EFAS Medical Mission Statement

Supplying quality health care products so you can better respond to those in need.

Together we can tailor all your medical emergency supply needs to ensure timely delivery of the right products at a discerning price with the confidence only a dependable supply chain can provide. Increased consumer demand for your services and procedures means more patients and new business challenges. We understand the pressure to do more with slimmer margins, which means you must be as efficient as possible to remain profitable.

Our expert staff appreciate the challenges a practice can face. We will work together to increase efficiencies and cost savings on-site so you can continue to be profitable.

Patients demand greater convenience, speedier service, and effective treatment, so taking appropriate action to develop solutions that help keep your practice in top form.

EFAS Medical
Bringing Health to Life.

Introducing the Welch Allyn Green Series 777 Integrated Wall Systems

Allows for reliable diagnostic patient data in a standardized and energy efficient solution to improve your bottom line.
Improve Financial Outcomes: Help reduce facility cost with a more energy efficient product than the 767 Wall Transformer.
Minimize Risk: To help reduce the risk of cross contamination we removed the on/off switch, reducing touch-points.
Improve Office Workflow: Provides customer-requested efficiencies in layout to improve productivity.

Hillrom™ WELCH ALLYN® CONNEX® INTEGRATED WALL SYSTEM

The Connex® Integrated Wall System combines the advanced spot check and monitoring capabilities of the Welch Allyn Connex® Vital Signs Monitor with the Welch Allyn Integrated Diagnostic System, which includes an otoscope and ophthalmoscope—allowing clinicians to take and electronically capture accurate patient vital signs as well as perform basic diagnostic exams. By combining vital-signs and physical assessment tools in one place, it allows clinicians to immediately view all necessary patient data, speeding patient flow and eliminating frustrating searches for equipment. This easy-to-use system features a large, intuitive, colour touchscreen that can help with patient communications.

And, since the system is compact, wall mounted, and comes with a cord management system, you save valuable floor space and reduce those tangled, hanging cords. For connected facilities, patient vitals can be electronically sent directly to your EMR/EHR system, reducing manual transcription errors and giving clinicians immediate access to accurate data-enhancing clinical decision-making and improving patient safety.

DIAGNOSTICS

Features

- SureBP-15-second NIBP and pulse rate
- Adult, pediatric and neonatal NIBP modes
- Spot check, monitoring and triage modes included
- SureTemp® Plus and/or Braun ThermoScan® PRO 4000 ear thermometry (optional-choose one or both)
- Masimo® or Nellcor® pulse oximetry
- Programmable visual and audible alarms for BP, SpO2, temp and pulse
- PartnerConnect™ service software-ready for software-driven repairs and upgrades
- Barcode scanning (optional)
- Masimo® noninvasive continuous monitoring of total hemoglobin (optional)
- Interface to select digital weight scales (optional)
- Manual measurements entry (weight, height, respiration rate, pain) and documentation of modifiers, like body position and O2 therapy
- Large colour touchscreen display simplifies training and operation
- Descriptive error messages for easy troubleshooting
- Fully customizable USB configuration cloning
- Integrated 3.5 V handles for physical assessment instruments
- Integrated ear speculum dispenser

Sample Configurations:

Without Wireless With Wireless

163-84NTVXC-B 163-85NTVXC-B BP, SpO2 (Nellcor), Temp (SureTemp Plus), MacroView Otoscope and Coaxial Ophth

A configurable design allows you to customize the monitor to the needs of your practice and your patients.

Every Connex Spot Monitor features an easy-to-use touchscreen display and reliable SureBP technology. You can also select from a number of options to get exactly the monitor you need, including:

Pulse Oximetry

- Masimo® SET® SpO₂
- Nonin® PureSAT® SpO₂
- Nellcor® OxiMax® SpO₂

Thermometry

- SureTemp® Plus Thermometry
- Braun ThermoScan® PRO 6000 Ear Thermometry

See page 4 for mounting and mobility options, sold separately.

Connectivity for Ambulatory Care

- Import vitals data to leading EMR providers—including Allscripts®, athenahealth®, Cerner®, eClinicalWorks®, Epic®, GE® Centricity™, Greenway® (Intergy®), NextGen® and many others—to ensure reliable device connectivity and to help you leverage your EMR investment.
- Connect your Connex Spot Monitor to scales from Detecto®, Health o meter® and SECA to accurately document height, weight and BMI.

Step 1. Configure your device.

Available Configurations of Connex Spot Monitor

Step 2. Choose your mounting option.*

Model	Part Number
Accessory Power Management Stand	163-7000-APM
Classic Basket Stand	163-7000-MS3
GCX Wall Mount	163-7000-GCX
Power Supply (REQUIRED IF NOT SELECTING ONE OF THE ABOVE MOUNTING OPTIONS)	163-7000-PS

*The power supply for your Connex Spot Monitor will ship with the mount. If you are not selecting one of the above Welch Allyn mounting options, a separate power supply (P/N 7000-PS) must be ordered.

Hillrom™ WELCH ALLYN® CONNEX® SPOT MONITOR WITH WIFI CONNECTIVITY

Accurate, automatic vitals sent to your EMR from the point of care for improved patient safety and clinical decisions.

- Reduce transcription errors and omissions by automatically transferring patient vital signs and other data directly into your EMR
- Easy-to-use configurable touchscreen display
- Organization of accessories to help prevent tangling and sensor damage
- Compatible with a wide range of EMR wireless networks
- Masimo Oximetry & Braun 6000 tympanic ear thermometer

163-7000-APM
Stand Shown

HILLROM/WELCH ALLYN HAS A BROAD RANGE OF EASY-TO-USE CONNECTED DEVICE SOLUTIONS THAT CAN IMPROVE YOUR OFFICE WORKFLOW BY QUICKLY, ACCURATELY AND ELECTRONICALLY CAPTURING, SAVING AND STORING PATIENT DIAGNOSTIC INFORMATION TO YOUR ELECTRONIC HEALTH RECORD (EHR) SYSTEM.

Hillrom™ WELCH ALLYN® CONNEX® SPOT MONITOR WITH WIRED CONNECTIVITY

Accurate readings across your patient population. The easy-to-use, vivid touchscreen display is perfect for the care giver.

- Help ensure accurate hypertension diagnosis without slowing down your work flow with unique SureBP® technology and blood pressure averaging.
- Research shows that more than half of patients could be misdiagnosed in a hypertensive category using the single-reading method.
- Provide SpO2 accuracy in challenging conditions including motion, thick fingers, dark skin tone and low perfusion with Masimo® SET® and Nonin® PureSAT® pulse oximetry technology.

163-7000-MS3
Stand Shown

Hillrom™ WELCH ALLYN® ABPM7100 BP MONITOR FOR HYPERTENSION

The Welch Allyn ABPM 7100 is an easy-to-use 24-hour ambulatory blood pressure monitor that is designed to help avoid the effects of white coat hypertension, provide accurate sleep blood pressure readings, and tailor drug therapy regimes to your individual patient's needs.

Features

- Meets or exceeds the latest AAMI, EHS Standards and has a BHS A/A Rating
- Unlimited protocols for programming measurement periods & inflation frequencies
- Lightweight, compact and quiet for improved patient compliance
- Uses oscillometric technology, a validated method of automatic NIBP measurement
- Upgradable to add Central BP and Pulse Wave Analysis
- Auto Feedback Logic during inflation for excellent patient comfort & acceptance
- Latex-free cuffs help reduce the risk of patient allergic reactions
- Includes Welch Allyn CardioPerfect® WorkStation software

163-ABPM-7100 No Software	Each
163-ABPM-71005 With Software	Each

Hillrom™ WELCH ALLYN® PROBP™ 2400 DIGITAL BLOOD PRESSURE DEVICE

The Welch Allyn ProBP 2400 is not a typical electronic blood pressure device. It is an affordable, professional device that you can trust to accurately measure your patients' blood pressures despite many common underlying circumstances.

White Coat Hypertension:

ProBP 2400 features a 3-Reading Average Mode to help confirm or refute an unexpectedly high reading.

Abnormal Readings:

Manual Reading Mode allows ProBP 2400 to serve as a digital gauge to facilitate traditional auscultatory measurement whenever an oscillometric reading is not indicated for a patient.

Irregular Heartbeats:

Irregular heartbeat detection provides data to help clinicians make decisions regarding additional testing that may be required.

163-2400 ProBP 2400 BP Unit with Adult & Large Adult Cuffs . . .	Each
163-2400-WMB Wall Bracket for 2400 w/ 24" Cuff Ext. Tube	Each

Hillrom™ WELCH ALLYN® 767 SERIES MANUAL BLOOD PRESSURE UNITS

Welch Allyn Tycos aneroid comes with an adult durable one-piece cuff that is latex-free for your safety. The laser-engraved, large easy-to-read face provides for accuracy. Aneroid comes with built-in cuff storage, adjustable height, and a 360 degree swivel for clear viewing.

163-7670-01 Aneroid with Adult Cuff, Wall Mount	Each
163-7670-03 Aneroid with Adult Cuff & Mobile Stand	Each

Hillrom™ WELCH ALLYN® DS66 BLOOD PRESSURE ANEROID WITH CUFF

Modern ergonomic styling and unique trigger air-release valve. Gear-free DuraShock design allows the DS66 to withstand a 30" drop and remain in calibration. Includes zipper case. Fifteen-year calibration warranty.

- Certified accurate to ±3mmHg.
- Trigger deflation valve for smooth, one-finger operation.
- Latex-Free.
- Large, easy to read dial face
- Durable one-piece cuff.

163-5098-27	DS66 B.P. Unit with Adult Cuff	Each
163-5098-30	DS66 B.P. Unit with 4 Cuffs	Each

Hillrom™ WELCH ALLYN® DS58 BLOOD PRESSURE ANEROID WITH CUFF

Maintain accurate blood pressure readings with lower lifetime cost with gear-free DuraShock™ technology. Part of our Platinum Series, this premium gauge provides unsurpassed reliability in a traditional handheld design.

- Super shock-resistant—can withstand up to 60" drop
- Jewel movement for long life
- Laser-engraved dial face for accuracy
- Premium inflation system for comfort
- Ergonomic inflation bulb enhances user comfort
- Lifetime calibration warranty
- Lighter weight than traditional models—won't weigh down your lab coat

163-DS58-11	With Adult Cuff and Zippered Case	Each

163-5086-06	Bulb for DS58 Units	Each

Hillrom™ WELCH ALLYN® FLEXIPORT™ REUSABLE ONE-PIECE CUFFS

Longlasting, easy to use, and affordable, Welch Allyn cuffs are the top choice for hospitals and clinics around the world. Why? Because Welch Allyn can offer you virtually every type, size, and configuration of cuffs, along with the ability to simplify inventory and reduce confusion with our innovative FlexiPort connection, which makes every cuff a one- or two-tube cuff.

- Primary sizes are colour-coded to make it easy to find the proper cuff size
- Easy one-hand attachment/detachment of tubing with FlexiPort makes changing cuffs much faster and easier
- Latex-free material minimizes risk of allergic reactions
- Rotatable port reduces stress to cuff tubing and port, improving patient comfort and cuff durability
- Folded edge reduces risk of cuts and scrapes, maximizing patient comfort
- Meets all latest clinical guidelines for proper fit from AAMI and AHA

163-REUSE-MLT

1 Position

Position the Artery Index Marker over the Patient's Brachial Artery and wrap the cuff around the patient's arm.

2 Check

Ensure the Artery Index Marker falls within the range markings on the cuff.

3 Attach

Snap the FlexiPort fitting, from the device directly into the cuff.

4 Rotate

Rotate the device tubing to a comfortable position for both patient and practitioner.

5 Detach

Squeeze the FlexiPort fitting and pull away to detach from the cuff.

IM3 VITAL SIGNS MONITOR

Combining a stunning ultra-slim design, a large capacitive touch screen, together with a rich set of leading functions, iM3 takes the lead and presents itself as the beginning of a new generation of vital signs monitors. Bringing in full options of SpO2, NIBP and Quick Temp/ Infrared Ear Temp and differentiated work modes, iM3 serves for both long time monitoring and spot check applications.

• Round Mode

Special work mode designed for daily ward rounding application. Worklist could be easily input through USB disk or downloaded from EMR system. Moreover, the color-coded patient list comes with square windows interface design, you can tell patients' status and information in a quick glance.

• Monitoring Mode

For continuous patient monitoring with real-time data, real-time alarms, and history trend.

• Spot Mode

For spot-check applications, such as out-patient, emergency, etc. Real-time vitals are acquired and displayed, no alarm will be seen or heard.

Hillrom™ WELCH ALLYN® SPOT™ VISION SCREENER

The Spot Vision Screener is a handheld, portable device designed to help users quickly and easily detect vision issues on patients from 6 months of age through adult. Spot screens both eyes at once from a nonthreatening 3-foot distance. The touch-screen display allows for one-touch activation, simple management of patient data entry, and easy configuration for both vision screening and autorefracton applications

Features:

- Supports AAP screening guidelines for early detection of amblyopic risk factors
- Automated screening provides thorough, objective, and easy-to-understand results
- Easy to use, easy to implement with minimal user training required
- Adequately powered for mass screening events
- Captures readings 97% of the time helping to screen otherwise difficult patients
- Wireless printing and WiFi-enabled for easy export of data
- Manual exports available via USB port
- Uses lights and sounds to help engage children

163-VS100S-B.....Each

Hillrom™ WELCH ALLYN® RETEVAL-DR™ ELECTRORETINOGRAPH

The Welch Allyn RETeval-DR Electroretinograph is designed for healthcare providers who want to improve management of their patients with diabetes. In just three minutes, you can objectively screen for vision-threatening diabetic retinopathy (VTDR) wherever patients receive care. Welch Allyn RETeval-DR Electroretinograph enables efficient, comfortable, non-mydratic screening for VTDR that improves patient compliance to help preserve vision in your patients with diabetes.

