

Server, Storage & Integrated Systems Family Guide

Your fast lane to PRIMERGY / PRIMEQUEST servers, ETERNUS storage and PRIMEFLEX Integrated Systems

The Fujitsu logo is positioned in the top right corner of the page. It consists of the word "FUJITSU" in a bold, red, sans-serif font, with a red infinity symbol above the letter "I".

Windows Server:
The operating system that bridges on-premises and cloud.

shaping tomorrow with you

Find out, which data center infrastructure systems suit you best

Download our Fujitsu Value Calculator app!

The **Value Calculator** provides a comparison between your current PRIMERGY servers or ETERNUS storage systems and the current system generation. The results displayed include information on potential savings and performance improvements.

The **Product Finder** helps you to find a suitable server or storage system. After selecting some appropriate criteria, suitable PRIMERGY servers or ETERNUS storage systems are displayed with a brief description and further information.

The **Resource Center** keeps you up to date on Fujitsu server and storage systems, which is especially useful on the road. It is your central source of information with current case studies, news, white papers, benchmarks and much more.

The **Portfolio Overview** provides detailed insights on all industry-standard x86 PRIMERGY and mission-critical x86 PRIMEQUEST servers.

Be flexible.

Digitalization: Your Data Center is the foundation

FUJITSU Business-Centric Data Center

We live in a world where people are constantly connected. As individuals we want more intuitive services. Be it large or small and medium-sized businesses, both must adapt to this rising demand and what it means for their ICT. It all depends on what you do with your IT. There can be no 'one-size-fits-all' approach to your data center. So we start with your business priorities then match the right mix of products, services and solutions. That way you get an end-to-end approach that can deliver what your enterprise demands. See how Fujitsu can help large or growing businesses achieve their business objectives.

Business-Centric COMPUTING

Fujitsu Business-Centric Computing will give you the servers you need to power any workload and changing business requirements.

