by increasing the utilization of generic drugs through the use of education programs and other incentives to promote greater use of generic drugs.

“(F) Methods for improving access to primary and specialty physician care for the uninsured using integrated university-based hospital and clinic systems.

“(3) **APPLICATION; TERMS AND CONDITIONS.**—

“(A) **IN GENERAL.**—No payments shall be made to a State under this subsection unless the State applies to the Secretary for such payments in a form, manner, and time specified by the Secretary.

“(B) **TERMS AND CONDITIONS.**—Such payments are made under such terms and conditions consistent with this subsection as the Secretary prescribes.

“(C) **ANNUAL REPORT.**—Payment to a State under this subsection is conditioned on the State submitting to the Secretary an annual report on the programs supported by such payment. Such report shall include information on—

“(i) the specific uses of such payment;

“(ii) an assessment of quality improvements and clinical outcomes under such programs; and

“(iii) estimates of cost savings resulting from such programs.

“(4) **FUNDING.**—

“(A) **LIMITATION ON FUNDS.**—The total amount of payments under this subsection shall be equal to, and shall not exceed—

“(i) \$75,000,000 for fiscal year 2007; and

This subsection constitutes budget authority in advance of appropriations Acts and represents the obligation of the Secretary to provide for the payment of amounts provided under this subsection.

“(B) **ALLOCATION OF FUNDS.**—The Secretary shall specify a method for allocating the funds made available under this subsection among States. Such method shall provide preference for States that design programs that target health providers that treat significant numbers of Medicaid beneficiaries. Such method shall provide that not less than 25 percent of such funds shall be allocated among States the population of which (as determined according to data collected by the United States Census Bureau) as of July 1, 2004, was more than 105 percent of the population of the respective State (as so determined) as of April 1, 2000.

“(C) **FORM AND MANNER OF PAYMENT.**—Payment to a State under this subsection shall be made in the same manner as other payments under section 1903(a). There is no requirement for State matching funds to receive payments under this subsection.

“(5) **MEDICATION RISK MANAGEMENT PROGRAM.**—

“(A) **IN GENERAL.**—For purposes of this subsection, the term ‘medication risk management program’ means a program for targeted beneficiaries that ensures that covered outpatient drugs are appropriately used to optimize therapeutic outcomes through improved medication use and to reduce the risk of adverse events.

“(B) **ELEMENTS.**—Such program may include the following elements:

“(i) The use of established principles and standards for drug utilization review and best practices to analyze prescription drug claims of targeted beneficiaries and identify outlier physicians.

“(ii) On an ongoing basis provide outlier physicians—

“(I) a comprehensive pharmacy claims history for each targeted beneficiary under their care;

“(II) information regarding the frequency and cost of relapses and hospitalizations of targeted beneficiaries under the physician’s care; and

“(III) applicable best practice guidelines and empirical references.

“(C) TARGETED BENEFICIARIES.—For purposes of this paragraph, the term ‘targeted beneficiaries’ means Medicaid eligible beneficiaries who are identified as having high prescription drug costs and medical costs, such as individuals with behavioral disorders or multiple chronic diseases who are taking multiple medications.”

SEC. 6082. HEALTH OPPORTUNITY ACCOUNTS.

Title XIX of the Social Security Act, as amended by sections 6035 and 6044, is amended—

(1) by redesignating section 1938 as section 1939; and

(2) by inserting after section 1937 the following new section:

“HEALTH OPPORTUNITY ACCOUNTS

“SEC. 1938. (a) AUTHORITY.—

“(1) IN GENERAL.—Notwithstanding any other provision of this title, the Secretary shall establish a demonstration program under which States may provide under their State plans under this title (including such a plan operating under a statewide waiver under section 1115) in accordance with this section for the provision of alternative benefits consistent with subsection (c) for eligible population groups in one or more geographic areas of the State specified by the State. An amendment under the previous sentence is referred to in this section as a ‘State demonstration program’.

“(2) INITIAL DEMONSTRATION.—

“(A) IN GENERAL.—The demonstration program under this section shall begin on January 1, 2007. During the first 5 years of such program, the Secretary shall not approve more than 10 States to conduct demonstration programs under this section, with each State demonstration program covering 1 or more geographic areas specified by the State. After such 5-year period—

“(i) unless the Secretary finds, taking into account cost-effectiveness, quality of care, and other criteria that the Secretary specifies, that a State demonstration program previously implemented has been unsuccessful, such a demonstration program may be extended or made permanent in the State; and

“(ii) unless the Secretary finds, taking into account cost-effectiveness, quality of care, and other criteria that the Secretary specifies, that all State demonstration programs previously implemented were unsuccessful, other States may implement State demonstration programs.

“(B) GAO REPORT.—

“(i) IN GENERAL.—Not later than 3 months after the end of the 5-year period described in subparagraph (A), the Comptroller General of the United States shall submit a report to Congress evaluating the demonstration programs conducted under this section during such period.

“(ii) APPROPRIATION.—Out of any funds in the Treasury not otherwise appropriated, there is appropriated to the Comptroller General of the United States, \$550,000 for the period of fiscal years 2007 through 2010 to carry out clause (i).

“(3) APPROVAL.—The Secretary shall not approve a State demonstration program under paragraph (1) unless the program includes the following:

“(A) Creating patient awareness of the high cost of medical care.

“(B) Providing incentives to patients to seek preventive care services.

“(C) Reducing inappropriate use of health care services.

“(D) Enabling patients to take responsibility for health outcomes.

“(E) Providing enrollment counselors and ongoing education activities.

“(F) Providing transactions involving health opportunity accounts to be conducted electronically and without cash.

“(G) Providing access to negotiated provider payment rates consistent with this section.

Nothing in this section shall be construed as preventing a State demonstration program from providing incentives for patients obtaining appropriate preventive care (as defined for purposes of section 223(c)(2)(C) of the Internal Revenue Code of 1986), such as additional account contributions for an individual demonstrating healthy prevention practices.

“(4) NO REQUIREMENT FOR STATEWIDENESS.—Nothing in this section or any other provision of law shall be construed to require that a State must provide for the implementation of a State demonstration program on a Statewide basis.

“(b) ELIGIBLE POPULATION GROUPS.—

“(1) IN GENERAL.—A State demonstration program under this section shall specify the eligible population groups consistent with paragraphs (2) and (3).

“(2) ELIGIBILITY LIMITATIONS DURING INITIAL DEMONSTRATION PERIOD.—During the initial 5 years of the demonstration program under this section, a State demonstration program shall not apply to any of the following individuals:

“(A) Individuals who are 65 years of age or older.

“(B) Individuals who are disabled, regardless of whether or not their eligibility for medical assistance under this title is based on such disability.

“(C) Individuals who are eligible for medical assistance under this title only because they are (or were within the previous 60 days) pregnant.

“(D) Individuals who have been eligible for medical assistance for a continuous period of less than 3 months.

“(3) ADDITIONAL LIMITATIONS.—A State demonstration program shall not apply to any individual within a category of individuals described in section 1937(a)(2)(B).

“(4) LIMITATIONS.—

“(A) STATE OPTION.—This subsection shall not be construed as preventing a State from further limiting eligibility.

“(B) ON ENROLLEES IN MEDICAID MANAGED CARE ORGANIZATIONS.—Insofar as the State provides for eligibility of individuals who are enrolled in medicaid managed care organizations, such individuals may participate in the State demonstration program only if the State provides assurances satisfactory to the Secretary that the following conditions are met with respect to any such organization:

“(i) In no case may the number of such individuals enrolled in the organization who participate in the program exceed 5 percent of the total number of individuals enrolled in such organization.

“(ii) The proportion of enrollees in the organization who so participate is not significantly disproportionate to the proportion of such enrollees in other such organizations who participate.

“(iii) The State has provided for an appropriate adjustment in the per capita payments to the organization to account for such participation, taking into account differences in the likely use of health services between enrollees who so participate and enrollees who do not so participate.

“(5) VOLUNTARY PARTICIPATION.—An eligible individual shall be enrolled in a State demonstration program only if the individual voluntarily enrolls. Except in such hardship cases as the Secretary shall specify, such an enrollment shall be effective for a period of 12 months, but may be extended for additional periods of 12 months each with the consent of the individual.

“(6) 1-YEAR MORATORIUM FOR REENROLLMENT.—An eligible individual who, for any reason, is disenrolled from a State demonstration program conducted under this section shall not be permitted to reenroll in such program before the end of the 1-year period that begins on the effective date of such disenrollment.

“(c) ALTERNATIVE BENEFITS.—

“(1) IN GENERAL.—The alternative benefits provided under this section shall consist, consistent with this subsection, of at least—

“(A) coverage for medical expenses in a year for items and services for which benefits are otherwise provided under this title after an annual deductible described in paragraph (2) has been met; and

“(B) contribution into a health opportunity account.

Nothing in subparagraph (A) shall be construed as preventing a State from providing for coverage of preventive care (referred to in subsection (a)(3)) within the alternative benefits without regard to the annual deductible.

“(2) ANNUAL DEDUCTIBLE.—The amount of the annual deductible described in paragraph (1)(A) shall be at least 100 percent, but no more than 110 percent, of the annualized amount of contributions to the health opportunity account under subsection (d)(2)(A)(i), determined without regard to any limitation described in subsection (d)(2)(C)(i)(II).

“(3) ACCESS TO NEGOTIATED PROVIDER PAYMENT RATES.—

“(A) FEE-FOR-SERVICE ENROLLEES.—In the case of an individual who is participating in a State demonstration program and who is not enrolled with a medicaid managed care organization, the State shall provide that the individual may obtain demonstration program medicaid services from—

“(i) any participating provider under this title at the same payment rates that would be applicable to such services if the deductible described in paragraph (1)(A) was not applicable; or

“(ii) any other provider at payment rates that do not exceed 125 percent of the payment rate that would be applicable to such services furnished by a participating provider under this title if the deductible described in paragraph (1)(A) was not applicable.

“(B) TREATMENT UNDER MEDICAID MANAGED CARE PLANS.—In the case of an individual who is participating in a State demonstration program and is enrolled with a medicaid managed care organization, the State shall enter into an arrangement with the organization under which the individual may obtain demonstration program medicaid services from any provider described in clause (ii) of subparagraph (A) at payment rates that do not exceed the payment rates that may be imposed under that clause.

“(C) COMPUTATION.—The payment rates described in subparagraphs (A) and (B) shall be computed without regard to any cost sharing that would be otherwise applicable under sections 1916 and 1916A.

“(D) DEFINITIONS.—For purposes of this paragraph:

“(i) The term ‘demonstration program medicaid services’ means, with respect to an individual participating in a State demonstration program, services for which the individual would be provided medical assistance under this title but for the application of the deductible described in paragraph (1)(A).

“(ii) The term ‘participating provider’ means—

“(I) with respect to an individual described in subparagraph (A), a health care provider that has entered into a participation agreement with the State for the provision of services to individuals entitled to benefits under the State plan; or

“(II) with respect to an individual described in subparagraph (B) who is enrolled in a medicaid managed care organization, a health care provider that has entered into an arrangement for the provision of services to enrollees of the organization under this title.

“(4) NO EFFECT ON SUBSEQUENT BENEFITS.—Except as provided under paragraphs (1) and (2), alternative benefits for an eligible individual shall consist of the benefits otherwise provided to the individual, including cost sharing relating to such benefits.

“(5) OVERRIDING COST SHARING AND COMPARABILITY REQUIREMENTS FOR ALTERNATIVE BENEFITS.—The provisions of this title relating to cost sharing for benefits (including sections 1916 and 1916A) shall not apply with respect to benefits to which the annual deductible under paragraph (1)(A) applies. The provisions of section 1902(a)(10)(B) (relating to comparability) shall not apply with respect to the provision of alternative benefits (as described in this subsection).

“(6) TREATMENT AS MEDICAL ASSISTANCE.—Subject to subparagraphs (D) and (E) of subsection (d)(2), payments for alternative benefits under this section (including contributions into a health opportunity account) shall be treated as medical assistance for purposes of section 1903(a).

“(7) USE OF TIERED DEDUCTIBLE AND COST SHARING.—

“(A) IN GENERAL.—A State—

“(i) may vary the amount of the annual deductible applied under paragraph (1)(A) based on the income of the family involved so long as it does not favor families with higher income over those with lower income; and

“(ii) may vary the amount of the maximum out-of-pocket cost sharing (as defined in subparagraph (B)) based on the income of the family involved so long as it does not favor families with higher income over those with lower income.

“(B) MAXIMUM OUT-OF-POCKET COST SHARING.—For purposes of subparagraph (A)(ii), the term ‘maximum out-of-pocket cost sharing’ means, for an individual or family, the amount by which the annual deductible level applied under paragraph (1)(A) to the individual or family exceeds the balance in the health opportunity account for the individual or family.

“(8) CONTRIBUTIONS BY EMPLOYERS.—Nothing in this section shall be construed as preventing an employer from providing health benefits coverage consisting of the coverage described in paragraph (1)(A) to individuals who are provided alternative benefits under this section.

“(d) HEALTH OPPORTUNITY ACCOUNT.—

“(1) IN GENERAL.—For purposes of this section, the term ‘health opportunity account’ means an account that meets the requirements of this subsection.

“(2) CONTRIBUTIONS.—

“(A) IN GENERAL.—No contribution may be made into a health opportunity account except—

“(i) contributions by the State under this title; and

“(ii) contributions by other persons and entities, such as charitable organizations, as permitted under section 1903(w).

“(B) STATE CONTRIBUTION.—A State shall specify the contribution amount that shall be deposited under subparagraph (A)(i) into a health opportunity account.

“(C) LIMITATION ON ANNUAL STATE CONTRIBUTION PROVIDED AND PERMITTING IMPOSITION OF MAXIMUM ACCOUNT BALANCE.—

“(i) IN GENERAL.—A State—

“(I) may impose limitations on the maximum contributions that may be deposited under subparagraph (A)(i) into a health opportunity account in a year;

“(II) may limit contributions into such an account once the balance in the account reaches a level specified by the State; and

“(III) subject to clauses (ii) and (iii) and subparagraph (D)(i), may not provide contributions described in subparagraph (A)(i) to a health opportunity account on behalf of an individual or family to the extent the amount of such contributions (including both State and Federal shares) exceeds, on an annual basis, \$2,500 for each individual (or family member) who is an adult and \$1,000 for each individual (or family member) who is a child.

“(ii) INDEXING OF DOLLAR LIMITATIONS.—For each year after 2006, the dollar amounts specified in clause (i)(III) shall be annually in-

creased by the Secretary by a percentage that reflects the annual percentage increase in the medical care component of the consumer price index for all urban consumers.

“(ii) BUDGET NEUTRAL ADJUSTMENT.—A State may provide for dollar limitations in excess of those specified in clause (i)(III) (as increased under clause (ii)) for specified individuals if the State provides assurances satisfactory to the Secretary that contributions otherwise made to other individuals will be reduced in a manner so as to provide for aggregate contributions that do not exceed the aggregate contributions that would otherwise be permitted under this subparagraph.

“(D) LIMITATIONS ON FEDERAL MATCHING.—

“(i) STATE CONTRIBUTION.—A State may contribute under subparagraph (A)(i) amounts to a health opportunity account in excess of the limitations provided under subparagraph (C)(i)(III), but no Federal financial participation shall be provided under section 1903(a) with respect to contributions in excess of such limitations.

“(ii) NO FFP FOR PRIVATE CONTRIBUTIONS.—No Federal financial participation shall be provided under section 1903(a) with respect to any contributions described in subparagraph (A)(i) to a health opportunity account.

“(E) APPLICATION OF DIFFERENT MATCHING RATES.—The Secretary shall provide a method under which, for expenditures made from a health opportunity account for medical care for which the Federal matching rate under section 1903(a) exceeds the Federal medical assistance percentage, a State may obtain payment under such section at such higher matching rate for such expenditures.

“(3) USE.—

“(A) GENERAL USES.—

“(i) IN GENERAL.—Subject to the succeeding provisions of this paragraph, amounts in a health opportunity account may be used for payment of such health care expenditures as the State specifies.

“(ii) GENERAL LIMITATION.—Subject to subparagraph (B)(ii), in no case shall such account be used for payment for health care expenditures that are not payment of medical care (as defined by section 213(d) of the Internal Revenue Code of 1986).

“(iii) STATE RESTRICTIONS.—In applying clause (i), a State may restrict payment for—

“(I) providers of items and services to providers that are licensed or otherwise authorized under State law to provide the item or service and may deny payment for such a provider on the basis that the provider has been found, whether with respect to this title or any other health benefit program, to have failed to meet quality standards or to have committed 1 or more acts of fraud or abuse; and

“(II) items and services insofar as the State finds they are not medically appropriate or necessary.

“(iv) ELECTRONIC WITHDRAWALS.—The State demonstration program shall provide for a method whereby withdrawals may be made from the account for such purposes using an electronic system and shall not permit withdrawals from the account in cash.

“(B) MAINTENANCE OF HEALTH OPPORTUNITY ACCOUNT AFTER BECOMING INELIGIBLE FOR PUBLIC BENEFIT.—

“(ii) **ADJUSTMENT AUTHORITY.**—The State plan amendment provides the State with the option to modify the criteria established under subparagraph (A) (without having to obtain prior approval from the Secretary) in the event that the enrollment of individuals eligible for home and community-based services exceeds the projected enrollment submitted for purposes of subparagraph (C), but only if—

“(I) the State provides at least 60 days notice to the Secretary and the public of the proposed modification;

“(II) the State deems an individual receiving home and community-based services on the basis of the most recent version of the criteria in effect prior to the effective date of the modification to be eligible for such services for a period of at least 12 months beginning on the date the individual first received medical assistance for such services; and

“(III) after the effective date of such modification, the State, at a minimum, applies the criteria for determining whether an individual requires the level of care provided in a hospital, a nursing facility, or an intermediate care facility for the mentally retarded under the State plan or under any waiver of such plan which applied prior to the application of the more stringent criteria developed under subparagraph (B).

It also reduces by 2.5 percent payments to dairy producers pursuant to section 1502 of the Farm Security and Rural Investment Act (known as “MILC”) during the period of October 1, 2005, through September 30, 2007. The reauthorization does not include 1104(f) and 1304(g) which specify the times at which the Secretary is required to make partial counter-cyclical payments. It also does not include section 1307(a)(6) which requires the Secretary to pay storage, handling, and other costs for peanut crops. Further, the Senate bill extends the period during which the prevailing world market price

for upland cotton must be further adjusted to July 31, 2012, and extends the extra long staple competitiveness program through July 31, 2012. (Section 1101)

Subtitle F—Nutrition

(19) Eligible households

The Senate bill has no comparable provision.

The House amendment amends the Food Stamp Act to restrict categorical eligibility status, during fiscal years 2006 through 2010, to only those households in which each member receives cash benefits under the Temporary Assistance for Needy Families program (TANF). It provides an exception to the "cash benefits" rule for households in which each member receives substantial and ongoing non-cash benefits under TANF. It further provides that such non-cash benefits must be provided for purposes of shelter, utilities, child care, health care, transportation, or job training, and it requires that such households must have a monthly income that does not exceed 150 percent of the poverty line.

The House amendment reauthorizes provisions in the Food Stamp Act through 2011 (except assistance for community food projects (section 25(b)) and innovative programs for addressing common community problems (section 25(h)). It also amends the eligibility categories for free school lunch and breakfast to provide a new eligibility category that will include a child who is a member of a household: (1) in which each member receives or is eligible to receive non-cash or in-kind benefits under TANF; and (2) that has a gross monthly income at or below 200 percent of the Federal poverty level. The Conference substitute deletes the House provision.

TITLE II—SENATE COMMITTEE ON BANKING AND HOUSE COMMITTEE ON FINANCIAL SERVICES

Subtitle A—FHA Asset Disposition

SUMMARY OF FHA RECONCILIATION LANGUAGE (DECEMBER 15, 2005)

The House Financial Services and Senate Banking Committees approved reconciliation language that will make several FHA multifamily authorities subject to appropriations. This move to discretionary spending will enable the Administration and Congress to set the level of activity for these FHA authorities and better control their use. This legislation authorizes \$100 million to be appropriated for fiscal year 2006 to make these reforms.

Bill Summary

Originally proposed in the President's budget, the FHA Asset Disposition Act of 2005 will make several FHA multifamily authorities subject to appropriations, including (1) discount property sales; (2) discount loan sales; and (3) up-front grant assistance.

The Congressional Budget Office estimate of total savings in outlays are as follows (in millions):

FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	Total
\$30	\$60	\$60	\$60	\$60	\$270

The savings from this proposal, taken together with Deposit Insurance Reform, constitute the reconciliation recommendations of the House Financial Services and Senate Banking Committees. Together the proposals will save an estimated \$520 million over fiscal years 2006–10, with \$30 million in fiscal 2006. This amount is the savings target for these committees contemplated in the budget resolution.

Background

Since 1934, FHA and HUD have insured almost 33 million home mortgages and multifamily project mortgages. Within HUD, FHA provides mortgage insurance to lenders to protect against losses as a result of borrower default. Currently, FHA has the authority to sell, at below-market rates, properties taken over by the agency because of mortgage defaults. FHA also has the authority to sell discount loans. This legislation will make these mandatory authorities discretionary and subject to appropriations. Additionally, FHA can provide up-front grants to rehabilitate dilapidated multifamily properties. Funding for the grants currently comes from the General Insurance Fund, which collects money from premiums and servicing of insured mortgages. The amount spent on the grants is left to the discretion of FHA. Under this legislation, funding for these grants will no longer be drawn from the General Insurance Fund and would be subject to appropriations. Finally, this proposal is effective during fiscal years 2006 through 2010.

Subtitle B—Deposit Insurance

SECTION-BY-SECTION ANALYSIS OF THE LEGISLATION

Section 2101. Short title; table of contents

This section establishes the short title of the subtitle, the 'Federal Deposit Insurance Reform Act of 2005,' and provides a table of contents.

Section 2102. Merging the BIF and SAIF

This section amends provisions of the Federal Deposit Insurance Act to merge the Bank Insurance Fund and the Savings Association Insurance Fund no later than the first day of the first calendar quarter that begins after the end of the 90-day period beginning on the date of the enactment of this Act.

Section 2103. Increase in deposit insurance coverage

This section provides for an inflation index for general depositors and a higher level of deposit insurance coverage for certain individual retirement accounts. Credit unions are provided with complete parity in coverage with other insured depository institutions.

The section also retains the \$100,000 deposit insurance limit on accounts at insured depository institutions, to be known as the "standard maximum deposit insurance amount," subject to future cost of living adjustments.

Beginning April 1, 2010, and every succeeding five years, the Board of Directors of the FDIC and the National Credit Union Administration Board shall jointly determine whether an increase in the standard maximum deposit insurance is appropriate after considering certain factors. If appropriate, the new standard maximum deposit insurance limit would be increased by a cost of living adjustment. This adjustment would be calculated according to the Personal Consumption Expenditures Chain-Type Index (PCE) published by the Department of Commerce and rounded down to the nearest \$10,000. The FDIC and National Credit Union Administration (NCUA) Boards of Directors are required to publish the new standard maximum deposit insurance amount in the Federal Register and provide a corresponding report to Congress by April 5, 2010, and April 5 of every succeeding fifth year. The approved adjustment in the standard maximum deposit insurance amount would automatically occur unless a Congressional act provides otherwise and would take effect on January 1 of the year immediately succeeding the calendar year in which the new amount is calculated.

The section also provides pass-through coverage to certain employee benefit plans, even if the institution is not authorized to accept employee benefit plan deposits because it is not well-capitalized or adequately capitalized.

The section also increases the deposit insurance limit for certain retirement accounts to \$250,000, also subject to future cost-of-living adjustments.

Section 2104. Setting assessments and repeal of special rules relating to minimum assessments and free deposit insurance

This section allows the FDIC Board to set assessments in such amounts as it may determine to be necessary or appropriate. This provision also eliminates the existing restrictions on the FDIC's authority to levy assessments on any institution above amounts needed to achieve and maintain the existing DRR of 1.25 percent. The minimum statutory rate (23 basis point cliff rate) applicable in certain circumstances is eliminated.

This section also provides that under the FDIC's risk-based assessment system, no depository institution shall be barred from the lowest-risk category solely because of size.

The section also requires insured depository institutions to maintain all records that the FDIC may require for verifying the accuracy of any assessment for 3 years or, in the case of disputed assessments, until the dispute has been resolved, and increases the fees that the FDIC can impose for late payments of premium assessments from \$100 to 1 percent of assessments per day, for institutions with assessments greater than \$10,000. Institutions with assessments lower than \$10,000 would face a maximum penalty of \$100 for each day they were delinquent in paying their premium assessments.

The bill repeals a number of provisions requiring the FDIC to set premiums on a semi-annual basis, replacing them with a provision granting the FDIC greater flexibility in the timing of those evaluations.

Section 2105. Replacement of fixed designated reserve ratio with reserve range

This section eliminates the current 1.25 percent 'hard target' DRR and provides the FDIC Board with the discretion to set the DRR within a range of 1.15 to 1.50 percent for any given year, using the following criteria as a basis for making these determinations: (1) present and future risk of losses to the deposit insurance fund; (2) economic conditions; and (3) any other factors the Board may determine to be appropriate.

In designating the reserve ratio, the FDIC must follow notice-and-comment rulemaking procedures, and is required to publish a thorough analysis of the data and projections if it proposes to change the DRR.

Section 2106. Requirements applicable to the risk-based assessment system

This section directs the FDIC to collect information from all appropriate sources in determining risk of losses to the DIF. This provision does not authorize the FDIC to impose additional recordkeeping requirements on insured depository institutions.

The FDIC is required to consult with the appropriate Federal banking agency in assessing the risk of loss to the DIF with respect to any insured depository institution. This risk of loss evaluation may be done on an aggregate basis for institutions that are determined to be well-capitalized and well-managed.

The FDIC is also required to provide notice and opportunity for comment prior to revising or modifying the risk-based assessment system.

Section 2107. Refunds, dividends, and credits from Deposit Insurance Fund

This section provides for refunds or credits of any assessment payment that was made by an insured depository institution in excess of the amount due the FDIC.

The section specifies two circumstances under which the FDIC is required to pay dividends to insured depository institutions: (1) whenever the reserve ratio of the DIF equals or exceeds 1.35 percent of estimated insured deposits and is less than or equal to 1.5 percent of such deposits, the FDIC is required to pay dividends equal to 50 percent of the amount in excess of what is required to maintain the reserve ratio at 1.35 percent unless the FDIC determines that a significant risk of losses to the DIF exists and such losses justify the growth of the reserve ratio; and (2) whenever the reserve ratio of the DIF exceeds 1.5 percent of estimated insured deposits, the FDIC is required to pay dividends in the amount of the excess of what is necessary to maintain the ratio at 1.5 percent.

The section also provides for a transitional credit of 10.5 basis points of the total assessment base as of December 31, 2001 (or about \$4.7 billion) to eligible insured depository institutions based on their respective percentage of total industry assessable deposits held as of December 31, 1996. Eligible insured depository institutions had to be in existence at December 31, 1996, or be a successor to such an institution, and to have paid a deposit insurance assessment prior to that date.

For purposes of allocating dividends, the FDIC is required to determine each insured depository institution's relative contribution to the DIF (or any predecessor deposit insurance fund), taking into account the institution's share of the assessment base as of December 31, 1996; the total amount of deposit insurance assessments paid by the in-

stitution after December 31, 1996; that portion of assessments paid by an institution that reflects higher levels of risk assumed by the institution; and such other factors as the FDIC deems appropriate. The FDIC's calculation, declaration and payment of dividends are made subject to notice-and-comment rulemaking.

For any insured depository institution that exhibits financial, operational or compliance weaknesses ranging from moderately severe to unsatisfactory at the beginning of the assessment period, credits may not exceed the amount calculated by applying to that institution the average assessment rate on all insured depository institutions for that assessment period.

In promulgating regulations establishing a system for dividends and credits, the FDIC is required to include provisions allowing insured depository institutions a reasonable opportunity to challenge administratively the amount of their dividends or credits.

In determining the appropriate distribution of dividends, the FDIC must weigh a number of factors in its rulemaking process. The calculation should recognize past contributions to the deposit insurance funds by incorporating the ratio determined for an institution in the calculation of the institution's one-time credit based on total assessment base at year-end 1996, as well as the actual assessments paid since that time. In establishing the dividend system, the FDIC should also take into account and make adjustments that reflect the higher risk profiles of some institutions so that they are not rewarded for riskier behavior. The FDIC is given the discretion to incorporate additional factors, through the rulemaking process, as it deems appropriate.

Section 2108. Deposit Insurance Fund restoration plans

Whenever the reserve ratio falls or is projected to fall below the low end of the range within which the FDIC is authorized to set the DRR, the FDIC is required, within 90 days, to establish and implement a plan for restoring the DIF to that level within five years or a longer period in extraordinary circumstances. While such a restoration plan is in effect, the FDIC has the authority to restrict the use of assessment credits by insured depository institutions, but is required to apply to an institution's assessment an amount that is the lesser of the institution's assessment or 3 basis points of an institution's assessment base. The FDIC must publish the details of its restoration plan in the Federal Register within 30 days of its implementation.

Section 2109. Regulations required

This section provides that the FDIC has 270 days after the date of enactment to prescribe final regulations, after notice and opportunity for public comment, establishing the DRR, implementing increases in deposit insurance coverage, implementing the dividend requirement and the one-time assessment credit, and providing for premium assessments under the amended Act.

Section 2110. Studies of FDIC structure and expenses and certain activities and further possible changes to deposit insurance system

This section provides that within one year of enactment, reports must be submitted to Congress on the following issues:

(1) The efficiency and effectiveness of the administration of the prompt corrective action (PCA) program, including the degree of effectiveness of the Federal banking agencies in identifying troubled depository institutions and the degree of accuracy of the risk assessments made by the FDIC;

(2) The appropriateness of the FDIC's organizational structure for the mission of the

FDIC, to take into account the current size and complexity of the business of insured depository institutions; the extent to which the organizational structure contributes to or reduces operational inefficiencies that increase operational costs; and the effectiveness of internal controls;

(3) The feasibility of establishing a voluntary deposit insurance system for deposits in excess of the maximum amount of deposit insurance for any depositor;

(4) The feasibility of increasing the limit on deposit insurance for deposits of municipalities and other units of general local government;

(5) The feasibility of privatizing all deposit insurance at insured depository institutions and insured credit unions; and,

(6) The feasibility of using an alternative to estimated insured deposits in calculating the DIF's reserve ratio and the DRR.

(7) The section directs the FDIC to conduct a study of the reserve methodology and loss accounting for insured depository institutions in a troubled condition over the period January 1, 1992 through December 31, 2004, and report its findings and conclusions to Congress within one year of the date of enactment. The FDIC is required to obtain comments on the design of this study from the Government Accountability Office (GAO), and to provide a draft of the final report to GAO prior to its submission to Congress.

(8) The section directs the Comptroller General to report to the Committee on Financial Services of the House and the Committee on Banking, Housing, and Urban Affairs in the Senate, the potential impact on the United States financial system, the implementation of the new Basel Capital Accord and the proposed revisions to current reserve requirement regulations for non-Basel II banks.

Section 2111. Bi-annual FDIC survey and report on increasing the deposit base by encouraging use of depository institutions by the unbanked

This section requires the FDIC to conduct a bi-annual survey on efforts by insured depository institutions to bring the 'unbanked' into the conventional finance system, and report its findings and conclusions to the House Committee on Financial Services and the Senate Committee on Banking, Housing and Urban Affairs, together with any recommendations for legislative or administrative action.

Section 2112. Technical and Conforming Amendments to the Federal Deposit Insurance Act relating to the merger of the BIF and SAIF

This section makes numerous amendments to ensure the technical conformity of the Federal Deposit Insurance Reform Act to various provisions in the Federal Deposit Insurance Act and other banking laws, to include the authority of the DIF to borrow from insured depository institutions and the Federal Home Loan Banks.

In particular, this section repeals section 5(d)(2) of the Federal Deposit Insurance Act, dealing with exit fees collected from institutions leaving the Savings Association Insurance Fund (SAIF). These funds will be returned to the DIF upon the repeal of this provision.

Section 2113. Other Technical and Conforming Amendments relating to the merger of the BIF and SAIF

This section ensures the technical conformity of the Federal Deposit Insurance Reform Act to various provisions in the Federal Deposit Insurance Act and other banking laws.

The managers on the part of the House and Senate at the conference on the disagreeing

votes of the two Houses on the amendment of the Senate to bill (S. 1932), to expedite the digital television (DTV) transition while helping consumers to continue to use their analog televisions, to free spectrum for public safety and commercial use, to improve emergency communications, to provide resources for the design and deployment of a temporary digital television broadcast system for New York City in response to the destruction of the World Trade Center during the terrorist attacks of September 11, 2001, and to ensure continued air service to rural communities through the Essential Air Service program and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

CONGRESSIONAL DIRECTIVES

The statement of the managers remains silent on provisions that were in both the House and Senate bills that remain unchanged by this conference agreement, except as noted in this statement of the managers.

The conferees agree that executive branch wishes cannot substitute for Congress' own statements as to the best evidence of congressional intentions—that is, the official reports of the Congress.

TITLE III—DIGITAL TELEVISION TRANSITION

Section 3001. Short title

Section 3001 would provide that this Title may be cited as the “Digital Television Transition and Public Safety Act of 2005.”

Sec. 3002. Analog spectrum recovery; firm deadline

Section 3002 directs the Federal Communication Commission (FCC) to take all steps necessary to require, by February 18, 2009, that full-power television stations stop analog broadcasting, and that Class A stations, whether broadcasting in analog or digital format, and full-power television stations broadcasting in digital format, conduct such broadcasting on channels 2 to 36 and 38 to 51. This enables channels 52 to 62 and 65 to 67 to be auctioned, and channels 63, 64, 68, and 69 to be used for public-safety purposes. Among the necessary steps the FCC will need to take are to issue a report and order on the digital television table of channel allotments, and to coordinate those allotments with Canada and Mexico to resolve any international interference issues.

Section 3002 also clarifies that only full-power stations, not low-power stations, must cease analog broadcasting by February 18, 2009. Low-power stations, including Class A stations, may continue broadcasting in analog format after February 18, 2009, subject to future decisions by the FCC on how to complete the digital television transition for such stations. Low-power stations other than Class A stations may also continue such analog broadcasting above channel 51, subject to future FCC decisions, so long as those stations' use of those channels is secondary to the use of those channels by the auction winners and public safety officials.

Section 3003. Auction of recovered spectrum

Section 3003 would amend the Communications Act of 1934 to require the FCC to conduct an auction of the recovered spectrum commencing by January 28, 2008. The FCC's auction authority would be extended through September 30, 2011.

Sec. 3004. Reservation of auction proceeds

This provision requires that the proceeds from the auction of analog spectrum be deposited in a single separate fund in the Treasury, to be called the “Digital Television Transition and Public Safety Fund,”

in order to fund several programs. On September 30, 2009, \$7,363,000,000 shall be transferred from the Digital Television Transition and Public Safety Fund to the general fund of the Treasury.

Section 3005. Digital transition and public safety fund

To help consumers who wish to continue receiving broadcast programming over the air using analog-only televisions not connected to cable or satellite service, the bill authorizes the National Telecommunications and Information Administration (NTIA) to create a digital-to-analog converter box assistance program. Under the program, the NTIA is initially allocated up to \$990 million of the spectrum auction revenues to send by U.S. mail up to two \$40 coupons to each U.S. household that requests to participate in the program. Consumers may use the coupons toward the purchase of eligible digital-to-analog converter-boxes. Such boxes, and over-the-air digital televisions in general, can work with the antennas consumers already use in their homes for analog over-the-air broadcasts. The NTIA may use up to \$100 million of the \$990 million for administrative costs. Up to \$5,000,000 of the administrative funds may be used to educate consumers about the digital television transition and the digital-to-analog converter-box program. If, as the program progresses, it appears the NTIA will need additional funds, the NTIA may certify to Congress that it cannot operate the program without more money, at which point the funds available for the program shall increase to \$1.5 billion and the cap on administrative expenses shall increase to \$160 million. The NTIA would be allowed access to the additional funds 60 days after the certification.

Even if NTIA spends \$100 million on administrative costs, the remaining \$890 million in converter-box program proceeds would fund 22,250,000 coupons. And each additional \$40 the NTIA does not spend on administration is another coupon it can make available to consumers. Thus, the Managers expect in any NTIA certification to raise the caps that the NTIA explain in detail why access to additional funds is necessary, whether those funds are to be used for administrative costs or for the coupons themselves, and why the NTIA was unable to operate the program within the \$990 million overall cap and \$100 million administrative cap.

The Managers note that the February 17, 2009, firm deadline will have little impact on most television households. Only consumers relying on over-the-air broadcasts should need to participate in the converter-box program. Only 14.86 percent of U.S. television households relied exclusively on over-the-air transmission as of June 2004, according to the FCC. By contrast, the FCC reports that 92.3 million households, representing 85.14 percent, subscribed to a multichannel video programming distribution (MVPD) service, such as those offered by a cable or satellite operator.

The coupon structure of the program and requiring consumers to make affirmative requests for coupons takes into account that many consumers will neither need nor want a subsidized converter box. By contrast, if converter-boxes were made directly available at subsidized rates at stores, or coupons were automatically sent to every U.S. household, impulse participation by consumers who do not really need either a converter-box or a subsidy would cause the program to run out of funds before consumers who really do need a subsidized box avail themselves of the program.

The Managers expect NTIA to promulgate regulations within nine months of enactment governing: (1) the content and distribu-

tion of coupon request forms and coupons; (2) consumer redemption of, and retailer reimbursement for, the coupons; (3) the types of converter boxes that shall be eligible for purchase with a coupon; (4) certification, education, and auditing of retailers involved in the program; and (5) consumer and retailer appeals. The requirement to send the coupons through the U.S. mail is designed to help NTIA administer the two-coupon per household limit. That limit would be much more difficult to implement if the coupons themselves were distributed electronically or simply made available at government buildings such as post offices. The U.S. mail requirement is also intended to reduce fraud that might occur with electronically distributed coupons. The Managers expect NTIA to take additional measures to reduce fraud and abuse, such as including anti-counterfeit measures and perhaps unique serial numbers on the coupons. The Managers do expect NTIA to use the efficiencies of electronic media and networks, however, to make other aspects of the program more efficient, such as outreach efforts, the distribution of coupon request forms, and the reimbursement of retailers for coupons that consumers redeem. NTIA should also take measures to protect consumer privacy in the use of information provided in conjunction with participation in the program.

Sec. 3006. Public safety interoperable communications

Section 3006 provides funding in the amount of \$1,000,000,000 to help ensure interoperability for our nation's first responders. In order to obtain a grant under this section, a public safety agency shall—(1) submit an application to the Assistant Secretary at such time, in such form, and containing or accompanied by such information and assurances as the Assistant Secretary shall require; (2) agree that, if awarded a grant, the public safety agency will submit annual reports to the Assistant Secretary for the duration of the grant award period with respect to—(A) the expenditure of grant funds; and (B) progress toward acquiring and deploying interoperable communications systems funded by the grant; and (3) agree to remit to the Assistant Secretary any grant funds that remain unexpended at the end of the 3-year period of the grant.

Grants under this section shall be awarded in the form of a single grant for a period of not more than 3 years. At the end of 3 years, any grant funds that remain unexpended should be remitted by the grantee to the Assistant Secretary, and, may be awarded to other eligible grant recipients. At the end of fiscal year 2010, any such re-awarded grant funds that remain unexpended shall be remitted by the grantee to the Assistant Secretary and may not be re-awarded to other grantees.

In order to ensure consistency amongst various federal interoperable communications grant programs, the Managers expect the Assistant Secretary, in consultation with the Secretary of the Department of Homeland Security, to administer the grant program in a manner consistent with the recommended guidance for public safety communications and interoperability grants established by the Office of Grant and Training of the Preparedness Directorate and the SAFECOM Program of the Office for Interoperability and Compatibility of the Science and Technology Directorate of the Department of Homeland Security. In addition, the Managers expect that the Assistant Secretary, in consultation with the Secretary of the Department of Homeland Security, will ensure that the grants awarded under this program are utilized by public safety agencies in a manner which is consistent with applicable state interoperable communications

plans, state and urban area homeland security strategies, and the National Preparedness Goal and accompanying guidance.

Moreover, in order to minimize the paperwork and administrative burden of public safety agencies applying for funds under this grant program, the Managers expect the Assistant Secretary, in consultation with the Secretary of the Department of Homeland Security, to enable a public safety agency to utilize, to the maximum extent practicable, the identical application such public safety agency may have submitted to the Department of Homeland Security for any interoperable communications funding from the Department of Homeland Security and to take any other steps to minimize the administrative burden of public safety agencies that may be applying both for funds under this grant program and funds for interoperable communications from the Department of Homeland Security.

The Managers intend that grants under this section may be used for the acquisition costs associated with designing an interoperable communications system so that the system is properly engineered based upon the topography, population density, or other characteristics of the area in which the system will operate. The Managers note that there is a diverse array of technological and engineering solutions that enable interoperable communications systems.

The Managers encourage the Assistant Secretary, in consultation with the Secretary of the Department of Homeland Security, to consider distributing a limited portion of grant funds under this section in a manner that gives priority to those public safety agencies in areas designated as at high risk for natural disasters and threats of terrorism to the agriculture, food, banking, and chemical industries; the defense industrial base; emergency services; energy; government facilities; postal, shipping, public health, health care, information technology, telecommunications, and transportation systems; water; dams; commercial facilities; and national monuments and icons.

Section 3007. NYC 9/11 digital transition

The funding provided under this section, \$30,000,000, would enable New York City broadcasters can build interim facilities to ensure that the New York metropolitan area could receive an adequate digital broadcast signal until the new facilities atop the Freedom tower can be completed. The Managers do not intend this program to alter or affect the FCC's authority with respect to licensing, interference, or other regulation.

Sec. 3008. Low-Power television and translator digital to analog conversion

Section 3008 provides funding to facilitate continued service for the viewers of low power television stations over their analog TVs. The Assistant Secretary shall determine the maximum amount of compensation such a low-power television station may receive based on the average cost of such digital-to-analog conversion devices during the time period such low-power broadcast television station purchased the digital-to-analog conversion device, but in no case shall such compensation exceed \$1,000.

Section 3009. Low-power and translator upgrade program

The funding provided under this section would make available \$65,000,000 for a program to convert low-power television stations and television translator stations from analog to digital transmissions.

Sec. 3010. National alert and tsunami warning program

The funding provided under this section, \$156,000,000, will provide for a modern all hazards alert and warning program to provide

alerts in response to natural disasters, man-made accidents, and terrorist incidents. The program will encourage, but not mandate, new technologies such as wireless communication devices, satellite radios, and personal computers to enhance the nation's current emergency warning capability. The goal of the program will be to help ensure that regardless of what communication technology an individual relies upon they will get an alert to a threat to public safety.

The funding will be used to develop technologies to allow emergency managers to precisely geographically target their alerts to only populations at risk. Research and development will be encouraged, but not mandated, to be conducted through a cooperative research program with the telecommunications industry. The funds should also be used to provide emergency managers with the tools necessary to input alerts into a national alerting system and have them retransmitted across all appropriate communication mediums. There should be established a procedure to provide credentials to emergency managers who wish to use the system to ensure the integrity of emergency alert communications to the public. The office responsible for managing the system should also ensure that personnel using the system are appropriately trained on how and when to use the system and understand that the system should only be used for grave threats to public safety. Personnel should also be trained to issue alerts that provide the public with information on what to do to protect themselves from the threat.

Section 3011. ENHANCE 911

The funding provided under this section would make available \$43,500,000 in grants to implement the ENHANCE 911 Act of 2004.

Section 3012. Essential air service program

The funding provided under this section would make \$30,000,000 in grants to the Essential Air Service program.

Section 3013. Supplemental license fees

This section provides for additional fees to be assessed by the Federal Communications Commission in the aggregate amount of \$10,000,000 during fiscal year 2006.

TITLE V—MEDICARE

Subtitle A—Part A

Hospital Quality Improvement (Section 5001 of the Conference Agreement, Section 6110 of the Senate Bill and no provision in the House Bill)

Current Law

Each year, Medicare's operating payments to hospitals are increased or updated by a factor that is determined in part by the projected annual change in the hospital market basket (MB), a measure that estimates price inflation affecting hospitals. Congress establishes the update for Medicare's inpatient prospective payment system (IPPS) for operating costs in acute care hospitals, often several years in advance. Currently, through FY2007, the IPPS operating update has been established as the MB for hospitals that submit specific quality information and as the MB minus 0.4 percentage points for hospitals that do not provide such information. The required data are those ten quality indicators established by the Secretary of the Department of Health and Human Services (the Secretary) as of November 1, 2003. Starting in FY2008, the IPPS update will be the hospital MB. Any MB reduction does not apply when computing the applicable percentage increase in subsequent years.

Outlier payments are intended to protect IPPS hospitals from the risk of financial losses associated with patients with exceptionally high costs or unusually long stays. Medicare cases qualify for outlier payments

if they exceed a threshold or fixed loss amount that is established each year. As directed by statute, the total amount of any outlier payments for any year should equal no less than 5% nor more than 6% of total projected operating diagnosis related group (DRG) payments. Outlier payments are financed by a reduction in the national average standardized amount, typically set at 5.1%.

For the purpose of establishing the correct IPPS payment, Medicare discharges are classified into diagnosis related groups (DRGs) primarily on the basis of the diagnosis and procedure code information included on the beneficiary's claim. The information includes the principal diagnosis (or main problem requiring inpatient care), up to eight secondary diagnoses codes as well as up to six procedures performed during the stay. Medicare pays for inpatient hospital services using per discharge rates that will vary by the DRG (and its calculated weight) to which a patient's stay is assigned. Each DRG weight represents the average resources required to provide care for cases in that specific DRG relative to the average resources used to treat cases in all DRGs. The Center for Medicare and Medicaid Services (CMS) annually reviews the DRG definitions and relative weights to (1) reflect changes in treatment patterns and technology improvements and (2) ensure that cases with clinically similar conditions requiring comparable resources are grouped together.

Under the DRG classification system, certain secondary diagnoses are considered to be complications or comorbidities (CC). When present as a secondary condition (with a specific principal diagnosis), these diagnosis codes are considered to increase the length of stay by at least one day in at least 75% of the patients. In FY2006, there are 3,285 diagnosis codes on the CC list. 524 DRGs are used for Medicare payment purposes and 121 paired DRGs are split into higher and lower paid DRGs on the presence or the absence of a CC. CMS has added and deleted codes from the standard list of CCs, but has never conducted a comprehensive review of the list. It is planning to review systematically the CC list for FY2007 Medicare payments.

