BOONDOCKS • MC127 • PG 27

Our weathered cotton hats are just a few of the many styles that have been tested and rated to provide an ultraviolet protection factor of 50+. When you see our UPF 50+ hangtag on one of our hats, you can count on the best sun protection possible. A regimen of wearing broad brimmed headwear, along with sunscreen, is proven to be effective in the prevention of skin cancer and premature aging.

CLOTH HATS & CAPS

NO FLY ZONE[®]

INSECT REPELLENT TECHNOLOGY

By  Burlington[®]

DISCOVER THE NO FLY ZONE[™] DIFFERENCE

- No Fly Zone[™] hats are non-toxic, odorless, invisible protection proven to repel insects
- Constructed of comfortable nylon fabric
- Features one of the most efficient permethrin fabric treatment processes available
- Sweating and washing won't deteriorate effectiveness
- Hats maintain protection after 70 washings - extending the life of the hat while giving you maximum value and performance

CONTACT REPELLENCY

Registered with the EPA, Burlington[®] Lab's No Fly Zone[™] insect repellent technology works as a contact repellent. As a contact repellent, NFZ affects the insect's nervous system causing "hot foot", making the insect fly away before it may bite. This technology may help to prevent the spread of insect borne diseases by repelling insects away from the body through apparel or gear.

Effective Against

**MOSQUITOS
TICKS
ANTS**

**CHIGGERS
FLIES
MIGDES**

WHY NO FLY ZONE[™]?

- Permethrin is recommended by the CDC and WHO as a defense against insects
- Featured on the WHO's list of essential medicines
- Also used to treat US military uniforms and mosquito nets to improve their efficacy

NO FLY ZONE[™] is EPA registered.

Proven to repel mosquitos, ants, ticks, chiggers, flies, and midges. Unique patented process and proprietary binding system of the repellent on the fabric.
