# VILLAGE OF DOWNERS GROVE Report for the Village Council Meeting 7/12/2016

SUBJECT:	SUBMITTED BY:
Resolution to Execute a Letter of Intent to Participate in the DuPage Justice Information System	Kurt Bluder Chief

## **S**YNOPSIS

A Resolution has been prepared authorizing execution of a Letter of Intent to participate in the County-wide Computer Aided Dispatch and Records Management System (CAD/RMS) known as DuJIS (DuPage County Justice Information System).

Participation in the DuJIS project will:

- Reduce average annual costs by about \$65,000; and
- Improve service levels by reducing redundant data entry and allowing all participating entities to share information

## STRATEGIC PLAN ALIGNMENT

The goals for 2015-17 include *Exception Municipal Services*. *Identify & Execute a Major Consolidation* is a Top Priority Action Item.

## **FISCAL IMPACT**

Participation in DuJIS will reduce the average annual cost of the CAD/RMS over the next five years from approximately \$185,000 to about \$120,000.

## **UPDATE & RECOMMENDATION**

This item was discussed at the July 5, 2016 Village Council meeting. Staff recommends approval on the July 12, 2016 Active Agenda.

## BACKGROUND

The Village currently owns and operates its own CAD/RMS. This system of hardware and software assists in providing emergency call information to first responders, completing emergency incident reports and managing archived information and reports.

The Village system is past its useful life and is scheduled for replacement as soon as possible. The system is not fully integrated in that it requires the entry of the same data at multiple points. Further, the Village system is not able to communicate with DuPage County or other police and fire departments. The average annual cost of maintaining the current Village CAD/RMS over the next five years, including replacement, is about \$185,000.

DuPage County and DuPage County Emergency Telephone Safety Board (ETSB) are working together to purchase and implement a County-wide integrated CAD/RMS known as DuJIS. The ETSB will own, operate and maintain the system. Further, the ETSB will pay for all costs of the first two components of the system (CAD and In-Vehicle Mobile Data & Mapping). Each participating entity will be required to reimburse the ETSB for its pro-rata share of the costs of the Field Reporting and RMS components of the system. The average annual cost to the Village of participating in the DuJIS system is estimated to be about \$120,000. The actual cost will be determined later this year. The cost includes all hardware, software, system maintenance and support and contributions to an equipment replacement fund.

CAD/RMS consists of four components:

*Computer Aided Dispatch* - When a dispatcher receives a 9-1-1 call, the name, address, and nature of the call is entered into the CAD system. The information is transmitted from CAD directly to the first responders' in-vehicle computers.

*In-Vehicle Mobile Data & Mapping* - First responders receive information about the call on their in-vehicle computers, including maps of the response area. Responding staff members use this system to send and receive information to each other and the dispatch center. This system is also used to access federal and State law enforcement databases.

*Field Reporting* - This system allows police officers to complete incident reports in their vehicles. Completed reports are automatically sent to the Records Management System.

*Records Management System* - This system stores all Police and Fire Departments reports and the information entered into the CAD system. It is used to retrieve historical data, respond to resident requests for information and conduct analyses.

Benefits of the new system include:

**Improved Service Level** - The DuJIS will be fully integrated, eliminating the need to enter the same data at multiple points. Further, the system will allow all participating police and fire departments to share information.

**Reduced Costs** - The average annual cost of participating in DuJIS over the next five years is about \$120,000, approximately \$65,000 per year less than maintaining the Village-owned system.

Participation requires the following:

**Resolution Approving a Letter of Intent** - The County and ETSB are requiring each participating entity to submit a Council-approved Letter of Intent to participate. The Letters of Intent are required to be submitted as soon as possible. The County and ETSB will use the Letters of Intent to finalize the contract with the CAD/RMS vendor, including final pricing. The County and ETSB anticipate finalizing the contract in August, 2016.