Business-Centric STORAGE

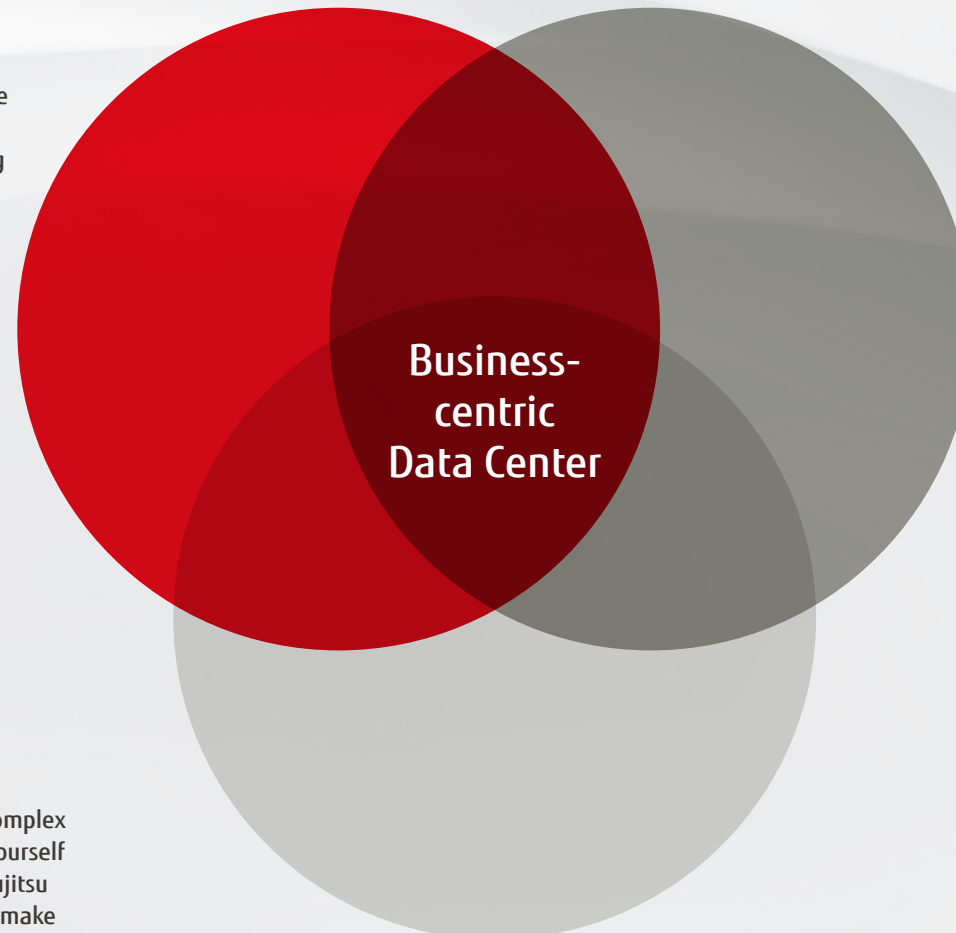

Fujitsu ETERNUS Business-centric Storage supports your business better to help you achieve your goals.

Business-Centric INTEGRATED SYSTEMS

Building data center infrastructure is often complex and time-consuming. You'll know the do-it-yourself approach can be risky and expensive. With Fujitsu Business-Centric Integrated Systems you can make the difference.

FUJITSU Server Products

Ensure your servers serve your business

FUJITSU is the leading ICT provider with an entire portfolio of IT products, solutions and services – from notebooks, tablets, PCs and data center solutions up to managed services and cloud solutions. FUJITSU servers provide the basis to set up the most powerful and flexible data center solutions for companies of all sizes, across all industries and for any type of workload. This includes industry standard PRIMERGY servers, mission-critical PRIMEQUEST systems and SPARC/UNIX servers to be able to offer the right combination of systems, solutions and know-how to guarantee maximum productivity, efficiency and flexibility.

Optimized x86 server portfolio to power any workload and business demand

Perfect for SMB's, branches and office environments

Robust and cost-efficient servers characterized by simple and quiet operations

Core Business and Data Demanding Applications

Versatile rack servers with leading efficiency and performance

HPC, Cloud, Technical Computing and Deep Learning

Modular and density-optimized servers to scale efficiently

Business and Mission-critical environments

Business continuity for permanent data access and use cases such as in-memory computing

Operation and Management

Efficient operation and management of IT infrastructures and equipment

FUJITSU Server PRIMERGY Tower and Rack Systems

The efficient, flexible foundation for business growth

Quickly changing business requirements need an IT infrastructure that guarantees maximum productivity, cost efficiency, agility and are easy to integrate in any existing environment. Be it a department server or a large data center solution, FUJITSU Server PRIMERGY systems and solutions can meet these requirements for companies of all sizes and provide a cost-effective and adaptable range of services.

PRIMERGY TX Server

Type	Specifications	Products	Processor	Memory	Storage	
Mono	Essential Workloads Compact	4 PCI slots / up to 4 x HDDs 1x standard power supply	TX1310 M3	Intel® Xeon® E3v6, Core i3®, Pentium®, Celeron®	4 – 64 GB 4 DIMM DDR4	4 x 3.5" SATA
	Standard Workloads Ultra-compact	4 PCI slots / up to 8 x HDDs/SSDs Hot-plug power supply	TX1320 M4	Intel® Xeon® E-2100, Core i3, Pentium®, Celeron®	4 – 64 GB 4 DIMM DDR4	2 x 3.5" SATA or 8 x 2.5" SATA/SAS
	Redundancy	4 PCI slots / up to 24 x HDDs/SSDs Redundant fans/ Hot-plug PSU	TX1330 M4	Intel® Xeon® E-2100, Core i3®, Pentium®	4 – 64 GB 4 DIMM DDR4	12 x 3.5" SATA/SAS or 24 x 2.5" SATA/SAS
Dual	High Workload Versatility Performance + Scalability	8 PCI slots / up to 32 x HDDs/SSDs Redundant fans/ Hot-plug PSU	TX2550 M5	1-2 x Intel® Xeon® Scalable Family	8 GB– 768 GB /1.5TB 12 DIMM DDR4/DCPMM	12 x 3.5" SATA/SAS or 32 x 2.5" SATA/SAS