Features:

- No dilation required, enhancing patient comfort
- Short test time—only three minutes perpatient
- No interpretation and minimal training necessary
- Immediate results provided on the device and in a PDF report
- Portable, handheld device goes wherever patients with diabetes receive care

3M LITTMANN® CLASSIC III STETHOSCOPE

Right out of the box, it lives up to its name. The Classic III stethoscope is the latest version of the stethoscope that helps millions of medical professionals to auscultate effectively. It brings design, materials, and technology to the Littmann stethoscope series used by clinicians around the world. The Classic III stethoscope offers you:

High acoustic sensitivity for performing general physical assessments.

Tunable diaphragms on both the adult and pediatric sides of the chestpiece.

Single-piece diaphragm that's easy to attach and easy to clean because the surface is smooth without crevices.

Next-generation tubing with improved resistance to skin oils and alcohol for longer tubing life. Less likely to pick up stains.*

Using a Classic III stethoscope demonstrates what's important to you as a medical professional: quality and achievement.

Features:

- Tunable technology is a 3M invention that lets you shift between hearing high and low frequency sounds by simply adjusting how much you press on the chestpiece.
- Soft-sealing eartips give you a comfortable fit and an excellent acoustic seal; they snap tightly onto the eartubes for safety.
- Open bell stays clear of dirt and debris by keeping it covered with the small diaphragm.
- Adjustable headset lets you easily set the tension for head size and comfort just by squeezing or pulling apart the eartubes.
- No natural rubber latex or phthalate plasticizers are used in the tubing or any other component to help protect human health and the environment.
- Made in the USA. We apply rigorous process and quality controls to every Littmann brand stethoscope. You'll always get a durable, dependable, clinical tool that will serve you for years to come.

EDAN® SE-2003/SE-2012 HOLTER SYSTEM & SOFTWARE

EDAN holter system offers you a lightweight and compact digital recorder, as well as fast and powerful analysis software. Optimized workflow and adjustable parameters aim to meet you different clinical needs.

Holter Software:

- QRS Template classification
- Arrhythmia analysis
- ST segment analysis and myocardial ischemia evaluation
- Obstructive sleep apnea syndrome analysis
- Heart rate turbulence (HRT) analysis
- Full disclosure of 24/48/96 hours and 7 days ECG data
- Download data via SD card or USB cable
- Automatic and manual edit of patient data
- Graphics and trends display

Holter Recorder:

- Lightweight design: only 42 grams
- 3/12-channel digital recording
- Real-Time waveforms display
- Compatible with SD Card
- Pacemaker detection
- Up to 7 days recording

midmark™ IQ HOLTER™ SYSTEM WITH RECORDER

The IQholter recorder is small and lightweight, making it easy and comfortable for your patient to wear. The readable, well-lit display and intuitive keypad make clinician navigation and menu control simple. Other features include:

- Lightweight and comfortable, weighs only 2.8 oz
- On-screen leads and channel identification for speed and simplicity during patient hookup
- Automatic pacemaker detection eliminates setting changes between patients
- Automatic startup self-test with warning alarm ensures reliable recording
- 5-lead hookup for 3-channel recording, 7-lead option available
- Removable Secure Digital (SD) Card allows for immediate patient turnaround
- IQholter™ Easy-to-use Holter software with fully automated analysis and reporting process, designed for routine monitoring situations in fast-paced offices.
- IQholterEX™ Includes the standard features of IQholter with expanded functionalities for A-Fib, QT/QTc and HRV analysis, Template editing, Smart Page Scan and more.
- IQholterEP™ Includes all features of IQholterEX plus Pacemaker detection of single- and dual-chamber paced beats for non-captures and sensing failures.

The Welch Allyn Diagnostic Cardiology Suite now includes ECG and spirometry capabilities, helping you shorten the path to diagnosis for improved patient outcomes. Simplify clinical workflows, reduce manual data entry and minimize complexity with one device that can perform two reimbursable tests. Our flexible platform allows you to adapt the Diagnostic Cardiology Suite to meet your clinical needs—whether you want to perform both exam types, or prefer a standalone ECG or spirometry solution. We’re combining operational experience with clinical excellence to bring you one solution for two critical exams—because simple is smart.

Hillrom™ PC-BASED RESTING ECG

Turns any PC into a full-featured ECG. Intuitive Windows® operation makes it easy for your staff to learn and use, while the power and features of a PC-based system save money and increase utilization of existing equipment.

- Large screen display saves time and eliminates repeat ECGs
- ECG measurements speed physician review and interpretation
- Programmable report formats that print on plain paper using inkjet or laser printer
- On-screen ECG report editor lets you change or add a diagnosis
- Serial comparison lets you compare previous ECGs to highlight changes
- Upgradeable—leverage your investment by adding stress, spirometry and/or ABPM modules to complete your cardiopulmonary suite

Laptop not included.

AED PLUS[®] FULLY AUTOMATIC

When the Fully Automatic AED Plus detects a shockable heart rhythm, it delivers the shock on its own, with no rescuer interaction required. No one needs to push a button. Once the heart analysis begins and the Fully Automatic AED Plus prompts, "DON'T TOUCH PATIENT," if a shock is needed, it will be delivered automatically after a brief verbal countdown. Research shows that safety is not compromised when rescuers use a fully automatic rather than a semiautomatic AED.

RITTER® 204 EXAMINATION TABLE

We asked the experts

What makes Ritter the most purchased brand of exam tables in the industry? It's our willingness to research, study and listen so we can meet your needs and the needs of your patients.

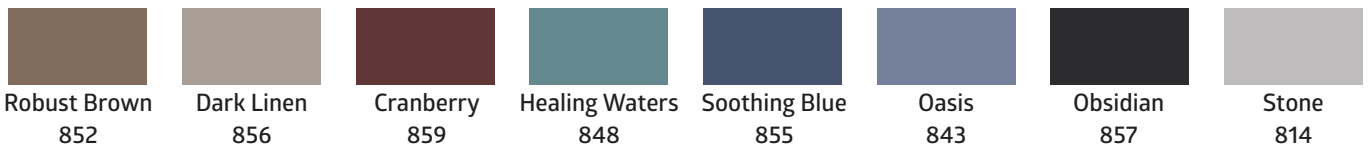

You need...

- three side drawers for optimal supply management
- modern styling to coordinate with your office
- an updated, ergonomic top design to help patients feel comfortable
- additional weight capacity up to 500 pounds

So, what was our solution?

The Ritter 204 Manual Exam Table—the latest in design, comfort and functionality in a manual exam table.

- 550-204-011 Base with Manual Back
- 550-204-012 Base with Manual Back, Pelvic Tilt & Dower Warmer
- 550-002-10138-(Colour Code) Seamless Top

Stylish and Easy to Clean - The seamless design of the upholstered top is as soft and comfortable as it looks, leaving your patients feeling more relaxed. And the seamless upholstery is designed to eliminate areas where dirt and bacteria can accumulate so clean-up is easier, faster and more effective.

Spacious Side Drawers - Three spacious side drawers provide plenty of storage volume for gowns, drapes and other items, yet are made to help organize your assortment of smaller supplies and bulk supplies. In addition, there are two front drawers for easy access to items during pelvic exams.

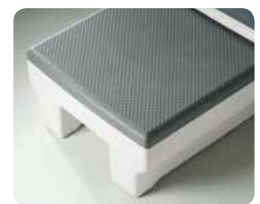

One-Piece Seamless Drawers
Designed with easy-to-clean, rounded edges that are seamless to contain spilled fluids and help improve infection control.

Removable Top System
The one-piece, upholstered top is designed to be easily removed without tools, allowing for thorough cleaning or a quick upholstery color change.

Enlarged Footstep
We increased the size of the footstep over 40 percent above the industry standard. It is designed to allow patients to feel more secure and get on the table more confidently.

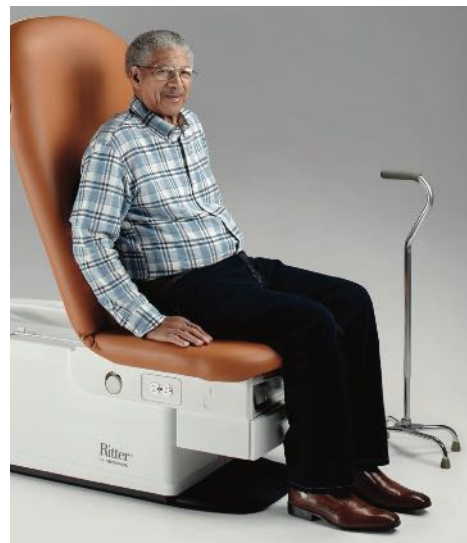

Storage Access and Volume
Our pass-through side drawers provide access to supplies from either side of the table and give you the ability to change your room configuration.

RITTER® 224/225 BARRIER-FREE POWER EXAMINATION TABLES

The number of elderly and obese patients is steadily growing, and over one fifth of adults in North America are disabled. To really care for people, you must understand the patients you care for today...and tomorrow. With an increasingly aging population, your patients may need assistance in accessing an exam table. With an incredible 18-inch low height, the Ritter 224/225 Barrier-Free Power Exam Table makes it easy for your practice to accommodate the elderly, expectant mothers or patients with disabilities easily and efficiently, helping them help themselves.

- Power height
- Manual back with air spring assist on 224 model
- Electric power back on 225 model
- 400-pound patient weight capacity
- 18-inch to 37-inch seat height adjustment
- Foot control standard

FEATURES:

Stirrups and Pelvic Tilt
Help position patients properly and comfortably for lower-body examinations (on 002 & 003 Models)

Accessory Receivers
Standard receivers are designed to make the integration of accessories easy and efficient—no tools required.

Tamper-Resistant Receptacles
Easy-access receptacles on both sides of the chair provide a power connection for ancillary devices. And they are tamper resistant to help prevent injury examinations

Foot Control
Standard foot control designed to make patient positioning quick, effective and always within reach

641 BARRIER-FREE® POWER PROCEDURE CHAIR

The number of outpatient procedures performed in the U.S. is rapidly increasing thanks to advances in anesthesia and innovations in surgical techniques. The Midmark 641 Barrier-Free® power procedures chair offers versatile positioning, increased accessibility and better patient comfort to help meet these changing demands, allowing you to perform in-office procedures efficiently and comfortably.

- Narrow patient support surface, slim back section and tuck away side rails provide maximum patient accessibility and supports proper posture
- Powered seat, back, foot and tilt offer multi-positioning capabilities to improve comfort and reduce likelihood of injury
- Premium Comfort System enhances patient comfort for a chair-like feel
- Optional wireless controls allow for placement of hand and foot controls anywhere in the room, removing chords and eliminating obstacles
- Multiple options and accessories available that improve the functionality of any office

Contact your EFAS MEDICAL Representative for more details about s

626 BARRIER-FREE® POWER EXAMINATION TABLE

Many healthcare providers still may not be following AHA recommendations for more accurate blood pressure measurement.¹ If this isn't addressed, it leaves health systems at serious risk. 30 million Americans are at risk by overestimating true blood pressure by 5 mmHg, leading to inappropriate treatment and unnecessary cost.² Multiply the cost of treatment for hypertension by the typical patient panel size and the cost of overtreatment could be as much as \$135,000 per each practicing physician.³ The impact of overmedication can also result in complications such as dizziness, fainting, exhaustion or even patient falls. The Midmark 626 is the first chair of its kind designed to

- Promote proper patient
- Positioning for a more accurate blood pressure
- Measurement.

Better BP™ Positioning

- Easily position patients for a better BP measurement.
- Powered movement of the back section ensures the patient's back is supported.
- A barrier-free low chair height allows the majority of patients, even female patients with heights in the 3rd percentile, to place their feet flat on the floor.⁴ Automated Vitals

Connect the IQvitals® device to the Midmark 626 Barrier-Free Exam Chair with the integrated IQscale® to weigh patients quickly and discreetly from the comfort of the exam chair. Then, send data to the EMR. Seamless Connectivity

The Midmark IQconnect™ framework provides a seamless connection from your devices to your EMR system. In other words, it allows you to operate all of your devices and transfer data to the EMR from one, single pane of glass—your computer screen.

ECONOMY HI-LO POWER EXAM TABLE

High-Low Exam Table design provides an 17.5" profile in low position to allow level transfer from standard wheelchair heights, complete with upright seat back.

- Pneumatic backrest is adjustable from either side and raises 80 degrees from flat
- Chair-to-Table design takes patient from consultation to examination level
- Hands-free low voltage foot control
- Heavy duty, all welded powder coated steel frame
- Top sections have welded steel support frames.
- 2" Firm density foam tops
- Paper Roll holder (18" to 21")
- 650 lb weight capacity
- Vinyl padded top

AX-SERIES WALL MOUNT MONITOR ARM

Improved ease-of-use ensures efficient EHR process at the point-of-care.

- Ideal for computerized health records and clinical documentation in the patient room
- Designed to provide effortless use through a fluid range of motion that supports patient interaction at the bedside
- Independent vertical keyboard adjustment allows variable relationship space between hand position and monitor

Innovative design enhances usability, function, and the overall care environment.

- Fully configurable with articulating and optional fixed arm components permit you to specify the monitor arm solution that best meets your unique requirements
- Lightweight aluminum with hardened finish stands up to the rigors of your healthcare environment and maintains its attractive appearance over time
- Concealed cable management eliminates unnecessary visual clutter and streamlines motion

Optimal value, reliability, and performance in the latest monitor arm design available.

