Energy saving design to provide a comfortable indoor environment while being environment-friendly.

An air conditioner that is people-friendly is also environment-friendly. Fujitsu General offers a broad lineup of products from large living rooms to bedrooms and children's rooms. We make your room more comfortable with a wide range of air conditioner types from ceiling wall type with automatic filters and cleaning functions to wall mounted type that improve the air cleaning function. Of course these models feature highly efficient operation that conserves electricity.

FEATURE EXPLANATION

Energy Saving Function

Return
Set temperature auto return
The setting temperature automatically returns to the previously set temperature.

Economy
Economy mode
Limits the maximum operation current, and performs operation with the power consumption suppressed.

Set Temp.
Room temperature set point limitation
The minimum and maximum temperature range can be set giving further energy saving while considering the comfort of the occupants.

Saving
Energy saving mode
This mode raises the set temperature slightly in the cooling mode and lowers the set temperature in the heating mode to economically control the operation of the unit.

Comfortable Function

Diffuser
Power diffuser
An additional louver that opens based on monitoring sensors to quickly enhance immediate comfort needs.

Powerful
Powerful mode
Operation at maximum air flow and compressor speed, and quickly makes the room comfortable.

HEAT 10°C
10°C HEAT operation
The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.

Low Noise
Low noise mode
Sound noise level of outdoor unit can be selected.

Auto Changeover
Auto-changeover
The unit automatically switches between heating and cooling modes based on your temperature setting and the room temperature.

Up/Down
Up / down swing flaps
The up / down flaps automatically swing up and down.

Double
Double swing automatic
Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.

Adjust
Automatic fan speed
The micro-computer automatically adjusts the airflow effectively to follow the changes of room temperature.

Restart
Auto restart
In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once power supply is restored.

Duct
Connectable fresh air duct
Outside air can be introduced by attaching field supplied duct to fresh air knockout and optional part.

Intake
Fresh air intake
Fresh air can be taken in by a fan which can be connected using external control unit.

Distributing
Connectable distributing duct
Systems are capable of attaching field-supplied branch ducts distributing the airflow.

Convenient Function

Auto OFF
Auto off timer
Automatically stops operation when a fixed time has elapsed from the start of operation.

Sleep
Sleep timer
The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.

Program
Program timer
This digital timer allows selection of one of four options: ON, OFF, ON → OFF or OFF → ON.

Weekly
Weekly timer
Different ON-OFF times can be set for each day.

+Setback
Weekly + setback timer
Weekly + Setback timer can set temperature for two times spans and for each day of the week.

Filter
Filter sign
Indicates the filter cleaning period by lamp.

Clean Function

ION
Ion deodorization filter
The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

AF
Apple-catechin filter
The Apple-catechin filter uses static electricity to clean fine particles and dust in the air.

Washable
Washable panel
Since the front panel is easy to remove, maintenance is also easy.

ALL DC All DC models

i-PAM i-PAM control models
i-PAM inverter control is a technology which reduces loss by adjusting the current waveform to a better sine waveform.

V-PAM V-PAM control models
V-PAM inverter control reduces the effects of magnetic flux and increases the maximum speed and efficiency of the compressor by vector control technology.

Model : ASYG09LUCA / ASYG12LUCA / ASYG14LUCA

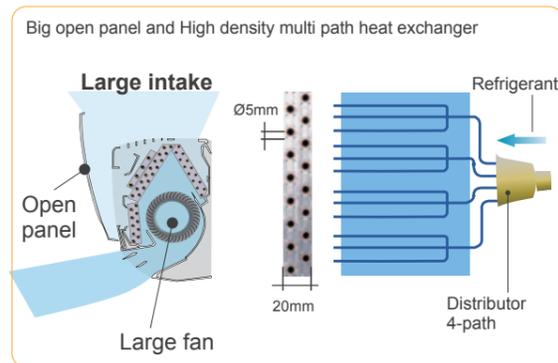

Thin & Slim design

Thin and slim design is realized by Ø5mm heat exchanger and high efficiency wind blower.

