FOREWORD

"Cotton Counts Its Customers" is a statistical report containing measurements of the quantities of cotton and competing materials consumed in major textile products manufactured in the United States. All data in this report is presented on a calendar year basis. Annual editions providing preliminary data for the previous year are published regularly; special editions are published at periodic intervals to revise data for a series of years and to present supplementary information on conversion factors and typical materials consumed.

The purpose of the Council's end use estimates is twofold:

- a) To provide measurements of the quantities of cotton actually consumed in each major end use;
- b) To provide measurements of the quantities of cotton which would have been consumed if cotton had accounted for all fibers and competing materials utilized in each application.

To satisfy these objectives, total material consumption within each use is calculated in terms of "cotton equivalents," i.e., in terms of the quantities of cotton which would have been consumed had cotton yarns and fabrics been utilized in place of competing materials. This procedure, therefore, measures actual and potential consumption of cotton by end use; it does not measure the absolute consumption of cotton by end use; it does not measure the absolute consumption of competing materials in terms of pounds of fibers, yarns, or fabrics.

This annual edition contains revised 1965 and preliminary 1966 end use consumption data for cotton and competing materials and estimates of raw fiber consumption in imports and exports of cotton manufactures. The report is presented in four sections. Charts, showing cotton consumption in textile products, and an array of cotton's end uses precedes Section I.

Section I is a summary of consumption data for cotton and competing materials in 110 major apparel, household, and industrial uses.

Section II is a detailed tabulation of statistical data for each end-use item within the major product classifications. Included in this section are: (a) domestic production of each item; (b) total materials consumed in each use including woven fabrics, knitting yarns, and other textile materials; (c) cotton's percentage share of total materials; and, (d) the quantity of gray and raw cotton consumed in each end-use item. (Readers should study introductory comments preceding Section II to avoid misinterpretation or misuse of the data.)

Section III is a tabulation of United States imports of cotton manufactures, including: (a) the quantity of cotton yarns, fabrics, and end products imported during the calendar years 1965 and 1966; and (b) estimates of the quantity of raw cotton consumed in end uses.

Section IV is a tabulation of United States exports of domestic cotton manufactures, including: (a) the quantity of cotton yarn, fabrics, and end products exported during the calendar years 1965 and 1966; and (b) estimates of the quantity of raw cotton consumed in end uses.

End-use estimates of domestic raw cotton consumption do not necessarily agree with total mill consumption of cotton for a specified calendar year because:

- a) Many small uses are not included in the end-use estimates;
- b) Time lags occur between mill consumption of raw cotton and the conversion of yarns and fabrics into end-use products;
- c) Inventories of yarns and fabrics vary from one year to another;
- d) Estimates of materials consumed are based on "typical" cotton yarns and fabrics and not on actual weights of every type of yarn and fabric consumed;
- e) An unknown quantity of spinnable cotton waste included in some end-use products has been calculated as staple cotton;
- f) Imported yarns and fabrics made into end products in the United States are included in this report; exports of yarns and fabrics are excluded.

Statistical data in this report were compiled by the National Cotton Council's market research staff. The interest and cooperation of the many representatives of private companies, trade associations, and government agencies who contributed information are acknowledged with appreciation.

1/ Data shown summarizes by major uses, materials consumed in individual end uses reported in Section II.

2/ Estimated total quantity of material - expressed in thousands of 500-pound gross weight bales of raw cotton - consumed in the domestic production of end-use items listed in Section II.

3/ Estimated percentage share of total materials consumed accounted for by cotton at the raw fiber level. Percentage figures are calculated on the basis of bale figures rounded to the nearest 10 bales (Section II).

4/ Estimated quantity of cotton - expressed in thousands of 500-pound gross weight bales - consumed in the domestic production of end-use items listed in Section II.

5/ Consumption figures for individual end uses and sub-totals are rounded so that all figures add exactly to grand totals. Refer to Section II for consumption figures rounded to the nearest 10 bales.

6/ Excludes materials consumed in flannel diaper production; see Section II for data on birdseye and gauze diapers.

7/ Not included in previous editions of this publication. See Footnote 51 in Section II.

* Less than one thousand bales.

SECTION II: ESTIMATED END USE CONSUMPTION OF COTTON AND COMPETING MATERIALS

Introduction

Estimated domestic production of end use items and quantities of woven fabrics, knitting yarns, and other textile materials utilized in making end products during the calendar years 1965 and 1966 are presented in this section.

Measurements of materials consumed are in terms of cotton equivalents, i.e., the total quantity of cotton which would have been consumed had cotton yarns and fabrics been utilized instead of competing materials. The production of end-use items is converted into cotton equivalents primarily on the basis of data reported in Section IV of the 1966 Special Edition of "Cotton Counts Its Customers." All estimates of materials consumed are based on "typical" cotton constructions and not on a tabulation of the exact quantity of every construction utilized, since such data are not available.