PRIMERGY RX Server

Mono	1U (3 x PCI slots, 4 x HDDs)		RX1330 M4	Intel® Xeon® E-2100, Core i3®, Pentium®	4 – 64 GB 4 DIMM DDR4	4 x 3.5" SATA/SAS or 10 x 2.5" SATA/SAS
Dual	Essential performance	Height units / scalability 1U / low 4 x PCI slots, 4 x HDDs/SSDs	RX2510 M2	1-2 x Intel® Xeon® E5-2600v4	4 – 384 GB 24 DIMM DDR4	4 x 3.5" SATA/SAS or 4 x 2.5" SATA/SAS
		2U / high 6 x PCI slots, up to 24 x HDDs/SSDs	RX2520 M5	1-2 x Intel® Xeon® Scalable Family	4 – 768 GB 12 DIMM DDR4	12 x 3.5" SATA/SAS or 24 x 2.5" SATA/SAS

		2U / very high (8 x PCI slots, up to 28 x HDDs/SSDs)	RX2540 M5	1-2 x Intel® Xeon® Scalable Family	8 GB– 3 TB/7.5TB 24 DIMM DDR4/DCPMM	12x 3.5" SATA/SAS or 28 x 2.5" SATA/SAS/PCIe
Quad	Max. memory expansion	2U/ 8 x PCI slots, up to 16x HDDs/SSDs	RX4770 M5	2-4 Intel® Xeon® Scalable Family	16 GB – 6 TB/15TB 48 DIMM DDR4/DCPMM	16 x 2.5" hot-plug SAS/SATA/PCIe

