FUJITSU Support Pack

Marzo 2018

INTRODUZIONE

Fujitsu offre, con i propri Support Pack Hardware, servizi di supporto per prodotti hardware che coprono la diagnosi e l'eliminazione di errori hardware tramite la riparazione o la sostituzione della parte. A seconda del tipo di hardware e della corrispondente garanzia del produttore, Fujitsu offre servizi di supporto presso la sede del cliente (servizi on site) o presso il punto di assistenza Fujitsu (servizi off site). Per i servizi on site sono disponibili vari livelli di servizio opzionali; inoltre, per alcuni prodotti specifici, sono disponibili servizi di supporto proattivi per incrementare la disponibilità del hardware.

Lo scopo specifico del servizio di supporto contrattualizzato è riportato nel Support Pack Certificate fornito al cliente.

L'utilizzo di sistemi di accesso remoto è un prerequisito decisivo per la fornitura dei servizi con tempo di ripristino definito.

FUJITSU SUPPORT PACK HARDWARE

Il Support Pack Hardware è un contratto di servizio sul prodotto con durata predefinita che integra o estende la garanzia del produttore.

I Fujitsu Support Packs possono essere acquistati entro 90 giorni dalla data di acquisto del prodotto con una durata contrattuale da 1 a 5 anni. Prima della scadenza, il periodo di servizio può essere esteso (entro un periodo massimo di 5 anni) con l'acquisto del corrispondente Support Pack Prolongation.

Il periodo contrattuale (periodo del servizio) decorre dalla data originale di acquisto del corrispondente prodotto hardware. Il servizio viene erogato solo a seguito della registrazione ed attivazione del Support Pack in accordo con il documento "Supplementary terms for Fujitsu SupportPacks".

A seconda del prodotto hardware e del livello di servizio, specifici Support Pack possono essere attivati in una nazione differente da quella ove sono stati acquistati originariamente (MOVE). Per ulteriori informazioni relative i livelli di servizio supportati e l'elenco delle nazioni vedere <http://www.fujitsu.com/fts/support-local-terms>.

Dettagli sui servizi

LA NOSTRA OFFERTA DI SERVIZI

I servizi di supporto per prodotti hardware comprendono la diagnosi dei difetti hardware e la loro eliminazione tramite riparazione o sostituzione. La parte di ricambio utilizzata può essere nuova o come nuova. La parte sostituita diviene proprietà di Fujitsu o del Service Partner Autorizzato incaricato della riparazione.

Posso essere utilizzati differenti tipi di Servizi a seconda del tipo di prodotto:

- **Bring-In**

Il difetto riportato verrà analizzato da Fujitsu. Se non sarà possibile risolverlo telefonicamente e il prodotto dovrà essere riparato, sarà richiesto al cliente di portare il prodotto presso un service point qualificato (service partner o centro di riparazione). Quando il lavoro di riparazione sarà completato verrà comunicato al cliente che il prodotto è pronto per la restituzione.

Il servizio Bring-in include la fornitura di tutte le parti di ricambio necessarie e la copertura dei costi di lavorazione relativi, ma non i costi di trasporto da e per il service point.

- **Send-In & Return**

Il difetto riportato verrà analizzato da Fujitsu. Se non sarà possibile una soluzione remota e il prodotto dovrà essere riparato, sarà richiesto al cliente di spedire il prodotto presso un service point qualificato (service partner o centro di riparazione). I costi di trasporto e assicurazione saranno a carico del cliente. E' responsabilità del cliente imballare adeguatamente e proteggere il prodotto difettoso.

Il servizio Send-In & Return include i costi di tutte le parti di ricambio necessarie, dei costi di manodopera relativi e quelli per la spedizione del prodotto al cliente.

- **Collect & Return**

Il difetto riportato verrà analizzato da Fujitsu. Se non sarà possibile una soluzione remota e il prodotto sarà ritirato dal cliente e portato presso un service point qualificato (service partner o laboratorio di riparazione) per la riparazione. Le procedure di ritiro e restituzione possono differire nelle diverse nazioni. Il ritiro potrà essere effettuato:

- Tramite prelievo da parte di un fornitore di servizi di logistica Fujitsu. Il prodotto difettoso sarà ritirato presso l'indirizzo del cliente (all'ingresso principale, se non concordato diversamente). Il cliente dovrà imballare adeguatamente il prodotto prima del ritiro a meno che non sia stato avvisato dal help desk che il trasportatore utilizzerà un proprio imballo.
- Oppure con lettera di vettura / spedizione prepagata affinché il cliente possa organizzare la spedizione a propria discrezione. Il cliente dovrà imballare adeguatamente il prodotto prima della spedizione.