Estimates generally are comparable with those published in the 1966 Special Edition of "Cotton Counts Its Customers." However, product detail in this edition has been expanded to provide separate consumption estimates for the following knit items of women's and children's apparel: dresses, foundation garments, playgarments, robes, skirts, slacks, suits, and washable service apparel. In previous editions of this publication, materials consumed in these knit items were included with woven fabrics.

Materials included in this section are classified by principal constructions.

Woven Fabrics - Includes woven textile fabrics and other materials, such as non-woven textiles, plastic film, leather, and paper, which are consumed in direct competition with conventional woven fabrics. In some uses, however, product classification detail excludes these competing materials. It should be noted that in some cases figures shown in the woven fabric column still include an unknown quantity of knit items - calculated on a woven yardage basis.

Knitting Yarns and Other Textile Materials - Includes knitting yarns, tire cord, tufting yarns, thread, cordage and twine, etc. Wherever possible, knit products are identified in Column (a) and production and consumption figures are reported in the appropriate columns. However, in some end uses, reliable data are not yet available for separating knit items from woven items. In such cases, knitting data are included with woven fabrics.

Units of Measure and Abbreviations

Production estimates are reported in thousands of units as follows: dozen, dozen pairs, linear yards, square yards, pounds, pairs, or units.

The quantity of equivalent gray cotton materials required per unit of production is reported in square yards or pounds.

Total materials consumed and cotton materials consumed are reported in square yards and/or pounds and 500-pound gross weight bales.

Abbreviations used are: (a) Doz. - Dozens; (b) Doz. Pr. - Dozen Pairs; (c) Lyds. - Linear Yards; (d) Syds. - Square Yards; (e) Lbs. - Pounds.

Explanation of Column Headings

- Column (a) - A list of end uses for textile materials.
- Column (b) - United States production of end-use items shown.
- Column (c) - Equivalent gray cotton materials required per unit of production.
- Column (d) - Total consumption of woven fabrics - including non-textile and non-woven materials consumed in direct competition with woven fabrics unless specifically excluded - expressed in equivalent square yards of gray cotton fabrics.
- Column (e) - Yardage reported in Column (d) converted into equivalent pounds of gray cotton fabrics.
- Column (f) - Total consumption of (1) knitting yarns, and (2) tufting yarns, thread, tire cord, etc., expressed in equivalent pounds of gray cotton materials.
- Column (g) - Grand total, all materials consumed - Column (e) plus Column (f) - expressed in equivalent pounds of gray cotton materials.
- Column (h) - Grand total, all materials consumed, expressed in equivalent 500-pound gross weight bales of raw cotton. Estimate includes an allowance for bagging and ties.
- Column (i) - Percentage of total material consumption accounted for by cotton at the raw fiber (bale) level. "Percent cotton" in this report represents a weighted calculation involving (1) 100% cotton materials, plus (2) cotton content of blends and mixtures. Note: Percent cotton for all sub-totals and totals is computed by dividing Column (n) by Column (h).

- Column (j) - Cotton yardage consumed, expressed in square yards of gray woven fabrics. Includes (1) 100% cotton materials, plus (2) cotton content of blends and mixtures expressed in square yards.
- Column (k) - Yardage reported in Column (j) converted into pounds of woven fabric. Includes (1) 100% cotton materials, plus (2) cotton content of blends and mixtures.
- Column (l) - Total cotton consumed in (1) knitting yarns, and (2) tufting yarns, thread, tire cord, etc., expressed in pounds of gray cotton materials. Includes (1) 100% cotton materials, plus (2) cotton content of blends and mixtures.
- Column (m) - Grand total, cotton materials consumed - Column (k) plus Column (l) - expressed in pounds of gray cotton materials. Includes (1) 100% cotton materials, plus (2) cotton content of blends and mixtures.
- Column (n) - Grand total, cotton materials consumed, expressed in equivalent 500-pound gross weight bales of raw cotton. Estimate includes an allowance for bagging and ties.

1/ Unless otherwise indicated in footnotes, estimates are based on statistics published by the Industry Division, Bureau of the Census, United States Department of Commerce and/or information provided by manufacturers of textile products.

2/ Estimates generally are comparable with those published in the Special Edition of "Cotton Counts Its Customers," September, 1966, covering the 1956-1964 period. However, product detail separate data for knit garments. In previous editions of this publication, materials consumed in these knit items were included with woven fabrics.

3/ Quantity data relate primarily to woven fabrics; however, in some end uses other materials also are included. Refer to the introduction to Section II for a discussion of "Woven Fabrics." See footnote 2, above, regarding comparability with data reported in previous editions of this publication.

4/ Includes knitting yarns, tire cord, tufting yarns, thread, cordage and twine, etc. Refer to introduction to Section II for a discussion of "Knitting Yarns and Other Textile Materials." See footnote 2, above, regarding comparability of data with that reported in previous editions of this publication. See table following footnotes for separate data on "Knitting Yarns" and "Other Textile Materials."