Senate Bill

The Medicare statute would be amended by adding a new Section 1860E-2 which establishes the hospital value-based purchasing program for inpatient hospital services, starting FY2007. The program would make value-based payments to hospitals based on data reported under the quality measurement system established by the Secretary. Hospitals paid under Medicare's prospective payment system (PPS) that have substantially improved the quality of care over the prior year or exceeded an established quality threshold would receive a value-based payment as determined by the Secretary. A majority of the total amount available for value-based payments in any fiscal year would be paid to hospitals that are receiving such payments for exceeding a quality threshold. Starting in FY2008, the percentage of the total amount for value-based payments in any fiscal year that is paid to such hospitals would be greater than the equivalent percentage paid in the previous year. Hospitals would be required to comply with all the quality data reporting requirements and attest to the accuracy of the data in order to be eligible for a value-based payment. The total amount of value-based payments in a fiscal year would equal the total amount of available funding for such payments for that year. The payments would be based on the methods determined by the Secretary and would be made to hospitals no later than the close of the following fiscal

year. No later than January 1, 2007, the Secretary would provide each hospital with a description of how its payments for FY2006 would have been affected had the value-based payment program been in effect that fiscal year.

Value-based payments in a fiscal year would be made from Medicare's Part A Trust fund and would equal specified reductions in those trust fund expenditures as established in Section 6110(b) of the bill. Specifically, IPPS outlier payments would be established as no less than 5 percent and no more than 6 percent for fiscal years prior to 2007. In FY2007, outlier payments would be established as no less than 4 percent and no more than 5 percent. In FY2008, outlier payments would be established as no less than 3.75 percent and no more than 4.75 percent. In FY2009, outlier payments would be established as no less than 3.5 percent and no more than 4.5 percent. In FY2010, outlier payments would be established as no less than 3.25 percent and no more than 4.25 percent. In FY2011 and in subsequent years, outlier payments would be established as no less than 3 percent and no more than 4 percent.

The Secretary would be directed to reduce the average standardized amount by certain percentages to fund outlier payments and the hospital value-based purchasing program. The reduction factor would be equal to a calculation where the numerator is the sum of the additional outlier payments (as discussed in the preceding paragraph) plus a specified percentage of total projected DRG prospective payment rates divided by the total projected DRG prospective payment rates. The specific percentages would be 0 percent for fiscal years prior to 2007, 1 percent in FY2007, 1.25 percent in FY2008, 1.5 percent in FY2009, 1.75 percent in FY2010, and 2 percent in FY2011 and in subsequent years.

Acute care hospitals that do not submit required quality data would receive the MB minus 2 percentage points for FY2007 and each subsequent fiscal year. The reduction would apply only with respect to the fiscal year involved and would not be taken into account when computing subsequent updates. The required quality data would be that determined by the Secretary to be appropriate for the measurement of health care quality, including data necessary for the operation of the IPPS hospital value-based purchasing program.

House Bill

No provision.

Conference Agreement

Hospitals that do not submit the required data in FY2007 and each subsequent year will have the applicable MB percentage increase reduced by 2 percentage points. Each IPPS hospital is required to submit data on measures selected by the Secretary in the established form, manner, and specified time. Any reduction applies only to the fiscal year in question and does not affect subsequent fiscal years.

The conference agreement establishes that the Secretary will expand the number of quality indicators required to be reported by acute care hospitals. Beginning October 1, 2006 the Secretary will begin to adopt the baseline set of performance measures set forth in the November 2005 Institute of Medicine report that was required by section 238(b) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003. Beginning October 1, 2007, the Secretary will add other measures that reflect consensus among the affected parties. To the extent feasible and practicable, these measures will include those established by national consensus building entities. The Secretary is permitted to vary and replace any measures

in appropriate cases, such as where all hospitals are effectively in compliance or where measures have been shown not to represent the best clinical practice.

The Secretary is required to establish procedures for making the submitted quality data available to the public. These procedures will ensure that a hospital has the opportunity to review the data before they are made available to the public. The Secretary is required to report quality measures of process, structure, outcome, patients' perspective on care, efficiency, and costs of care that relate to inpatient services on the Internet website of CMS.

The Secretary is required to develop a plan to implement a value-based purchasing program for IPPS payments to acute care hospitals beginning with FY2009. The plan will include consideration of (1) the on-going development, selection, and modification process for measures of quality and resource use in hospital inpatient settings; (2) the reporting, collection, and validation of the data; (3) the structure of value-based payment adjustments such as the determination of thresholds for a payment adjustment, the size of the payment adjustment and the sources of funding for the value-based payments; and (4) the disclosure of information on hospital performance. The Secretary will consult with relevant affected parties and consider experience with applicable demonstration programs.

The Secretary is required to submit a report to Congress on the plan for the value-based purchasing program no later than August 1, 2007. The Medicare Payment Advisory Commission (MedPAC) is required to submit a report with detailed recommendations on the structure of the valued based payment adjustments no later than June 1, 2007. The report will include (1) a determination of thresholds, size of payments, sources of funds, and relationship of payments to quality measures; (2) analyses of hospital efficiency measures such as costs per discharge, related services (including physician services) within an episode of care; and (3) an identification of other changes that are needed within the IPPS payment structure.

Starting for discharges on October 1, 2007, hospitals are required to report any secondary diagnosis codes applicable to patients at their admission. By October 1, 2007, the Secretary is required to identify at least 2 high cost or high volume (or both high cost and high volume) diagnoses codes with a DRG assignment that has a higher payment weight when present with secondary diagnoses. These diagnoses codes represent conditions, including certain hospital acquired infections, that could reasonably have been prevented through the application of evidence-based guidelines. Starting for discharges on October 1, 2008, the DRG assigned to a discharge with the identified diagnosis codes will be the DRG that does not result in higher payments based on the presence of these secondary diagnosis codes. This assignment of the lower paid DRG applies to discharges, where, at the time of the patient's admission, the beneficiary had none of the identified diagnosis codes. Adjustments to the relative weight that occur because of this action are not budget neutral. Specifically, aggregate payments for discharges in a fiscal year could be changed as a result of such adjustments.

The list of selected diagnosis may be revised from time to time as long as there are at least two conditions selected for discharges occurring during any fiscal year. The Secretary is required to consult with the Centers for Disease Control and Prevention and other appropriate entities when selecting and revising the identified diagnosis codes. The list of diagnosis codes and DRGs are not subject to judicial review.

Clarification of Determination of Medicaid Patient Days for DSH Computation (Section 5002 of the Conference Agreement, no provision in the Senate Bill and no provision in the House Bill)

Current Law

Hospitals that serve a certain number of low income Medicare and Medicaid beneficiaries will receive a disproportionate share hospital (DSH) adjustment that increases their Medicare IPPS payments. Most DSH hospitals receive the additional payments based on their DSH patient percentage which is the proportion of the hospital's total days provided to Medicaid recipients added to the proportion of the hospital's Medicare inpatient days provided to poor Medicare beneficiaries (those who are eligible for Part A and receive Supplemental Security Income.) After a minimum threshold of 15 percent is met, a hospital's DSH adjustment will vary by the hospital's bed size or urban or rural location.

The policy of whether inpatient days provided to a patient covered under a demonstration project established by Section 1115 waivers could be included in the Medicare DSH calculation has changed over time. Prior to January 20, 2000, hospitals could not include the inpatient hospital days attributable to patients made eligible for Medicaid pursuant to a state's Social Security Act Section 1115 waiver. Starting on January 20, 2000, hospitals could include days for populations under the section 1115 waiver who were or could have been made eligible under a State Medicaid plan. This policy was corrected for discharge starting on October 1, 2003, when hospital inpatient days attributed to patients who do not receive coverage for inpatient benefits under Section 1115 demonstration projects could not be counted in the Medicare DSH calculation. These policies were established by regulation in January, 2000 and August, 2003.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

The conference agreement permits the Secretary to include inpatient hospital days of patients eligible for medical assistance under a Section 1115 demonstration waiver in the Medicare DSH calculation. These days will be counted as if they were provided to patients who were eligible for medical assistance under an approved Medicaid state plan. The existing regulations and their effective date are ratified. No hospital cost reports that are closed on the enactment date will be reopened to implement this provision.

Improvements to the Medicare-Dependent Hospital (MDH) Program (Section 5003 of the Conference Agreement, Section 6101 of the Senate Bill, and no provision in the House Bill)

Current Law

Certain rural hospitals with 100 beds or less that have at least 60 percent of its inpatient days or discharges during FY1987 or during two of the three most recently audited cost reporting periods (for which there is a settled cost report) are attributed to patients covered under Medicare qualify for special treatment under the inpatient prospective payment system as Medicare dependent hospitals (MDH). MDH hospitals are paid at national standardized rate or, if higher, 50 percent of their adjusted FY1982 or FY1987 hospital-specific costs. This special treatment will lapse for discharges starting on October 1, 2006.

Certain hospitals that serve a high proportion of Medicaid patients or poor Medicare

beneficiaries qualify for a disproportionate share hospital (DSH) adjustment to their inpatient payments. Small urban and most rural hospitals (except for rural referral centers) have their DSH adjustment capped at 12 percent.

Senate Bill

The MDH status for qualifying rural hospitals would be extended through discharges occurring before October 1, 2011. Starting for discharges on October 1, 2006, a MDH would be able to elect payments based on its FY2002 hospital-specific costs if that would result in higher Medicare payments. MDH's payments would be based on 75 percent of their adjusted hospital-specific costs starting for discharges on October 1, 2006. MDH's that qualify for a disproportionate share hospital (DSH) adjustment would not have the adjustment capped at 12 percent.

House Bill

No provision.

Conference Agreement

The conference agreement adopts the Senate provision.

Reduction in Payments to Skilled Nursing Facilities for Bad Debt (Section 5004 of the Conference Agreement, Section 6102 of the Senate Bill, and no provision in the House Bill)

Current Law

Medicare pays for the costs of certain items outside of the Prospective Payment System on a reasonable costs basis. Section 1861(v)(1)(A)(I) of the Social Security Act states that the costs for individuals covered by the Medicare program must not be borne by individuals not covered by the program, and the costs for individuals not covered by the program must not be borne by Medicare. Under this authority, the Secretary adopted a bad debt policy in 1966. Under this policy, Medicare reimburses certain providers for debt unpaid by beneficiaries for coinsurance and deductibles. Historically, CMS has reimbursed certain providers for 100 percent of this bad debt. SNFs are among the Medicare entities that are currently being reimbursed for 100 percent of beneficiary's bad debt.

Effective beginning with cost reports starting in FY2001, Medicare began reimbursing hospitals for 70 percent of the reasonable costs associated with beneficiaries' bad debt. In 2003, CMS issued a proposed rule (42 CFR Part 413, Medicare Program; Provider Bad Debt Payment) in which it described its intent to reduce reimbursement of bad debt for certain providers, including SNFs, by 30 percent. Within the rule, CMS explained that it believed that reducing the amount of Medicare debt reimbursement would encourage accountability and foster an incentive to be more efficient in bad debt collection efforts. It also stated that it believed that Medicare bad debt policy should be applied consistently and fairly among all providers eligible to receive bad debt reimbursement.

Senate Bill

The provision would amend Section 1861(v)(1) of the Social Security Act to reduce the payment for the allowable bad debts attributable to Medicare deductibles and coinsurance amounts by 30 percent for services furnished in SNFs on or after October 1, 2005.

House Bill

No provision.

Conference Agreement

The conference agreement reduces payments for allowable bad debts attributable to Medicare coinsurance by 30 percent for those individuals who are not dually eligible for Medicare and Medicaid. Bad debt payments for individuals who are dually eligible for Medicare and Medicaid remain at 100 percent.

Extended Phase-in of the Inpatient Rehabilitation Facility Classification Criteria (Section 5005 of the Conference Agreement, Section 6103 of the Senate Bill, and no provision in the House Bill)

Current Law

Inpatient rehabilitation facilities (IRFs) are either freestanding hospitals or distinct part units of other hospitals that are exempt from Medicare's inpatient prospective payment system (IPPS) used to pay short-term general hospitals. The Medicare statute gives the Secretary discretion to establish the criteria that facilities must meet in order to be considered an IRF. Since 1983, CMS has required that a facility must treat a certain proportion of patients with specified medical conditions in order to qualify as an IRF and receive higher Medicare payments. The rule was suspended temporarily and reissued in 2004 with a revised set of qualifying conditions and a transition period for the compliance threshold as follows: at 50 percent from July 1, 2004 and before July 1, 2005; at 60 percent from July 1, 2005 and before July 1, 2006; at 65 percent from July 1, 2006 and before July 1, 2007; and at 75 percent from July 1, 2007 and thereafter. In April 2005, the Governmental Accountability Office issued a final report recommending that the Centers for Medicare and Medicaid Services (CMS) refine the rule to describe more thoroughly the subgroups of patients within a condition that require IRF services, possibly using functional status or other factors in addition to condition, to help ensure that IRFs can be classified appropriately and that only patients needing IRF services are admitted.

Senate Bill

The provision would establish the compliance threshold at 50 percent from July 1, 2005 through June 30, 2007. The Secretary would not be permitted to change the designation of an IRF that is in compliance with that threshold. The Secretary would be required to restore the status of a facility as an IRF from July 1, 2005 through the effective date of this provision because of not meeting the 60 percent threshold. The Secretary would be required to make appropriate payments to those facilities. IRFs that failed to meet the 50 percent compliance threshold would be deemed to meet that threshold while an additional 6 months of claims data is examined. If the review of the new data indicates that the IRF is not in compliance with the 50 percent threshold, the IRF's deemed status would be revoked retroactively to the beginning of the 6 month period. The Secretary would collect any overpayments made to the IRF. The Inspector General would be required to analyze the types of patients treated in IRFs that have a compliance rate between 50 percent and 60 percent. A report would be submitted to Congress and the Secretary by January 1, 2005. A Rehabilitation Advisory Council would be established until September 30, 2010 to provide advice and recommendations concerning coverage of rehabilitation services under the Medicare program.

House Bill

No provision.

Conference Agreement

The conference agreement establishes the compliance threshold at 60 percent during the 12-month period beginning on July 1, 2006; at 65 percent during the 12-month period beginning on July 1, 2007; and at 75 percent beginning on July 1, 2008 and subsequently. The conferees encourage CMS to conduct additional research and study on this issue.

Development of a strategic plan regarding physician investment in specialty hospitals (Section 5006 of the Conference Agreement, Section 6104 of the Senate Bill, and no provision in the House Bill)

Current Law

Physicians are generally prohibited from referring Medicare and Medicaid patients to facilities in which they (or their immediate family member) have financial interests. Physicians, however, are not prohibited from referring patients to hospitals where they have ownership or investment interest in the whole hospital itself (and not merely in a subdivision of the hospital). Section 507 of the Medicare Prescription Drug Improvement, and Modernization Act of 2003 (MMA) established that the exception for physician investment and self-referral would not extend to specialty hospitals for a period of 18-months from enactment (or until June 8, 2004). In this instance, a specialty hospital is primarily or exclusively engaged in the care and treatment of patients with a cardiac condition, an orthopedic condition, those receiving a surgical procedure, or other specialized category of patient or cases that the Secretary designates as inconsistent with the purpose of permitting physician investment in a hospital. A specialty hospital does not include any hospital that is determined by the Secretary to be in operation or under development as of November 18, 2003, with the same number of physician investors as of such date that meets other specified requirements. For instance, an increase in the number of beds could only occur on the main campus of the hospital and could not exceed the greater of 50 percent of the number of beds in the hospital as of November 18, 2003, or 5 beds. The Secretary was directed to consider the certain factors in determining whether a hospital is under development, such as the completion of architectural plans, and the status of funding, zoning requirements, and necessary approvals from State agencies.

Senate Bill

The prohibition on Medicare and Medicaid referrals to specialty hospitals by physician investors would be effective on and after December 8, 2003. The exception to the definition of specialty hospital would be modified to include those: (1) where the percent investment by physician investors is no greater than the percentage on June 8, 2005; (2) where the percent investment by any physician investor is no greater than the percentage on June 8, 2005; and (3) where the number of operating rooms is not greater than the number on June 8, 2005. The existing requirement concerning permissible changes in the number of beds in order to qualify for the specialty hospital exception would be modified. From December 8, 2003 through June 7, 2005, an acceptable increase in the number of beds would only occur on the main campus of the hospital and could not exceed the greater of 50 percent of the number of beds in the hospital as of November 18, 2003, or 5 beds. After June 8, 2005, the number of beds at the specialty hospital would not be able to increase. These amendments would be effective on June 8, 2005.

House Bill

No provision.

Conference Agreement

The conference agreement directs the Secretary to develop a strategic and implementing plan regarding physician investment in specialty hospitals that addresses issues related to proportionality of investment return, bona fide investments, annual disclosure of investment information, and the provision of Medicaid and charity care by specialty hospitals. An interim report is

due within three months and a final report no later than six months after date of enactment. The Secretary will continue the suspension on enrollment of new specialty hospitals until the earlier of the date of submission of the report or 6 months after date of enactment. If the Secretary fails to comply with the statutory requirement to submit the final report within the six month time period, then the suspension on enrollment will be extended an additional two months. In developing the strategic and implementing plan the Secretary may waive certain requirements under the Administrative Procedures Act.

Medicare demonstration projects to permit gainsharing arrangements (Section 5007 of the Conference Agreement, no provision in the Senate bill, and no provision in the House Bill)

Current Law

No provision.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

The conference agreement establishes a gainsharing demonstration project to test and evaluate arrangements between hospitals and other providers, including physicians, and practitioners, that govern the utilization of inpatient hospital resources to improve the quality and efficiency of care provided to Medicare beneficiaries and to improve operational efficiency and performance. The Secretary will solicit applications 90 days after enactment, will approve not more than 6 demonstration projects with at least 2 of which will be in a rural area, and will begin on January 1, 2007.

The projects will meet certain requirements to maintain or improve quality while achieving cost savings. Such requirements include arrangements that provide remuneration as a share of savings, a written plan agreement, patient notification, quality and efficiency monitoring, independent review, and referral limitations. Restrictions on incentive payments in a project are waived, and similar protections extend to existing arrangements.

Not later than December 1, 2006, the Secretary will report to Congress on the number of demonstration projects. Not later than December 1, 2007, the Secretary will provide a project update to Congress including improvements toward quality and efficiency. By December 1, 2008, the Secretary will report to Congress on quality improvement and savings from the program. A final report will be submitted to Congress by May 1, 2010. Post-acute care payment reform demonstration (Section 5008 of the Conference Agreement, no provision in the Senate bill, and no provision in the House Bill)

Current Law

No provision.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

By January 1, 2008, the Secretary shall establish a demonstration program to better understand costs and outcomes across different post-acute care sites. Under the program, for certain diagnoses specified by the Secretary, an individual receiving treatment for such diagnosis shall receive a comprehensive assessment on the date of discharge of clinical characteristics and patient needs, to determine appropriate placement of the patient in a post-acute care site. The Secretary

shall use a standardized patient assessment instrument across all post-acute sites, to measure functional status and other factors during treatment and discharge from each provider. Participants shall provide information on the fixed and variable cost for each individual, and an additional comprehensive assessment shall be provided at the end of the individual's episode of care. The program will operate for a three year period, and shall be conducted with sufficient numbers to determine statistically reliable results.

No later than 6 months after the end of the program, the Secretary will submit a report to Congress on results and recommendations.

Subtitle B—Provisions Relating to Part B

CHAPTER 1—PAYMENT PROVISIONS

Beneficiary Ownership of Certain DME (Section 5101 of the Conference Agreement, Sections 6109 and Section 6116 of Senate bill, no provision in the House bill)

Current Law

Medicare Part B pays for certain items of durable medical equipment such as hospital beds, nebulizers and power-driven wheelchairs under the capped rental category. Most items in this category are provided on a rental basis for a period that cannot exceed fifteen months. After using the equipment for ten months, beneficiaries must be given the option of purchasing it effective thirteen months after the start of the rental period. If they choose the purchase option, the title to the equipment is transferred to beneficiaries. If the purchase option is not chosen, the supplier retains ownership of the equipment. Beneficiaries can continue to use it, but Medicare rental payments to the supplier are terminated. In the case of a power-driven wheelchair, the supplier must offer the beneficiary the option of purchasing the equipment when it is first furnished.

Medicare payments to suppliers for maintenance and servicing differ based on whether the beneficiary has purchased the equipment or whether the supplier continues to own it. In the case of a purchase agreement, payment for repairs and extensive maintenance recommended by the manufacturer is covered. When the equipment remains in the ownership of the supplier and continues to be used by a beneficiary after the fifteen month rental period, Medicare makes a payment to the supplier every six months for servicing and maintenance regardless of whether any maintenance and servicing is performed.

Senate Bill

The Senate bill would require the supplier to transfer the title of durable medical equipment in the capped rental category to the beneficiary after a thirteen month rental period. The option for a fifteen month rental period with the supplier retaining ownership of the item would be eliminated. The option for beneficiaries to purchase power-driven wheelchairs when initially furnished would be retained.

Automatic payments to the supplier every six months for maintenance and servicing would be eliminated. Such payments (for parts and labor not covered by the supplier's or manufacturer's warranty) would only be made if the Secretary determined them to be reasonable and necessary. This amendment would apply to items for which the first rental month occurred on or after January 1, 2006.

House Bill

No provision.

Conference Agreement

The conference agreement includes the Senate bill. The provisions apply to items for which the first rental month occurs on or after January 1, 2006.

The agreement further provides that rental payments for oxygen equipment (including

portable oxygen equipment) are converted to ownership at 36 months. The supplier is required to transfer the title of the equipment to the beneficiary after a 36 month rental period. After transfer of the title, monthly payments for oxygen contents (in the case of gaseous and liquid oxygen) will continue to be made, as provided for under current law, for the period of medical need. Payments for maintenance and servicing (for parts and labor not covered by the supplier's or manufacturer's warranty) will be made if the Secretary determines them to be reasonable and necessary. The agreement specifies that the provision takes effect on January 1, 2006. In the case of an individual receiving oxygen equipment as of December 31, 2005, the 36-month period begins January 1, 2006.

Adjustments in Payments for Imaging Services (Section 5102 of the Conference Agreement, no provision in the Senate Bill and no provision in the House Bill)

Current Law

Medicare has a long-standing policy of reducing payment for multiple surgical procedures performed by the same physician, on the same patient on the same day. Full payment is made for the highest priced procedure, with any subsequent procedure paid at 50%. In 1995, the policy was extended to certain nuclear medicine diagnostic procedures.

Under the physician fee schedule, diagnostic imaging procedures are priced as follows: (1) the professional component (PC) represents the physician work, i.e. the interpretation; (2) the technical component (TC) represents practice expenses including clinical staff, supplies, and equipment; and (3) the global service which represents both the PC and TC. Diagnostic imaging services, even those paid on contiguous body parts, are generally paid at 100% for each procedure.

In its March 2005 report, Medicare Payment Policy, the Medicare Payment Advisory Commission recommended that CMS expand its coding edit policy to help the program pay more accurately for multiple imaging services performed during the same encounter. It noted that a number of private plans use coding edits to adjust payments for multiple imaging services performed on contiguous body parts. Private insurers usually pay the full amount for the first service but a reduced amount (usually half) for the technical component of any additional study that is of the same modality. This is based on the premise that there are savings in clerical time, preparation, and supplies.

In August 2005, CMS issued its proposed physician fee schedule for 2006 (Federal Register, vol. 70, no. 151, 45764-46064). CMS noted that its analysis supported a 50% reduction in the TC for the subsequent imaging procedure performed on contiguous body parts. It did not propose to apply the multiple procedure reduction to PC services because it believed that physician work is not significantly affected for multiple procedures. When a global service code is billed, the TC portion, but not the PC portion, would be reduced. CMS identified 11 families of imaging procedures by imaging modality. It recommended extending the multiple procedure TC payment reduction only to procedures involving contiguous body parts within a family of codes, not across families.

On November 21, 2005, CMS issued its final physician fee schedule regulation for 2006 (Federal Register, vol 70, no. 223, 70116-70476). It retained the proposed reduction with modifications. The payment reduction is to be phased-in with a 25% reduction in 2006 and a 50% reduction in 2007. Further, the budget neutrality adjustment is to be applied only to practice expense relative value units rather than to both work and practice expense relative value units.

When the Secretary revises the relative values for the work, practice expense and malpractice components of physician payments, the revisions may not change the amount of physician expenditures by more than \$20 million. Thus, changes must be budget neutral. When reducing practice expenses for imaging, the Secretary is required to increase practice expenses for other physician services to maintain budget neutrality.

Conference Agreement

The conference agreement specifies that, effective for fee schedules established beginning with 2007, the reduced expenditures attributable to the multiple procedure payment reduction for imaging (under the final rule published November 21, 2005) will not be taken into account for purposes of the budget neutrality calculation for fee schedules for 2006 and 2007.

The agreement further provides that for specified imaging services furnished on or after January 1, 2007, the technical component (including the technical component of the global fee) for a service will be reduced if it exceeds (without regard to the geographic wage adjustment factor) the outpatient department (OPD) fee schedule amount for the service established under the prospective payment system for hospital outpatient departments. In such cases, the Secretary will provide for the use of that OPD amount, adjusted by the geographic adjustment factor under the physician fee schedule. The services this policy applies to are: imaging and computer-assisted imaging services, including X-ray, ultrasound (including echocardiography), nuclear medicine (including positron emission tomography), magnetic resonance imaging, computed tomography, and fluoroscopy. Not included are diagnostic and screening mammography. This change will not be taken into account for purposes of the budget neutrality calculation beginning in 2007.

This provision moves toward payment neutrality across sites of service delivery.

Limitation on Payments for Procedures in Ambulatory Surgical Centers (Section 5103 of the Conference Agreement, no provision in the Senate Bill, and no provision in the House Bill)

Current Law

Medicare uses a fee schedule to pay for the facility services related to a surgery provided in an ambulatory care surgery center (ASC). The associated physician services (surgery and anesthesia) are reimbursed under the physician fee schedule. CMS maintains a list of approved ASC procedures which is required to be updated every two years. The approved ASC procedures are categorized into one of nine payment groups that comprise the ASC facility fee schedule. The nine payment rates reflect the national median cost of procedures in that group adjusted to reflect geographic price variation.

The Secretary is required under the MMA to implement a new payment system for ASCs no later than January 2008.

Medicare reimbursement for hospital outpatient department (OPD) services is based on a fee schedule established by a separate prospective payment system (OPPS). Under OPPS, the unit of payment is the individual service or procedure as assigned to an ambulatory payment classification (APC). The payment rate for each service is determined by multiplying the relative weight for the service's APC by the conversion factor.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

Beginning on January 1, 2007, when the ASC facility payment (without application of any geographic price differences) is greater than the Medicare OPD fee schedule amount established under OPPS (without application of any geographic adjustment) for the same service, the ASC will be paid the OPD fee schedule amount. This adjustment applies to ASC payments until the revised ASC payment system is implemented. Total payments to ASCs will be held budget neutral between the year prior to implementation of the new payment system and the first year of the new payment system.

This provision moves toward payment neutrality across sites of service delivery.

Update for Physicians' Services for 2006 (Section 5104 of the Conference Agreement, Section 6105 of Senate bill, and no provision in the House Bill)

Current Law

Medicare payments for services of physicians and certain nonphysician practitioners are made on the basis of a fee schedule. The fee schedule assigns relative values to services that reflect physician work (i.e., the time, skill, and intensity it takes to provide the service), practice expenses, and malpractice costs. The relative values are adjusted for geographic variations in costs. The adjusted relative values are then converted into a dollar payment amount by a conversion factor. The conversion factor for 2005 is \$37.8975.

The conversion factor is the same for all services. It is updated each year according to a formula specified in law. The intent of the formula is to place a restraint on overall spending for physicians' services. Several factors enter into the calculation of the formula. These include: (1) the sustainable growth rate (SGR) which is essentially a cumulative target for Medicare spending growth over time (with 1996 serving as the base period); (2) the Medicare economic index (MEI) which measures inflation in the inputs needed to produce physicians services; and (3) the update adjustment factor which modifies the update, which would otherwise be allowed by the MEI, to bring spending in line with the SGR target. In no case can the adjustment factor be less than minus seven percent or more than plus three percent.

The law specifies a formula for calculating the SGR. It is based on changes in four factors: (1) estimated changes in fees; (2) estimated change in the average number of Part B enrollees (excluding Medicare Advantage beneficiaries); (3) 10-year rolling average change in real gross domestic product (GDP) growth per capita; and (4) estimated change in expenditures due to changes in law or regulations.

The SGR target is not a limit on expenditures. Rather, the fee schedule update reflects the success or failure in meeting the target. If expenditures exceed the target, the update for a future year is reduced. This is what occurred for 2002. It was also slated to occur in 2003 and 2004; however, the MMA prevented this from occurring through 2005. A negative 4.4 percent update is slated to occur in 2006.

Senate Bill

The Senate bill would specify that the update to the conversion factor in 2006 could not be less than one percent. The provision would further specify that these amendments would not be considered as a change in law for purposes of calculating the SGR.

House Bill

No provision.

Conference Agreement

The conference agreement specifies that the update for 2006 is zero percent. These amendments are not considered as a change in law for purposes of calculating the SGR.

MedPAC is required to report to Congress by March, 2007 on mechanisms to replace the Sustainable Growth Rate system.

Three-year Transition of the Hold Harmless Payments for Small Rural Hospitals Under the Prospective Payment System For Hospital Outpatient Department Services (Section 5105 of the Conference Agreement, Section 6106 of the Senate Bill, and no provision of the House Bill)

Current Law

The prospective payment system for services provided by hospital outpatient departments (OPO) was implemented in August 2000 for most acute care hospitals. Under hold harmless provisions, as modified by the MMA, rural hospitals with no more than 100 beds and sole community hospitals (SCH) located in rural areas are paid no less under this payment system than they would have received under the prior reimbursement system for covered OPO services provided before January 1, 2006.

Senate Bill

The hold harmless provisions governing OPO reimbursement for small rural hospitals and rural SCH would be extended to January 1, 2007.

House Bill

No provision.

Conference Agreement

The conference agreement establishes that small rural hospitals (with no more than 100 beds that are not SCHs) can receive additional Medicare payments, if their outpatient payments under the prospective payment system are less than under the prior reimbursement system. For calendar year (CY) 2006, these hospitals will receive 95 percent of the difference between the prospective payment system and the prior reimbursement system. The hospitals will receive 90 percent of the difference in CY2007 and 85 percent of the difference in CY2008.

On November 10, 2005, CMS issued its final hospital outpatient prospective payment system regulation for CY2006 (Federal Register, vol. 70, no. 217, 68516-68980). Under this rule, rural sole community hospitals will receive a 7.1 percent increase on January 1, 2006.

Update to the Composite Rate Component of the Basic Case-Mix Adjusted Prospective Payment System for Dialysis Services (Section 5106 of the Conference Agreement, Section 6107 of the Senate Bill, no provision in the House Bill)

Current Law

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) required the Secretary to establish a basic case-mix adjusted prospective payment system for dialysis services furnished either at a facility or in a patient's home, for services furnished beginning on January 1, 2005. The basic case-mix adjusted system has two components: (1) the composite rate, which covers services, including dialysis; and (2) a drug add-on adjustment for the difference between the payment amounts for separately billable drugs and biologicals and their acquisition costs, as determined by the Inspector General Report.

The Secretary is required to update the basic case-mix adjusted payment amounts annually beginning with 2006, but only for that portion of the case-mix adjusted system that is represented by the add-on adjustment and not for the portion represented by the composite rate.

Senate Bill

The provision would increase the composite rate component of the basic case-mix

adjusted system for services beginning January 1, 2006 by 1.6 percent above the amount paid for such services furnished on December 31, 2005.

House Bill

No provision.

Conference agreement

The conference agreement follows the Senate bill.

Revisions to Payments for Therapy Services (Section 5107 of the Conference Agreement, Section 6108 of Senate Bill and no provision in the House Bill)

Current Law

The Balanced Budget Act of 1997 established annual per beneficiary payment limits for all outpatient therapy services provided by non-hospital providers. The limits applied to services provided by independent therapists as well as to those provided by comprehensive outpatient rehabilitation facilities (CORFs) and other rehabilitation agencies. The limits did not apply to outpatient services provided by hospitals.

Beginning in 1999, there were two beneficiary limits. The first was a \$1,500 per beneficiary annual cap for all outpatient physical therapy services and speech language pathology services. The second was a \$1,500 per beneficiary annual cap for all outpatient occupational therapy services. Beginning in 2002, the amount would increase by the Medicare economic index (MEI) rounded to the nearest multiple of \$10.

The Balanced Budget Refinement Act of 1999 (BBRA) suspended application of the limits for 2000 and 2001. The Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) extended the suspension through 2002. Implementation of the provision was delayed until September 2003. The caps were implemented from September 1, 2003 through December 7, 2003. MMA reinstated the moratorium from December 8, 2003 through December 31, 2005. The caps are slated to go into effect beginning January 1, 2006. In the November 2005 final physician fee schedule regulation for 2006 CMS announced that the caps would be \$1,740 in 2006.

Senate Bill

The Senate bill would extend the moratorium for an additional year, through 2006.

House Bill

No provision.

Conference Agreement

The conference agreement would not extend the therapy cap moratorium. However, the Secretary would be required to implement an exceptions process for expenses incurred in 2006. Under the process, a Part B enrollee, or a person acting on behalf of the enrollee, may request an exception from the physical therapy/speech language pathology and occupational therapy caps. The individual may obtain such exception if the provision of services is determined medically necessary. If the Secretary does not make a decision on a request within 10 business days of receipt, the Secretary is deemed to have found the services medically necessary. The provision may be implemented by program instruction or otherwise. The agreement specifies that there can be no administrative or judicial review of the exceptions process (including establishment of the process).

The agreement requires the Secretary, by July 1, 2006, to implement clinically appropriate coding edits for physical therapy services, occupational therapy services, and speech language pathology services. The edits are to identify and eliminate improper payments. The edits are to include edits of clinically illogical combinations of procedure codes and other edits to control inappropriate billings.

CHAPTER 2—MISCELLANEOUS

Accelerated Implementation of Income-Related Reduction in Part B Premium Subsidy (Section 5111 of the Conference Agreement, no provision in the Senate Bill, no provision in the House Bill)

Current Law

The MMA increased the Part B premiums for higher income enrollees beginning in 2007. In 2007, individuals whose modified adjusted gross income (AGI) exceeds \$80,000 and couples whose modified AGI exceeds \$160,000 will be subject to higher premium amounts. The increase will be phased-in over five years. During the first year, higher income enrollees will pay premiums ranging from 27 percent to 36 percent of the value of Part B. When fully phased-in, higher income individuals will pay premiums ranging from 35 percent to 80 percent of the value of Part B.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

The agreement accelerates the phase-in period from five years to three years, with the provision fully effective in 2009. In 2007, higher income enrollees will pay total premiums ranging from 28 percent to 43 percent of the total value of Part B. In 2008, enrollees will pay total premiums ranging from 32 percent to 62 percent of the total value of Part B. When fully phased-in in 2009, higher income individuals will pay total premiums ranging from 35 percent to 80 percent of the total value of Part B.

Medicare Coverage of Ultrasound Screening for Abdominal Aortic Aneurysms (Section 5112 of the Conference Agreement, Section 6117 of the Senate Bill and no provision in the House Bill)

Current Law

Medicare provides coverage for services which are reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. In addition, Medicare covers certain preventive services specified in law.

Senate Bill

The Senate bill would authorize Medicare coverage of ultrasound screening for abdominal aortic aneurysms for individuals who: 1) received referrals for such screenings as a result of an initial preventive physical exam performed for new Medicare enrollees; 2) who had not previously had such a test covered by Medicare; and 3) who had a family history of abdominal aortic aneurysms or who manifested risk factors included in a beneficiary category (not related to age) identified by the United States Preventive Services Task Force.

An ultrasound screening for abdominal aortic aneurysms would be defined as a procedure using sound waves provided for the early detection of abdominal aortic aneurysms. The Secretary could specify other procedures using alternative technologies which were of commensurate accuracy and cost. The term would include the physician's interpretation of the results of the procedure. Ultrasound screening for abdominal aortic aneurysms would be included in the package of services (including related education, counseling and referral) provided in the initial preventive service exam offered to new Medicare enrollees.

Payment for services would be made under the physician fee schedule. The provision would specify that payment would not be made for screenings performed more frequently than specified above. The Part B deductible would not apply to these services.

The Secretary would be required to establish quality assurance standards, in con-

sultation with national medical, vascular technologist and sonographer societies, with respect to individuals (other than physicians) performing ultrasound screening for abdominal aortic aneurysms and diagnostic laboratories. Such standards would specify that the individual or laboratory was certified by the appropriate state licensing or certifying agency or (in the case of a state which did not license or certify such individuals or laboratories) by a national accreditation agency recognized by the Secretary. Medicare payment would not be made where individuals or laboratories performing the screening did not meet the quality assurance standards.

The bill would require the Secretary (after consultation with national medical, vascular technologist and sonographer societies) to conduct a national education and information campaign to promote awareness among health care practitioners and the general public with respect to the importance of early detection and treatment of abdominal aortic aneurysms. The section would authorize the appropriation of such funds as may be necessary, beginning in FY 2006 and each fiscal year thereafter. The Secretary could use such amounts to make grants to national medical, vascular technologist and sonographer societies to enable them to educate practitioners and providers about matters relating to such aneurysms. Such grants would be made in accordance with procedures and criteria specified by the Secretary.

The amendments would apply to ultrasound screenings for abdominal aortic aneurysms performed on or after January 1, 2007.

House Bill

No provision.

Conference Agreement

The conference agreement includes the Senate bill with modifications. The agreement does not specify that beneficiary categories recommended for screening cannot include categories related to age. The agreement does not provide for the development of quality assurance standards. Further, it does not include the national education and information campaign.

Improving Patient Access to, and Utilization of, Colorectal Cancer Screening Under Medicare (Section 5113 of the Conference Agreement, Section 6118 of the Senate Bill and no provision in the House Bill)

Current Law

Medicare covers certain cancer screening tests, subject to coverage limitations based on the type of test and the individual's level of risk. Covered tests are fecal occult blood test, flexible sigmoidoscopy, screening colonoscopy, and barium enema. Payments for services are made under the physician fee schedule which assigns relative values to services based on physician work, practice expense costs, and malpractice costs. The relative values are then adjusted for geographic variations in costs. These adjusted relative values are converted into dollar payment amounts by a conversion factor.

The Secretary is required to review and adjust relative values for specific services periodically, and has established a process for this review and adjustment.

Senate Bill

The Senate bill would require the Secretary to establish minimum payment amounts for CPT codes 45378 (diagnostic colonoscopy), 45380 (colonoscopy and biopsy), and 45385 (lesion removal, colonoscopy) and HCPCS codes G0105 (colorectal screen, high risk individual) and G0121 (colon cancer screen, not high risk individual) for items and services furnished after January 1, 2007. The amounts would reflect a 5 percent increase above the relative value units in effect as the non-facility rates for such codes

on December 31, 2006; the revised payment levels would apply to items and services furnished in non-facility settings. Similarly, the provision would require the Secretary to establish minimum payment amounts for the same CPT and HCPCS codes for items and services furnished after January 1, 2007 which would reflect a 5 percent increase above the relative value units in effect as the facility rates for such codes on December 31, 2006; the revised payment levels would apply to items and services furnished in facility settings. The payment amounts would be adjusted annually in accordance with the payment update rules under the fee schedule. The Secretary would not take into account the revised payment amounts in determining the amount of payment under the prospective payment system for covered hospital outpatient department services.

The bill would also authorize Medicare coverage for an office visit or consultation prior to a screening colonoscopy or in connection with a beneficiary's decision to obtain such a screening. The visit or consultation would be for the purpose of beneficiary education, assuring selection of the proper screening test, and securing information relating to the procedure and sedation of the beneficiary. The visit or consultation would be covered regardless of whether the screening was medically indicated for the beneficiary. Payments would equal 80 percent of the lesser of the actual charge or the amount established under the physician fee schedule. Payment amounts established under the fee schedule would be consistent with those established for CPT codes 99203 (office/outpatient visit, new patient) and 99243 (office consultation). The provision would apply to services furnished on or after January 1, 2007.

The Part B deductible would not apply to colorectal cancer screening tests, effective January 1, 2007.

House Bill

No provision.

Conference Agreement

The conference agreement only includes the Senate provision waiving the Part B deductible.

Delivery of Services at Federally Qualified Health Centers (Section 5114 of the Conference Agreement, Section 6115 of the Senate Bill, and no provision in the House Bill)

Current Law

The Omnibus Budget Reconciliation Act (OBRA) of 1989 amended the Social Security Act (SSA) to create a new category of facility under Medicare and Medicaid known as a federally qualified health center (FQHC). An FQHC is required to provide certain primary care services by physicians and appropriate mid-level practitioners as well as other preventive health services including those required under certain sections of the Public Health Service (PHS) Act (specifically Sections 329, 330, and 340 of the PHS).

Prior to the enactment of MMA, FQHC services were covered by a skilled nursing facility's (SNF) consolidated billing requirement. FQHC services were bundled into the SNF comprehensive per diem payment for the covered stay and not separately billable. MMA specified that a SNF Part A resident who receives FQHC services from a physician or appropriate practitioner would be excluded from SNF consolidated billing and be paid separately.

Senate Bill

The provision would add diabetes self-management training and nutrition therapy benefits, as covered under Medicare, as additional services that may be covered under the all-inclusive per visit payment rate for FQHCs. It would allow FQHCs to receive pay-

ments for services provided through a health care professional who contracts with the center and would remove restrictions on receipt of homeless grants.

House Bill

No provision.

Conference Agreement

The conference agreement adopts the Senate provision.

Waiver of Part B Late Enrollment Penalty for Certain International Volunteers (Section 5115 of the Conference Agreement, Section 6114 of the Senate Bill and no provision in the House Bill)

Current Law

Medicare Part B is a voluntary program. Individuals generally enroll in Part B when they turn 65. Individuals who delay enrollment in the program after their initial enrollment period are subject to a premium penalty. This penalty is a surcharge equal to 10 percent of the premium amount for each 12 months of delayed enrollment. There is no upper limit on the amount of the surcharge that may apply. Further, the penalty continues to apply for the entire time the individual is enrolled in Part B. The law establishes certain exceptions to the delayed enrollment penalty. One exception applies to the "working aged." Delayed enrollment is also permitted for certain disabled persons who have group health insurance coverage based on their own or a family member's current employment with a large group health plan.

Individuals who are permitted to delay enrollment have their own special enrollment periods. A special enrollment period begins when current employment ends or when coverage under the plan ends. The special enrollment period ends eight months later. Individuals who fail to enroll in this period are considered to have delayed enrollment and could become subject to the penalty.

Senate Bill

The Senate bill would permit certain individuals to delay enrollment in Part B without a delayed enrollment penalty. Those individuals who volunteer outside of the United States for at least 12 months through a program sponsored by a tax-exempt organization defined under section 501(c)(3) of the Internal Revenue Code would be permitted to delay enrollment under Medicare Part B. They would have a 6 month special Part B enrollment period beginning on the first day of the month the individual was no longer in the program. Coverage would begin the month after the individual enrolled. This section would apply to months and special enrollment periods beginning January 2007.

House Bill

No provision.

Conference Agreement

The conference agreement includes the Senate bill with a modification. The provision applies to individuals who can demonstrate health insurance coverage while volunteering outside the United States..

Coverage of Marriage and Family Therapist Services and Mental Health Counselor Services Under Part B of the Medicare Program (No provision in the Conference Agreement, Section 6119 of the Senate Bill and no provision in the House Bill)

Current Law

Medicare provides coverage for mental health services, subject to certain limitations. Medicare Part B will make direct payments to physicians, psychologists, and clinical social workers for such services. Medicare does not make direct payments for services provided by marriage and family therapists and mental health counselors. Their

services are generally paid as incident to a physician's professional services. They may also be included as part of covered facility services such as those provided by a skilled nursing facility.

Senate Bill

The Senate bill would include "marriage and family therapist services" and "mental health counselor services" within the definition of "medical and other health services" covered under Medicare Part B. The term marriage and family therapist services would be defined as services performed by marriage and family therapists for the diagnosis and treatment of mental illnesses. Such services would be those which the individual was legally authorized to perform under state law (or the state regulatory mechanism provided by state law) of the state in which the services were performed. Such services would also have to be of the type which would otherwise be covered if furnished by a physician or as incident to a physician's professional services. Payment would only be made if no facility or other provider charged or was paid for such services.

The term marriage and family therapist would be defined as an individual who: (1) possessed a master's or doctoral degree which qualified the individual for licensure or certification as a marriage and family therapist pursuant to state law; (2) performed at least 2 years of clinical supervised experience in marriage and family therapy after obtaining the degree; (3) was licensed or certified as a marriage and family therapist in the state if such state provided for licensure and certification of marriage and family therapists.

The provision would define mental health counselor services as services performed by mental health counselors for the diagnosis and treatment of mental illnesses. Such services would be those which the individual was legally authorized to perform under state law (or the state regulatory mechanism provided by state law) of the state in which the services were performed. Such services would also have to be of the type which would otherwise be covered if furnished by a physician or as incident to a physician's professional services. Payment would only be made if no facility or other provider charged or was paid for such services.

The term mental health counselor would be defined as an individual who: (1) possessed a master's or doctoral degree in mental health counseling or a related field; (2) performed at least 2 years of supervised mental health counselor practice after obtaining the degree; (3) was licensed or certified as a mental health counselor or professional counselor in the state if such state provided for licensure and certification of mental health counselors or professional counselors.

Payment for covered services would be made under Medicare Part B. Payment would equal the lesser of 80 percent of the actual charge for the service or 75 percent of the amount paid to a psychologist for such services. All services provided by marriage and family therapists and mental health counselors would be paid on an assignment basis. Further, services provided by marriage and family therapists and mental health counselors would be added to the list of services excluded from payment as part of the skilled nursing facility prospective payment system.

The bill would include services provided by marriage and family therapists and mental health counselors in the definition of covered rural health clinic services. It would modify the definition of the required interdisciplinary team for a hospice program to

permit a marriage or family therapist to be on the team instead of a social worker.

The provision would apply to services provided on or after January 1, 2007.

Subtitle C—Provisions Relating to Parts A and B

Home Health Payments. (Section 5201 of the Conference Agreement, Section 6110 of the Senate Bill—with respect to quality of home health services, and no provision in the House Bill)

Current Law

The Medicare home health prospective payment system, which was implemented on October 1, 2000, provides a standardized payment for a 60-day episode of care furnished to a Medicare beneficiary. Medicare's payment is adjusted to reflect the type and intensity of care furnished and area wages as measured by the hospital wage index.

Each year Medicare's payment to home health agencies is updated by the projected annual change in the home health market basket (HHMB), with specified reductions in some years. For the last three calendar quarters of 2004 through 2006, the home health update is the HHMB minus 0.8 percentage points. In 2007 and subsequent years, the payment update for home health agencies is equal to the full HHMB.