Al termine della riparazione il prodotto sarà ritornato presso la sede del cliente.

- **Door-to-Door o Desk-to-Desk**

Il difetto riportato verrà analizzato da Fujitsu. Se non sarà possibile una soluzione remota il prodotto difettoso sarà sostituito da un prodotto equivalente. Il prodotto difettoso sarà ritirato presso l'indirizzo del cliente (all'ingresso principale) e sarà consegnato un prodotto. Il servizio Desk-to-Desk prevede che il prodotto sostitutivo venga consegnato direttamente presso la scrivania del cliente.

- **Onsite**

Il difetto riportato verrà analizzato da Fujitsu tramite supporto telefonico o accesso remoto. A discrezione di Fujitsu potrà essere programmato un intervento Tecnico per una ulteriore diagnosi onsite e per la risoluzione del problema diagnosticato. In caso di malfunzionamento hardware, la funzionalità operativa sarà ripristinata tramite la sostituzione o riparazione della parte difettosa presso il luogo di installazione.

Per I servizi onsite sono disponibili varie opzioni, inclusi tempi di intervento e di ripristino (vedi "opzioni"). I livelli di servizio sono applicabili per località di installazione entro determinate distanze dai Service Point Fujitsu (normalmente 100km).

Limitazioni verificate I dettagli per la nazione specifica sotto:
geografiche <http://www.fujitsu.com/fts/support-local-terms>

Per installazioni al di fuori dalle rispettive limitazioni Fujitsu si riserva il diritto di cambiare I tempi di intervento/ripristino e/o addebitare I costi addizionali.

Per località difficili da raggiungere (isole, montagne) devono essere concordati specifici livelli di servizio.

SERVIZI NON INCLUSI NELLO SCOPO DEL SUPPORTO (ESCLUSIONI)

I servizi di supporto previsti contrattualmente non includono il backup o l'installazione del Sistema operativo, gli applicative software, la configurazione del Sistema ed i dati utente. La fornitura e l'installazione di BIOS, drivers, sistemi operativi ed aggiornamenti firmware, indipendenti da incidenti, rimangono esclusiva responsabilità del cliente. Maggiori informazioni e download sono disponibili a: www.fujitsu.com/fts/downloads

Eccezione : In caso di sostituzione del hard disk su unità client (desktops, notebooks), sarà ripristinato il Sistema operativo pre-installato, se reso disponibile dall'utente. Il backup regolare e completo, inclusi gli applicativi ed il sistema operativo è responsabilità esclusiva del cliente.

SERVICE LEVELS

I tempi di risposta e ripristino sono applicabili ai servizi onsite. Iniziano dall'accettazione della chiamata iniziale ricevuta durante il periodo di servizio previsto; la misurazione del tempo viene fermata al di fuori del periodo di servizio. In altre parole, I tempi di reazione descritti possono prolungarsi fino al giorno successivo coperto dal periodo di servizio.

I tempi di risposta e ripristino onsite dipendono dal servizio selezionato e dal livello di gravità del difetto. La gravità viene definita dal cliente durante l'accettazione della chiamata insieme all'agente del Help Desk Fujitsu.

Severity level 1	Riduzione critica della operatività Il difetto nel prodotto assistito compromette gravemente i processi di business del cliente tramite il blocco o il fermo totale del sistema. Non è possibile alcun bypass.
Severity level 2	Riduzione significativa della operatività Il difetto nel prodotto assistito causa una considerevole riduzione dei processi di business, applicazioni essenziali o al sistema. Non è possibile un bypass con sforzi ragionevoli.
Severity level 3	Riduzione moderata della operatività Il difetto nel prodotto assistito causa una riduzione moderata dei processi di business. Il guasto può essere aggirato temporaneamente utilizzando una soluzione alternativa; il ritardo nella eliminazione dei guasti è accettabile.

- **Call acceptance**

Call acceptance

L'elenco dei Service Desk è disponibile su:
ts.fujitsu.com/servicedesk

Al termine della fase di accettazione della chiamata e della pre-qualificazione, il problema viene accettato, viene assegnato un numero di chiamata e il difetto viene processato in accordo con il livello di servizio previsto. La misura del tempo di intervento o ripristino inizia dalla conferma dell'incident da parte del Help Desk.

Il cliente deve specificare il numero di serie o l'ID del dispositivo in questione.

- **Service time**

Il periodo di servizio (service time) è il periodo contrattualmente previsto durante il quale vengono erogati i servizi tramite accesso remote o onsite. Il service time standard può essere differente in differenti nazioni.