5/ Unknown quantities of knit and tufted pile fabrics utilized in outer shells and linings are included with materials reported as woven fabrics.

6/ Excludes interlinings.

7/ Includes tailored uniform garments made for both military and civilian use. Athletic uniforms are reported in Item 100.

8/ Includes an unknown quantity of leather coats.

9/ Knitting yarn data include leather calculated on a cotton displacement basis.

10/ It is believed that "woven" is a trade misnomer and that these gloves are manufactured primarily from knit fabrics.

11/ All leather content work gloves; all cotton flannel gloves, with the exception of "single"; and all terry cloth gloves are reported in Item 3. Other types of work gloves produced for use by women are reported in Item 21.

12/ Based on data reported in "1966 Hosiery Statistics," National Association of Hosiery Manufacturers. Women's, misses', and juniors' hosiery and crew socks are reported in Item 41. Hosiery data exclude women's textured, patterned, technical hosiery primarily manufactured outside the hosiery industry on special knitting machines for bulk items, specially lined, and unlined coats.

30/ Estimates contain separate data for knit robes which were included with woven garments in previous editions of this publication. Girls' and children's tufted robes are included with Item 28.

31/ Bonded knit lining materials utilized in suits are included with consumption data reported for woven fabrics.

32/ Excludes filling materials.

33/ Consumption data based on estimated annual production ratio of quilted to non-quilted tailored spreads.

34/ Excludes pillow ticking which is included with Item 61.

35/ Excludes bindings.

36/ Unit production estimates for blankets are based on yardage figures from Bureau of the Census, "Current Industrial Reports," Series M227. Yardage requirements per unit for synthetic crib blankets have been understated in previous editions of this report. Revising yardage requirements upward from 1.06 to 1.45 syds./unit results in a downward revision in unit production of synthetic crib blankets.

37/ Excludes materials consumed in the production of ready-made woven furniture slip covers which are reported in Item 65.

38/ Principally Nottingham lace and lace products; excludes apparel-type lace.

39/ Gray material requirements per unit were revised downward in 1965 and again in 1966 to reflect expanding military purchases of cot-size mattress covers.

40/ Excludes drapery and upholstery fabrics sold at retail as yard goods. The figure "1.16 Syds." reported in Column (c) reflects area change from gray to finished fabric. An unknown quantity of knit piece goods is included with woven fabrics.

41/ Excludes automobile and other transportation carpeting which is reported in Item 72.

42/ Gray material requirements per unit are adjusted annually to conform with yardage and poundage data reported in Bureau of the Census, "Current Industrial Reports," Series M220.

43/ Based on data published by The Thread Institute, and by the Bureau of the Census.

44/ Includes both warp and circular knit fabrics. Data on knit towels, wash cloths, and dish cloths were understated in previous editions of this publication.

45/ Consumption of vinyl film and non-textile substrate materials for vinyl coating are calculated on a cotton equivalent basis, i.e., the quantity of cotton displaced by non-usage of substrate materials or by use of non-textile substrates. Vinyl film and non-textile substrate materials are reported as woven fabrics.

46/ Includes an unknown quantity of woven tire cord fabric.

SECTION III: UNITED STATES GENERAL IMPORTS OF COTTON MANUFACTURES,
1965* AND 1966* (Continued)

Item	1965		1966	
	Quantity of Imports 1/	Equivalent 500-Pound Gross Wt. Bales 2/	Quantity of Imports 1/	Equivalent 500-Pound Gross Wt. Bales 2/
Badminton Nets	(1,000 Lbs.) <u>128</u>	<u>310</u>	(1,000 Lbs.) <u>143</u>	<u>350</u>
All Other Household & Industrial Uses, NES	(1,000 Lbs.) <u>4,608</u>	<u>10,870</u>	(1,000 Lbs.) <u>6,871</u>	<u>16,220</u>

- 1/ Unit of measure as reported in United States Department of Commerce reports TQ 2010 and FT 246. Import data for 1965 are from December, 1965, TQ 2010. Minor revisions in 1965 import data - from later editions of TQ 2010 - have not been incorporated into this report.
- 2/ General imports of cotton manufactures expressed in equivalent 500-pound bales of cotton.
- 3/ Includes cotton and chiefly cotton manufactures; excludes imports of cotton in products made primarily of other materials, such as footwear, tires, etc.
- 4/ Excludes weight of rubber or plastic.
- 5/ Includes only luggage and handbags reported as "cotton." Poundage includes the weight of cotton covering as well as non-cotton luggage and handbag components.
- 6/ Includes the weight of filling.
- * General imports represent total arrivals of imported cotton manufactures (except intransit shipments) including (a) merchandise released from customs custody immediately upon arrival and (b) merchandise entered into bonded storage warehouses and bonded manufacturing warehouses.
- ** Less than ten bales.
- NA Not Available.