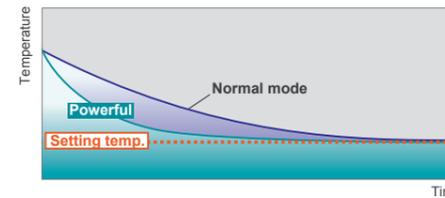

H282 X W870 X D185

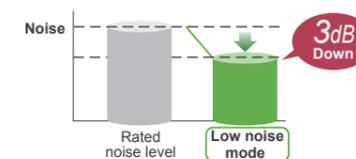

Powerful operation

20 minutes continuous operation by maximum airflow and maximum compressor speed is possible. Rapid cooling and heating makes the room comfortable quickly.

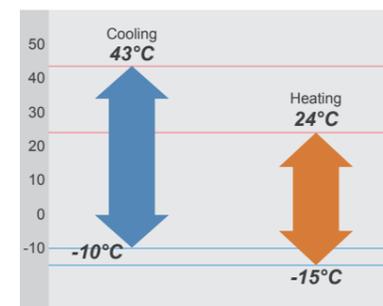

Low noise mode for outdoor unit

Low noise mode of outdoor unit can be selected by wireless remote controller.

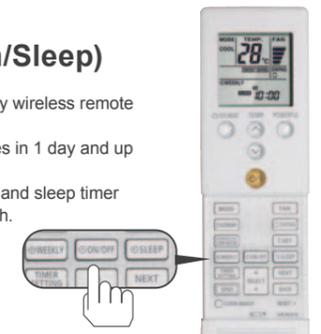

Low ambient operation

3 Mode timer (Weekly/Program/Sleep)

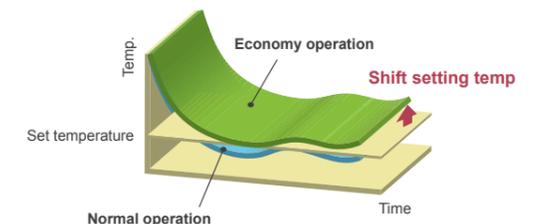

Weekly timer can be easily set by wireless remote controller. ON, OFF can be set up to 4 times in 1 day and up to 28 times in 1 week. For other modes, program timer and sleep timer can be also selected by one push.

Economy operation

Setting temp. is shifted by 1°C automatically.

Ex. : Cooling operation

Top Class High EER

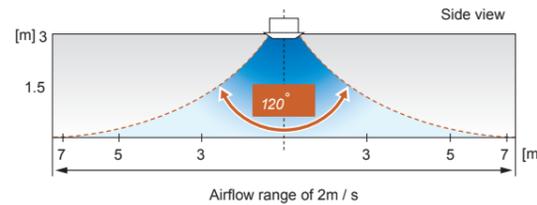

The EER figures in this two models can be found in tick 3 in 24 Btu model and tick 2 in 36 Btu model in the energy-saving program in Singapore.

*Weighted COP=0.4xCOP_{100%}+0.6xCOP_{50%}

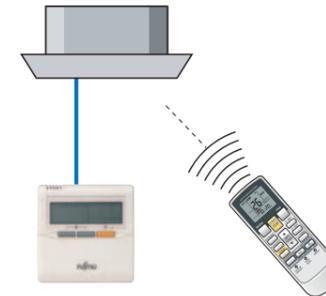

Long-Reach And Wide Angle Air Flow

The airflow can be travelled in all directions and at far distance. It enables to produce the best performance in sizable spaces such as office and school.

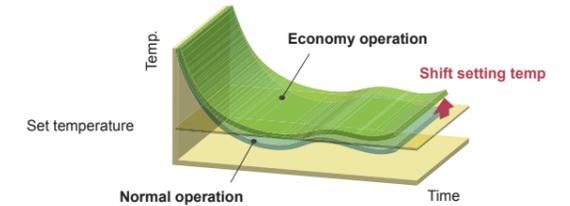

Simultaneous use of Wireless and Wired Remote Controller

Wired and wireless remote controllers can be simultaneously used, which enables to utilize the benefits of both remote controllers.

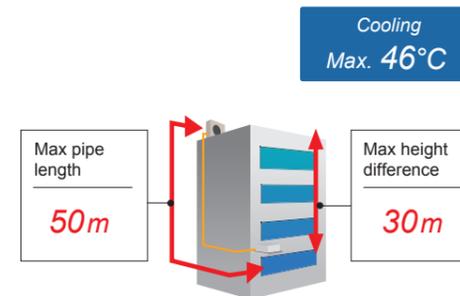

Economy Operation

Economy operation automatically increases the temperature setting by 1 degree which helps to save power consumption.