- Trim-line profile can be under 8" when stored for care settings that demand compact and functional hardware mounting
- 90° range of articulating arm motion provides 12" of vertical monitor adjustment, 180° range of lateral motion, and monitor or keyboard tray tilt in 90° positive or 20° negative direction
- Wall mount kit includes 2 arms with versa mount, 2 arm extensions, 1 wall track & mount, 1 keyboard holder & 1 mouse holder

midmark™

The Synthesis® Casework Collection by Midmark—beauty and purpose by design

Since the moment Midmark entered the medical industry over 40 years ago, helping advance patient care has been our passion. Today, our number one commitment is bringing you solutions that will help you do what you do best—care for your patients.

The Synthesis® Casework Collection by Midmark was created to bring the best of two worlds together—medical casework completely redesigned from the inside out to be functional and stylish. In the past, this has oftentimes meant sacrificing beauty for designs that are more practical for medical environments. Those days are over. Because, at Midmark, we believe that you shouldn't have to sacrifice one for the other.

RITTER® ADJUSTABLE HEIGHT STOOL, 5 CASTER

These stools offers a black, plastic composite five-leg caster base and hood, and a single lever height control. The seat height adjusts pneumatically.

- Black, composite 5-leg caster base with hood
- Pneumatically adjusts from 18" to 24.5" in height
- Ergonomic backrest promotes proper posture

Specifications:

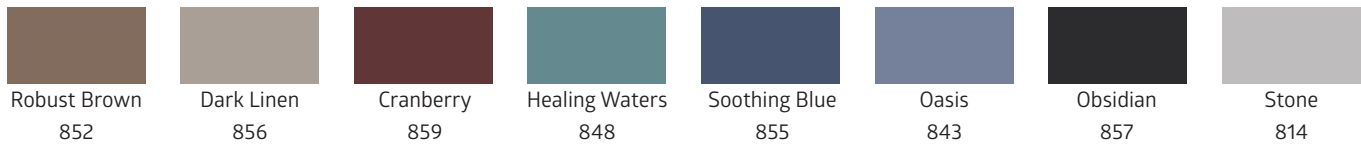

Seat Height: 18" – 24.5"
 Caster Base Diameter: 23"

Seat Diameter: 16.25"
 Weight Capacity: 300 lb

Seat Cushion Thickness: 3.25"

seca® 354 DIGITAL INFANT SCALE WITH REMOVABLE TRAY

Two scales in one: the seca 354 baby scales with a comfortable weighing tray and a fine graduation of 10 g. In no time at all, it can be converted into a floor scale for children with a capacity of 44 LBS/20 KG. The weighing tray and the base which serves as the floor scale are securely locked together, thus ensuring that the baby can be weighed absolutely safely. A further advantage of the scale is its Breast-Milk-Intake-Function which determines how much milk the baby has consumed. The robust but lightweight scale is easy to transport; self-explanatory buttons make it easy to operate.

- Capacity: 44 lbs / 20 kg
- Graduation: 0.2 oz < 22 lbs > 0.5 oz / 5 g < 10kg < 10 g

407-354Digital Infant Scale	Each
189-P7530233 Ply Disposable Towel	Case/500
.....scale liner, 13" x 18", White		

seca® 334 DIGITAL INFANT SCALE

The weighing tray has a more generous and comfortable design than many other models, but the easy to transport seca 334 weighs only 2.8 kg and requires surprisingly little space.

With the large, clear LCD figures and the practical carrying handle – which can also be used to hang the scales – this battery-operated scale for babies and infants makes daily weighing very easy. The Breast-Milk-Intake-Function shows the exact amount of milk the baby has consumed.

- Capacity: 44 lbs / 20 kg
- Graduation: 0.2 oz < 22 lbs > 0.5 oz / 5 g < 10 kg > 10 g

seca® 374 DIGITAL INFANT SCALE WITH EXTRA LARGE TRAY

Ergonomic, convenient and time-saving.

Those are the words you'll think of as soon as you see the new seca 374. Its extra large tray lets you weigh a seated toddler of up to 20 kg, even if the child is fidgety. The adjustable damping function combined with the HOLD key ensures fast and precise work. Net weight of a diapered baby? Choose TARE. The amount of milk breast-fed to a baby? Use the BMIF (Breast-Milk-Intake Function). Transmit wirelessly to your PC, **EMR system** or vital signs monitor. And you can do it wherever you like because the seca 374 is operated by battery, so there's no need for electrical outlets.

- Capacity: 44 lbs / 20 kg
- Graduation: 0.2 oz < 22 lbs > 0.5 oz / 5 g < 10 kg > 10 g

Ritter® 255 CEILING MOUNT LED PROCEDURE LIGHT

Whether you practice in an office environment or specialized procedure area, your work requires superior, white, shadow-free illumination that is safe and cool to the touch. Integrated controls on both sides of the light head provide convenient access to make lighting adjustments. You can turn the light on and off and adjust the light brightness from the control touchpad. The sleek contours and sealed light head were designed to make cleaning and care easier. And the handle can be removed for steam sterilization. The Ritter 255 LED Procedure Light is counterbalanced, designed to help you achieve precise positioning using less force – all without drifting or needing frequent adjustments like spring-based systems. And the yoke design is intended to further simplify positioning with its smooth range of motion.

Bovie RESISTICK™ II ELECTRODES

Resistick IITM coated blade, ball and needle electrodes are coated with PTFE (polytetrafluoroethylene). They move more effectively through tissue because they resist eschar build-up making them much more efficient during surgical procedures. Unlike common stainless steel electrodes with a propensity to accumulate the discarded blood and tissue, Resistick II electrodes simply wipe clean

MEDICATION AND VACCINE REFRIGERATOR

The Pharmacy Premier Built In Undercounter Refrigerators feature a microprocessor temperature controller and display, which allows for precise temperature control, verification and recovery versus mechanical style thermostats.

- 4.6 CU. FT. Capacity
- Three shelves (two adjustable/one fixed)
- Evaporator cover
- Vaccine storage power cord warning label
- Forced draft circulation
- Keyed door lock
- Magnetic door gasket for positive seal
- Heavy duty door handle
- LED interior light
- Digital display w/Audio and visual alarms for low and high/low temperature

F48-HSBPH0404GADA Each

PANASONIC® VACCINE AND MEDICATION FRIDGE

This biomedical undercounter is built with a clinical grade refrigeration system. Strict temperature control keeps stored product within the CDC recommended 2°C to 8°C temperature range, and a uniformity of ±3°C, for optimal vaccine storage. Designed to prevent interior temperature from dropping below 2°C at any location in the cabinet.

- Power failure (B - Momentary), high temperature deviation (V-B), low temperature deviation (V-B), door open (V-B), diagnostics (V) V=Visual, B=Buzzer
- Exterior Dimensions (Inches) (WxDxH) 22.5" W x 22.1" D x 29.6" H
- Interior Dimensions(WxDxH)18.5" W x 14.6" D x 18.9" H
- Temperature Range °C 2-8

VALSURE™ ENZYMATIC CLEANING SOLUTION

Valsure Enzymatic Cleaner is formulated to be used in manual/pre-cleaning of instruments, ultrasonic cleaners, and for use in washer/disinfectors and other similar equipment. The liquid cleaner is designed for use on surgical instruments, flexible fiber optic endoscopes, rigid scope, manual resuscitators and other apparatus. Valsure enzymatic cleaner is compatible with stainless steel, plastics and soft metals including aluminium.

779-1C5208 3.8 Litre Each

METRICLEAN 2™ CLEANING SOLUTION

- Multipurpose concentrated instrument cleaner & lubricant
- Low foaming
- Excellent in ultrasonic cleaners
- Lubricates all moveable parts and flexible joints
- Removes stains, blood, rust and mineral deposits

080-MC8100. 3.8 Litre Each

ORGANISOL POWDERED DETERGENT

AprilGuard Organisol Detergents effectively dissolve, suspend and digest dried blood, serum, tissue samples, culture nutrients and other proteinaceous matter. One ounce turns one gallon of tap water into unequaled soaking solution. Organisol detergents are effective on surgical instruments, laboratory porcelain, rubber, plastic and glassware. Cleaning is quick and easy with no scrubbing. Organisol Detergents won't rust your expensive instruments, and the formula is non-toxic and odorless. It is just as effective in hard water as in soft. Organisol is not for disinfecting instruments.

D38-002900 1.82kg Pail Each

EMPOWER® DUAL ENZYMATIC DETERGENT

- Excellent Cleaning Power – Loosens and cleans lipids, starches, inorganic debris, and protein fluids fast.
- Multi-Application – Versatile to be used as manual presoak, in ultrasonics, automated washers, and evacuation systems.
- Instrument Friendly – Neutral pH formulation is safe on instruments and reduces the need for manual scrubbing that may be abrasive on instruments.
- Low foaming – Low foaming which reduces handling risks especially when it comes to sharp objects

080-10-4400 3.8 Litre Each

DUAL ENZYMATIC DETERGENT

- Dual-enzyme formula disintegrates protein deposits, starch and carbohydrates, even in hard-to-reach areas.
- Economical, single-enzyme formula removes protein only

320-MDS88000B9 3.8 Litre Each

EMPOWER® FOAM SPRAY

- Non aerosol, dual enzyme foam
- Precleaner for all instruments
- If you have any instruments that do not get cleaned immediately after use, try Empower foam. Apply the foam and it will start the precleaning process for you.

080 MC4224 24 ounce Each

PRE-KLENZ™ INSTRUMENT CLEANING GEL

Now available in a new dispensing system to increase Productivity, Ease of Use and Performance. It will also improve compliance to industry recommended practices. PRE-Klenz is an instrument transport gel that contains surfactants which facilitate cleaning of instruments. By utilizing a gel technology, PRE-Klenz™ reduces the risk to employees who process instruments. This ready-to-use, dye-free formula will not stain instruments nor harm aluminum or soft metals. Tests indicate that PRE-Klenz™ is also free rinsing and compatible with a wide range of materials. PRE-Klenz is now available in easy to use 382 gram cans or traditional 650mL spray bottle

779-1505J5 382 gram can Each
 779-150377 650mL Spray Bottle Each

VERIFY™ RESI-TEST CLEANING INDICATORS

Verify™ ResiTest Cleaning Indicator is used after manual or automated cleaning to determine if an instrument is clean. The cleaning indicator works via a colorimetric change that occurs as a result of binding proteins. The solution turns blue in the presence of protein indicating that the surface of an instrument is not clean. The solution turns light brown or light green in the absence of protein indicating that the surface is clean

779-LCC100 Cleaning Indicator Swabs Pkg/25

VERIFY™ RESI-TEST™ ENDO PROTEIN DETECTION CLEANING INDICATOR

The Verify Resi-Test Endo Protein Detection Cleaning Indicator goes beyond visual inspection to quickly detect a broad spectrum of residual proteins in scope channels (down to 1 µg). This provides you increased assurance that effective manual cleaning has taken place prior to sterilization or High Level Disinfection (HLD) – a critical step in today's Endoscopy Department.

ALOE CARE® 72% ALCOHOL FOAM HAND SANITIZER

An alcohol-based hand rub is the preferred method in many clinical settings simply because it takes less time than washing with soap and water, and is more accessible for both patients and providers. Aloe Care's non-clogging pump bottle and dispenser formats also allow for more hand washes per millilitre and convenient placement options at the point of care. Aloe Care Foaming Alcohol Hand Sanitizer is an advanced formulated hand sanitizer that contains 72% ethyl alcohol to kill 99.99% of many common harmful germs and bacteria. Convenient foam sanitizers are easier to apply, feel softer on the hands and create less mess. Aloe Care Foaming Alcohol Hand Sanitizer contains special conditioners to leave hands moisturized and leaves a pleasant scent on your hands.

Purell® ES® SANITIZER HAND HYGIENE SYSTEMS

Our newest generation of dispensers, PURELL ES® hand hygiene systems, are as durable and reliable as they are beautiful. Choose from manual or touch free options offering our AT-A-GLANCE™ Refill Design which allows you to monitor product levels with just one look to make it quick and easy to see which dispensers need your attention, so they are always serviced and ready. For product refills, choose between PURELL Advanced Hand Rub in gel or foam formulations, which contain 70% ethyl alcohol, and are dye free and fragrance free. These scientifically advanced patent-pending formulations outperforms other leading hand sanitizers mL for mL delivering the most powerful, advanced antimicrobial kill¹. All ES PURELL® Hand Sanitizer Dispensers include a SHIELD™ Floor & Wall Protector. Scientifically advanced patent-pending formulation outperforms other hand sanitizers mL for mL¹.

The revolutionary PURELL® ES8 Dispensing System is a revolutionary dispenser design that offers always-ready peace of mind and efficiency. Energy-on-the-refill allows the system to run through a small coin-cell battery that is replaced with every new product refill. Back-up power inside the dispenser provides added assurance of high performance. Optional GOJO SMARTLINK™ plug-in modules let you add intelligent functionality to your dispenser. Track hand hygiene compliance, get service alerts, or add other upgrades as technology evolves to notify you when and where new refills are needed – even more assurance that hand hygiene systems will never be empty.

