NEW RANGE

NEWS: HOOK

Added high resistance metal hook, to facilitate storage and work speed.

NEWS: BUTTON

New button with greater contact surface and of comfortable and easy action.

NEWS: HANDLE

Completely redesigned handle, to guarantee the maximum ergonomics and comfort in the welding.

The best welding at your fingertips
TESLA

NEWS: BALL JOINT

New oversized ball joint design, greater rotation angle and mobility without bottlenecks.

Gas Cooled

180 Amp 60% CO₂
164 Amp 60% Ar + CO₂

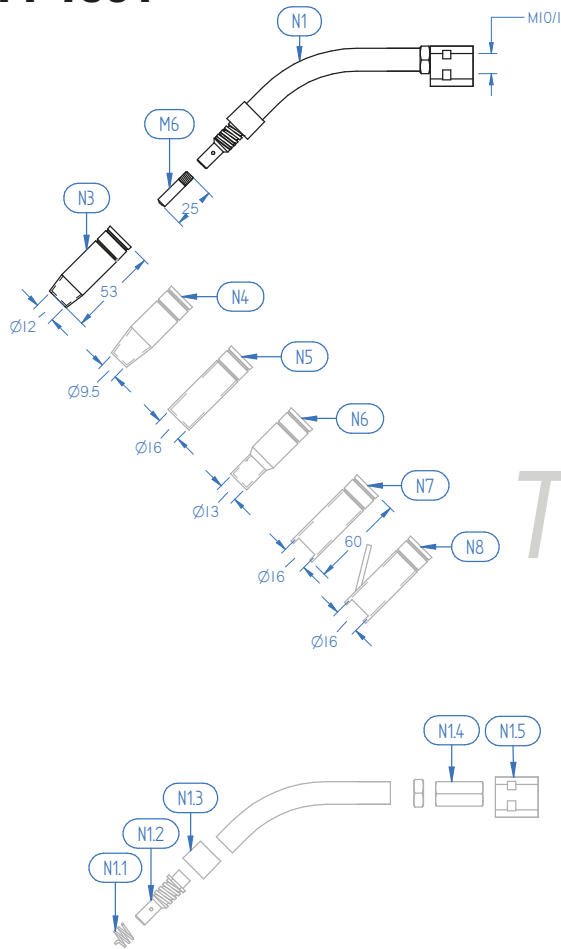

Gas cooled torch with standard spare parts, reduced power model, very light and easy to handle.

Ideal for small reparations and general use. Perfect for 0,8 mm wire and small pieces.

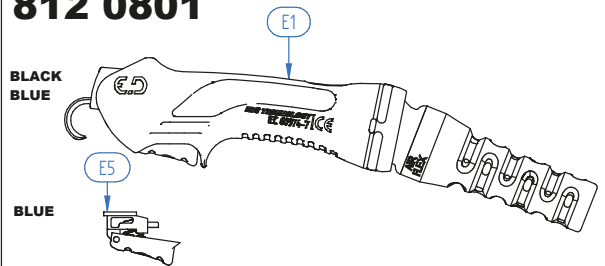

Small diameter nozzle for difficult access welding.

T25
Gas Cooled

230 Amp 60% CO₂
209 Amp 60% Ar + CO₂

Gas cooled torch with standard spare parts, medium amperage model. The most versatile with this type of spare parts!