Standard Time

Per verificare i dettagli nella nazione specifica:
<http://www.fujitsu.com/fts/support-local-terms>

- **Onsite Response time**

Il tempo di intervento onsite (response time) è il periodo fra l'accettazione della chiamata ed il momento in cui un tecnico normalmente arriva presso la sede del cliente con la parte di ricambio diagnosticata (ove applicabile). La misura del tempo di intervento viene interrotta al di fuori del periodo di servizio previsto. Il tempo di intervento onsite non si applica nelle situazioni nelle quali il difetto può essere eliminato remotamente.

La diagnosi continua fino a quando l'infrastruttura IT è nuovamente operativa o fino a quando non è stato compiuto un adeguato progresso nella soluzione del problema.

Il lavoro può essere interrotto se sono necessarie ulteriori parti o risorse, ma riprende appena queste sono disponibili.

- **Recovery time**

Il tempo di ripristino (recovery time) è il periodo che intercorre fra l'accettazione della chiamata ed il momento in cui un tecnico ripristina la disponibilità operativa del prodotto identificato come guasto. La misura del tempo di ripristino viene interrotta al di fuori del periodo di servizio previsto.

Il tempo di ripristino non include il tempo necessario al recupero dei dati e/o installazione di software, sistemi operativi o aggiornamenti corrispondenti e/o ripristini del cliente o specifiche configurazioni.

HARD DISK RETENTION

Questa opzione dei Support Pack Hardware Fujitsu è progettata per i clienti che, in caso di riparazione, non vogliono consegnare i supporti dati (HDD o SSD) con dati confidenziali a Fujitsu o ai Service Partner autorizzati. I Clienti che acquistano questo Support Pack Hardware Fujitsu sono autorizzati a trattenerne il disco difettoso da sostituire. In questa situazione Fujitsu, in contrasto con altre specifiche incluse in questo documento, non rivendicherà il diritto di proprietà sul disco difettoso dopo la sua sostituzione.

Il cliente mantiene l'esclusiva responsabilità della protezione dei dati confidenziali memorizzati nel drive difettoso.

SUPPORTO PROATTIVO

Questa opzione dei Support Pack Hardware Fujitsu è progettata per andare in contro alle crescenti richieste dei clienti di disponibilità dei Sistemi e comprende le seguenti caratteristiche principali:

- Rilevazione precoce del difetto per programmare un intervento di riparazione (basato su messaggi automatici)
- Ispezione regolare del system event log hardware e del sistema operativo per programmare le azioni necessarie
- Verifica periodica delle versioni firmware e BIOS per programmare i rispettivi aggiornamenti

Per ulteriori dettagli vedere l'allegato:

"Proactive Support for selected Fujitsu Hardware".

SERVIZI REMOTI

Fujitsu può utilizzare affidabili funzioni di accesso remoto e la generazione automatica delle chiamate di richiesta di servizio (autocall) che supportano una diagnosi dei guasti veloce ed efficiente e, se necessario, eliminano gli errori. L'accesso remoto al sistema del cliente viene fornito esclusivamente a seguito dell'approvazione del cliente che può essere concessa in generale o caso per caso; di solito richiede l'accesso a Internet.

PREREQUISITI

Per i service contract sono necessari i seguenti prerequisiti. Se uno o più prerequisiti sono mancanti, il servizio descritto può essere fornito in modo parziale o non fornito.

- **Accesso remoto**

Il tempo di ripristino definito nel contesto di un Fujitsu Support Pack Hardware si basa sull'assunzione che sia disponibile per Fujitsu l'accesso remoto. Se il cliente non concede l'accesso remoto o non può essere configurato per qualsiasi altra ragione, il livello di servizio contrattualmente previsto potrebbe non essere mantenuto in tutte le situazioni.

- **Modifiche al sistema**

I servizi previsti dai Support Pack Hardware Fujitsu possono essere forniti se il cliente comunica immediatamente ed in forma scritta a Fujitsu i dettagli di tutte le variazioni al servizio/prodotto assistito (es. cambi di configurazione come aggiunta di componenti, cambi di indirizzo IP, LAN, SAN, configurazione NAS, ecc.).

INFORMAZIONI LEGALI / TERMINI E CONDIZIONI GENERALI

Le caratteristiche dei prodotti, servizi e forniture descritti precedentemente rappresentano una lista complessiva delle caratteristiche dell'oggetto del contratto e non rappresentano una dichiarazione di qualità o garanzia a termini di legge.

Oltre al presente listino, valgono le seguenti condizioni commerciali generali e le condizioni di Fujitsu Technology Solutions nella rispettiva versione locale

(vedi <http://www.fujitsu.com/fts/support-local-terms>):

- "General terms and conditions for hardware and software support services of Fujitsu Technology Solutions"
- "Supplementary terms for Fujitsu Support Packs"
