LIFEBOOK T901

The Fujitsu LIFEBOOK T901 is an ultra versatile lightweight convertible notebook for the professional user. Its brilliant, bi-directional rotatable, high-bright LED display including LED rotation indicators is a pleasure to use. With the LIFEBOOK T901 you can either work with multiple finger-touch or with the multifunctional pen. Berliner Glass ensures highest reliability.

LIFEBOOK S Series

The LIFEBOOK S Series gives professional users the optimum combination of performance, modularity and flexibility: the functionality and ease of use of a desktop in a slimline, lightweight package. The integrated modem, network adapter, optional Bluetooth and wireless LAN are complemented by a multifunctional bay. The latest Intel Core 2Duo technology provide you long battery life away from the power socket.

LIFEBOOK E Series

The LIFEBOOK E Series always follows a simple philosophy: only the best will do. Top notch performance with only 2.7 kg makes this notebook as one of the lightest in its class. The comprehensive security features, separate SmartCard reader, TPM and Fingerprint modules make your sensible data safe and secure – anytime, anywhere.
Take advantage of the growing network of wireless working and catch up emails where ever you are via optional embedded UMTS.

LIFEBOOK P Series

The LIFEBOOK P Series fits in any bag - meeting the most demanding airport restrictions. At only 1.3 kg this lightweight combines superior style with exceptional performance and state-of-the-art connectivity, including embedded mobile broadband access and excellent communications ability. Thanks to video conferencing support with the integrated ConfCamera, this 12.1-inch screen beauty is truly a maximum. It provides all standard interfaces, and tops it off with a exeptional long battery run time. The integrated EcoButton extends the battery life even further. In short, true mobility becomes reality.

LIFEBOOK NH751

The Fujitsu LIFEBOOK NH751 notebook is a mobile cinema that enables users to experience their films, photos, social networking and games in stunning quality on a brilliant widescreen 43.9 cm (17.3-inch) display with powerful NVIDIA® GeForce® GT 525M discrete graphics with NVIDIA® Optimus™ technology, whenever and wherever they want. While the spill-resistant keyboard provides extra reliability, high-gloss black finish, frameless display and outstanding slim profile make the notebook a real head-turner.

STYLISTIC

The STYLISTIC ST Series is thin, approximately A4 in size, only 1.6 kg and relpaces your need for paper and clipboard. Boasting a robust, high-tech design, it offers a 12.1-inch display making it ideal for working while standing or walking, indoors or outside. The Intel® Centrino® Core 2 Duo processor means you can work for a whole business day. And outstanding connectivity with embedded broadband access, WLAN and Bluetooth means you can get in a full day of work without having to return to the office.

FUTRO

The FUTRO product line of smart, expandable thin clients is the ideal solution for server-based networks, particularly in terms of availability and data security. The user can neither access the operating system nor store data on the smart terminal.

ESPRIMO

Our PCs provide pure performance while balancing economic and environmental considerations. ESPRIMO PCs feature state-of-the-art technology from AMD and Intel® and are the perfect basis for productive working environments. They are quiet and cool with intelligent ergonomic designs, perfect manageability and security features. To make them as environmentally aware as possible, they are built with especially selected materials to minimize the impact on the environment.

CELSIUS

Computing power, memory space, graphics systems, expansion possibilities – even the most powerful of standard PCs are quick to reach their limits outside classic office and communication applications. Application fields such as simulation, animation, construction, and digital content creation require systems that offer maximum performance on all levels: CELSIUS workstations.

Displays & Peripherals

Positioned in three segments the Fujitsu displays offer the right model for every desire - from multifunctional all-rounders, advanced displays, which are highly ergonomic and comfortable, also for entertainment, and the superior class for highest demands in terms of performance, graphics and multimedia.

Input devices for every desire: wired and wireless, optical and laser

PRIMERGY

PRIMERGY is based on the standard architecture for good reason. Due to their high level of standardization, x86/EM64T and Dual-Core / Quad-Core servers deliver the best price/performance ratio. Windows®. Life without Walls™.
Fujitsu recommends Windows 7.

LIFEBOOK S Series

The LIFEBOOK S Series gives professional users the optimum combination of performance, modularity and flexibility: the functionality and ease of use of a desktop in a slimline, lightweight package. The integrated modem, network adapter, optional Bluetooth and wireless LAN are complemented by a multifunctional bay. The latest Intel Core 2Duo technology provide you long battery life away from the power socket.