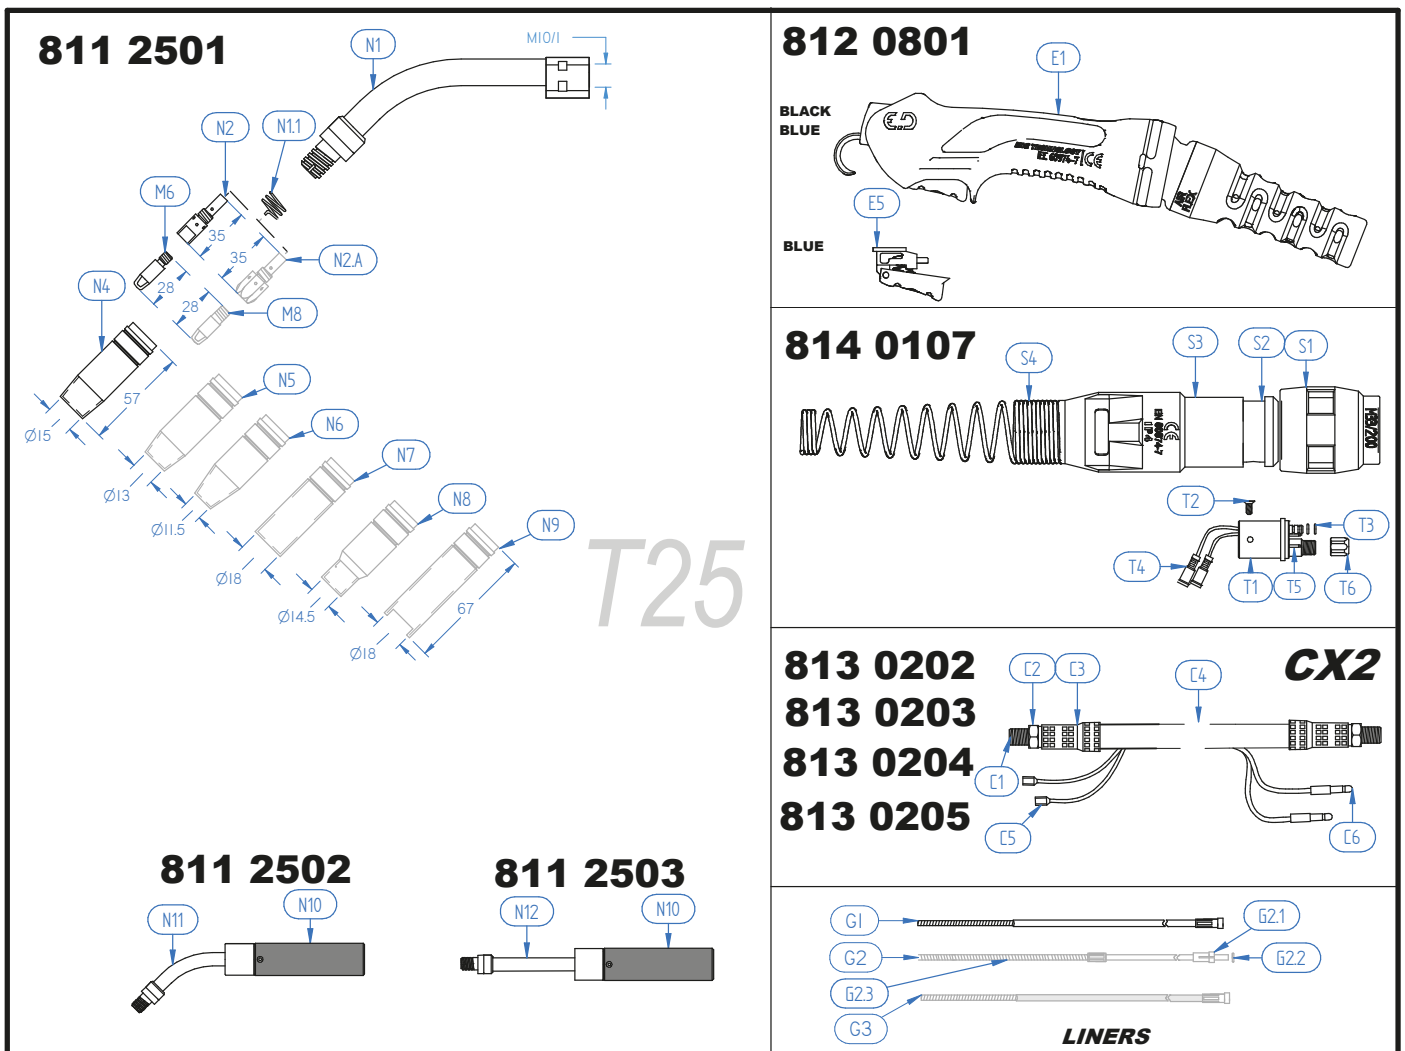

Medium power for general use. Perfect for 0,8 and 1,0 mm wire, thin thickness, plucking of pieces and small seams.

Medium sized diameter nozzle, with multiple diameters of gas output.

SPARE PARTS KIT

250 Amp 60% CO₂
228 Amp 60% Ar + CO₂

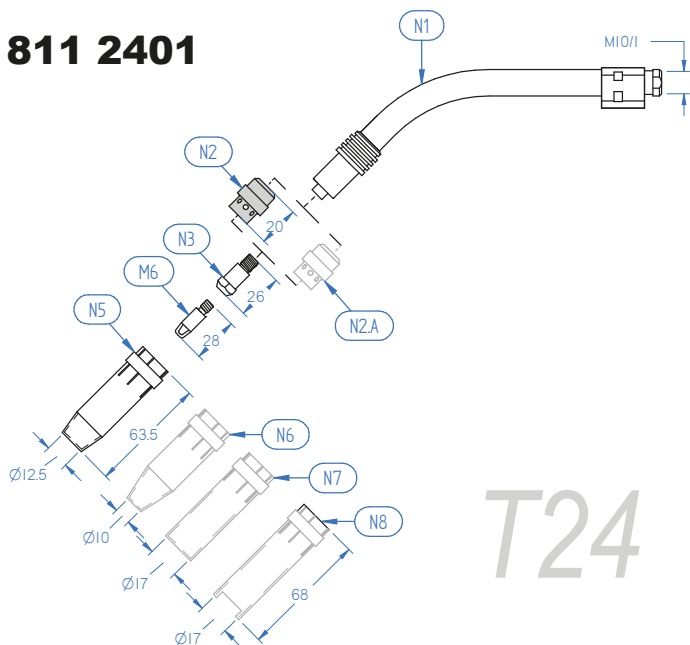

Gas cooled torch with standard spare parts, medium intensity model with low weight and high power.

Medium amperage for general use. Perfect for 0,8 and 1,0 mm wire, thin-medium thicknesses, plucking of pieces and small seams.

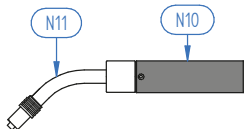

Reduced diameter nozzle, increases its polyvalence and access, maintaining all its power.

Gas Cooled

340 Amp 60% CO₂
309 Amp 60% Ar + CO₂

The highest power air cooled standard torch.