**Executing an Intergovernmental Agreement with the County -** Upon the County's execution of the contract with the CAD/RMS vendor, the County will require each participating entity to execute

an IGA which will include the final terms and conditions of using the system. The County anticipates that the IGA's will be ready for execution in the fall of 2016.

The DuJIS implementation schedule calls for design and installation from September 2016 through September 2018 with implementation from October 2018 through the end of 2019.

Because the Village will be receiving dispatching services from DU-COMM beginning in summer 2017, the Village will experience a two-step transition process. DU-COMM uses a different CAD and In-Vehicle Mobile Data & Mapping system than the Village. From the time DU-COMM begins providing services until the implementation of the DuJIS system, the Village will use its Field Reporting and Records Management System in conjunction with DU-COMM's system.

### **RESOLUTION NO.**

#### A RESOLUTION AUTHORIZING THE EXECUTION OF A LETTER OF INTENT TO PARTICIPATE IN THE DU PAGE COUNTY JUSTICE INFORMATION SYSTEM (DUJIS)

BE IT RESOLVED by the Village Council of the Village of Downers Grove, DuPage County, Illinois, as follows:

WHEREAS, the County of DuPage, Illinois in collaboration with its Emergency Telephone System Board (ETSB), is prepared to implement an integrated justice system known as DuJIS which will allow participating police and fire departments to exchange information with and between County's court and correctional entities; and

WHEREAS, the County intends DuJIS will replace the ETSB's existing Computer Aided Dispatch (CAD) system; and

WHEREAS, the County intends DuJIS will replace the existing incident Report Management system (LE RMS) used throughout the County; and

WHEREAS, the Village Council of the Village of Downers Grove has reviewed materials prepared by the ETSB which detail DuJIS's estimated costs, organization, and functionality, and such documents are incorporated in this resolution as if fully set forth herein; and

WHEREAS, the Village Council of the Village of Downers Grove desires to participate in the DuJIS System;

NOW THEREFORE BE IT RESOLVED THAT the Mayor, Martin Tully, shall be and hereby is directed to execute the attached Letter of Intent directed to the State's Attorney and the Chairman of the ETSB; and further

<u>SECTION 1</u>. That the Village Clerk shall transmit copies of this Resolution to the State's Attorney and the Chairman of the ETSB forthwith; and further

<u>SECTION 2</u>. That the Mayor is authorized to withdraw the Letter of Intent if the ETSB determines that the estimated cost to the Village of Downers Grove will increase by more than ten percent (10%) beyond the projection supplied by the ETSB.

<u>SECTION 3</u>. That all resolutions or parts of resolutions in conflict with the provisions of this Resolution are hereby repealed.

<u>SECTION 4</u>. That this Resolution shall be in full force and effect from and after its passage as provided by law.

Mayor

Passed: Attest:

Village Clerk

# Office of the Mayor Martin T. Tully

July 12, 2016

Hon. Robert B. Berlin DuPage County State's Attorney 503 N. County Farm Rd. Wheaton, Illinois 60187 Hon. Gary Grasso, Chairman Emergency Telephone System Board (ETSB) 421 County Farm Rd. Wheaton, Illinois 60187

Dear State's Attorney Berlin and Chairman Grasso:

This letter is to confirm the intention of the Village Council of the Village of Downers Grove to participate in the DuPage County Justice Information System (DuJIS). I am advising you that the Village Council authorized me to execute this letter on its behalf in accordance with the resolution which I have attached. The Village Council makes this representation after its review of the following documents provided by the ETSB on June 2, 2016 and which were incorporated in the resolution:

- Letter of Intent
- Organizational Structure
- Financial Overview (to date)
- Agency Estimated Costs (to date)
- Report Management System (LE RMS) Staffing Overview
- Additional Costs Summary
- GIS Work Flow and Addressing Ordinance

The Village Council understands and acknowledges that the ETSB will rely on this commitment in determining the final cost for the projections of the DuJIS Project and in determining whether to proceed with contract award. The Village Council understands and expects that the ETSB will notify it prior to contract award if the estimated cost to the Village of Downers Grove increases by more than ten percent (10%).