Purell® ES® HAND HYGIENE SYSTEMS WITH PURELL BRAND HEALTHY SOAP™*

Our newest generation of dispensers, PURELL ES® hand hygiene systems, are as durable and reliable as they are beautiful. Choose from manual or touch free options offering our AT-A-GLANCE™ Refill Design to monitor product levels with just one look to make it quick and easy to see which dispensers need your attention, so they are always serviced and ready. New PURELL HEALTHY SOAP™* products are available in a variety of gentle and effective formulations. Whether you choose between new PURELL HEALTHY SOAP™* Mild Foam, or HEALTHY SOAP™* High-Performance Foam with CLEAN RELEASE™ Technology, you can feel great knowing you're using an effective and trusted product. PURELL HEALTHY SOAP™* with CLEAN RELEASE™ Technology sets a new standard for soap performance. This remarkably mild formulation is gentle on skin, contains no antibacterial ingredients¹ or harsh preservatives, and removes over 99% of dirt and germs.¹⁻³

The revolutionary PURELL ES8 Dispensing System is a revolutionary dispenser design that offers always-ready peace of mind and efficiency. Energy-on-the-refill allows the system to run through a small coin-cell battery that is replaced with every new product refill. Back-up power inside the dispenser provides added assurance of high performance. It offers an optional SMARTLINK™ modules for service alerts, compliance monitoring or other upgrades as technology evolves to notify you when and where new refills are needed – even more assurance that hand hygiene systems will never be empty.

**EACH INSTRUMENT BEGINS WITH THE FINEST STAINLESS STEEL
AND ENDS WITH THE KÖNIG NAME.
(IN BETWEEN ARE UP TO 114 INTRICATE STEPS.)**

In an age of instant gratification and on-demand everything, you may find it refreshing to learn that creating a König surgical instrument is an exercise in patience and craftsmanship.

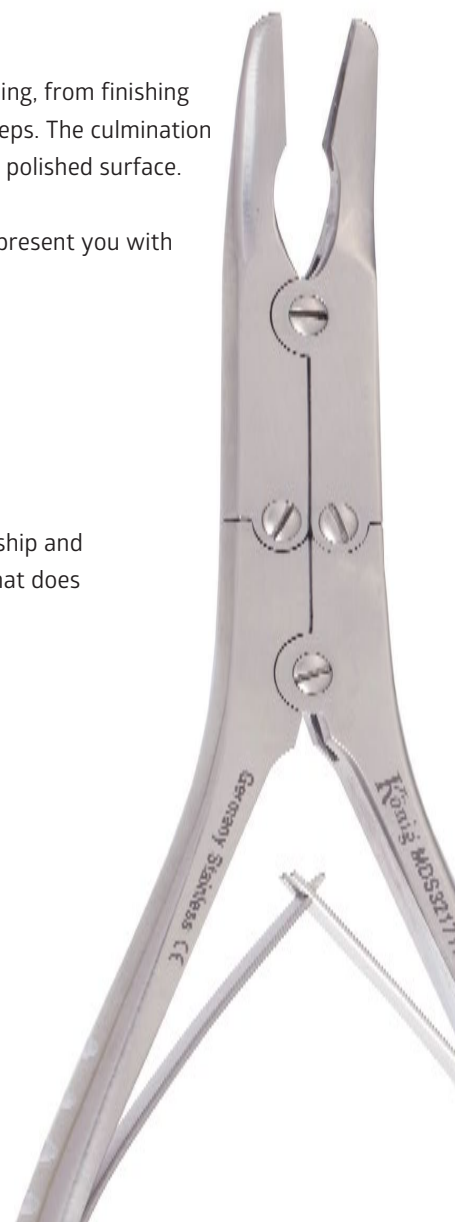

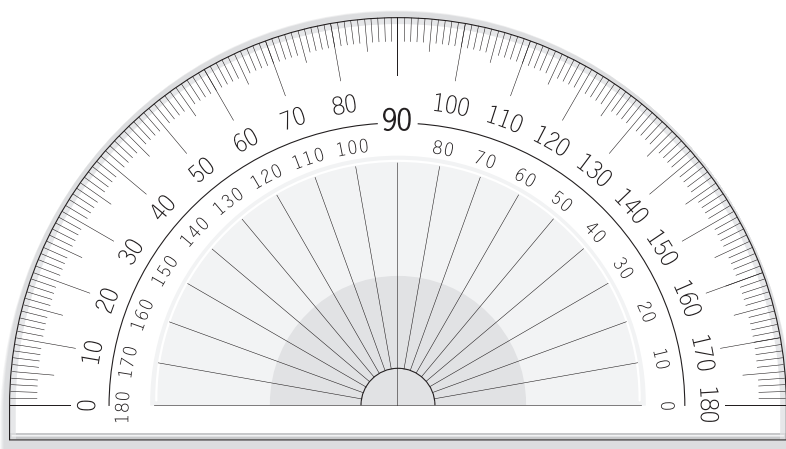

In fact, many König instruments take almost two months to make. From forging to machining, from finishing to passivation, each instrument's journey takes it through up to 114 slow and deliberate steps. The culmination is the crowning achievement for any instrument — the etching of the König name on to its polished surface.

We take the König name seriously and we hope you will too. That's why we're pleased to present you with our latest catalog of over 5,000 surgical instruments.

We think you'll find that König instruments are built for years of demanding use.

KÖNIG'S LIFETIME WARRANTY

We warranty every König surgical instrument to be free of functional defects in workmanship and materials. Medline promises to repair or replace, free of charge, any surgical instrument that does not meet these requirements when used for their intended surgical purpose.

PRE-KLENZ™ INSTRUMENT CLEANING GEL

PRE-Klenz is an instrument transport gel that contains surfactants which facilitate cleaning of instruments. By utilizing a gel technology, PRE-Klenz™ reduces the risk to employees who process instruments. This ready-to-use, dye-free formula will not stain instruments nor harm aluminum or soft metals. Tests indicate that PRE-Klenz™ is also free rinsing and compatible with a wide range of materials. PRE-Klenz is now available in easy to use 382 gram cans or traditional 650mL spray bottle

- 779-1505J5 382 gram can Each
- 779-150377 650mL Spray Bottle Each

INSTRUMENT CLEANING SUPPLIES

- Surgical Instrument Stain Remover, 3 Ounce
232-3-740 Each
- Surgical Instrument Cleaner, 8 Ounce
232-3-720 Each
- Surgical Instrument Brush, Nylon Bristle
320-MDS88BRUSH Package/3

INSTRUMENT LUBE

Miltex spray lubricant. Pre-mixed, non-silicone and anti-corrosive formula in a ready to use 8 oz. spray pump bottle.

- 232-3-700 8 Ounce Each

INSTRUMENT STAIN & RUST REMOVER

Liquid Instrument Stain Remover removes rust and stains and also frees box joints by removing water deposits and detergent residue. Safe for all stainless steel or tungsten-carbide instruments.

- 320-MDS88000T5 .. 4 Litre Each

STERILE SINGLE-USE INSTRUMENTS

Our single-use sterile instrument trays are designed to give you a good floor quality stainless steel instrument in a peel top plastic tray that is sterile and ready for use.

IRIS SCISSOR, STERILE

PESSARY FITTING SET, REUSABLE

- Helps determine style and size of pessary needed
- Includes 6 popular sizes of Ring Pessaries
- * Embossed cross-reference chart on top of case
- * Autoclavable

320-MDS6310000..... Set/6

SILICONE VAGINAL DILATOR SETS

- Each set includes 4 dilator sizes
- 100% Medical-grade silicone
- Pliable to facilitate use
- For vaginal use only

320-MDS6303003..... Small Set Set/4

Dilator Size	Small Outer Diameter	Large Outer Diameter
50mm	9.5mm	13mm
60mm	10.5mm	14mm
65mm	12mm	16mm
75mm	13.5mm	18mm

320-MDS6303002..... Medium Set Set/4

Dilator Size	Small Outer Diameter	Large Outer Diameter
75mm	12.5mm	17mm
78mm	19.5mm	23mm
86mm	22.5mm	28mm
95mm	26mm	33mm

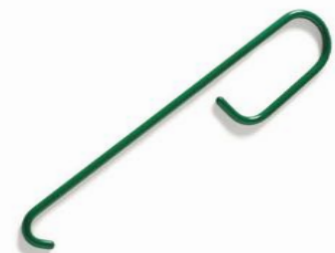

320-MDS6303001..... Large Set Set/4

Dilator Size	Small Outer Diameter	Large Outer Diameter
120mm	19.5mm	24mm
128mm	22.5mm	28mm
138mm	25.5mm	32mm
150mm	30mm	38mm

PESSARY HOOK REMOVER, REUSABLE

- Assists with the removal of any style pessary
- 7" (17.7 cm) long

320-MDS6309001..... Each

**UTERINE SOUND, SINGLE USE**

- Used to examine the vaginal cavity and to measure uterine depth
- Sterile, single-use
- Flexible
- 9 3/4" (24.7 cm) long
- Individually packaged

320-MDS6306000 Box/25

**OS CERVICAL DILATORS, SINGLE USE**

- For dilating the external OS to allow access to the cervical canal
- Sterile, single-use
- 8 1/2" (21.5 cm) long
- Flexible and smooth

320-MDS6305001 OS Locator Box/25

320-MDS6305002 Canal Dilator Box/25

320-MDS6305003 Fundus sound Box/25

**CERVICAL DILATOR SET, REUSABLE**

- Autoclavable and made of PTFE
- For locating and dilating the external and internal OS and cervical canal
- Set includes: OS Finder, Canal Dilator, and a Fundus Sound
- Flexible and smooth

320-MDS6303000 Set/3

**ENDOMETRIAL BIOPSY CANNULAS, SINGLE USE**

- Choose easy flex or firm flex cannula
- Sterile, single-use
- For routine sampling

320-MDS6303010 Easy flex biopsy cannula Box/25

320-MDS6303012 Firm flex biopsy cannula Box/25

**ENDOMETRIAL SAMPLING SET**

- Sterile, single-use
- 10 ml standard twist-and-lock syringe
- Curette working length is 8 1/8"
- Stopette provides protection against perforation

320-MDS6303015 Box/25

EFAS service vehicles deliver first aid and safety products directly to your facility or job site.

★★★★

Our mobile, professional EFAS representatives will audit and restock your [first aid kits](#) and rooms to meet or exceed compliancy with regulatory requirements, ensuring peace of mind in knowing that you are well provisioned to treat the smallest of injuries or deal with the challenges of an emergency.

The benefits of using mobile first aid services.

★★★★

Mobile first aid supply services from EFAS offer a wide range of benefits to customers, including:

- Free delivery included with our mobile service
- More time to focus on your business
- Quality safety and first aid products
- WorkSafe compliancy
- Regular inventory inspections and restocking
- Complete peace of mind

- 533-2N3374 Each
- 533-2N3374 Case/200

IV Needleless microbore catheter, 8" extension set with Clearlink® luer activated valve

- 533-2N8374 Each
- 533-2N8374 Case/50

IV Extension set, 11" length with Clearlink® injection site and male luer lock adapter

- 533-JC8606 Case/48

IV Extension set, 21" Length with male luer lock adapter

- 533-2C6226 Each
- 533-2C6226 Case/50

BD POSIFLUSH™ PRE-FILLED SALINE SYRINGES

BD PosiFlush™ Saline Syringes offer Positively ZERO Reflux*, which minimizes the potential for clotted catheters. BD PosiFlush Saline Syringes come with a traditional 10mL syringe diameter for optimal pressure distribution allowing the right amount of pressure to be delivered at all times. XS series has sterile pathway and outer syringe for O.R. applications, while SP series has sterile pathway for all other applications.

BD INSYTE® I.V. CATHETER

New Standard in I.V. Therapy. When faced with the everyday challenges of infusion therapy, Insyte® I.V. catheters deliver:

- Increases the ease of penetration
- Reduces the risks of infiltration
- Exhibits greater kink resistance
- Reduces the risks of phlebitis up to 50%
- Reduces I.V. restarts due to reduced complications
- Reduces the total I.V. therapy cost to use due to longer indwelling times

NEXIVA CLOSED IV CATHETER SYSTEM - DUAL PORT

All-in-One Closed System

The pre-assembled system creates a closed fluid path, designed to minimize blood leakage from the catheter hub, and minimize the potential for contamination and exposure to blood.

Built-in Stabilization Platform

The built-in stabilization platform is soft and flexible, and is designed to help minimize catheter movement in the vessel which may improve catheter dwell time.

High-pressure Extension Set

Pre-attached high-pressure extension set is capable of power injections for contrast-enhanced CT scans.* This preassembled system is designed to withstand pressures up to a maximum of 300 PSI.

BD Q-Syte™ Luer Access Split Septum

A split-septum needleless access system has 64%-70% lower CRBSI rates than mechanical valves.^{6,7} Patients are three times more likely, on average, to develop a CRBSI with the use of a mechanical valve versus a split-septum needleless access system.^{6,7}

INSYTE™ AUTOGUARD™ BC WITH BLOOD CONTROL TECHNOLOGY

The healthcare industry has come a long way in preventing needlestick injuries and their potential dangers. Even so, blood exposure during a peripheral IV insertion is still a factor—and a risk—to healthcare workers and patients. Now blood exposure doesn't have to be "part of the job." 98% of clinicians stated they had no risk of blood exposure during insertion when using BD Insyte™ Autoguard™ BC,¹ which means:

- No risk of exposure to bloodborne pathogens
- No clean up of blood spills
- No need to worry about stopping blood
- No add-on costs for clean-up supplies.

TERUMO SURFLO® WINGED INFUSION SET

Terumo's soft, flexible interlocking wings readily conform to the body's contour. The needles are bonded to the wings at just under a 3° downward angle, for less risk of vessel damage or occlusion of the lumen. The precisely honed needle assures ease of penetration and continued access with a single insertion.

SOL-CARE™ BLOOD COLLECTION SYSTEMS

Sol-Millennium offers a wide range of good quality, affordable blood collection devices that are familiar, safe and easy to use. Our mission is to help making blood collection comfortable, convenient and safe, providing devices designed to be reliable with respect to clinical practice.

Our product range includes:

- SOL-CARE™ Safety Winged Infusion Set
- SOL-CARE™ Safety Blood Collection Needle
- SOL-CARE™ Safety Multi-Sample Blood Collection Needle
- Accessories: SOL-M™ Luer Adapter and SOL-M™ Tube Holders

SOL-CARE™ SAFETY BLOOD COLLECTION NEEDLE

Safety-engineered device intended for venous blood collection. Safety mechanism can be activated immediately after blood draw, helping to protect you against needlestick injury Also offered with a pre-attached holder.