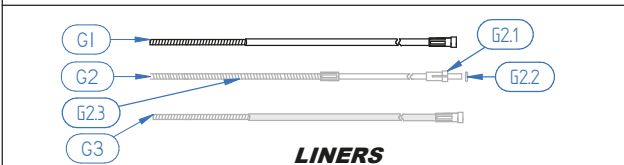

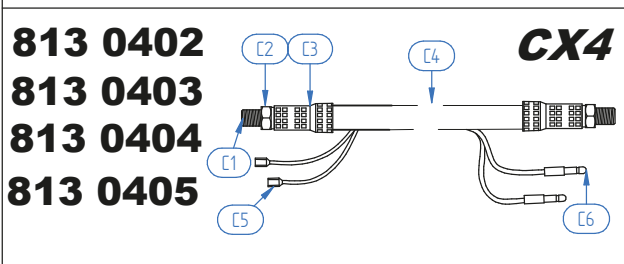

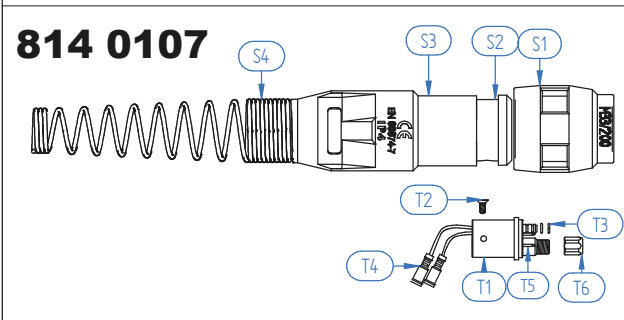

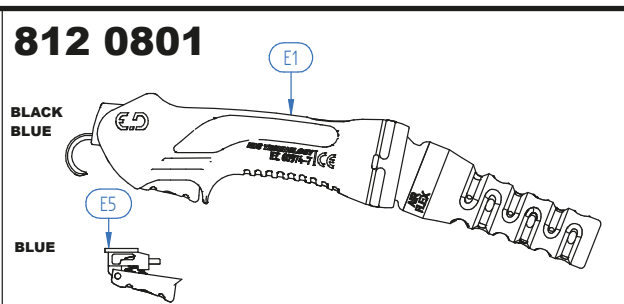

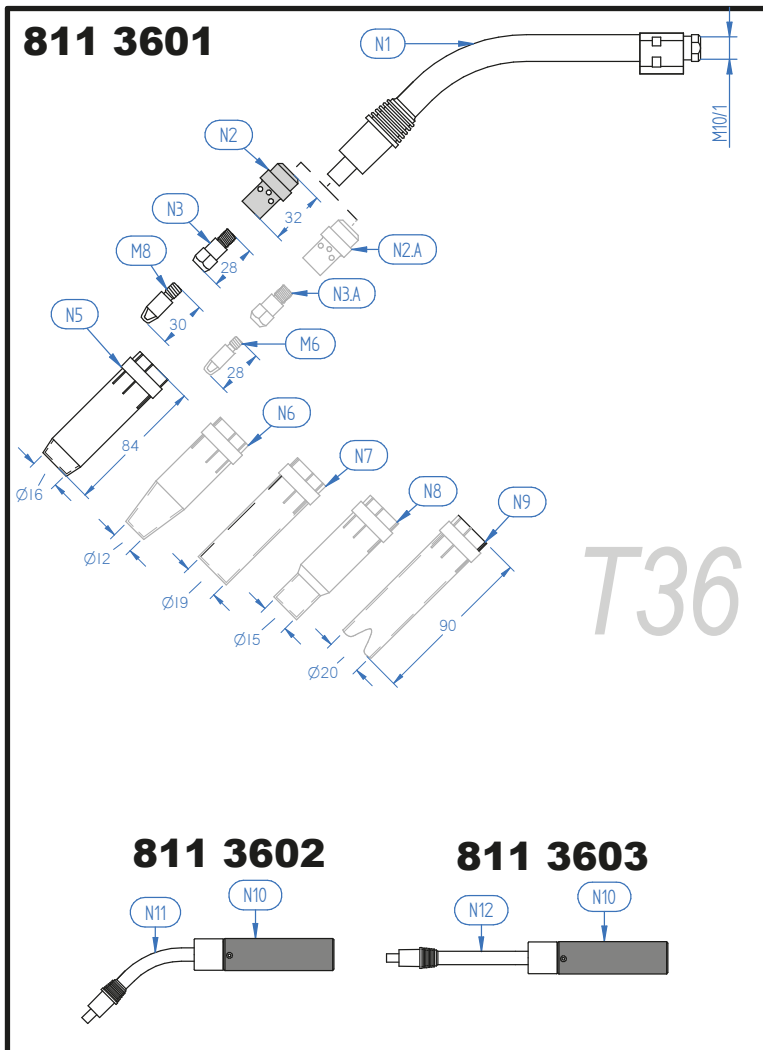

Medium amperage for semiprofessional use. Perfect for 1,0 and 1,2 mm wire, plucking of pieces and medium-high thicknesses welding.

50 mm². section cable, 30% more than the actual standards. Thick nozzle. Multiple possibilities of gas outlet diameters.