Sincerely,

Martin T. Tully Mayor

VILLAGE OF DOWNERS GROVE

Enclosure

801 Burlington Ave<sub>7</sub> Downers Grove, Illinois 60515 E-mail: mtully@downers.us

TO: DuPage Justice Information System Participants (DuJIS)

FROM: States Attorney Robert Berlin and Gary Grasso DuJIS Chairman DuPage ETSB Chairman

DATE: May 27, 2016

SUBJECT: DuPage Justice Information System Letter of Intent and Next Steps

Thank you for your interest in participating in the DuPage Integrated Justice Information System (DuJIS) project. The purpose of this memorandum is to provide an overview of the next steps and to seek participation from DuPage municipal and fire protection district agencies, in the form of a Letter of Intent, in order to finalize the contract with Integraph, the vendor to which the Emergency Telephone System Board (ETSB) is preparing to award the contract for this project.

In order for the ETSB to properly price the contract, it requests that you present the enclosed "Letter of Intent" to your governing board for its approval. Please include the actual handouts as shown in the sample as part of your resolution. We have enclosed included a five-year cost projection to assist you in your decision.

The Law Enforcement Report Management System (LE RMS) cost projection includes the portion of the capital investment your agency will be responsible for as well as for its share of the ongoing maintenance, staffing (four IT professionals for LE RMS), and equipment replacement costs based on the number of users your agency would have in the system today. We have calculated this based on a cost-per-user basis. We have included an equipment replacement contribution so that the LE RMS system can be self-sustaining and allow for available funding for the upgrade or replacement of law enforcement report writing software in the future. DuPage ETSB NetRMS participants may already be familiar with equipment replacement cost preparation from your cost sharing experiences with that system. While this is not a new approach for the ETSB, it was not part of the cost projections that the manager for the initial stages of the project, Mr. David Usery, shared with you last Fall. Because we believe it is important to set aside funds for the eventual upgrade or replacement of the system in the years ahead, we have revised those projections to account for equipment replacement.

The DuJIS project is a very complex project with many interfaces to various technologies. To that end, the ETSB will only permit cost-sharing for common expenses. If an agency requires additional interfaces with the RMS or CAD to their unique software applications, it will need to obtain them through Intergraph the cost of which will be the responsibility of the impacted agency as included in the contract. Neither the ETSB nor the County will be responsible for the costs of interfaces to agency-specific software. Agency specific interfaces will be configured after the core systems are deployed, approximately 24 months from date of contract. Itemized cost projections per agency are included with this document. This information will allow participants with agency specific interfaces the opportunity to decide whether or not to move to one of the core shared applications versus paying for a specific interface.

We have made every effort to determine the five-year cost for this system including an equipment replacement contribution.

We ask that you present the Letter of Intent as is to your agency's corporate authorities, and upon its approval, execute the letter on your letterhead and return it to <u>DuPage ETSB at 421 County Farm</u> <u>Road</u>, <u>Wheaton</u>, <u>IL 60187 by</u> **June 25**, **2016**</u>. If some agencies elect not to participate and that reduction changes the costs to any agency by more than ten percent (10%), we will notify each agency that has executed the letter of intent of this change in costs and to allow it the opportunity to reassess its intention to participate.

The ETSB presently anticipates letting the contract before the end of the second quarter, 2016. The next ETSB Committee of the Whole Meeting is Wednesday, June 1 at 8:30am in the County Board Room at 421 County Farm Road, Wheaton. This is a two hour time block the ETSB intends to convene this additional Committee of the Whole for the exclusive purpose of reviewing the details of the contract before its final approval before the end of June. The ETSB will provide notice for those interested in attending.

