Plantronics – Accessories for corded headset

137157	202578-01	PLANTRONICS APU-72	If you connect a handset lifter to your desk phone you can answer calls with the touch of a button. This means that you can take a call even if you are not physically sitting at the desk. A handset lifter can be either a handset lifter (HL10) or an electronic lift (EHS) . The phone model determines the version.
--------	-----------	--------------------	--

*An EHS cable is required between the desk phone and headset if you want to be able to answer and end calls away from your deck.