T 240w

Liquid Cooled

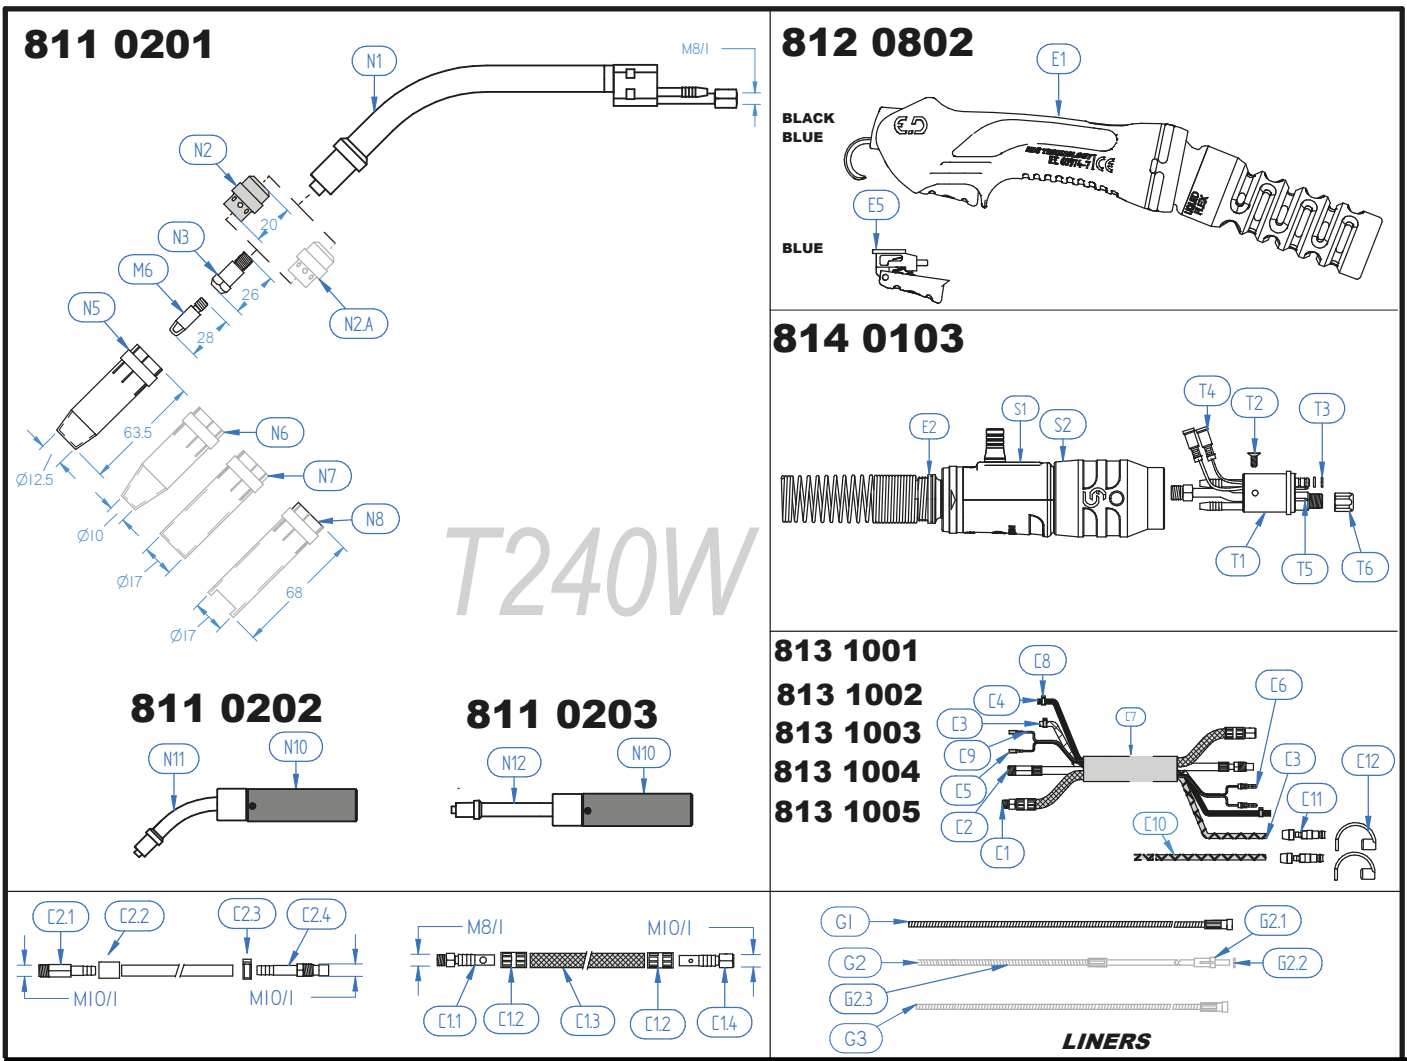

300 Amp 100% CO₂
273 Amp 100% Ar + CO₂

Liquid cooled standard torch. Light, small and polyvalent. Extra power regarding the TS-24

Medium amperage for semiprofessional use. Perfect for 1,0 and 1,2 mm wire and complicated pieces, thanks to its easy management.

Small diameter nozzle, allows a big access range, with a magnificent relation power-weight.