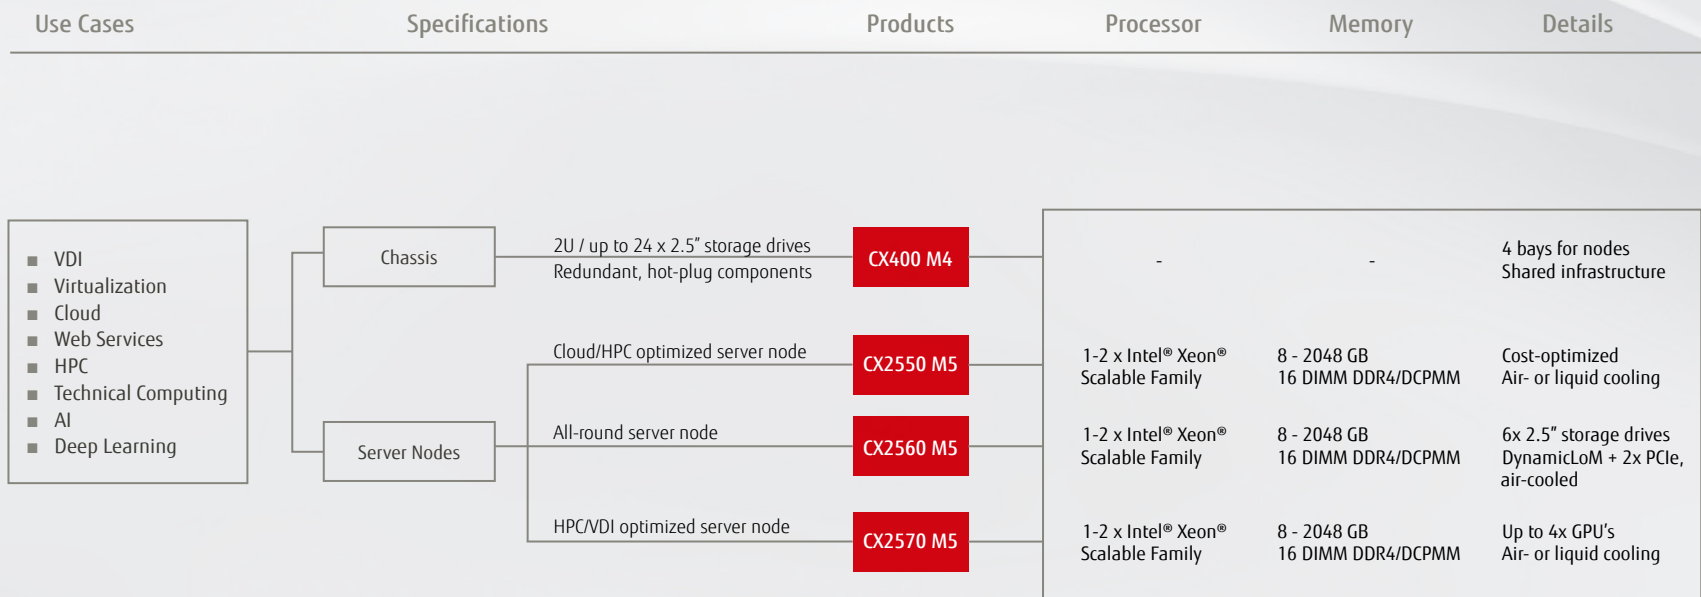

FUJITSU Server PRIMERGY Scale-out Systems

Platform for cloud, HPC, and large scale-out computing

FUJITSU Server PRIMERGY CX scale-out systems are built for cloud computing scenarios, high performance computing, service providers and large server farms. They focus on providing large datacenters with massive scale-out x86 server power while at the same time delivering best economics for server density, energy consumption, heat optimization and lower overall operational costs.

Workload-specific power in a compact and modular form factor

The PRIMERGY CX400 M4 is a modular enclosure for the Fujitsu scale-out ecosystem that combines the density and efficiency of blade-like servers with the simplicity and cost benefits of rack-based systems.

■ PRIMERGY CX Servers

FUJITSU Server PRIMEQUEST Systems

Scalable platform for business-critical and mission-critical applications

Fujitsu Server PRIMEQUEST systems offers unprecedented x86 performance and memory expandability for resource-intensive applications. By uniting the x86 industry standards with mission-critical features, PRIMEQUEST systems delivers availability levels similar to those of UNIX systems – but with the cost advantages of an x86-based architecture.

Superior performance and reliability for business-critical workloads with optimized economics

Featuring the latest Intel® Xeon® Processor Scalable Family with up to 28 cores per processor and fastest available DDR4 memory modules with 12TB total capacity, the PRIMEQUEST 3800B improves performance for in-memory databases such as SAP HANA® and real-time data analytics. Along with uncompromising performance, the PRIMEQUEST 3800B's optimized economics in a compact 5U chassis and advanced RAS features that prevent errors in advance, make it the right choice for demanding corporate databases, in-memory solutions and business-critical applications.

Redefining mission-critical server architecture

FUJITSU Server PRIMEQUEST 3400E/3800E Mission Critical systems unify the economic and flexibility benefits of x86 industry standard servers with mission-critical uptime features. Featuring four/eight of the Intel® Xeon® Processor Scalable Family provided with up to 112/224 cores and up to 12 TB DDR4 memory, the PRIMEQUEST 3400E/3800E provide unprecedented performance and memory capacity for demanding solutions. Along with uncompromising performance, the PRIMEQUEST 3400E/3800E dramatically simplify server architecture for mission-critical computing and come in an all-new compact 7U form factor. This enhanced performance in a significantly smaller form factor, results in lower power consumption and helps reduce the environmental footprint in a data center leading to significant cost savings. Moreover, mission critical features enable for an outstanding platform reliability with innovative error prevention and self-healing capabilities.

