# High-Impact Remote Teams

A Guide for Selecting the Best Printers for the Distributed Workforce

TABLE OF CONTENTS ❯ ❯

What to Expect

After reading this guide, you'll understand why printing is fundamental to employee productivity, which job roles need printers the most, how to select the best printers for your team, and how to manage your print program.

WHAT THE REMOTE WORKFORCE WANTS

The world has changed rapidly in 2020, and so has the workplace. Many companies have quickly learned how to work remotely. As a result, we've also learned that in the future, work won't take place only in an office. Employees want to move to a hybrid model, one where they have the freedom to work both from the office and from home.

This means **as an IT leader, you need a strategy to keep your team productive, engaged, and secure— no matter where they work.** In fact, 69% of IT leaders agree that the events of 2020 are already making them rethink short-term IT strategies, while 67% say they're also rethinking long-term strategies.[1]

Successful IT decision-makers (ITDMs) recognize that their remote workers are often among their most productive, and that printing plays a key role in enabling their productivity. In fact, 62% of ITDMs say they've realized their approach to printing needs to change.[1]

Employees want printing capabilities

While many IT departments focused first on getting PCs up and running for remote work, it's also important to address employees' printing needs. An HP survey found:

- 23% of employees say it would be nice to print or copy daily
- 38% say it would be nice to print or copy weekly

That means over 60% of the workforce is interested in printing regularly—a number ITDMs can't overlook. Printing helps employees work more effectively, which is something 82% of ITDMs who plan to invest in printing capabilities recognize.[1]

The problem with neglecting printing

Many ITDMs don't realize employees want to print, or they believe deploying printers would be a challenge. They may worry about the logistics of getting employees the right devices or about the cost of supplies.

But when left to their own devices, employees turn to DIY solutions to meet their printing needs—often driven by whatever is easiest for them. Sometimes called **sneak printing**, since employees are printing without following company protocols, these solutions can open enterprises up to significant risks, including not only technical failure, lost productivity, and wasted resources, but also security breaches.