The Medicare Prescription Drug Improvement and Modernization act of 2003 provided for a one-year 5% additional payment for home health services furnished in rural areas. The temporary payment began for episodes and visits ending on or after April 1, 2004 and before April 1, 2005. It was made without regard to certain budget neutrality provisions and was not included in the base for determination of payment updates.

Senate Bill

The Medicare statute would be amended by adding a new Section 1860E-6 which establishes the Home Health Agency Value-Based Purchasing Program. In 2008 and in subsequent years, the Secretary would make value-based payments to those home health agencies that, based on data submitted under the quality measurement system, have either substantially improved quality of care over the prior year, or exceed a threshold established by the Secretary. A majority of the total amount available for value-based payments in any fiscal year would be paid to home health agencies that qualify for payments because they exceed a quality threshold. Starting in 2009 and in each subsequent year, the percentage of total value-based payments made to agencies that exceed the quality threshold would be greater than the percentage made in the previous year. To be eligible for a value-based payment, home health agencies would be required to submit the required quality data and attest that it is complete and accurate.

The total amount of value-based payments made in a year would equal the total funds available for such payments. The Secretary would determine the most appropriate method for making payments. Payments for a year would be required to be made no later than December 31 of the subsequent year. By January 1, 2008, the Secretary would be required to provide each home health agency with a description of how its payments for 2007 would have been affected had the value-based purchasing system been in effect that year.

Value-based payments would be made from Part A and Part B in the same proportion as payments for home health services are made.

In 2007 and subsequent years, a home health agency that does not submit to the Secretary the required quality data would receive an update of the market basket minus two percentage points. This reduction would only apply to the fiscal year in question. For 2007 and subsequently, each home health agency would be required to submit data necessary for a value-based purchasing system in the form, manner, and time period specified by the Secretary. Procedures for making the data available to the public would be established.

To fund the program, spending under the trust funds for home health services would be reduced by a percent applied to the standard prospective payment amount made to all agencies that comply with the data submission requirements. The percent reduction would be 1% in 2008, 1.25% in 2009, 1.5% in 2010, 1.75% in 2011, and 2% in 2012 and subsequent years.

House Bill

No provision.

Conference Agreement

The conference agreement eliminates the update for home health payments in 2006. It also provides for a one-year 5% additional payment for home health episodes or visits furnished in a rural area during calendar year 2006.

The Conference agreement accepts the Senate language with respect to (1) the collection of health care quality data, as determined appropriate by the Secretary, (2) procedures for making the data available to the public, and (3) the reduction of payments to home health agencies that do not submit quality data in 2007 and beyond. The reduction in payments is equal to the market basket minus two percentage points. However the reduction will not be taken into account for calculation of the payment rate in subsequent years.

The conference agreement directs the Medicare Payment Advisory Commission to submit a report to Congress no later than June 1, 2007 on a value-based purchasing program for home health services. The report is to include recommendations on the structure of the program, the determination of thresholds, the size of value-based payments, sources of funds, and the relationship of payments for improvements in health care quality.

Revision of Period for Providing Payment for Claims that are not Submitted Electronically (Section 5202 of the Conference Agreement, no provision in the Senate Bill, and no provision in the House Bill)

Current Law

Mandatory electronic claims submission went into effect on July 1, 2005 for all providers, with a few exceptions. The exceptions include: (1) small providers with fewer than 25 full-time equivalent (FTEs) employees and physicians, practitioners, or suppliers with fewer than 10 FTEs, (2) dentists, and (3) other providers as specified by the Centers for Medicare and Medicaid Services (CMS). Medicare contractors must pay 95% of all "clean" paper claims within 27-30 days of receipt.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

The Conference agreement directs Medicare contractors to delay the payment of claims that are not submitted electronically. The contractors are directed to pay 95% of all "clean" claims within 29-30 days of receipt for paper claims.

Timeframe for Part A and B Payments (Section 5203 of the Conference Agreement, Section 6112(b) of the Senate Bill, and no provision in the House Bill)

Current Law

Medicare contractors accept, process and pay claims submitted by providers for Medicare-covered services. Medicare contractors must pay interest on claims that are not promptly paid. The contractors must pay 95% of all "clean" claims within 14-30 days of receipt for electronically submitted claims, or within 27-30 days of receipt for paper claims. If the payment is not made within that time, interest begins accruing on the day after the required payment date and ends on the date on which the payment is made. The interest rate is set at the higher of the "private consumer rate," or the "current value of the funds."

Senate Bill

The Senate bill would delay Medicare Part A and B payments by 9 days. Claims that would otherwise be paid on September 22, 2006, through September 30, 2006 would be paid on the first business day of October 2006. No interest or late penalty would be paid to an entity or individuals for any delay in a payment during the period.

House Bill

No provision.

Conference agreement

The conference agreement accepts the Senate provision.

Medicare Integrity Program Funding (Section 5204 of the Conference Agreement, no provision in the Senate Bill and no provision in the House Bill)

Current Law

As part of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), Congress acted to increase and stabilize federal funding for anti-fraud activities. As required by Section 1817(k) of the Medicare law, an expenditure account was established within the Federal Hospital Insurance Trust Fund (the HCFAC account). Certain amounts were appropriated from the Trust Fund for specific activities, including the Medicare Integrity Program (MIP). These amounts have been established as not less than \$710 million and not more than \$720 million for FY2002 and subsequently.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

The conference agreement would increase MIP funding amounts by \$100 million for FY2006.

Subtitle D—Provisions Relating to Part C
Phase-out of Risk adjustment budget neutrality in determining the amount of payments to Medicare Advantage organizations. (Section 5301 of the Conference Agreement, Section 6111 of the Senate Bill, and no provision in the House Bill)

Current Law

Medicare Advantage payment rates are risk adjusted to control for the variation in the cost of providing health care among beneficiaries. Rates are adjusted by demographic and health status indicators. In the report language to the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999, Congress urged the Secretary to implement a more clinically-based risk adjustment methodology without reducing overall payments to plans. To keep payments from being reduced overall, the Secretary applied a budget neutrality adjustment to the risk adjusted rates. However, the Secretary has

proposed to phase-out the budget neutrality adjustment citing studies that show a difference in the reported health status of Medicare Advantage enrollees compared to the reported health status of beneficiaries in traditional Medicare.

Senate Bill

Beginning in 2007, this section would specify an adjustment to the benchmarks to phase-out overall increases in MA rates that result from the budget neutral implementation of risk adjustment. In 2007, if the Secretary does not rebase rates to 100% of per capita fee-for-service costs, the MA benchmarks would be equal to the 2006 rates as announced by the Secretary on April 4, 2005, with four adjustments—(1) exclusion of any national adjustments for coding intensity, (2) exclusion of risk adjustment budget neutrality, (3) increase based on the national per capita MA growth percentage, and (4) omission of any adjustments to account for errors in previous years' projections of the national per capita MA growth percentage. If the Secretary does rebase the rates in 2007, the MA benchmark would be set at the greater of either the rate calculated above, or 100% of per capita fee-for-service spending in the area. After 2007, if the Secretary does not rebase rates, the MA benchmarks would be the previous year's benchmark increased by the national per capita MA growth percentage without adjusting for errors in the estimation of the growth percentage for a year before 2004. After 2007, if the Secretary rebases rates, the benchmark would be equal to the greater of either the rate calculated above, or 100% of per capita fee-for-service spending.

The benchmarks described above would be free of the budget neutral risk adjustment. However, the benchmarks would be adjusted so that budget neutrality would be phased-out over 4 years. The applicable phase-out factors would be equal to .55 in 2007, .40 in 2008, .25 in 2009 and .05 in 2010. This means that in 2007, 55% of the payment to plans would be based on payment rates including the budget neutral risk adjustment, and 45% of the payment to plans would be based on a rate without the budget neutral adjustment. The budget neutrality factor is calculated through a formula that equals the Secretary's estimate of the total amount of payments that would have been made to plans under the demographic risk adjustment system, minus the Secretary's estimate of the payments that would have been made to plans under the health status risk adjustment system without the budget neutrality adjustment, divided by the Secretary's estimate of the total amount of payments that would be made under the health status risk adjustment system without the budget neutrality adjustment. When making this calculation, the Secretary would (a) use a complete set of the most recent and representative MA risk scores available, (b) adjust the risk scores to reflect changes in treatment and coding practices in fee-for-service, and (c) adjust the risk scores for differences in coding patterns under Medicare Part A and B compared to Medicare Part C, to the extent the Secretary has identified differences and (d) as necessary, adjust for late data submissions, lagged cohorts, and changes in MA enrollment. The Secretary could take into account estimated health risk of enrollees in preferred provider organizations (including MA regional plans) for the year. The Secretary would be required to conduct an analysis of differences in coding patterns between MA plans and providers under Parts A and B of Medicare using data starting in 2004, and incorporate, to the extent such differences are identified, the findings into calculations of MA benchmarks no later than

2008. Adjustments would be terminated if the total amount of payments adjusted for health status exceeded payments adjusted for demographics.

The Secretary could not make any adjustments to the budget neutrality factor, other than those specified above. The Secretary's authority to risk adjust MA benchmarks based on 100 percent of per capita fee-for-service spending would not be limited by these changes.

This section also refines adjustments for health status when plans are paid based on their bid amounts (rather than the benchmark). The Secretary would ensure that such risk adjustments reflect changes in the treatment and coding practices between Medicare Part A and Part B relative to Medicare Part C to the extent that the Secretary has identified differences.

House Bill

No provision.

Conference Agreement

The conference agreement accepts the Senate language in part, with modifications. The conference agreement codifies the phase-out of the budget neutrality factor over 2006 to 2010 and outlines the adjustments that can be made to that factor. Under the agreement, the Secretary must conduct an analysis to identify differences in coding patterns between Medicare Advantage plans and fee for service. To the extent that the Secretary identifies any differences, they are to be incorporated into calculations of the risk rates and the budget neutrality factor in 2008, 2009, and 2010. The conferees intend that any adjustments made for differences in coding patterns be made for differences resulting from inaccurate coding. The conference agreement makes no permanent change to Medicare Advantage payment calculations.

Rural Pace Provider Grant Program (Section 5302 in the Conference Agreement, Section 6113 of the Senate Bill, and no provision in the House Bill)

Current Law

PACE is a program providing comprehensive Medicare and Medicaid services under a managed care arrangement to individuals over age 55 who are eligible for a nursing home level of care. PACE organizations, which are public or private non-profit entities, receive a fixed monthly Medicare and Medicaid payment to cover a comprehensive set of services for PACE participants. The PACE service package must include all Medicare and Medicaid covered services, and other services determined necessary by the multidisciplinary team for the care of the PACE participant.

Senate Bill

This provision would create site development grants, provide technical assistance to established rural PACE providers, and establish a fund to reimburse rural PACE providers for certain outlier costs. A rural area would be a county that is not part of a Metropolitan Statistical Areas (as defined by the Office of Management and Budget) as established for Medicare IPPS payments to acute care hospitals. The Secretary would establish a procedure to award site development grants to be used for expenses incurred in relation to establishing or delivering services in rural areas. Up to 15 qualified PACE providers that serve a rural area, in whole or in part can receive a grant not to exceed \$750,000. The Secretary would be appropriated \$7.5 million in FY2006 and FY2007 out of the Treasury for these development grants. The appropriated funds would remain available for expenditure until FY 2010. The Secretary would establish a technical assistance program to provide 1) outreach and edu-

cation to specified entities interested in starting rural PACE programs, and 2) technical assistance necessary to support rural PACE pilot sites. The Secretary would establish an outlier fund for inpatient and related physician and ancillary costs incurred for an eligible participant within a given 12-month period. Outlier costs would be those costs for inpatient and related physician and ancillary services in excess of \$50,000 incurred within a given 12-month period for an eligible participant who resides in a rural area. For the first 3 years of its operation, a rural PACE site would receive 80 percent of the outlier costs in excess of \$50,000 for that period. Total outlier payments for an eligible participant could not exceed \$100,000 for the 12-month period used to calculate the payment. No site may receive more than \$500,000 in total outlier expense payments in a 12-month period. A rural PACE pilot site would be required to access and exhaust risk reserves held or arranged for the provider and any working capital established through a site development grant prior to receiving any payment from the outlier fund. The Secretary would be appropriated \$10 million for FY2006 and FY2007 for the outlier fund. These outlier appropriations would remain available for expenditure through FY2010. The Secretary would be required to submit a report to Congress on the evaluation of the rural PACE pilot sites no later than 60 months from the date of enactment. Any amount paid under this authority would be in addition to Medicare PACE funds paid under Section 1894 of the Social Security Act or Medicaid PACE funds paid for under Section 1934 of the same act.

Conference Agreement

The conference agreement adopts the Senate provision with certain exceptions. The Secretary is required to establish a process and criteria to award site development grants to qualified PACE providers that have been approved to serve a rural area. The Secretary is appropriated \$7.5 million for FY2006 for the rural site development grants. These appropriated funds would remain available for expenditure through FY2008. The Secretary is appropriated \$10 million for FY2006 for the outlier funds. These appropriated funds would remain available for expenditure through FY2010. Rural PACE pilot sites must apply to receive outlier funds and document their incurred costs for the outlier participant in a manner specified by the Secretary.

Elimination of Medicare Advantage Regional Plan Stabilization Fund (No provision in Conference agreement, Section 6112(a) of the Senate Bill, and no provision in the House Bill)

Current Law

The Secretary must establish an MA Regional Plan Stabilization Fund to provide incentives for plan entry in each region and plan retention in certain MA regions with below average MA penetration. Initially, \$10 billion will be available for expenditures from the Fund beginning on January 1, 2007 and ending on December 31, 2013.

Additional funds will be available in an amount equal to 12.5% of average per capita monthly savings from regional plans that bid below the benchmark.

Senate Bill

The Senate bill would repeal the stabilization fund retrospectively as of the enactment of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003.

Establishment of Medicare Value-based Purchasing Programs. (No provision in the Conference Agreement, Section 6110 of Senate Bill and no provision in the House Bill)

Subsection (a) Establishment of Medicare Value-Based Purchasing Programs Part E Value-Based Purchasing Programs—Quality Measurement Systems for Value-Based Purchasing Programs. (No provision in the Conference Agreement, Section 6110 of the Senate Bill and no provision in the House Bill)

Current Law

No provision.

Senate Bill

Section 6110 would amend the Medicare statute by redesignating the existing Section 1860E as Section 1860F and by adding a new Section 1860E which requires the Secretary to establish value-based purchasing systems for different providers.

Subsection (a) of Section 6110 would create Section 1860E-1 in the Medicare statute and would require the Secretary to develop provider-specific quality measurement systems for making value-based payments to hospitals, physicians and practitioners, Medicare Advantage (MA) and Part D prescription drug plans, end stage renal disease providers and facilities, and home health agencies. Measures for each quality system would be required to (1) be evidence-based; (2) be easy to collect and report; (3) address process, structures, outcomes, beneficiary experience, efficiency, equity, and overuse and underuse of health care; and (4) include at least one measure of health information technology infrastructure during the first year of implementation. Additional measures would be added in subsequent years. Measures would include those that assess the quality of care furnished to older, frail individuals and those with multiple complex chronic conditions. By 2008, hospital quality systems would be required to include at least 5 measures that take into account the unique characteristics of small hospitals located in rural areas and frontier areas.

Before a measure would be used to determine whether a provider receives a value-based payment, data on the measure must have been collected for at least a twelve month period. Each set of quality measures selected for specific categories of providers would be able to vary in their application to an individual or entity depending of the type, size, scope and volume of services provided by the individual or entity.

The Secretary would be required to establish risk adjustment procedures to control for differences in beneficiaries' health status and characteristics and to assign weights to measures used by each quality system. If appropriate, measures of clinical effectiveness would be weighted more heavily than measures of beneficiary experience; and measures of risk adjusted outcomes would be weighted more heavily than measures of process. The Secretary would be required to update the quality measurement system, but not more often than every twelve months. The update would permit a comparison of data from one year to the next. The Secretary would be required to use the most recent quality data for a provider type. However, if the Secretary determines that there is insufficient data because of the low service volume, the Secretary would be able to aggregate data across more than one fiscal or calendar year.

In developing and updating each quality measurement system, the Secretary would be required to consult with provider-based groups and clinical specialty societies. The Secretary would also take into account quality measures developed by nationally recognized entities, existing quality measurement

systems, reports by MedPAC required by this Act, results of relevant demonstrations, and the report on Health Care Performance Measures being developed by the Institute of Medicine under section 238 (b) of the MMA. In implementing each quality measurement system, the Secretary would be required to consult with entities that have developed strategies for quality measurement and reporting as well as a wide range of stakeholders.

By July 1, 2006, the Secretary would be required to have in place an arrangement with an entity that will provide the Secretary with advice and recommendations about the development and updating of the quality measurement systems established by this Act. This arrangement, with a private non-profit entity, would meet a specific set of requirements. For FY2006 and FY2007, \$3,000,000 is authorized for this purpose, with the amount in subsequent years increased by the Consumer Price Index for urban consumers.

Physician and practitioner value-based purchasing program

Current Law

No provision.

Senate Bill

A new Section 1860E-3 would direct the Secretary to establish a program under which value-based payments are provided each year to physicians and practitioners that demonstrate the provision of high quality health care to individuals enrolled under part B. In addition, MedPAC would be required to conduct five studies evaluating the new program.

The first study would examine how the Medicare value-based purchasing programs under this section will affect Medicare beneficiaries, Medicare providers, and Medicare financing, including the impact of these programs on the access of such beneficiaries to items and services, the volume and utilization of such items and services, and low-volume providers. The initial report would be due to Congress and the Secretary no later than March 1, 2008, and a final report due no later than June 1, 2012.

The second study would examine the advisability and feasibility of establishing a value-based purchasing program for critical access hospitals (CAHs). This report would be due to Congress and the Secretary no later than March 1, 2007.

The third study would address the advisability and feasibility of including renal dialysis facilities in the value-based purchasing program described in this section or establishing a separate value-based purchasing program for renal dialysis facilities under this title. This report would be required to be submitted to Congress and the Secretary no later than June 1, 2007.

The fourth study would be a report on the implementation of an end-stage renal disease (ESRD) provider and facility value-based purchasing program. This report would take into account the results to date of the demonstration of bundled case-mix adjusted payment system for ESRD services under Section 623(e) of MMA and would include issues for the Secretary to consider in operating the ESRD provider and facility value-based purchasing program as well as recommendations on such issues. This report would be required to be submitted to Congress and the Secretary no later than June 1, 2008.

The fifth study, due to Congress and the Secretary by June 1, 2007, would report on the advisability and feasibility of estab-

lishing a value-based purchasing program for skilled nursing facilities (SNFs).

The value-based purchasing program would be established so that value-based payments will be made initially in 2009 and in each subsequent year. The definition of a physician would not be changed as a result of this section and would remain as given in current law (section 1861(r)). The term 'practitioner' would mean: (i) a practitioner defined under current law; (ii) a physical therapist; (iii) an occupational therapist; and (iv) a qualified speech-language pathologist. The Secretary would be charged with establishing procedures for the identification of physicians and practitioners for payment purposes under this section, such as through physician or practitioner billing units or other units.

The value-based payments would be based on either relative or absolute standards. The Secretary would be able to make a value-based payment to a physician or a practitioner if both the quality and efficiency of care to an individual enrolled under Part B has improved substantially or has exceeded an established threshold. In determining which physicians and practitioners would qualify for a value-based payment, the Secretary would be required to use both the quality measurement system developed for this section with respect to the quality of the care provided by the physician or practitioner and the comparative utilization system developed under this section with respect to the efficiency of such care.

In determining the amount of award and the allocation of awards under the value-based purchasing program, the Secretary would determine both the amount of a value-based payment provided to a physician or a practitioner and the allocation of the total amount available for value-based payments for any year between payments with respect to physicians and practitioners that meet the quality threshold requirements described above.

In determining the amount and allocation of the value-based payments for physicians and practitioners who exceed the threshold that allows them to receive such payments, the Secretary would ensure that a majority of the total amount available for value-based payments for any year is provided to physicians and practitioners who meet the threshold for receiving such payments. Additionally, the percentage of value-based payments would not be able to decrease. For every year beginning in 2010, the Secretary would be required to ensure that the percentage of the total amount available for value-based payments for any year that is used to make payments to physicians and practitioners is greater than the previous year's percentage.

In order for a physician or a practitioner to be eligible for a value-based payment for a year, the physician or practitioner would be required to submit quality data with respect to that year, and provide the Secretary (under procedures established by the Secretary) with an attestation that the data submitted is complete and accurate.

The Secretary would be required to establish value-based payments such that the estimated total amount of the value-based payments is equal to the total amount of available funding for value-based payments for the year. The payment of value-based payments would be based on such a method as the Secretary determines appropriate, and the Secretary would ensure that value-based payments with respect to a year are made by not later than December 31 of the subsequent year.

The Secretary, in consultation with relevant unnamed stakeholders, would develop a comparative utilization system for purposes of providing value-based payments. The resulting comparative utilization system would measure the efficiency of the care

provided by a physician or practitioner. Under this comparative utilization system, the Secretary would select the measures of efficiency and review the most recent claims data with respect to services furnished or ordered by physicians and practitioners to determine utilization patterns and efficiency. The Secretary would establish risk adjustment procedures, as appropriate, to control for differences in beneficiary health status and beneficiary characteristics.

Beginning in 2007, the Secretary would provide physicians and practitioners with annual reports on the utilization of items and services under this title based upon the review of claims data. The 2007 and 2008 reports would be confidential and not be made available to the public. Not later than March 1, 2009, the Secretary would provide each physician and practitioner with a description of the Secretary's estimate of how payments to the physician or practitioner would have been affected with respect to items and services furnished in 2008 if the value-based payment program had been in effect in 2008.

Payments to physicians and practitioners under the value-based payment program would be made from the Federal Supplementary Medical Insurance (Part B) Trust Fund. The total amount available for value-based payments with respect to a year would be equal to the amount of the reduction in expenditures under the Federal Supplementary Medical Insurance Trust Fund in the year as a result of the amendments made by Section 6110(c)(2) of the bill, as estimated by the Secretary.

(1) *Voluntary submission of physician and practitioner quality data*

Current Law

Senate Bill

In 2007 and in subsequent years, physicians and providers who do not submit the required quality data would receive an update to the conversion factor minus two percentage points. This reduction would only apply to the fiscal year in question. In 2007 and subsequently, physicians and practitioners would be required to submit appropriate data necessary for a value-based purchasing system in the specified form, manner, and time of the data submission as determined by the Secretary. Procedures for making the data available to the public would be established. These procedures would be required to provide the physicians and practitioners with an opportunity to review the data before it is released to the public. The Secretary would be allowed to make exceptions to the requirement for making data available to the public and would take into account the size and specialty representation of the practice involved when providing such exceptions.

House Bill

No provision.

Conference Agreement

(2) *Reduction in conversion factor for physicians and practitioners that submit quality data in order to fund program*

Current Law

Medicare payments under Part B are based on a fee schedule. The fee schedule reflects a set of weights that vary across the many procedures that encompass the range of activities and services that physicians and practitioners provide. These relative weights

are converted to dollar amounts for payment under Medicare by applying a multiplicative conversion factor. The conversion factor is updated each year according to a formula that aims to place a restraint on overall increases in Medicare spending for Part B services.

Senate Bill

To fund the value-based purchasing program for physicians and practitioners, the conversion factor would be reduced as follows: 1.0% in 2009, 1.25% in 2010, 1.5% in 2011, 1.75% in 2012, and 2.0% in 2013 and subsequent years.

Senate Bill

Section 1680E-5. Beginning in 2007, the Secretary would establish a program under which value-based payments are provided each year to providers of services and renal dialysis facilities that provide services to ESRD individuals enrolled under part B and that demonstrate the provision of high quality health care. Facilities with at least 50% of their patients under the age of 18, as well as those providers and facilities currently participating in the bundled case-mix demonstration are excluded from this program.

Value-based payments would be made to a provider or facility, if the Secretary determines that the quality of care in that year has substantially improved over the prior year or exceeds a threshold established by the Secretary, using the quality measurement system.

The Secretary would determine the amount of a value-based payment and the allocation of the total amount available for all such payments, subject to certain requirements. The Secretary would ensure that the majority of the total amount available is awarded to those providers of services and renal dialysis facilities who provide high quality services. For 2007, the entire amount would be available for those who meet the requirements. Beginning in 2009, the percentage of the total amount available would be provided to those who improved in meeting such requirements relative to the previous year.

Beginning in 2007, each provider of services and renal dialysis facility would be required to submit data that the Secretary determines is appropriate for the measurement of health outcomes and other indices of quality, including data necessary for the operation of the program. A provider or facility would be required to submit this data, in order to be eligible for a value-based payment for a year. The Secretary would establish procedures for making submitted data available to the public in a clear and understandable form and would ensure that a provider or facility first has the opportunity to review the data. The provider or facility would be required to provide an attestation that the data is complete and accurate.

The Secretary would establish payment amounts so that, as estimated by the Secretary, the total amount of value-based payments made in a year is equal to the total amount available. The payment of the awards would be based on a method as determined by the Secretary and must be paid no later than December 31 of the subsequent year. The amount available for value-based payments would be equal to the amount of the reduction in expenditures under the Fed-

eral Supplementary Medical Insurance (SMI) Trust Fund, as estimated by the Secretary. Payments to providers of services and renal dialysis facilities, under this section, would be made from the Federal SMI Trust Fund.

Senate Bill

No later than July 31, 2006, the Secretary would establish procedures for providers of services and renal dialysis facilities, who are paid based on the case-mix adjusted prospective payment system, to submit data that permits the measurement of health outcomes and other indices of quality.

In the case of any payment for an item or service furnished on or after January 1, 2007, the case-mix adjusted prospective payment amount would be reduced by the applicable percent, but only for those providers of services or renal facilities included in the value-based program. The applicable percent would be 1% for 2007, 1.25% for 2008, 1.5% for 2009, 1.75% for 2010, and 2% for each year thereafter.

Beginning January 1, 2007, the Secretary would implement a value-based purchasing program for providers and facilities participating in the bundled case-mix demonstration (as established under Section 623 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003), in a manner similar to the value-based program established under Section 1860E-5 of this bill, including the funding of the program.

PPS Hospital value-based purchasing program

Current Law

Senate Bill

The Medicare statute would be amended by adding a new Section 1860E-2 which establishes the hospital value-based purchasing program for inpatient hospital services, starting FY2007. The program would make value-based payments to hospitals based on data reported under the quality measurement system established by the Secretary. Hospitals paid under Medicare's prospective payment system (PPS) that have substantially improved the quality of care over the prior year or exceeded an established quality threshold would receive a value-based payment as determined by the Secretary. A majority of the total amount available for value-based payments in any fiscal year would be paid to hospitals that are receiving such payments for exceeding a quality threshold. Starting in FY2008, the percentage of the total amount for value-based payments in any fiscal year that is paid to such hospitals would be greater than the equivalent percentage paid in the previous year. Hospitals would be required to comply with all the quality data reporting requirements and attest to the accuracy of the data in order to be eligible for a value-based payment. The total amount of value-based payments in a fiscal year would equal the total amount of available funding for such payments for that year. The payments would be based on the methods determined by the Secretary and would be made to hospitals no

later than the close of the following fiscal year. No later than January 1, 2007, the Secretary would provide each hospital with a description of how its payments for FY2006 would have been affected had the value-based payment program been in effect that fiscal year.

Value-based payments in a fiscal year would be made from Medicare's Part A Trust fund and would equal specified reductions in those trust fund expenditures as established in Section 6110(b) of the bill.

Plan value-based purchasing program

Current Law

No provision.

Senate Bill

A new Section 1860E-4 would require the Secretary to establish a program to award value-based payments to Medicare Advantage (MA) organizations that provide high quality health care. Payments would start in 2009, and continue each year thereafter. The program would apply to both MA regional and local plans. It also would apply to reasonable cost contract plans, except for provisions that would require plans to submit data two years prior to the start of the program, and provisions relating to plan bids.

The Secretary would make payments for each plan offered by an MA organization if the plan substantially improved over the prior year, or exceeded a minimum threshold. The Secretary would use measures of quality developed for the plan value-based payments system (Section 1860E-1) and ensure that awards are based on data from a full 12-months when making a comparison against a threshold, and 24-months when measuring improvement over a prior year.

The Secretary would determine the amount of the value-based payments, but must ensure that the majority of funds go to plans that receive a payment because their health measures exceeded a threshold. In 2010 and each subsequent year, the percentage of the total amount available is greater than the percentage in a previous year.

Value-based payments may only be used to invest in quality improvement programs or to enhance beneficiary benefits.

To be eligible for value-based payments, an MA plan or reasonable cost contract would be required to have collected, analyzed and reported the required data for the two previous years. Also, an MA plan would be required to provide the Secretary with an attestation that the value-based payment program including payment adjustments made by reason of Section 6110(d)(2)(A) had no effect on the integrity and actuarial soundness of the plan's bid.

The Secretary would ensure that the total of value-based payments is equal to the amount made available for those payments. Payments for a particular year would be required to be made not later than March 1 of the subsequent year, in a manner determined by the Secretary.

By March 1, 2009, the Secretary would provide each MA organization with an estimate of how plan payments would have been affected if the value-based payment system had been in effect in 2008.

The amount available for value-based payments would be equal to the amount of the reduction in expenditures under the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund as a result of amendments to fund the value-based payment system, as estimated by the Secretary. Payments to MA organiza-

tions would be drawn from the two trust funds in proportion to the relative weight that part A and part B benefits represent of the total actuarial value of Medicare benefits.

Senate Bill

The Medicare statute would be amended by adding a new Section 1860E-6 which establishes the Home Health Agency Value-Based Purchasing Program. In 2008 and in subsequent years, the Secretary would make value-based payments to those home health agencies that, based on data submitted under the quality measurement system, have either substantially improved quality of care over the prior year, or exceed a threshold established by the Secretary. A majority of the total amount available for value-based payments in any fiscal year would be paid to home health agencies that qualify for payments because they exceed a quality threshold. Starting in 2009 and in each subsequent year, the percentage of total value-based payments made to agencies that exceed the quality threshold would be greater than the percentage made in the previous year. To be eligible for a value-based payment, home health agencies would be required to submit the required quality data and attest that it is complete and accurate.

The total amount of value-based payments made in a year would equal the total funds available for such payments. The Secretary would determine the most appropriate method for making payments. Payments for a year would be required to be made no later than December 31 of the subsequent year. By January 1, 2008, the Secretary would be required to provide each home health agency with a description of how its payments for 2007 would have been affected had the value-based purchasing system been in effect that year.

Value-based payments would be made from Part A and Part B in the same proportion as payments for home health services are made.

Subsection (b).—Hospitals

(1) *Voluntary submission of hospital quality data*

Current Law

Each year, Medicare's operating payments to acute general hospitals are increased or updated by a factor that is determined, in part, by the projected annual change in the hospital market basket (MB). Congress establishes the update for Medicare's inpatient prospective payment system (IPPS) for operating costs, often several years in advance. An IPPS hospital will receive an operating update of the MB from FY2005 through FY2007 if it submits data on the 10 quality indicators established by the Secretary as of November 1, 2003. The Secretary will specify the form, manner, and time of the data submission. A hospital that does not submit data to the Secretary will receive an update of the MB minus 0.4 percentage points for the fiscal year in question. The Secretary will not take into account this reduction when computing the applicable percentage increase in subsequent years. For FY2008 and subsequent fiscal years, hospitals will receive an update of the MB.

Senate Bill

In FY2007 and subsequent years, an IPPS hospital that does not submit the required quality data would receive an update of the MB minus two percentage points. This reduction would only apply to the fiscal year in question. In FY2007 and subsequently, an IPPS hospital would be required to submit appropriate data necessary for a value-based purchasing system in the specified form, manner, and time of the data submission as determined by the Secretary. Procedures for making the data available to the public would be established. These procedures would be required to provide the hospitals with an opportunity to review the data before it is released to the public.

House Bill

Conference Agreement

(2) *Reduction in outlier payments in order to fund program*

Current Law

Outlier payments are intended to protect IPPS hospitals from the risk of financial losses associated with patients with exceptionally high costs or unusually long stays. Medicare cases qualify for outlier payments if they exceed a threshold or fixed loss amount that is established each year. As directed by statute, the total amount of any outlier payments for any year should equal no less than 5 percent nor more than 6 percent of total projected operating diagnosis related group (DRG) payments. Outlier payments are financed by a reduction in the national average standardized amount, typically set at 5.1 percent.

Senate Bill

Outlier payments would be established as no less than 5 percent and no more than 6 percent for fiscal years prior to 2007. In FY2007, outlier payments would be established as no less than 4 percent and no more than 5 percent. In FY2008, outlier payments would be established as no less than 3.75 percent and no more than 4.75%. In FY2009, outlier payments would be established as no less than 3.5% and no more than 4.5 percent. In FY2010, outlier payments would be established as no less than 3.25 percent and no more than 4.25 percent. In FY2011 and in subsequent years, outlier payments would be established as no less than 3% and no more than 4%.

The Secretary would be directed to reduce the average standardized amount by certain percentages to fund outlier payments and the hospital value-based purchasing program. The reduction factor will be equal to a calculation where the numerator is the sum of the additional outlier payments (as discussed in the preceding paragraph) plus a specified percentage of total projected DRG prospective payment rates divided by the total projected DRG prospective payment rates. The specific percentages would be 0 percent for fiscal years prior to 2007, 1 percent in FY2007, 1.25 percent in FY2008, 1.5 percent in FY2009, 1.75 percent in FY2010, and 2 percent in FY2011 and in subsequent years.

(3) *Value-based purchasing demonstration program for critical access hospitals*

Current Law

No provision.

Senate Bill

The Secretary, within six months from enactment, would be required to establish a

two-year value-based payment demonstration program at six representative CAHs, using such funds as are necessary from the Part A trust fund. The Secretary would be required to report to Congress with recommendations within six months of completing the demonstration.

Subsection (d)—Plans

(1) *Submission of quality data*

Current Law

Each Medicare Advantage (MA) organization has an ongoing quality improvement program. MA private fee-for-service plans, MSA plans and Medicare cost reimbursement plans are exempt from this requirement. Each MA organization collects, analyses and reports health outcomes and quality data. The quality improvement program for local preferred provider organizations only applies to providers that have contracts with the organization. The Secretary can collect only the types of data that were collected by the Secretary as of November 1, 2003. The Secretary can collect other types of data only after consulting with MA organizations and private accrediting bodies, and submitting a report to Congress.

Senate Bill

Beginning on or after January 1, 2006, the Secretary would also collect data necessary for the plan value-based purchasing program (Section 1860E-4). The Secretary would establish requirements for MA private fee-for-service plans and cost reimbursement plans with respect to the collection, analysis and reporting of data on health outcomes and quality. The Secretary would establish procedures for making health outcomes and quality data available to the public in a clear and understandable form. Prior to the data being made public, the Secretary would ensure that an MA organization has the opportunity to review the data for the plans it offers. The Secretary may change the type of data collected for the value-based purchasing program after complying with requirements for the development, update and implementation of the program.

The Secretary would take into account the data reporting requirements that plans must comply with under other federal and state programs and in the commercial market when establishing a time frame for data reporting requirements under the new program.

(2) *Reduction in payments to organizations in order to fund program*

Current Law

No provision.

Senate Bill

For those providers included in the value-based program, including reasonable cost contracts, the monthly payment to plans would be reduced by 1% in 2009, 1.25% in 2010, 1.5% in 2011, 1.75% in 2012, and 2.0% for 2013 and each subsequent year. These reductions would not have any effect on determining whether the risk adjusted benchmark exceeds a plan's risk adjusted bid, or the amount of the difference.

House Bill

No provision.

Conference Agreement

(3) *Requirements for reporting on use of value-based payments*

Current Law

No provision.

Senate Bill

Beginning on or after January 1, 2011, MA plans would submit information describing how the organization will use any value-based payments received under the program. This information would be submitted by plans at the same time they submit plan bids. Beginning in 2010, not later than July 1 of each year, any reasonable cost reimbursement contract that received a value-based payment would submit a report to the Secretary describing how the organization will use the value-based payment.

House Bill

Conference Agreement

Subsection (1) Home Health Agencies

Value-based purchasing program for home health agencies

Current Law

No provision.

Senate Bill

In 2007 and subsequent years, a home health agency that does not submit to the Secretary the required quality data would receive an update of the market basket minus two percentage points. This reduction would only apply to the fiscal year in question. For 2007 and subsequently, each home health agency would be required to submit data necessary for a value-based purchasing system in the form, manner, and time period specified by the Secretary. Procedures for making the data available to the public would be established.

To fund the program, spending under the trust funds for home health services would be reduced by a percent applied to the standard prospective payment amount made to all agencies that comply with the data submission requirements. The percent reduction would be 1 percent in 2008, 1.25 percent in 2009, 1.5 percent in 2010, 1.75 percent in 2011, and 2 percent in 2012 and subsequent years.

House Bill

No provision.

Conference Agreement

See Section 5201 of the Conference Agreement.

Subsection (g) Skilled Nursing Facilities

(1) *Requirement for skilled nursing facilities to report functional capacity of medicare residents upon admission and discharge*

Current Law

Medicare law requires nursing homes to conduct a comprehensive, accurate, standardized, reproducible assessment of each resident's functional capacity. Under the law, this assessment must describe the resident's capability of performing daily life functions and significant impairments in functional capacity and be based on a uniform minimum data set specified by the Secretary, or specified by the state with the Secretary's approval. If specified by a state, it must be consistent with the minimum data set of core elements, common definitions, and utilization guidelines.

As a result, the Minimum Data Set (MDS), designed by the Secretary, consists of a core set of screening, clinical and functional status elements, including common definitions and coding categories which form the foundation of the comprehensive assessment for all residents of long-term care facilities certified to participate in Medicare or Medicaid. The items in the MDS standardize commu-

nication about resident problems and conditions within facilities, between facilities, and between facilities and outside agencies. MDS is designed to facilitate and standardize resident assessments, which are structured, problem-oriented frameworks for organizing MDS information, and examining additional clinically relevant information about an individual. These resident assessments help identify social, medical and psychological problems and form the basis for individualized care planning. MDS is also used as a data collection tool to classify Medicare and Medicaid residents into the Resource Utilization Groups (RUG-III). The RUG-III Classification system is used in the PPS for nursing facilities, hospital swing bed programs, and in many State Medicaid case mix payment systems to group residents into similar resource usage categories for the purposes of reimbursement.

In general, MDS resident assessments are conducted on the 5th, 14th, 30th, 60th, and 90th days of post-hospital SNF care. SNFS also conduct other assessments that may be needed to account for changes in patient care needs.

Senate Bill

This provision would amend section 1819(b) of the Social Security Act by adding a requirement that on or after October 1, 2006, a SNF would be required to submit a report to the Secretary on the functional capacity of each resident who is entitled to SNF benefits at the time of his or her admission and discharge. This report would be required to be submitted within 10 days of the admission or discharge as the case may be.

House Bill

No provision.

Conference Agreement

No provision.

(2) *Voluntary submission of skilled nursing facility data*

Current Law

As described above, the MDS submitted to CMS by states is intended to provide information on the quality of care provided to residents in SNFs. In recent years, CMS has attempted to make available additional quality measures. CMS posts data on nursing home's care records from complaint surveys, staffing levels, and number and types of residents, facility ownership and 15 quality measure scores on a website entitled Nursing Home Compare. This site is available to the public and is intended to assist individuals in choosing a Medicare- and Medicaid-certified nursing home by state, county, city, zip code, or by facility name. Additional research into the development of quality measures, staffing, and best practices is currently underway through CMS contracts with Quality Improvement Organizations (QIOs).

Senate Bill

This provision would also require SNFs to submit quality data for the measurement of health outcomes and other indices of quality to the Secretary for FY 2009 and each subsequent fiscal year. Data required would be determined by the Secretary after conducting a study in consultation with certain nationally recognized quality measurement entities, researchers, health care provider organizations, and other appropriate groups and consult with, and take into account, recommendations of, the entity that the Secretary has an arrangement with based on criteria specified in section 6110(e) of this bill. The Secretary would also be required to consult with entities that have joined together to develop strategies for quality measurement and reporting, including the feasibility of collecting and reporting meaningful data on quality measures and that involve representatives of health care providers, health

plans, consumers, employers, purchasers, quality experts, government agencies, and other individuals and groups that are interested in quality of care.

For FY 2009 and each subsequent year, SNF market basket percentage changes would be reduced by two percentage points for SNFs that do not submit this data. Such reductions would apply only with respect to the fiscal year involved and the Secretary would be prohibited from taking into account a reduction in the Federal per diem rate.

The Secretary would be required to establish procedures for making this data available to the public in a clear and understandable form. Such procedures would be required to ensure that a facility has the opportunity to review the data that is made public with respect to the facility prior to such data being made public.

TITLE VI—MEDICAID AND SCHIP

Subtitle A—Medicaid

Chapter 1—Payment for Prescription Drugs

Federal Upper Payment Limit for Multiple Source Drugs and Other Drug Payment Provisions (Section 6001 of the Conference Agreement, Section 6001 of the Senate Bill, and Section 3101 of the House Bill)

a. Modification of federal upper payment limit for multiple source drugs; definition of multiple source drugs

Current Law

States set the amounts to pay pharmacies for outpatient prescription drugs provided to Medicaid enrollees. States pay those amount to pharmacies and then seek reimbursement of the federal share of those payments. Federal reimbursements to states for state spending for certain outpatient prescription drugs are subject to ceilings called federal upper limits (FULs). The FUL applies, in the aggregate, to payments for multiple source drugs—those that have at least three therapeutically equivalent drug versions. The Centers for Medicare and Medicaid Services (CMS) calculates the FUL to be equal to 150 percent of the published price for the least costly therapeutic equivalent. The published prices that CMS uses as a basis for calculating the FULs are the lowest of the average wholesale prices (AWP) for each group of drug equivalents. Brand name drugs are subject to an upper limit equal to the amount that pharmacists must pay to acquire the drug (the acquisition cost) as estimated by the states.

Pharmaceutical manufacturers whose drugs are available to Medicaid beneficiaries must provide state Medicaid programs with rebates. Rebates are calculated based on the average manufacturer's price (AMP) of each product, and for certain other products, the best price at which the manufacturers sell the drug. The AMP is defined as the average price paid to a manufacturer by wholesalers for drugs distributed to retail pharmacies. Certain federal drug purchases as well as several other specific kinds of sales are exempt from the AMP and from the best price calculation. Sales at prices that are "nominal" in amount are excluded from the computation of best price. CMS defines nominal prices to be those that are below 10 percent of the AMP.

Senate Bill

The Senate bill would specify that FULs for multiple source drugs provided in pharmacies that are not critical access pharmacies would be calculated to be equal to 115

percent of the weighted AMP for those drugs. The FULs for multiple source drugs provided in critical access pharmacies would be calculated to be equal to the lesser of 140 percent of the AMP or the wholesale acquisition cost (WAC) for the drug. The bill would establish FULs for single source drugs. For those single source drugs provided in pharmacies that are not critical access pharmacies, the FUL would be calculated to be equal to 105 percent of the AMP. FULs for those single source drugs provided in critical access retail pharmacies would be calculated to be equal to the lesser of 108 percent of the AMP or the WAC for the drug.

Exceptions to the FUL would be for drugs sold during an initial sales period in which data on sales for the drug are not sufficiently available from the manufacturer to compute the AMP or the weighted AMP, and for drugs for which alternatives would not be as effective. For drugs sold during an initial sales period, the Senate bill would establish a transitional upper payment limit to apply only during such period. For a period not to exceed 2 calendar quarters, the upper limit for single source drugs would be calculated to be equal to the wholesale acquisition cost (WAC) for the drug. The bill would define WAC—the definition would be identical to the current law Medicare definition. For first non-innovator multiple source drugs, the upper limit during the transition period would be equal to the AMP for the single source drug rated as therapeutically equivalent minus 10 percent. For subsequent non-innovator multiple source drugs, if the Secretary has sufficient data to determine AMP, the FUL during the transition period would be equal to the weighted AMP for the therapeutically equivalent and bioequivalent form of the drug. If the Secretary does not have sufficient data, the FUL would be the AMP for the single source drug that is therapeutically equivalent and bioequivalent minus 10 percent.

In the case of an innovator multiple source drug that a prescribing health care provider determines is necessary for treatment of a condition and that a non-innovator multiple source drug would not be as effective for the individual or would have adverse effects for the individual or both, and for which the provider obtains prior authorization in accordance with the states' program, the upper payment limit for the innovator multiple source drug shall be equal to 105 percent of the AMP for such drug.

The Secretary would be required to update FULs on a quarterly basis, taking into account the most recent data collected for the purposes of determining such limits and the FDA's most recent publication of "Approved Drug Products with Therapeutic Equivalence Evaluations."

The Senate FUL provisions would become effective on the later of January 1, 2007 or the date that is 6 months after the close of the first regular session of the State legislature that begins after the date of enactment.

The Senate bill would establish interim FULs to apply during calendar year 2006, before the new FULs become effective. During the period January 1, 2006 through the effective date of the FUL provisions, the Secretary would apply the FUL as under current law and regulations except that instead of limiting federal matching to 150 percent of AWP, it would be limited to 125 percent of AWP. In the case of covered outpatient drugs that are marketed as of July 1, 2005 and are subject to FULs under current law, the Secretary would be required to use the AWP, direct prices, and WACs as of that date to calculate the applicable FUL. New drugs first marketed between July 1, 2005 and January 1, 2007 would be subject to this interim FUL calculation.

House Bill

The House bill would specify that the FUL for the ingredient cost of a multiple source drug would be equal to 120 percent of the volume weighted average RAMP for that drug. The bill would establish upper limits for single source drugs as well. The FUL for the ingredient cost of a single source drug would be equal to the 106 percent of the RAMP for that drug. A drug product that is a single source drug and that becomes a multiple source drug would continue to be treated as a single source drug, with respect to the applicable FUL, until the Secretary determines that there is sufficient data to compile the volume weighted average RAMP.

The House bill would provide the Secretary with an option to develop an alternative methodology setting the FUL based on the most recently reported retail survey price instead of a percentage of RAMP or the volume weighted average RAMP. The House bill would allow the Secretary to use this methodology, in 2007, for a limited number of covered outpatient drugs, including both single source and multiple source drugs selected to be representative of the classes of drugs dispensed under Medicaid.

The House bill provides exceptions to the FULs for drugs sold during an initial sales period and for drugs dispensed by specialty pharmacies. For those drugs sold during an initial sales period for which data for computation of the RAMP may not be available, the House bill includes a provision similar to the Senate provision, except it would apply only to single source drugs sold during the initial sales period and the provision does not include any specification for first innovator multiple source drugs. The bill includes a definition of WAC, to be used during the initial sales period, that is identical to the definition of WAC in the Senate bill. The House bill would also allow a state to elect not to apply the new FUL to covered outpatient drugs dispensed by specialty pharmacies, such as those that dispense only immunosuppressive drugs, as defined by the Secretary, or drugs administered by a physician in a physician's office.