Your Fast Track to Data Center Infrastructures

FUJITSU Integrated System PRIMEFLEX

FUJITSU Integrated System PRIMEFLEX

Your Fast Track to Data Center Infrastructures

FUJITSU Integrated System PRIMEFLEX is a pre-integrated and pre-tested combination of servers, storage, network connectivity and software. PRIMEFLEX includes both 'ready to run' systems which are pre-installed at the factory, and customizable reference architectures. This reduces complexity, project time, risk and cost, while increasing operational efficiency. Flexible services options such as consulting, design, on-site deployment, integration into existing environments, migration services and overall support delivered by Fujitsu or its partners enable worry-free operation. Pay-as-you go financing options are also available. FUJITSU Integrated System PRIMEFLEX addresses business-critical use cases, such as virtualization and cloud, analytics including Big Data, High-Performance Computing and Artificial Intelligence, as well as SAP environments.

Virtualization and Cloud

PRIMEFLEX for VMware vSphere

Converged system for deploying VMware vSphere based infrastructure with external all flash or hybrid storage from FUJITSU. It includes multiple configurations varying in size, scales from 2 up to 64 servers and can support up to 2800 VMs.

Compute: PRIMERGY RX
Storage: ETERNUS DX / AF
Network: Extreme Networks
Optional: Broadcom

Software: VMware vSphere
Optional: VMware Horizon
Management: Fujitsu ISM

PRIMEFLEX for VMware vSAN

Hyper-converged system based on VMware software-defined server and storage technology delivered by the VMware HCI software stack. The system is available in various vSAN Ready Nodes configurations with pre-installed software scaling from 2 to 64 server nodes.

Compute / Storage: PRIMERGY RX / CX
Software: VMware vSphere, vSAN
Optional: VMware Horizon
Management: Fujitsu ISM (optional)

PRIMEFLEX for VMware Cloud Foundation

Hyper-converged system for deploying a VMware-based software-defined data center infrastructure. The system is available in various configurations from 4 to 240 server nodes.

Compute / Storage: PRIMERGY RX
Network: Extreme Networks
Software: VMware Cloud Foundation
Optional: VMware Horizon, vRealize
Management: Fujitsu ISM

PRIMEFLEX for Microsoft Storage Spaces Direct

Hyper-converged system based on Microsoft software-defined server and storage technology integrated in Windows Server 2016. The system is available in various validated and certified configurations scaling from 2 to 16 server nodes.

Compute / Storage: PRIMERGY RX
Software: Windows Server Datacenter Edition (Hyper-V and Storage Spaces Direct)
Optional: Microsoft SystemCenter

FUJITSU Integrated System PRIMEFLEX

Your Fast Track to Data Center Infrastructures

FUJITSU Integrated System PRIMEFLEX is a pre-integrated and pre-tested combination of servers, storage, network connectivity and software. PRIMEFLEX includes both 'ready to run' systems which are pre-installed at the factory, and customizable reference architectures. This reduces complexity, project time, risk and cost, while increasing operational efficiency. Flexible services options such as consulting, design, on-site deployment, integration into existing environments, migration services and overall support delivered by Fujitsu or its partners enable worry-free operation. Pay-as-you go financing options are also available. FUJITSU Integrated System PRIMEFLEX addresses business-critical use cases, such as virtualization and cloud, analytics including Big Data, High-Performance Computing and Artificial Intelligence, as well as SAP environments.

Virtualization and Cloud

PRIMEFLEX for Microsoft Azure Stack

PRIMEFLEX for Microsoft Azure Stack is an integrated system that brings the agility and fast-paced innovation of Microsoft's Azure cloud to your on-premises data center.

Compute: PRIMERGY RX
Network: Fujitsu PSWITCH
Software: Microsoft Azure stack
Optional: Microsoft Azure Services
Management: Fujitsu ISM

PRIMEFLEX for OpenStack

OpenStack cloud infrastructure based on either the Red Hat or SUSE OpenStack platform. It includes a range of pre-defined configurations and a broad choice of validated software extensions taking into account different customer engagement levels and varying use cases.

Compute: PRIMERGY RX / CX
Storage: ETERNUS, NetApp
Network: Extreme Networks, Cisco
Software: Red Hat OpenStack Platform, SUSE OpenStack Cloud

NFLEX

Converged system for deploying a classical VMware vSphere based infrastructure with external storage systems from NetApp. It includes multiple configurations varying in size - from 2 to 12 servers, scalable to 64 servers.