1. COVID-19 Commercial WFH Print Pulse Synopsis: May 2020

Risks are rising

When workers first went remote, cybersecurity attacks increased 600%.[2] In addition to facing growing threats, 82% of ITDMs believe remote work itself increases security vulnerability.[3] This situation can be a real challenge to manage, especially when employees use their own devices for printing.
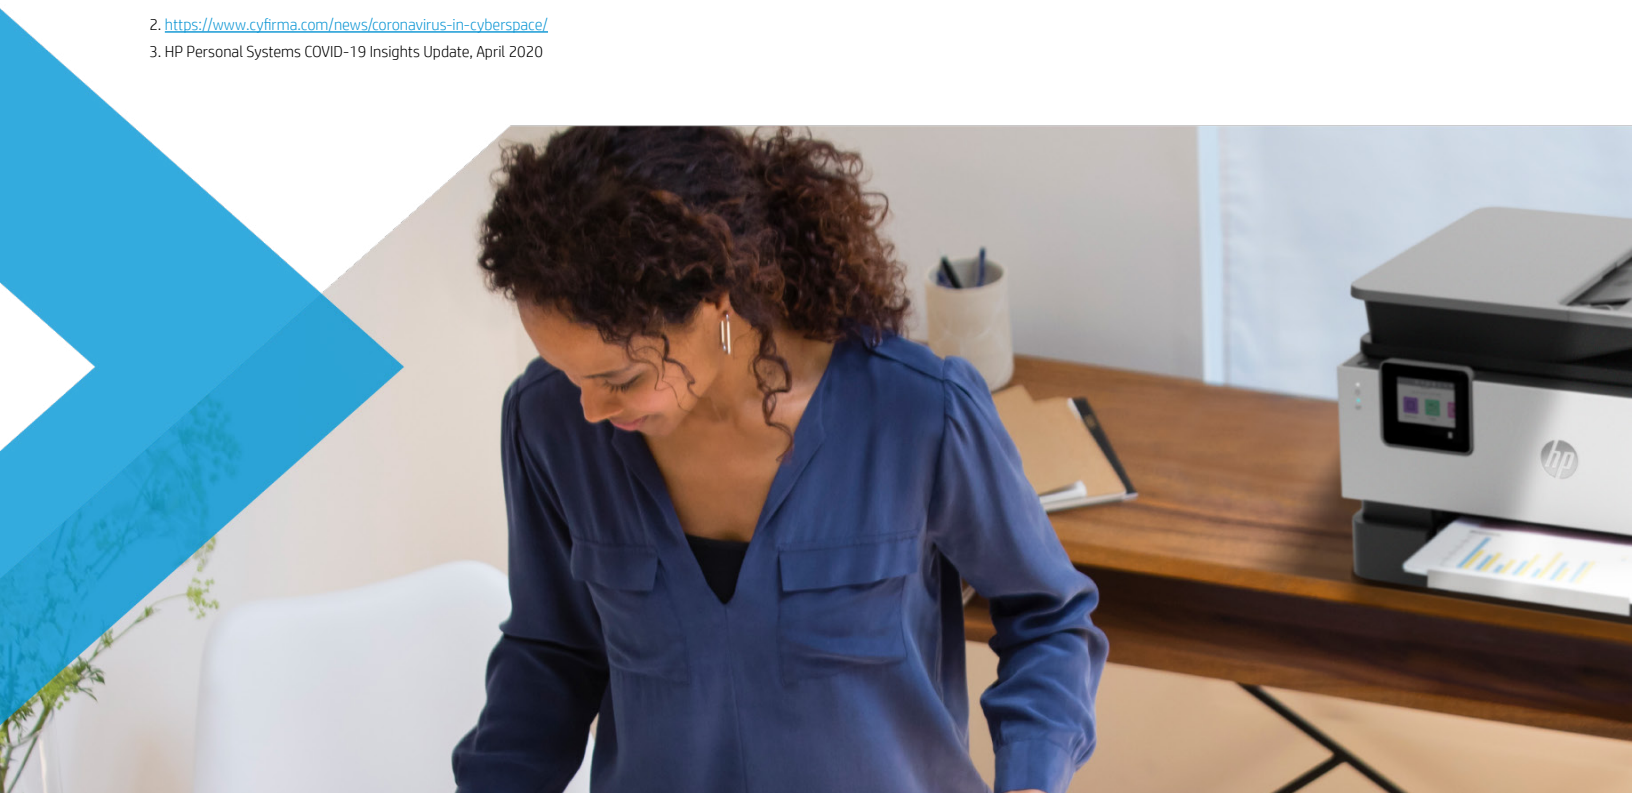

What printing-related risks do ITDMs need to worry about?

- Employee-selected devices that may be more susceptible to attack
- Printers that aren't a good fit for an employee's job and may create productivity challenges and cause frustration
- The hassle of handling supplies and maintenance without a clear plan
- Printers that aren't reliable and result in IT intervening to solve problems
- Lack of visibility into printing costs and supply orders

To ensure printing is consistent with your security, IT, and remote work policies, you need to have a work-from-home print policy that you can leverage. This should include plans for deploying, maintaining, and supporting a printer fleet.

3. HP Personal Systems COVID-19 Insights Update, April 2020

ARE YOU READY TO MAKE PRINTING PART OF REMOTE WORK?

HP IS HERE TO HELP.

Printing capabilities are worth the investment

ITDMs have a lot on their plates, and we know from experience they have some common objections to printing:

The future of work is murky. It's unclear how long employees will be working from home, which may stop ITDMs from considering print. But the reality is **remote work will be a bigger part of the work experience in the future, and printing should be a part of that plan.**

Print isn't prioritized. ITDMs have had a lot to worry about this year, so many haven't focused on printing. Many employees do want to print, though, and **HP has simple solutions for printer deployment and management**.

Current approaches work well enough. When it seems like employees' sneak print solutions work fine, it's easy to focus on other things. But as we've established, **these solutions come with risks, and HP can help you find more secure, effective alternatives.**

Print investment decisions are unclear. Companies may be skeptical about spending money on print when so much is uncertain. **HP offers scalable solutions ideal for remote work that can make the investment worthwhile.**

Ready to make printing a part of remote work? Let's get started.