The House bill would require the Secretary to update the FULs at least on a quarterly basis. Otherwise, the provision regarding FUL updates is identical to the Senate provision.

The effective date for the House FUL provisions would be on the later of January 1, 2007 or the date that is 6 months after the close of the first regular session of the state legislature that begins after the date of enactment of this Act.

The House bill would provide the Secretary with the authority to delay the implementation of the new FUL limits for a period of not more than 1 year, if the Comptroller General finds that the estimated average payment amount to pharmacies for covered outpatient drugs under the new FULs are below the average prices paid by pharmacies for acquiring such drugs. If the Secretary delays the implementation of the FULs then the Secretary would be required to transmit to Congress, prior to the termination of the period of delay, a report containing specific recommendations for legislation to establish a more equitable payment system.

The House bill would clarify that the FULs would not affect maximum allowable cost limits as established by states and rebates would continue to be paid without regard to whether or not states' payments are subject to such a limit. In addition, it would prohibit administrative and judicial reviews of the Secretary's determinations of FULs, RAMPs, volume weighted average RAMPs including the:

- assignment of National Drug Codes to billing and payment classes;

- Secretary's disclosure to states of AMP, RAMP, volume weighted average RAMP, and retail survey prices;
- determinations by the Secretary of covered outpatient drugs dispensed by specialty pharmacies or administered in physicians' offices;
- contracting and calculations under these provisions; and
- methods of allocating rebates, chargebacks, or other price concessions if specified by the Secretary.

The House bill would require the Comptroller General of the U.S. to provide a report to Congress no later than nine months after the date of enactment on the appropriateness of payment levels to pharmacies for dispensing fees under the Medicaid program and on whether the estimated average payment amounts to pharmacies for covered outpatient drugs under the new FUL method are below the average prices paid by pharmacies for acquiring such drugs. The bill would also require the Inspector General of HHS to provide a report to Congress, no later than two years after the date of enactment, on the appropriateness of using RAMP and retail survey prices rather than the AMP or other price measures, as the basis for establishing a FUL for reimbursement of outpatient drugs under Medicaid.

Conference Agreement

The conference agreement applies FULs to multiple source drugs for which the FDA has rated 2 or more products to be therapeutically and pharmaceutically equivalent. For those drugs, the FUL would be equal to 250% of the average manufacturer price computed without regard to prompt pay discounts for the lowest cost drug. Effective January 1, 2007.

The agreement modifies the definition of multiple source drug so that a drug qualifies as a multiple source drug if there is at least one other drug sold and marketed during the period that is rated as therapeutically equivalent and bioequivalent to it.

b. Disclosure of price information to states and the public

Current Law

AMP and best price data are required to be reported by manufacturers to CMS no later than 30 days after the date of entering into a rebate agreement and then no later than 30 days after the last day of each rebate period. Those prices are required to be kept confidential except for the purpose of carrying out the requirements of Medicaid rebates, or to permit the Comptroller General and the Director of the Congressional Budget Office to review the information.

Senate Bill

The Senate bill would modify the confidentiality requirements to allow states access to reported price information and would require the Secretary to make available to states, beginning with the first quarter of FY2006, the most recently reported AMP and weighted AMPs. The Secretary would be required to devise and implement a means of electronic distribution for these prices to state Medicaid agencies.

House Bill

The House bill would modify the confidentiality requirements to allow states access to reported price information. In addition, the bill would require the Secretary to devise and implement a means for electronic distribution to state Medicaid agencies, of retail survey prices.

Conference Agreement

The conference agreement would increase the required reporting of AMP and best prices. AMP would be reported and calculated on a monthly basis. In addition, the

agreement allows states to have access to reported AMP data for multiple source drugs for the purpose of carrying out the Medicaid programs and would require the Secretary to disclose such information through a website accessible to the public. In addition, the provision requires the Secretary to provide AMPs to States on a monthly basis and to update information posted to the website on at least a quarterly basis.

c. Definition of average manufacturer price

Current Law

The AMP is defined as the average price paid to a manufacturer by wholesalers for drugs distributed to retail pharmacies. CMS instructs manufacturers to exclude certain federal drug purchases as well as free goods from the computation of AMP. Sales at nominal prices are excluded from the best price computation. Manufacturers are required to report, for each rebate period, the AMP for all Medicaid covered outpatient drug products and the best price for single source and innovator multiple source drugs to CMS.

Senate Bill

The Senate bill would modify the definition of AMP and require the modified AMP to be used to calculate the FUL for single source drugs in addition to rebates, as under current law. The provision would specify that sales exempted from inclusion in the determination of best price, nominal price sales (except for those contingent on purchase requirements or agreements), and bona fide service fees would be exempted from the computation of the AMP. Computation of AMP would include cash and volume discounts; nominal price sales contingent on a purchase agreement or requirement; free goods; chargebacks or rebates to a pharmacy (excluding mail order, nursing home pharmacies and pharmacy benefit managers), or any other direct or indirect discounts; and any other price concessions which may be based on recommendations of the Inspector General of HHS. Bona fide user fees would be defined as expenses for a service actually performed by an entity for a manufacturer that would have generally been paid for by the manufacturer at the same rate had these services been performed by another entity.

The Senate bill would define the weighted AMP, to be used in calculating the FUL for multiple source drugs, with respect to the rebate period, as the volume-weighted average of manufacturers' reported prices for all drug products that are therapeutically equivalent and bioequivalent. It would be computed by summing, for all therapeutic equivalents and bioequivalent forms of the drug, the products of the AMP and the number of units sold. The sum of those amounts would be divided by the sum of all units sold for all NDCs assigned to such products. In cases in which there is a lag in the reporting of information on rebates and chargebacks so that adequate data are not available on a timely basis to update the weighted AMP for a multiple source drug, the manufacturer of such drug would apply a methodology based on a 12-month rolling average to estimate costs attributable to rebates and chargebacks for such drugs. For years after 2006, the Secretary would be required to establish a uniform methodology to estimate and apply such costs.

The Senate bill would modify the existing price reporting requirements so that manufacturers would be required to report the modified AMP and the weighted AMP to the Secretary of CMS as well as information and data on any sales made during the reporting period at a nominal price. The bill would provide the Secretary with the authority to enter into contracts with appropriate enti-

ties to determine AMP, prices, volume, and other data necessary to calculate the FUL and payment limits for covered drugs.

The Senate modifications to the definition of AMP would become effective as if enacted on July 1, 2005 except for the provisions related to the exclusion of nominal prices from AMP. Those provisions would become effective on the later of the expiration date of a contract in effect on the date of enactment or October 1, 2006 and would apply to sales made and rebate periods beginning on or after that date.

House Bill

The House bill would not change AMP. Instead it would establish a measure of price referred to as RAMP for the purpose of calculating the FUL for single source drugs. RAMP would be defined as the average price paid to a manufacturer for the drug in the U.S. in the quarter by wholesalers for drugs distributed to retail pharmacies, excluding service fees. For this purpose, retail pharmacies would be defined to exclude mail-order only pharmacies and pharmacies at nursing facilities and homes. Specified items to be excluded from RAMP are similar to those to be excluded from AMP in the Senate bill except that the House bill allows the Secretary to define nominal sales, and free goods contingent on purchase requirements would not be excluded from RAMP. In addition, service fees that represent fair market value for a bonafide service provided by the entity would be excluded from RAMP. Items to be included in RAMP are also similar to those included in AMP in the Senate bill except that RAMP includes free goods contingent upon a purchase requirement; and does not provide for an exception for mail order, nursing home pharmacies and pharmacy benefit managers.

The volume weighted average RAMP would be defined, for all drug products in the same multiple source drug billing and payment code (or other methodology as specified by the Secretary), as the volume weighted average of the reported RAMPs. It would be computed by summing the products of the RAMPs for all product with an NDC code and multiplying by the total number of units of the drug product sold. Those amounts would be summed together and divided by the total number of units sold for all NDC codes assigned to such products.

The House bill would establish reporting requirements of drug manufacturers. Manufacturers would be required, beginning after July 1, 2006, to submit the RAMP, the total number of units required to compute the volume weighted average RAMP, the WAC for drugs sold during an initial sales period, and information on nominal price sales. The reporting would be by National Drug Code (NDC). In addition, the bill would provide the Secretary with the authority to enter into contracts with appropriate entities to determine RAMPs and other data necessary to calculate the FULs and payment limits and would modify the confidentiality provisions allowing states access to reported price information.

Conference Agreement

The conference agreement amends the definition of AMP to exclude customary prompt pay discounts extended to wholesalers from those amounts. In addition, the agreement modifies the price reporting requirements so that manufacturers would be required to submit, not later than 30 days after the last day of each rebate period, the customary prompt pay discounts extended to wholesalers in addition to the AMP and best price reporting required under current law.

The conference agreement requires the Inspector General of the Department of Health and Human Services (HHS) to, no later than

June 1, 2006, review the requirements for, and the manner in which AMP is determined and to submit to the Secretary and Congress any recommendations for changes as determined to be appropriate.

The agreement also requires the Secretary of HHS to promulgate a regulation clarifying the requirements for and the manner in which AMPs are to be determined, taking into consideration the recommendations of the Inspector General.

d. Exclusion of sales at a nominal price from determination of best price

Current Law

In addition to the AMP, pharmaceutical manufacturers are required to report to the Secretary of HHS the "best price" at which the manufacturer sells each of its drug products to certain purchasers for the purpose of calculating the rebate amounts. Prices that are nominal in amount are excluded from best price reporting. Nominal prices are defined by CMS to be those that are below 10% of the average manufacturer's price.

Senate Bill

The Senate bill would exclude, for the purposes of computing the AMP, sales by a manufacturer of covered outpatient drugs that are single source, innovator multiple source drugs, or are authorized generics that are made available at nominal prices to the following listed entities: (a) entities eligible for discounted prescription drug prices under Section 340(B) of the Public Health Service Act; (b) intermediate care facilities for the mentally retarded, (c) state-owned or operated nursing facilities, (d) any other facility or entity that the "Secretary determines is a safety net provider to which sales of such drugs at nominal prices would be appropriate based on the type of facility, the services it provides, the patients served and the number of other such facilities eligible for nominal pricing in the area. The nominal price limitations would not apply to nominal drug purchases pursuant to a master agreement for procurement of drugs on the Federal Supply Schedule. In addition, the bill would modify manufacturers' price reporting requirements to include, for calendar quarters beginning on or after January 1, 2006 information on sales made at a nominal price.

House Bill

The House bill would exclude, for the purpose of computing the RAMP, sales as the Secretary identifies, that are nominal in amount. In addition, the bill would modify manufacturers' price reporting requirements to include, for calendar quarters beginning on or after July 1, 2006 information on sales made at a nominal price.

Conference Agreement

The conference agreement modifies the manufacturer price reporting requirements so that for calendar quarters beginning on or after January 1, 2007, manufacturers would be required to report information on sales of Medicaid covered drugs that are made at a nominal price.

In addition, the agreement defines the sales are to be considered nominal for the purpose of reporting nominal price sales and for computing and reporting the best price. (The agreement does not amend the AMP vis-a-vis nominal prices.) Nominal sales are those made by a manufacturer of covered drugs at nominal prices to (a) entities eligible for discounted prescription drug prices under Section 340(B) of the Public Health Service Act; (b) intermediate care facilities for the mentally retarded, (c) state-owned or operated nursing facilities, (d) any other facility or entity that the Secretary determines is a safety net provider to which sales of such drugs at nominal prices would be ap-

propriate based on the type of facility, the services it provides, the patients served and the number of other such facilities eligible for nominal pricing in the area. The nominal price limitations do not apply to nominal drug purchases pursuant to a master agreement for procurement of drugs on the Federal Supply Schedule.

e. Retail survey prices; state payment and utilization rates; and performance rankings.

Current Law

No provision.

Senate Bill

No provision.

House Bill

The House bill would allow the Secretary to contract with a vendor to obtain retail survey prices for Medicaid covered outpatient drugs that represent a nationwide average of pharmacy sales costs for such drugs, net of all discounts and rebates. Such a contract would be awarded for a term of 2 years.

The Secretary would be required to competitively bid for an outside vendor with a demonstrated history in surveying and determining on a representative nationwide basis, retail prices for ingredient costs of prescription drugs; working with retail pharmacies, commercial payers, and states in obtaining and disseminating price information; and "Collecting and reporting price information on at least a monthly basis. The contract would include the terms and conditions specified by the Secretary and would include a requirement that the vendor monitor the marketplace and report to the Secretary each time there is a new covered outpatient drug available nationwide; update the Secretary no less often than monthly on the retail survey prices for multiple source drugs and on the computed upper payment limit for those drugs; to independently confirm retail survey prices. Information on the retail survey prices obtained through this process, including information on single source drugs would be required to be provided to states on an ongoing and timely basis.

Conference Agreement

The conference agreement includes a provision similar to the House provision. The agreement allows the Secretary to contract for services for the determination of retail survey prices for covered outpatient drugs that represent a nationwide average of consumer purchase prices for such drugs. The conference agreement adds a provision allowing such a contract to include notification of the Secretary when a drug product that is therapeutically and pharmaceutically equivalent and bioequivalent becomes generally available. The vendor must update the Secretary no less often than monthly on the retail survey prices for covered outpatient drugs. The contract shall be effective for a term of two years. If the Secretary were to be notified that such a product has become generally available, the Secretary would be required to make a determination within 7 days as to whether the drug meets the definition of a multiple source drug subject to the application of the FUL. The agreement allows the Secretary to waive those provisions the Secretary determines are appropriate to waive, of the Federal Acquisition Regulation, for the efficient implementation of the contract.

The agreement does not require the contractor to independently confirm retail survey prices, as in the House bill, and does not require the Secretary to provide for electronic distribution to states. On the other hand, the Secretary would be required to devise and implement a means for providing access to each state Medicaid agency of col-

lected price information and to provide information on retail survey prices, including information on single source drugs, to states at least monthly.

The agreement requires an annual report from each state agency. States are required to provide to the Secretary, the payment rates for all covered drugs, dispensing fees and utilization of innovator multiple source drugs under the state Medicaid plan. The Secretary is required to compare, on an annual basis, for the 50 most widely prescribed drugs, the national retail sales price data for each state. In addition, the Secretary is required to submit full information regarding the annual rankings to Congress. The provision becomes effective on January 1, 2007.

(f) Miscellaneous amendments

Current Law

States are required to have in place a program of prospective drug review wherein before each prescription is filled, the use of the prescription is screened for potential drug therapy problems. The requirement includes language clarifying that nothing in the provision is intended to require a pharmacist to provide this consultation when a beneficiary refuses such a consultation.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

The conference agreement clarifies that the requirement to provide prospective drug reviews is not intended to require verifications that consultations were offered or refused.

Effective on the date of enactment.

Senate Bill

Conference Agreement

Unless otherwise specified, the provisions in Section 6001 take effect on January 1, 2007, without regard to whether or not final regulations to carry out such amendments have been promulgated by such date.

Collection and Submission of Utilization Data for Certain Physician Administered Drugs (Section 6002 of the Conference Agreement, Section 6004 of the Senate Bill, and Section 3102 of the House Bill)

Current Law

Manufacturers are required to provide rebates to states for all outpatient prescription drugs with some exceptions. Outpatient prescription drugs provided through managed care organizations are explicitly exempted from the rebate requirement. In addition, outpatient drugs dispensed by a hospital and billed at no more than the hospital's purchasing costs are exempt from the rebate requirement. Certain drugs administered by physicians in their offices or in another outpatient setting, such as chemotherapy, have often been excluded from the drug rebate program although there is no specific statutory exclusion. This is because providers use Healthcare Common Procedure Coding System (HCPCS) J-codes to bill the Medicaid program for injectable prescription drugs, including cancer drugs. The HCPCS J-codes do not, however, provide States with the specific manufacturer information necessary to enable them to seek rebates. The NDC number is necessary for the state to bill manufacturers for rebates. CMS has requested that states identify Medicaid drugs,

specifically those using HCPCS J-codes, by their NDC codes so that rebates can be collected for these drugs (Letter to State Medicaid Director, SMDL #03-002, dated March 14, 2003). CMS has concluded that because of this coding, many state Medicaid programs have not collected rebates on these drugs, resulting in millions of dollars in uncollected rebates.

Senate Bill

As a condition of receiving Medicaid payment, states would be required to submit, to the Secretary of HHS, utilization data and coding information for physician administered outpatient drugs. The Secretary would determine the drugs for which such reporting information would be required. The reporting would include J-codes and National Drug Code numbers. The purpose of the reporting would be to allow the Secretary to secure rebates for such drugs.

Effective upon enactment.

House Bill

As a condition of receiving Medicaid payment, and in order to secure rebates for physician administered drugs states would be required to submit:

—No later than January 1, 2006, utilization data and coding information for single source drugs or biologicals that are physician administered outpatient drugs. The Secretary would determine the drugs for which such reporting information would be required.

—No later than January 1, 2007, utilization data and coding information by NDC (unless the Secretary identifies an alternative coding system) for multiple source drugs.

—No later than January 1, 2008, utilization and coding information for those drugs on the list of 20 high volume physician administered drugs.

—No later than January 1, 2007, the Secretary would be required to publish a list of the 20 physician administered multiple source drugs that have the highest volume of physician administered dispensing under Medicaid. The Secretary would be able to modify such list from year.

The Secretary would be permitted to delay the application of the reporting requirements in the case of a State to prevent hardship to States that require additional time to implement such a reporting system.

Conference Agreement

The agreement includes a provision similar to the House provision. For drugs administered on or after January 1, 2006, states are required to provide for the collection and submission of utilization and coding information for each Medicaid single source drug that is physician administered. For drugs administered on or after January 1, 2008, states are required to provide for the collection and submission of utilization and coding information for each Medicaid multiple source drug that is physician administered. Submissions from states will be based on National Drug Codes unless the Secretary specified an alternative coding system. All other provisions are identical to the House bill.

Improved Regulation of Drugs Sold Under a New Drug Application Approved Under Section 505(c) of the Federal Food, Drug, and Cosmetic Act (Section 6003 of the Conference Agreement, Section 6003 of the Senate Bill, and Section 3103 of the House Bill)

Current Law

Prescription drug manufacturers participating in the Medicaid program are required to report, to the Secretary of HHS, the AMP for each pharmaceutical product offered under Medicaid and, for each brand name drug product, the best price available to any wholesaler, retailer, provider, health mainte-

nance organization (HMO), nonprofit entity, or governmental entity. The term 'best price' is defined in the Medicaid statute but only with respect to single source and innovator multiple source drugs since the best price is part of the rebate computation for only those drugs. These reported prices are used to calculate rebates—which are generally calculated separately for brand name drug products and for generics.

Sometimes manufacturers produce both a brand name version of a prescription drug and also sell or license a second manufacturer (or a subsidiary) to produce some of the same product to be sold or re-labeled as a generic. These generics, called "authorized generics," are subject to a separate rebate calculation. Rebates for brand name products, take into account the best price reported for each drug. Such price often does not include the price of the product sold as the authorized generic.

Current law defines best price with respect only to a single source drug or innovator multiple source drug, as the lowest price available from the manufacturer during the rebate period to any wholesaler, retailer, provider, HMO, nonprofit entity, or governmental entity within the U.S. excluding prices charged to specified governmental purchasers. The AMP is defined as the average price paid to a manufacturer by wholesalers for drugs distributed to retail pharmacies. Certain federal drug purchases as well as several other specific kinds of sales are exempt from the AMP and from the best price calculation.

Senate Bill

The Senate bill would modify the existing drug price reporting requirements to include, for single source drugs, innovator multiple source drugs, authorized generic drugs, and any other drugs sold under a new drug application approved (under Section 505c of the Federal Food, Drug and Cosmetic Act, FDCA) by FDA, both the average manufacturer's price and the manufacturer's best price for such drugs. An authorized generic drug would be defined as a listed drug that has been approved by the FDA under Section 505(c) of such Act and is marketed, sold or distributed directly or indirectly to retail class of trade under a different labeling, packaging (other than repackaging the listed drug for use in institutions), product code, label code, trade name, or trade mark than the listed drug.

The definition of best price would be modified so that, in the case of a manufacturer that approves, allows or otherwise permits an authorized generic or any other drug to be sold under an NDA, it is inclusive of the lowest price such drug is sold to any wholesaler, retailer, provider, HMO, nonprofit or governmental entity. The definition of AMP would be modified to include, in the case of a manufacturer that approves, allows, or otherwise permits an authorized generic or any other drug of the manufacturer to be sold under an NDA to be inclusive of the average price paid for such drugs. The provision would become effective on January 1, 2006.

House Bill

The provision would modify the existing drug price reporting requirements for pharmaceutical manufacturers. No later than 30 days after the last day of each rebate period, manufacturers would be required to report,

- for each covered outpatient drug, including those sold under a new drug application approved by the FDA, the average manufacturer's price for such drugs; and,
- for single source drugs, innovator multiple source drugs, and any other drug sold under a new drug application approved by the FDA, the manufacturers best price for

such drugs during the applicable rebate period.

Not later than 30 days after the date of entering into a drug rebate agreement, manufacturers would be required to report on the average manufacturer price for each of the manufacturer's covered outpatient drugs, including those sold under a new drug application approved by the FDA.

The definition of best price would be changed to apply, not only to each single source drug and innovator multiple source drug, but also to drugs sold under a new drug application (NDA) approved by (under Section 505c of FDCA) FDA. In addition, the definition would be modified so that the best price, in the case of a manufacturer that approves, allows or otherwise permits an authorized, generic or any other drug of the manufacturer to be sold under an NDA, is inclusive of the lowest price such authorized generic or other drug is sold to any wholesaler, retailer, provider, HMO, nonprofit or governmental entity except for those entities excluded under current law. The provision would modify the current law definition of AMP to include, in the case of a manufacturer that approves, allows, or otherwise permits a drug of the manufacturer to be sold under an NDA to be inclusive of the average manufacturer price paid for such drugs. The provision would become effective on January 1, 2006.

Conference Agreement

The agreement includes a provision similar to the Senate provision. The provision is different from the Senate provision in that it does not refer to the affected drugs as "authorized generics". Instead, the agreement uses the phrase "any drug of the manufacturer sold under a new drug application approved under section "505(c) of the Federal Food, Drug, and Cosmetic Act" to include authorized generics. The conference agreement does not include a definition of "authorized generics." In addition, the definition of best price would be modified so that it is inclusive, in the case of a manufacturer that approves, allows, or otherwise permits any other drug of the manufacturer to be sold under a new drug application approved under section 505(c) of the FDCA, of the lowest price for an authorized drug available from the manufacturer during the rebate period to any manufacturer, wholesaler, retailer, provider, health maintenance organization, nonprofit entity, or governmental entity within the U.S. The effective date would be January 1, 2007.

Children's Hospital Participation in Drug Discount Program (Section 6004 of the Conference Agreement, no provision of the Senate Bill, and Section 3104 of the House Bill)

Current Law

Section 340(B) of the Public Health Service Act allows certain health care providers, including community health centers and disproportionate share hospitals, access to prescription drug prices that are similar to the prices paid by Medicaid agencies after being reduced by manufacturer rebates.

Senate Bill

No provision.

House Bill

The House bill would include a provision adding Children's Hospitals to the list of providers that may have access to 340(B) discounted prices. The provision would become effective for drugs purchased on or after the date of enactment.

Conference Agreement

The conference agreement includes the House provision.

Dispensing Fees (No provision in the Conference Agreement, Section 6001 of the Senate Bill, and Section 3101 of the House Bill)

Current Law

States are allowed to pay pharmacies reasonable dispensing fees.

Senate Bill

The Senate bill would require states to establish dispensing fees that are (a) greater for noninnovator multiple source drugs than those for innovator multiple source drugs that are therapeutically equivalent and bioequivalent; and (b) that take into account requirements established by the Secretary to include reasonable costs associated with a pharmacist's time checking an individual's coverage or performing quality assurance; measuring or mixing of a drug; filing the container; providing the completed prescription; delivery; special packaging; physical overhead and salaries of pharmacists and other pharmacy workers; geographic factors that impact costs; patient counseling; and drugs requiring specialty pharmacy management services.

The Senate bill would require, no later than 15 months after the date of enactment, with quarterly updates thereafter, the Secretary to establish a list of covered outpatient drugs requiring specialty pharmacy care management services. The list would include only those drugs for which the Secretary determines that access to the drug would be seriously impaired without the provision of such care management services. Specialty pharmacy care management services would be defined as those services provided in connection with the dispensing of a covered drug that requires:

- significant caregiver contact, education about the disease state, prevention, treatment, drug indications, benefits, risks, complications, pharmacy counseling and explanation;
- patient compliance services including coordination of provider visits with drug delivery, compliance with dosing regimen, mailing or telephone call reminders, compiling compliance data, assistance providers with compliance programs;
- tracking services, referral processes, screening referrals, and tracking patient weight for dosage.

In addition, the Senate bill would require states to consider, in establishing dispensing fees, the costs associated with operating a critical access retail pharmacy.

House Bill

The House bill would require states to pay a dispensing fee for each covered outpatient drug. States would be allowed to vary dispensing fees to take into account the special circumstances of pharmacies serving rural and underserved areas and sole community pharmacies. Dispensing fees for drugs defined as multiple source drugs under the FUL policy would be required to be no less than \$8 per prescription unit. The Secretary would be required to define what constitutes a prescription unit for this purpose.

Conference Agreement

No provision.

Increase in rebates for covered outpatient drugs (No provisions of the Conference Agreement, Sections 6001, 6002 and 6039D of the Senate Bill, and no provisions of the House Bill)

Current Law

Basic Medicaid rebates for single source and innovator multiple source drugs are equal to the greater of 15.1 percent of the AMP or the difference between the reported AMP and best price for each drug. In addition, if the prices of single source or inno-

vator multiple source drugs rise faster than inflation, additional rebates are due. Rebates for all other multiple source drugs is equal to 11 percent of the AMP.

Senate Bill

The Senate bill would modify the formulas for prescription drug rebates under the Medicaid program. Beginning on January 1, 2006, rebates for single source and innovator multiple source drugs would be equal to the greater of 18.1 percent of the AMP or the difference between the reported AMP and the best price for each drug. (Sections 6002(a)(3) and 6001(b)(2).)

Rebates for single source and innovator multiple source drugs equal to 17.8% of the AMP or the difference between the reported AMP and the best price for each drug. (Section 6039D.)

Rebates for all other drugs would be equal to 17%. Changes to the rebate formula would begin on January 1, 2006.

House Bill

No provision.

Conference Agreement

No provision.

Extension of rebates to Medicaid MCOs (No provisions of the Conference Agreement, Sections 6001 and 6038 of the Senate Bill, and no provisions of the House Bill)

Current Law

Rebates are not required for drugs dispensed by Medicaid managed care organizations (MCO) when the drugs are paid as part of the MCO capitation rate, to drugs provided in hospitals, and sometimes in physicians', or dentists' offices.

Senate Bill

Section 6001(a)(5) of the Senate bill would establish rebates for drugs dispensed by Medicaid MCOs. States would have the option of collecting rebates directly from manufacturers or allowing the MCO to collect the rebates in exchange for a reduction in the pre-paid payment made to the entity for Medicaid enrollees. The provision would become effective on the date of enactment and would apply to Medicaid rebate agreements entered into or renewed on or after that date.

Section 6038 would establish rebates for drugs dispensed by Medicaid MCOs except for those drugs purchased at discounted prices under the Public Health Service Act Sec. 340B drug discount program.

House Bill

No provision.

Conference Agreement

No provision.

Improving Patient Outcomes (No provision of the Conference Agreement, no provision of the Senate Bill, and Section 3105 of the House Bill)

Current Law

States may establish a prior authorization program as long as the system provides a response for a request for approval within 24 hours, and as long as the program allows for a dispensing of at least a 72 hour supply of a covered drug in an emergency situation. Other restrictions may be imposed if they are necessary to discourage waste, fraud or abuse.

Senate Bill

No provision.

House Bill

The provision would limit the ability of states to place atypical antipsychotic or antidepressant single source drugs on prior authorization lists imposing other restrictions unless a drug use review board has determined that doing so is not likely to harm patients or increase overall medical costs. It also would require states to pay for a 30 day

supply of such drugs in cases where a request for authorization is not responded to within 24 hours after the prescription is transmitted. The provision would be effective on January 1, 2007.

Conference Agreement

No provision.

Chapter 2—Long-Term Care Under Medicaid
SUBCHAPTER A—REFORM OF ASSET TRANSFER
RULES LENGTHENING LOOK-BACK PERIOD;
CHANGE IN BEGINNING DATE FOR PERIOD OF
INELIGIBILITY

Lengthening Look-back Period for all Dispositions to 5 years (Section 6011(a) of the Conference Agreement, no provision in the Senate Bill, and Section 3111(a) of the House Bill)

Current Law

Current law requires states to impose penalties on individuals who transfer assets (all income and resources of the individual and of the individual's spouse) for less than fair market value (an estimate of the value of an asset if sold at the prevailing price at the time it was actually transferred). Specifically, the rules require states to delay Medicaid eligibility for certain Medicaid long-term care services for individuals applying for care in a nursing home, and, at state option, for certain people receiving care in community-based settings, who have transferred assets for less than fair market value on or after a "look-back date." The "look-back date" is 36 months prior to application for Medicaid for income and most assets disposed of by the individual, and 60 months in the case of certain trusts.

Ineligibility for Medicaid coverage is limited to only certain long-term care services, not all services covered under the program. The services for which the penalty applies include nursing facility care; services provided in any institution in which the level of care is equivalent to those provided by a nursing facility; Section 1915(c) home and community-based waiver services; home health services; and personal care furnished in a home or other locations. States may choose to apply this ineligibility period to other state plan long-term care services. (They also currently apply to home and community care for functionally disabled elderly individuals under section 1929 of the Act. This is an optional coverage group which operates only in Texas.) In general, states do not extend the penalty to Medicaid's acute care services.

Senate Bill

No provision.

House Bill

The House bill would amend section 1917(c)(1)(B)(i) of the Social Security Act to lengthen the look-back date to 5 years, or 60 months, for all income and assets disposed of by the individual after this Act's date of enactment. For income and assets disposed of prior to the enactment date, the look back periods of 36 months for income and assets and 60 months for certain trusts would apply. The House bill would become effective on the date of the enactment of this Act.

Conference Agreement

The conference agreement includes the House provision.

Change in Beginning Date for Period of Ineligibility (Section 6011(b) of the Conference Agreement, no provision in the Senate Bill, and Section 3111(b) of the House Bill)

Current Law

The period of ineligibility, or penalty period, begins on the first day of the first month during or after which assets have been improperly transferred and which does

not occur in any other period of ineligibility. There is no limit to the length of the penalty period. Some penalties imposed on applicants who made improper transfers within the look-back period and prior to the date of Medicaid application may expire before the date of Medicaid application. For example, an improper transfer of \$100,000 made 2 years prior to Medicaid application could result in a 20-month penalty period (\$100,000 divided by the private rate for a nursing home state in a state of \$5,000). Since the individual applies to Medicaid two years, or 24 months, after having made the transfer, the penalty has already expired before the individual applies to Medicaid. However, if the transfer of \$100,000 is made one year prior to Medicaid application, the penalty of 20 months would not have expired before the applicant needed Medicaid coverage, but rather would continue for eight months after Medicaid application.

Senate Bill

No provision.

House Bill

The House bill would amend section 1917(c)(1)(D) of the Social Security Act by changing the start date of the ineligibility period for all transfers made on or after the date of the enactment, to the first day of a month during or before which assets have been transferred for less than fair market value, or the date on which the individual is eligible for Medicaid and is receiving certain long-term care services, whichever is later and which does not occur during any period of ineligibility as a result of an asset transfer policy. For transfers made prior to this Act's enactment, current law applies.

Conference Agreement

The conference agreement includes the House provision but specifies that the start date begins on the first day of a month during or after which assets have been transferred for less than fair market value, or the date on which the individual is eligible for Medicaid and would otherwise be receiving institutional level care based on an approved application for such care but for the application of the penalty period, whichever is later, and which does not occur during any period of ineligibility as a result of an asset transfer policy.

Effective Date (Sections 6011(c) of the Conference Agreement, no provision in the Senate Bill, and Section 3111(c) of the House Bill)

Current Law

Currently effective.

Senate Bill

No provision.

House Bill

The amendments made by this section would apply to transfers made on or after the date of enactment.

Conference Agreement

The conference agreement includes the House provision.

Availability of Hardship Waivers (Sections 6011(d) and (e) of the Conference Agreement, Section 6011(f) of the Senate Bill, and Sections 3111(d) and (e) of the House Bill)

Current Law

To protect beneficiaries from unintended consequences of the asset transfer penalties, current law requires states to establish procedures for not imposing penalties on persons who, according to criteria established by the Secretary, can show that a penalty would impose an undue hardship. CMS guidance specifies that undue hardship can occur when application of the penalty would deprive the individual of medical care so that

his or her health or life would be endangered, or when it would deprive the individual of food, clothing, shelter, or other necessities of life. The guidance explains that undue hardship does not exist when application of the penalty would merely cause the individual inconvenience or when it might restrict his or her lifestyle but would not put him or her at risk of serious deprivation.

CMS guidance requires that state procedures, at a minimum, provide for and discuss: (1) a notice to recipients that an undue hardship exception exists; (2) a timely process for determining whether an undue hardship waiver will be granted; and (3) a process under which an adverse determination can be appealed.

Senate Bill

The Senate bill would amend Section 1917(c) of the Social Security Act by adding a requirement that states establish undue hardship procedures (in accordance with standards specified by the Secretary) that would provide for: (1) a notice that an undue hardship exception exists before the imposition of a penalty period to an applicant for Medicaid who would be subject to such a penalty; (2) a timely process before the imposition of a penalty determining whether an undue hardship waiver will be granted for the individual; (3) a process under which an adverse determination can be appealed; and (4) an application of criteria that specifies that undue hardship exists when application of the ineligibility period or counting of trusts would deprive the individual of medical care so that the individual's health or life would be endangered or when it would deprive the individual of food, clothing, shelter, or other necessities of life.

House Bill

The House bill would amend section 1917(c)(2)(D) of the Social Security Act to specify the criteria by which an application for an undue hardship waiver would be approved. Approval would be subject to a finding that the application of an ineligibility period would deprive the individual of medical care such that the individual's health or life would be endangered, or that the individual would be deprived of food, clothing, shelter, or other necessities of life. States would also be required to provide for: (A) notice to recipients that an undue hardship exception exists; (B) a timely process for determining whether an undue hardship waiver will be granted; and (C) a process under which an adverse determination can be appealed.

This provision would also amend section 1917(c)(2) of the Social Security Act to permit facilities in which institutionalized individuals reside to file undue hardship waiver applications on behalf of the individual, with the institutionalized individual's consent or the consent of his or her guardian. If the application for undue hardship of nursing facility residents meets criteria specified by the Secretary, the state would have the option of providing payments for nursing facility services to hold the bed for these individuals at a facility while an application is pending. Such payments could not be made for longer than 30 days.

Conference Agreement

The conference agreement includes the House provision.

Disclosure and Treatment of Annuities and of Large Transactions (Section 6012 of the Conference Agreement, Section 6011(d) of the Senate Bill, and Section 3112 of the House Bill)

Current Law

Current law provides that the term "trust," for purposes of asset transfers and the look-back period, includes annuities only

to the extent that the Secretary of DHHS defines them as such. CMS guidance (Transmittal Letter 64) asks states to determine the ultimate purpose of an annuity in order to distinguish those that are validly purchased as part of a retirement plan from those that abusively shelter assets. To be deemed valid in this respect, the life of the annuity must coincide with the average number of years of life expectancy for the individual (according to tables in the transmittal). If the individual is not reasonably expected to live longer than the guarantee period of the annuity, the individual will not receive fair market value for the annuity based on the projected return; in this case, the annuity is not "actuarially sound" and a transfer of assets for less than fair market value has taken place. The State Medicaid Manual provides life expectancy tables to be used by states for determining whether an annuity is actuarially sound.

States and courts interpret this guidance differently. In *Mertz v. Houston*, 155 F. Supp.2d 415 (E.D. Pa. 2001), for example, the court held that if an annuity was actuarially sound then the intent of the transfer was not relevant under federal law. In a recent case in Ohio, a state court ruled that it was proper to look at the intent of asset transfers, even if the annuity was actuarially sound. (*Bateson v. Ohio Dept. of Job and Family* (Ohio Ct. Appl., 12th, No. CA2003-09-093, Nov. 22, 2004).

Medicaid Estate Recovery. Current law requires states to recover the private assets (e.g., countable and non-countable assets) of the estates of deceased beneficiaries who have received certain long-term care services. Recovery of Medicaid payments may be made only after the death of the individual's surviving spouse, and only when there is no surviving child under age 21 and no surviving child who is blind or has a disability; Estate recovery is limited to the amounts paid by Medicaid for services received by the individual and is limited to only certain assets that remain in the estate of the beneficiary upon his or her death. As a result, estate recovery is generally applied to a beneficiary's home, if available, and certain other assets within a beneficiary's estate.

For purposes of these recovery requirements, estates are defined as all real and personal property and other assets in an estate as defined in state probate law. At the option of the state, recoverable assets also may include any other real and personal property and other assets in which the person has legal title or interest at the time of death, including assets conveyed to a survivor, heir, or through assignment through joint tenancy, tenancy in common, survivorship, life estate, living trust, or other arrangement. Thus assets such as living trusts, life insurance policies, certain annuities, which may pass to heirs outside of probate, would be subject to Medicaid recovery only if a state expanded its definition of "estate."

Senate Bill

The Senate bill would amend section 1917(c)(1) of the Social Security Act to include, in the definition of assets subject to transfer penalties, an annuity purchased by or on behalf of an annuitant who has applied for Medicaid-covered nursing facility or other long-term care services. Annuities that would not be subject to asset transfer penalties would include an annuity as defined in section 408(b) or (q) of the Internal Revenue Code (IRC), or purchased with proceeds from: (1) an account or trust described in section 408(a)(c)(p) of the IRC; (2) a simplified employee pension as defined in section 408(k) of the IRC; or (3) a Roth IRA defined in section 408A of the IRC. Annuities would also be excluded from penalties if they are irrevocable

and non-assignable, actuarially sound (as determined by actuarial publications of the Office of the Chief Actuary of the Social Security Administration), and provide for payments in equal amounts during the term of the annuity, with no deferral and no balloon payments.

The Senate bill would amend section 1917(c)(1) of the Social Security Act by adding that the purchase of an annuity shall be treated as the disposal of an asset for less than fair market value unless the state is named as the remainder beneficiary in the first position for at least the total amount of Medicaid expenditures paid on behalf of the annuitant or is named as such a beneficiary in the second position after the community spouse and such spouse does not dispose of any such remainder for less than fair market value.

The Senate bill would amend Section 1917(b)(4) of the Social Security Act to include an annuity in the definition of estate that is subject to estate recovery unless the annuity was purchased from a financial institution or other business that sells annuities in the state as part of its regular business.

House Bill

The House bill would amend section 1917 of the Social Security Act by adding a new subsection that would require individuals, at the initial application or recertification for certain Medicaid long-term care services, to disclose to the state the following:

(A) A description of any interest the individual has in an annuity (or similar financial instrument which provides for the conversion of a countable asset to a noncountable asset, as specified by the Secretary), regardless of whether the annuity is irrevocable or is treated as an asset;

Applications or recertification forms shall include a statement that designates the state as the remainder beneficiary under such an annuity or similar financial instrument, subject to the following provisions:

(A) For institutionalized individuals who receive certain Medicaid-covered long-term care services, the state would become the remainder beneficiary in the first position of an annuity (in which he or she has an interest) for the total amount paid by Medicaid on behalf of the individual; The state becomes the remainder beneficiary in the second position when there is a spouse, minor, or disabled child as a named beneficiary.

(B) In the case of disclosure concerning an annuity, the state would notify the annuity's issuer of the state's right as a preferred remainder beneficiary in the annuity for Medicaid services furnished to the individual. This provision would not prevent the issuer from notifying persons with any other remainder of the state's interest in the remainder.

(C) The state may require an issuer to notify when there is a change in the amount of income or principal being withdrawn from the amount being withdrawn at the time of the most recent disclosure, as specified above. A state would take such information into account when determining the amount of the state's obligations for Medicaid or the individual's eligibility. Such a change in amount would be deemed as a transfer of an asset for less than fair market value unless the individual demonstrates, to the state's satisfaction, that the asset transfer was for fair market value.

The Secretary may provide guidance to states on categories of arms length transactions (such as the purchase of a commercial annuity) that could be generally treated as an asset transfer for fair market value.

The House bill would not prevent a state from denying Medicaid eligibility for an in-

dividual based on the income or resources derived from an annuity.

The House bill would apply to transactions (including the purchase of an annuity) occurring on or after the date of the enactment.

Conference Agreement

The conference agreement requires individuals, upon Medicaid application and recertification of eligibility, to disclose to the state, a description of any interest the individual or community spouse has in an annuity (or similar financial instrument, as specified by the Secretary), regardless of whether the annuity is irrevocable or is treated as an asset. Such application or recertification form includes a statement naming the state as the remainder beneficiary. In the case of disclosure concerning an annuity, the state notifies the annuity's issuer of the state's right as a preferred remainder beneficiary for Medicaid assistance furnished to the individual. Issuers may notify persons with any other remainder interest of the state's remainder interest.

States may require an issuer to notify the state when there is a change in the amount of income or principal withdrawn from the amount withdrawn at the point of Medicaid application or recertification. States take this information into account when determining the amount of the state's financial share of costs or in the individual's eligibility for Medicaid.

The Secretary may provide guidance to states on categories of transactions that may be treated as a transfer of asset for less than fair market value. States may deny eligibility for medical assistance for an individual based on the income or resources derived from an annuity.

The conference agreement amends section 1917(c)(1) of the Social Security Act by adding that the purchase of an annuity shall be treated as the disposal of an asset for less than fair market value unless the state is named as the remainder beneficiary in the first position for at least the total amount of Medicaid expenditures paid on behalf of the annuitant or is named as such a beneficiary in the second position after the community spouse or minor or disabled child and is named in the first position if such spouse or a representative of such child disposes of any such remainder for less than fair market value.

The conference agreement amends section 1917(c)(1) of the Social Security Act to include, in the definition of assets subject to transfer penalties, an annuity purchased by or on behalf of an annuitant who has applied for Medicaid-covered nursing facility or other long-term care services. Annuities that would not be subject to asset transfer penalties would include an annuity as defined in subsection (b) and (q) of section 408 of the Internal Revenue Code (IRC), or purchased with proceeds from: (1) an account or trust described in subsections (a), (c), and (p) of section 408 of the IRC; (2) a simplified employee pension as defined in section 408(k) of the IRC; or (3) a Roth IRA defined in section 408A of the IRC. Annuities would also be excluded from penalties if they are irrevocable and non-assignable, actuarially sound (as determined by actuarial publications of the Office of the Chief Actuary of the Social Security Administration), and provide for payments in equal amounts during the term of the annuity, with no deferral and no balloon payments.

The amendments apply to transactions, including the purchase of annuity, occurring on or after the date of this Act's enactment.

Application of Income-First Rule in Applying Community Spouse's Income Before Assets in Providing Support of Community Spouse (Section 6013 of the Conference Agreement, no provision in the Senate Bill, and Section 3113 of the House Bill)

Current Law

Current law includes provisions intended to prevent impoverishment of a spouse whose husband or wife seeks Medicaid coverage for long-term care services. These provisions were added by the Medicare Catastrophic Coverage Act (MCCA) of 1988 to address the situation that would otherwise leave the spouse not receiving Medicaid (community spouse) with little or no income or assets when the other spouse is institutionalized or, at state option, receives Medicaid's home- and community-based services. Before MCCA, states could consider all of the assets of the community spouse, as well as the spouse needing Medicaid coverage, to be available to pay for care for the spouse needing Medicaid coverage. These rules created hardships for the spouse living in the community who was forced to spend down virtually all of the couple's assets to Medicaid eligibility levels so that the other spouse could qualify for coverage. MCCA established new rules for the treatment of income and assets of married couples, allowing the community spouse to retain higher amounts of income and assets (on top of non-countable assets such as a house, car, etc.) than allowed under general Medicaid rules.

Regarding income, current law exempts all of the community spouse's income (e.g., pension or Social Security) from being considered available to the other spouse for purposes of Medicaid eligibility. For community spouses with more limited income, section 1924(d) of the Social Security Act provides for the establishment of a minimum monthly maintenance needs allowance for each community spouse to try to ensure that the community spouse has sufficient income to meet his or her basic monthly needs. (The community spouse's minimum monthly maintenance needs allowance is set at a level that is higher than the official federal poverty level.) Once income is attributed to each of the spouses according to their ownership interest, the community spouse's monthly income is compared against the minimum monthly maintenance needs allowance. If the community spouse's monthly income amount is less than the minimum monthly maintenance needs allowance, the institutionalized spouse may choose to transfer an amount of his or her income or assets to make up for the shortfall (i.e. the difference between the community spouse's monthly income and the state-specified minimum monthly maintenance needs allowance). This transfer allows more income to be available to the community spouse, while Medicaid pays a larger share of the institutionalized spouse's care costs. Within federal limits, states set the maximum monthly income level that community spouses may retain. Federal requirements specify that this amount may be no greater than \$2,377.50 per month, and no less than \$1,561.25 per month in 2005.

Regarding assets, federal law allows states to select the amount of assets a community spouse may be allowed to retain. This amount is referred to as the community spouse resource allowance (CSRA). Federal requirements specify that this amount may be no greater than \$95,100 and no less than \$19,020 in total countable assets in 2005. When determining eligibility, all assets of the couple are combined, counted, and split in half, regardless of ownership. If the community spouse's share of the assets is less than the

state-specified maximum, then the Medicaid beneficiary must transfer his or her share of the assets to the community spouse until the community spouse's share reaches the maximum. All other non-exempt assets must be depleted before the applicant can qualify for Medicaid.

States have some flexibility in the way they apply these rules at the time in which a person applies through the fair hearing process to raise his or her minimum maintenance needs allowance. At this point, a state may decide to allocate more income or resources from the institutionalized spouse to the community spouse. In doing so, states have employed two divergent methods. Under the method used by most states, known as the "income-first" method, the state requires that the institutionalized spouse's income is first allocated to the community spouse to enable the community spouse sufficient income to meet or, if approved by the state, exceed the minimum monthly maintenance needs allowance; the remainder, if any, is applied to the institutionalized spouse's cost of care. Under this method, the assets of an institutionalized spouse (e.g. an annuity or other income producing asset) cannot be transferred to the community spouse to generate additional income for the community spouse unless the income transferred by the institutionalized spouse would not enable the community spouse's total monthly income to reach the state-approved monthly maintenance needs allowance. This method generally requires a couple to deplete a larger share of their assets than the resources-first method.