Compute: PRIMERGY CX **Software:** VMware vSphere
Storage: NetApp AFF / FAS
Network: Extreme Networks
Optional: Broadcom

NFLEX for SAP Environments

NFLEX for SAP Environments
 Optimized to manage SAP installations -- from SAP Business Suite to SAP S/4HANA® and SAP BW/4HANA deployments -- the pre-configured data center infrastructure is handed over on Windows and Linux operating systems. NFLEX for SAP Environments is fully scalable, making it suitable for entry-level SAP installations in small- and medium-sized organizations.

Compute: PRIMERGY CX **Software:** VMware vSphere
Storage: NetApp AFF / FAS
Network: Extreme Networks
Optional: Broadcom

FUJITSU Integrated System PRIMEFLEX

Addressing our customers' needs

SAP

PRIMEFLEX for SAP HANA

SAP-validated infrastructure solution for the SAP HANA® software. It is based on Fujitsu PRIMERGY and PRIMEQUEST servers optimized for in-memory technology. The complementary on-site services ensure a fast and non-disruptive implementation and operation at the customer site.

Compute: PRIMERGY / PRIMEQUEST
Storage: ETERNUS / NetApp / TDI support (opt. for single-node)
Network: Broadcom, Cisco (multi-node only)
Software: SUSE or Red Hat Linux / Optional: VMware vSphere

PRIMEFLEX for SAP Landscapes

Powered by FlexFrame Orchestrator management software, the set-up of infrastructures optimized for SAP applications and databases is simplified and a more effective operation enabled. The pre-defined, pre-integrated and pre-tested combination of servers, storage, network connectivity and software ensure highest quality and fast time to value.

Compute: PRIMERGY / PRIMEQUEST
Storage: NetApp for shared image; ETERNUS / NetApp for database
Network: Cisco
Software: FUJITSU FlexFrame Orchestrator, SUSE Linux
Optional: VMware vSphere, extension packs (e.g. from LNW Soft)

Analytics

PRIMEFLEX for Hadoop

Powerful and scalable platform for extracting large volumes of data from diverse sources, and analyzing them to get meaningful business-relevant information. The integrated system combines the convenience of pre-configured and pre-tested hardware and the economic advantages of open source software.

Compute / Storage: PRIMERGY RX / CX
Network: Extreme Networks
Software: Cloudera, Hortonworks, MapR, Datameer®

HPC

PRIMEFLEX for HPC

Validated HPC cluster solutions optimized for specific industries and ISV applications. With Fujitsu's investment in the area of AI and deep learning, the integrated system also provides reference models on workloads across traditional simulation to data analytics and AI.

Compute: PRIMERGY CX, RX; Head node PRIMERGY RX
Storage: ETERNUS DX / AF
Network: InfiniBand, Interconnect Intel® Omni-Path
Software: Fujitsu HPC Software stack, FUJITSU Software Gateway
Optional: FEFS (FUJITSU Exabyte File System)

FUJITSU Storage Products

ETERNUS: Business-Centric Storage

In the storage area you can rely on a well synchronized portfolio – Business-Centric storage at its best from a single provider with more than 50 years experience in storage. Fujitsu provides ETERNUS AF all-flash and ETERNUS DX hybrid storage systems, ETERNUS LT tape libraries and ETERNUS CS data protection appliances, which allow customers to flexibly manage their increasing data volumes at less costs of growth, to benefit from a very reliable architecture as well from radically simplified operation.

FUJITSU Storage

All-flash and Hybrid Storage Systems

Combining leading performance architecture with automated quality of service management the ETERNUS AF and ETERNUS DX systems provide powerful features for digital growth, efficiency and continuity.

Data Protection Appliances

ETERNUS CS200c is an appliance with integrated backup software, ETERNUS CS800 offers deduplication for cost-efficient backup-to-disk and ETERNUS CS8000 provides enterprises with complete consolidation of backup and archiving infrastructures.