LIFEBOOK E Series

The LIFEBOOK E Series always follows a simple philosophy: only the best will do. Top notch performance with only 2.7 kg makes this notebook as one of the lightest in its class. The comprehensive security features, separate SmartCard reader, TPM and Fingerprint modules make your sensible data safe and secure – anytime, anywhere.
Take advantage of the growing network of wireless working and catch up emails where ever you are via optional embedded UMTS.

LIFEBOOK P Series

The LIFEBOOK P Series fits in any bag - meeting the most demanding airport restrictions. At only 1.3 kg this lightweight combines superior style with exceptional performance and state-of-the-art connectivity, including embedded mobile broadband access and excellent communications ability. Thanks to video conferencing support with the integrated ConfCamera, this 12.1-inch screen beauty is truly a maximum. It provides all standard interfaces, and tops it off with a exeptional long battery run time. The integrated EcoButton extends the battery life even further. In short, true mobility becomes reality.

LIFEBOOK NH751

The The Fujitsu LIFEBOOK NH751 notebook is a mobile cinema that enables users to experience their films, photos, social networking and games in stunning quality on a brilliant widescreen 43.9 cm (17.3-inch) display with powerful NVIDIA® GeForce® GT 525M discrete graphics with NVIDIA® Optimus™ technology, whenever and wherever they want. While the spill-resistant keyboard provides extra reliability, high-gloss black finish, frameless display and outstanding slim profile make the notebook a real head-turner.

LIFEBOOK T902

As a mobile professional, the Fujitsu LIFEBOOK T902 offers you the perfect versatile and flexible Tablet PC. The 33.8 cm (13.3-inch) convertible notebook enables maximum convenience and flexibility with a modular bay for additional battery runtime or storage as well as pen and finger input. In addition, the latest connectivity standard 4G/LTE provides ultimate connectivity, facilitating work and business trips.

Positioning FUTRO thin clients

FUTRO S100

The compact and cost-efficient FUTRO S100 is your perfect entry thin client for Server-Based Computing and Virtual Workplace solutions. High energy-efficiency and silent operation without fans and rotating disk drives guarantee a pleasant working environment and lowest running costs.

FUTRO S450
FUTRO S500

This small but powerful and expandable thin client is your ideal client for server-based computing. No matter if used with RDP or ICA protocol, as thin client for Windows terminal services or as Java based network terminal, FUTRO S Series always helps you to minimize the Total Cost of Owernership. Low power consumption, no fans and rotating drives turn the FUTRO S Series into a very reliable and silent thin client.

FUTRO S700

The powerful FUTRO S700 is your ideal thin client for server-based computing and virtual workplac solutions. An optimized thermal concept and the latest flash drive technology make fans and rotating parts obsolete. This results in superior ergonomics due to noiseless operation and significantly increased reliability. The outstanding manageability solution makes it easy to administer while reducing total cost of ownership. Latest AMD™ Fusion® technology offers excellent performance at a reasonable price.

ESPRIMO Q

The ESPRIMO Q Series opens a new chapter on performance, size and design.
With its extremely small and stylish design, the Mini PC satisfies a so far unanswered business need: PC becomes fashionable.
Powered by the latest Intel® Mobile Technology, the ESPRIMO Q Series fulfills the requirements of a fully-flegded PC.
Don't buy expandability you never use and gain more space on your desk. You'll profit from its low energy consumption, as well as from its whisper silent noise level.
Add an eye catcher to your desk.

Positioning CELSIUS workstations

CELSIUS H Series

CELSIUS H Series. Powerful mobile workstation. If you run power-hungry 3D applications that demand no compromise on the graphics side, you'll appreciate the CELSIUS H. The system offers the power of a full-fledged workstation: Editing 3D OpenGL graphics in real time, running computer simulations and computing multimedia animations wherever you are.

CELSIUS W Series

CELSIUS W Series. High-End PC / Entry-Level workstation
If you need more power and more expandability than a desktop PC can offer, choose the entry-level workstation CELSIUS W Series. The CELSIUS W Series offers workstation performance - in combination with fastest generation of processors, chipsets and graphic cards.

CELSIUS M Series

CELSIUS M Series. Mid-range workstation.
Do you need more power, more memory, more data security, and more expandability than a conventional PC can offer? Then choose the mid-range workstation CELSIUS M Series. CELSIUS workstations are equipped with the very latest technology and system components to deliver high-end performance. CELSIUS are certified for a huge variety of software applications.