Liquid Cooled

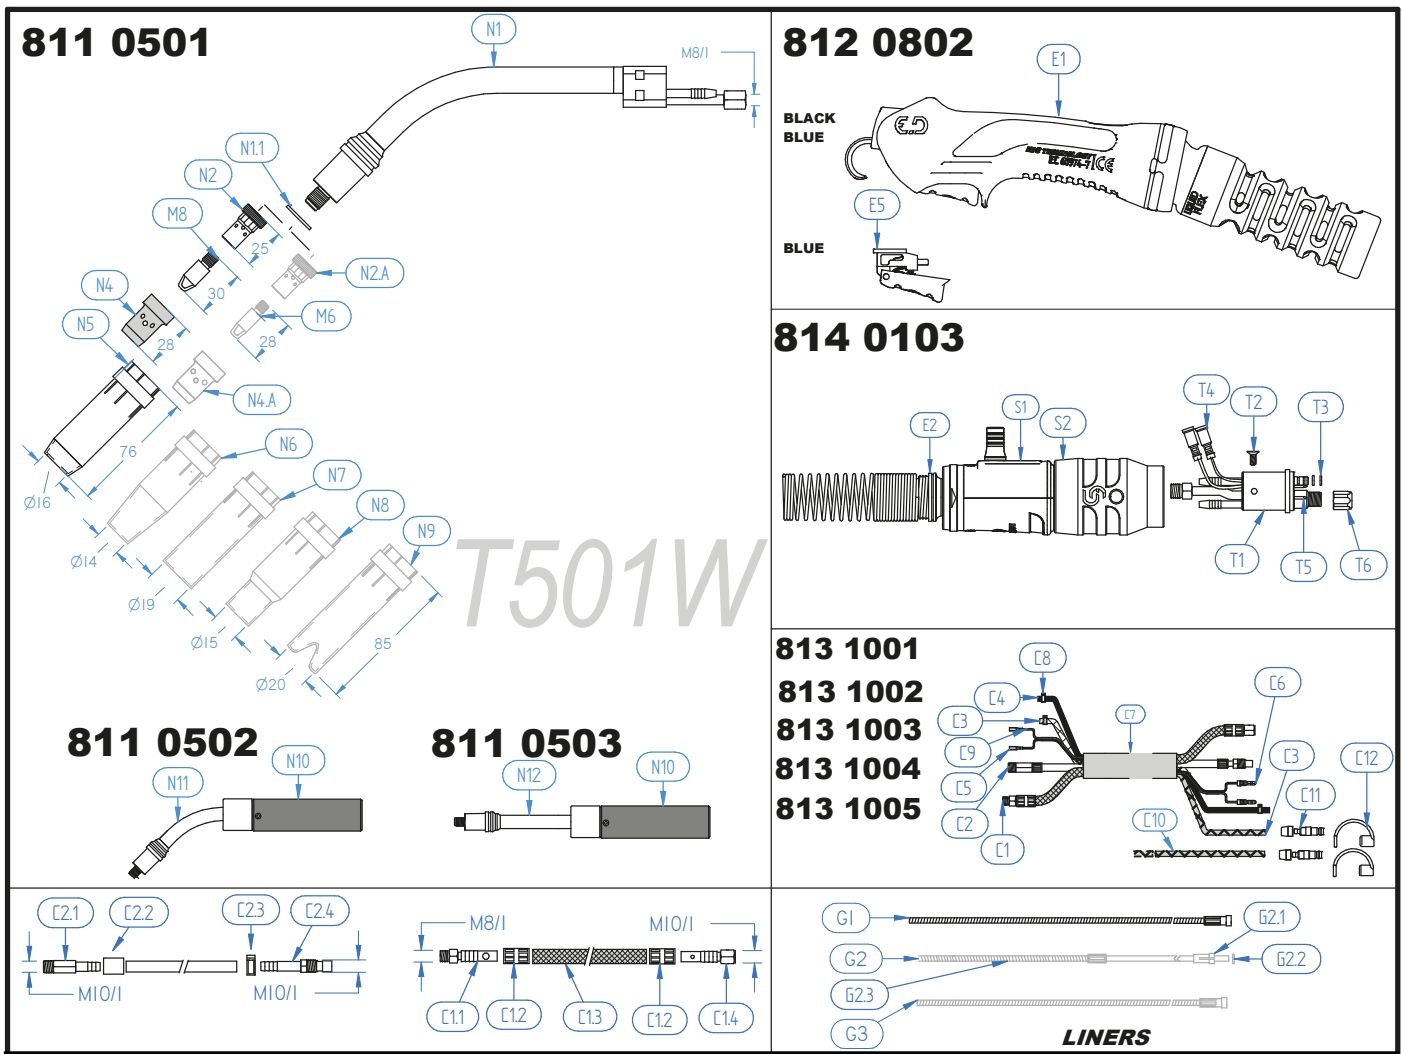

500 Amp 100% CO₂
455 Amp 100% Ar + CO₂

The most powerful, lightweight and polyvalent liquid cooled universal torch. Exceptional quality and finishes.

High amperage for professional welding. Perfect for 1,2 and 1,6 mm wire and pieces with big thicknesses where power is required.

Own neck manufacture and water stream cable. Oversized thickness nozzle.

SPARE PARTS KIT

The kit includes all the needed spare parts for the torch T36.

It consists of nozzles (x2), contact tubes (x10), tube support (x5) and diffusers (x5).

There are kits for a wide range of torches (see page MIG 19).

TX 270

Gas Cooled

250 Amp 60% CO₂
 225 Amp 60% Ar + CO₂

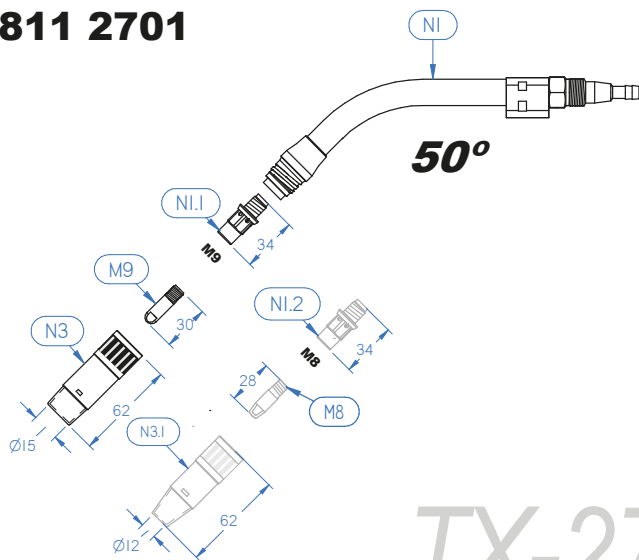

Torch developed for multi-purpose, medium intensity. Ideal for aluminum welding.

Torch designed for the professional welding industry and all spare parts are developed to be long-lasting.

The main features are the nozzles and over-sized M9 contact tips, and special insulation to withstand the high welding temperatures thus increasing the duration of the gun.

TX 380

Gas Cooled

350 Amp 60% CO₂
270 Amp 60% Ar + CO₂

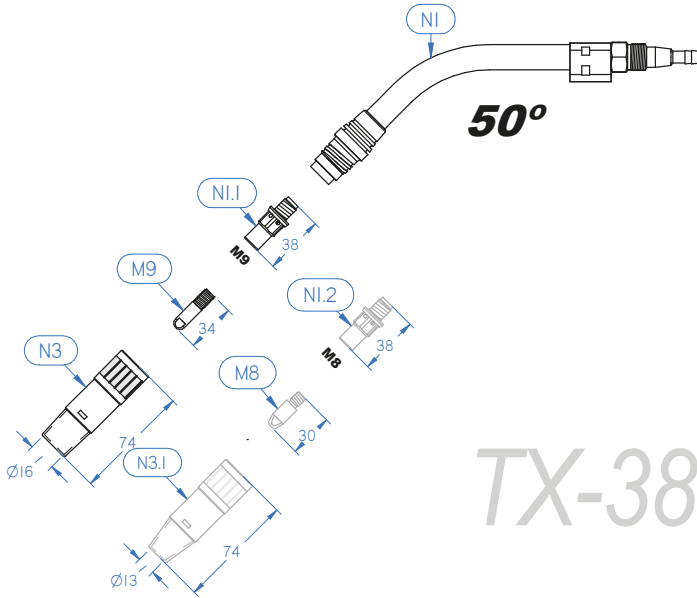

Torch developed for medium to high intensity, gas cooled welding. Surpasses the universal torches in amperage and welding cycle duration.

The most versatile torch in the professional range.

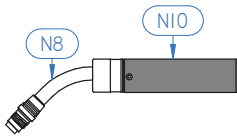

Threaded nozzle, over-sized M9 contact tip and special insulation.