HP can provide the printers, solutions, and support your remote workers need to stay productive, freeing up IT's time for more important work. In this guide, we'll help you understand the core profiles that make up the remote workforce, what kind of printers will help each be most successful, and how to create a program that gives employees the support they need.

THE 4 PRINTING PROFILES

To provide your employees with the best printing solutions, you need to understand their printing habits. Based on our experience with workplace printing, employees' printing patterns usually fall into four main categories.

David
Office MVP

Typical Roles: Reception, Admissions, Inside Sales, Administration
Print Habits: Invoices, Sales Sheets, Check-In Sheets
Why David Needs a Printer:
- Quickly print and handle intake paperwork.
- Assist multiple departments with printed materials.
- Keep business processes moving and reduce the likelihood of mistakes.

Types of Printing: Black and white; potentially color.
Recommended Printers: OfficeJet Pro 9020 All-in-One & LaserJet Pro M404dw

Mary
Back Office Hero

Typical Roles: Finance, Legal
Print Habits: Spreadsheets, Excel Documents, Employee Reference Material
Why Mary Needs a Printer:
- Print long documents like contracts and spreadsheets.
- Make it easier to examine and mark up documents.

Types of Printing: Black and white; potentially color.
Recommended Printers: LaserJet Pro M454dw & Color LaserJet Pro MFP M182nw

Sarah
Business Champion

Typical Roles: Leadership, Public Relations
Print Habits: Presentations, Market-Facing Documents
Why Sarah Needs a Printer:
- Print high-quality materials she can share inside and outside the organization.
- To effectively communicate about the business.

Types of Printing: Black and white; color.
Recommended Printers: Color LaserJet Pro M255dw & Color LaserJet Pro MFP M428fdw

Frederick
Creative Pro

Typical Roles: Marketing Strategy, IT
Print Habits: Colored Documents, PowerPoint Presentations
Why Frederick Needs a Printer:
- More easily collaborate with his team and outside agencies.
- Print high-quality materials for review.
- Scan documents and share them digitally.

Types of Printing: High-quality, color printing.
Recommended Printers: LaserJet Pro MFP M479 & Color LaserJet Pro MFP M283fdw

It's important to remember your workforce has diverse job roles, so there's no one-size-fits-all solution for their printing needs. But understanding the role of printing in your employees' workflows is an important first step to enabling their productivity.

SELECT THE BEST HP PRINTERS FOR YOUR WORKFORCE

During a time when many businesses are in flux, we know cash flow can be a concern. That's why we're offering this curated set of printers at an affordable price. **Flexible payment options allow you to preserve cash, bundle hardware and service, and increase your purchasing power.** Consult the table below to see the best solutions for all members of your workforce.

Good Through July 31, 2020.

BRING SCANNING TO THE HOME OFFICE

Give employees the tools they need to digitize documents.

HP ScanJet Pro N4000 snw1 Sheet-feed Scanner
Fast, affordable scanning for projects large and small.

HP OfficeJet 250 Mobile All-in-One Printer
Scan, copy, and print with a portable device that handles it all.

The Ultimate Printers for Work From Home

Fierce Without Footprint

Meet the New HP LaserJet Enterprise 400 Series

Seamless management wherever work happens
Set up work teams for success with fleet-wide control that doesn't add more to IT's plate.

Protect your network with the world's most secure printers[4]
Automatically self-heal from attacks to your distributed workforce with industry-leading security[4] that makes hackers feel small.

Big productivity, small size
Empower people to collaborate how they want—wherever their office is— and bring their workload down to size.

Lessen your impact
Conserve resources—energy, paper, and workspace—with a compact, efficient design that fits right into remote workspaces or home offices.