CELSIUS R Series

CELSIUS R Series. High-end workstation.
You need a powerful, dual-processor workstation and want to choose from a large range of graphics subsystems. The CELSIUS R Series is ready for all challenges. What is more, the CELSIUS R Series offers great expandability. Latest technology combined with top performance components makes this the optimum hardware choice for power hungry applications.

CELSIUS RemoteAccess

CELSIUS RemoteAccess
Do you want to access your workstation remotely? Then the CELSIUS RemoteAccess solution is the right choice for you. It enables you to separate your hardware from data input and output while keeping at the same time the real workstation user experience and performance.

CELSIUS H910

The Fujitsu CELSIUS H910 delivers high-end workstation power in a 43.9 cm (17.3-inch) notebook form factor. Featuring the 2nd generation Intel® Core™ processors and high-end NVIDIA® graphics, the CELSIUS H910 delivers uncompromising performance without tethering you to the office. Secure and reliable, it is ideal for business environments such as high end CAD, digital content creation, virtualization and Virtual Reality.

CELSIUS M720

If you're looking for reliable performance when using demanding applications, the Fujitsu CELSIUS M720 single-processor workstation meets your needs. It can be individually configured, helping you to enhance your productivity. It features best-in-class noise emissions of only 20 dB for a quiet and efficient working environment. Comprehensive ISV certifications ensure your applications run smoothly. Finally, the convenient cold plug access at front simplifies subsequent expansion.

	CELSIUS W420	Base unit, system board D3162, 300 W wide range power supply, optical USB tilt scroll mouse; Chipset: Intel Q77., , Slots: , 4 DIMM-sockets (max. 32 GB, DDR3-1600, dual channel), 4 slots: 1x PCIe 2.0 x16, 1x PCIe 2.0 x4 (mechanical x16), 1x PCIe x1, 1x PCI (32-bit / 33 MHz)., , Onboard I/O-devices: , Intel HD Graphics or HD Graphics 2500 (depending on CPU), network controller Intel 82579LM, Serial ATA controller (6 Ports 2 thereof SATA III; RAID 0, 1 or 5 for HDDs) und HD-audio Conexant CX20642., , Bays:, 7 (2x 5,25" and 2x 3,5" externally accessible, 2x 3,5" internal HDD-bays, 1x 2,5" internal HDD/SSD-bays)., , Front interfaces:, 2x USB 3.0, 2x USB 2.0, 1x audio out, 1x audio in., , , , Rear interfaces:, 1x DP + 1x DVI or 1x DP + 1x VGA (via incl. DVI/VGA adapter) or 2x DVI (2nd DVI via optional DP/DVI adapter cable) or 1x DVI (via optional DP/DVI adapter cable) + 1x VGA (via incl. DVI/VGA adapter), 1x LAN RJ45, 8x USB 2.0, 2x audio in, 1x audio out, 2x PS/2 for mouse and keyboard, 1x serial., , Internal interfaces:, 2x USB 2.0, , Embedded security (TPM 1.2), Disable / Hide TPM option	S26361-K1358-V215	398,00	

CELSIUS W520

Performance That Boosts Your Productivity

If you need a powerful entry-level workstation, Fujitsu's CELSIUS W520 is the ideal choice. Comprehensive ISV certifications ensure your professional applications run smoothly. Your workplace is silent and user-friendly thanks to best-in-class noise emissions. Plus, the cold plug access at the front of the workstation lets you expand your storage capacity or change drives for enhanced working

PRIMERGY TX industry standard tower servers: efficient, rock solid, record-breaking performance. PRIMERGY TX servers benefit from over 20 years pioneering work in the field of Green IT. That is how TX servers reach industry – leading performance per watt ratios, lowering the environmental impact and running costs. TX servers can easily be managed locally or remotely via the PRIMERGY ServerView Suite, saving IT admin costs. That's efficient performance. Our made-to-measure service packages take care of your system every step of the way. Rest assured, PRIMERGY TX servers are put through 5000 boot cycles - that's rock solid performance. PRIMERGY TX servers are flexible systems capable of using up to two processors and up to 20 hard disks. Tower to rack mounting kits are available to move to a consolidated rack infrastructure. TX servers have a tradition of setting record-breaking performance levels. So, whether you use them as tower or rack servers, for file, print or application purposes, you will benefit from record-breaking performance. PRIMERGY TX: a tower of strength.

