Work Description:	The proposed project is a small testing facility for jet engines at Alliance Airport. This property is being leased from Alliance Airport by Paramount Group U.S., who will be the company that is using this facility. The project consists of a pre-manufactured metal building, on an elevated concrete slab accessed via a concrete equipment ramp. This facility is not to be conditioned, there is not HVAC associated with this project. There will be fire suppression system for this structure. Adjacent to the test cell building will be a canopy cover for an observation cab. Also adjacent to the test cell is a portable power generator as well as an above ground, double-wall fuel tank. The intent is that this facility will be constructed on the existing concrete apron; there is not to be grading work associated with this work. Because of this, we do not believe a grading permit is required.						Issued : 04/06/2022