HOW HP ENABLES YOUR REMOTE WORKFORCE

Supporting the printing needs of a hybrid workforce requires more than just selecting a device that matches their job role. It also means enabling them through the full product life cycle for both hardware and supplies. To help you understand what this life cycle entails, we'll walk through the four stages of the hardware and supply cycle, including:

| **1** | Purchasing | **2** | Setup |
| **3** | Management | **4** | Tech Support |

We'll also discuss potential **security** risks, and how a printer with built-in security can prevent a security breach. Additionally, we'll explore how printers can be more sustainable throughout their life cycles to support your **sustainability** goals. Along the way, we'll offer insights into how workforce productivity has changed in this new world of work, and provide tips for finding success.

STAGE 1: PURCHASING

In 2020, most companies are facing a new financial environment. Protecting the bottom line is essential—as is ensuring your workforce stays productive. The challenges of this year have led to rapid change. 58% of IT leaders report that digital transformation timelines have accelerated.[5] To support these changes, 41% of ITDMs plan to invest in new devices, and 53% would buy a printer.

Why ITDMs are buying printers:[5]

87%
Say printers improve employee productivity at home

72%
Say printers are needed for documentation

51%
Say employees have requested printers

Even though ITDMs need to buy equipment, cash flow is still a concern. When you're evaluating printers, consider purchase and leasing options. HP offers a variety of solutions to help you maximize cash flow and maintain positive ROI.

Purchasing Options

HP Leasing Programs

As low as $8 per user per month.

Bundle With HP Care Pack

Add support to your monthly payment, including next-day on-site service.

HP Flexworker

Opt for a managed program that simplifies printer and supply ordering for employees.

Visit the HP Store

Shop for HP printers and supplies online at our store or through our resellers.

Leasing Options

Through HP Integrated Financial Solutions, we can help you find a financial structure that meets your immediate needs. You get the hardware you need today, but pay for it over time.

You can lease an HP printer for as low as $8 per user per month, and you have the option to bundle HP Care Pack printer support into your monthly payment, which can be especially beneficial when you have a remote workforce.

If you're looking for even more flexibility to align cash flow and revenue streams while addressing the impacts of the current business environment, HP Integrated Financial Solutions can also align deferrals and ramp up structures.

82%
Say printers help employees
work more effectively.[6]

6. COVID-19 Commercial WFH Print Pulse Synopsis: May 2020

STAGE 2: SETUP

Many employees were thrust into new work environments—in home offices, at kitchen tables, and even in living rooms—and that required a lot of adjustment. These employees needed to get their technology up and running quickly, but in many cases that process didn't include printing. **IT teams need to make printing as easy and accessible as possible with quick setup and simple usability.**

Tips & Tricks for Quick Setup

- **Select the right vendor.** HP provides all the hardware and accessories employees need right out of the box, including power cords, toner, and instructions.

- **Make sure the setup process is easy.** Your employees can set up their printers wirelessly via the HP Smart app in just a few quick steps.

- **Don't underestimate printer settings.** By opting for devices preset to meet employees' needs, you can reduce the time they spend customizing settings. For example, HP printers come with duplex printing configured right out of the box, and they're also set up for energy savings.

Ensure Simple Usability

Your employees will appreciate a simple printer setup process, but they also want devices that are easy to use. HP printers feature user-friendly designs so your workforce can get up to speed and start printing fast:

- **Intuitive user interface:** Includes a customizable home screen, copy preview, and configurable shortcuts to speed up tasks.

- **Reliable connectivity:** Dual-band Wi-Fi and Bluetooth Low Energy enable easy remote printing and wireless setup.

- **Simplified multitasking:** Printers can process jobs while users continue working in other applications.

Watch the HP LaserJet Pro 400 Series video to learn more about our printer usability features.

WHY HP WINS: PRODUCTIVITY

HP printers help employees do their best work and increase their productivity.

HP LaserJet Pro M400 Series Benefits
- Fast first-page-out times and print speeds
- A customizable control panel that enables workflow automation
- Quick digitization of paper documents on MFP models

High-Capacity Cartridges
- Reduce cost per print up to 25% over standard cartridges[7]
- Cut down on the frequency of cartridge replacements

7. For details, visit: https://www8.hp.com/us/en/go/suppliesclaims.html

STAGE 3: MANAGEMENT

Even if the location of your workforce has changed, their need to print has not—and you need to help them manage the printing process. If you're still working through the best methods to support the needs of your workforce, you're not alone. According to an HP survey, 58% of ITDMs say they need to provide better IT support to employees working from home.