PRIMERGY TX100S3p

PRIMERGY TX100 S3p

The PRIMERGY TX100 S3p is ideal for SMEs, looking for a first server with Intel® Xeon® support. With a maximum of 32 GB of RAM, and excellent processor performance, it offers more than enough performance for all classic server tasks, such as file, print, web or office applications. The dual onboard gigabit LAN, makes it easier to do business 24x7. Moreover, the TX100 S3p is incredibly silent making it an excellent choice for any office environment. With its optional 0-Watt functionality and a choice of two highly efficient power supply units, the TX100 S3p minimizes costs and the environmental impact.

PRIMERGY TX120 S3p

PRIMERGY TX120 S3p: For small environments with high demands. It is the perfect server for environments where space, high server functionality and low TCO are crucial. The TX120 S3p is an excellent choice for smaller retail premises, branch offices, or in other contexts where strict legal controls apply, e.g. medical, legal or financial services. Besides sporting a power supply with 94% efficiency and 0-watt functionality, the TX120 S3p keeps running costs and the environmental impacts low. The unique combination of ultra-compact form factor, Intel® Xeon® processor E3 series performance, high availability features and low TCO, make it ideal for demanding environments where space is scarce.

PRIMERGY TX140 S1p

PRIMERGY TX140 S1p

PRIMERGY TX140 S1p: the expandable SME allrounder. It is ideal for SME or branch customers looking for a classic file, print, mail, or database server, with high scalability, and best availability through optional redundant power supplies. As the company evolves, so too does the TX140 S1p. Storing up to 12 TB of data, the TX140 S1p can easily handle large files. At a later stage, the TX140 S1p can be included in a rack cabinet with dedicated storage systems. From here, customers can fully take advantage of the extensive connectivity options, Intel® Xeon® E3 series performance, and high serviceability via the optional front service LAN port. The TX140 S1p: an excellent long-term investment.

PRIMERGY TX150 S7

The PRIMERGY TX150 S7: the right system for SMEs or non-mission-critical decentralized infrastructures where the main focus is on expandability and availability. The expandability and availability come from the 6 expansion slots (5 of which PCIe Gen 2) and up to 8x 2.5" hot-plug hard disks. Increase the system's availability and energy efficiency through the use of optional redundant power supplies boasting up to 89% energy efficiency. The TX150 S7 also offers up to the latest generation Intel® Xeon® processor 3400 series single processor platform, delivering excellent energy-efficient performance at an attractive price. The PRIMERGY TX150 S7: the one processor tower server – maximized.

PRIMERGY TX200 S7

The PRIMERGY TX200 S7: a perfect server for SMEs, branch offices or virtualized environments in an attractive design. It offers dual processor performance combined with expandability and energy efficiency. With up to 16 2.5-inch hard disk drives, you can save on an external storage unit. The high energy efficiency minimizes costs. Moreover, a maximum of 192 GB of memory, redundancy features, and the Intel® Xeon® E5-2400 processor family performance allow you to make a great start into virtualization. The PRIMERGY TX200 S7 also lends itself as a database or communication server.
A tower to rack conversion kit protects your investment's lifetime. This great system strikes the right balance between price and performance.

PRIMERGY TX300 S7

The PRIMERGY TX300 S7 is a no compromise tower server with maximum levels of performance, expandability and availability. It combines the performance of Intel® Xeon® processors E5 family with up to two 6GB general-purpose computing on graphics processing units (GPGPU) for computationally intensive applications.

The expandability is excellent thanks to the 10 expansion slots and up to 24 2.5-inch hard disks. Thanks to the high availability offered by a choice of LAN cards, redundant fans and up to 4 hot-plug power supplies, the TX300 S7 is suited to database, virtualization or high performance computing scenarios. Moreover, the TX300 S7 power supplies reach energy efficiency levels of 94%, minimizing running costs and the environmental impact.

PRIMERGY RX100 S6

The RX100 S6 meets the needs of business applications with its technical developments, such as Quad-Core Intel® Xeon® processor 3400 series and the upcoming generation of Intel® Dual-Core CPUs, integrated RAID 0/1/5/6 and a memory of up to 32 GB. It unites the advantages of low-cost SATA or SAS /SSD hard disk technology with a space-saving 1U chassis and a depth of less

PRIMERGY RX200 S5

More for less with regard to data center energy-efficiency. Energy consumption and cooling in data centers is a "burning" issue. The innovative PRIMERGY Cool-safe™ system design of the new RX200 S5 rack server generation provides the right answers.