Gas Cooled

450 Amp 60% CO₂
350 Amp 60% Ar + CO₂

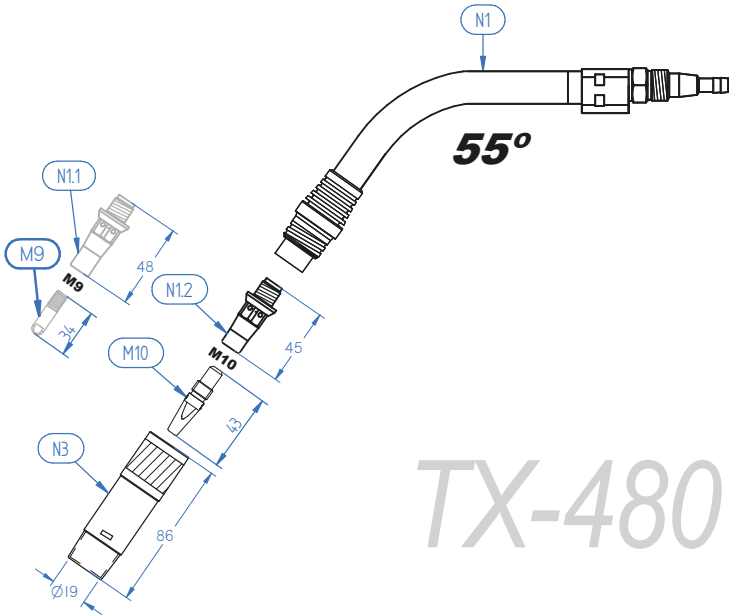

The most powerful gas cooled torch in the Ergodani professional range. Brings greater resistance in high current welding with a balanced weight.

The gas cooled torch with highest cable section, ideal for automatism.

Threaded nozzle, over-sized M10 contact tip and special insulation.

Liquid Cooled

500 Amp 100% CO₂
450 Amp 100% Ar + CO₂

Liquid cooled torch designed for high amperage versatile welding, including pulsed arc welding. Thanks to the liquid cooled system it can reach more power than its gas cooled equivalent the Tesla Ex-380.

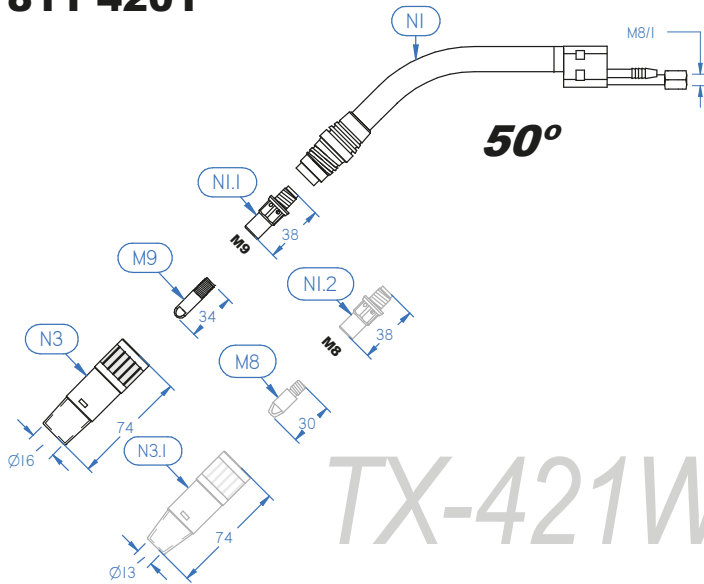

Torch for the professional sector with longer duration replacements.

Threaded nozzle, over-sized M9 contact tip or special insulation are only some of its advantages.