Flexible Installations

Long piping and operability in high ambient temperature enables to enhance the installation flexibility.

High efficiency turbo fan with 3-dimensional blade

Previous turbo fan: Air passing through the heat exchanger was uneven and the air would only flow close to the ceiling.

New turbo fan: High efficiency airflow distribution has been achieved by the introduction of a 3 dimensional blade which increases the air passing over the heat exchanger.

Installation

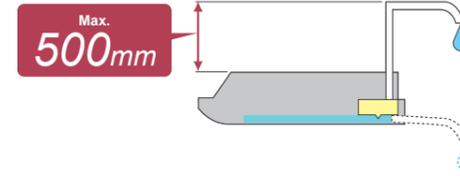

Multi auto swing

A combination of right/left and up/down directional swing allows 3-dimensional air direction control.

Condensate lift-up mechanism (Option)

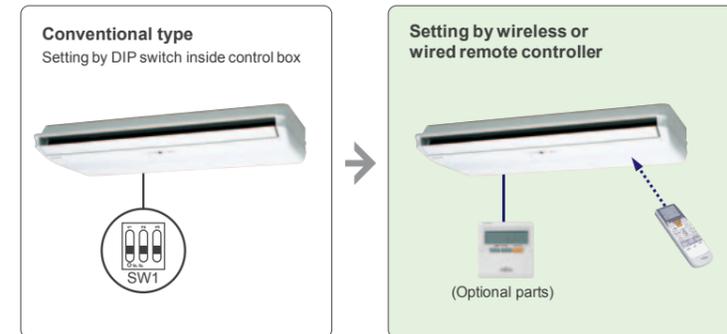

Optional drain lift-up mechanism allows flexible installation.

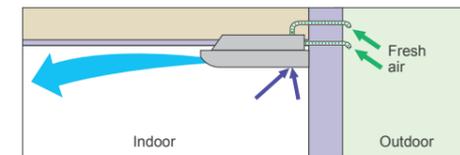

Easy installation

Main work settings can be done easily from the remote controller at installation

Main work settings
 •High ceiling setting
 •Auto restart
 •Temperature adjustment when cooling / heating

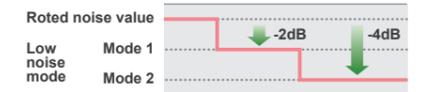

Fresh air intake

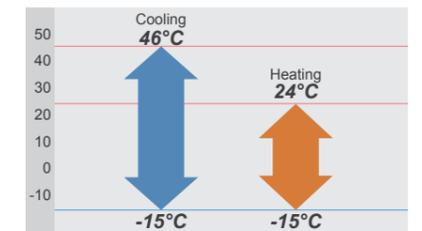

Low noise mode of outdoor unit (45/54 types)

2 stage low noise mode can be selected.(Option)

Low ambient operation

Slim design

This model is slim design, it can install at the place where a ceiling is narrow.

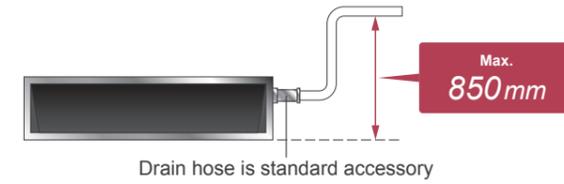

Flexible installation

Drain pump is standard accessory

It allows flexible installation.

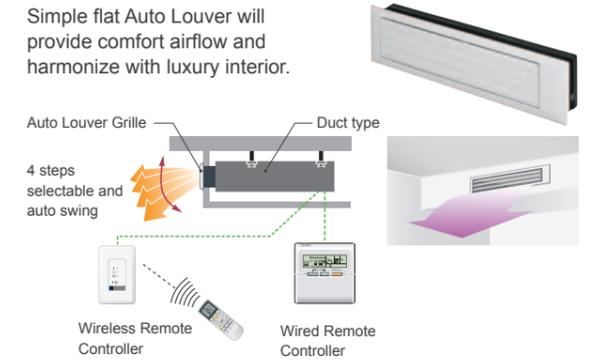

Selectable with a wide range of static pressure

By using DC fan motor, it is possible to change the static pressure range 0 to 90Pa. The change of static pressure range is possible by remote controller.