453-110201030002 . . . Safety Blood Collection Needle w/Pre-attached Holder 21G x 0.75" with 12" tubing, sterile	Box/25
453-110201030006 . . . Safety Blood Collection Needle w/Pre-attached Holder 23G x 0.75" with 12" tubing, sterile	Box/25
453-110201030010 . . . Safety Blood Collection Needle w/Pre-attached Holder 25G x 0.75" with 12" tubing, sterile	Box/25
453-110201030031 . . . Safety Blood Collection Needle 21G x 0.75" with 12" tubing, sterile	Box/50
453-110201030033 . . . Safety Blood Collection Needle 23G x 0.75" with 12" tubing, sterile	Box/50
453-110201030035 . . . Safety Blood Collection Needle 25G x 0.75" with 12" tubing, sterile	Box/50

SOL-M™ BLOOD COLLECTION TUBE HOLDER

Standard holder for blood collection tubes. Holder can be used in connection with Luer adaptors and multi-sample needles Compatible with major brands of evacuated blood collection tubes

453-110201050001 . . . Blood Collection Tube Holder, non-sterile Inner	Bag/250
--	---------

SOL-M™ TUBE HOLDER WITH LUER LOCK ADAPTER

Holder for blood collection tubes with pre-attached Luer Lock Adapter. Holder can be used with IV access devices, eg.: IV catheters or CVC. Holder can be used in case of collecting the blood from IV lines - compatible with luer female connectors. Compatible with major brands of evacuated blood collection tubes

453-110201050003 . . . Tube Holder with Luer Lock Adapter, sterile Inner	Bag/200
--	---------

SOL-CARE™ SAFETY MULTI-SAMPLE BLOOD COLLECTION NEEDLE

Safety-engineered tool for multi-sample venous blood collection. Designed with a safety mechanism covering the needle after use. In the activated position, the needle cover guards against accidental needlestick during normal handling and disposal. Also offered with a pre-attached holder

453-SMSN21125 Safety Multi-Sample Blood Collection Needle 21G x 1.25", sterile	Box/48
453-SMSN22125 Safety Multi-Sample Blood Collection Needle 22G x 1.25", sterile	Box/48
453-SMSNH21125 Safety Multi-Sample Blood Collection Needle w/Pre-attached Holder 21G x 1.25", sterile	Box/50
453-SMSNH22125 Safety Multi-Sample Blood Collection Needle w/Pre-attached Holder 22G x 1.25", sterile	Box/50

BD VACUTAINER® PRODUCTS

BD provides a full offering of BD Vacutainer® Blood Collection Tubes in both glass and plastic. BD Vacutainer® Plus Plastic Tubes offer a safe method of blood collection. They also reduce the potential for tube breakage and specimen spillage, thereby reducing the potential for exposure to bloodborne pathogens.

The BD Vacutainer® Safety-Lok™ blood collection set is simple, easy to use and safety engineered. The safety mechanism can be activated immediately after the blood draw and helps protect against needlestick injury. It is also offered with a pre-attached holder to add convenience and help ensure OSHA single-use holder compliance. The set is ready to use right out of the package, with no assembly required. The BD Safety-Lok™ shield reduces needlestick risk for both healthcare personnel and patients.

IV ACCESS CANNULA

The BD Plastic Cannula is a truly universal cannula and can be used with all types of split-septum IV injection sites and vials designed for needleless access. It provides simplified access to the Interlink injection site with smoother insertion, reduced penetration force, and greater fluid dispersion.

308-303345Interlink Blunt Plastic Syringe 17g Cannula Box/100

PRN LUER LOCK IV ADAPTERS

- Does not contain natural rubber latex
- 0.1mL/min.
- Sterile

308-385111Short 0.75" injection site, sterile, latex free Box/50

308-385112Mid-Size 0.0625" injection site, sterile, latex free. Box/50

Q-SYTE INTRAVENOUS NEEDLELESS CONNECTOR, LUER ACCESS

In addition to the benefits of split-septum design, the BD Q-Syte device delivers optimal luer access performance because of its straight and unobstructed fluid path. Available as connectors for IV lines or for vial access bottles

308-385100Split-Septum IV Needleless Connector Box/50

308-385108Split-Septum Needleless Vial Adapter Connector. Box/25

CLAVE® NEEDLELESS CONNECTOR

For needleless access to central peripheral, and arterial lines.

E22-C1000 Box/100

DELUXE I.V. STAND, 5 LEG

- Chrome plated steel pole provides strength and durability
- Composite 5 leg base and 5 swivel ball bearing casters
- Comes with 2 hooks
- Large 21" wide base

320-MDS129CS Each

DIALYSIS & INFUSION CHAIR

Non-porous blow molded fold down side trays with cup recess are mounted on both sides. It features a standard Trendelenberg release with handle accessible from either side. It also has a built-in ergonomic headrest, adjustable elastic bands on the back frame that provide exceptional comfort and an elastic open seat base. All of these features combine to create the ultimate in comfort, durability and value.

509-653NDialysis & Infusion Chair Each

Available in Taupe, Gray, Burgundy, Royal Blue, Hunter Green, Blueridge

RAPID RESPONSE® AUTOMATIC URINALYSIS ANALYZER

URISYS 1100® URINE ANALYZER

Fast, accurate urine testing with the push of a button with simple, 1-button operation, the Urisys 1100 Urine Analyzer makes urine testing fast, easy and accurate. Urinalysis can be a valuable diagnostic tool and a time-intensive one. With the push of a button, it evaluates the test strip and prints a patient report. Compared to visual testing, this can help make lab operations more efficient and give busy staff more time for other things.

- Automatic result printout ensures consistent, accurate results
- Optional results downloading, including device ID, operator ID and patient ID, eliminates manual data entry errors
- Optional operator lockout function helps facilitate regulatory compliance
- Simple cleaning minimizes maintenance needs
- Flexible strip options: Chemstrip® 10 MD*, Chemstrip 7 or Chemstrip 5 OB test strips
- Error messages alert user to issues that could affect accuracy of results

CLINITEK-STATUS+® URINE ANALYZER

The CLINITEK Status®+ Analyzer features new automatic checks (Auto-Checks). The analyzer automatically checks each test strip for humidity exposure, common sample interferences and strip identification for Siemens test strips. Together, these provide improved clinical information.

- Enhances confidence in clinical decisions with (Auto-Checks) performed on every test
- Ensures consistent results interpretation with automatic timing and reading of every urine specimen
- Ready for connectivity to data management solutions (DMS), via a simple upgrade kit
- Offers a comprehensive point-of-care urinalysis menu for routine testing, detection of early kidney disease and hCG pregnancy testing

DCA VANTAGE® ANALYZER

The DCA Vantage® Analyzer helps monitor glycemic control and detect early kidney disease in environments ranging from the physician's office to remote, point-of-care coordinated sites in hospitals and multisite practices. Meet lab-quality testing standards with an analyzer that speeds and simplifies diabetes tests and delivers accurate, clinically relevant results shown to improve decision-making, patient compliance, and outcomes.

- Manage diabetes patients more effectively
- Improve workflow in office or clinic
- Simplify management of diabetes testing in decentralized settings
- One of just two HbA1c analyzers that meet NGSP performance criteria
- Used by three out of four physicians who perform HbA1c testing in their office

HEMOCUE® SYSTEMS

The HemoCue® systems are the leaders in Point-of-Care hemoglobin and glucose testing. The systems combine the precision and accuracy of a central laboratory with the speed and convenience of obtaining results at the point-of-care. With just a fraction of a drop of blood and three simple steps, the HemoCue® Systems will produce immediate, accurate results for screening, diagnosing or monitoring diabetes, as well as monitoring neonatal blood glucose levels.

Why to choose a HemoCue® System

- Can be used by non-laboratory personnel after a brief training session
- Produces lab quality results within moments
- The disposable microcuvettes automatically draw a precise volume of specimen
- The analyzers are factory calibrated and require a minimum of maintenance
- No calibration needed between microcuvette batches

COAGUCHEK XS INR SYSTEM

The smart way to test INR

The CoaguChek XS system is a dedicated solution for patients on vitamin K antagonist therapy to monitor their PT/INR values. Using a small drop (8 µl) of capillary blood, it is easy to use and it provides a precise PT/INR result usually in less than 1 minute.

- Saves caregiver time retrieving calls from lab
- No early morning 'wake-up' blood draws for resident
- Finger lance vs painful venous draw
- Improved time in therapeutic range for resident which leads to improved outcomes
- Physicians can adjust their own patient's dosages the day they are on site

- Storage Conditions - Temperature =36° ~ +86°F (+2°~ +30°C) Humidity RH <80%
- Blood Volume (m n) - 0.6uL
- Test Strip Expiry - 18 Months after production, or 90 days from first opening

SYSTEM OPERATION CONDITIONS

- Operating Conditions Temperature +50° ~ +104°F (+10°~ +40°C) Humidity RH <80%
- Sample Type - Capillary Whole Blood
- HCT of Tested Blood - 25% - 60%
- Altitude Limit - To be used no higher than 10,183 feet above sea level

SAFETY BLOOD LANCETS, PUSH BUTTON TYPE

Single-use safety lancets have been designed for modern capillary blood sampling and the device is an integral component to sharps-injury prevention programs wherever patients and professionals have to feel safe.

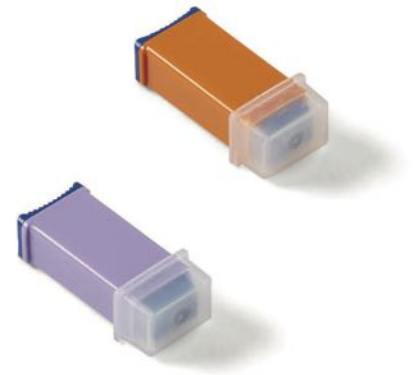

- 320-MPHSAFETY2121g, 1.8mm Depth, Green Box/200
- 320-MPHSAFETY2828g, 1.6mm Depth, Light Blue Box/200

SAFETY BLOOD LANCETS, PRESSURE ACTIVATED TYPE

These Safety lancets are one of the most convenient and safe lancets in the market. Unique one step application mechanism makes it extremely simple and safe to use.

- 320-MPHST2121g, 2.2mm Depth, Orange Box/200
- 320-MPHST2828g, 1.8mm Depth, Purple Box/200

SAFE-T PRO PLUS® BLOOD LANCETS

Three depth settings to obtain different blood volumes for varying needs while offering greater comfort for the patient.

QUICKVUE® STREP-A TEST KITS

The QuickVue Dipstick Strep A test is intended for the rapid qualitative detection of Group A Streptococcal antigen from throat swabs or confirmation of presumptive Group A Streptococcal colonies recovered from culture. The Dipstick format allows for an “off-line” extraction while maintaining its simplistic procedure, allowing the test to be granted CLIA-waiver. The two-colored endpoint and accuracy at the low levels of colony count make the QuickVue Dipstick Strep A test one of the most accurate and cost effective tests on the market today.

METHADONE DETECTION ONE-STEP SCREENING TEST

The MP Biomedicals Strip Rapid Drug Test is a one-step urinalysis immunochromatography drug test, in this case, for detecting methadone in human urine specimens and provides a preliminary analytical test result for on-site testing. This test meets Health Canada requirements and serves as an effective means of monitoring patients on methadone maintenance treatment programs.

TERUMO SURGUARD-3™ SAFETY NEEDLES & SYRINGES

With 3 ways to activate and a broader range of sizes than most other brands, SurGuard®3 is the industry's most adaptable safety needle. Add separate thumb and finger grips, unequalled sharpness, and competitive pricing, and you'll understand why we say SurGuard®3 is the one needle that fits every clinician's style.

SurGuard®3 SAFETY HYPODERMIC NEEDLE

- 3 modes of activation—thumb, finger, or hard surface
- Separate finger/thumb grips with ridges and nonslip surfaces
- 10% sharper than similar needles from Becton, Dickinson and Company
- Hub and needle locks for security post activation
- Broad range of sizes
- Firm injection feel
- Sharpest needles among major brands tested*
- More comfortable injections for patients

Bottom line: No matter what you're looking for in a needle, you're looking for SurGuard®3.

SHARPS DISPOSAL SYSTEM WITH PREPAID DISPOSAL PICKUP

Our prepaid sharps disposal system comes with ready to use sharps containers and everything you will need to pack up the filled containers. Call ECS Cares (1-800-263-1857) disposal company to come pick up the sharps disposal box and safely dispose of it.

- Step 1 - Contact your Medline | Medical Mart Representative or Customer Service to place initial order
- Step 2 - Use the supplied liner to line the inside of box
- Step 3 - Lock Containers and place in lined box
- Step 4 - Once box is full, use the handles of the liner to tie into a knot
- Step 5 - Close and tape box shut leaving box handles for easy transportation
- Step 6 - Notify ECS Cares (1-800-263-1857) for disposal pickup
- Step 7 - Contact your Medline | Medical Mart Representative or Customer Service to place your subsequent order

Hillrom™ WELCH ALLYN® KLEENSPEC® CORDLESS VAGINAL ILLUMINATION SYSTEM COMPLETE WITH CHARGER

The Welch Allyn 800 Series Cordless Illumination System is a unique design with enhanced features including bright, white LED light to help improve patient exams. The compact, efficient system offers on-time of 80 minutes that will get you through the day, and recharges in 5 hours. Standardize your facility with KleenSpec Cordless Illumination Systems and KleenSpec Disposable Specula to help please both your staff and your patients.