Liquid Cooled

550 Amp 100% CO₂
490 Amp 100% Ar + CO₂

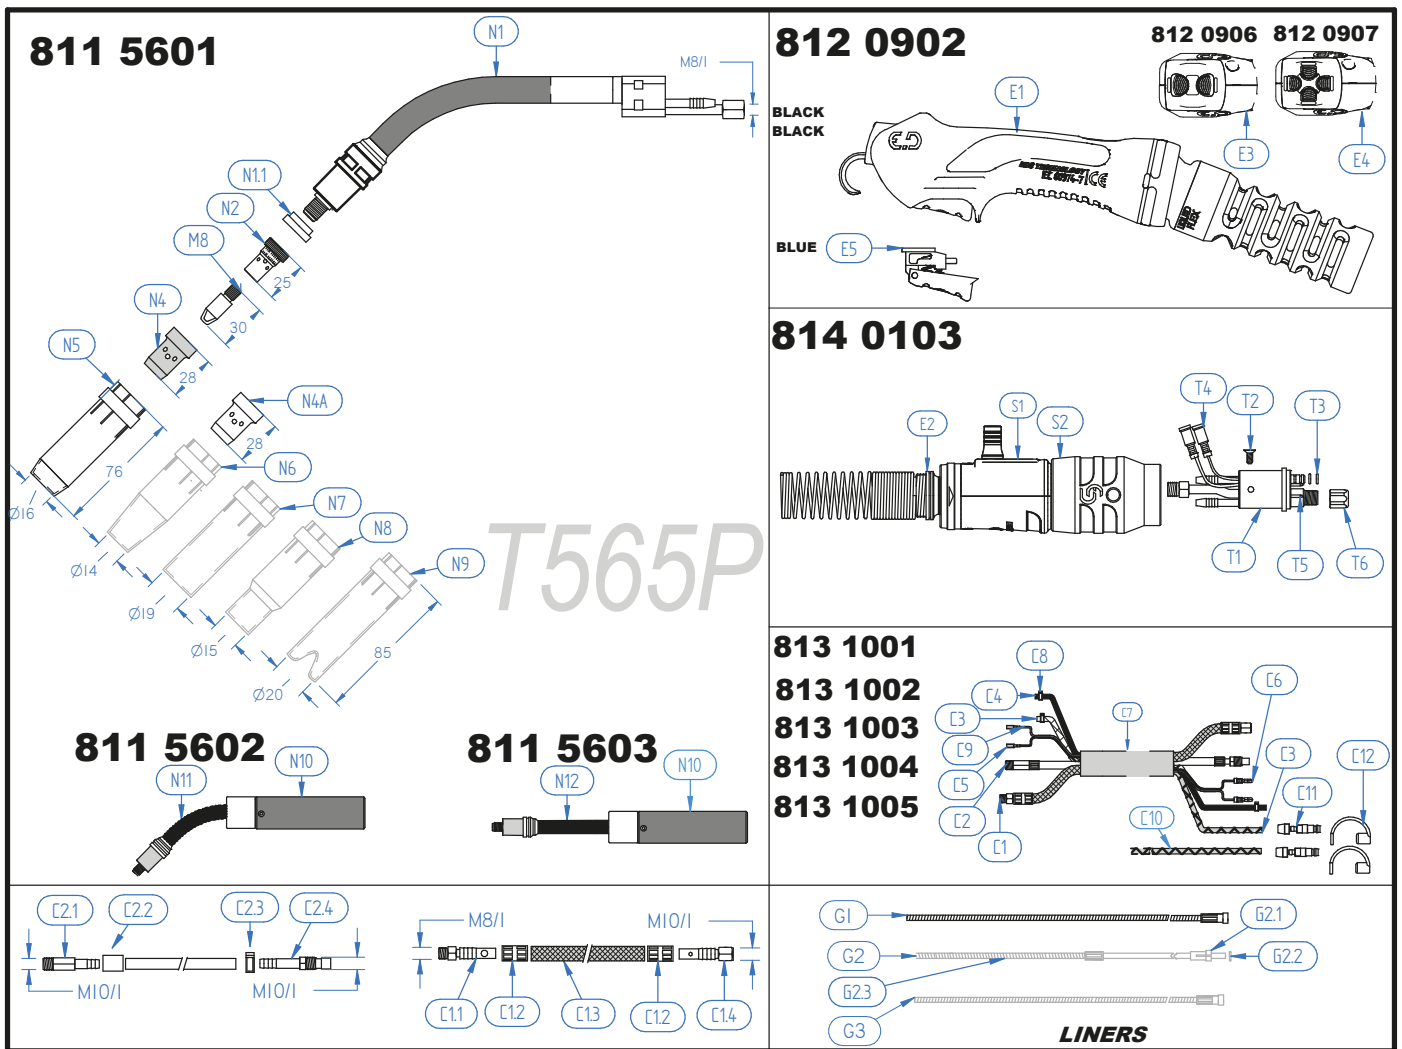

Professional torch with the revolutionary PULSER cooled system. The evolution of the 561. With double refrigeration circuit. Special for machines with arc pulsed welding.

Improved standard spare parts, with greater tip and nozzle refrigeration. Longer lifetime and more powerful.

Special alloy diffuser: Polyvalence in soft wires like aluminum and CuSi alloys. Increases the refrigeration in the contact tip and reduces the dilatations. Improves the welding thread fluency.