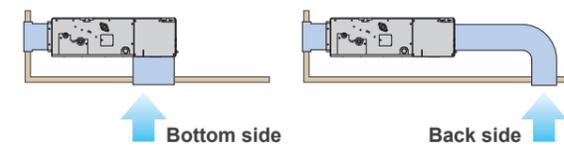

Auto Louver Grille Kit (Option)

Simple flat Auto Louver will provide comfort airflow and harmonize with luxury interior.

Air-intake

Air intake direction can be selected to match the installation site.

Optional parts

Slim & Compact design

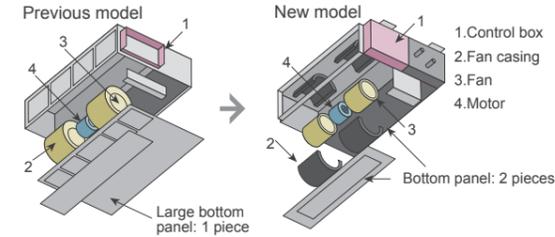

In the case of bottom return air connection, not only does the indoor unit design allow for installation in a narrow ceiling space of up to 270mm, Further space savings have been achieved by mounting the electrical control box internally inside the chassis.

Easy maintenance

Structural improvement is attained by making the bottom panel two pieces, front and rear. The internal fan casing is also manufactured in two pieces, namely upper and lower. The maintenance of the motor and fan can be easily carried out by removing the rear panel and the lower part of the casing while leaving the main chassis installed.

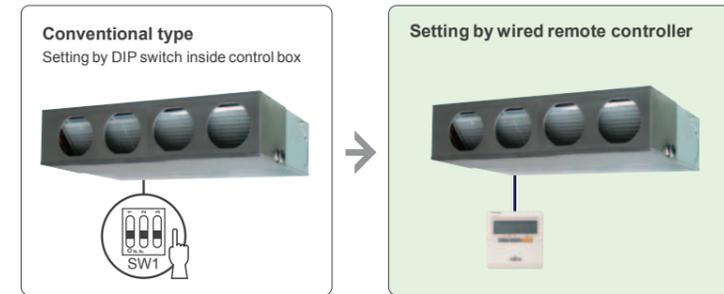

See below for the case of rear suction type

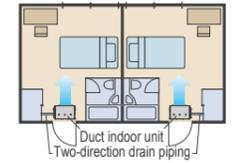

Easy installation

Main work settings can be done easily from the remote controller at installation

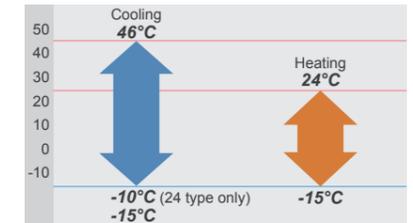

- Main work settings**
- High ceiling setting
 - Auto restart
 - Temperature adjustment when cooling / heating

Two-direction drain piping

Low ambient operation

More Comfort Airflow

Airflow volume is increased more than current model and comfortable cooling is delivered to every corner of the room.

Operation range up to 46°C

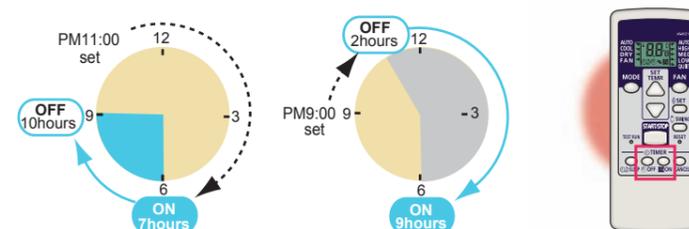

Improved operation range up to 46°C ambient temperature for Indian market.