When you invest in printers, you have several options:

- Go through your preferred partner
- Work directly with HP as part of a managed service program like HP Flexworker

HP Flexworker Service

HP Flexworker Service is an extension of an HP Managed Print Services contract and is designed to meet the needs of the evolving workplace. The service simplifies print management—for your organization and your employees. Your IT team selects what employees can order, and employees log in to their customized portal to get what they need. It's fast, simple, and helps you track supply orders. Get all the details.
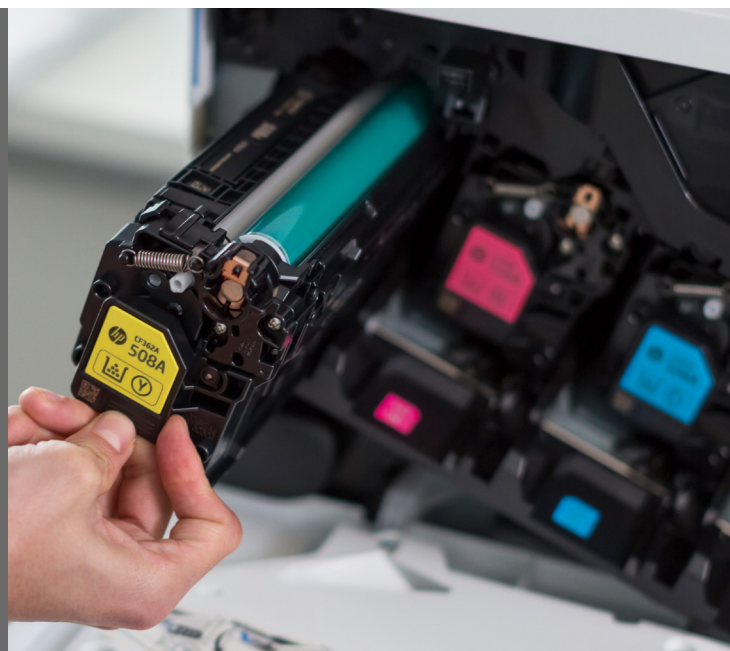

Benefits for your organization:

- **A simplified ordering experience.** Your team can quickly access printers, supplies, and HP Care Packs that include coverage and support services.

- **Better IT control.** You'll get visibility into the purchasing process, centralized billing, and consolidated reporting.

- **Cost savings.** Employees purchase supplies at contracted rates, and accounting doesn't need to spend time handling expense forms.

- **Higher productivity.** Eliminates the time employees spend searching for the right ink/toner online or in a store.

WHY USE ORIGINAL HP TONER?

With long-lasting toner such as HP High Yield Cartridges, you can:

- Reduce the frequency of cartridge replacements
- Avoid problems caused by off-brand toner
- Print high-quality materials for all your print jobs
- Get built-in security you can trust

Learn more about Original HP toner.
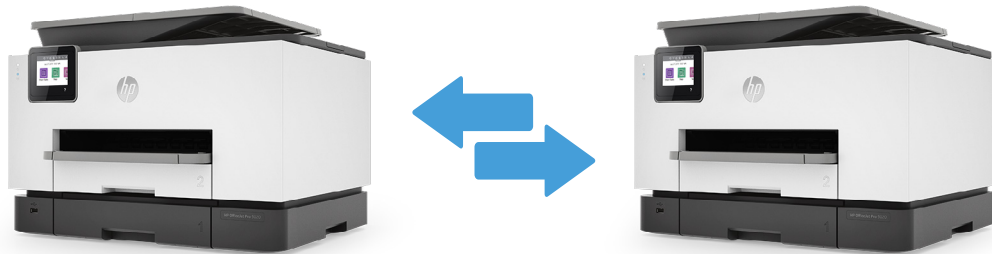

STAGE 4: TECH SUPPORT

The challenges of a new work environment alone can interrupt your employees' productivity, and when they have to troubleshoot printing issues, they can fall even more behind. IT leaders need to limit the frequency of interventions for printer repairs so everyone—the IT team included—can focus on what's most important.

