Flowchem Honeycomb C

An insulating, extruded polypropylene honeycombed board with conductive polyester nonwoven fabric faces, to be used only in conjunction with the Flowchem VE GL vinyl ester resin lining. Used for isolation from concrete and masonry structures to provide resistance to exposure from heavy duty chemical, thermal and mechanical attack.

- Insulation and isolation from existing structure
- No surface preparation or repair required
- Bridges cracks and movement joints
- Tolerant of damp or wet conditions
- Suitable for new construction and renovation

Installation Service

The installation should be carried out by a Flowcrete approved contractors with a documented quality assurance scheme. Obtain details of our approved contractors by contacting Flowcrete Polska or enquiring via our website at www.flowcrete.com.pl.

Products Included in this System

Board:	Honeycomb C: 2.5 m x 1.2 m x 10 mm board
Main layer:	Flowchem VE GL

Substrate Requirements

The new concrete base should be in class C20 / 25. There is no need to clean it. Old concrete structures should have sufficient load carrying capacity to bear the loads caused by the weight of the liquid accumulated in the tank. Concrete can be cracked, leaky, contaminated, with strength that allows fast fixing of Flowchem Honeycomb C panels with system fastening pins.

Environmental Considerations

The finished system is assessed as non-hazardous to health and the environment. The long service life and seamless, impermeable surface with perfect adhesion to the substrate reduce the need for repairs and maintenance.

Technical information, recommendations and instructions concerning the product use, storage and maintenance included in this System Data Sheet are based on Flowcrete Polska Sp. z o.o. [further related as "Flowcrete"] knowledge and experience, reflecting the best acknowledged way of using the material for a given moment. Taking into consideration other factors that are beyond the producer's control, including differences in quality of substrates, tools and other complementary materials, weather conditions, proper installation and also cleaning and maintenance, Flowcrete cannot take responsibility in case of failure to conform with information and instructions included in this System Data Sheet or, respectively, written recommendations from authorized Flowcrete representatives. One should always conform with up-to-date nona building principles, and also safely, hygiene and health protection rules according to the information included in Material Safety Data Sheets and also on the products packaging. This System Data Sheet replaces all previous versions. In order to receive up-to-date System Data Sheets contact Flowcrete Polska