More Convenient Timer

From wake up to go to work

From sleep to wake up

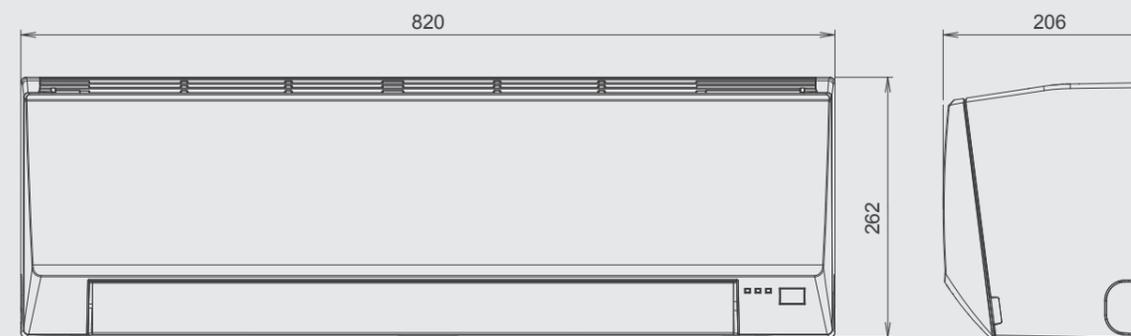

Adopting new refrigerant R32

R32 refrigerant is highly environmentally friendly for the reduction of the global warming potential than other refrigerant.

CONSTANT SPEED WALL MOUNTED

NEW Model : ASAA18FMTA-A / ASAA24FMTA-A

Improve Energy Efficiency

The higher EER is achieved than our previous models*: 230V

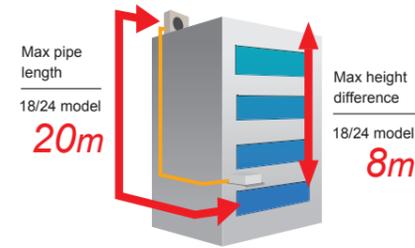

Quiet Operation

Quiet operation sound is able to expand the applications of the air conditioners.

Flexible Piping Installation

Sufficient pipe length and height difference is provided, which enables to enhance the flexibility of installation.

Operation In High Ambient Temperature

The operation is secured under the ambient temperature of up to 52 degrees Celsius in cooling operation.

Washable Front Panel

The front panel is easily detachable and is washable, which enables to the air conditioner always clean.

Power Diffuser

Power diffuser makes it possible for the air flow to reach every corner of the room.

Optional parts

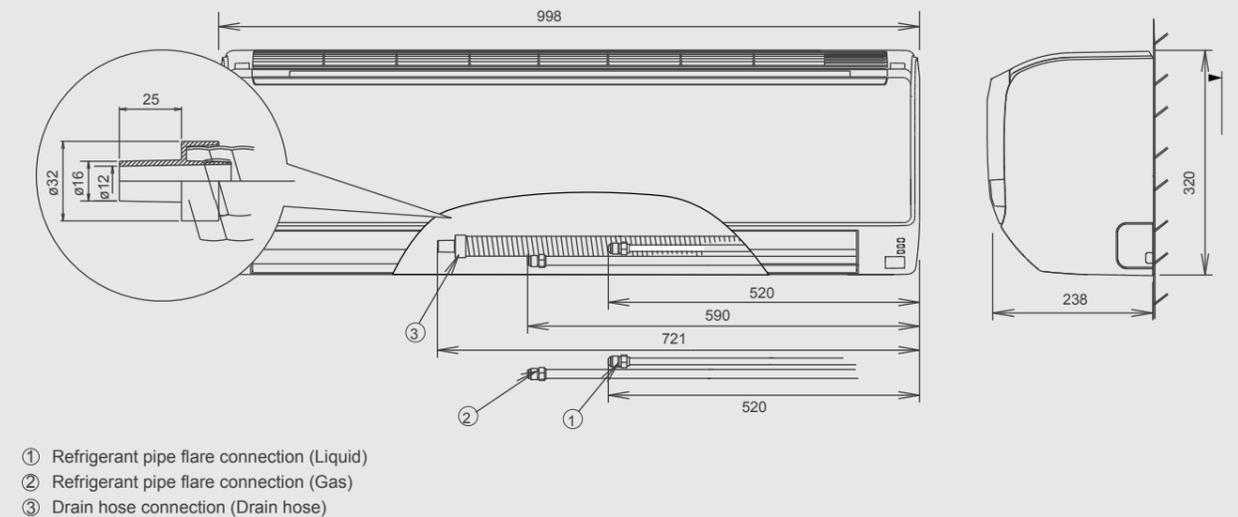

- Wired Remote Controller: UTB-YUD
- Simple Remote Controller: UTY-RSNYM
- External Connect Kit: UTY-XWZX

Example for ceiling installation

Under ceiling

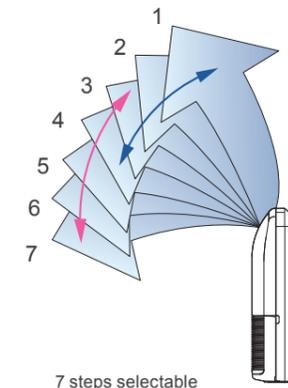

Double auto swing

A combination of up/down and right/left directional swing allows three-dimensional air direction control.