Tape Storage Systems

The affordable ETERNUS LT tape systems offer impressive scalability and reliability. They meet SMB requirements and are certified for market-leading backup and archiving software.

FUJITSU Storage ETERNUS

ETERNUS AF/DX Family

Leading performance increases system utilization and consolidation resulting in a faster ROI

ETERNUS CS Family

ETERNUS CS data protection appliances radically simplify backup and archive infrastructures by aligning storage resources with business priorities.

ETERNUS LT Family

Highly automated, simple and remote operation without any demand for local expert skills

FUJITSU ETERNUS Storage

FUJITSU ETERNUS Storage

Online storage made easy

Description

ETERNUS SF at a glance

ETERNUS SF - Flexible Data Management

The ETERNUS SF storage management software is the uniform management solution for the entire ETERNUS AF and ETERNUS DX series. All essential operations for storage resource management, monitoring, reporting, tiered storage, performance management, disaster resilience and business continuity are integrated. The uniform management for the entire storage infrastructure covers all ETERNUS AF all-flash and ETERNUS DX hybrid storage systems from entry-level through the enterprise as well as virtualized server infrastructures.

- Management of all infrastructure devices based on a unified view
- Visualization of the relations between storage, network and physical servers or virtual servers
- Early detection and elimination of performance issues through performance monitoring
- Reduced initial system infrastructure through thin provisioning
- Support for incident management Hardware investment optimization through automated storage tiering
- Reduced storage system power consumption
- Central management for local and remote replication
- Enhanced business continuity with transparent failover
- Automated Quality-of-Service management

The operating system that bridges on-premises and cloud.

How Fujitsu helps you to keep everything run smoothly

Management,
Maintenance, Support

FUJITSU Software

Infrastructure Management and Server Management

Fujitsu offers comprehensive infrastructure management and server management solution which is key to efficient data center operations. It provides all the functions for flexible and automated 24x7 IT operations and improves end-user productivity via intelligent and innovative system management solutions.

FUJITSU Software Infrastructure Manager

FUJITSU Software Infrastructure Manager (ISM) enables organizations to drive towards the path of achieving software defined infrastructure, by automating and simplifying infrastructure operations across compute, storage and networking.

Product highlights include:

1. Converged management: Simplified IT operations and consistent management across server, storage and networking
2. Increased agility: Intuitive software providing actionable insights leading to reduced customer response time
3. Accelerate growth and innovation: Streamlined delivery of IT services to speed the transition to hybrid cloud

FUJITSU Software ServerView Infrastructure Manager is now available with the PRIMERGY CX400 M4 multi-node offering. CX400 M4 with top of the rack switch PSWITCH 2048 managed by ISM is one of the ideal transition paths for Blade server customers.

Designed the way people work, ISM provides an integrated view and centralized control over heterogeneous environment.

Control IT – Centralized, easy, efficient

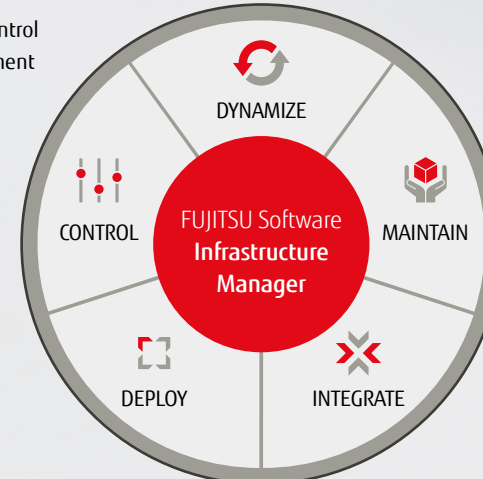

- Node Management
- Health status Monitoring and Control
- Capacity / Threshold Management
- Power Management

Dynamize IT – Simple, sophisticated, efficient

- Converged Management
- Virtual-IO Management
- Network topology Management

Maintain IT – in any state, at any place

- Remote Management
- Update Management
- Logging and Auditing

Deploy IT – Fast, easy, reliable

- Automate device configuration
- Mass OS installation

Integrate IT – Seamless, manage, uniformly

- in Enterprise Management
- in vendor specific Management
- Monitor 3rd party platforms

FUJITSU Software

Infrastructure Management and Server Management

Fujitsu offers comprehensive infrastructure management and server management solution which is key to efficient data center operations. It provides all the functions for flexible and automated 24x7 IT operations and improves end-user productivity via intelligent and innovative system management solutions.