EPR 600

Liquid Cooled

600 Amp

100% CO₂

525 Amp

100% Ar + CO₂

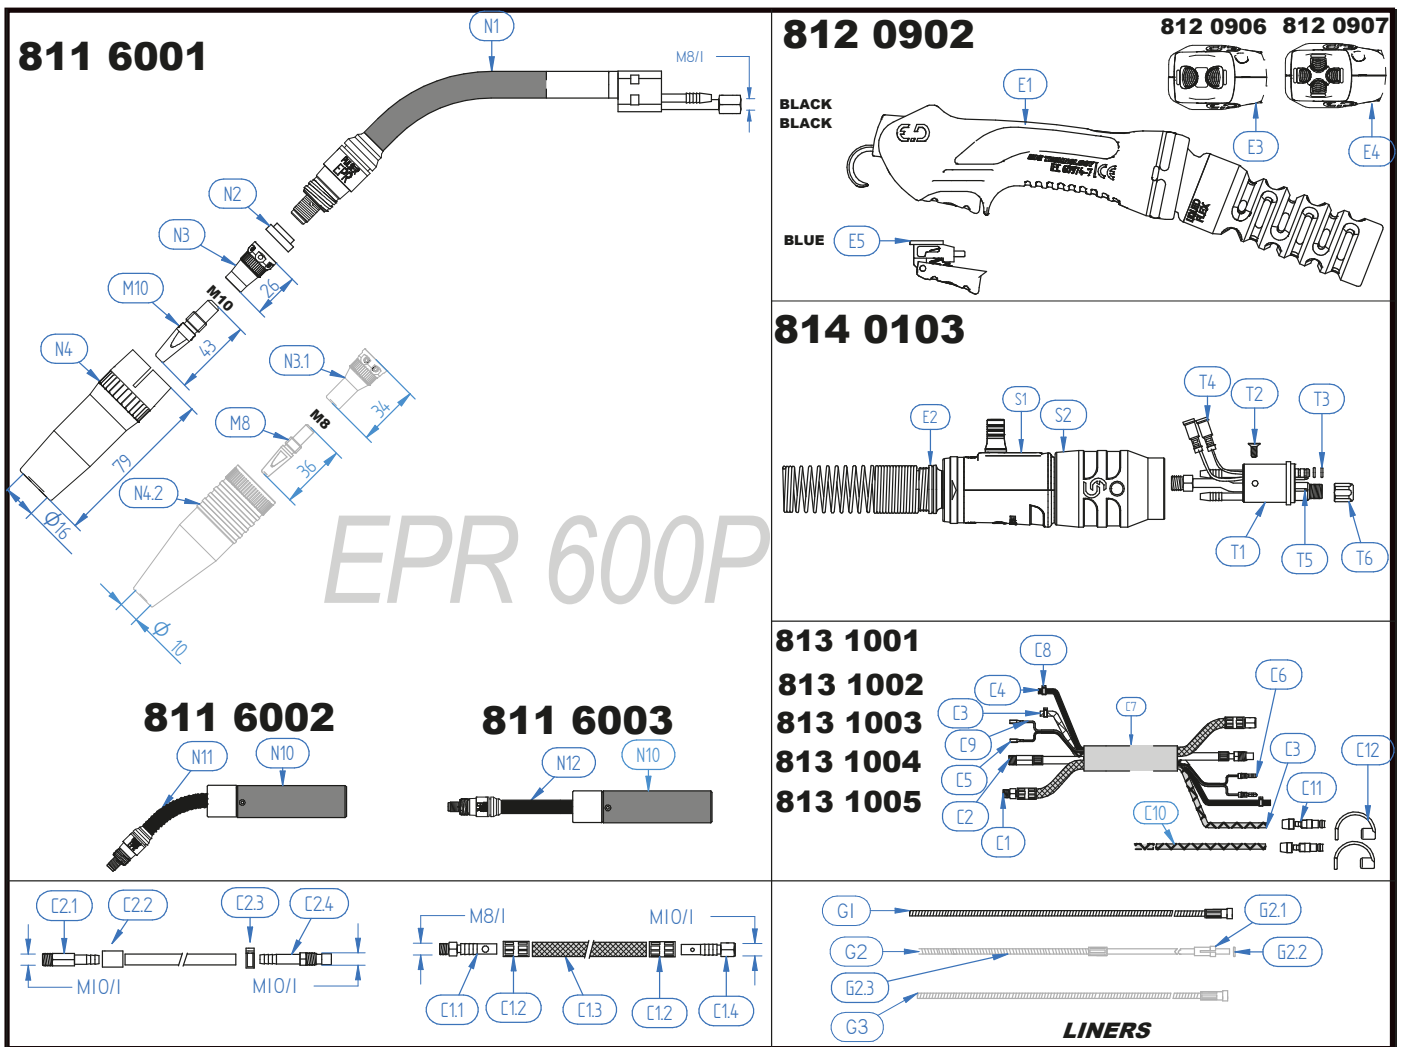

Double liquid cooled refrigeration circuit in the nozzle holder and contact tip.

This model uses replacements of torches intended for robotic welding where work cycles are of 24 hours. Applying this technology, we get a superior replacement duration and welding cycle than other torches.

Powerful cooling in the contact tip:

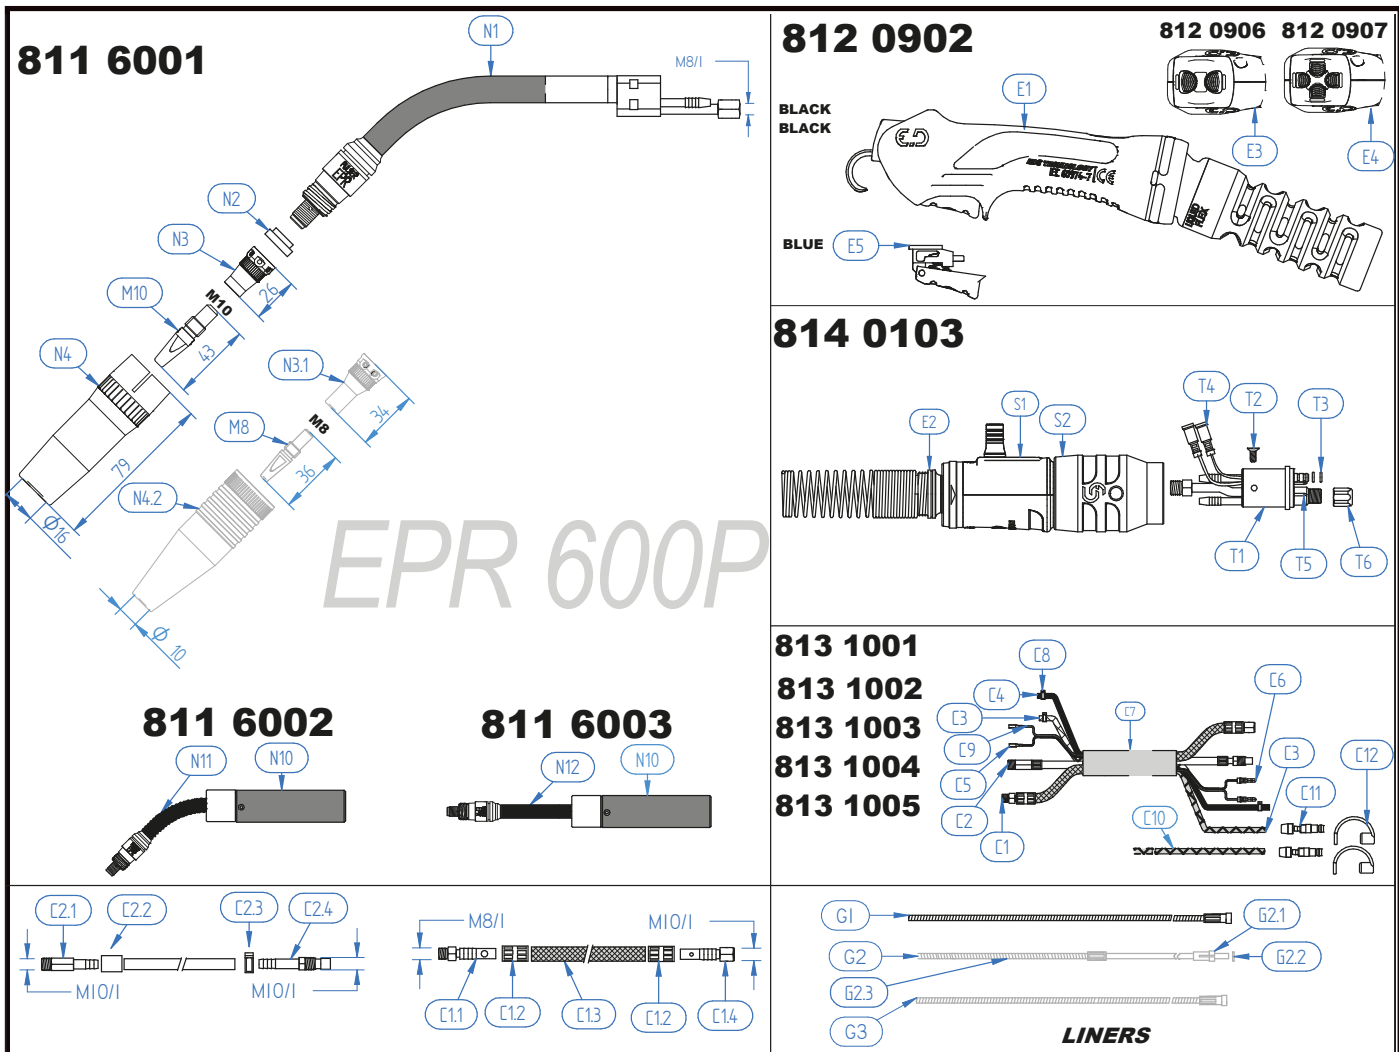

Polyvalence in both soft threads, aluminum and CuSi alloys. Improves the welding thread fluency.