In contrast, under the other method, known as the "resources-first" method, the couple's resources can be protected first for the benefit of the community spouse to the extent necessary to ensure that the community spouse's total income, including income generated by the CSRA, meets or, if approved by the state, exceeds the community spouse's minimum monthly maintenance needs allowance. Additional income from the institutionalized spouse that may be, but has not been, made available for the community spouse is used toward the cost of care for the institutionalized spouse. This method generally allows the community-spouse to retain a larger amount of assets than the income-first method.

On September 7, 2001, the Secretary issued a proposed rule (Federal Register Vol. 66, No. 174) that would have codified state practices. The proposed rule would have allowed states to choose between using either the income-first or resources-first method when determining whether the community spouse has sufficient income to meet the minimum monthly maintenance needs allowance. Under the proposed rule, states would not have been able to apply different rules to different individuals, on a case-by-case basis. The Secretary has not issued a final rule.

Senate Bill

No provision.

House Bill

The House bill would amend section 1924(d) of the Social Security Act to require that any transfer or allocation made from an institutionalized spouse to meet the need of a community spouse for a community spouse's monthly income allowance be first made from income of the institutionalized spouse. Only when sufficient income is not available, could resources of the institutionalized spouse be transferred or allocated.

The House bill would apply to transfers and allocations made on or after the date of this Act's enactment by individuals who become institutionalized spouses on or after such date.

Conference Agreement

The conference agreement amends section 1924(d), and therein sections (c) and (e), of the Social Security Act to require that states consider that all income of the institutionalized spouse that could be made available to the community spouse, in accordance with the calculation of the post-eligibility allocation of income or additional income allowance allocated at a fair hearing, has been made before states allocate the community spouse an amount of resources adequate to provide the difference between the minimum monthly maintenance needs allowance and all income available to the community spouse. These amendments apply to transfers and allocations made on or after the date of this Act's enactment by individuals who become institutionalized spouses on or after such date.

Disqualification for Long-Term Care Assistance for Individuals with Substantial Home Equity (Section 6014 of the Conference Agreement, no provision in the Senate Bill, and Section 3114 of the House Bill).

Current Law

Within federal law, states set asset standards that applicants must meet to qualify for Medicaid coverage. Among other things, these standards specify a limit on the amount of countable assets a person may have to qualify, as well as define which types of assets are counted and not counted. In general, countable assets cannot exceed \$2,000 for an individual applicant. States generally follow SSI rules for computing both countable and non-countable assets.

Under Medicaid and SSI rules, the value of an item may be totally or partially excluded when calculating countable resources. For example, the entire value of a car, regardless of its worth, is excluded, but life insurance is counted to the extent that the cash surrender value exceeds \$1,500 (if the total value of all life insurance policies on any person does not exceed \$1,500, no part of the cash surrender value of such life insurance will be counted for eligibility purposes).

Current Medicaid and SSI asset counting practices generally exclude the entire value of an applicant's home. A home is defined as any property in which an individual (and spouse, if any) has an ownership interest and which serves as the individual's principal place of residence. This property includes the shelter in which an individual resides, the land on which the shelter is located and related outbuildings. If an individual (and spouse, if any) moves out of his or her home without the intent to return, the home becomes a countable resource because it is no longer the individual's principal place of residence. However, if an individual leaves his or her home to live in an institution, the home is still considered to be the individual's principal place of residence, irrespective of the individual's intent to return, as long as a spouse or dependent relative of the eligible individual continues to live there. The individual's equity in the former home becomes a countable resource effective with the first day of the month following the month it is no longer his or her principal place of residence.

Senate Bill

No provision.

House Bill

The House bill would amend section 1917 of the Social Security Act to exclude from Medicaid eligibility for nursing facility or other long-term care services, certain individuals with an equity interest in their home of greater than \$750,000. (The Secretary would establish a process to waive application of this provision for demonstrated cases

of hardship.) This amount would be increased, beginning in 2011, from year to year based on the percentage increase in the consumer price index for all urban consumers (all items, United States city average), rounded to the nearest \$1,000.

Individuals whose spouse, child under age 21, or child who is blind or disabled (as defined by the section 1614 of the Social Security Act) lawfully resides in the individual's home would not be excluded from eligibility. This provision would not prevent an individual from using a reverse mortgage or home equity loan to reduce the individual's total equity interest in the home.

The House bill would apply to individuals who are determined eligible for Medicaid with respect to nursing facility or other long-term care services based on an application filed on or after January 1, 2006.

Conference Agreement

The Conference agreement amends section 1917 of the Social Security Act to exclude from Medicaid eligibility for nursing facility or other long-term care services, certain individuals with an equity interest in their home of greater than \$500,000. A state may elect an amount that exceeds \$500,000, but does not exceed \$750,000. These dollar amounts are increased, beginning in 2011, from year to year based on the percentage increase in the consumer price index for all urban consumers (all items, United States city average), rounded to the nearest \$1,000.

Individuals whose spouse, child under age 21, or child who is blind or disabled (as defined by the section 1614 of the Social Security Act) lawfully resides in the individual's home would not be excluded from eligibility. This provision would not prevent an individual from using a reverse mortgage or home equity loan to reduce the individual's total equity interest in the home.

The House bill would apply to individuals who are determined eligible for Medicaid with respect to nursing facility or other long-term care services based on an application filed on or after January 1, 2006.

Enforceability of Continuing Care Retirement Communities (CCRC) and Life Care Community Admission Contracts (Section 6015 of the Conference Agreement, no provision in the Senate Bill, and Section 3115 of the House Bill)

Current Law

Continuing Care Retirement Communities (CCRCs) offer a range of housing and health care services to serve older persons as they age and as their health care needs change over time. CCRCs generally offer independent living units, assisted living, and nursing facility care for persons who can afford to pay entrance fees and who often reside in such CCRCs throughout their older years. The services generally offered include meals, transportation, emergency response systems, and on-site nursing and physician services. Many also offer home care, maid services and laundry. CCRCs were developed, in large part, in response to an interest among many elderly persons to age-in-place. CCRCs can be either for-profit or not-for-profit CCRCs. They are paid primarily with private funds, but a number also accept Medicaid payment for nursing facility services. Although the majority of CCRC residents do not meet the financial criteria for Medicaid, some do. Under current law, section 1919(c)(5)(A)(i)(II) of the Social Security Act prohibits Medicaid-certified nursing facility from requiring that individuals provide them with oral or written assurance that they are not eligible for, or will not apply for, Medicaid or Medicare benefits.

Senate Bill

No provision.

House Bill

The House bill would amend section 1919(c)(5)(A)(i)(II) of the Social Security Act to provide an exception for state-licensed, registered, certified, or equivalent continuing care retirement communities (CCRCs) or a life care community (including nursing facility services provided as part of that community) that are certified to accept Medicaid and/or Medicare payment to allow them to require in their admissions contracts that residents spend their resources (subject to Medicaid's rules concerning the resources allowance for community spouses, described above), declared for the purposes of admission, on their care before they apply for Medicaid.

The House bill would also amend section 1917 of the Social Security Act to consider certain entrance fees for CCRCs or life care communities to be countable resources, and thus available to the applicant, for purposes of the Medicaid eligibility determination. For applicants with community spouses, only that part of the entrance fee that is not protected for by the community spouse's resource allowance would be considered in the computation of the spousal share available to Medicaid. Entrance fees that would be considered a resource available to the individual would meet the following criteria:

(A) the individual would have the ability to use the entrance fee, or the contract provides that the entrance fee could be used, to pay for care should other resources or income of the individual be insufficient to pay for care;

(B) the individual would be eligible for a refund of any remaining entrance fee when the individual dies or terminates the CCRC or life care community contracts and leaves the community; and

(C) the entrance fee does not confer an ownership interest in the continuing care retirement community or life care community

Conference Agreement

The conference agreement includes the House provision except that a CCRC or life care community cannot retain a portion of an entrance fee, otherwise made available to spend on care before applying for Medicaid, on account of a community spouse's resource allowance.

Additional Reforms of Medicaid Asset Transfer Rules

Requirement to Impose Partial Months of Ineligibility (Section 6016(a) of the Conference Agreement, Section 6011 (a) of the Senate Bill, and no provision in the House Bill)

Current Law

Current law requires states to impose penalties on individuals applying for Medicaid who transfer assets (all income and resources of the individual and of the individual's spouse) for less than fair market value (an estimate of the value of an asset if sold at the prevailing price at the time it was actually transferred). Specifically, the rules require states to delay Medicaid eligibility for individuals receiving care in a nursing home, and, at state option, certain people receiving care in community-based settings, who have transferred assets for less than fair market value on or after a "look-back date." The look-back date" is 36 months prior to application for Medicaid for income and most assets disposed of by the individual, and 60 months in the case of certain trusts.

The length of the delay is determined by dividing the total cumulative uncompensated value of all assets transferred by the individual (or individual's spouse) on or after the look-back date by the average monthly cost to a private patient of a nursing facility in the state (or, at the option of the state, in

the community in which the individual is institutionalized) at the time of application. For example, a transferred asset worth \$60,000, divided by a \$5,000 average monthly private pay rate in a nursing home, results in a 12-month period of ineligibility for Medicaid long-term care services. The period of ineligibility begins the first day of the first month during or after which assets have been improperly transferred and which does not occur in any other period of ineligibility. There is no limit to the length of the penalty period.

When calculating the length of the penalty period when assets are transferred for less than fair market value, current law allows states to "round down," or not include in the ineligibility period the quotient amounts (resulting from the division of the value of the transferred asset by the average monthly private pay rate in a nursing home) that are less than one month. For example, in a state with an average private stay in a nursing home of \$4,100, an ineligibility period for an improper transfer of \$53,000 could be 12.92 months (i.e. $\$53,000/\$4,100=12.92$). Although some states would impose an ineligibility period of 12 months and 28 days (of a 31 day month), other states may round down the quotient to an ineligibility period of 12 months only.

Senate Bill

The Senate bill would amend Section 1917(c)(1)(E) of the Social Security Act by adding that a state shall not round down, or otherwise disregard any fractional period of ineligibility when determining the ineligibility period.

House Bill

No provision.

Conference Agreement

The conference agreement includes the Senate provision.

Authority for States to Accumulate Multiple Transfers into One Penalty Period (Section 6016(b) of the Conference Agreement, Section 6011(b) of the Senate Bill, and no provision in the House Bill)

Current Law

Current law and additional CMS guidance provides that when a number of assets are transferred for less than fair market value on or after the look-back date during the same month, the penalty period is calculated using the total cumulative uncompensated value of all assets transferred during that month by the individual (or individual's spouse) divided by the average monthly cost to a private patient of a nursing facility in the state (or, at the option of the state, in the community in which the individual is institutionalized) at the time of application. When a number of assets are transferred during different months, then the rules vary based upon whether the penalty periods overlap. If a penalty period for each transfer overlaps with the beginning of a new penalty period, then states may either add together the value of the transferred assets and calculate a single penalty period or impose each penalty period sequentially. If the penalty period for each transfer does not overlap, then states must treat each transfer as a separate event and impose each penalty period starting on the first day of the month in which each transfer was made.

Senate Bill

The Senate bill would amend Section 1917(c)(1) of the Social Security Act by adding that for an individual or an individual's spouse who disposes of multiple assets in more than one month for less than fair market value on or after the applicable look-back date, states may determine the penalty period by treating the total, cumulative un-

compensated value of all assets transferred by the individual (or individual's spouse) during all months as one transfer. States would be allowed to begin such penalty periods on the earliest date which would apply to such transfers.

House Bill

No provision.

Conference Agreement

The conference agreement includes the Senate provision but refers to the disposal of multiple fractional transfers of assets instead of multiple assets.

Inclusion of Transfer of Certain Notes and Loans Assets (Section 6016(c) of the Conference Agreement, Section 6011(c) of the Senate Bill, and no provision in the House Bill)

Current Law

Under current law, states set standards, within federal parameters, for the amount and type of assets that applicants may have to qualify for Medicaid. In general, countable assets cannot exceed \$2,000 for an individual. However, not all assets are counted for eligibility purposes. The standards states set also include criteria for defining non-countable, or exempt, assets. States generally follow rules for the Supplemental Security Income (SSI) program for computing both countable and non-countable assets.

Under state Medicaid and SSI rules, countable assets may include, but are not limited to, funds in a savings or money market account, stocks or other types of equities, accelerated cash benefits from certain types of insurance policies, and funds from certain types of trusts that can be obtained by the individual, the individual's spouse, or anyone acting for the individual or the individual's spouse, to pay for the individual's medical or nursing facility care, even if the funds or payments are not distributed. Under Medicaid and SSI rules, non-countable assets include an individual's primary place of residence, one automobile, household goods and personal effects,¹ property essential to income-producing activity, up to \$1,500 in burial funds, life insurance policies whose total face value is not greater than \$1,500, and miscellaneous other items.

Other rules defining countable and non-countable assets apply only in particular states. Their rules are generally intended to restrict the use of certain financial instruments (e.g. annuities, promissory notes, or trusts) to protect assets so that applicants can qualify for Medicaid earlier than they might otherwise.

Senate Bill

The Senate bill would amend Section 1917(c)(1) of the Social Security Act to make additional assets subject to the look-back period, and thus a penalty, if established or transferred for less than fair market value. Such assets would include funds used to purchase a promissory note, loan or mortgage, unless the repayment terms are actuarially sound, provide for payments to be made in equal amounts during the term of the loan and with no deferral nor balloon payments, and prohibit the cancellation of the balance upon the death of the lender.

In the case of a promissory note, loan, or mortgage that does not satisfy these requirements, their value shall be the outstanding balance due as of the date of the individual's application for certain Medicaid long-term care services.

¹Under former SSI rules, there were restrictions placed on the value of the automobile and household goods and personal effects that could be excluded from countable assets. As of March 9, 2005, one automobile and all household goods and personal effects are excluded, regardless of their value. 70 Federal Register 6340, no. 24, Feb. 7, 2005.

Inclusion of Transfers to Purchase Life Estates (Section 6016(d) of the Conference Agreement, Section 6011(e) of the Senate Bill, and no provision in the House Bill)

Current Law

Current law does not specify whether life estates should be treated as countable or noncountable assets for purposes of applying the Medicaid asset transfer rules. In CMS guidance, however, the Secretary specifies that the establishment of a life estate constitutes a transfer of assets. The guidance also explains that a transfer for less than fair market value occurs whenever the value of the transferred asset is greater than the value of the rights conferred by the life estate. According to CMS, a life estate is involved when an individual who owns property transfers ownership to another individual while retaining, for the rest of his or her life (or the life of another person), certain rights to that property. Generally, a life estate entitles the grantor to possess, use, and obtain profits from the property as long as he or she lives, even though actual ownership of the property has passed to another individual.

Senate Bill

The Senate bill would amend Section 1917(c)(1) of the Social Security Act to add a provision that would redefine the term 'assets,' with respect to the Medicaid asset transfer rules, to include the purchase of a life estate interest in another individual's home unless the purchaser resides in the home for at least one year after the date of purchase.

Effective Date (Section 6016(e) of the Conference Agreement, Section 6011(g) of the Senate Bill, and no provision in the House Bill)

Current Law

No provision.

Senate Bill

This provision would apply to payment made under the Medicaid program for calendar quarters beginning on or after the date of this Act's enactment, without regard to whether or not final regulations to carry out such amendments have been promulgated by such date. Amendments made by this provision would not apply to Medicaid assistance provided for services before the date of enactment, with respect to assets disposed of on or before the date of enactment, or with respect to trusts established on or before the date of enactment.

In the case of a state that the Secretary of Health and Human Services determines requires state legislation to meet the additional requirements of this provision, the state Medicaid plan would not be regarded as failing to comply with the requirements solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the state legislature that begins after the date of enactment of this Act. In the case of a state that has a two-year legislative session, each year of the session would be considered to be a separate regular session of the state legislature. This amendment applies to provision under section 6011 of the Senate bill.

The conference agreement includes the Senate provision with respect to amendments made by section 6016.

Subchapter B—Expanded Access to Certain Benefits

Expansion of State Long-Term Care Partnership Program (Section 6021 of the Conference Agreement, and Section 6012 of the Senate Bill, and Section 3133 of the House Bill)

Current Law

Under Medicaid's long-term care (LTC) insurance partnership program, certain persons who have exhausted (or used at least some of) the benefits of a private long-term care insurance policy may access Medicaid without meeting the same means-testing requirements as other groups of Medicaid eligibles. For these individuals, means-testing requirements are relaxed at: (1) the time of application to Medicaid; and (2) the time of the beneficiary's death when Medicaid estate recovery is generally applied.

In general, states allow individuals to retain no more than \$2,000 in countable assets and exempt certain non-countable assets such as an individual's primary place of residence, one automobile, household goods and personal effects. Under section 1902 of the Social Security Act, a state may request the Secretary's permission to amend its Medicaid state plans to allow certain applicants to retain greater amounts of countable assets than other applicants and still qualify for Medicaid. Specifically, states that obtain the Secretary's approval may disregard some or all of the assets of persons applying for Medicaid who have purchased long-term care insurance policies.

Section 1917 of the Social Security Act (amended by the Omnibus Budget Reconciliation Act of 1993, P.L. 103-66) allows only those states with an approved state plan amendment as of May 14, 1993 to exempt individuals from Medicaid estate recovery who apply to Medicaid after exhausting their private long-term care insurance benefits. By that date, five states (California, Connecticut, Indiana, Iowa, and New York) had received CMS approval. All of these states, except Iowa, have implemented partnership programs.

The four partnership states with active programs have different models for determining the amount of assets that an eligible participant may protect. Connecticut and California use a dollar-for-dollar model, in which the amount of the assets protected is equivalent to the value of the benefit package paid by the policy purchased (e.g., \$100,000 of nursing-home or assisted living benefits paid enables that individual to retain up to \$100,000 in assets and still qualify for Medicaid coverage in that state). New York uses a total asset protection model in which persons who purchase certain state-approved policies may qualify for Medicaid without having to meet any of Medicaid's asset criteria. Indiana uses a hybrid model, offering both dollar-for-dollar and total asset protection (Indiana switched from the dollar-for-dollar model to the hybrid model in 1998).

Federal oversight of long-term care insurance is largely limited to provisions established by the Health Insurance Portability and Accountability Act of 1996 (HIPAA, P.L. 104-191). HIPAA established new rules regarding the tax treatment of LTC insurance and expenses, and defined the requirements for a tax-qualified LTC insurance policy. LTC insurance products are largely regulated by states. Every state and the District

of Columbia has some laws governing LTC insurance. Many of these laws reflect guidance provided by the National Association of Insurance Commissioners (NAIC), an organization of state insurance regulators. This guidance, provided in the form of a Model Act and Model Regulations for LTC insurance, addresses a number of areas, including the following.

Model Regulations:

- Application forms and replacement coverage;
- Reporting requirements;
- Filing requirements for marketing;
- Standards for marketing;
- Appropriateness of recommended purchase;
- Standard format outline of coverage; and
- Requirements to deliver shopper's guide.

Model Act:

- Outline of coverage;
- Requirements for certificates under group plans;
- Policy summary;
- Accelerated death benefits; and
- Incontestability period.

HIPPA also includes requirements that tax-qualified policies comply with consumer protections regarding the delivery of policies, information on denials of claims, and disclosure. While many state laws and regulations are based largely on the NAIC standards, others have adopted only some of these standards. As a result, there is significant variation in regulatory practices across states.

National Clearinghouse for Long-Term Care. No provision in current law requires the establishment of a long-term care consumer clearinghouse.

In related activities, DHHS has funded some states to establish state-based consumer-friendly access to information about long-term care services. In FY2003 and FY2004, the Centers for Medicare and Medicaid (CMS) and AoA awarded approximately \$19 million in grants to states for the purpose of assisting their efforts to create a single, coordinated system of information and access for all persons seeking long term care to minimize confusion, enhance individual choice, and support informed decision-making. In FY2005, \$15 million was awarded. A total of 43 states have received grants for this purpose. Some of the common activities under this grants program include information and referral, outreach, counseling about public benefits and long-term care options, and case management. States' methods for implementing the grant may vary; some states have established an actual physical location, and other states have established a statewide clearinghouse through a toll-free number or a web-based information site.

In addition, CMS has made available to the public, via its website, a comparison of Medicare and Medicaid-certified nursing homes and home health agencies. The information provides detailed facility and agency information and characteristics, and contains several measures of quality (e.g., improvement in mobility). This website does not cover assisted living facilities, group homes and other residential facilities that are not nursing facilities; nor does it cover non-medical, non-certified, home and community-based long-term care services.

Senate Bill

The Senate bill would exempt an additional group of persons with certain long-term care insurance plans from Medicaid estate recovery. This group would include individuals who received Medicaid under a Qualified State Long-Term Care Insurance Partnership plan meeting requirements A through G described below. The provision would also require that existing LTC insurance partnership programs satisfy requirements B through G below for LTC insurance

policies sold on or after 2 years after enactment.

The Senate bill would define LTC insurance policies as including, but not be limited to, certificates issued under group insurance contracts [also would include individual and other LTC insurance contracts]. The term "Qualified State LTC Insurance Partnership," would mean a state with an approved Medicaid State plan amendment meeting the following requirements:

(A) the disregard of any assets or resources in an amount equal to the amount of payments made to, or on behalf of, an individual who is a beneficiary under any LTC insurance policy sold under such plan amendment;

(B) a state would treat benefits paid under any LTC partnership insurance policy sold under another states' "Qualified LTC Insurance Partnership" or a long-term care insurance policy, the same as the state treats benefits paid under such a policy under the state's plan amendment;

(C) any long-term care insurance policy sold would be required to be a tax-qualified policy (Meeting specifications defined in section 7702B(b) of the Internal Revenue Code of 1986) and meet the consumer protection requirements described below;

(D) any policy would be required to provide for compound annual inflation protection of at least 5 percent and asset protection that does not exceed \$250,000. This amount would be increased, beginning with 2007, from year-to-year based on the percentage increase in the medical care expenditure category of the Consumer Price Index for Urban Consumers (United States city average), published by the Bureau of Labor Statistics rounded to the nearest \$100;

(E) an insurer would be allowed to rescind a LTC insurance policy in effect for at least 2 years or deny an otherwise valid LTC insurance claim only upon a showing (1) of misrepresentation that is material to the acceptance of coverage; (2) pertains to the claim made; and (3) could not have been known by the insurer at the time the policy was sold;

(F) any individual who sells these policies would be required to receive training and demonstrate evidence of an understanding of the policy and how it relates to other public and private LTC coverage; and

(G) the issuer would be required to report, to the Secretary required information, and to report to the state: (1) the information or data reported to the Secretary, (2) the information or data required under the minimum reporting requirements developed under section 103(c)(1)(B) of the Improving LTC Choices Act of 2005, and (3) such additional information or data as the state may require. If a LTC insurance policy is exchanged for another such policy, the effective date of coverage under the first policy would determine when coverage first becomes effective.

LTC insurance policies would be required to meet the following requirements specified in the National Association of Insurance Commissioner's (NAIC) Long-Term Care Insurance Model Regulations and Long-Term Care Insurance Model Act (as adopted as of October 2000). The requirements include the following topics described below.

Model Regulations:
 • Guaranteed renewal or noncancellability;

• Prohibitions on limitations and exclusions;

• Extension of benefits;
 • Continuation or conversion of coverage;
 • Discontinuance and replacement of policies;

• Unintentional lapse;
 • Disclosure;
 • Required disclosure of rating practices to consumer;

• Prohibitions against post-claims underwriting;

• Minimum standards;
 • Application forms and replacement coverage;

• Reporting requirements;
 • Filing requirements for marketing;
 • Standards for marketing, including inaccurate completion of medical histories;

• Suitability;
 • Prohibition against preexisting conditions and probationary periods in replacement policies or certificates;

• Contingent nonforfeiture benefits if the policyholder declines the offer of a nonforfeiture provision;

• Standard format outline of coverage; and
 • Deliver shopper's guide.

Model Act:

• Preexisting conditions;
 • Prior hospitalization;
 • Contingent nonforfeiture benefits;
 • Right of return;
 • Outline of coverage;
 • Requirements for certificates under group plans;
 • Policy summary; and
 • Monthly reports on accelerated death benefits.

These provisions of the Long-Term Care Insurance Model Regulation and Long-Term Care Insurance Model Act would be treated as including any other provision the Regulation or Act necessary to implement the provision. The determination of whether any requirement under the Model Act or Regulation have been met would be made by the Secretary.

No later than one year after enactment, the Secretary, in consultation with the NAIC, issuers of LTC insurance policies, states with experience with LTC insurance partnership plans, other states, and representatives of consumers of LTC insurance policies would be required to develop uniform standards for:

• Reciprocity. These standards would ensure that LTC insurance policies issued under the state LTC partnership (described in this provision) would be portable to other states with such-LTC insurance partnerships;

• Minimum reporting requirements. These standards would be required to specify the data and information that each issuer of LTC insurance policies under State LTC insurance partnerships shall report to the state with which it has such a partnership. The requirements developed would be required to specify the type and format of the data and information to be reported and the frequency with which such reports are to be made. States would be permitted to require an issuer of LTC insurance policy sold in the state (regardless of whether the policy is issued under a State LTC insurance partnership) to require the issuer to report information or data to the state that is in addition to the information or data required under these minimum reporting requirements;

• Suitability. These standards would be for determining whether a long-term care insurance policy is appropriate for the needs of an applicant (based on guidance of the NAIC regarding suitability).

The Secretary, in consultation with those listed above, would also be required to submit recommendations to Congress with respect to the following:

• Incontestability. Recommendations regarding whether the requirements relating to incontestability for LTC insurance policies sold under a state partnership program should be modified based on NAIC guidance;

• Nonforfeiture. Recommendations regarding whether requirements relating to nonforfeiture for issuers of LTC insurance policies under a state LTC insurance partnership pro-

gram should be modified to reflect changes in an insured's financial circumstances;

• Independent certification for benefits assessment. Recommendations regarding whether uniform standards for requiring benefits assessment evaluations to be conducted by independent entities should be established for issuers of LTC insurance policies under such a state partnership program, and if so, what such standards should be;

• Rating requirements. Recommendations regarding whether uniform standards for the establishment of, and annual increases in, premiums for LTC insurance policies sold under such a state partnership program should be established and if so, what such standards should be; and

• Dispute Resolution. Recommendations regarding whether uniform standards are needed to ensure fair adjudication of coverage disputes under LTC insurance policies sold under such a state partnership program and the delivery of the benefits promised under such policies.

The DHHS Secretary would be required to annually report to Congress on the LTC insurance partnerships. Such reports would be required to include analyses of the extent to which such partnerships expand or limit access of individuals to LTC and the impact of such partnerships on Federal and State Medicaid expenditures and federal Medicare expenditures.

Effective Date. These amendments would become effective on October 1, 2007 and apply to long-term care insurance policies sold on or after that date.

House Bill

The House bill would amend section 1917(b)(1)(C)(ii) of the Social Security Act to allow additional groups of individuals in states with state plan amendments approved after May 14, 1993 to be exempt from estate recovery requirements if the amendment provides for a qualified state long-term care insurance partnership program. The term "Qualified State LTC Insurance Partnership," would mean a Medicaid State plan amendment that provides for the disregard of any assets or resources in the amount equal to the amount of insurance benefit made to or on behalf of an individual who is a beneficiary under a long-term care policy (including a certificate issued under a group insurance contract), if the following requirements are met:

(I) The policy covers an insured who was a resident of such state when coverage first became effective under the policy. (In the case of a long-term care insurance policy exchanged for another such policy, this requirement would apply based on the coverage of the first such policy that was exchanged);

(II) The policy is a qualified long-term care insurance policy (meeting specifications defined in section 7702B(b) of the Internal Revenue Code of 1986) issued on or after the first day of the first calendar quarter in which the plan amendment was submitted to the Secretary;

(III) If the policy does not provide some level of inflation protection, the insured was offered, before the policy was sold, a long-term care insurance policy that provides some level of inflation protection;

(IV) The state Medicaid agency provides information and technical assistance to the state insurance department on the insurance department's role of assuring that any individual who sells a long-term care insurance policy under the partnership receives training or demonstrates evidence of an understanding of such policies and how they relate to other public and private coverage of long-term care;

(V) The issuer of the policy provides regular reports to the Secretary that include, in

accordance with the Secretary's regulations (promulgated after consultation with the states), notification regarding when all benefits provided under the policy have been paid and the amount of such benefits paid, when the policy otherwise terminates, and such other information as the Secretary determines appropriate to the administration of such partnerships;

(VI) The state does not impose any requirement affecting the terms or benefits of such a policy unless the state imposes such requirement on long-term care insurance policies without regard to whether the policy is covered under the partnership or is offered in connection with such a partnership.

The Secretary, as appropriate, would provide copies of the state reports to the state involved and would promote the education of consumers regarding qualified state long-term care insurance partnerships. In addition, in consultation with other appropriate Federal agencies, issuers of long-term care insurance, and the National Association of Insurance Commissioners, the Secretary would develop recommendations for Congress to authorize and fund a uniform minimum data set to be reported electronically by all issuers of long-term care insurance policies under qualified state long-term care insurance partnerships to a secure, centralized electronic query and report generating mechanism that State, the Secretary, and other Federal agencies can access.

To permit portability in long-term care insurance policies purchased under state long-term care insurance partnerships, the Secretary may develop, in consultation with the states and the National Association of Insurance Commissioners, uniform standards for reciprocal recognition of such policies among states with qualified state long-term care insurance partnerships.

Effective Date. A state plan amendment that provides for a qualified state long-term care insurance partnership would be effective for long-term care insurance policies issued on or after a date, specified in the amendment, that is not earlier than the first day of the first calendar quarter in which the plan amendment was submitted to the Secretary.

Conference Agreement

The conference agreement amends section 1917(b)(1)(C)(ii) of the Social Security Act to: (1) require that existing partnership programs not allow consumer protection standards, as defined in a Medicaid state plan amendment, to be less stringent (determined by the Secretary) than those applying under the state plan amendment as of December 31, 2005; and (2) allows certain individuals in states with state plan amendments approved after May 14, 1993 to be exempt from estate recovery requirements if the amendment provides for the disregard of any assets or resources in the amount equal to the amount of insurance benefits made to or on behalf of an individual who is a beneficiary under a long-term care policy (including a certificate issued under a group insurance contract), if the following requirements are met:

(I) The policy covers an insured who was a resident of such state when coverage first became effective under the policy. In the case of a long-term care insurance policy exchanged for another such policy, this requirement applies based on the coverage of the first such policy that was exchanged;

(II) The policy is a qualified long-term care insurance policy (meeting specifications defined in section 7702B(b) of the Internal Revenue Code of 1986) issued not earlier than the effective date of the Medicaid state plan amendment;

(III) The policy meets the following requirements specified in the National Association

of Insurance Commissioner's (NAIC) Long-Term Care Insurance Model Regulations and Long-Term Care Insurance Model Act (as adopted as of October 2000).

Model Regulations relating to:

- Guaranteed renewal or noncancellability (including some sections of the Model Act);
 - Prohibitions on limitations and exclusions;
 - Extension of benefits;
 - Continuation or conversion of coverage;
 - Discontinuance and replacement of policies;
 - Unintentional lapse;
 - Disclosure;
 - Required disclosure of rating practices to consumer;
 - Prohibitions against post-claims underwriting;
 - Minimum standards;
 - Application forms and replacement coverage;
 - Reporting requirements;
 - Filing requirements for marketing;
 - Standards for marketing, including inaccurate completion of medical histories;
 - Prohibition against preexisting conditions and probationary periods in replacement policies or certificates;
 - Contingent nonforfeiture benefits if the policyholder declines the offer of a nonforfeiture provision;
 - Appropriateness of recommended purchase;
 - Standard format outline of coverage; and
 - Delivery of shopper's guide.
- Model Act relating to:
- Preexisting conditions;
 - Prior hospitalization;
 - Contingent nonforfeiture benefits;
 - Right of return;
 - Outline of coverage;
 - Requirements for certificates under group plans;
 - Policy summary; and
 - Monthly reports on accelerated death benefits.

These provisions of the Long-Term Care Insurance Model Regulation and Long-Term Care Insurance Model Act are treated as including any other provision of the Regulation or Act necessary to implement the provision. Long-term care insurance policies issued in a state shall be deemed as meeting the requirements of the model regulation or the Model Act if the state plan amendment provides that the State insurance commissioner for the state certifies (in a manner satisfactory to the Secretary) that the policy meets such requirements.

(IV) If at the date of purchase the purchaser is younger than age 61, the policy must provide for compound inflation; if the purchaser is at least age 61 but not older than age 76, the policy must provide some level of inflation protection; and if the purchaser is age 76 or older, the policy may, but is not required to, provide some level of inflation protection.

(V) The state Medicaid agency provides information and technical assistance to the state insurance department on the insurance department's role of assuring that any individual who sells a long-term care insurance policy under the partnership receives training or demonstrates evidence of an understanding of such policies and how they relate to other public and private coverage of long-term care;

(VI) The issuer of the policy provides regular reports to the Secretary that include, in accordance with the Secretary's regulations (after consultation with the National Association of Insurance Commissioners, issuers of long-term care insurance policies, states with experience with long-term care insurance partnership plans, other states, and representatives of consumers of long-term care

insurance policies) notification regarding when all benefits and their amounts under the policy have been paid, when the policy otherwise terminates, and other information that the Secretary determines is appropriate to the administration of the partnership programs. These regulations shall specify the data format and information to be reported, and the frequency with which such reports are to be made. The Secretary, as appropriate, provides copies of the reports to the state involved;

(VII) The state does not impose any requirement affecting the terms or benefits of such a policy unless the state imposes such requirement on long-term care insurance policies without regard to whether the policy is covered under the partnership or is offered in connection with such a partnership.

In consultation with other appropriate Federal agencies, issuers of long-term care insurance, and the National Association of Insurance Commissioners, state insurance commissioners, states with experience with long-term care insurance partnership plans, other states, and representatives of consumers of long-term care insurance policies, the Secretary develops recommendations for Congress to authorize and fund a uniform minimum data set to be reported electronically by all issuers of long-term care insurance policies under qualified state long-term care insurance partnerships to a secure, centralized electronic query and report generating mechanism that State, the Secretary, and other Federal agencies can access.

Not later than 12 months after the National Association of Insurance Commissioners issues a revision, update or other modification of a model regulation or model act provision listed above or substantially related those listed above, the Secretary reviews these changes, determines whether incorporating such changes into the corresponding provision would improve qualified state long-term care insurance partnerships, and, if so, incorporate the changes into the provision.

States may require issuers of long-term care insurance policies sold in that state (regardless of whether the policy is issued under a qualified state long-term care insurance partnership) to report additional information or data to the state.

To permit portability in long-term care insurance policies purchased under state long-term care insurance partnerships, the Secretary develops no later than January 1, 2007, in consultation with the National Association of Insurance Commissioners, states with experience with long-term care insurance partnership plans, other state, and representatives of consumers of long-term care insurance policies, standards for uniform reciprocal recognition of such policies among states with qualified state long-term care insurance partnerships which have benefits paid under such policies will be treated the same by all such states, and states with such partnerships shall be subject to such standards unless the state notifies the Secretary of the State's election to be exempt from such standards.

The Secretary annually reports to Congress on the long-term care insurance partnerships. Such reports would include analyses of the extent to which partnership programs expand or limit access of individuals to long-term care and the impact of such partnerships on federal and state expenditures under Medicare and Medicaid. Nothing in this provision shall require the Secretary to conduct an independent review of each long-term care insurance policy offered under or in connection with a state partnership program.

A state plan amendment that provides for a qualified state long-term care insurance

partnership may provide that the amendment be effective for long-term care insurance policies issued on or after a date that is not earlier than the first day of the first calendar quarter in which the plan amendment was submitted to the Secretary.

With respect to policy exchanges, Conferees expect existing policy holders will be able to exchange existing policies for Partnership policies in accordance with policy provisions and state law after a State's plan amendment is effective.

National Clearinghouse for Long-Term Care. The Secretary establishes a National Clearinghouse for Long-Term Care Information (this may be done through a contract or interagency agreement). The National Clearinghouse for Long-Term Care: (1) educates consumers with respect to the availability and limitations of Medicaid long-term care coverage, including state Medicaid eligibility and estate recovery requirements; (2) provides objective information to assist consumers with the decision-making process for determining whether to purchase long-term care insurance or to pursue other private market alternatives for purchasing long-term care; (3) provide contact information for additional objective sources on planning for long-term care services needs; and (4) maintain a list of states with state long-term care insurance partnerships.

In providing information to consumers on long-term care, the National Clearinghouse for Long-Term Care Information shall not advocate in favor of a specific long-term care insurance provider or a specific long-term care insurance policy.

Out of any funds in the Treasury not otherwise appropriated, there is appropriated to carry out for the National Clearinghouse for Long-Term Care \$3 million for each of fiscal years 2006 through 2010.

Expanded Access to Borne and Community-based Services for the Elderly and Disabled (Section 6022 of the Conference Agreement, no provision in the Senate Bill, and Section 3131 of the House Bill)

Current law

Medicaid home and community-based services (HCBS) waivers authorized by Section 1915(c) of the Social Security Act allow states to provide home and community-based services to Medicaid beneficiaries who would otherwise need the level of care provided in a nursing facility, intermediate care facility for persons with mental retardation (ICF-MR) or hospital. HCBS waiver services can include case management, homemaker/home health aide services, personal care, psychosocial rehabilitation, home health, private duty nursing, adult day care, habilitation, respite care, day treatment, and any other service requested by the state and approved by the Secretary. As part of the waiver, states may define the services that will be offered, target a specific population (e.g., individuals with developmental disabilities) or a specific geographic region, and limit the number of waiver participants (resulting in a waiting list for services in many states).

Approval for a HCBS waiver is contingent on a state documenting the cost-neutrality of the waiver. Cost-neutrality is met if, on average, the per person cost under the HCBS waiver is no higher than the cost if the person were residing in one of the three types of institutions identified in Medicaid law, (hospital, nursing facility or ICF-MR). The state determines which type of institution(s) it will use to make the cost-neutrality calculation.

A HCBS waiver is generally approved for a 3- or 5-year time period and is subject to additional oversight from the Centers for Medicare and Medicaid Services (CMS). In July

2003, there were 275 HCBS waivers nationwide in all states (except Arizona which offers HCBS services under a Section 1115 waiver).

Senate Bill

No provision.

House Bill

The House bill would allow states to cover a broad range of home and community-based services (HCBS) as an optional benefit under the state Medicaid plan without requiring a waiver. States would be able to define which HCBS services will be covered and could include any service authorized by federal law for existing HCBS waiver programs (as defined in Section 1915(c)(4)(B) of the Social Security Act). Similar to the existing HCBS waiver program, paying for an individual's room and board would not be permitted under this new benefit.

To qualify for this benefit the individual must meet the following criteria: (1) Age 65 or older or disabled (as defined under the Medicaid state plan) but who is not an individual with a developmental disability, mental retardation or a related condition; (2) have had a determination that, but for the provision of such services, the individual would require the level of care provided in a hospital or nursing facility (the cost of which could be reimbursed under Medicaid); and (3) meet the Medicaid eligibility standards in effect in the state (which may include an approved Medicaid waiver) as of the date of enactment of this provision.

A state would be able to cover this benefit under the Medicaid state plan if certain conditions are met: (1) Any state waiver or demonstration under Sections 1915 or 1115 of the Social Security Act with respect to such services for individuals described in this provision must have expired; and (2) the state must monitor and report to the Secretary of the Department of Health and Human Services (DHHS) on a quarterly basis the enrollment and expenditures for services provided under this option.

A state would not be required to comply with existing Medicaid requirements regarding the statewide availability of the service, the comparability of services, and the income and resource rules applicable in the community. A state may also limit the number of individuals who are eligible for services, establish waiting lists for the receipt of these services, and limit the amount, duration, and scope of services.

This section would be effective for home and community-based services furnished on or after October 1, 2006.

Conference Agreement

The conference agreement establishes home and community-based services as an optional Medicaid benefit that would not require a waiver and that meets certain other requirements for individuals whose income does not exceed 150% of the federal poverty level. The scope of services may include any services permitted under Section 1915(c)(4)(B) of the Social Security Act which the Secretary has the authority to approve, and would not include an individual's room and board. The state may provide this option to individuals without determining that but for the provision of such services, the person would require the level of care provided in a hospital, nursing home, or ICF-MR.

States are required to establish needs-based criteria for determining an individual's eligibility for the HCBS option established by this provision, and the specific HCBS the individual will receive. The State must also establish needs-based criteria for determining whether an individual requires the level of care provided in a hospital, nursing home, ICF-MR, or under a waiver of the

state plan, that is more stringent than the needs-based criteria for the HCBS option established by this provision.

The state is also required to submit to the Secretary a projection of the number of individuals to be served under the option, and may limit the number of individuals who are eligible for such services.

The needs-based criteria must be based on an assessment of an individual's support needs and capabilities, and may take into account the inability of the individual to perform two or more activities of daily living (ADLs) as defined in the Internal Revenue Service (IRS) code (i.e., bathing, dressing, transferring, toileting, eating, and continence), or the need for significant assistance to perform these activities, and other risk factors determined to be appropriate by the state.

A state is allowed to modify the needs-based criteria described above in the event that enrollment of individuals for the HCBS option exceeds projected enrollment. The state is not required to seek prior approval of the Secretary if the state wishes to modify the needs-based criteria, but must give the Secretary and the public at least 60 days notice of the proposed modification. If a state modifies the needs-based criteria, existing recipients of the HCBS optional state plan services will continue to be eligible to receive those services for at least 12 months beginning on the date the individual first received medical assistance for HCBS services. After such a modification, the state, at a minimum, must apply the level of care determination for hospitals, nursing facilities, and ICF-MRs that were in effect prior to the application of more stringent criteria.

The state is required to use an independent evaluation for determining an individual's eligibility for HCBS. The independent evaluation must include an assessment of the needs of the individual to: (1) determine a necessary level of services and supports consistent with the individual's physical and mental capacity; (2) prevent unnecessary or inappropriate care, and (3) establish an individualized care plan for the individual.

The assessment must include: (1) an objective evaluation of an individual's inability or need for significant assistance to perform two or more activities of daily living as defined in the Internal Revenue Service code; (2) a face-to-face evaluation of the individual by an individual trained in the assessment and evaluation of individuals whose physical or mental conditions trigger a potential need for HCBS; (3) where appropriate, consultation with the individual's family, spouse, guardian, or other responsible individual; (4) consultation with all treating and consulting health and support professionals caring for the individual; (5) an examination of the individual's relevant history and medical records, and care and support needs guided by best practices and research on effective strategies that result in improved health and quality of life outcomes. The assessment must also evaluate the ability of the individual or individual's representative to self-direct the purchase and control of HCBS if he/she elects this option, and if such an option is covered by the state.

The independent evaluation is to establish a written individualized plan of care. The plan must be developed in consultation with the individual, the individual's treating physician, health care or support professionals, or other appropriate individuals, and the family caregiver or individual representative if appropriate; (2) to take into account the extent, and the need for, any family or other supports for the individual; (3) to identify the HCBS services to be provided (or purchase, if the individual elects to self-direct

his/her care); (4) to be reviewed at least annually or as needed when there is a significant change in circumstances.

States may allow individual (or the individual's representative) to elect to self-direct the purchase and control of state plan HCBS. Under the self-directed option, the individual's needs, preferences, and capabilities are assessed, and based on the assessment, a service plan is developed jointly with the individual (or representative) that is approved by the state. The service plan must include certain activities such as a person-centered planning process and risk management techniques. States may also include an individualized budget that identifies a dollar value for the services and supports under the control and direction of the individual or his or her representative. States are required to provide information in the state plan amendment about how an individualized budget is developed and implemented.

The state must ensure that the provision of home and community-based services meets federal and state guidelines for quality assurance. The state must establish standards for the conduct of the independent evaluation to prevent conflicts of interest, and must allow for at least annual redetermination of eligibility and appeals using the process for appeals under the State Plan.

States may elect to provide for a period of presumptive eligibility (not to exceed 60 days) for individuals that the state has reason to believe may be eligible for home and community-based services. The covered activities include carrying out the independent evaluation and assessment and, if eligible, the specific services the individual will receive.

In covering this benefit, a state may elect not to comply with existing Medicaid requirements related to statewideness and the income and resource rules applicable in the community, but only for purposes of providing home and community-based services in accordance with this benefit. This option should not be construed as applying to those receiving Medicaid in an institution as a result of a determination that the individual requires the level of care in a hospital, nursing facility or ICF/MR.

Federal Medicaid funding will continue to be available for individuals who are receiving Medicaid in an institution or home and community-based setting (under a HCBS waiver program or Section 1115 demonstration) as of the effective date of the Medicaid state plan amendment, without regard to whether the individuals satisfy the more stringent eligibility criteria established under that paragraph until the individual is discharged from the institution or waiver program, or no longer requires such level of care.

The provision requires the Secretary acting through the Director of the Agency for Healthcare Research and Quality, to consult with consumers and health and social service providers and other professionals knowledgeable about long-term care services and supports to develop program performance indicators, client function indicators, and measures of client satisfaction regarding HCBS offered under Medicaid.

The Secretary is required to use the indicators and measures to assess HCBS and outcomes, particularly with respect to a recipient's health and welfare, and the overall system for RCBS under Medicaid. The Secretary is also required to make best practices and comparative analyses of system features available to the public.

This provision will be effective on January 1, 2007.

Optional Choice of Self-directed Personal Assistance Services (Cash and Counseling) (Section 6023 of the Conference Agreement, and no provision in the Senate Bill, and Section 3132 of the House Bill)

Current law

Under current law, state Medicaid programs offer several types of long-term care services to individuals who, because of disability or chronic illness, need assistance with activities such as eating, bathing, and dressing. Medicaid programs have the option of covering personal care services and may also cover a broad set of other services through a home and community-based services (HCBS) waiver authorized under Section 1915(c) of the Social Security Act. To qualify for a HCBS waiver, the individual must require the level of care of a hospital, nursing facility or intermediate care facility for persons with mental retardation (ICF/MR).

Traditionally, Medicaid personal care and other related services have been provided to individuals through local public or private agencies. However, in the last decade, Medicaid beneficiaries with disabilities or chronic conditions and federal and state policymakers have been increasing the discretion that beneficiaries have over key elements of the service (e.g., what time a personal care worker comes to the home to help the beneficiary, who provides the service, etc.) These types of programs are broadly known as "self-directed" or "consumer-directed" programs. The specific elements that a Medicaid beneficiary can control vary widely depending upon the state and the type of service covered. Currently, Medicaid law allows certain types of self directed programs to be implemented through the normal Medicaid state plan and HCBS waiver process. Other types of self-directed programs require a research and demonstration waiver under Section 1115 of the Social Security Act.