163-80010 Complete Illumination System Each

Hillrom™ WELCH ALLYN® KLEENSPEC® LIGHTING SYSTEMS

The 78900 Series KleenSpec® Corded Illumination System, with halogen technology, provides bright, long-lasting light to the exam or procedure area. Ideal for facilities that require an illumination system that requires high-level disinfection.

163-78900 Speculum Lighting System Each

Hillrom™ WELCH ALLYN® DISPOSABLE VAGINAL SPECULUM

Designed to eliminate the time and expense of reprocessing metal specula and to reduce the risk of cross-contamination. Each single-use speculum is manufactured to deliver durability and reliability. Use with the KleenSpec Illumination System or alone with an external light source.

ALLIANCE® FACE MASK, 3 PLY, EARLOOP, LEVEL 2

The 3-ply Alliance Earloop Procedure Face Mask is used for general patient care. Available in blue or yellow, these face masks provide good protection and are easy to use. Alliance masks are an economical choice for everyday use and are a great product for both healthcare professionals and patients. The masks catch the bacteria from the wearer’s mouth and nose and help avoid spreading the bacteria to others.

O2 CURVE® N95+ REUSABLE RESPIRATOR MASK

The new O2 medical elastomeric respirator is designed to reduce the potential for cross-contamination in the medical field through its innovative dual-filter design. Its easy-to-adjust strap ensures a safe and secure face seal, while providing the comfort needed for long-term wear. The respirator can be easily disinfected and sterilized, making it ideal for mass use in the healthcare space.

The new O2 medical elastomeric respirator is different than a standard disposable medical face mask in that it gives complete protection for the wearer and those around them with 98% filtration and complete seal around the facial area. The replaceable disposable filter inside the O2 respirator is designed to remove a high percentage of particles, bacteria and viruses from the air, while the special silicone seal between the respirator and face prevents leakage around the filter. This combination is designed to restrict airborne particles from entering the wearer's nose, mouth and ultimately, lungs

3M QUALITATIVE FIT TEST KIT

3M Respirator Fit Test Kits can be used with any particulate respirator to test face mask to face seal fit. The 3M Fit Test Kit can help satisfy regulatory requirements for face mask fit testing. Available in either a bitter or sweet test solution kit. Simply spray the solution into the hood environment. If the wearer does not detect the test agent's taste, an acceptable respirator fit has been demonstrated. The 3M Respirator Fit Test Kit can fit test approximately 150 employees with the included supplies.

Kit Includes:

- 55mL Sensitivity Solution
- 55mL Fit Test Solution
- Two nebulizers (FT-13)
- One hood (FT-14)
- One collar assembly (FT-15)
- Two sets replacement nebulizer inserts
- Laminated instruction book (English/Spanish/French/Portuguese)

COVER YOUR COUGH COMPLIANCE KIT

Cover Your Cough (CYC) Compliance Kits hold an assortment of personal protection equipment in a convenient and attractive dispenser. Kit 101 holds two boxes of earloop face masks, one - two boxes of facial tissue, and one hand sanitizer bottle or hand sanitizing wipe canister (consumables not included). The sign holder is vertical and a variety of signs can be downloaded and printed from www.bow320-MANDISPensers.com. Proper and consistent use of the products in this dispenser reduces the chances of spreading infectious bacteria and viruses, such as those found in influenza and the common cold. CYC Compliance Kits are ideal for use in public waiting areas, offices, and lobbies. 18" w x 59" h

Kit 101 includes the following products:

- BOWMAN® Respiratory Hygiene Station (189-RS001-0512)
- BOWMAN® Floor Stand (189-KS010-0412)

STANDARD ANESTHESIA MASKS, PRE-INFLATED

- Medline's Pre-Inflated Anesthesia Masks provide an ergonomic cushion design for an optimal seal.
- Clear cone to visualize patient breathing.
- Removable hook ring for hand-held or head-strap application (hook rings included on sizes 3-6).
- No valve prevents mask deflation.
- Available in all sizes including preemie and small preemie

REUSABLE LARYNGEAL MASK AIRWAYS

- Conforms to the contours of the hypopharynx for exceptional fit, allowing rapid, blind insertion.
- Rigid, yet flexible translucent tube enables you to detect blood, secretions and regurgitated gastric contents.
- Offers easy access for a fiberoptic, suction catheter or tracheal tube.
- Cuff is thick and durable with a smooth matte finish that assures easy insertions with minimal resistance.
- Can be steam autoclaved and reused with confidence up to 40 times.

MCGRATH™ MAC ENHANCED DIRECT LARYNGOSCOPE

Maximize Your Chance for First-Attempt Success

The McGRATH™ MAC enhanced direct laryngoscope (EDL) is a device that combines the benefits of both direct laryngoscopy (DL) and video laryngoscopy (VL).

- DL - familiar technique of a Macintosh direct laryngoscope
- VL - video laryngoscope technology

Now a single — and surprisingly affordable — handheld device helps clinicians be prepared.

A difficult airway doesn't have to be a difficult intubation.

You do your best to avoid airway complications. You know they can be associated with significant patient morbidity and unnecessary expense. But sometimes they occur when you least expect them. With the McGRATH™ MAC video laryngoscope, you can be better prepared for the unexpected.

Combining confidence with simplicity and convenience, it provides:

- Better glottic visualization than traditional Macintosh laryngoscopy
- Reduced intubation times, even with limited training
- Higher intubation success rates than other video laryngoscopes

A FAMILIAR TECHNIQUE — EVOLVED

The McGRATH™ MAC video laryngoscope combines line-of-sight video from its portrait display with the familiar Macintosh technique. So you retain your traditional laryngoscopy skills.

SIMPLE AND VERSATILE

Single-button functionality and minute-by-minute battery indication. One handle with multiple blade options. From pediatric to adult patients and routine to extreme airways.

ONE SYSTEM — ALWAYS AVAILABLE

The McGRATH™ MAC is a cost-effective video laryngoscope — so it's within reach for every intubation. With disposable, sterile blades and flexible cleaning options, it's ready when you are.

MANUAL RESUSCITATOR

- All the best features at a price that fits your budget.
- The bag is textured for an enhanced, non-slip grip, and the premium, soft cushion mask allows for an effective seal on the patient's face.
- Lightweight, translucent bag body and components allow for visualization of vomitus or occlusions in the system.
- The patient port swivels 360 degrees, allowing the clinician freedom to move around the patient without placing excessive torque or stress on the endotracheal tube or mask.
- The body of the bag swivels 360 degrees, allowing for multiple clinician hand positions, helping to reduce clinician fatigue and providing greater patient comfort
- Bright red, universal O2 tubing connector provides easy confirmation that the resu to the flowmeter.
- Pediatric and adult sizes available, with masks.

MEDFIX® DRESSING RETENTION TAPE

- For flexibility and customized sizing.
- Low sensitivity adhesive, gentle for the patient
- Medfix™ has a printed s-c release liner
- Water resistant
- Indications: to secure primary dressings and to secure gastrostomy tubes and other feeding tubes
- Contraindicated as a primary dressing
- May be left in place for up to 7 days
- Dressing change frequency will depend on amount of drainage

320-MSC4002	5cm x 10 Meter	Each
320-MSC4004	10cm x 10 Meter	Each
320-MSC4006	15cm x 10 Meter	Each

MEDFIX® EZ DRESSING RETENTION TAPE

- Low sensitivity adhesive, gentle for the patient
- Medfix™ EZ is linerless with 2" perforations
- Water resistant
- Indications: to secure primary dressings and to secure gastrostomy tubes and other feeding tubes
- Contraindicated as a primary dressing
- May be left in place for up to 7 days
- Dressing change frequency will depend on amount of drainage

320-MSC1585	5cm x 3 Meter	Box/6

MEFIX® TAPE

Mefix tape by Molnlycke can be used in a wide variety of situations where fixation is required, including fixation of dressings, swabs, catheters, and tubes. The porous structure of the non-woven fabric ensures air and water vapor permeability. The fabric is flexible, conforms well to body contours and allows body movements when in place. The fabric is non-absorbent and provides a barrier for blood and fluid strike-through.

173-310250	2.5cm x 10m	Each
173-310500	5cm x 10m	Each

SURESITE 123+ PAD® TRANSPARENT FILM DRESSINGS

- Easy delivery of an all-in-one cover dressing with absorption
- Traditional moisture vapor transmission rate (MVTR)
- Conformable; won't stick to itself
- Microporous technology
- Permits continuous observation
- Indications: partial-thickness wounds, full-thickness wounds (secondary dressing), peripheral and central IV lines, skin tears, lacerations and abrasions and to help prevent skin breakdown caused by friction to epidermis
- Contraindications: contraindicated as a primary dressing on wounds with moderate to heavy drainage

320-MSC2603	6cm x 7cm	Box/100
320-MSC2605	10cm x 12cm	Box/50
320-MSC2610	8.9cm x 25.4cm	Box/25

SUREFILM® TRANSPARENT FILM ROLLS

- Suresite® transparent roll allows for customization of size and shape of transparent film
- Traditional moisture vapor transmission rate (MVTR)
- Conformable; won't stick to itself
- Microporous technology
- Permits continuous observation
- Indications: partial-thickness wounds, full-thickness wounds (secondary dressing), peripheral and central IV lines, skin tears, lacerations and abrasions and to help prevent skin breakdown caused by friction to epidermis
- Contraindications: contraindicated as a primary dressing on wounds with moderate to heavy drainage

320-MSC2402	5cm x 10 meter	Each
320-MSC2404	10cm x 10 meter	Each

MEDLINE **SUREPREP® SKIN PROTECTANT WIPE**

- Sureprep® is a fast drying skin protectant.
- Vapor permeable and delivers protection from friction and incontinence.
- The transparent barrier may be used on periwound, peristomal or areas that come in contact with bodily fluids.
- Frequency of application should be at each dressing change or 24-72 hours depending on frequency of incontinence.

320-MSC1500 Sureprep® Wipes Box/50

MEDLINE **SUREPREP RAPID DRY BARRIER FILM (CAVILON® EQUIVALENT)**

- SurePrep® Rapid Dry barrier film dries within 30 seconds
- Non-stinging, non-cytotoxic
- Provide protection for up to 72 hours
- Alcohol free for enhanced patient comfort
- Transparency allows for continuous visibility when assessing skin
- Extends wear time of dressings by improving adherence
- Use to protect damaged or intact skin from: Moisture Associated Skin Damage (MASD), friction and shear, and adhesive trauma

320-MSC1528 28mL Case/12
 320-MSC1605 Wipes Box/100
 320-MSC1610 1mL Wand Box/100
 320-MSC1613 3mL Wand Box/100

MEDLINE **MARATHON® LIQUID SKIN PROTECTANT**

- Ideal for minor skin repair instead of sutures
- Robust, flexible and long-lasting
- Protects from the effects of friction
- Protects from moisture (urine, exudate, sweat, and other bodily fluids) that can cause maceration
- Can be used on intact or damaged skin
- Fast drying and breathable
- Indications: damaged skin, fragile skin, periwound skin and peristomal skin
- Contraindicated for second or third degree burns, infected areas and directly to the wound bed or to deep puncture wounds.
- Change frequency is up to 3 days, reapply as needed

ACCUWRAP TWO-LAYER COMPRESSION SYSTEM

- Advanced, two-layer compression system provides support and compression to feet and legs, while fitting comfortably under clothing and footwear.
- Layer 1 is a soft absorbent padding
- Layer 2 is a short stretch compression layer that provides adaptive compression. Printed accuracy indicator clearly shows the right level of stretch during application
- Both layers are not made with natural rubber latex and bond together when applied which keeps the system in place
- Educational packaging to aid the caregiver in proper application
- Patient information card included to improve compliance

SURESITE® WINDOW TRANSPARENT FILM DRESSING

- Easy to use window frame delivery
- Traditional moisture vapor transmission rate (MVTR)
- Conformable; won't stick to itself
- Microporous technology
- Permits continuous observation
- Variety of delivery systems
- Indications: partial-thickness wounds, full-thickness wounds (secondary dressing), peripheral and central IV lines, skin tears, lacerations and abrasions and to help prevent skin breakdown caused by friction to epidermis
- Contraindications: contraindicated as a primary dressing on wounds with moderate to heavy drainage

OPTIFOAM® NON-ADHESIVE DRESSINGS

- Exceptional fluid handling with a variety of applications
- Moisture vapor transmission rate (MVTR) adjusts to fluid level
- Highly absorbent, helps create ideal healing environment
- Waterproof outer layer protects wound and keeps bacteria out
- Indications: pressure injuries, partial and full- thickness wounds, leg ulcers, donor sites, lacerations and abrasions, skin tears, and first- and second-degree burns
- Contraindications: third-degree burns and lesions with active vasculitis
- May be left in place for up to 7 days; Dressing change frequency will depend on amount of drainage

320-MSC1244EP 10cm x 10cm Box/10
 320-MSC1266EP..... 15cm x 15cm..... Box/10

OPTIFOAM® ADHESIVE DRESSINGS

- An all-in-one dressing for fluid handling
- Moisture vapor transmission rate (MVTR) adjusts to fluid level
- Highly absorbent
- Helps create ideal healing environment
- Waterproof outer layer protects wound and keeps bacteria out
- Indications: pressure injuries, partial and full-thickness wounds, leg ulcers, donor sites, lacerations and abrasions, skin tears, and first and second-degree burns
- Contraindications: third-degree burns and lesions with active vasculitis
- May be left in place for up to 7 days; Dressing change frequency will depend on amount of drainage

320-MSC1044EP 10cm x 10cm Box/10
 320-MSC1066EP 15cm x 15cm..... Box/10

OPTIFOAM® SACRAL ADHESIVE DRESSINGS

- Optifoam sacrum is highly absorbent.
- Can manage even heavily draining wounds.
- Waterproof outer layer helps keep out bacteria and prevent strike through; resists roll-up for longer wear