Following the approval of the contract, the ETSB will request the County Board enter into intergovernmental agreements (IGAs) on the ETSB's behalf with each of the various Public Safety Answering Points (PSAPs) whose members will participate in DuJIS. The IGAs will outline the organization of the system and the respective duties of the ETSB and each PSAP. The IGAs will require each PSAP pass its obligations through to its participating member agencies. Each PSAP will be responsible for collecting an annual per capita assessment for DuJIS from its member agencies and for paying those assessments to the County and to the ETSB.

We are providing the following attachments to assist Agencies in making their decision regarding participation in the DuJIS Project:

- Letter of Intent and Resolution language with requested return attachments
- Steering Committee Structure
- DuPage Customer Pricing Overview (to date)
- Agency Cost Projections Summary (to date)
- Law Enforcement Report Management System (LE RMS) Staffing Overview
- Additional Costs Summary
- GIS Work Flow

### Letter of Intent:

As we explained previously, the ETSB has requested that each prospective DuJIS participant present a letter of intent to its corporate authorities. The ETSB will use each agency's commitment to determine the total number of participants in the system as well as final pricing. After your agency has completed its due diligence and approved the letter of intent's execution, please return it to DuJIS Project, c/o DuPage ETSB 421 County Farm Road, Wheaton, IL 60187. If the number of participants changes the cost per agency by an increase of more than ten percent (10%), agencies that have indicated participation will be notified. Once a sufficient number of agencies approve the Letter of Intent, the State's Attorney, in collaboration with the attorneys for each of the participating PSAPs, will develop a standardized IGA to implement the system. As noted previously, we anticipate the PSAPs will serve as "contractual conduit" to help facilitate project implementation and to help manage the flow of responsibilities between the agencies, the ETSB, and the County in much the same way they did during the implementation and eventual operation of the radio project.

We ask that you present the resolution authorizing the execution of the letter of Intent to your board or council at your earliest opportunity and include the backup materials we are providing as attachments to the resolution.

### **Organizational Structure:**

Upon project commencement, the County will retain a Report Management System (RMS) Manager though it's Human Resources Department for LE RMS. While the County's Director of Information Technology and the ETSB's Executive Director will jointly make the final selection, a small panel representing various LE RMS user groups will participate in the selection process and screen the applicants.

Though initially an ETSB position, the RMS Manager will transition to the County's IT Department beginning with FY2017 when the project is under contract and intergovernmental agreements have been executed with participants. These instruments will obligate the funds necessary for the County to proceed with increasing its headcount for this project and completing the staffing transfer.

The ETSB will formalize the existing staff work groups which have provided valuable guidance in the vendor selection process into standing ETSB committees and subcommittees. Once established, these bodies will proceed through the existing Policy Advisory Committee (PAC), which the ETSB will restructure to allow for this expanded role. These work groups will also identify, draft and recommend policy to the ETS Board through the PAC for DuJIS for, but not limited to, standardization of data bases and mapping/addressing.

Representatives of the County of DuPage, the State's Attorney, the Sheriff, the Clerk of the Circuit Court, the DuPage Mayors and Managers Conference, the DuPage County Chiefs of Police, the DuPage County Fire Chiefs Association, the ETSB, and the City of Naperville have and will continue to collaborate on a consensus-based model to facilitate project implementation. While the ultimate authority for project management will be coordinated by the County's IT Department (LE RMS) and the ETSB (CAD), the members of this collaborative will ensure that the entities or elected officials they represent are fully informed about project goals, development, and the implementation timeline. In this way, as opposed to the creation of a formalized and rigid governance structure, each entity or elected official retains their autonomy and must independently exercise their respective functions related to project implementation. As of the Spring of 2016, State's Attorney Berlin serves as the coordinator of this loose collaborative, sometimes referred to as "governance" or a "steering committee."

### Financial Overview:

We have provided the Intergraph financial cost sheet for your review. This document contains the costs to date for the system and four years of maintenance. The estimated total cost for the Intergraph contract is approximately \$12M. The coding on this sheet represents CAD (ETSB cost), RMS (Agency cost) and COM (cost attributed to both CAD and RMS which are split between these two systems). These codes were utilized to determine the agency share for reimbursement.