Under the Medicaid personal care benefit, the Centers for Medicare and Medicaid Services (CMS) explicitly permits self-direction of personal care services. The CMS State Medicaid Manual specifies, "Medicaid beneficiaries may hire their own provider, train the provider according to their personal preferences, supervise and direct the provision of the personal care services and, if necessary, fire the provider." However, the state Medicaid agency maintains responsibility for monitoring service delivery and ensuring that qualified providers are delivering the personal care services. The state is not permitted to provide Medicaid funds directly to a consumer to pay for the personal care services.

Generally, CMS policy has been that payments for personal care (or similar) services delivered by legally responsible individuals (e.g., the parent of a minor child or a spouse) are not eligible for federal Medicaid matching funds. However, CMS has recently amended its policy so that under a HCBS waiver (though not the Medicaid personal care benefit), states have the option of paying legally responsible relatives in extraordinary circumstances when the provision of personal care services is determined to be necessary to ensure the health and welfare of the waiver participant and so long as the parent or spouse meets the Medicaid provider requirements established by the state.

Senate Bill

No provision.

House Bill

This proposal would allow a state to cover, under the Medicaid program, payment for part or all of the cost of self-directed personal assistance services (other than room and board) based on a written plan of care to individuals for whom there has been a deter-

mination that, but for the provision of such services, the individuals would require and receive personal care services under Medicaid state plan or home and community-based services under a HCBS waiver. Self-directed personal assistance services may not be provided to individuals who reside in a home or property that is owned, operated, or controlled by a provider of services, not related by blood or marriage.

The Secretary must not approve a state's self-directed personal assistance services program unless the state assures that the necessary safeguards have been taken to protect the health and welfare of individuals receiving these services and that financial accountability exists for funds expended for these services.

The state must also evaluate the need for personal care under the Medicaid state plan or personal services under a HCBS waiver for individuals who (1) are entitled to Medicaid personal care under the state plan or receive HCBS waiver services; (2) may require self-directed personal assistance services; and (3) may be eligible for self-directed personal assistance services. If covered by the state and at the choice of the individual, those who are likely to require personal care or HCBS waiver services must be informed of the feasible alternatives in the provision of Medicaid personal care services or personal assistance services under a HCBS waiver. The state must also provide a support system that ensures participants in the program are appropriately assessed and counseled prior to enrollment and are able to manage their budgets. Additional counseling and management support may be provided at the request of the participant.

The state will be required to submit an annual report to the Secretary which includes the number of individuals served and total expenditures on their behalf, in the aggregate. The state must also provide an evaluation of overall impact on the health and welfare of participants compared to non-participants every three years.

A state may provide self-directed personal assistance services under the state plan without regard to the Medicaid requirements for statewideness (under Section 1902(a)(1) of the Social Security Act), and may limit the population eligible to receive these services and the number of persons served without regard to Medicaid requirements regarding comparability (Section 1902(a)(10)(B) of the Social Security Act).

Under this provision, the term "self-directed personal assistance services" means personal care and related services, or HCBS waiver services that are provided to an eligible participant. Individuals participating in such services will be permitted, within an approved self-directed services plan and budget, to purchase personal assistance and related services, and hire, fire, supervise, and manage the individuals providing such services.

At the election of the state, a participant will be allowed to (1) choose as a paid service provider, any individual capable of providing the assigned tasks including legally liable relatives, and (2) use the individualized budget to acquire items that increase independence or substitute (such as a microwave oven or an accessibility ramp) for human assistance, to the extent that expenditures would otherwise be made for the human assistance.

An approved self-directed services plan and budget under this provision must meet the following requirements: (1) The participant (or his/her guardian or authorized representative if appropriate) exercises choice and control over the budget, planning, and purchase of self-directed personal assistance services, including the amount, duration, scope, provider and location of service provision; (2) There is an assessment of the needs,

strengths, and preferences of the participants for such service; (3) An individual's plan for self-directed services and supports, which has been developed and approved by the state, is based on a person-centered assessment process that builds upon the participant's capacity to engage in activities that promote community life; respects the participant's preferences, choices and abilities; and involves families, and professionals in the planning or delivery of services or supports as desired or required by the participant.

The budget for self-directed services and supports must be developed and approved by the state based on the assessment and plan (described above), and on a methodology that uses valid, reliable cost data, is open to public inspection, and includes a calculation of the expected cost of such services if those services were not self-directed. The budget may not restrict access to other medically necessary care and services furnished under the plan and approved by the state but not included in the budget.

In establishing and implementing the self-directed services plan and budget, appropriate quality assurance and risk management techniques must be used which recognize the roles and sharing of responsibilities in obtaining services in a self-directed manner and which assure the appropriateness of the plan and the budget, based on the individual's resources and capabilities.

A state may employ a financial management entity to make payments to providers, track costs, and make reports under this program. Payment for the activities of the financial management entity will be reimbursed at the same rate as other Medicaid administrative activities (generally federal Medicaid administrative reimbursement is 50%, though certain activities may be eligible for 75% reimbursement).

This provision will apply to apply to services furnished on or after January 1, 2006.

Conference Agreement

The conference agreement follows the House provision except that the effective date has been changed to January 1, 2007.

Authority to continue providing certain adult day health care services or medical adult day care services (No provision in Conference Agreement, Section 6039B of Senate Bill, and no provision in the House Bill)

Current Law

Most states currently offer adult day care services to Medicaid beneficiaries through either the rehabilitation or clinic benefits of the Medicaid state plan (in about 8 states), or through a home and community-based (HCBS) waiver under Section 1915(c) of Medicaid law (in about 44 states through 102 separate HCBS programs).

Senate Bill

The Senate bill would prohibit the Secretary of HHS from denying federal Medicaid funding or withdrawing federal approval for adult day health care services or medical adult day care services under the Medicaid state plan, as defined by the state and approved by the Secretary on or before 1982.

Chapter 3—Eliminating Fraud, Waste, and Abuse in Medicaid

Limitation on Use of Contingency Fee Arrangements (Section 6031 of the Conference Agreement, Section 6022 of the Senate Bill, and no provision in the House Bill)

Current Law

Federal law requires each state to designate a single state agency to administer or

supervise the administration of its Medicaid program. This agency, which is usually part of a welfare, health, or human resources umbrella agency, will often contract with other public or private entities (e.g., other state agencies or departments, consulting firms) to perform various administrative functions. In some cases, contingency fee arrangements are used to pay contractors based on Medicaid dollars saved, recovered, or otherwise obtained for the state (e.g., a fee equal to 10% of third party liability collections). The federal reimbursement rate for most Medicaid administrative costs is 50%.

In determining the amount of administrative costs—including contingency fees—that may be eligible for federal reimbursement, states must comply with a number of federal statutes and regulations. In general, federal Medicaid law requires states to use methods of administration that are found by the Secretary of HHS to be necessary for the proper and efficient operation of their Medicaid programs. With regard to contingency fee contracts, guidance issued by the Centers for Medicare and Medicaid Services (CMS) to its regional offices in 2002 notes that in order to be eligible for federal reimbursement, contingency fees must: (1) be based on Medicaid cost avoidance savings or recoveries in which the federal government shares, (2) be intended to produce Medicaid program savings, not additional expenditures reported for federal reimbursement, and (3) not be contingent upon recoveries from the federal government. CMS guidance also notes that states may not claim federal reimbursement for contingency fee payments made to another government unit for Medicaid administrative activities.

Additional federal guidance is contained in Office of Management Budget (OMB) Circular A-87, which establishes principles and standards for determining allowable costs for states (and other governmental units) under federal grant programs such as Medicaid. The circular specifies that the cost of professional and consultant services are allowable when reasonable in relation to the services rendered and when not contingent upon recovery of the costs from the federal government.

Senate Bill

Under the Senate bill, states would not be eligible for federal reimbursement of amounts expended in connection with a contract or agreement (other than a Medicaid managed care contract) between the state Medicaid agency (or any state or local agency that administers a portion of the Medicaid program) and a consultant or other contractor if the terms of compensation for the consultant or other contractor do not meet standards established by the Inspector General (IG) of HHS.

Such standards would be designed by the IG to ensure prudent purchasing and program integrity with respect to federal funds. The IG would annually review the standards and revise them as necessary to promptly address new compensation arrangements that may present a risk to Medicaid program integrity. The standards would be issued no later than six months after enactment of the provision.

The provision would be effective January 1, 2007, except that in the case of a state which the Secretary of HHS determines that state legislation is required for compliance, the state would not be regarded as failing to comply solely on the basis of its failure to meet the requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the state legislature that begins after the date of enactment of the bill.

House Bill

No provision.

Conference Agreement

The conference agreement follows the House bill.

Encouraging the Enactment of State False Claims Acts (Section 6032 of the Conference Agreement, Section 6023 of the Senate Bill, and no provision in the House Bill)

Current Law

Under the federal False Claims Act, anyone who knowingly submits a false claim to the federal government is liable for damages up to three times the amount of the government's damages plus mandatory penalties of \$5,500 to \$11,000 for each false claim submitted. Under *qui tam* (whistleblower) provisions of the act, private citizens with knowledge of potential violations ("relators") may file suit on behalf of the government and are entitled to receive a share of the proceeds of the action or settlement of the claim (ranging from 15% to 30%, depending on whether or not the government elects to participate in the case).

States may have a variety of laws in place to facilitate prosecution of Medicaid fraud, and some have established their own versions of a false claims act. With limited exceptions, a state must repay the federal share (generally determined by the federal medical assistance percentage, or FMAP) of any provider overpayment within 60 days of discovering the overpayment, regardless of whether or not the state has recovered the overpayment.

Senate Bill

Under the Senate bill, if a state has in effect a law relating to false or fraudulent claims that meets certain requirements (described below), the federal medical assistance percentage, with respect to any amounts recovered under a state action brought under such a law, would be decreased by 10 percentage points.

The state law relating to false and fraudulent claims must be determined by the Inspector General of HHS, in consultation with the Attorney General, to: (1) establish liability to the state for false or fraudulent claims described in the federal False Claims Act, with respect to Medicaid expenditures, (2) contain provisions that are at least as effective in rewarding and facilitating *qui tam* actions as those in the federal False Claims Act, (3) contain a requirement for filing an action under seal for 60 days with review by the state Attorney General, (4) contain a civil penalty that is not less than the amount authorized by the federal False Claims Act, (5) contain provisions that are designed to prevent a windfall recovery for a *qui tam* relator that files a federal and state action for the same false or fraudulent claim.

The provision would be effective January 1, 2007.

House Bill

No provision.

Conference Agreement

The conference agreement follows the Senate bill, but excludes language regarding windfall recoveries for *qui tam* relators.

Employee Education About False Claims Recovery (Section 6033 of the Conference Agreement, Section 6024 of the Senate Bill, and no provision in the House Bill).

Current Law

No provision.

Senate Bill

Under the Senate bill, a state would be required to provide that any entity that receives annual Medicaid payments of at least \$1 million, as a condition of receiving such payments, must: (1) establish written policies, procedures, and protocols for training

of all employees of the entity, and of any contractor or agent of the entity, that includes a detailed discussion of the federal False Claims Act, federal administrative remedies for false claims and statements, any state laws pertaining to civil or criminal penalties for false claims and statements, and whistleblower protections under such laws, with respect to the role of such laws in preventing and detecting fraud, waste, and abuse in federal health care programs, (2) include in such written materials detailed provisions and training regarding the entity's policies and procedures for detecting and preventing fraud, waste, and abuse, (3) include in any employee handbook for the entity a specific discussion of such laws, the rights of employees to be protected as whistleblowers, and the entity's policies and procedures for detecting and preventing fraud, waste, and abuse, and (4) require mandatory training for all employees of the entity and of any contractor or agent of the entity, at the time of hiring, with respect to such laws and the entity's policies and procedures for detecting fraud, waste, and abuse.

The provision would be effective January 1, 2007, except that in the case of a state which the Secretary of HHS determines that state legislation is required for compliance, the state would not be regarded as failing to comply solely on the basis of its failure to meet the requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the state legislature that begins after the date of enactment of the bill.

House Bill

No provision.

Conference Agreement

The conference agreement follows the Senate bill, but applies only to entities receiving annual Medicaid payments of at least \$5 million and does not require the establishment of protocols and procedures for training of employees (i.e., only written policies are required).

Prohibition on Restocking and Double Billing of Prescription Drugs (Section 6034 of the Conference Agreement, and Section 6025 of the Senate Bill, and no provision in the House Bill)

Current Law

No provision.

Senate Bill

The Senate bill would prohibit federal matching payments for the ingredient cost of a covered outpatient drug for which the pharmacy has already received payment (other than a reasonable re-stocking fee). It would become effective on the first day of the first fiscal quarter beginning after enactment.

House Bill

No provision.

Conference Agreement

The conference agreement includes the Senate provision.

Medicaid Integrity Program (Section 6035 of the Conference Agreement, Section 6026 of the Senate Bill, and no provision in the House Bill)

Current Law

States and the federal government share in the responsibility for safeguarding Medicaid program integrity. States must comply with federal requirements designed to ensure that Medicaid funds are properly spent (or recovered, when necessary). The Centers for Medicare and Medicaid Services (CMS) is the primary federal agency responsible for providing oversight of states' activities and facilitating their program integrity efforts. The HHS Office of Inspector General (OIG)

also plays a role in Medicaid fraud and abuse detection and prevention efforts through its investigations, audits, evaluations, issuances of program recommendations, and other activities.

As part of its program integrity activities, CMS operates a Medicare-Medicaid (MediMedi) data match project that analyzes claims data from both programs together to detect aberrant patterns that may not be evident when billings are viewed in isolation (e.g., providers submitting claims to both programs for procedures that add up to more than 24 hours of patient care in a single day). The Medi-Medi project began with one state in 2001, and was subsequently expanded to include eight others. It is primarily supported by "wedge" funds from the Health Care Fraud and Abuse Control (HCFAC) account within the federal Hospital Insurance (Medicare Part A) trust fund. HCFAC wedge funds are divided between the Department of Justice, the HHS Office of Inspector General, CMS, and other HHS agencies. The HCFAC account also funds the Medicare Integrity Program and activities of the Federal Bureau of Investigation related to health care fraud. Annual minimum and maximum HCFAC appropriations are specified in statute.

Senate Bill

The Senate bill would establish a Medicaid Integrity Program under title XIX. The Secretary of HHS would enter into contracts with eligible entities to carry out the program's activities, which would include: (1) review of the actions of individuals or entities furnishing items or services for which a Medicaid payment may be made, (2) audit of claims for payment for items or services furnished or for administrative services rendered, (3) identification and recovery of overpayments to individuals or entities receiving federal funds under Medicaid, (4) education of service providers, managed care entities, beneficiaries, and other individuals with respect to payment integrity and benefit quality assurance issues.

An entity would be eligible to enter into a contract to carry out Medicaid Integrity Program activities if it meets eligibility and contracting requirements similar to those under the Medicare Integrity Program. Beginning in FY2006 and every five years, the Secretary of HHS—in consultation with the Attorney General, the Director of the Federal Bureau of Investigation, the Comptroller General of the United States, the Inspector General of HHS, and state officials with responsibility for controlling provider fraud and abuse under Medicaid—would establish a comprehensive plan for ensuring Medicaid program integrity by combating fraud, waste, and abuse.

Appropriations for the Medicaid Integrity Program would total \$50 million in FY2006, \$49 million in each of FY2007 and FY2008, \$74 million in each of FY2009 and FY2010, and \$75 million in FY2011 and each fiscal year thereafter. No later than 180 days after the end of each fiscal year (beginning with FY2006), the Secretary of HHS would submit a report to Congress that identifies the use and effectiveness of the use of such funds.

A Medicaid Chief Financial Officer (CFO) and Medicaid Program Integrity Oversight Board would also be established under title XIX. The Medicaid CFO would be appointed by and would report directly to the Administrator of CMS. The duties and authority of the Medicaid CFO would be comparable to those of other CFOs with respect to the management and expenditure of federal funds under federal health care programs. A Medicaid Program Integrity Oversight Board would also be established by the Secretary of HHS. The duties and authority of the board

would be comparable to those of the Medicare Contractor Oversight Board, and would include responsibility for identifying vulnerabilities and developing strategies for minimizing integrity risks to state Medicaid programs.

States would be required to comply with any requirements determined by the Secretary of HHS to be necessary for carrying out the Medicaid Integrity Program, or the duties of the Medicaid CFO and the Medicaid Program Integrity Oversight Board.

In each of fiscal years 2006 through 2010, \$25 million would be appropriated for Medicaid activities of the HHS Office of Inspector General (in addition to any other amounts appropriated or made available for its Medicaid activities, to remain available until expended). No later than 180 days after the end of each fiscal year (beginning with FY2006), the Inspector General of HHS would submit a report to Congress that identifies the use and effectiveness of the use of such funds.

The Secretary of HHS would significantly increase the number of full-time equivalent CMS employees whose duties consist solely of ensuring the integrity of the Medicaid program.

House Bill

No provision.

Conference Agreement

The conference agreement generally follows the Senate bill, but excludes recovery of overpayments from the list of Medicaid Integrity Program activities and does not establish a Medicaid CFO or oversight board. It appropriates \$5 million in FY2006, \$50 million in each of FY2007 and FY2008, and \$75 million in each fiscal year thereafter for Medicaid Integrity Program activities.

The conference agreement also establishes a national expansion of the Medicare-Medicaid data match project (referred to as the Medi-Medi Program) as a required activity of the Medicare Integrity Program under Title XVIII of the Social Security Act. The Secretary of HHS shall enter into contracts with eligible entities to ensure that the Medi-Medi Program is conducted for the purpose of: (1) identifying program vulnerabilities in Medicare and Medicaid through the use of computer algorithms to look for payment anomalies, (2) working with states, the Attorney General, and the Inspector General of HHS to coordinate appropriate actions to protect Medicare and Medicaid expenditures, and (3) increasing the effectiveness and efficiency of both programs through cost avoidance, savings, and recoupment of fraudulent, wasteful, or abuse expenditures. At least quarterly, the Secretary shall make available in a timely manner any data and statistical information collected by the Medi-Medi Program to the Attorney General, the Director of the Federal Bureau of Investigation, the Inspector General of HHS, and the states.

In addition to HCFAC appropriations for the Medicare Integrity Program (which have a statutory floor and ceiling), the Medi-Medi Program would receive \$12 million in FY2006, \$24 million in FY2007, \$36 million in FY2008, \$48 million in FY2009, and \$60 million in FY2010 and each fiscal year thereafter.

Enhancing Third Party Identification and Payment (Section 6036 of the Conference Agreement, Section 6021 of the Senate Bill, and Section 3144 of the House Bill)

Current Law

Third-party liability (TPL) refers to the legal obligation of third parties—individuals, entities, or programs—to pay all or part of the expenditures for medical assistance furnished under a Medicaid state plan. In general, federal law requires Medicaid to be the payor of last resort, meaning that all other

available third parties must meet their legal obligation to pay claims before the Medicaid program pays for the care of an individual. Examples of third parties which may be liable to pay for services include employment-related health insurance, court-ordered medical support (including health insurance) from noncustodial parents, workers' compensation, long-term care insurance, and other state and federal programs (with certain exceptions, such as the Indian Health Service).

States are required to take all reasonable measures to ascertain the legal liability of third parties to pay for care and services available under the state Medicaid plan. To this end, they must: (1) collect health insurance information from individuals at the time of initial application for Medicaid and during any subsequent redeterminations of eligibility, (2) match data provided by Medicaid applicants and recipients to certain files maintained by government agencies (e.g., state wage and income, Social Security Administration wage and earnings, state workers' compensation, state motor vehicle accident reports), (3) identify claims with diagnosis codes that would indicate trauma-related injury for which a third party may be liable for payment, and (4) follow up on TPL leads identified through these information-gathering activities.

If the state has determined that probable third party liability exists at the time a claim for reimbursement is filed, it generally must reject the claim and return it to the provider for a determination of the amount of third party liability (referred to as "cost avoidance"). If probable liability has not been established or the third party is not available to pay the individual's medical expenses, the state must pay the claim and then attempt to recover the amount paid (referred to as "pay and chase"). States are generally required to cost avoid claims unless they have an approved waiver that allows them to use the pay and chase method.

As a condition of eligibility for Medicaid, individuals are required to assign to the state Medicaid agency their rights to medical support and payment for medical care from any third party. This assignment of rights facilitates TPL recovery by allowing the state to collect, on behalf of Medicaid enrollees, amounts owed by third parties for claims paid by Medicaid.

Senate Bill

The Senate bill would amend the list of third parties named in Section 1902(a)(25) of the Social Security Act for which states must take all reasonable measures to ascertain the legal liability to include: (1) self-insured plans, (2) pharmacy benefit managers, and (3) other parties that are legally responsible (by statute, contract, or agreement) for payment of a claim for a health care item or service. It would also amend that section to include these entities in the list of health insurers that states must prohibit from taking an individual's Medicaid status into account when enrolling the individual or making payments for benefits to or on behalf of the individual.

In addition, it would require a state to provide assurances satisfactory to the Secretary of HHS that it has laws in effect requiring health insurers (including parties that are legally responsible for payment of a claim for a health care item or service), as a condition of doing business in the state, to: (1) provide, upon request of the state, eligibility and claims payment data with respect to individuals who are eligible for or receiving Medicaid, (2) accept an individual's or other entity's assignment of rights (i.e., rights to payment from the parties) to the state, (3) respond to any inquiry from the state re-

garding a claim for payment for any health care item or service submitted not later than three years after the date such item or service was provided, and (4) agree not to deny a claim submitted by the state solely on the basis of the date of submission of the claim.

The provision would be effective January 1, 2006, except that in the case of a state which the Secretary of HHS determines that state legislation is required for compliance, the state would not be regarded as failing to comply solely on the basis of its failure to meet the requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the state legislature that begins after the date of enactment of the bill.

House Bill

The House bill is similar to the Senate bill.

Conference Agreement

The conference agreement generally follows the Senate and House bills, but substitutes the term "managed care organization" for "health maintenance organization" in Section 1902(a)(25) of the Social Security Act and specifies that states must require parties legally responsible for payment of a claim to provide, upon request of the state, information to determine during what period an individual or their spouses and dependents may be (or may have been) covered by a health insurer and the nature of the coverage that is or was provided by the health insurer (including the name, address, and identifying number of the plan) in a manner prescribed by the Secretary of HHS.

Chapter 4—Flexibility in Cost Sharing and Benefits

State Option for Alternative Medicaid Premiums and Cost Sharing (Section 6041 of the Conference Agreement, no provision in the Senate Bill, and Sections 3121 and 3126 of the House Bill)

Current Law

With some exceptions, premiums and enrollment fees are generally prohibited under Medicaid. When applicable, nominal amounts for such charges are between \$1 and \$19 depending on family income. States are allowed to establish nominal service-related cost-sharing requirements that are generally between \$0.50 and \$3, depending on the cost of the service provided. The regulations that specify nominal premium and service-related cost-sharing amounts were published and amended in the late 1970s and the early 1980s. These amounts are not adjusted by any factor. Specific services and groups are exempted from such cost-sharing. Waiver authority is required to change these rules.

Under certain circumstances, families qualifying for transitional Medicaid, pregnant women and infants with income over 150% FPL, medically needy groups, and workers with disabilities may be charged premiums for Medicaid coverage.

All service-related cost-sharing is prohibited for: (1) children under 18 years of age; (2) pregnant women for any services that relate to the pregnancy or to any other medical condition which may complicate pregnancy; (3) services furnished to individuals who are inpatients in a hospital, or are residing in a long term care facility or in another medical institution if the individual is required to spend most of their income for medical care; (4) services furnished to individuals receiving hospice care; (5) emergency services; and (6) family planning services and supplies. For most other beneficiaries and services, states may impose nominal service-related cost-sharing (described above). For workers with disabilities, service-related cost-sharing may be required that exceeds nominal amounts as long as they are set on a sliding scale based on income.

Under the state Medicaid plan, providers must not deny care or services to Medicaid beneficiaries due to the individual's inability to pay a cost-sharing charge. However, this requirement does not eliminate the beneficiary's liability for payment of such charges. For certain groups of pregnant women and infants for which monthly premiums may be charged, states must not require prepayment and must not terminate Medicaid eligibility for failure to pay such premiums until such failure continues for at least 60 days. States may waive those premiums when such payments would cause undue hardship.

States may offer Medicaid to certain uninsured women who are under age 65, and are in need of treatment for breast or cervical cancer based on screening services provided by an early detection program run by the CDC. This group has access to the same Medicaid services offered to the categorically needy in a given state, and are subject to Medicaid's nominal cost-sharing rules.

Senate Bill

No provision.

House Bill

The House Bill would allow states to impose premiums and cost-sharing for any group of individuals for any type of service, through Medicaid state plan amendments (rather than waivers), subject to specific restrictions. Premiums and cost-sharing imposed under this option would be allowed to vary among classes or groups of individuals, or types of service, including through the use of tiered cost-sharing for prescription drugs. Generally, the total amount of annual cost-sharing for all individuals in a family would be capped at 5% of family income for all families regardless of income. Individuals in families with income below 100% FPL would not be subject to premiums but could be subject to nominal service-related cost-sharing. Individuals in families with income exceeding 100% FPL may be subject to premiums and higher than nominal cost-sharing amounts.

Premiums would not be permitted for: (1) mandatory groups of children under 18, including individuals receiving adoption or foster care assistance under Title IV-E regardless of age; (2) pregnant women; (3) terminally ill persons receiving Medicaid hospice care; (4) individuals in institutions who are required to spend for costs of care all but a minimal amount of their income for personal needs. States may exempt additional groups from premiums.

Service related cost-sharing would not be permitted for: (1) services provided to mandatory groups of children under 18, including individuals receiving adoption or foster care assistance under Title IV-E regardless of age; (2) preventive services provided to children under 18 regardless of family income; (3) services provided to pregnant women that relate to pregnancy or to other medical conditions that may complicate pregnancy; (4) services provided to individuals receiving Medicaid hospice services; (5) services provided to individuals in institutions who are required to spend for costs of care all but a minimal amount of their income for personal needs; (6) emergency services; and (7) family planning services and supplies. States may exempt additional individuals or services from service-related cost-sharing.

In applying limits on cost-sharing amounts under this option that states may impose on individuals under 100% FPL, beginning with 2006, the Secretary would be required to increase nominal amounts of service-related cost-sharing by the annual percentage increase in the medical care component of the consumer price index (CPI) for all urban consumers (U.S. city average), as rounded up in an appropriate manner.

The bill further specifies that these provisions would not prevent states from further limiting cost-sharing, affect the authority of the Secretary to waive limits on premiums or cost-sharing, nor affect waivers in effect before the date of enactment.

The bill would allow states to condition the provision of medical assistance on the payment of premiums, and to terminate Medicaid eligibility on the basis of failure to pay a premium if that failure continues for at least 60 days. States may apply this provision to some or all groups of beneficiaries, and may waive premium payments in cases where such payments would be an undue hardship. In addition, the provision would allow states to permit providers participating in Medicaid to require a Medicaid beneficiary to pay authorized cost-sharing as a condition for the provision of care or services. Providers would also be allowed to reduce or waive cost-sharing amounts.

The Government Accountability Office (GAO) would be required to conduct a study of the impact of premiums and cost-sharing under Medicaid on access to and utilization of services. The report would be required to be submitted to Congress no later than January 1, 2008.

These provisions would apply to cost-sharing for items and services furnished on or after January 1, 2006. The House bill also specifies that none of the proposed cost-sharing (or benefit) provisions described above would apply to women who qualify for Medicaid under the breast and cervical cancer eligibility group.

Conference Agreement

The conference agreement includes the House bill, with modifications. It clarifies that rules with respect to optional cost sharing for prescribed drugs (see below) are separate from the rules for other optional cost sharing. Explicit cost sharing limits for individuals in families with income under 100% FPL are dropped in the conference agreement. For individuals in families with income between 100 and 150% FPL: (1) no premiums may be imposed, (2) cost sharing for any item or service cannot exceed 10% of the cost of the item or service, and (3) the total aggregate amount of all cost-sharing (including cost sharing for prescribed drugs and emergency room copayments for non-emergency care; see below) cannot exceed 5% of family income as applied on a quarterly or monthly basis as specified by the state. For individuals in families with income above 150% FPL: (1) the total aggregate amount of all cost sharing (including cost sharing for prescribed drugs and emergency room copayments for non-emergency care) cannot exceed 5% of family income as applied on a quarterly or monthly basis as specified by the state, and (2) cost-sharing for any item or service cannot exceed 20% of the cost of the item or service.

Two groups are added to the list of those exempt from paying premiums and cost-sharing under the House bill. In the conference agreement, these additional groups include (1) children in foster care who receive aid and assistance under Part B of Title IV (Child and Family Services) of the Social Security Act; and (2) women who qualify for Medicaid under the breast and cervical cancer eligibility group (a technical change from the House bill).

In addition, the agreement clarifies that providers could reduce or waive cost-sharing on a case-by-case basis.

Under the conference agreement, increases in the nominal cost-sharing amounts follow the House bill (i.e., annual adjustments using the medical CPI), but apply more broadly to existing cost-sharing provisions in statute (Section 1916) as well as to the

new cost-sharing provisions in the House bill specific to prescription drugs and non-emergency care provided in an emergency room (described below).

Special Rules for Cost Sharing for Prescription Drugs (Section 6042 of the Conference Agreement, no provision in the Senate Bill, and Section 3122 of the House Bill)

Current Law

States are allowed to establish nominal service-related cost-sharing requirements (defined in regulation) that are generally between \$0.50 and \$3, depending on the cost of the service provided. Specific services and groups are exempted from such cost-sharing. Waiver authority is required to change these rules. As with other Medicaid benefits, nominal cost-sharing may be imposed on prescribed drugs, and states may vary nominal cost-sharing amounts for preferred and non-preferred drugs. States may also implement prior authorization for prescribed drugs.

Senate Bill

No provision.

House Bill

The House bill would allow states to impose cost-sharing amounts that exceed the proposed state option limits described above for certain state-identified non-preferred drugs if the cost sharing plan meets the following characteristics. Under this option, states may impose higher cost-sharing amounts for non-preferred drugs within a class; waive or reduce the cost-sharing otherwise applicable for preferred drugs within such class; and must not apply such cost-sharing for preferred drugs to persons exempt from cost-sharing (identified above).

Cost-sharing for non-preferred drugs would be based on multiples of the nominal amounts based on family income. For persons with family income below 100% of FPL, nominal cost sharing would apply. For those with family income at or above 100% but below 150% of FPL, the multiple is equal to two times the applicable nominal amount, and for those with income equal to or exceeding 150% of FPL, the multiple is equal to three times the applicable nominal amount. For persons generally exempt from cost-sharing (identified above), cost-sharing for non-preferred drugs may be applied. Such cost-sharing may not exceed nominal amounts, and aggregate caps on cost-sharing (in terms of nominal amounts and maximum cost-sharing based on the specified percentage of family income identified above) would still apply.

For Medicaid purposes, states would not be allowed to treat a preferred drug under the TRICARE pharmacy benefit program as a non-preferred drug, nor could states impose cost-sharing that exceeds the standards under this program that are in effect on the date of enactment for this provision.

In cases in which a prescribing physician determines that the preferred drug would not be effective or would have adverse health effects or both, the state may impose the cost-sharing amount for preferred drugs on the prescribed non-preferred product.

The House bill would not prevent states from excluding specified drugs or classes of drugs from these special cost-sharing rules.

States would be prohibited from implementing these special cost-sharing rules for prescription drugs unless the state has instituted a system for prior authorization and related appeals processes for outpatient prescription drugs.

These provisions would become effective for cost-sharing imposed for items and services furnished on or after October 1, 2006.

Conference Agreement

The conference agreement includes the House bill, with modifications. Cost-sharing

for non-preferred drugs may not exceed: (1) nominal amounts for individuals in families with income below or equal to 150% FPL, and (2) 20% of the cost of the drug for individuals in families with income above 150% FPL.

The conference agreement also drops both the TRICARE and the prior authorization/appeals process provisions in the House bill. It also changes the effective date of these provisions to January 1, 2007.

Emergency Room Copayments for Non-Emergency Care (Section 6043 of the Conference Agreement, no provision in the Senate Bill, and Section 3123 of the House Bill)

Current Law

Waivers may be used to allow states to impose up to twice the otherwise applicable nominal cost-sharing amounts for non-emergency services provided in a hospital emergency room (ER). States may impose these higher amounts if they have established that Medicaid beneficiaries have available and accessible alternative sources of non-emergency, outpatient services.

Senate Bill

No provision.

House Bill

The House bill would allow states, through a state plan amendment, to impose increased cost-sharing on state-specified groups for non-emergency services provided in an ER, when certain conditions are met. First, alternative non-emergency providers must be available and accessible to the person seeking care. Second, after initial screening but before the non-emergency care is provided at the ER, the beneficiary must be told: (1) the hospital can require a higher copayment, (2) the name and location of an alternative non-emergency provider and that this provider and that a lower copayment may apply, and (3) the hospital can provide a referral. When these conditions are met, states could apply or waive cost-sharing for services delivered by the alternate provider.

For persons with income below 100% FPL, cost-sharing for non-emergency services in an ER could not exceed twice the nominal amounts. Individuals exempt from premiums or service-related cost-sharing under other provisions of this bill may be subject to nominal copayments for non-emergency services in an ER, only when no cost-sharing is imposed for care in hospital outpatient departments or by other alternative providers in the area served by the hospital ER. Aggregate caps on cost-sharing established under this bill (described in Sec. 3121(a)) would still apply.

These provisions would have no impact on a hospital's obligations with respect to screening and stabilizing emergency medical conditions, nor would they modify the application of the prudent-layperson standard with respect to payment or coverage of emergency services by any managed care organization. In addition, no hospital or physician that makes a cost-sharing determination would be liable in any civil action or proceeding, absent a finding by clear and convincing evidence of gross negligence. Liabilities related to the provision of care (or failure to do so) would not be affected by these provisions.

"Non-emergency services" would mean any care or services furnished in an ER that the physician determines does not constitute an appropriate medical screening examination or stabilizing examination and treatment screening required for hospitals under Medicare law (regarding examination and treatment for emergency medical conditions and women in labor). "Alternative non-emergency services provider" would mean a Medicaid-participating health care provider,

such as a physician's office, health care clinic, community health center, hospital outpatient department, or similar health care provider that provides clinically appropriate services for such diagnosis or treatment of the condition within a clinically appropriate time of the provision of such non-emergency services.

The Secretary would be required to provide for payments to states for the establishment of alternate non-emergency providers, or networks of such providers. The House bill also authorizes and appropriates \$100 million for paying such providers for the 4-year period beginning with 2006. The Secretary would be required to give a preference to states that establish or provide for alternate non-emergency services providers (or networks) that serve rural or underserved areas where beneficiaries may have limited access to primary care providers, or in partnership with local community hospitals. To access these funds, states would be required to file an application meeting requirements set by the Secretary.

These amendments would apply to non-emergency services furnished on or after the date of enactment of this Act.

Conference Agreement

The conference agreement includes the House bill, with modifications. This provision allows states to permit a hospital to impose cost sharing for non-emergency care delivered in an ER under the same conditions identified in the House bill. But the conditions defining the beneficiary notification process are expanded to explicitly include a medical screening examination for emergency medical conditions as defined in Medicare law and a determination that such an emergency does not exist, prior to the delivery of non-emergency care in the ER. In addition, the hospital (not the physician or hospital) is responsible for the notification process.

The conference agreement clarifies that no hospital or physician can be held liable in any civil action or proceeding for the imposition of cost sharing under this new option, absent a finding of gross negligence by the hospital or physician. This provision does not affect liability with respect to examination and treatment for emergency medical conditions (including women in labor) as specified in Medicare law or otherwise applicable under state law based on the provision of (or failure to provide) care.

The conference agreement also slightly modifies the definition of an alternative non-emergency services provider by specifying that such providers be able to diagnose or treat a condition contemporaneously with (rather than within a clinically appropriate time of) the provision of similar non-emergency services that would be provided in an ER.

The conference agreement also changes the effective date of these provisions to January 1, 2007.

Use of Benchmark Packages (Section 6044 of the Conference Agreement, no provision in the Senate Bill, and Section 3124 of the House Bill)

Current Law

Categorically needy (CN) eligibility groups include families with children, the elderly, certain persons with disabilities, and certain other pregnant women and children who meet applicable financial standards. Medically needy (MN) groups include the same types of individuals, but different, typically higher financial standards apply. Some benefits are mandatory for the CN (e.g., inpatient and outpatient hospital care, lab and x-ray services, physician services, nursing facility care for persons age 21 and over). Other benefits are optional for the CN (e.g., other prac-

itioner services, routine dental care, physical therapy). Benefits offered to CN groups must be the same statewide, and in amount, duration and scope. States may offer a more restrictive benefit package to the MN, but must offer prenatal and delivery services, ambulatory services for persons under 21 and those entitled to institutional services, and home health services for those entitled to nursing facility care. Benefits offered to MN groups must be the same statewide, and in amount, duration and scope. Changes in comparability or statewideness for benefits for CN and MN groups require a waiver.

As described above, some benefits are mandatory for the CN (e.g., inpatient and outpatient hospital care, lab and x-ray services, physician services, FQHC services, nursing facility care for persons age 21 and over). Other benefits are optional for the CN (e.g., other practitioner services, routine dental care, physical therapy). Benefits offered to CN groups must be the same statewide, and in amount, duration and scope. States may offer a more restrictive benefit package to the MN, but must offer prenatal and delivery services, ambulatory services for persons under 21 and those entitled to institutional services, and home health services for those entitled to nursing facility care. Benefits offered to MN groups must be the same statewide, and in amount, duration and scope. Changes in comparability or statewideness for benefits for CN and MN groups require a waiver.

Under the Early and Periodic, Screening, Diagnostic and Treatment (EPSDT) benefit, Medicaid children in CN groups are guaranteed access to all federally coverable routine and follow-up dental services necessary to treat a dental problem. EPSDT may be offered to MN children.

Both the services provided by rural health clinics (RHCs) and federally qualified health services (FQHCs) are required benefits for CN groups under Medicaid. Among other mandatory benefits for MN groups, states must offer ambulatory services for persons under 21 and those entitled to institutional services. Such ambulatory services may include RHC and FQHC services at state option. In general, RHCs and FQHCs are paid on a per visit basis, using a prospective payment system that takes into account costs incurred and changes in the scope of services provided. Per visit payment rates are also adjusted annually by the Medicare Economic Index applicable to primary care services.

Senate Bill

No provision.

House Bill

The House bill would give states the option to provide Medicaid to state-specified groups through enrollment in benchmark and benchmark-equivalent coverage (described below). States could only apply this option to eligibility categories established before the date of enactment of this provision. States may choose to provide wrap-around and additional benefits.

Enrollment in benchmark and benchmark-equivalent coverage could be required for "full benefit eligible individuals," including persons eligible for all services covered for the CN, or any other category of eligibility for all covered services as determined by the Secretary. Certain individuals would be excluded from the definition of a full-benefit eligible, including (1) the MN; (2) CN individuals in certain states who are required to pay for medical expenses from their income until their remaining net income meets SSI financial standards in effect in 1972; and (3) other individuals who qualify for Medicaid when costs incurred for medical expenses or other remedial care are subtracted from income to meet financial eligibility require-

ments (also known as spend-down populations).

The House bill would require that specified groups be exempted from this option, including: (1) mandatory pregnant women and children; (2) dual eligibles (i.e., Medicaid beneficiaries also entitled to benefits under Medicare); (3) terminally ill persons receiving Medicaid hospice services; (4) individuals in medical institution who are required, as a condition of receiving institutional care, to pay for costs of medical care except for a minimal amount retained from their income for personal needs; (5) individuals who are medically frail or who have special medical needs, as identified in accordance with regulations of the Secretary; and (6) individuals who qualify for Medicaid long-term care services (i.e., nursing facility services, a level of care in any institution equivalent to nursing facility services, home and community-based waiver services, home health services, home and community-care for functionally disabled elderly individuals, personal care, and other optional long-term care services offered by the state).

Benchmark and benchmark-equivalent packages would be nearly identical to those offered under SCHIP, with some additions. Benchmark coverage would include: (1) the standard Blue Cross/Blue Shield preferred provider plan under FEHBP; (2) health coverage for state employees; and (3) health coverage offered by the largest commercial HMO. Benchmark equivalent coverage would have the same actuarial value as one of the benchmark plans. Such coverage would include: (1) inpatient and outpatient hospital services, (2) physician services, (3) lab and x-ray services, (4) well child care, including immunizations, and (5) other appropriate preventive care (designated by the Secretary). Such coverage must also include at least 75% of the actuarial value of coverage under the benchmark plan for: (1) prescribed drugs, (2) mental health services, (3) vision care, and (4) hearing services. Determination of actuarial value would follow generally accepted actuarial principles and methodologies and would be conducted by a member of the American Academy of Actuaries.

Both benchmark and benchmark-equivalent coverage would include "qualifying child benchmark dental coverage." A qualifying child would include individuals under 18 with family income below 133% FPL. Benchmark dental coverage would be equivalent to or better than the dental plan that covers the greatest number of individuals in the state who are not eligible for Medicaid.

States could only enroll eligible beneficiaries in benchmark and benchmark-equivalent coverage if such persons have access to services provided by RHCs and FQHCs, and the Medicaid prospective payment system for both types of providers remains in effect.

These provisions would be effective upon the date of enactment.

Conference Agreement

The conference agreement includes the House bill, with modifications. For any child under age 19 in one of the major mandatory and optional eligibility groups (defined in Section 1902(a)(10)(A) under the state Medicaid plan, wrap-around benefits to the benchmark or benchmark-equivalent coverage consists of early and periodic screening, diagnostic and treatment services as defined in current Medicaid law. The agreement drops benchmark dental coverage and accompanying provisions defining the children who would qualify for such benchmark dental coverage.

Also, under the conference agreement, states may exercise this option only for eligibility groups that were established under

the state plan before the date of enactment of this option.

The conference agreement drops mandatory children under 18 (under Section 1902(a)(10)(A)(i) from the list of groups exempted from this option.

The conference agreement also expands the list of specified groups that would be exempted from benchmark coverage to include: (1) individuals who qualify for Medicaid under the state plan on the basis of being blind or disabled regardless of whether the individual is eligible for SSI on such basis, including children with disabilities that meet SSI disability standards who require institutional care, but for whom care is delivered outside the institution, and the cost of that care does not exceed the otherwise applicable institutional care (also known as Katie Beckett or TEFRA children); (2) children in foster care receiving child welfare services (under Part B of Title IV) and children receiving foster care or adoption assistance under Part E of Title IV without regard to age; (3) individuals who qualify for Medicaid on the basis of receiving assistance under TANF (as in effect on or after the welfare reform effective date); (4) women in the breast and cervical cancer eligibility group (a technical change from the House bill); and (5) other "limited services beneficiaries," including certain tuberculosis-infected individuals, and legal and undocumented non-citizens who meet the financial and categorical requirements for Medicaid eligibility without regard to time in the U.S. and are eligible only for emergency medical services.

The conference agreement also adds to the set of three benchmark benefit packages, a fourth option called "secretary approved coverage" which may include any other health benefits coverage that the Secretary determines will provide appropriate coverage for the population targeted to receive such coverage.

Finally, the conference agreement changes the effective date of these provisions to January 1, 2007.

Chapter 5—State Financing Under Medicaid Managed Care Organization Provider Tax (Section 6051 of the Conference Agreement, and Section 6033 of the Senate Bill, and Section 3142 of the House Bill)

Current Law

States' ability to use provider-specific taxes to fund Medicaid expenditures is limited. If a state establishes provider-specific taxes to fund the state's share of program costs, reimbursement of the federal share will not be available unless the tax program meets the following three rules: the taxes collected cannot exceed 25% of the state (or non-federal) share of Medicaid expenditures; the state cannot provide a guarantee to the providers that the taxes will be returned to them; and the tax must be "broad-based." A broad-based tax is a tax that is uniformly applied to all providers or services within the provider class. The federal statute identifies each of the classes of providers or services for the purpose of determining whether a tax is broad-based.

Medicaid managed care organizations (MCOs) are identified as a separate class of providers for the purposes of determining if a tax is broad-based. This class is unlike all of the other classes of providers or services because it is limited to only Medicaid providers. Other classes of providers or services identified in statute, such as inpatient hospital services, outpatient hospital services, physicians—are not restricted to Medicaid providers or Medicaid services.

Senate Bill

The Senate bill would expand the Medicaid MCO provider class to include all MCOs. To

qualify for federal reimbursement, a state's provider tax would need to apply to both Medicaid and non-Medicaid MCOs. This would make the MCO provider class more consistent with the other provider classes for purposes of determining if a provider tax is broad-based.

The provision would become effective on January 1, 2006 except in States that have, as of December 31, 2005, a tax on the Medicaid MCO class of providers as defined under current law. The provision would not apply to those states.

House Bill

Similar to Senate provision except the provision would become effective upon enactment except for in states with taxes based on the current law Medicaid MCO provider class. For those states, the prohibition would become effective on October 1, 2008 and the reduction in Medicaid reimbursement due to this provision would be 50% for the fiscal year beginning on that day.

Conference Agreement

The conference agreement expands the Medicaid MCO provider class to include all MCOs. To qualify for federal reimbursement, a state's provider tax would need to apply to both Medicaid and non-Medicaid MCOs. The provision becomes effective upon enactment except in states with taxes based on the current law Medicaid MCO provider class as of December 8, 2005. In those states, the provision becomes effective on October 1, 2009.

Reforms of Case Management and Targeted Case Management Services (Section 6052 of the Conference Agreement, and Section 6031 of the Senate Bill, and Section 3146 of the House Bill)

Current Law

Under current Medicaid law (Section 1915(g)(2) of the Social Security Act), case management is defined as including services to assist a Medicaid beneficiary in gaining access to needed medical, social, educational and other services. Case management services are an optional benefit under the Medicaid state plan. The term "targeted case management" (TCM) refers to situations in which these services are not provided statewide to all Medicaid beneficiaries but rather are provided only to specific classes of Medicaid eligible individuals as defined by the state (e.g., those with chronic mental illness), or persons who reside in a specific area.

Several states extend the Medicaid TCM benefit to individuals who may also be receiving case management services as a component of another state and/or federal program. For example, a state may provide TCM services for Medicaid beneficiaries in foster care—defined in the Medicaid state plan as "children in the state's custody and who are placed in foster homes." As part of the foster care program, children receive certain case management services regardless of whether or not they are a Medicaid beneficiary.

In addition, the existing federal guidance is conflicting with respect to the process states should follow to claim Medicaid reimbursement for TCM services when another program also covers case management services for the same beneficiary. The State Medicaid Manual (Section 4302.2) states that claims for targeted case management services must be fully documented for a specific Medicaid beneficiary in order to receive payment. In addition, documentation that includes time studies and cost allocation plans "are not acceptable as a basis for Federal participation in the costs of Medicaid services." Cost allocation plans are a narrative description of the procedures that a state agency uses in identifying, measuring, and allocating the state agency's administrative

costs incurred for supervising or operating programs. Per federal regulations (45 CFR 95.505), the cost allocation plan does not include payments for services and goods provided directly to program recipients. However, a State Medicaid Director's (SMD) letter dated January 19, 2001, which discusses targeted case management services for children in foster care under the federal Title IV-E program, requires states to "properly allocate case management costs between the two programs in accordance with OMB Circular A-87 under an approved cost allocation program." Thus, this letter extended the application of cost allocation plans to claim reimbursement for case management services when a child is receiving these services under both the Title IV-E (foster care) and Medicaid programs.