320-MSC1065EP 15.5cm x 14.2cm, Sacral Box/10

OPTIFOAM® HEEL WOUND DRESSING

- Optifoam® Heel absorbs moderate to heavy drainage
- Moisture vapor transmission rate (MVTR) adjusts to fluid level
- Highly absorbent
- Helps create ideal healing environment
- Waterproof outer layer protects wound and keeps bacteria out
- Indications: pressure injuries, partial and full- thickness wounds and diabetic foot ulcers
- Contraindications: third-degree burns and lesions with active vasculitis
- May be left in place for up to 7 days; Dressing change frequency will depend on amount of drainage

320-MSC1200EP Heel Shaped Box/5

OPTIFOAM® GENTLE SILICONE FACED NON-BORDER FOAM DRESSINGS

- Silicone dressing provides gentle adhesion
- Silicone face aids in placement
- Soft conformable foam can be cut to size
- Helps create an ideal healing environment
- Low friction and shear outer layer
- Indications: partial and full-thickness wounds
- Contraindications: third-degree burns
- May be left in place for up to 7 days; Dressing change frequency will depend on amount of drainage

320-MSC2244EP	10cm x 10cm	Box/10
320-MSC2266EP	15cm x 15cm	Box/10

OPTIFOAM® GENTLE SA SILICONE FACED FOAM AND BORDER DRESSINGS

- Silicone dressing provides gentle adhesion
- Highly conformable dressing which can be lifted and reapplied
- Moisture vapor transmission rate (MVTR) adjusts to fluid level
- Super absorbent core absorbs exudate, converts it into gel and locks it away
- Helps create an ideal healing environment
- Waterproof outer layer protects the wound and helps keep bacteria out
- Low friction and shear outer layer
- Low profile design increases flexibility and comfort
- Indications: partial and full-thickness wounds
- Contraindications: third-degree burns
- May be left in place for up to 7 days; Dressing change frequency will depend on amount of drainage

320-MSC2133EP	7.5cm x 7.5cm	Box/10
320-MSC2144EP	10cm x 10cm	Box/10
320-MSC2166EP	15cm x 15cm	Box/10
320-MSC2177EP	17.5cm x 17.5cm, Sacral	Box/5

OPTIFOAM® GENTLE SILICONE BORDER FOAM DRESSINGS

- Silicone border provides gentle adhesion
- Highly conformable border can be lifted and reapplied
- Moisture vapor transmission rate (MVTR) adjusts to fluid level
- Helps create ideal healing environment
- Waterproof outer layer protects wound and helps keep bacteria out
- Low friction and shear outer layer
- Indications: partial and full-thickness wounds with drainage
- Contraindications: third-degree burns and lesions with active vasculitis

320-MSC2033EP	7.5cm x 7.5cm	Box/10
320-MSC2044EP	10cm x 10cm	Box/10
320-MSC2066EP	15cm x 15cm	Box/10

320-MSC20109EP	25.4cm x 22.9cm, Sacral	Box/5

MEZOLINE **OPTIFOAM® GENTLE LITE, BORDERED**

- Silicone dressing provides gentle adherence
- Waterproof outer layer protects the wound and helps keep bacteria out
- Low friction and shear outer layer
- Low-profile design for easy conformability in tough-to-dress areas
- Flexible design for enhanced patient experience
- Indications: partial and full-thickness wounds with minimal drainage
- Contraindications: third-degree burns
- May be left in place for up to seven days; dressing change frequency will depend on amount of drainage

320-MSC28162B	4cm x 5cm	Box/10
320-MSC2833B	7.5cm x 7.5cm	Box/10
320-MSC2844B	10cm x 10cm	Box/10
320-MSC2866B	15cm x 15cm	Box/10

MEZOLINE **OPTIFOAM® GENTLE LITE, NO BORDER**

- Silicone dressing provides gentle adherence
- Waterproof outer layer protects the wound and helps keep bacteria out
- Low friction and shear outer layer
- Low-profile design for easy conformability in tough-to-dress areas
- Flexible design for enhanced patient experience
- Indications: partial and full-thickness wounds with minimal drainage
- Contraindications: third-degree burns
- May be left in place for up to seven days; dressing change frequency will depend on amount of drainage

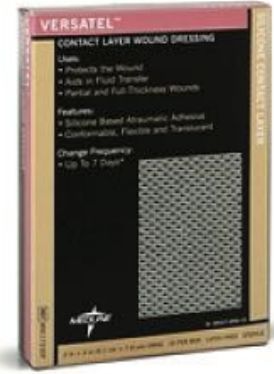

320-MSC2944NB	10cm x 10cm	Box/10
320-MSC2966NB	15cm x 15cm	Box/10

VERSATEL® SILICONE CONTACT LAYER

- Silicone-based atraumatic adhesive
- Flexible and pliable design to conform to body
- Reduces potential trauma from secondary dressing wound adherence
- Minimizes pain during removal
- Channels allow fluid to easily transfer to an absorbent dressing
- Translucent for easy wound visualization
- Can remain in place up to seven days, depending on the level of exudate
- Indications: Dry to heavily draining abrasions, chronic wounds such as venous or pressure injuries, burns (1st and 2nd degree), blisters, cuts and lacerations, surgical and trauma wounds
- Contraindications: Third-degree burns, individuals with known sensitivity to silicone, not for surgical implantation

320-MSC1723EP	5cm x 7.5cm	Box/10
320-MSC1734EP	7.5cm x 10cm	Box/10
320-MSC1747EP	10cm x 17.5cm	Box/10
320-MSC17812EP	20cm x 30cm	Box/5

VERSATEL ONE® SILICONE CONTACT LAYER DRESSING

- One-sided contact layer dressing coated with silicone
- Allows easy application by preventing gloves and scissors from sticking to the dressing
- Adheres gently to skin but won't stick to moist wound beds, helping prevent pain during removal
- Channels allow exudate to transfer vertically into a secondary dressing¹ and aid delivery of topical treatments
- Thin and flexible dressings conform to body contours for a comfortable yet secure seal that minimizes periwound maceration
- Indications: Dry to heavily draining abrasions, chronic wounds such as venous or pressure injuries, burns (1st and 2nd degree), blisters, cuts and lacerations, surgical and trauma wounds
- Contraindications: Third-degree burns, individuals with known sensitivity to silicone, not for surgical implantation

320-MSC1823EP	5cm x 7.5cm	Box/10
320-MSC1834EP	7.5cm x 10cm	Box/10
320-MSC1845EP	10cm x 12.5cm	Box/10
320-MSC1847EP	10cm x 17.5cm	Box/10
320-MSC18812EP	20cm x 30cm	Box/5

THERAHONEY®

- TheraHoney® is indicated for use on wounds with no drainage to moderate drainage
- Manuka honey is derived from the pollen and nectar of the *Leptospermum scoparium* plant in New Zealand
- The honey comb is used only one time, and once harvested, the honey is carefully filtered, irradiated and tested in a laboratory
- High sugar levels (87%) in TheraHoney result in osmotic pressure that help promote autolytic debridement of necrotic tissue, a moist wound healing environment, and helps rapidly reduce wound odor

FOCUS ON COMPLIANCE: REPROCESSING OF REUSABLE MEDICAL DEVICES

INTRODUCTION

Following established protocols and requirements established by standards such as PIDAC and CSA (i.e. best practices for instrument reprocessing) is an important aspect of modern health care as it helps to minimize the patient's risk of infection. Key elements of a reprocessing program are outlined with the intention of providing recommended steps and focus products available in this catalogue to help facilities meet these requirements.

1: CLEANING

The first and most crucial step in instrument reprocessing is cleaning. Improper cleaning can impede the sterilization process. Manual cleaning the instrument in enzymatic solution bath for at least 3-5 minutes will soften and loosen the soil that may have dried on the instrument between the time it was used and the time cleaning has started. A good quality enzyme detergent (Valsure Enzymatic 1C5208) is preferred as they help to break up organic soil more readily as well as protect your devices from the harmful effects of poor water quality.

2: CLEANING VERIFICATION

It is well known that you can sterilize what is not cleaned. Cleaning verification within standards (CSA Z314.8) are becoming more prevalent as part of good practice recommendations. These tests should be performed on a routine basis with documented results. For automated washers and ultrasonic cleaners, All Clean and Verify Ultrasonic Indicators can be used to verify the system performance. Verify All Clean monitors the effects of time, temperature, impingement and chemistry within an automated wash cycle and Verify Ultrasonic Indicators monitor the cavitation.

3: HIGH LEVEL DISINFECTION

Medical devices classified as Semi-Critical according to the Spaulding classification must minimally be disinfected chemically by high-level disinfection. Semi-Critical devices contact, but do not penetrate mucous membranes and sterile areas of the body. Examples of these devices may be flexible endoscopes or ultrasonic probes used in diagnostic imaging. Revital-Ox Resert can be used to achieve high level disinfection following precleaning and following the manufacturer's instruction for use. Resert is an aldehyde free product which is more desirable for patient and user safety.

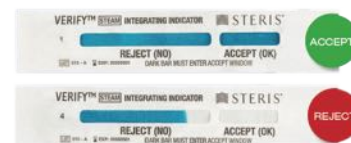

4: STERILIZATION MONITORING

Sterility assurance of processed instruments should be routinely verified using three (3) types of indicators; physical, chemical, and biological.

Chemical Indicators

Chemical indicators should be used in every pack. Type 5 and Type 6 Chemical indicators (CIs) are the indicators of choice for a quality sterility assurance program. These indicators provide change color or show movement during the sterilizer cycle to verify that all sterilization parameters have been met for that specific cycle.

Biological Indicators

Biological Indicator (BI) monitoring is a requirement for sterility assurance as BI's contain bacterial spores that test the lethality of sterilizers. This is performed every day that the sterilizer is operational and for each load containing an implant. Incubation times range from 24 hours down to as little as 40 minutes for routine monitoring.

Ritter® M9D AUTOMATIC STERILIZER

The M9D UltraClave® Automatic sterilizer with manual door is a fast, user-friendly and reliable machine that ranks higher in customer satisfaction than other similar units on the market. Features include: · Load it, Set it, Forget it · LCD Display

· Pre-Programmed controls for different cycle parameters

550-M9D-042 M9D Sterilizer	Each
550-9A599001 Printer for M9D	Each

Ritter® M9 AUTOMATIC STERILIZER

The M9 autoclave couldn't be easier and is time tested for reliability. You simply load it...set it...and forget it. Select your cycle and the time is set for you. Press "Start" and the M9 fills with the correct amount of water. Once the sterilization process is complete, the door opens automatically and quietly to dissipate the steam, giving you fast drying time for your instruments.

- Exclusive automatic-opening door for ease of use and a quick drying time
- Steam-Flush Pressure Pulse Air Removal System ensures proper steam penetration
- Self Program Controls enable you to create different cycle parameters to meet specific instrument processing needs
- Pouch rack included with unit
- LCD Display for easy view of indicators
- Optional thermal printer for documentation

Ritter® M11 AUTOMATIC STERILIZER

With the emergence of many aggressive, infectious organisms, there is an ever-increasing need for efficient, effective instrument processing in your practice. The M11 is the largest member of the Ritter family of autoclaves. Its unique 11" x 18" chamber gives it the distinction of having the largest sterilizing capacity of any standard countertop sterilizer on the market, making it perfect for larger packs and instruments. Features include:

- Exclusive automatic opening door for ease of use and a quick drying time
- Large 11" by 18" chamber for increased capacity
- Pouch rack included with unit
- Steam-Flush Pressure Pulse Air Removal System ensures proper steam penetration
- Self Program Controls enable you to create different cycle parameters to meet specific instrument processing needs
- LCD Display for easy view of indicators
- Optional thermal printer for documentation

SMART READER DATA LOGGER

Saving you time & money while providing patient safety.

Our Data Logger offers a precise detailed report for every cycle. What truly makes this device stand out is that it saves an electronic copy directly to an SD Card. Follows health regulations by logging specific date and time, and all other data points for every steam cycle.

- Easy time zone setting
- All digital - no printer needed
- You can choose to print reports at your convenience · Easy installation
- Easy storage solution
- No maintenance or extra costs
- Manufactured in Canada

Tuttnauer 1730E, 2340E, 2540E, 3850E, 3870E, EZ9 and EZ10

Versions Available

Regular SD

Saves all data on the SD card. Cycles can be viewed and printed from the SD cards.

Wireless

Multi unit wireless connection with up to 36 units on one computer. On a separate Wi-Fi network. View all logs in the internet browser. (Windows MacOs, Android and iOS)

Wi-Fi

Our Wi-Fi version and Cloud Service are a convenient way to save and store all data on the installed SD card and in the cloud backup. Use the mobile app to access your files.

Smart Reader App is available for iPhones, iPads and Android devices.

Tuttnauer VALUEKLAVE® STERILIZER

The Valueklave 1730 will satisfy all of your basic sterilization needs at an economical price. The compact size (7" chamber) makes it a perfect primary unit for small offices or a second autoclave for larger practices. The fast cycle time and heated drying delivers a quick turnaround for wrapped or unwrapped instruments. The simple controls and easy closing door make this unit a breeze to operate. High speed and reliability are built into every Valueklave 1730.

Tuttnauer EZ11PLUS™ SERIES FULLY AUTOMATIC STERILIZERS

EZPlus is easy to operate with 4 FDA cleared sterilization programs. Additionally there are 2 customizable sterilization programs, A and B**. A convenient Chamber Brite cleaning program simplifies maintenance when utilizing Chamber Brite powdered autoclave cleaner.