UP and DOWN SWING

7 steps selectable

Super vane

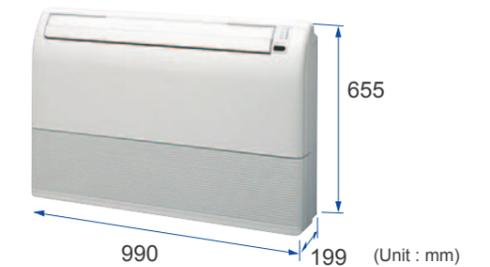

Double Louvre Super vane with newly developed special configuration boosts airflow sending cool air quickly to every corner of the room.

Auto-closing louvre

When operation is stopped, the louvres will automatically close. (This function is available on all non-ducted models.)

Compact design

Symmetrical, slim and compact design.

Installation

Open

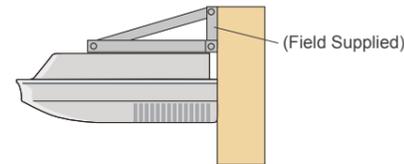

General installation pattern which suspends the indoor unit from the ceiling.

Concealed

Installation pattern where part of the indoor unit is embedded into the ceiling.

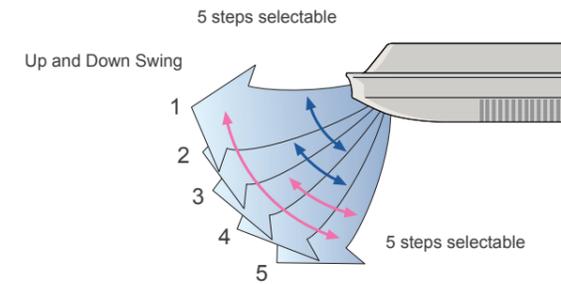

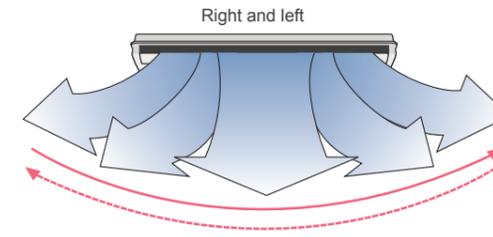

Wall mounted

Installation which fixes the indoor unit to the wall by the use of wall brackets (Field supplied). This type of installation can be used when the ceiling space is insufficient.

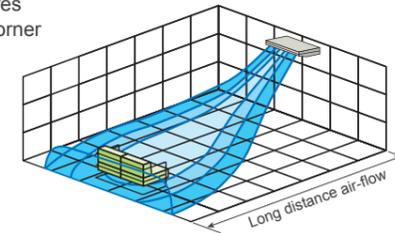

Double auto swing and wide airflow

Auto airflow direction and auto swing

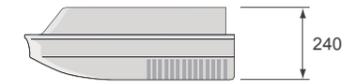

Long Airflow

Long Airflow ensures comfort to every corner of a large room.

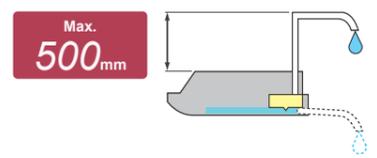

Slim & Compact design

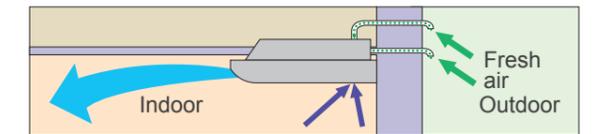

Condensate lift-up mechanism (Option)

Optional drain lift-up mechanism allows flexible installation.

Fresh air intake

Long-life filter

High efficiency long-life filter doubles the life of the filter compared to standard filters.

Slim & Compact design

In the case of bottom return air connection, not only does the indoor unit design allow for installation in a narrow ceiling space of up to 270mm, Further space savings have been achieved by mounting the electrical control box internally inside the chassis.