Senate Bill

This proposal would further define the Medicaid TCM benefit under Section 1915(g)(2) of the Social Security Act, and would codify the ability of states to use an approved cost allocation plan (as outlined under OMB Circular A-87, or other related or subsequent guidance) for determining the amount that can be billed as Medicaid TCM services when case management is also reimbursable by another federally-funded program.

Specifically, the proposal would clarify that the TCM benefit includes the following: (1) assessment of an eligible individual to determine service needs by taking a client history, identifying an individual's needs and completing related documentation, and if needed, gathering information from other sources; (2) development of a specific care plan based on the information collected through an assessment that specifies the goals and actions to address the individual's needs; (3) referral and related activities to help an individual obtain needed services; and (4) monitoring and follow-up activities including activities and contacts to ensure the care plan is effectively implemented and adequately addressing the individual's needs.

The proposal would, also specify certain activities that are not reimbursable as TCM services. First, the TCM benefit would not include the direct delivery of an underlying medical, educational, social or other services to which an eligible individual has been referred. In addition, with respect to the direct delivery of foster care services, the TCM benefit would not cover: research gathering and completion of required foster care documentation, assessing adoption placements, recruiting or interviewing potential foster care parents, serving legal papers, home investigations, providing transportation, administering foster care subsidies, and making placement arrangements.

In cases where a TCM provider contacts individuals who are not Medicaid eligible or who are not part of the TCM target population, the activity could be billed as TCM services if the purpose of the contact is directly related to the management of the eligible individual's care. If the contact is related to the identification and management of the non-eligible or non-targeted individual's needs and care, the activity may not be billed as TCM services.

Finally, consistent with existing Medicaid law, this proposal would also specify that federal Medicaid funding would only be available for TCM services if there are no other third parties liable to pay for such services, including as reimbursement under a medical, social, educational, or other program.

This provision would take effect January 1, 2006.

House Bill

Same as Senate provision.

Conference Agreement

The conference agreement modifies the Senate and House bills to differentiate between case management and targeted case management services. It would define case management services in federal law as services that will assist Medicaid-eligible individuals in gaining access to needed medical, social, educational, and other services including: (1) assessment of an eligible individual to determine service needs by taking a client history, identifying an individual's needs and completing related documentation, and if needed, gathering information from other sources; (2) development of a specific care plan based on the information collected through an assessment that specifies the goals and actions to address the individual's needs; (3) referral and related activities to help an individual obtain needed services; and (4) monitoring and follow-up activities including activities and contacts to ensure the care plan is effectively implemented and adequately addressing the individual's needs.

The conference agreement also establishes those activities that are not reimbursable as case management services including the direct delivery of an underlying medical, educational, social or other services to which an eligible individual has been referred. With respect to the direct delivery of foster care services, case management would not include research gathering and completion of required foster care documentation, assessing adoption placements, recruiting or interviewing potential foster care parents, serving legal papers, home investigations, providing transportation, administering foster care subsidies, and making placement arrangements.

The term "targeted case management services" is defined as case management services that are provided to specific classes of individuals or to individuals who reside in specific areas.

In cases where a case management provider contacts individuals who are not Medicaid eligible, or who are not part of the TCM target population, the activity could be billed as case management services if the purpose of the contact is directly related to the management of the eligible individual's care. If the contact is related to the identification and management of the non-eligible or non-targeted individual's needs and care, the activity may not be billed as case management services.

Consistent with existing Medicaid law, this proposal would also specify that federal Medicaid funding would only be available for case management (or TCM) services if there are no other third parties liable to pay for such services, including as reimbursement under a medical, social, educational, or other program. If case management (or TCM) services are reimbursable by another federally-funded program the state would be required to allocate the costs of these services using OMB Circular A-87 (or any related or successor guidance or regulations).

Finally, the conference agreement established that (1) nothing in the provision would affect the application of rules with respect to third party liability under programs or activities carried out under Title XXVI of the Public Health Service Act (the HIV Health Care Services Program) or the Indian Health Service; and (2) the Secretary would be required to promulgate regulations to carry out the changes made by this provision. The effective date of this provision would be January 1, 2006.

Additional FMAP Adjustments (Section 6053 of the Conference Agreement, Sections 6032 and 6037 of the Senate Bill, and Sections 3148 and 3205 of the House Bill)

Current Law

The federal medical assistance percentage (FMAP) is the rate at which states are reim-

bursed for most Medicaid service expenditures. It is based on a formula that provides higher reimbursement to states with lower per capita incomes relative to the national average (and vice versa); it has a statutory minimum of 50% and maximum of 83%. An enhanced FMAP is available for both services and administration under the State Children's Health Insurance Program (SCHIP), subject to the availability of funds from a state's SCHIP allotment. In addition to Medicaid and SCHIP, the FMAP is used in determining federal reimbursement for a number of other programs, including foster care and adoption assistance under Title IV-E of the Social Security Act.

When state FMAPs are calculated by HHS for an upcoming fiscal year, the state and U.S. amounts used in the formula are equal to the average of the three most recent calendar years of data on per capita personal income available from the Department of Commerce's Bureau of Economic Analysis (BEA). For example, to calculate FMAPs for FY2006, HHS used per capita personal income data for 2001, 2002, and 2003 that became available from BEA in October 2004.

BEA revises its most recent estimates of state per capita personal income on an annual basis to incorporate revised Census Bureau population figures and newly available source data. It also undertakes a comprehensive data revision—reflecting methodological and other changes—every few years that may result in upward and downward revisions to each of the component parts of personal income, which include: wages and salaries, supplements to wages and salaries (such as employer contributions for employee pension and insurance funds), proprietors' income, and dividends, interest, and rent.

As a result of these annual and comprehensive revisions, it is often the case that the value of a state's per capita personal income for a given year will change over time. For example, the 2001 per capita personal income data published by BEA in October 2003 (used in the calculation of FY2005 FMAPs) differed from the 2001 per capita personal income published in October 2004 (used in the calculation of FY2006 FMAPs).

P.L. 106-554 (Consolidated Appropriations Act, 2001), provided that for fiscal years 2001 through 2005, the Medicaid and SCHIP FMAPs for Alaska would be calculated using the state's per capita income divided by 1.05. Dividing by 1.05 lowered the state's per capita income, thereby increasing its FMAP.

Senate Bill

Under the Senate bill, FY2006 FMAPs for Medicaid and SCHIP would be re-computed for all states so that no FY2006 FMAP would be less than the greater of: (1) a state's FY2005 FMAP minus 0.5 percentage points (0.1 in the case of Delaware and Michigan, 0.3 in the case of Kentucky) or (2) the FY2006 FMAP that would have been determined for a state if per capita incomes for 2001 and 2002 that were used to calculate the state's FY2005 FMAP were used.

In a separate provision, if Alaska's calculated FY2006 or FY2007 FMAP for Medicaid or SCHIP is less than its FY2005 FMAP, the FY2005 FMAP would apply.

House Bill

Under the House bill, for purposes of computing Medicaid FMAPs beginning with FY2006, employer contributions toward pensions that exceed 50% of a state's total increase in personal income for a period would be excluded from the per capita income of a state, but not from U.S. per capita income.

In a separate provision, for purposes of computing Medicaid and SCHIP FMAPs for any year after 2006 for a state that the Secretary of HHS determines has a significant number of individuals who were evacuated to

and live in the state as a result of Hurricane Katrina as of October 1, 2005, the Secretary would disregard such evacuees and their incomes.

Conference Agreement

The conference agreement follows the Alaska provision in the Senate bill and the Katrina provision in the House bill.

DSH Allotment for the District of Columbia (Section 6054 of the Conference Agreement, and Section 6035 of the Senate Bill, and no provision in the House Bill)

Current Law

States and the District of Columbia are required to recognize, in establishing hospital payment rates, the situation of hospitals that serve a disproportionate number of Medicaid beneficiaries and other low-income patients with special needs. Under broad federal guidelines, each state determines which hospitals receive DSH payments and the payment amounts to be made to each qualifying hospital. The federal government shares in the cost of state DSH payments at the same federal matching percentage as for most other Medicaid services. Total federal reimbursement for each state's DSH payments, however, are capped at a statewide ceiling, referred to as the state's DSH allotment.

Senate Bill

The Senate bill would raise the allotments for the District of Columbia for FY 2000, 2001, and 2002 from \$32 million to \$49 million. The higher allotments would be used to calculate DSH allotments beginning with FY 2006 amounts. The provision would take effect as if enacted on October 1, 2005 and would apply to expenditures made on or after that date.

House Bill

No provision.

Conference Agreement

The conference agreement includes a provision similar to the Senate provision. The agreement clarifies that the increased amounts calculated based on the modified allotments for FY 2000, 2001, and 2002 only apply to DSH expenditures applicable to fiscal year 2006 and subsequent fiscal years that are paid on or after October 1, 2005.

Increase in Medicaid Payments to Insular Areas. (Section 6055 of the Conference Agreement, no provision in the Senate Bill, and Section 3141 of the House Bill)

Current Law

In the 50 states and the District of Columbia, Medicaid is an individual entitlement. There are no limits on the federal payments for Medicaid as long as the state is able to contribute its share of the matching funds. In contrast, Medicaid programs in the territories are subject to spending caps. For fiscal year 1999 and subsequent fiscal years, these caps are increased by the percentage change in the medical care component of the Consumer Price Index (CPI-U) for all Urban Consumers (as published by the Bureau of Labor Statistics). The federal Medicaid matching rate, which determines the share of Medicaid expenditures paid for by the federal government, is statutorily set at 50 percent of the territories. Therefore, the federal government pays 50% of the cost of Medicaid items and services in the territories up to the spending caps.

Senate Bill

No provision.

House Bill

For each of fiscal years 2006 and 2007, the House bill would increase the total annual cap on federal funding for the Medicaid programs in each of the Virgin Islands, Guam, the Northern Marianas, and American Samoa. Puerto Rico would not receive additional federal Medicaid funding from this provision.

For the Virgin Islands and Guam, the FY2006 total annual Medicaid caps would be increased by \$2.5 million and the FY2007 caps would be increased by \$5.0 million. For the Northern Marianas, the FY2006 total annual Medicaid cap would be increased by \$1.0 million and the FY2007 cap would be increased by \$2.0 million. For American Samoa, the FY2006 total annual Medicaid cap would be increased by \$2.0 million and the FY2007 cap would be increased by \$4.0 million. For fiscal year 2008 and subsequent fiscal years, the total annual cap on federal funding for the Medicaid programs in each of the Virgin Islands, Guam, the Northern Marianas, and American Samoa would be calculated by increasing the FY2007 ceiling, as modified by this provision, by the percentage change in the medical care component of the Consumer Price Index (CPI-U) for all Urban Consumers (as published by the Bureau of Labor Statistics).

Conference Agreement

The conference agreement follows the House bill.

Demonstration Project Regarding Medicaid Coverage of Low-income HIV-infected individuals (No provision in the Conference Agreement, Sec. 6039(c) of the Senate Bill, and no provision in the House Bill)

Current Law

Section 1115 gives the Secretary of HHS authority to modify virtually all aspects of the Medicaid (and SCHIP) programs. Among other projects, the Secretary has used the Section 1115 waiver authority to approve benefit-specific demonstrations that provide targeted services to certain individuals. For example, under existing Medicaid HIV/AIDS Section 1115 demonstration waivers, the Secretary approved programs that provide a limited set of Medicaid benefits (e.g., case management, and pharmacy services) to individuals with HIV/AIDS who would not otherwise be eligible for Medicaid. Approved Section 1115 waivers are deemed to be part of a state's Medicaid (or SCHIP) state plan for purposes of federal reimbursement. Project costs associated with waiver programs granted under the Medicaid (or SCHIP) programs are subject to that state's FMAP (or enhanced-FMAP). Unlike regular Medicaid (or SCHIP), CMS waiver guidance specifies that costs associated with waiver programs must be budget neutral (or allotment neutral) to the federal government over the life of the waiver program whereby the federal and state government negotiate a spending cap beyond which the federal government has no fiscal responsibility.

Senate Bill

The Senate Bill would require the Secretary of HHS to allow states to seek approval for time limited (i.e., 5-year) Section 1115 demonstration projects that provide full Medicaid coverage to specified HIV-infected individuals. For fiscal years 2006 through 2010, \$450,000,000 in federal funds would be appropriated for such demonstrations. From this amount, the Secretary would allocate money to states and territories (without regard to existing federal Medicaid spending caps applicable in the territories) with approved HIV Section 1115 demonstrations based on the availability of such funds. Allotment of funds among states (or territories) with approved demonstrations would be based on an amount equal to the state's SCHIP Enhanced Federal Medical Assistance Percentage (Enhanced-FMAP) for quarterly expenditures associated with medical assistance provided to individuals under the waiver up to the specified cap. The Secretary would be required to submit a program evaluation to Congress not later than December 31, 2010. This provision would be effective on January 1, 2006.

House Bill

No provision.

Conference Agreement

The conference agreement does not include the Senate bill.

Inclusion of Podiatrists As Physicians (no provision in the Conference Agreement, Section 6034 of the Senate Bill, and no provision in the House Bill)

Current Law

Under Medicaid, services provided by podiatrists may be covered under the optional "other practitioners" benefit category. "Physician services" are a mandatory Medicaid benefit.

Senate Bill

The Senate bill would treat podiatrists as physicians, as is the case under Medicare. Thus, states would be required to cover the medical services of podiatrists (i.e., doctors of podiatric medicine) under Medicaid. This provision would apply to all such services furnished on or after January 1, 2006.

House Bill

No provision.

Conference Agreement

The conference agreement does not include this provision.

Demonstration Project Regarding Medicaid Reimbursement for Stabilization of Emergency Medicaid Conditions by Non-Publicly Owned or Operated Institutions for Mental Diseases (no provision in the Conference Agreement, Section 6036 of the Senate Bill, and no provision in the House Bill)

Current Law

An IMD is defined as a hospital, nursing facility, or other institution of more than 16 beds, that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including medical attention, nursing care, and related services. The 1950 amendments to the Social Security Act established the prohibition of federal assistance for IMD residents as well as for patients diagnosed with a psychosis found in other medical institutions. When Medicaid was established in 1965, the law included a state option to allow Medicaid funding for inpatient psychiatric care rendered in general hospitals as well as funding for specific services provided to residents age 65 years and older in IMDs. The 1972 amendments allowed for optional coverage, under certain circumstances, for IMD residents under age 21 or, in some cases, under age 22. In general, reimbursement for services obtained in IMDs by Medicaid beneficiaries ages 22 to 64 years remains prohibited. The term "State" includes the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa.

Under Medicare, "emergency medical condition" means a medical condition with acute symptoms of sufficient severity such that the absence of immediate medical attention could result in (1) placing the health of the individual in serious jeopardy, (2) serious impairment to bodily functions, or (3) serious dysfunction of any organ. Under Medicare, the term "stabilize" means medical treatment as may be necessary to assure, within reasonable medical probability, that no material deterioration of the condition is likely to result from or occur during the transfer of the individual from a facility.

Senate Bill

The Senate bill would require the Secretary to establish a 3-year demonstration project in eligible states to provide Medicaid coverage for certain IMD services (not publicly-owned or operated) for Medicaid eligible individuals who are between the ages of

21 and 64, and who require IMD services to stabilize an emergency medical condition. Upon approval of an application, eligible states would include Arizona, Arkansas, Louisiana, Maine, North Dakota, Wyoming, and four additional states to be selected by the Secretary to provide geographic diversity. The provision would appropriate \$30 million for FY2006 for the demonstration which would be available through December 31, 2008. The Secretary would allocate funds to eligible states based on their applications and the availability of funds. Payments to states would be drawn from these allocations, based on the federal matching rate (FMAP) for benefits.

For purposes of the demonstration, the Secretary would be required to waive current law limitations on payments for services delivered to persons under 65 who are patients in an IMD. The Secretary would have the option to also waive other requirements in Sections XI and XIX, including requirements relating to statewideness and comparability of benefits, only to the extent necessary to carry out the demonstration project. The terms "emergency medical condition" and "stabilize," as defined under Medicare, would apply to the demonstration described in this provision.

The Senate bill would also require the Secretary to submit annual reports to Congress on the progress of the demonstration project. No later than March 31, 2009, the Secretary would submit to Congress a final report describing whether the demonstration: (1) resulted in increased access to Medicaid inpatient mental health services, (2) produced a significant reduction in the use of higher cost emergency room services for Medicaid beneficiaries, (3) impacted the costs of providing Medicaid inpatient psychiatric care, and (4) should be continued after December 31, 2008, and expanded nationwide.

Chapter 6—Other Provisions

Subchapter A—Family Opportunity Act

Opportunity for Families of Disabled Children to Purchase Medicaid Coverage for Such Children (Section 6062 of the Conference Agreement, Section 6042 of the Senate Bill, and no provision in the House Bill)

Current Law

For children with disabilities, there are a number of potentially applicable Medicaid eligibility groups, some mandatory but most optional. For some of these groups, disability status or medical need is directly related to Medicaid eligibility (e.g., children receiving SSI with family income below 75% FPL). But there are other pathways through which such children may qualify for Medicaid coverage for which disability status and/or medical need are irrelevant (e.g., children under age 6 with family income below 133% FPL). All of the Medicaid eligibility pathways for children require income levels that are generally below 300% of the federal poverty level (FPL) with some state-specific exceptions.

States may require Medicaid beneficiaries to apply for coverage in certain employer-sponsored group health plans (in which such persons are eligible) when it is cost-effective to do so (defined below). This requirement may be imposed as a condition of continuing Medicaid eligibility, except that failure of a parent to enroll a child must not affect the child's continuing eligibility for Medicaid. If all members of the family are not eligible for Medicaid, and the group health plan requires

enrollment of the entire family, Medicaid will pay associated premiums for full family coverage if doing so is cost-effective. Medicaid will not pay deductibles, coinsurance or other cost-sharing for family members ineligible for Medicaid. Third party liability rules apply to coverage in a group health plan; that is, such plans, not Medicaid, must pay for all covered services under the plan. Cost-effectiveness means that the reduction in Medicaid expenditures for Medicaid beneficiaries enrolled in a group health plan is likely to be greater than the additional costs for premiums and cost-sharing required under the group health plan.

For certain eligibility categories, states may not impose enrollment fees, premiums or similar charges. States are specifically prohibited from requiring payment of deductions, cost-sharing or similar charges for services furnished to children under 18 (up to age 21; or reasonable subcategories, at state option). Also, in certain circumstances, states may impose monthly premiums for Medicaid. For example, states may require certain workers with disabilities to pay premiums and cost-sharing set on a sliding scale based on income. For one of these groups, states may require those with income between 250% and 450% FPL to pay the full premium. But the sum of such payments may not exceed 7.5% of income. For other groups, states may not require prepayment of premiums and may not terminate eligibility due to failure to pay premiums, unless such failure continues for at least 60 days. States may also waive premiums when such payments would cause undue hardship.

Unless otherwise specified for a given coverage group, Medicaid eligibility for children is limited to those in families with income up to 133 and 1/3% of the applicable AFDC payment standard in place as of July 16, 1996. In addition, targeted low-income children under SCHIP statute are defined as those who would not qualify for Medicaid under the state plan in effect on 70 March 31, 1997. Payments for services provided to children who receive Medicaid benefits through an expansion of eligibility under SCHIP authority are reimbursed by the federal government at the enhanced federal medical assistance percentage (E-FMAP) rate, and funds based on this rate are drawn from annual SCHIP allotments. The SCHIP E-FMAP builds on the Medicaid FMAP. The FMAP formula is designed to provide a higher federal matching rate for states with lower average per capita income, compared to the national average.

Senate Bill

The Senate bill would create a new optional Medicaid eligibility group for children with disabilities under age 19 who meet the severity of disability required under the Supplemental Security Income (SSI) program with family income that exceeds SSI financial standards but is below 300% FPL. Medicaid coverage would be phased in by age group, beginning with children through age 6 in the second through fourth quarters of FY2008, then covering children through age 12 beginning in FY2009, and finally, covering children through age 18 during FY2010 and thereafter.

The Senate bill would require states to require certain parents of children eligible for Medicaid under the new optional coverage group to enroll in family coverage through employer-sponsored insurance (ESI) if certain conditions are met. When the employer offers family coverage, the parent is eligible for such coverage, and the employer contributes at least 50% of the total cost of annual premiums for such coverage, states must require participation in such coverage as a condition of continuing Medicaid eligibility for the child. Also, if such coverage is ob-

tained, states must reduce premiums by an amount that reasonably reflects the premium contribution made by the parent for private coverage on behalf of a child with a disability. States could pay any portion of required premiums on behalf of eligible children under such plans. Medicaid would be the secondary payer to these ESI plans. Benefits offered by Medicaid but not offered by the ESI plans would be covered under Medicaid.

States would be permitted, within certain limits, to require families with children that qualify for Medicaid under the new optional eligibility category to pay monthly premiums on a sliding scale based on income, but only if specific caps on aggregate payments for cost-sharing (premiums plus other charges) for employer-sponsored family coverage are met. These caps specify that cost-sharing would not exceed 5% of income for families with income up to 200% FPL, and would not exceed 7.5% of income for families with income between 200% and 300% FPL. States could not require prepayment of premiums, nor would states be allowed to terminate eligibility of an enrolled child for failure to pay premiums unless lack of payment continues for a minimum of 60 days beyond the due date. States could waive payment of premiums when such payment would cause undue hardship.

The Senate bill would permit the income level for the new optional coverage group (set at 300% FPL) to exceed the otherwise applicable AFDC-related income standard for children under Medicaid. This section also stipulates that children with disabilities made eligible for Medicaid through the new optional coverage group would not be considered to be targeted low-income children as defined under SCHIP. Thus, the regular Medicaid FMAP, rather than the higher SCHIP E-FMAP, would apply for determining the federal share of Medicaid expenditures for the new optional coverage group. In addition, federal payments would be drawn from the open-ended Medicaid account and not the capped SCHIP account.

These provisions would be effective for items and services furnished on or after January 1, 2008.

House Bill

No provision.

Conference Agreement

The conference agreement includes the Senate bill, with modifications. First, the agreement defines qualifying children as those considered disabled under the SSI program without regard to any income or asset eligibility requirements that apply under SSI for children and whose family income does not exceed 300% FPL. In addition, the agreement moves up the start date by one year for phasing in Medicaid coverage for this new group. That is, Medicaid coverage would be phased in, beginning with children through age 6 in the second through fourth quarters of FY2007 (rather than FY2008), then covering children through age 12 beginning in FY2008 (rather than FY2009), and finally, covering children through age 18 beginning in FY2009 (rather than FY2010) and thereafter.

As under the Senate bill, the conference agreement allows states to impose income-related premiums under this option. But the agreement changes the aggregate amount of cost sharing for families based on income levels.

For children in families with income that does not exceed 200% FPL, the aggregate amount of premiums for Medicaid coverage and any premium for employer-sponsored family coverage (in order to cover the disabled child) plus other cost-sharing cannot exceed 5% of family income. For children in families with income between 200% FPL and

300% FPL, the aggregate amount of premiums for Medicaid coverage and any premium for employer-sponsored family coverage (in order to cover the disabled child) plus other cost-sharing cannot exceed 7.5% of family income.

Finally, the conference agreement changes the effective date of these provisions to January 1, 2007.

Demonstration Projects Regarding Home and Community-based Alternative to Psychiatric Residential Treatment Facilities for Children (Section 6063 of the Conference Agreement, Section 6043 of the Senate Bill, and no provision in the House Bill)

Current Law

Medicaid home and community-based service (HCBS) waivers authorized by Section 1915(c) of the Social Security Act allows states to provide a broad range of home and community-based services to Medicaid beneficiaries who would otherwise need the level of care provided in a hospital, nursing facility, or intermediate care facility for individuals with mental retardation (ICF-MR). Federal approval for these waivers is contingent on the state's documentation of the waiver's cost-neutrality. Cost-neutrality is met if, on average, the per person cost with the HCBS waiver is no higher than the cost if the person were residing in a hospital, nursing home, or ICF-MR. The state determines which type of institution(s) it will use to make the cost-neutrality calculation.

For children with psychiatric disabilities, many states provide Medicaid funding for inpatient psychiatric residential treatment facilities. However, because the waiver cost-neutrality calculation does not allow a comparison of HCBS waiver expenditures to expenditures in these psychiatric residential treatment facilities, most states have had difficulty covering HCBS waiver services for children with psychiatric disabilities. Four states (Indiana, Kansas, New York and Vermont) have been able to offer HCBS waiver services for children with psychiatric disabilities by documenting the cost-neutrality of the waiver compared to the state's hospital expenditures. However given the cost-neutrality requirement, those states that have limited the use of hospitals for children with psychiatric disabilities may be unable to develop HCBS waivers for this population.

Senate Bill

The Senate bill would authorize the Secretary to conduct demonstration projects in up to 10 states during the period from FY2007 through FY2011 to test the effectiveness of improving or maintaining the child's functional level, and cost-effectiveness of providing coverage of home and community-based alternatives to psychiatric residential treatment, for children enrolled in Medicaid. These demonstration projects will develop home and community-based services as an alternative to a psychiatric residential treatment facility. However, these projects must also follow the requirements of the HCBS waiver program. Specifically, demonstration participants would be required to meet the level of care of a psychiatric residential treatment facility, and the average, per-person project expenditures may not exceed the average, per-person cost of a psychiatric residential treatment facility.

The demonstration states would be selected through a competitive bidding process. At the end of the demonstration period, the state may allow children enrolled in the demonstration project to continue receiving the Medicaid home and community-based waiver services provided under the demonstration; however, no new children could be added to the project.

As part of the demonstration, the following conditions would apply: (1)

projects must meet the same terms and conditions that apply to all HCBS waivers; (2) the Secretary must ensure that the projects are budget neutral; that is, total Medicaid expenditures under the demonstration projects will not be allowed to exceed the amount that the Secretary estimates would have been paid in the absence of the demonstration projects; and (3) applications for a demonstration project must include an assurance to conduct an interim and final evaluation by an independent third party and any reports that the Secretary may require.

This proposal would appropriate \$218 million for FY2007 through FY2011 for the state demonstration projects and the federal evaluations and report. Total expenditures for state demonstration projects would not be allowed to exceed \$21 million in FY2007, \$37 million in FY2008, \$49 million in FY2009, \$53 million in FY2010, and \$57 million in FY2011. Funds not expended in a given fiscal year would continue to be available in subsequent fiscal years. An additional \$1 million would be available to the Secretary to complete a required interim and final evaluation of the project and report the conclusions of the evaluations to the President and Congress within 12 months of completing these evaluations.

Conference Agreement

The conference agreement follows the Senate provision.

Development and Support of Family-to-family Health Information Centers (Section 6064 of the Conference Agreement, Section 6044 of the Senate Bill, and no provision in the House Bill)

Current Law

Family-to-family health centers provide information and assistance to help families of children with special health care needs navigate the system of care and make decisions about the needs and available supports for their child. No provision in current law specifically authorizes a dedicated amount of funds for these family-to-family health information centers. However, since 2002, the Department of Health and Human Services (HHS) has awarded approximately \$6.9 million to develop these information centers in 36 states under various program authorities including: (1) Special Projects of Regional and National Significance Program (SPRANS) of the Maternal and Child Services Block Grant (Title V of the Social Security Act) operated by the Health Resources Services Administration (HRSA); (2) the Real Choice Systems Change grant program operated by the Centers for Medicare and Medicaid Services (CMS); and (3) a one-year direct Congressional appropriation to an organization in Iowa. Federal funding for these projects is time-limited. Except for the one-year direct appropriation, state projects have generally been funded for a three or four-year period. HRSA intends to fund additional family-to-family health information centers awarding up to \$2.4 million to six projects for a four-year period starting in FY2006.

Senate Bill

The Senate bill would increase funding under the SPRANS program of Title V of the Social Security Act for the development and support of new family-to-family health information centers (described below). This proposal would appropriate an additional \$3 million for FY2007, \$4 million for FY2008, and \$5 million for FY2009 for this new purpose. For each of fiscal years 2010 and 2011, the bill would authorize to be appropriated to the Secretary \$5 million for this purpose. Funds would remain available until expended.

The family-to-family health information centers would: (1) assist families of children with disabilities or special health care needs to make informed choices about health care so as to promote good treatment decisions, cost-effectiveness, and improved health outcomes for such children; (2) provide information regarding the health care needs of, and resources available for children with disabilities or special health care needs; (3) identify successful health delivery models; (4) develop a model for collaboration between families of such children and health professionals; (5) provide training and guidance with regard to the care of such children; and (6) conduct outreach activities to the families of such children, health professionals, schools, and other appropriate entities and individuals. The family-to-family health information center would be staffed by families who have expertise in public and private health care systems and by health professionals.

The Secretary would be required to develop family-to-family health information centers in at least 25 states in FY2007, 40 states in FY2008, and all states in FY2009.

Restoration of Medicaid Eligibility for Certain SSI Beneficiaries (Section 6065 of the Conference Agreement, Section 6045 of the Senate Bill, and no provision in the House Bill)

Current Law

SSI and Medicaid eligibility is effective on the later of (1) the first day of the month following the date the application is filed, or (2) the first day of the month following the date that the individual is determined eligible.

Senate Bill

The Senate bill would extend Medicaid eligibility to persons who are under age 21 and who are eligible for SSI, effective on the later of: (1) the date the application was filed, or (2) the date SSI eligibility was granted. This provision would be effective one year after the date of enactment.

House Bill

Conference Agreement

The conference agreement includes the Senate bill provision.

Subchapter B—Money Follows the Person Rebalancing Demonstration
Money Follows the Person Rebalancing Demonstration (Section 6071 of the Conference Agreement, Section 6061 of the Senate Bill, and no provision in the House Bill)

Current Law

Under Medicaid, states can offer a variety of home and community-based services to Medicaid beneficiaries who need long-term care. Some of these services may be offered statewide as part of the Medicaid state plan (e.g., home health services and personal care services). Other services may be offered through a home and community-based services (HCBS) waiver under Section 1915(c) of the Social Security Act. These waivers allow states to provide a broad range of home and community-based services to individuals who would otherwise require the level of care provided in certain types of institutions (i.e., a hospital, nursing facility or intermediate care facility for individuals with mental retardation (ICF-MR)). For example, HCBS waiver services could include respite, personal care, adult day care, or therapy. As part of the HCBS waiver, states have the ability to define the specific services that

will be offered, to target a specific population (e.g., elderly individuals) and to limit the number of individuals who can participate in the waiver.

Approval for an HCBS waiver is contingent on a state documenting the cost-neutrality of the waiver. Cost-neutrality is met if the average per person cost under the HCBS waiver is no higher than the average per person cost of receiving care in a hospital, nursing facility or ICF-MR. The state determines which type of institution(s) it will use to make the cost-neutrality calculation.

Under current law, Medicaid beneficiaries who are residents of an institution (such as a nursing home) and who would like to leave that institution would be entitled to receive those Medicaid services covered by the Medicaid state plan. However, individuals may not be able to access the broader range of services under an HCBS waiver because many states have waiting lists for the waiver.

Medicaid expenditures for services (including the Medicaid state plan and HCBS waiver) are generally shared between the federal and state governments. In FY2003 (the latest expenditure data available), the federal government covered 59% of the cost of services; states covered the remaining 41% of expenditures. The specific federal share of a state is based on the state's federal medical assistance percentage (FMAP) rate which can range from 50% to 83%.

Senate Bill

The Senate provision would authorize the Secretary to conduct a demonstration project in states to increase the use of home and community-based care instead of institutions. States awarded a demonstration would receive 90% of the costs of home and community-based, long-term care services (under a HCBS waiver and/or the state plan) for 12 months following a demonstration participant's transition from an institution into the community. In a given fiscal year, funding would be capped at the amount of a state's grant award. After the 12 months of grant funding, the state would be required to continue providing services through a Medicaid home and community-based long-term care program, as described below.

Individuals will be eligible to participate in the demonstration if they meet the following criteria: they are residents of a hospital, nursing facility, ICF-MR, or an institution for mental disease (IMD) (but only to the extent that the IMD benefit is offered as part of the existing state Medicaid plan); they have resided in the facility for no less than six months or for a longer time period specified by the state (up to a maximum of two years); they are receiving Medicaid benefits for the services in this facility; and they will continue to require the level of care of the facility but for the provision of HCBS services.

The state's application for a demonstration project will be required to include, at a minimum, the following information: (1) assurance that the project was developed and will be operated through a public input process; (2) assurance that the project will operate in conjunction with an existing Medicaid home and community-based program; (3) the duration of the project, which must be for at least two consecutive fiscal years in a five-year period starting in FY2009; (4) the service area, which may be statewide or less-than-statewide; (5) the target groups and the projected number to be enrolled and the estimated total expenditures for each fiscal year; (6) assurance that the project defers to individual choice and that the state will continue services for participants after the demonstration ends, as long as the state offers such services and the individual remains eligible; (7) information on recent Medicaid expenditures for long-term care and home and

community-based services and proposed methods to increase the state's investment in home and community-based services; (8) methods the state will use to eliminate barriers to paying for long-term care services for participants in the setting(s) of their choice; (9) assurance that the state will meet a maintenance of effort for Medicaid HCBS expenditures and will continue to operate a HCBS waiver that meets the statutory requirements for cost-neutrality.

A state will also be required to describe a plan for quality assurance and improvement of HCBS services under Medicaid; any requested waivers of Medicaid law; if applicable, the process for participants to self-direct his or her own services (meeting standards outlined in this proposal); and compliance with reports and evaluation, as required by the Secretary.

In addition to evaluating the merits of a state's application, in selecting demonstration projects, the Secretary will be required to consider a national balance of target groups and geographic distribution and to give a preference to states that cover multiple groups or offer project participants the opportunity to self-direct their services. The Secretary will be authorized to waive certain sections of Medicaid law to achieve the purpose of the demonstration.

To qualify for grant awards after year one, states will be required to meet numerical benchmarks measuring the increased investment in services under this proposal and the number of individuals transitioned into the community. States will also be required to demonstrate that they are assuring the health and welfare of project participants. For states that do not meet these requirements, the Secretary will be required to rescind the grant award for future grant periods and will be allowed to re-award unused funding.

The proposal would require the Secretary to provide technical assistance and oversight to state grantees and may use up to \$2.4 million of the amounts appropriated for the portion of fiscal year 2009 that begins on January 1, 2009, and ends on September 30, 2009, and for fiscal year 2010, to carry out these activities during the period beginning on January 1, 2009 and ending on September 30, 2013. The Secretary would also be required to conduct a national evaluation and report its findings to the President and Congress no later than September 30, 2012 and may use up to \$1.1 million each year from FY2010 through FY2013 to carry out these activities.

This proposal would appropriate \$250 million for the portion of FY2009 which begins on January 1, 2009, and ends on September 30, 2009; \$300 million in FY2010; \$350 million in FY2011; \$400 million in FY2012; and \$450 million in FY2013 to carry out the demonstration project. Funds not awarded to states in a given fiscal year would continue to be available in subsequent fiscal years through September 30, 2013.

Payments for home and community-based long-term care services under the demonstration project would be in lieu of payment with respect to expenditures that could otherwise be paid for by Medicaid. However, if a state exhausts its grant funding in a particular year, the state is not prevented from using Medicaid to pay for home and community-based long term care services. Finally, a state that does not use all of its funding in a given fiscal year will continue to have access to that funding for four subsequent fiscal years.

House Bill

No provision.

Conference Agreement

The conference agreement follows the Senate provision, but makes several changes to

the Senate bill. First, to be eligible an individual must continue to require the level of care in an institution. However, in any case where a state would apply a more stringent level of care standard as a result of implementing a Medicaid state plan option under section 1915(I), established under this conference agreement, the individual must continue to require the level of care which had resulted in admission to the institution.

A state must assure that it will continue services for participants after the demonstration ends, as long as the state offers such services and the individual remains eligible. If the state chooses to apply a more stringent level of care as a result of covering the state plan option under Section 1915(I), established under this conference agreement, the individual must continue to meet the requirement for the level of care that had resulted in his or her admission to the institution.

In addition, those states awarded a demonstration would receive an enhanced FMAP rate (referred to as the "MFP-enhanced FMAP") equal to the current FMAP rate for the state increased by a number of percentage points equal to 50% of the difference between 100% and the normal FMAP rate. However, in no case can the FMAP rate exceed 90% for a state. The state will receive the MFP-enhanced FMAP for the costs of home and community-based, long-term care services for 12 months following a demonstration participant's transition from an institution into the community.

Finally, demonstration grants would be awarded starting in 2007, instead of 2009 which changes all relevant dates within this provision including:

- The duration of the project must be for at least two consecutive fiscal years in a five-year period starting in FY2007; and
- The Secretary would be able to use up to \$2.4 million of the amounts appropriated for the portion of fiscal year 2007 that begins on January 1, 2007, and ends on September 30, 2007, and for fiscal year 2008, to carry out technical assistance and quality assurance activities during the period beginning on January 1, 2007 and ending on September 30, 2011; and
- The Secretary will also be required to report evaluation and findings to the President and Congress no later than September 30, 2011 and may use up to \$1.1 million each year from FY2008 through FY2011 to carry out these activities; and
- The provision would appropriate \$250 million for the portion of FY2007 which begins on January 1, 2007, and ends on September 30, 2007; \$300 million in FY2008; \$350 million in FY2009; \$400 million in FY2010; and \$450 million in FY2011 to carry out the demonstration project; and
- Funds not awarded to states in a given fiscal year would continue to be available in subsequent fiscal years through September 30, 2011.

Subchapter C—Miscellaneous

Medicaid Transformation Grants (Section 6081 of the Conference Agreement, no provision in the Senate Bill, and Section 3143 of the House Bill)

Current Law

Section 1903(a) of the Social Security Act describes the level of federal reimbursement available to states for various Medicaid program functions. The federal medical assistance percentage (FMAP) is the rate at which states are reimbursed for most Medicaid service expenditures. It is based on a formula that provides higher reimbursement to states with lower per capita incomes relative to the national average (and vice versa); it has a statutory minimum of 50% and maximum of 83%. The federal reimbursement

rate for Medicaid administrative expenditures does not vary by state and is generally 50%, but certain administrative functions receive enhanced (usually 75%) reimbursement.

Senate Bill

No provision.

House Bill

Under the House bill, in addition to the normal federal Medicaid reimbursement received by states under section 1903(a), the Secretary of HHS would provide for payments to states for the adoption of innovative methods to improve the effectiveness and efficiency in providing medical assistance under Medicaid.

Examples of innovative methods for which such funds may be used include: (1) methods for reducing patient error rates through the implementation and use of electronic health records, electronic clinical decision support tools, or e-prescribing programs, (2) methods for improving rates of collection from estates of owed to Medicaid, (3) methods for reducing waste, fraud, and abuse under Medicaid, such as reducing improper payment rates as measured by the annual payment error rate measurement (PERM) project rates, (4) implementation of a medication risk management program as part of a drug use review program, and (5) methods for reducing, in clinically appropriate ways, Medicaid expenditures for covered outpatient drugs, particularly in the categories of greatest drug utilization, by increasing the utilization of generic drugs through the use of education programs and other incentives to promote greater use of generics.

No payments would be made to a state unless the state applied to the Secretary of HHS for such payments in a form, manner, and time specified by the Secretary. Payments would be made under such terms and conditions consistent with the subsection as the Secretary prescribes. Payment to a state under the subsection would be conditioned on the state submitting to the Secretary an annual report on the programs supported by such payment. The reports would include information on: (1) the specific uses of such payment, (2) an assessment of the quality improvements and clinical outcomes under such programs, and (3) estimates of the cost savings resulting from such programs.

Total payments would equal and not exceed \$50 million in each of FY2007 and FY2008. The Secretary would specify a method for allocating the funds among states. Such method would provide preference for states that design programs that target health providers that treat significant numbers of Medicaid beneficiaries. The method would also allocate at least 25% of the funds among states whose populations as of July 1, 2004 were more than 105% of their populations as of April 1, 2000.

Conference Agreement

The conference agreement follows the House bill, but would increase total payments to equal and not exceed \$75 million in each of FY2007 and FY2008. The agreement also adds, as an additional option for use of funds, methods for improving access to primary and specialty physician care for the uninsured using integrated university-based hospital clinic systems. Conferees believe that it is important to develop new models to meet the needs of the uninsured. University based physicians are uniquely qualified to assume this task. Bringing the resources of academia and health care system together to serve the poor and medically needy will create new opportunities to develop strategies that can be used on a broader scale.

Improved Enforcement of Documentation Requirements (Section 6082 of the Conference Agreement, no provision in the Senate Bill, and Section 3145 of the House Bill)

Current Law

To be eligible for the full range of benefits offered under Medicaid, an individual must be a citizen or national of the United States or a qualified alien (e.g., a legal permanent resident, refugee, alien granted asylum or related relief) who meets all other Medicaid program eligibility criteria. Non-qualified aliens (e.g., those who are unauthorized or illegally present, non-immigrants admitted for a temporary purpose such as education or employment, short-term parolees) who would otherwise be eligible for Medicaid except for their immigration status may only receive Medicaid care and services that are necessary for the treatment of an emergency medical condition and are not related to an organ transplant procedure.

As a condition of an individual's eligibility for Medicaid benefits, Section 1137(d) of the Social Security Act requires a state to obtain a written declaration, under penalty of perjury, stating whether the individual is a citizen or national of the United States. If an individual declares that he or she is a citizen or national, the state is not required to obtain additional documentary evidence but may choose to do so. According to a 2005 report from the Department of Health and Human Services' Office of Inspector General, 46 states and the District of Columbia allow or sometimes allow self-declaration of United States citizenship, while four states require Medicaid applicants to submit documentary evidence to verify citizenship statements.

If an individual declares that he or she is not a citizen or national, the individual must declare that he or she is a qualified alien and must present: (1) alien registration documentation or other proof of immigration registration from the Department of Homeland Security's United States Citizenship and Immigration Services Bureau (DHS/USCIS, formerly the Immigration and Naturalization Service) or (2) other documents determined by the state to constitute reasonable evidence of satisfactory immigration status. If an individual presents DHS/USCIS documentation, the state must verify the individual's immigration status with DHS/USCIS through the automated Systematic Alien Verification for Entitlements (SAVE) system, or by using an alternative verification system approved by the Secretary of Health and Human Services. States receive 100% federal reimbursement for the operation of such systems.

Senate Bill

No provision.

House Bill

Under the House bill, states would be prohibited from receiving federal reimbursement for medical assistance provided under Medicaid to an individual who has not provided satisfactory documentary evidence of citizenship or nationality.

Such evidence would include one of the following documents:

- a United States passport;
- Form N-550 or N-570 (Certificate of Naturalization);
- Form N-560 or N-561 (Certificate of United States Citizenship);
- such other document that the Secretary may specify, by regulation, that provides proof of United States citizenship or nationality and that provides a reliable means of documentation of personal identity.

Satisfactory documentary evidence would also include a document from each of the following lists:

- a certificate of birth in the United States;
- Form FS-545 or Form DS-1350 (Certificate of Birth Abroad);
- Form I-97 (United States Citizen Identification Card);
- Form FS-240 (Report of Birth Abroad of a Citizen of the United States); or
- such other document as the Secretary may specify (excluding a document specified by the Secretary as described above) that provides proof of United States citizenship or nationality;

AND

- any identity document described in section 274A(b)(1)(D) of the Immigration and Nationality Act; or
- any other documentation of personal identity of such other type as the Secretary finds, by regulation, provides a reliable means of identification.

The documentary requirements would not apply to an alien who is: (1) eligible for Medicaid and is entitled to or enrolled for Medicare benefits, (2) eligible for Medicaid on the basis of receiving Supplemental Security Income benefits, or (3) eligible for Medicaid on such other basis as the Secretary may specify under which satisfactory documentary evidence of citizenship or nationality had been previously presented.

The provision would apply to determinations of initial eligibility for Medicaid made on or after July 1, 2006, and to redeterminations made after such date in the case of individuals for whom the new documentary requirements were not previously met.

Conference Agreement

The conference agreement follows the House bill, but allows a state-issued driver's license or other identity document described in section 274(A)(b)(1)(D) of the Immigration and Nationality Act as satisfactory evidence, but only if the state issuing the license or such document requires proof of U.S. citizenship before issuance or obtains a Social Security number from the applicant and verifies before certification that such number is valid and assigned to an applicant who is a citizen.

Health Opportunity Accounts (Section 6083 of the Conference Agreement, no provision in the Senate Bill, and Section 3134 of the House Bill)

Current Law

Medicaid is a joint federal-state entitlement program that finances health care coverage for certain low-income families, children, pregnant women, and individuals who are aged or disabled. To qualify for Medicaid, an individual must meet both categorical and financial eligibility requirements. The specific income and resource limitations that apply to each eligibility group are set through a combination of federal parameters and state definitions. Each state designs and administers its own program under broad federal guidelines. Variation exists among states in eligibility, covered services, and the delivery of, and reimbursement for, services. States that wish to experiment with new approaches for providing health care coverage that promote the objectives of the Medicaid program may seek approval for Section 1115 demonstration waivers.

Medicaid's basic benefits rules require all states to provide certain "mandatory" services as listed in Medicaid statute. Federal matching payments are also available for optional services if states choose to include them in their Medicaid plans. States define the specific features of each service to be provided under that plan within broad federal guidelines including: (1) Amount, duration, and scope. Each covered service must be sufficient in amount, duration, and scope to reasonably achieve its purpose. (2) Com-

parability. With certain exceptions, services available to any categorically needy beneficiary in a state must be equal in amount, duration, and scope to those available to any other categorically needy beneficiary in the state. Similarly, services available to any medically needy beneficiary in a state must be equal in amount, duration, and scope to those available to any other medically needy beneficiary in the state. (3) Statewide. State plan services must be covered throughout an entire state, and (4) Freedom of choice. With certain exceptions, a state's Medicaid plan must allow recipients freedom of choice among health care providers or managed care entities participating in Medicaid.

States may generally impose nominal cost-sharing on beneficiaries, with certain exceptions. They are precluded from imposing cost sharing on services for children under 18, services related to pregnancy, family planning or emergency services, services provided to nursing facility residents who are required to spend all of their income for medical care except for a personal needs allowance, and services furnished to individuals receiving hospice care. States may require nominal copayments, coinsurance, or deductibles within federal limits from other beneficiaries or for other services. Beneficiaries may be charged only one type of cost sharing per service. Providers may collect cost sharing amounts from beneficiaries and generally are not to be reimbursed by the state if they are unsuccessful in collecting cost sharing from beneficiaries. Providers generally may not deny services if beneficiaries are unable to pay cost sharing amounts.