PRIMERGY RX300 S5

Virtualized environments are the top application for RX300 systems and their new multicore CPUs in the Intel® Xeon® 5500 series. In this situation, several operating systems plus the installed applications have to run simultaneously on one and the same physical hardware. RX300 S5 provides all the platform features required for efficient virtualization.

PRIMERGY RX330 S1

Corporate applications in data center server farms with central deployment and control demand increasing performance. The cost-efficient PRIMERGY RX330 S1 extends the PRIMERGY Rack portfolio and focuses rather on standard than on full feature set in comparison to RX300. RX330 S1 is offering enough local storage capacity to be used as a stand-alone AMD Opteron Quad-Core based application server and for server farms in scale-out environ-ments with medium needs for availability features and

PRIMERGY RX600 S4

4 Socket Multi-Core Xeon 7400 series rack server
Performance, capacity and stability for your critical applications. The exceptional extendability of the RX600 enables even more consolidation of servers and applications with state-of-the-art virtualization solutions and an excellent "best-in-class" efficiency.

PRIMECENTER SME

The PRIMECENTER SME rack is the basis for mounting rack configurations with all Fujitsu products, such as servers, operating devices and storage systems. Based on the industry standards DIN 41494 and IEC 297, the PRIMECENTER SME rack can also accommodate other products on the market that comply with these standards.

PRIMERGY RX100 S7

PRIMERGY RX100 S7: for SMEs and data centers, looking for high availability, scalability and low TCO - in a 1U chassis. SME customers will find the RX100 S7 to be a highly versatile tool, which can be used as a web, file or print server. Data center customers can build on the RX100 S7 as a scalable entry-level virtualization platform, which offers up to Intel® Xeon® processor performance, optional redundant fan and hot-plug power supplies (with up to 94% efficiency!) and onboard dual gigabit LAN. The optional front service LAN will make the lives of data center staff easier too. PRIMERGY RX100 S7: Rack virtualization starts here!

PRIMERGY RX200 S7

The Fujitsu PRIMERGY RX200 S7 is a rack server that provides high performance, expandability and energy efficiency in 1U space saving housing. Thus, the PRIMERGY RX200 S7 is ideal for virtualization and cloud, small databases as well as for high performance computing thanks to the top performance of the new Intel® Xeon® E5 product family. Moreover, the RX200 S7 delivers a great expandability, by supporting up to 768 GB of memory, eight hard disk drives and costsaving Modular LAN options to ensure future requirements are met and budgets are saved.

Thanks to the highly efficient power supply units with an efficiency rate of 94% and the new power management this will result in lower operational

PRIMERGY RX300 S7

The Fujitsu PRIMERGY RX300 S7 is a dual socket rack server, focusing on versatility and scalability. The new modular concept supports excellent expandability with up to 16 hard disk drives, up to 7 PCIe Gen 3 cards and up to 768GB RAM, all in one single 2U rack housing. Furthermore, the new Intel® Xeon® E5 product family delivers the top performance to ensure today's demand while being prepared for future requirements thanks to the upgrade kits as well as the costsaving Modular LAN options. Thanks to the power supply units with 94% efficiency and the new power management this will result in lower operational costs. This 2U power house is the right choice for all types of business applications and consolidations

PRIMERGY RX350 S7

The PRIMERGY RX350 S7 is a 4U rack server with maximum levels of performance, expandability and availability. It combines the performance of Intel® Xeon® processors E5 family with up to two 6GB general-purpose computing on graphics processing units (GPGPU) for computationally intensive applications. The new modular concept supports exellent expandability with up to 24 hard disk drives, up to 10 PCIe Gen 3 cards and up to 768GB memory. Moreover the 4 hot-plug, power supply units with up to 94% efficiency and the new power management, will result in lower operational costs. Thanks to the upgrade kits as well as the cost-saving Modular LAN options, the RX350 is prepared for future requirements. RX350 is ideal for database, consolidation or high performance computing scenarios.