HP Care Packs and printer exchange services simplify troubleshooting and service so your employees can quickly get back to work.

HP Care Packs: Reduce the Need for Interventions

Your tech support strategy should include solutions that reduce the need for interventions and take the burden of frequent troubleshooting off of your staff. HP Care Pack Services offer a range of support options that enable fast repairs and replacements and get users back up and running fast. Choose packages that include remote troubleshooting, diagnostics, and issue resolution, or enhance your support with an on-site service option.

HP Next Day Business Exchange

Easily return and exchange printers when an issue cannot be resolved.

SECURITY

In addition to managing the life cycle of printers and supplies, you also need to think about security. Cyberattacks have grown 600% since early this year.[8] Many ITDMs are concerned about increased endpoint security risks, especially related to printers and laptops used at home.[9] To keep your workforce secure and productive, you need best-in-class security for hardware and supplies.

Enhanced Printer Security

With HP, you can feel confident your printers will stay secure, even when they're located in employees' homes. HP has the world's most secure printers,[10] designed to detect and stop an attack as it happens. Unlike many printers on the market, HP printers come with embedded security that detects malware.

HP LaserJet Pro M400 series printers offer best-in-class security.[11] They include security features such as secure boot and secure firmware to prevent printers from becoming entry points for attacks. They also come with optional PIN and pull printing solutions to help protect sensitive documents.

Built-In Toner Protection

HP toner comes with advanced security features. All printer cartridge chips are tamper-resistant, and HP also reinforces security in the supply chain to reduce the risk of malicious code entering the chip. Learn more about the security features of Original HP printer cartridges.

Curious why toner security is so important? Check out the "Is Your Printer the New Trojan Horse?" white paper.

Cybersecurity Best Practices for Remote Work

You can further enhance security for remote work by having employees follow best practices. HP security experts recommend developing robust security plans and policies that cover:

- Data and device sharing policies
- Password security
- Antivirus software
- VPN usage
- Laptop and printer security

View the complete list of HP Remote Worker Cybersecurity Best Practices or watch our 8-minute webinar about this important topic.

9. COVID-19 Commercial WFH Print Pulse Synopsis: May 2020

10. HP's most advanced embedded security features are available on HP Enterprise and HP Managed devices with HP FutureSmart firmware 4.5 or above. Claim based on HP review of 2019 published features of competitive in-class printers. Only HP offers a combination of security features to automatically detect, stop, and recover from attacks with a self-healing reboot, in alignment with NIST SP 800-193 guidelines for device cyber resiliency. For a list of compatible products, visit: hp.com/go/PrintersThatProtect. For more information, visit: hp.com/go/PrinterSecurityClaims.

11. Based on HP review of 2018 published security features of competitive in-class printers. Only HP offers a combination of security features that can monitor to detect and automatically stop an attack then self-validate software integrity in a reboot. For a list of printers, visit hp.com/go/PrintersThatProtect. For more information: hp.com/go/printersecurityclaims.

SUSTAINABILITY

You can continue to pursue your sustainability goals even with a distributed printer fleet. Hardware and supplies can help you meet these goals both during use and at the end of their life cycles. HP ensures your printing technology does just that.

Printer Energy Conservation

HP printers are designed for low energy consumption. HP LaserJet Pro M400 series printers, for example, reduce energy use up to 21%.[12] The HP Auto-On/Auto-Off feature also reduces energy use by making the printer go idle during downtime.