The ETSB will advance the initial financing for the entire project. The Agency Estimated Costs which are shown to the right of the pricing information on the spreadsheet, show the reimbursement required by Agencies to ETSB. When you met with Mr. David Usery, he provided you with cost estimates for LE RMS based upon common interfaces. These projections did not include costs for interfaces necessary to allow RMS to communicate with any additional systems your agency may have elected to utilize (such as Lexis/Nexis, Livescan, Beast, etc.), maintenance over the life of the contract, personnel or equipment replacement. For this reason, the numbers you are seeing now are somewhat larger than those you reviewed in the Fall.

## Agency Estimated Costs:

This attachment details the estimated costs each agency can expect to pay for system access. It is similar in format to the current NetRMS annual billing where the RMS costs are determined per user. Please be aware that the new system will assign each user a *unique* sign on and will not support collective access to the system for a records or investigations department. For this reason, it is critical that you verify the number of users your agency will have on the system.

When you met with Mr. Usery in the Fall, he provided you with cost estimates for LE RMS acquisition based entirely on the costs of project acquisition. As was the case with hardware replacement, subsequent discussions led to the recognition that existing County and ETSB staff could not satisfy the staffing requirements Intergraph proposed were necessary to properly and effectively maintain a modern LE RMS. After a thorough review of the proposed requirements, technical experts from the County's IT Department, the ETSB, user groups, and Intergraph reached a consensus recommendation that requires the County to increase its existing staff by four (4) full time equivalent positions ("FTEs"). Based on the County's Human Resources' current salary matrix for the relevant job descriptions, the staff increase will represent an annual estimated cost of \$425,000, including employee benefits.

As is the case with the RMS Manager, all initial staff will be hired through the ETSB's existing budget and under its headcount allocation. At the start of FY18 (December 1, 2018 for DuPage County), staff positions dedicated to RMS administration will transition from the ETSB to County IT.

This form also includes costs for participants that have agency specific interfaces. There is an overall cost sheet and subsequent worksheets which provide greater detail as to how these costs were calculated. It should be noted that the results are based on information provided by participants. You should check your agency specific categories with internal staff to ensure it is correct.

#### **RMS Staffing Overview:**

This worksheet will provide additional detail for the staffing positions based on Intergraph recommendations and DuPage County Human Resources' job descriptions and salary matrix.

#### Additional Costs Summary:

We have attempted to account for any additional costs that may be incurred by participants. To date, these include CPU/Mobile hardware that does not meet the specifications required for this system, replacement of the SONET network to a new network to support 911 systems, wireless technology for mobile terminals and fire station alerting. The attachment provided will contain more detailed information.

### **GIS Work Flow and Addressing Ordinance:**

Mapping is a critical function of the new CAD system which will require standardization. Participants are encouraged to have an addressing ordinance to facilitate standardization. There is also a flow chart to outline the process for address changes.

Notes:
 1. An overall system discount has been provided for this opportunity. This discount is applicable only to Intergraph Products and Services, Third-Party content is not discounted. Changes to scope of the final contract may change the discount amount. Also, any credit given for line items as part of a Change Order will include a reduction for the line prorated amount of the one-time system discount. Items removed after contract signing will result in a contract credit for future Intergraph software and services being established, not a contract reduction. This discount is based on the acceptance of Intergraph's standard Terms and Conditions.
 2. Unless otherwise noted, project management services, implementation services and software maintenance ARE NOT included in option pricing. Intergraph services are valid for 6 months and Intergraph provide. There contract signing. Pricing for optional third party products and services are valid for 4 months and Intergraph provide. There, and the context signing. Pricing for optional third party products and services are valid for 4 months and Intergraph provide. There, and the context signing. Pricing for optional third party products and services are valid for 40 days from the date on this pricing proposal. Intergraph can provide a fixed quote when optional items are selected.
 3. Standard and Custom Interfaces - Test, Training, Redundant and Backup Copies of proposed interfaces are available for all Interface Server, however, implementation is subject to the customer's ability to provide connection to the applicable system.
 4. Intergraph has based its WebRMS license offering upon the following assumptions: The number of users indicated as requiring RMS access (2,000) is the total number of users. The County would have no more than 1/3 of its total number of users indicated to reflect actual usage at time of contract negotiation.
 5. Salee tax is not included in this quote. Final sales tax bi