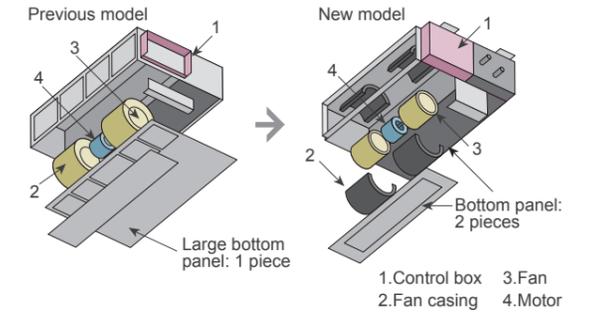

Two-direction drain piping

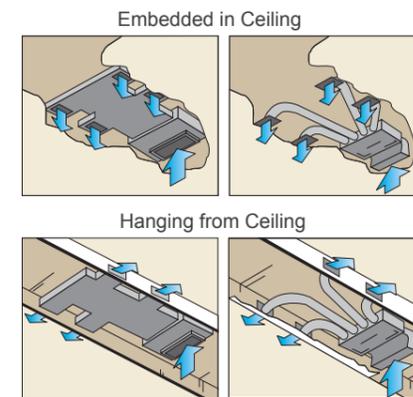

Easy maintenance

See below for the case of rear suction type

Structural improvement is attained by making the bottom panel two pieces, front and rear. The internal fan casing is also manufactured in two pieces, namely upper and lower. The maintenance of the motor and fan can be easily carried out by removing the rear panel and the lower part of the casing while leaving the main chassis installed.

*The measurement static pressure of ARY60AU/RU is 100Pa and ARY90EL/TL is 196Pa.

Low noise

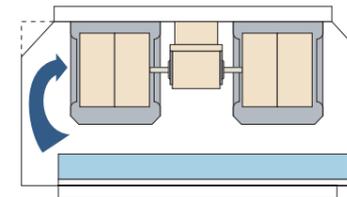

Turbulent air flow is reduced by cutting off the corners of conventional indoor unit front panel and fan case

Low noise is realized by adopting plastic case, plastic fan.

Plastic fan [45dB(A)]

Various remote controllers and sensors can be selected

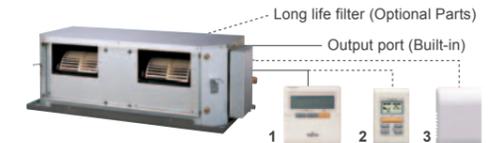

1.Wired Remote Controller with Thermo Sensor

- Room temperature sensor selection
- WEEKLY timer
- Temperature SET BACK timer
- Group control system
- Child lock
- Dual remote controllers
- <Optional parts>
- AUTO restart

- Energy saving
- Auto changeover (for heating)
- Hot start (for heating)

2.Simple Remote Controller (Optional Parts)

3.Remote Sensor (Optional Parts)

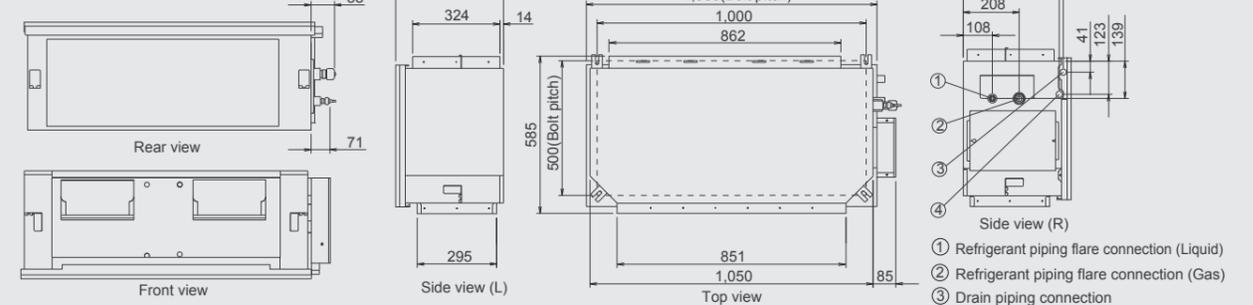

Optional parts

- Simple Remote Controller: UTY-RSNYM
- Long-Life Filter: UTD-LF60KA (For ARY60AUAK / ARY60RUAK)
- Remote Sensor Unit: UTY-XSZX
- External Control Set: UTD-ECS5A (For ARY60AUAK / ARY60RUAK)
- IR Receiver Unit: UTY-LRHY1