Better Indoor Air Quality

Indoor air quality (IAQ) is something businesses should be concerned about for the health and comfort of their employees. HP voluntarily designs and tests its printing systems[13] to prevent emissions that exceed IAQ eco-label guidelines. 96% of non-HP toner cartridges tested, on the other hand, emitted volatile chemicals at levels that may increase health risks.[14]

Longer Lasting Supplies

HP High Yield Cartridges last longer, reducing interventions and the frequency of replacements. That means fewer interruptions for employees and fewer cartridges to recycle.
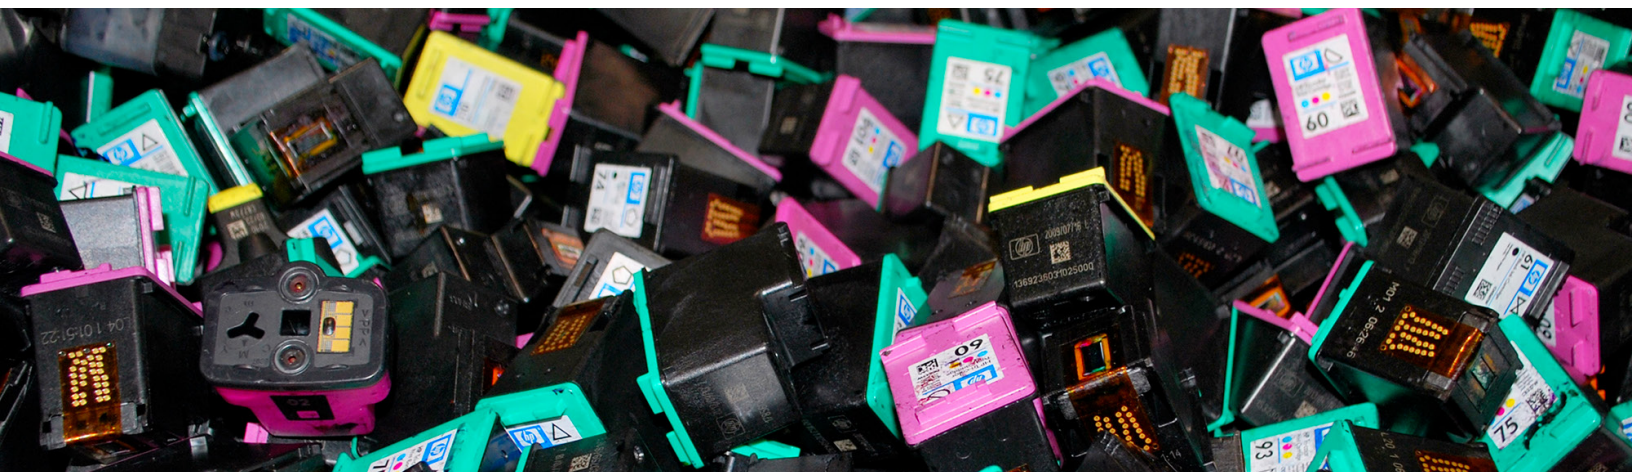

Easy Recycling and Disposal

HP is the world's #1 printer supplies recycler, and our HP Planet Partners toner return and recycling program provides a free and convenient way to recycle empty HP toner cartridges. The program operates in 76 countries and territories worldwide, so you can find a recycling program near you.

If you're in the market for a new printer, you can also take advantage of the HP Refresh and Recycle Program for printers to reduce e-waste. When you purchase a new HP printer through the program, we'll recycle your old one for free.

See HP.com/go/IAQnonhpWKI2019

CONCLUSION: IT'S TIME TO TECH-ENABLE YOUR REMOTE WORKERS

Employees working remotely need printing capabilities, regardless of their job role. Whether they're an Office MVP, a Back Office Hero, a Business Champion, or a Creative Pro, employees want to print from home. That means you need to provide secure printers and keep these devices up and running.

Your organization can make that happen by:

- Selecting hardware that fits employees' job roles, workflows, and daily/weekly printing habits.
- Purchasing or leasing devices that come with the features and support your teams need to stay productive and collaborate.
- Ensuring printer setup, management, and maintenance/repair is simple.
- Choosing printers and supplies that are inherently secure and help you meet sustainability goals.

When you take the time to set up your remote workforce with the right technology, they can stay productive, your IT team won't need to worry about unexpected costs and interventions, and the business will be able to move forward successfully in this new world of work.

If you have questions about selecting hardware, financing options, or support packages, we're happy to help. Contact an HP Sales Representative.