FUJITSU Software Infrastructure Manager

Deploy: Fast, easy, reliable

Server Setup and Deployment

- Installation Manager
- Scripting Toolkit

Dynamize: Simple, sophisticated, efficient

Private Cloud Infrastructure

- Resource Orchestrator Cloud Edition

I/O Management

- Virtual-I/O Manager

Consolidated Server Infrastructures

- Resource Orchestrator Virtual Edition

Control: Centralized, easy, efficient

Server Monitoring and Control

- Operations Manager
- Agents / CIM Providers
- System Monitor
- Agentless Service
- Event Manager
- RAID Manager

Capacity Management

- Threshold Manager

Power Management

- Power Monitor
- Power Consumption Management (in iRMC)

Storage Support

- Storage Management
- Monitoring / Events

Integrate: Seamless, manage uniformly

Uniformed Management

- Fujitsu ManageNow® solutions

ServerView Integration Packs

- Microsoft SCOM
- Microsoft SCCM
- Microsoft SC VMM

- Microsoft SC PRO Packs

- VMware vCenter

- VMware vRealize

- Nagios

- Icinga

- HP Systems Insight Manager

Maintain: In any state, at any place

Remote Management

- integr. Remote Management
- Controller (iRMC)
- iRMC Advanced Pack
- Management Blade
- Support Gateway / AutoCall

Embedded Lifecycle Management

- eLCM Activation License

Update Management

- Update Manager (SVUM)
- Update DVD / SVUM Express
- Content Collector

Performance Measurement

- Performance Manager

Investigation

- Asset Mgmt. / PrimeCollect

Inspection

- Online Diagnostics / CSS

Maintenance & Support for Fujitsu Products

■ **Support Pack / ServiceContract**

Requirements	Product	Product details	Functions	Ordercodes / Comments	
Server & Storage availability	High	Recovery time	4 hours (24x7)	Onsite services 24x7 with recovery time of 4 hours	
			NBD (9x5)	Onsite services 9x5 with recovery the NBD	
	Medium	Onsite Response Time	4 hours (24x7)	Onsite services 24x7 with response time of 4 hours	
			4 hours (9x5)	Onsite services 9x5 with response within 4 hours	
	Low	(SLAs are globally available)	NBD (9x5)	Onsite services 9x5 with response the NBD	
			Warranty prolongation		
			Recovery Time: The hardware recovery time is the time in which a service engineer usually recovers the operational readiness of the hardware. The recovery time refers to the time (within the agreed service time) between the call acceptance and the recovery of the operational readiness. Recovery time excludes the time to recover any data on hard disks and installation of any software and OS.		
			Onsite Response Time: If an incident cannot be solved remotely, the onsite response time refers to the time between call acceptance and the arrival of a service engineer with the diagnosed spare part, repair starts after arrival at the customer location. Specific requirements with regards to coverage area and response times are subject to local conditions.		
			Warranty: The Warranty is based on a voluntary obligation of Fujitsu as the manufacturer to the initial purchasers of new devices. The standard warranty period included in the product depends on the product class. For its extension, an respective service option has to be acquired.		

Availability may vary from country to country.

Fujitsu delivers Maintenance and Support Services through certified support engineers for x86 servers, ETERNUS storage systems and software: From installing new products to providing fast and uncomplicated support for hardware, software and infrastructures. With the right mix of Maintenance and Support Services, Fujitsu enables the early planning for the availability of IT systems required for state-of-the art business operation. IT staff can concentrate on its core business.