5. Sales tax is not included in this quote. Final sales tax billed will reflect the applicable tax rates at time of sale as required by law.
6. EdgeFrontier Developer License can be installed on up to two separate servers for use in the development of CAD and RMS Interfaces. The Developer instance of the license is usually installed on the Test Interface Server.

# DuPage Digital Justice Information System RMS Staffing Overview

This document describes the recommended staffing for RMS based on Intergraph recommendations and DuPage County Human Resource job descriptions and salary matrix.

It is anticipated that these positions will be hired near the mid-range of the matrix. This could be adjusted up if the candidate has substantial experience in the Intergraph product.

	Salary	Salary Range					
Position	Grade	Low	Mid	High			
RMS Manager	315	\$71,821	\$95,760	\$119,700			
Data Base Administrator	314	\$62,305	\$83,075	\$103,843			
Report Writing Specialists (2)	312	\$48,137	\$64,184	\$80,228			

The dollars included in the Agency Estimated Costs is:

	Salary		Salary Range	ge			
Position	Grade	Salary	Benefit (40%)	Total			
RMS Manager	315	\$100,000	\$40,000	\$140,000			
Data Base Administrator	314	\$80,000	\$32,000	\$112,000			
Report Writing Specialists (2)	312	\$60,000	\$24,000	\$84,000			

The salary calculations included in the Agency Cost Estimate include forty percent (40%) for benefits. In addition a two percent (2%) COLA has been added to each year of the program. Although not guaranteed, this COLA is consistent with DuPage County past practice and is only included to allow you budget appropriately.

It is important to remember that these are estimates based on known practices and information. It is possible that these costs could be lower.

#### RMS Manager:

The employee in this class is responsible for implementing, planning, managing and directing the DuPage County Justice Information System Law Enforcement Records Management System ("Records Management System") Employee manages the appropriate relationships, budget, projects and staffs within the department. Work requires the ability to exercise a high degree of technical expertise and competency in order to effectively research, recommends and implement a records management system that successfully meets the needs of all Elected Officials, Municipal Governments, County Departments, and Quasi-Governmental Organizations. Administrative direction is received from the Chief Information Officer. Management direction is provided to subordinate manager/supervisors.

As project manager for this system, this position will be responsible for overseeing all on-site project related activities and for assisting the Intergraph Project Manager in developing and managing implementation schedules and coordinating activities and personnel.

#### Data Base Manager:

The use of the system administration tools within the applications is included in training. However, this position should be filled by resources fully trained in database management and system maintenance. This position reports to the RMS Manager.

### Report Writing Specialists:

Ability and background to create custom reports based on defined content provided by administrative and supervisory personnel. Report Writing Specialists should be familiar with the database structure. Knowledge of SQL would be a definite advantage. This position reports to the RMS Manager.

# DuPage Digital Justice Information System Additional Cost Worksheet

As stated in the cover letter, DuPage ETSB will be providing the CAD system including the mobile software/interface and the initial funding (with a reimbursement schedule) for RMS and interfaces ("Friends of CAD") not specific to the delivery of 911 services. The following additional costs have also been identified:

## CPU/Mobile Hardware:

In order to operate properly with the new CAD system. Hardware that does not meet the specifications below will not be allowed on the system. Hardware should have the following specifications:

Mobile Computers: Windows 7 Pro, 64 bit I3 or greater processor 4GB RAM 80 GB HD 1,024x768 resolution Centronics port for printing (if appropriate) Network connection (if to be docked on the network) Touch Screen Preferred. <u>WebRMS Workstations (desk tops) or CPUs:</u> Windows 7 Pro, 64 bit

DuPage ETSB will do an RFP for hardware to facilitate a purchasing contract for equipment. Each agency will be responsible to fund any replacement hardware for mobile or desk top computers. The goal would be to receive all of the equipment so that tech personnel can load and configure the hardware properly prior to deployment/implementation. The letter of intent will have a handout that asks for the number of devices you would be replacing in order to provide a range for the RFP. This RFP will be let as soon as data is collected.