PRIMECENTER M1

The trend to consolidation as a result of virtualization and optimization require environments that are more flexible and reliable. Decades of data center expirience at Fujitsu result in the latest 19-inch Rack Family. The new Fujitsu PRIMECENTER racks are the foundation for meeting IT data center requirements. The PRIMECENTER Racks are the basis for building perfect data center infrastructures. The PRIMECENTER 19-inch Racks can be used to install Fujitsu solutions as well as third-party products. They meet all requirements for flexibility thanks to the multiple configuration options, cooling and maintenance features. In addition a broad portfolio of optional rack accessories complete the efficient rack infrastructure solutions.

PRIMERGY BX900 S1

The PRIMERGY BX900 S1 is a rack unit that has an installed height of 10U and accommodates 1 to 18 server blades and 1 to 6 storage blades. The energy-efficient Intel Nehalem Quad-Core processors are used in the server blades. Ethernet, Fibre Channel and Infiniband networks are accessed via 8 switch bays. Switches from Cisco, Brocade and Emulex can be used. With its transfer rate of 6.4 Gb/s, the midplane used is the fastest on the market. 100V and 200V power supplies are available. This hardware platform is ideal for server consolidation and virtualization in the datacenter.

PRIMERGY BX600 S3

The PRIMERGY Blade Ecosystem provide high performance and maximum redundancy with minimum rack space, power consumption and cabling effort. PRIMERGY BX600 S3 can be equiped with up to ten Intel or AMD server blades, and are excellently suited for consolidation projects and for front- and mid-tier applications requiring enterprise-class availability, extreme flexibility and power efficiency. Due to its versatile design the system is ideal suited for smaller and mid market companies.

PRIMERGY SX650

This storage blade for PRIMERGY BX600 offers an easy and cost effective opportunity for server consolidation.
Rack and tower servers with high capacity of local hard disks are operating primarily in the area of small and medium enterprises. Very often it is essential having local access on large amounts of data; this for example applies to the wide area of Computer Aided Engineering (CAE), where smaller workgroups locally have to work on and create very large models.
Operation within confined environments as file servers as well as for Microsoft SharePoint Servers and Microsoft SQL Servers are popular usage cases.

PRIMERGY SX940 S1

The PRIMERGY SX940 S1 Direct Attached Storage Blade Disk can be used to extend the internal storage capacity of PRIMERGY BX92x Server Blades. A maximum of four internal disk drives greatly extends the maximum amount of disk storage of a Server Blade. One Storage Blade occupies a Blade slot within the PRIMERGY BX900 S1 system unit; it is positioned either on the left or right to an adjacent BX92x Server Blade, or between the two. The 1x 4 or 2x 2 disk drives of one SX940 S1 are driven by 1 or 2 integrated, highly functional SAS/RAID controllers with 512 Mbyte cache and BU. Each controller provides RAID levels 0, 1, 5 and 6. The connection to each Server Blade is realized via a midplane link to the high performing PCIe x4 interfaces of each Server Blade's system board.

**PRIMERGY
BladeFrame BF200**

**PRIMERGY
BladeFrame BF400 S2**

PRIMERGY BladeFrame is the platform to set up an application-independent and service-oriented IT infrastructure. The Processing Area Network (PAN) combines stateless servers (pBlades) with unique virtualization and management software, thus reducing the existing infrastructure complexity and providing a dynamic, high-availability system.

PRIMERGY BladeFrame uses the PAN architecture to manage a pool of computing, storage and network resources which can be dynamically allocated depending on business requirements. The PAN Manager is the central instance for configuring, managing and monitoring both the physical as well as virtual servers. With the PAN Manager a server is no longer a device with a defined configuration, operating system and application, but a software-based definition that can be dynamically assigned as needed. The PAN architecture thus expands the benefits of server virtualization and provides an integrated concept for high-availability (N+1 failover) and disaster recovery. The result is considerable savings in operational and total costs.

PRIMERGY BX400 S1

The Fujitsu PRIMERGY BX400 is a fully-featured blade system built from the ground up to be userfriendly and versatile, helping you meet large-scale computing and storage requirements. It provides an optimum combination of up to eight server or storage blades in a small enclosure, supported by a comprehensive set of solutions and services.

PRIMERGY BX920 S3

The Fujitsu PRIMERGY BX920 S3 is a dual-socket server blade which offers the ideal balance of performance and cost-efficiency. It is designed for large enterprise data centers, midsized businesses and branch offices and delivers efficient compute power that is suitable for mainstream business applications and virtual client computing scenarios.