EZGlide self locking door - Ergonomically friendly EZGlide door features effortless opening and closing with an automatic double safety locking mechanism. Glide the door closed with a gentle push to close and lock it.

EZFill front water filling - Accessible front or top water filling options

EZView multi-color display - For easy reading, even from a distance

Capacity - Available in 9" and 11" chamber sizes

Network port (rear located) For connection to a local network to provide remote monitoring of the system

Closed door drying - Door remains closed through the entire dry cycle to maintain sterility and ensure efficient drying. High efficiency air pump circulates filtered air through the chamber for fast drying. 0.2µm HEPA air filter (replaceable).

Dynamic air removal technology - Effectively removes air from the chamber

Standards and directives - Designed to meet the most current sterilization standards ANSI/AAMI ST55

Chamber Dimensions - Ø x L in (mm) 11"x19.8" (280x504)

Volume - 7.5gal 28.5L

Overall Dimensions* - DxWxH in (mm) 24.8"x20.9"x17.3"* (630x530x440)

Standard Cassette Capacity - 4 Full & 4 Half** (loaded vertically)

Tray Dimensions - DxWxH in (mm) 16.3"x6.7"x0.6" (413x169x16)

No. of Trays - 5

QUICKCLEAN™ ULTRASONIC CLEANERS **THE CRITICAL FIRST STEP**

Providing powerful, effective cleaning and consistent results, the QuickClean Ultrasonic Cleaner eliminates hidden residues manual cleaning may miss. If an instrument is not clean, it will not become sterile. The QuickClean's advanced technology can help you create a safer, more efficient work environment by decreasing worker exposure to contaminants and potential sharps injuries while reducing the time and effort needed for cleaning.

Choose the option that best fits your space configuration and workflow needs. QuickClean comes in three tabletop sizes (1.2-, 3.3- and 6.6-gallon)

QuickClean Model:	QC1-01	QC3-01	QC6-01
Capacity	1.2 Gal / 4.5 L	3.3 Gal / 12.5 L	6.6 Gal / 25 L
Size of Unit	13.5" L x 10.2" W x 10.4" H (34.5 x 20 x 26.5 cm)	14.7" L x 16.5" W x 10.4" H (37.5 x 42 x 26.5 cm)	21.6" L x 16.5" W x 14.3" L (55 x 42 x 36.5 cm)
Size of Tank	11.8" L x 5.9" W x 5.9" H (30 x 15 x 15 cm)	13" L x 11.8" W x 5.9" H (33 x 30 x 15 cm)	19.9" L x 11.8" W x 7.9" H (50.5 x 30 x 20 cm)
Limited Warranty	3 Years	3 Years	3 Years
Average Sound Level (with lid on)	68dB	61dB	69dB

STERIS® AUTOCLAVE TAPE

STERIS Steam Tape® is a self-adhering tape printed along its length with diagonal stripes of chemical indicator ink. The tape surface can be written on with indelible ink without smearing or bleeding. In addition to securing wraps, the chemical indicator lines show a strong, sharp color change after processing.

STERIS® VERIFY® DUAL SPECIES SCBI BIOLOGICAL INDICATORS

VERIFY™ Dual Species Self-Contained Biological Indicators (SCBIs) are for use in monitoring steam sterilization and ethylene oxide (EO) sterilization processes. Each SCBI is completely self contained within a vial and contains a disc inoculated with dual species bacterial spores (*Geobacillus stearothermophilus* and *Bacillus atrophaeus*) and an ampoule of specially formulated soybean casein digest growth medium with a pH indicator. The vial label contains a process indicator for steam and EO.

- 24-hour final results for steam sterilization
- 48-hour final results for EO sterilization
- Sturdy design prevents premature activation
- For routine monitoring, qualification and release of loads containing implantable devices.

3M CLEAN-TRACE™ ATP MONITORING SYSTEM

The 3M™ Clean-Trace™ ATP Monitoring System helps ensure each and every endoscope passes the clean test. Using the Clean-Trace™ Monitoring System, you receive a clear pass/fail verification for the presence of any clinical soil. The 3M™ Clean-Trace™ Luminometer LX25's updated ergonomic design and colour touchscreen make it simple to use, and wireless transfer of data to the 3M Quality Control Data Manager make this an easy and accurate way to help you comply with the latest cleaning monitoring practices.

355-1243B Chemical integrators Pkg/100

3M ATTEST™ RAPID READOUT BIOLOGICAL INDICATORS

- Faster result time, making it possible to quarantine every load.
- Eliminate recalls when every load is monitored and quarantined until the biological indicator delivers a negative result.
- Make decisions and take appropriate action, reducing the risks and costs resulting from infections.
- Detect sterilization process failures at a much earlier stage.
- Detect malfunctioning equipment sooner. Use to validate repairs more quickly and put your sterilizer back into service sooner.

COOL RENEWAL® CRYOSURGERY SOLUTION KITS

“Providing a Low Cost, High Value Cryosurgical Solution to Physicians and Veterinarians around the World”

Cool Renewal™ is a convenient and cost effective alternative to traditional liquid nitrogen methods and equipment, as well as other expensive portable cryosurgery systems.

Product Advantages:

- Increased Office Revenue
- Extremely Low Cost per Treatment
- Less than 2 Minute Procedure
- Minimal Patient Discomfort, Self-Anesthetizing
- No Expiration or Evaporation
- Treat 21 Types of Skin Lesions
- Portable, Great For Satellite or Mobile Clinics
- Unique Disposable Applicators
- Freezes to -70°C, Reducing the Chance of Scarring
- Simple, Yet Flexible Purchasing Options

COMPLETE KITS

Kit Includes:

- (1 or 2) 170mL Canisters of Cryogen - 65 Freezes
- (1 or 2) Extender Tubes - Assorted Pack of 60 Disposable, Double Ended Foam Tipped Applicators (20 ea, Small, Medium, Large/XL)
- Assorted Pack of 50 Disposable Plastic Isolation Funnels (10 ea- 5mm, 8mm, 12mm, 14mm, 16mm)

BRYMILL® CRYOGENIC SYSTEMS

As the leader in liquid nitrogen technology for cryosurgery, Brymill's Cry-Ac® and Cry-Ac-3® hand-held sprayer devices are the first choice of dermatologists worldwide and set the industry standard in safety, versatility and control. Available in 500ml and 300ml capacities, these handheld liquid nitrogen delivery system units are superior in quality, reliability and durability and perfect for accurate, measured and controlled treatment of smaller common tissue lesions.

Each unit comes with four spray tips with apertures of various sizes (.04 - .016 inches) plus a 20-gauge straight spray and 20-gauge bent spray for more accurate, controlled treatments. The streamlined relief valve maintains constant operating pressure for consistent, accurate freezing as the fingertip trigger provides maximum control and easy viewing which rotates for left-handed users. With a patented Safety Autovent feature that enhances safety by gradually venting internal pressure as the cap is unscrewed, along with a stainless steel and brass construction for durability and a polypropylene base for stability and insulation, the Brymill Cryosurgery units are also backed by an industry best, three-year warranty and a comprehensive service and repair program.

- E30-CRY-AC-B-700 500mL with 4 tips & 2 Sprays Each
- E30-CRY-AC3-B-800 300mL with 4 tips & 2 Sprays Each

CANTHARONE® WART TREATMENT SOLUTIONS

cp medical SUTURES

CP Medical offers absorbable and non-absorbable suture products for the medical market, including the popular Visorb® and Visorb Quick® braided, synthetic absorbable suture, and Polypro® polypropylene monofilament. CP's product portfolio includes synthetic and natural fibers. CP Medical's comprehensive line of sutures are constructed with high quality materials that meet or exceed USP standards. The sutures are available in a broad range of absorbable and non-absorbable suture types and sizes to address the majority of surgical needs.

SKIN AFFIX™ TOPICAL SKIN ADHESIVE

- Skin Affix™ is a sterile, high viscosity liquid topical skin adhesive used to close simple lacerations, wounds and minimally invasive surgical procedures.
- It is comprised of a proprietary 2 octyl- cyanoacrylate which polymerizes within minutes for secure and strong wound closure.
- Skin Affix can replace sutures that are 5-0 or smaller in diameter for minimally invasive surgical incisions or simple trauma lacerations.

Baxter SUPRANE® DESFLURANE

- Suprane's pharmacokinetic properties enable precise Control, rapid and predictable recovery
- Ideal agent for short or long procedures, same day surgery clinics and low flow machines
- Better suited for obese patients, elderly patients, Neuro Surgery

533-CA2L9102ALU... 240 mL Each

Baxter FORANE® ISOFLURANE

- Lowest acquisition cost
- Can use at low inflow rates
- For use where a slower awakening is desired and for prolonged procedures where fast recovery is not required

533-CA2L9100 100 mL Each

Baxter SEVOFLURANE® INHALATION ANESTHETIC

Sevoflurane is indicated for induction and maintenance of general anesthesia in adult and pediatric patients for surgery.

- Supplied in virtually unbreakable 100% aluminum bottles
- Compatible with various sevoflurane vaporizers and filling systems

533-CA2L9117 250mL Each

NASAL CANNULAS WITH 7' OXYGEN TUBING & CO2 SAMPLING LINE

- These cannulas provide simultaneous CO2 monitoring and oxygen delivery to both nasal passages
- CO2 sampling is collected through nasal prongs for accurate monitoring
- Oxygen delivered through lower ports, just below the nasal prongs
- Oxygen tubing fitted with universal O2 connector
- All cannulas include 22mm/6mm O2 adapter

320-HCS4568 Adult Box/25

320-HCS4562 Pediatric Box/25

EDAN IM60 PATIENT MONITOR

For Sub-Acute Monitoring with G2 CO2 Sidestream, 3-Lead ECG, SP02, NIBP & Printer

- 10.4" Screen
- 2 Year Warranty
- Includes Adult Cuff

ADVANCED DEHUMIDIFICATION TECHNOLOGY

EDAN's G2 CO2 is designed as a sidestream CO2 with advance technology of Dehumidification cup. This design is most widely accepted and utilized in Capnography monitoring. CUP blocks the water with hydrophobic elements and guides it into a reservoir.

MEDFUSION® 3500 SYRINGE INFUSION PUMP

The Medfusion® syringe pump safety system has been the leader in infusion pump technology for over 15 years. Innovations in syringe recognition, drug libraries and PharmGuard® Medication Safety Software with programmable safety limits make it easier to improve safety for you and your patients. The unique, easy-to-use, and easy-to-learn design of the Medfusion® 3500 Syringe Pump with PharmGuard® Medication Safety Software gives you the ability to customize the platform to your institution's practices. In other words, it adapts to the way you work, not the other way around. For safety and exceptional value, the Medfusion® 3500 Syringe Pump is the best solution for today's busy healthcare environments.

EMLA® CREAM

Emla cream is a local anesthetic (numbing medication) containing lidocaine and prilocaine. It works by blocking nerve signals in your body. Emla cream is used to numb normal intact skin or the membrane surfaces of the penis or vagina. Emla is used to prepare you for minor surgery or medical procedures.

318-163568 30 gram tube (no dressing) Each
 318-174276 5 gram tube with dressing Each

MINIMS® TETRACAINE HYDROCHLORIDE DROPS

Ocular anaesthetic for topical instillation into the conjunctival sac. Each Minims unit is a sealed conical shaped polypropylene container fitted with a twist and pull off cap. Overwrapped in an individual polypropylene/paper pouch. Each container holds approximately 0.5ml, single-use, clear, colourless, sterile eye drops tetracaine hydrochloride solution.

Tetracaine hydrochloride is used as a local anaesthetic which acts by reversibly blocking the propagation and conduction of nerve impulses along nerve axons. Tetracaine stabilises the nerve membrane, preventing the increase in sodium permeability necessary for the production of an action potential. Used for numbing the eye to allow certain procedures to be performed without causing pain.

226-OC90805 0.5% Pkg/20
 226-OC-90810 1% Pkg/20

MINIMS® FLOURESCENT SODIUM DROPS

Minims fluorescein are single-use preservative-free eye drops that contain the active ingredient fluorescein. This is a chemical dye that is used to help locate and identify damage to the surface of the eye.

Useful for:

- Detecting damage on the surface of the eye, such as abrasions or ulcers
- Detecting foreign bodies in the eye.
- Helping an eye specialist to fit hard contact lenses.
- These eye drops may also be used during tests to measure the pressure inside the eyeball (Goldmann tonometry)

ave SCRUB TOPS & PANTS

Moves

Take the fast lane to fashion-forward lines that look nothing like the shapeless scrubs from the good old days. Let ave take you to the right style for the real world you work in. Every ave line is made to look, fit and move like high-end apparel. Each starts with limber, comfortable 4-way stretch fabric lays beautifully, moves gracefully, and stays looking great. From the overnight shift to the bright light of day, there's no better way to work than in ave medical wear. The apparel that simply looks too good to be called scrubs.

Performs

In healthcare, you need apparel that works with you. Not just the way it fits and moves, but the way your clothes actually help you do your job. Beautifully integrated into every ave piece are the features that help you get through your day effortlessly. Let your apparel reflect the fresh, up-to-the-minute approach you take to your job as a healthcare professional. Choose the ave style that fits how you work, how you live, and how you move through each and every day.

Works

ave scrubs hang smoothly right out of the dryer and resist wrinkles through even your longest shifts.

- Are made with our fantastic 4-way stretch fabric that looks and feels great and moves gracefully.
- Great colors that last wash after wash.
- Resists wrinkles
- Are made with 72% polyester/ 23% rayon/ 5% spandex.

ave MELROSE LADIES SCRUB PANTS

- Unisex melrose ave scrub pants have a trim, flattering look that may be the closest thing to wearing your favorite jeans to work.
- Drawstring with elastic back · Jeans-style back pockets