## Network:

The Technology Team for this project is working on a RFP to replace the SONET. CAD and Friends of CAD as well as Customer Premise Equipment (CPE-the 911 call handling devices) will run on this network. DuPage ETSB will pay for the connections between the PSAPs (with the exception of Naperville). Connectivity in the network for RMS and any other interfaced systems will be the responsibility of user agency. The RFP was let and returned May 31, 2016. The RFP will ask for several connectivity options. User agencies will have the opportunity to select their preferred network connection. This information is provided to user participants to assist with overall costs. It is an option and participant users may do their own connection but it will have to be approved by ETSB before it can connect into the system or a PSAP. This approval is only to ensure network system capacity and stability.

## Wireless Network for Mobile Terminals:

DuPage ETSB will continue to fund the cost of the wireless interface. This RFP will be for air cards (or wireless activation assuming mobiles have internal wireless capability). While user agencies may currently have their own contracts for this service, the hope is that a county-wide contract may reduce the cost to the user agencies.

## Fire Station Alerting:

DuPage ETSB is working with the Fire work group and will let an RFP to determine the feasibility of an updated, interoperable fire station alerting system.

# DuPage Digital Justice Information System Address Point File Workflow Description

The new CAD system will be X/Y coordinate driven. For this reason the GIS map will be a critical piece of the core data base. This document will describe the workflow steps for updating the countywide address point file that will be used by E911 and other taxing organizations within DuPage County.

#### Municipal and County Input:

To create the new GIS map, agency participants that have address point data in either ESRI Geodatabase or ESRI shapefile should submit these files via <u>etsb911@ducomm.org</u>. This would also be the time to update any boundaries, police beats/zones, fire beats/zones. If you do not have this data, please submit a Trakit ticket, indicating this so that the GIS team can work with you to ensure your information is ready for the new system.

Once the system is implemented, each agency participant will be submitting their address point file updates through a web based GIS application. The users will be able to add their address updates through a map interface. Update and edit tools will be provided within the application. A workflow map is provided.

#### Address Update & Approval to E911:

Once the updated address points are complete an email and or other form of notification will be sent to ETSB GIS staff. At this step, the tentative point address will be reviewed and cross referenced by the MSAG data. If the address does not meet the standard needed for E911, the ETSB GIS staff will work with the respective municipality to correct and workout any issues that have arisen in the data review.

If the address does not meet the business rules established by the Tech Committee based on software capability, a respective municipal entity or the County may be asked to make a requested correction due to a discrepancy in the addressing. It is important that participants work with the GIS Team prior to annexations to avoid unnecessary delays in the annexation process or 911 mapping entry for an address within our service area.

When an address or corrected address is complete, another review will take place by ETSB GIS staff. Once the address is reviewed, approved and posted, this address point data will be uploaded to the Intergraph CAD system and also be available to others for their various address mapping needs.

#### Various Types of Data:

There is a county-wide address point file. We have completed all the unincorporated areas within DuPage County and we are currently obtaining address point data from all of the County's incorporated municipal governments. To date, 16 out of the 32 municipal entities address data here in DuPage County and are currently appending them to the county wide address point file. Once we have the county address point file appended and completed with all of the address data, we will be able to share this data back to those entities that did not have a GIS format.

#### Recommendation:

One of the greatest challenges to any GIS map and CAD software is the alpha numeric address (i.e. 21W241). Going forward we would recommend that participants adopt ordinances to eliminate this type of addressing.
