## Model #: U026-016

### 16-ft. USB2.0 A/A Active Extension Cable (USB-A M/F)

#### Highlights

- Premium double-shielded cables with tinned copper braid and aluminum mylar foil feature twisted 28/20 AWG data lines
- Gold plated contacts provide superior conductivity for low and high speed devices (1.5 to 480 Mbps.)
- Active extension cable regenerates USB signal for extra-long distances: daisy-chain up to 80-ft. in most applications

#### Description

Tripp Lite's 16-ft. USB 2.0 active extension cable is a bus powered extension cable that can be used to increase the length of a device cable without the worry of signal loss and potential performance problems. USB limits a cable's length to 16ft. Any length above 16 feet requires the use of an active cable such as this one. This cable has a signal booster built in. The overall cable length can be extended up to 80ft by daisy chaining up to 5 of these active cables. The cable must be plugged directly into a USB port (either on the PC or a hub). Use a standard 6' 10' or 15' USB cable to reach the desired distance.

#### System Requirements

- USB port and device

#### Package Includes

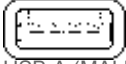

- 16-ft. USB 2.0 Active Extension Cable USB A M/F

#### Features

- Extend a USB 2.0 signal passed the 16 ft. (5 m.) distance limitation
- Works together with standard USB 2.0 cables
- Bus powered signal booster
- Daisychain up to 5 cables to extend the signal up to 80 ft. passed the 16 ft. (5 m.) distance limitation