For the most part, states establish their own rates to pay Medicaid providers for services. By regulation these rates must be sufficient to enlist enough providers so that covered services will be available to Medicaid beneficiaries at least to the extent they are available to the general population in a geographic area. All providers are required to accept payments under the program as payment in full for covered services except where states require nominal cost-sharing by beneficiaries.

Senate Bill

No provision.

House Bill

The House bill would require the Secretary of HHS to establish no more than 10 demonstration programs within Medicaid for health opportunity accounts (HOA), effective January 1, 2006. While demonstration programs described in the House bill have some of the elements of a Section 1115 demonstration waiver, "Health Opportunity Accounts," as defined by the provision, are not explicitly authorized under current law.

If successful during the initial 5-year test period, other demonstrations would be approved. HOAs would be used to pay (via electronic funds transfers) health care expenses specified by the state; payments could be restricted to licensed or otherwise authorized providers as well as to items and services that are medically appropriate or necessary. Eligibility for HOAs would be determined by the state, though individuals age 65 or older, or who are disabled, pregnant, or receiving terminal care or long-term care, would be among those who would be precluded from participating. Once account holders were no longer eligible for Medicaid they could continue to make HOA withdrawals under state-specified conditions, though accounts could then also be used to pay for health insurance or, at state option, for job training or education. Among other things, state demonstration programs would have to make patients aware of the high cost of medical care,

provide incentives for them to seek preventive care, and reduce inappropriate uses of health care.

Demonstration participants would have both an HOA and coverage for medical items and services that, after an annual deductible is met, were available under the existing Medicaid state plan and/or Section 1115 waiver authorities. HOA contributions could be made by the state or by other persons or entities, including charitable organizations. Including federal shares, state contributions generally could not exceed \$2,500 for each adult and \$1,000 for each child.

Demonstration participants would be required to meet an annual deductible before they would be permitted to access coverage for medical items and services available under the existing Medicaid state plan and/or Section 1115 waiver authorities. The deductible would have to be at least 100%, but no more than 110%, of the annual state contributions to the HOA. Both the deductible and the maximum for out-of-pocket cost-sharing could vary among families. The deductible need not apply to preventive care.

The House bill would require demonstration participants to be able to obtain services from Medicaid providers or managed care organizations at the same payment rates that would be applicable if the coverage deductible did not apply, or from any provider for payment rates not exceeding 125% of those rates.

Conference Agreement

The House bill is agreed to with the following modifications. The conference agreement requires the Secretary of HHS to establish no more than 10 demonstration programs within Medicaid for health opportunity accounts (BOA), effective January 1, 2007. If successful (based on cost-effectiveness, quality of care and other Secretary-specified criteria) during the initial 5-year test period, such demonstrations may be extended or made permanent, and other demonstrations may be approved. Not later than 3 months prior to the end of the initial 5-year test period, the conference agreement requires the Comptroller General of the United States to submit an evaluation of the demonstration programs to Congress.

HOAs are used to pay (via electronic funds transfers) health care expenses specified by the state; payments could be restricted to licensed or otherwise authorized providers as well as to items and services that are medically appropriate or necessary. Eligibility for HOAs is determined by the state, though individuals age 65 or older, or who are disabled, pregnant, or receiving terminal care or long-term care, are among those who are precluded from participating. Once account holders are no longer eligible for Medicaid they may continue to make HOA withdrawals under state-specified conditions for a period of three years, though no additional account contributions will be made and the account balances will be reduced by 25%. For ineligible individuals who participated in the demonstration program for at least one year, accounts could then also be used to pay for health insurance or, at state option, for additional expenditures such as job training or education. The conference agreement adds a 1-year moratorium for reenrollment, whereby eligible individuals disenrolled from the state demonstration programs are not permitted to reenroll for a full year from such individual's disenrollment date. Among other things, state demonstration programs are required to make patients aware of the high cost of medical care, provide incentives for them to seek preventive care, and reduce inappropriate uses of health care.

The conference agreement requires demonstration participants have both an HOA

and coverage for medical items and services that, after an annual deductible is met, are available under the existing Medicaid state plan and/or Section 1115 waiver authorities. HOA contributions could be made by the state or by other persons or entities, including charitable organizations as permitted under current law. Including federal shares, state contributions generally may not exceed \$2,500 for each adult and \$1,000 for each child.

The conference agreement requires demonstration participants to meet an annual deductible before they are permitted to access coverage for medical items and services available under the existing Medicaid state plan and/or Section 1115 waiver authorities. The deductible must be at least 100%, but no more than 110%, of the annual state contributions to the HOA without regard to state-specified limits on the HOA balance. Both the deductible and the maximum for out-of-pocket cost-sharing could vary among families. The deductible need not apply to preventive care.

The conference agreement requires demonstration participants to be able to obtain services from Medicaid providers, or Medicaid managed care organizations at the same payment rates that are applicable if the coverage deductible did not apply, or from any other provider or managed care organization at payment rates not exceeding 125% of such Medicaid provider payment rates. The conference agreement requires that the payment rates for Medicaid providers or managed care organizations be computed without regard to any cost sharing that are otherwise applicable under current law (as modified by the conference agreement).

State Option to Establish Non-emergency Medical Transportation Program (Section 6084 of the Conference Agreement, no provision in the Senate Bill, and Section 3125 of the House Bill)

Current Law

Federal regulations require states to ensure necessary transportation for beneficiaries to and from providers. When states offer transportation as an optional benefit, federal reimbursement uses the federal assistance medical percentage (FMAP) rate which varies by state and ranges from 50% to 83%. FMAP reimbursement is only available if transportation is furnished by a provider to whom a direct payment can be made. Beneficiaries must have freedom of choice among transportation providers and such services must be equal in amount, duration and scope for all beneficiaries classified as categorically needy (CN). This comparability requirement also applies among medically needy (MN) groups. Other arrangements, such as payments to a broker who manages and pays transportation vendors, must be claimed as an administrative expense rather than as a benefit. Such costs are reimbursed by the federal government at 50%, and fewer federal requirements must be met.

Senate Bill

No provision.

House Bill

The House bill would allow states to establish a non-emergency medical transportation brokerage program for beneficiaries who need access to medical care but have no other means of transportation. The state would not be required to provide comparable services for all Medicaid enrollees, nor freedom of choice among providers. The program would include wheelchair van, taxi, stretcher car, bus passes and tickets, and other transportation methods deemed appropriate by the Secretary, and could be conducted under contract with a broker who: (1) is selected

through a competitive bidding process that assesses the broker's experience, references, qualifications, resources and costs; (2) has oversight procedures to monitor beneficiary access and complaints and to ensure that transport personnel are licensed, qualified, competent and courteous; (3) is subject to regular auditing by the state to ensure quality of services and adequacy of beneficiary access to medical care; and (4) complies with requirements related to prohibitions on referrals and conflict of interest established by the Secretary. These provisions would be effective upon enactment.

The Office of the Inspector General (OIG) of DHHS would be required to submit a report to Congress examining the non-emergency medical transportation brokerage program implemented under this provision no later than January 1, 2007. This report must include findings regarding conflicts of interest and improper utilization of transportation services under this program, as well as recommendations for improvements.

Conference Agreement

The conference agreement includes the House bill, and specifies that non-emergency medical transportation brokerage programs do not have to be available statewide.

Extension of Transitional Medical Assistance (TMA) and Abstinence Education Program (Section 6085 of the Conference Agreement, no provision in the Senate Bill, no provision in the House Bill)

Current Law

States are required to continue Medicaid benefits for certain low-income families who would otherwise lose coverage because of changes in their income. This continuation of benefits is known as transitional medical assistance (TMA). States are currently required to provide TMA to families losing eligibility for Medicaid under two scenarios: one related to child or spousal support, and one related to work.

First, under 1931(c) of the Social Security Act, states must provide four months of TMA coverage to families losing Medicaid eligibility due to increased child or spousal support. This is a permanent provision of law with no sunset date.

Second, states are required to provide TMA to families losing Medicaid eligibility for work-related reasons. While Section 1902(e)(1) of the Social Security Act permanently requires states to provide four months of TMA to families losing Medicaid eligibility due to an increase in hours of work or income from employment, the Family Support Act (FSA) of 1988 expanded state TMA requirements under Section 1925 of the Social Security Act. As a result, states are currently required to provide at least six, and up to 12, months of TMA coverage to families losing Medicaid eligibility due to increased hours of work or income from employment, as well as to families who lose eligibility due to the loss of a time-limited earned income disregard (such disregards have the effect of increasing the income level at which a family may qualify for Medicaid). FSA originally authorized Section 1925 to replace the four-month requirement in Section 1902(e)(1) through FY1998. However, the sunset date for Section 1925 has been extended a number of times, most recently through December 31, 2005.

Under Section 510 of the Social Security Act, federal law appropriated \$50 million annually for each of the fiscal years 1998-2003 for matching grants to states to provide abstinence education and, at state option, mentoring, counseling, and adult supervision to promote abstinence from sexual activity, with a focus on groups that are most likely to bear children out-of-wedlock. Funds must be requested by states when they apply for

Maternal and Child Health Services (MCR) Block Grant funds and must be used exclusively for the teaching of abstinence. States must match every \$4 in federal funds with \$3 in state funds.

A state's allotment of abstinence education block grant program funding is based on the proportion of low-income children in the state as compared to the national total. Funding for the abstinence education block grant has been extended through December 31, 2005 by temporary extension measures.

Senate Bill

No provision.

House Bill

No provision.

Conference Agreement

The conference agreement extends TMA under Section 1925 of the Social Security Act through December 31, 2006. It also extends the \$50 million annual appropriation for the abstinence education block grant program through fiscal year 2006 and provides an additional \$12.5 million for the program for the first quarter of fiscal year 2007 (i.e., through December 31, 2006).

Emergency Services Furnished by Non-Contract Providers for Medicaid Managed Care Entities (Section 6086 of the Conference Agreement, no provision in the Senate Bill, and Section 3147 of the House Bill)

Current Law

Medicaid law provides certain protections for beneficiaries enrolled in managed care, including assuring coverage of emergency services under each managed care contract awarded by the state.

Senate Bill

No provision.

House Bill

A Medicaid provider that does not have a contract with a Medicaid managed care entity (MCE) that furnishes emergency care to a beneficiary enrolled with that MCO must accept as payment in full the amount otherwise applicable outside of managed care (e.g., in the fee-for-service setting) minus any payments for indirect costs of medical education and direct costs of graduate medical education. The effective date of this provision would be January 1, 2007.

Conference Agreement

The conference agreement includes the House bill, but clarifies that the fee-for-service rate is the maximum payment rate. Also, in a state where rates paid to hospitals under the state plan are negotiated by contract and not publicly released, the payment amount applicable under this provision must be the average contract rate that would apply under the state plan for general acute care hospitals or the average contract rate that would apply under the plan for tertiary hospitals.

Subtitle B—SCHIP

Additional allotments to eliminate fiscal year 2006 funding shortfalls (Section 6101 Subsection a of the Conference Agreement, Section 6051 Subsection a of the Senate Bill, and no provision in the House Bill)

Current Law

In general, funds for the SCHIP program are authorized and appropriated for FY1998 through FY2007. From each year's appropriation, a state is allotted an amount determined by a formula set in law. Federal funds not drawn from a state's allotment by the end of each fiscal year continue to be available to that state for two additional fiscal years. At the end of the three-year period, unspent funds from the original allot-

ment are reallocated in ways that vary depending on the fiscal year. The original SCHIP law, (i.e., BBA97), specifies that only those states that spend all of their original allotment by the applicable three-year deadline would receive redistributed funds from the other states' unspent allotments, based on a process determined by the Secretary of Health and Human Services (HHS); and these redistributed funds would be available for one year. However, later laws (i.e., P.L. 106-554 and P.L. 108-74) overrode how the reallocation of unspent FY1998 to FY2001 original allotments would occur. The redistribution of unspent FY2002 SCHIP original allotments was determined by the Secretary of HHS in accordance with the default redistribution provision in BBA97.

Under current law, unspent original allotments from FY2003 forward are to be redistributed according to the original BBA97 methodology. That is, redistributed funds will go only to those states that spend all of their original allotments by the applicable three-year deadline, with the redistributed amounts determined by the Secretary of HHS and made available for one year only.

Senate Bill

In general, the Senate bill would reduce the period of availability of the FY2004 and FY2005 original allotments from three years to two, and would specify rules for the reallocation of unspent FY2003, FY2004, and FY2005 SCHIP original allotments. The reallocated FY2003 and FY2004 funds would be available in FY2006; the reallocated FY2005 funds would be available in FY2007.

In FY2006, the Senate bill would require that unspent FY2003 original allotments remaining at the end of FY2005 (after a set-aside of 1.05% of the total unspent FY2003 funds for the territories) would be redistributed to states with an initial projected FY2006 shortfall. The initial projected shortfall is the amount by which a state's estimated federal SCHIP expenditures in FY2006 would exceed the amounts available from the state's FY2005 and FY2006 original allotments. Each state with an initial projected shortfall would receive a portion of the available unspent FY2003 original allotments in proportion to its contribution to the total pool of such shortfalls. From the 1.05% territory set-aside, each territory would receive an amount in proportion to its contribution to the total pool of FY2003 original allotments for the territories.

Also in FY2006, the Senate bill would require that the territories receive a set-aside of 1.05% of the total unspent FY2004 original allotments available at the end of FY2005. Described states would be permitted to extend the use of their unspent FY2004 original allotments in an amount equal to the shortfall still remaining after receiving redistributed FY2003 funds. Described states would be defined as states that: (1) spent all FY2003 original allotments by the end of FY2005, (2) did not spend all of their FY2004 original allotment by the end of FY2005, and (3) reported an initial projected FY2006 shortfall. After the set-aside for the territories as well as the reduction of FY2004 extended funds for the described states, the remaining unspent FY2004 funds would be available to states with a net projected FY2006 shortfall, defined as each state's initial projected shortfall reduced by the redistributed FY2003 funds it received and by the extended FY2004 funds if it is a described state. Each state with a net projected shortfall would receive a redistribution of FY2004 funds to cover its net projected shortfall. Any remaining FY2004 unspent original allotments would then be extended proportionally to states that did not spend their FY2004 allotments by the end of the two-year period of availability. From

the 1.05% territory set-aside, each territory would receive an amount in proportion to its contribution to the total pool of FY2004 original allotments for the territories.

In FY2007, the Senate bill would require that the territories receive a set-aside of 1.05% of the total unspent FY2005 original allotments available at the end of FY2006. Described states would be permitted to extend the use of their unspent FY2005 original allotments in an amount equal to their initial projected FY2007 shortfall. The initial projected shortfall is the amount by which a state's estimated federal SCHIP expenditures for FY2007 exceeds the amount available from the state's FY2006 and FY2007 original allotments. Described states would be defined as states that: (1) did not spend all of their FY2005 original allotment by the end of FY2006, and (2) reported an initial projected FY2007 shortfall. After the set-aside for the territories as well as the reduction of FY2005 extended funds for the described states, the remaining unspent FY2005 funds would be available to states with a net projected FY2007 shortfall, described as each state's initial projected shortfall reduced by the extended FY2005 funds for the described states. Each state with a net projected shortfall would receive a redistribution of FY2005 funds to cover its net projected shortfall or, if the remaining funds are inadequate to cover the FY2007 projected shortfalls, a portion of the available unspent FY2005 original allotments in proportion to the state's contribution to the total shortfall pool. If any FY2005 unspent original allotments remain, they would then be extended proportionally to states that did not spend their FY2005 allotments by the end of the two-year period of availability. From the 1.05% territory set-aside, each territory would receive an amount in proportion to its contribution to the total pool of FY2005 original allotments for the territories.

To calculate the amounts available for redistribution and retention in each formula described above, the Secretary would use expenditures reported by states not later than November 30, 2005, for the FY2003 and FY2004 redistributions, and November 30, 2006, for the FY2005 redistribution. To calculate states with projected shortfalls in each formula described above, the Secretary would use projected expenditures reported by the states not later than September 30, 2005, for the FY2003 and FY2004 redistributions, and not later than September 30, 2006, for the FY2005 redistribution. This provision of the Senate bill would be effective upon enactment of this Act.

House Bill

No provision.

Conference Agreement

Out of money not otherwise available in the Treasury, the conference agreement authorizes and appropriates \$283 million for the purpose of providing additional SCHIP allotments to shortfall states in FY2006. The conference agreement defines shortfall states as those with an approved SCHIP plan for which (based on the most recent SCHIP data as of December 16, 2005) the Secretary estimates that such state's FY2006 projected expenditures exceed the sum of all funds available for expenditure by that state in FY2006 including: (1) the amount of such state's FY2004 and FY2005 original allotments that will not be expended in FY2005; (2) the amount, if any, that is redistributed to such state during FY2006; and (3) the amount of such state's FY2006 original allotment. From the additional SCHIP appropriation, each FY2006 shortfall state would receive an allotment to cover its projected shortfall or, if the appropriated funds are inadequate to cover the FY2006 projected shortfalls, the

Secretary shall distribute the available funds on a pro rata basis based on each such state's estimated shortfall. Such additional SCHIP allotments are available for one year only. On October 1, 2006, any remaining unspent additional allotments will not be subject to redistribution, but will instead revert to the Treasury.

The conference agreement limits the types of payments that may be matched at the SCHIP enhanced matching rate for SCHIP expenditures drawn against the additional FY2006 appropriation available to shortfall states to include child health assistance payments made on behalf of targeted low-income children. The amendments made by this section of the conference agreement apply to items and services furnished on or after October 1, 2005, without regard to whether or not regulations implementing such amendments have been issued.

Prohibition against covering nonpregnant childless adults with SCHIP funds (Section 6102 of the Conference Agreement, and Section 6053 of the Senate Bill)

Current Law

Section 1115 of the Social Security Act gives the Secretary of HHS broad authority to modify virtually all aspects of the Medicaid and SCHIP programs. Under Section 1115, the Secretary may waive requirements in Section 1902 (usually, freedom of choice of provider, comparability, and statewideness). For SCHIP, no specific sections or requirements are cited as "waive-able." SCHIP statute simply states that Section 1115, pertaining to research and demonstration projects, applies to SCHIP.

With respect to SCHIP, the Clinton Administration issued a July 31, 2000, letter regarding treatment of adults. While this Administration was supportive of using the 1115 authority to expand SCHIP to parents of Medicaid or SCHIP-eligible children, as well as to certain pregnant women, it opposed coverage of childless adults. Under the Bush Administration, the Health Insurance Flexibility and Accountability (HIFA) Initiative was implemented using the 1115 waiver authority. The initiative was created to encourage states to increase the number of individuals with health insurance coverage (including childless adults) within current program resources.

Senate Bill

The Senate bill would limit the Secretary of Health and Human Services's Section 1115 waiver authority by prohibiting the approval of new waiver, experimental, pilot, or demonstration projects that allow federal SCHIP funds to be used to provide child health assistance or other health benefits coverage to nonpregnant childless adults. The provision would allow the Secretary to continue to approve projects that expand the SCHIP program to caretaker relatives of Medicaid or SCHIP-eligible children (as defined under Section 1931 of Medicaid statute), and to pregnant adults. Finally, the provision would allow for the continuation of existing Medicaid or SCHIP waiver projects (and/or extensions, amendments, or renewals to such projects) affecting federal SCHIP funds that had been approved under the Section 1115 waiver authority before the date of enactment of this Act. This provision would be effective upon the enactment of this Act.

House Bill

No provision.

Conference Agreement

The Senate bill is agreed to.

Continued authority for qualifying states to use certain funds for Medicaid expenditures. (Section 6103 of the Conference Agreement, Section 6054 of the Senate Bill, and no provision in the House Bill)

Current Law

Current law permits qualifying states (i.e., states that on or after April 15, 1997, had an income eligibility standard for children, other than infants, of at least 184% of the FPL.—Other qualifications also apply to states with statewide waivers under Section 1115 of the Social Security Act.) to receive the SCHIP enhanced federal matching rate for the coverage of certain children enrolled in regular Medicaid. Specifically, for services delivered to Medicaid beneficiaries under the age of 19 who are not otherwise eligible for SCHIP and have family income that exceeds 150% of the FPL, federal SCHIP funds can be used to pay the difference between the SCHIP enhanced federal matching rate and the regular Medicaid federal matching rate. The maximum amount that qualifying states may claim under this allowance is the lesser of the following two amounts: (1) 20% of the state's available FY1998 through FY2001 original SCHIP allotments; and (2) the state's balance (calculated quarterly) of any available FY1998 to FY2001 federal SCHIP funds (original allotments or reallocated funds). If there is no balance, states may not claim 20% spending. No 20% spending will be permitted in FY2006 or any fiscal year thereafter.

House Bill

No provision.

Senate Bill

The Senate bill would continue the authority for qualifying states to apply federal SCHIP matching funds toward the coverage of certain children enrolled in regular Medicaid (not an SCHIP Medicaid expansion). Specifically, the bill would allow qualifying states to use any available FY2004 and FY2005 SCHIP funds (i.e., FY2005 original allotments, and/or FY2004 and FY2005 retained allotments or redistributed funds, as the case may be) for such Medicaid services made on or after October 1, 2005 under the 20% allowance. This provision of the Senate bill would be effective on or after October 1, 2005.

Conference Agreement

The Senate bill is agreed to.

Use of Redistributed Funds for Child Health Assistance for Targeted Low-income Children (No provision in the Conference Agreement, "Section 6051—Subsection b of the Senate Bill, and no provision in the House Bill)

Current Law

Like Medicaid, SCHIP is a federal-state matching program. For each dollar of state spending, the federal government makes a matching payment drawn from SCHIP accounts. The federal government contributes more toward the coverage of individuals in SCHIP than it does for those covered under Medicaid. All SCHIP assistance for targeted low-income children, including claims submitted to and approved by CMS for expenditures under the Section 1115 waiver authority, are matched at the enhanced federal medical assistance percentage (enhanced-FMAP).

Title XXI of the Social Security Act specifies that federal SCHIP funds can be used for child health assistance that meets certain requirements. Apart from these benefit payments, SCHIP payments at the enhanced FMAP rate for four other specific health care activities can be made, including: (1) other child health assistance for targeted low-income children; (2) health services ini-

tiatives to improve the health of targeted low-income children and other low-income children; (3) outreach activities; and (4) other reasonable administrative costs.

Senate Bill

The Senate bill would limit the types of payments that could be matched at the SCHIP enhanced matching rate for SCHIP expenditures drawn against the FY2003, FY2004, and FY2005 redistributed funds available to shortfall states. Specifically, the Senate bill would require the federal government to make matching payments at the SCHIP enhanced matching rate for child health assistance payments made on behalf of targeted low-income children. However, expenditures drawn against the FY2003, FY2004, and FY2005 redistributed SCHIP funds would occur at the regular Medicaid FMAP rate for all other approved SCHIP expenditures, consisting of the following: (1) benefit expenditures for adults (other than pregnant women) approved under the Section 1115 waiver authority; (2) health services initiatives to improve the health of targeted low-income children and other low-income children; (3) outreach activities; and (4) other reasonable administrative costs.

Authority to Use up to 10 Percent of Fiscal Year 2006 and 2007 Allotments for Outreach (No provision in the Conference Agreement, Section 6052 of the Senate Bill, and no provision in the House Bill)

Current Law

In general, Title XXI of the Social Security Act specifies that federal SCHIP funds can be used for child health assistance that meets certain requirements. Apart from these benefit payments, SCHIP payments at the enhanced FMAP rate can be made for the following four specific health care activities: (1) other child health assistance for targeted low-income children; (2) health services initiatives to improve the health of targeted low-income children and other low-income children; (3) outreach activities; and (4) other reasonable administrative costs. For a given fiscal year, payments for these four specific health care activities cannot exceed 10% of the total amount of expenditures for SCHIP insurance benefits and other specific health care activities combined. The Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) created a special rule for the redistribution of unspent FY1998 and FY1999 original allotments. Under BIPA, states that did not use all of their original allotments for the year were permitted to use up to 10% of their retained FY1998 funds for outreach activities. This allowance is over and above spending for such activities under the general administrative cap, described above.

Senate Bill

The Senate bill would allow states to use up to 10% of their FY2006 and FY2007 original allotments for expenditures on outreach activities incurred during FY2006 and FY2007 respectively. This allowance would be over and above spending for such activities under the general administrative cap described under current law. Outreach activities would include: (1) activities to promote the coordination of the administration of SCHIP with other public and private health insurance programs; and (2) strategies to market the program to the target population and to simplify and expedite the eligibility determination and enrollment process. This provision would be effective upon enactment of this Act.

House Bill

No provision.

Conference Agreement

The conference agreement does not include this provision.

Grants to Promote Innovative Outreach and Enrollment Under Medicaid and SCHIP (No provision in the Conference Agreement, Section 6055 of the Senate Bill, and no provision in the House Bill)

Current Law

The federal and state governments share in the costs of both Medicaid and SCHIP, based on formulas defining the federal contribution in federal law. States are responsible for the nonfederal share, using state tax revenues, for example, but can also use local government funds to comprise a portion of the non-federal share. Generally, the non-federal share of costs under Medicaid and SCHIP cannot be comprised of other federal funds.

Under Medicaid, there are no caps on administrative expenses that may be claimed for federal matching dollars. Title XXI specifies that federal SCHIP funds can be used for SCHIP health insurance coverage, called child health assistance that meets certain requirements. Apart from these benefit payments, SCHIP payments for four other specific health care activities can be made, including: (1) other child health assistance for targeted low-income children; (2) health services initiatives to improve the health of SCHIP children and other low-income children; (3) outreach activities; and (4) other reasonable administrative costs. For a given fiscal year, payments for other specific health care activities cannot exceed 10% of the total amount of expenditures for SCHIP benefits and other specific health care activities combined.

Senate Bill

The Senate bill would establish a new grant program under SCHIP to (1) finance outreach and enrollment efforts to increase participation of eligible children in both SCHIP and Medicaid, and (2) promote understanding of the importance of health insurance coverage for prenatal care and children. The Secretary would be permitted to reserve a portion of the grant funds for the purpose of awarding performance bonuses to eligible entities (defined below) that meet enrollment goals or other criteria established by the Secretary.

In awarding grants, the Secretary would be required to give priority to: (1) entities that propose to target geographic areas with high rates of eligible but not enrolled children, or racial and ethnic minorities and health disparity populations, and (2) entities targeting the same populations that are federal health safety net organizations (defined below) or faith-based organizations or consortia. Of the funds appropriated for this grant program (see below), 10% would be set aside for grants to certain Indian health care providers for outreach and enrollment of Indian children. These Indian health care providers would include the Indian Health Service (IHS) and Urban Indian Organization (UIO) providers that receive funds under Title V of the Indian Health Care Improvement Act.

The Senate bill would require entities seeking a grant to submit an application to the Secretary containing information on the quality and outcome performance measures to be used to evaluate the effectiveness of grant activities to ensure that these activities are meeting their goals. In addition, the application must provide assurances that the entity would: (1) conduct an assessment of the effectiveness using such performance measures, and (2) collect and report enrollment data and other information from these assessment to the Secretary in a form and manner as required by the Secretary.

The Senate bill would require the Secretary to disseminate to eligible entities and make publicly available the enrollment data and information collected and reported by grantees. The Secretary would also be required to submit an annual report to Congress on the funded outreach activities.

The Senate bill would require that federal funds awarded under this new grant be used to supplement, not supplant, non-federal funds that are otherwise available for these grant activities.

Specific definitions would be applicable to the new grant program. Five types of entities would be eligible to receive these grants, including: (1) state or local governments, (2) federal health safety net organizations, (3) national, local or community-based public or nonprofit private organization, (4) faith-based organizations or consortia, to the extent that a grant awarded to such an entity is consistent with the requirements of Section 1955 of the Public Health Service Act (relating to grant awards to non-governmental entities), and (5) elementary or secondary schools. Federal health safety net organizations include a number of different types of entities, including for example: (1) Indian tribes, tribal organizations, UIOs and IHS providers, (2) federally qualified health centers, (3) hospitals that receive disproportionate share hospital (DSH) payments, (4) entities described in Section 340B(a)(4) of the Public Health Service Act (e.g., certain family planning projects, certain grantees providing early intervention services for HIV disease, certain comprehensive hemophilia diagnostic treatment centers, and certain Native Hawaiian health centers), and (5) any other entity that serves children under a federally-funded program, including the Special Supplemental Nutrition Program for Women, Infants and Children (WIC), Head Start programs, school lunch programs, and elementary or secondary schools.

The Senate bill would appropriate \$25 million for fiscal year 2007 for these grants. These grants would be in addition to existing SCHIP appropriations, and would not be subject to restrictions on expenditures for outreach activities under current law.

These provisions would be effective with the FY2007 appropriation for this new grant program.

Subtitle C—Katrina Relief

Additional Federal Payments Under Hurricane-Related Multi-State Section 1115 Demonstrations (Section 6201 of the Conference Agreement, Sections 6032 and 6071 of the Senate Bill, and Sections 3100 and 3201 of the House Bill)

Current Law

The federal medical assistance percentage (FMAP) is the rate at which states are reimbursed for most Medicaid service expenditures. It is based on a formula that provides higher reimbursement to states with lower per capita incomes relative to the national average (and vice versa); it has a statutory minimum of 50% and maximum of 83%. An enhanced FMAP is available for both services and administration under SCHIP, subject to the availability of funds from a state's SCHIP allotment. In order for a state to receive federal Medicaid or SCHIP reimbursement, it must have in effect a state plan approved by the Secretary of HHS that meets requirements set forth in federal statute and regulations.

Using an application template developed by the Centers for Medicare and Medicaid

Service within HHS, a number of states (17 as of December 15, 2005) have been granted waivers under Section 1115 of the Social Security Act to provide Medicaid and SCHIP services to certain individuals affected by Hurricane Katrina (these waivers are referred to as being part of a multistate demonstration project). For purposes of FMAP reimbursement, Section 1115 waivers are deemed to be part of a state's Medicaid or SCHIP state plan (i.e., its "regular" Medicaid or SCHIP program).

All of the waivers granted thus far under the Hurricane Katrina multi-state Section 1115 demonstration create a temporary eligibility period, not to exceed five months, during which certain Hurricane Katrina evacuees will be granted access to Medicaid and SCHIP services in the host state (i.e., the state that has been granted a Section 1115 waiver) based on simplified eligibility criteria. In addition to creating temporary Medicaid or SCHIP eligibility for evacuees, waivers for some states also create an uncompensated care pool that may be used through January 31, 2006, to augment Medicaid and SCHIP services for evacuees and to reimburse providers that incur uncompensated care costs for uninsured evacuees who do not qualify for Medicaid or SCHIP.

Disaster declarations were issued in the wake of Hurricane Katrina pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act, which authorizes the President to issue such declarations to speed a wide range of federal aid—including individual assistance (e.g., housing for individuals and families) and public assistance (e.g., repair of community infrastructure)—to states determined to be overwhelmed by hurricanes or other catastrophes. The Federal Emergency Management Agency (FEMA) makes the decision as to when a major disaster or emergency is "closed out" for administrative purposes.

Senate Bill

Under the Senate bill, for items and services furnished during the period August 28, 2005 through May 15, 2006, states would receive 100% FMAP reimbursement for Medicaid and SCHIP assistance provided to individuals who resided during the week preceding Hurricane Katrina in one of the parishes of Louisiana or counties of Mississippi and Alabama specified in the bill. Costs directly attributable to related administrative activities would also be reimbursed at 100%.

A separate provision would allow the state of Louisiana, Mississippi, or Alabama to elect to not have the Medicaid subtitle of the bill apply with respect to the state during any period for which a major disaster declared in accordance with the Stafford Act with respect to a parish (in the case of Louisiana) or a county (in the case of Mississippi or Alabama) as a result of Hurricane Katrina is in effect.

House Bill

Under the House bill, for items and services furnished during the period August 28, 2005 through May 15, 2006, states would receive 100% FMAP reimbursement for Medicaid and SCHIP assistance provided to: (1) any individual residing in a parish of Louisiana, a county of Mississippi, or a major disaster county of Alabama and (2) individuals who resided during the week preceding Hurricane Katrina in a parish or county for which a major disaster has been declared as a result of the hurricane and for which the President has determined, as of September 14, 2005, warrants individual assistance under the Stafford Act. Costs directly attributable to related administrative activities would also be reimbursed at 100%.

A separate provision would allow the Medicaid subtitle of the bill to not apply during

the 11-month period beginning September 1, 2005, to individuals entitled to Medicaid assistance by reason of their residence in a parish of Louisiana or a county of Mississippi or Alabama for which a major disaster has been declared as a result of Hurricane Katrina and for which the President has determined, before September 14, 2005, warrants individual and public assistance under the Stafford Act.

Conference Agreement

The conference agreement appropriates \$2 billion (in addition to any funds made available for the National Disaster Medical System under the Department of Homeland Security for health care costs related to Hurricane Katrina) for use by the Secretary of HHS to pay eligible states (those who have provided care to affected individuals or evacuees under a Section 1115 project) for the following purposes:

- the non-federal share of expenditures for health care provided to affected individuals (those who reside in a major disaster area declared as a result of Hurricane Katrina and continue to reside in the same state) and evacuees (affected individuals who have been displaced to another state) under approved multi-state Section 1115 demonstration projects;
- reasonable administrative costs related to such projects;
- the non-federal share of expenditures for medical care provided to individuals under existing Medicaid and SCHIP state plans; and
- other purposes, if approved by the Secretary, to restore access to health care in impacted communities.

The non-federal share paid to eligible states shall not be regarded as federal funds for purposes of Medicaid matching requirements. No payment obligations may be incurred under approved multi-state Section 1115 projects for costs of: (1) health care provided as Medicaid or SCHIP medical assistance incurred after June 30, 2006 and (2) uncompensated care or services and supplies beyond those included as Medicaid or SCHIP medical assistance incurred after January 31, 2006.

State High Risk Health Insurance Pool Funding (Section 6202 of the Conference Agreement, no provision in the Senate Bill, and Section 3202 of the House Bill)

Current Law

A majority of states have established high-risk health insurance pool programs as one approach to reduce the number of uninsured persons. These programs target individuals who cannot obtain or afford health insurance in the private health insurance market, primarily because of pre-existing health conditions. Many states also use their high-risk pools to provide access to health insurance to individuals eligible under the guaranteed issue and portability provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA, P.L. 104-191). In general, high-risk pools are operated through state-established nonprofit organizations that contract with private insurance companies to collect premiums, administer benefits, and pay claims. These programs tend to be small and enroll a small percentage of the uninsured. As of December 2004, 33 states operate high risk health insurance pool programs. Authorizing legislation for federal funding of these pools expired September 30, 2005.

Senate Bill

No provision.

House Bill

The House bill would amend the Public Health Service Act to reauthorize federal funding for state high risk health insurance

pools. For FY2006, it would provide \$90 million in appropriations for grants to states to be used to cover up to 50% of operating expenses of existing state high risk pools.

Conference Agreement

The conference agreement would appropriate, for FY2006, \$75 million for the losses incurred by a State in connection with the operation of their qualified high risk pool. There is also \$15 million in FY2006 appropriated to fund seed grants to States to create, and initially fund, a high risk pool. This funding will also apply upon the enactment of the State High Risk Pool Funding Extension Act of 2005.

Recomputation of HPSA, MUA, and MUP Designations Within Hurricane Katrina Affected Areas (No provision in the Conference Agreement, no provision in the Senate Bill, and Section 3203 of the House Bill)

Current Law

The Public Health Service Act provides for the designation of areas underserved by healthcare personnel, providing federal loans, scholarships and grants to improve the distribution of health care workers. The program is authorized through 2006.

Senate Bill

No provision.

House Bill

The House bill would direct the Secretary of HHS to review all such shortage designations in Hurricane Katrina declared disaster areas (pursuant to the Stafford Act), considering potential new shortages of health care workers.

Conference Agreement

No provision.

Waiver of Certain Requirements Applicable to the Provision of Health Care in Areas Impacted by Hurricane Katrina (No provision in the Conference Agreement, no provision in the Senate Bill, and Section 3204 of the House Bill)

Current Law

The Public Health Service Act establishes requirements for federally qualified health centers and personnel in the National Health Service Corps. Programs are authorized through 2006.

Senate Bill

No provision.

House Bill

The House bill would direct the Secretary of HHS to relax certain requirements for the conduct of federally qualified health centers, and National Health Service Corps personnel staffing them, in areas directly affected by Hurricane Katrina, or indirectly affected by hosting large numbers of evacuees.

Conference Agreement

No provision.

House Bill

Section 7001 temporarily increases the vessel tonnage fees paid by vessels arriving in the United States. Specifically, section 7001 increases the vessel tonnage fees paid by vessels arriving in the U.S. from a place in North America, Central America, the West India Islands, the Bahama Islands, and Newfoundland, and by certain vessels returning from a "voyage to nowhere." The fees are increased from 2 cents per ton, not to exceed 10 cents per ton in a single year, to 4.5 cents per ton, not to exceed 22.5 cents per ton in a single year. In addition, section 7001 increases the vessel tonnage fees paid by vessels arriving from a foreign port anywhere else in the world from 6 cents per ton, not to exceed to 30 cents per ton, to 13.5 cents per ton, not to exceed 67.5 cents per ton in a single year. These increased rates will be in effect for fiscal years 2006 through 2010.

TITLE VII.—HOUSE COMMITTEE ON WAYS AND MEANS

TANF—Temporary Assistance for Needy Families (Subtitle A)

Reauthorization of Grants

Current Law

The TANF block grant provides states with funding for a wide range of benefits and services to families with children, including cash welfare. Basic block grants are funded nationally at \$16.5 billion per year. The law also provides supplemental grants to certain states funded at \$319 million per year; performance bonus funds of \$200 million per year for meeting program goals and \$100 million per year for reducing out-of-wedlock pregnancies; contingency funds of \$2 billion for states experiencing economic downturns; and a loan fund. Funding authority for the program expires December 31, 2005.

Allows up to 30% of TANF block grants to be transferred to the Child Care and Development Block Grant (CCDBG) and Social Services Block Grant (SSBG), although limit on transfers to SSBG is set at 4.25% for FY2006 and later.

House Passed Bill

Extends TANF block grant at current level through FY2010 and TANF supplemental grants at current levels through FY2009. Eliminates all bonus funds and the loan fund. (Some of these savings are used to finance grants to promote healthy marriages and responsible fatherhood, see below.) Continues a \$2 billion contingency fund through FY2010.

Raises overall transfer authority to 50% of the TANF block grant, and increases maximum transfer to SSBG to 10% (level allowed in the original 1996 welfare law).

Senate Passed Bill

No provision.

Conference Report

Recede to the House, with the modification that TANF supplemental grants are authorized at their current level for three fiscal years (through FY2008). Recede to the Senate with regard to transfer authority.

Work Participation Requirements

Current Law

States are required to make an assessment of the work-readiness of TANF assistance recipients and may establish an Individual Responsibility plan for them. States are required to sanction families with a recipient who does not comply with work.

Recipients are required to visit their children's schools twice per year.

Senate Passed Bill

No provision.

Conference Report

Recede to the Senate with respect to self-sufficiency plans, sanctions, and the increase in work participation standard to 70%.

Recede to the House with regard to the caseload reduction credit, with the modification that the base year for this credit is changed to FY2005, effective October 1, 2006. Adds that families receiving assistance under separate state programs are included in the calculation of work participation rates; and the Secretary of Health and Human Services is to provide additional direction to and oversight of states related to activities that may be counted as work activities, how to count and verify reported hours of work, and determining who is a work-eligible individual, with a new penalty for states that fail to establish and maintain such improved work participation verification procedures.

Recede to the Senate on additional credits for states with large past caseload declines, hours of work, partial credits, special allowances or requirements, and changes in list of

work activities and extent to which such activities may be counted as work.

Healthy Marriage Promotion Grants
Current Law

No special grants. States may use TANF funds for activities to promote the formation and maintenance of two-parent families.

House Passed Bill

Establishes \$100 million per year in matching grants and \$100 million per year in demonstration grants to fund various activities to promote healthy marriages. Requires that marriage promotion activities be voluntary. Requires that grantees consult with organizations with experts in domestic violence.

Senate Passed Bill

No provision.

Conference Report

Recede to the House with the modification that the Secretary of HHS will award \$150 million per fiscal year in healthy marriage promotion, responsible fatherhood, and related grants in each of FYs 2006-2010. Of this amount, up to \$50 million per fiscal year may be awarded on a competitive basis for activities promoting responsible fatherhood, and up to \$2 million per fiscal year is available for demonstration projects for coordination of child welfare and TANF services to tribal families at risk of child abuse or neglect.

Conference Report

Recede to the House with the modification that total child care funding will increase by \$1 billion above the current level over five years, appropriating \$2.917 billion in mandatory child care funding for each of FYs 2006-2010.

Child Support Enforcement (Subtitle C)
Current Law

The Child Support Enforcement (CSE) program is a federal-state program that provides the following basic services to both welfare and nonwelfare families: parent location, review and modification of child support orders, collection of child support payments, establishment of medical child support, and distribution of child support payments. The CSE program is funded with both state and federal dollars. There are four funding mechanisms. First, states spend their own money to operate a CSE program. Second, the federal government reimburses each state 66% for most of its child support enforcement activities or services. The federal government reimburses states at a higher 90% matching rate for paternity determination expenditures. Third, states collect child support on behalf of families receiving welfare benefits to reimburse themselves (and the federal government) for the cost of welfare payments to the family. Fourth, an incentive payment is given to states for operating a good program (current law requires that states reinvest incentive payments back into the CSE program or related activities).

House Passed Bill

Revises some child support enforcement collection mechanisms and add others.

Provides financial incentives to states that send more child support collected on behalf of families on welfare to the families themselves (rather than retain funds as reimbursement for welfare costs). The federal government would pay for a share of support passed through to welfare families as long as that support did not reduce the family's welfare benefit. Also gives states financing incentives to send to former welfare families more of the child support payments collected on their behalf.

Includes a provision to gradually reduce (from FY2007-FY2010) the federal matching rate for child support administrative expenditures from its current 66% to 50%. Also, pro-

hibits the federal government from matching child support incentive payments reinvested in the CSE program.

Senate Passed Bill

No provision.

Conference Report

Recede to the House with modifications that revise child support enforcement collection mechanisms, and provide financial incentives to states that pass through more child support to current and former TANF families. Recede to the House with respect to ending federal matching of state expenditure of federal child support incentive funds, effective in FY 2008. Recede to the Senate with regard to reducing the federal administrative matching rate. Includes provision changing to 66 percent the federal matching rate for laboratory costs incurred in determining paternity, effective October 1, of the Social Security Act and determinations regarding foster care placement, termination of parental rights, and recognition of adoptions. Courts can also use these grant funds to implement changes found necessary as a result of the assessments.

House Passed Bill

Restates the federal foster care eligibility rules to effectively nullify the *Rosales* decision. Restates adoption assistance eligibility to make the same clarification and to simplify the eligibility determination.

Senate Passed Bill

No provision.

Conference Report

Recede to the House, with the modification to include (1) new funds totaling \$100 million over the five-year period FY 2006-2010 for strengthening courts involved in child welfare proceedings, and (2) new funds for the Safe and Stable Families program, increasing mandatory funding to \$345 million in FY 2006 (and thus totaling \$200 million over the five-year period FY 2006-2010).

Limit Federal Foster Care Administrative Claims

Current Law

States may claim reimbursement for some administrative costs related to children who are at "imminent" risk of entering foster care. Some states, relying on prior HHS policy guidance, make additional administrative claims for children placed in unlicensed, or otherwise federally ineligible placement settings, provided the foster child meets all other federal foster care eligibility criteria.

House Passed Bill

Specifies in which cases, and for how long, states may seek reimbursement of foster care administrative costs only on behalf of otherwise federally eligible children who are living with unlicensed relatives, in another ineligible setting, or who have not yet entered foster care.

Senate Passed Bill

No provision.

Conference Report

Recede to the House.

Supplemental Security Income (Subtitle E)
Review of State Agency Blindness and Disability Determinations

Current Law

No provision.

Conference Report

Recede to the Senate.

STATEMENT OF MANAGERS

TITLE VIII—EDUCATION AND PENSION BENEFIT PROVISIONS

With respect to Section 2201 (d) of the House amendment, the managers on the Part of the House agree to request a study by the

Government Accountability Office regarding the effect of the premium as provided under Section 4006(a)(7) of ERISA on persons who are a contributing sponsor of the plan or a member of such sponsor's controlled group and who has filed or has had filed against such person a petition seeking reorganization in a case under title 11 of the United States Code, or under any similar law of a State or a political subdivision of a State (or a case described in section 4041(c)(2)(B)(i) filed by or against such person and report the same to the Committees on Education and the Workforce and the Committee on the Judiciary within 18 months of enactment of this Act.

STATEMENT OF MANAGERS

LIHEAP PROVISION

The Congress finds the following:

(1) Hurricanes Katrina and Rita severely disrupted crude oil and natural gas production in the Gulf of Mexico. The Energy Information Administration estimates that as a result of these two hurricanes, the amount of shut in crude oil production nearly doubled to almost 1,600,000 barrels per day, and the amount of natural gas production shut in also doubled to about 8,000,000,000 cubic feet per day. The hurricanes also initially shut down most of the crude oil refinery capacity in the Gulf of Mexico region. These disruptions led to significantly higher prices for crude oil, refined oil products, and natural gas expected to continue in the foreseeable future.

(2) These production and supply disruptions are expected to lead to significantly higher heating costs for consumers for the foreseeable future. These significant increases in home heating costs this winter and for the foreseeable future will particularly harm low-income consumers. The Low-Income Home Energy Assistance Program is designed to assist these low-income consumers in this situation. Accordingly, Congress seeks a one-time only supplement to the Low-Income Home Energy Assistance Program fund to assist low-income consumers with the additional home heating expenditures that they will face in the foreseeable future as a result of Hurricanes Katrina and Rita.

SECTION-BY-SECTION ANALYSIS OF THE LEGISLATION

Section 9001 Funding Availability

This section appropriates to the Secretary of Health and Human Services for a 1-time only obligation and expenditure \$250,000,000 for fiscal year 2007 for allocation under section 2604(a) through (d) and \$750,000,000 for allotment of emergency funds under section 2604(e) of the Low-Income Home Energy Assistance Act of 1981 (42 D.S.C. 8623(a) through (e)), for the sole purpose of providing assistance to offset the anticipated higher energy costs caused by Hurricane Katrina and Hurricane Rita.

This section sunsets after September 30, 2007, and no monies provided for under this section shall be available after such date.

P.L. 109-58, the Energy Policy Act of 2005, reauthorized annual regular LIHEAP funds at \$5.1 billion per year from FY2005 to FY2007. The LIHEAP appropriation for FY2005 was \$2.182 billion for allocation pursuant to the formula set forth by law. No funds were appropriated for allotment of emergency funds.