The server blade leverages CPUs of the latest Intel® Xeon® processor E5-2400 product family utilizing enhanced QuickPath Interconnect architecture. By packing two processors, two hot-plug disk drives, up to 384 GB of DDR3 memory, and a flexible dual-channel 10 Gigabit Converged Network Adapter on board, the PRIMERGY BX920 S3 server blade delivers highest performance to ensure today's demand while being prepared for future requirements. In addition, the PRIMERGY BX920 S3 server blade is equipped with the state-of-theart integrated Remote Management Controller (iRMC S3) which enables extensive control even at remote locations. With its wide range of processor, disk and memory options, it provides IT managers with the performance and scalability they need for all their applications. The optimal and secure support of I/O-intensive applications like terminal servers is ensured by the optional use of a RAID controller with a write-back cache on board, optionally protected by a

PRIMERGY BX924 S3

The Fujitsu PRIMERGY BX924 S3 is designed from the ground up to set a new standard for versatility and scalability in a dual-socket server blade. It offers scalable performance to meet highest requirements of extensive virtualization/consolidation scenarios on the one hand, and demanding high performance computing applications on the other hand. Packed with advanced features, the PRIMERGY BX924 S3 allows doing more with a two-processor server than ever before. Two Intel® Xeon® E5-2600 processors, 24 high-speed memory modules for up to 768 GB capacity, flexible 10 Gbit/s Emulex® CNA components as well as additional slots

for mezzanine cards clearly emphasizing the approach as the perfect high-end server blade. Although servers are being booted more and more via network, this system is enabled for local boot, too. This may optionally be realized with the use of solid state drives (SSD) or a hard disk drive. While virtualization allows consolidating your IT resources, it often leads to increased expenses of the server administration. Thus the PRIMERGY BX924 S3 delivers state-of-the-art management capabilities with the integrated Remote Management Controller (iRMC S3) which offers the next generation of remote management functionality. The result is the ability to make your work faster, no matter whether your server is located in the server-room next door or in another

PRIMERGY SX910 S1

The PRIMERGY SX910 S1 Storage Blade Tape module can be used to archive and backup local data in the PRIMERGY BX400 and 900 system units. The SX910 S1 Storage Blade Tape can be equipped with one LTO tape drive. It requires a blade slot in the PRIMERGY blade enclosure. The built-in tape drive is operated via an integrated SAS Controller. It can be connected to a BX9xx Server Blade which is located directly left to it.

PRIMERGY SX940 S1

The PRIMERGY SX940 S1 Direct Attached Storage Blade Disk can be used to extend the internal storage capacity of PRIMERGY BX92x Server Blades.

A maximum of four internal disk drives greatly extends the maximum amount of disk storage of a Server Blade. One Storage Blade occupies a Blade slot within the PRIMERGY BX900 S1 system unit; it is positioned either on the left or right to an adjacent BX92x Server Blade, or between the two. The 1x 4 or 2x 2 disk drives of one SX940 S1 are driven by 1 or 2 integrated, highly functional SAS/RAID controllers with 512 Mbyte cache and BBU. Each controller provides RAID levels 0, 1, 5 and 6. The connection to each Server Blade is realized via a midplane link to the high performing PCIe x4 interfaces of each Server Blade's system board.

PRIMERGY SX960 S1

The Fujitsu PRIMERGY SX960 Storage Blade offers direct-attached storage for the PRIMERGY BX Blade Server with support of up to 10 hot-plug SAS or SATA hard disks. The storage blade can be inserted, like a server blade, in the front of the blade server housing. It can be hot-plugged and used with various types of server blades. The BX Blade Servers' midplanes offer PCI Express connections to the adjacent server blades, enabling top-quality memory access without using additional cables. The PRIMERGY SX960 Storage Blade has an onboard LSI MegaRAID controller with 512 MB Write Back Cache and optional Battery Backup Unit, for top performance and data security.

PRIMERGY SX980 Sx

PRIMERGY SX storage blades are installed together with PRIMERGY server blades in the PRIMERGY BX chassis. The introduction of storage blades is a simple and low-priced way to consolidate servers. Above all, small and medium-sized companies usually have rack and tower servers which offer a high degree of capcity regarding local hard disks. The use of storage blades equipped with tape
drives is a simple and quick method to backup system data locally. Having local access to large amounts of data is often necessary, for example, in the world of computer-aided engineering (CAE), where smaller local workgroups have to access and create very large models. Examples for using storage blades are operation within limited environments as a file server or for
