

LightCast Module

Part#: INLIGHTCAST

InFocus
Collaboration That Works

Your Display in Overdrive

Invigorate your projector or display with a LightCast Module from InFocus. This powerful little box allows you to wirelessly mirror your device's screen onto a projector screen or TV/display, and it natively supports screen casting from Android, Windows, and Apple devices. There's no software to install – users inside or outside your organization can display content within seconds. The LightCast Module also adds web browsing and interactive whiteboarding to your display's capabilities.

Make the most of the tools you already have with a LightCast Module to share information and collaborate better in the classroom, the boardroom, and beyond.

Cast Your Screen

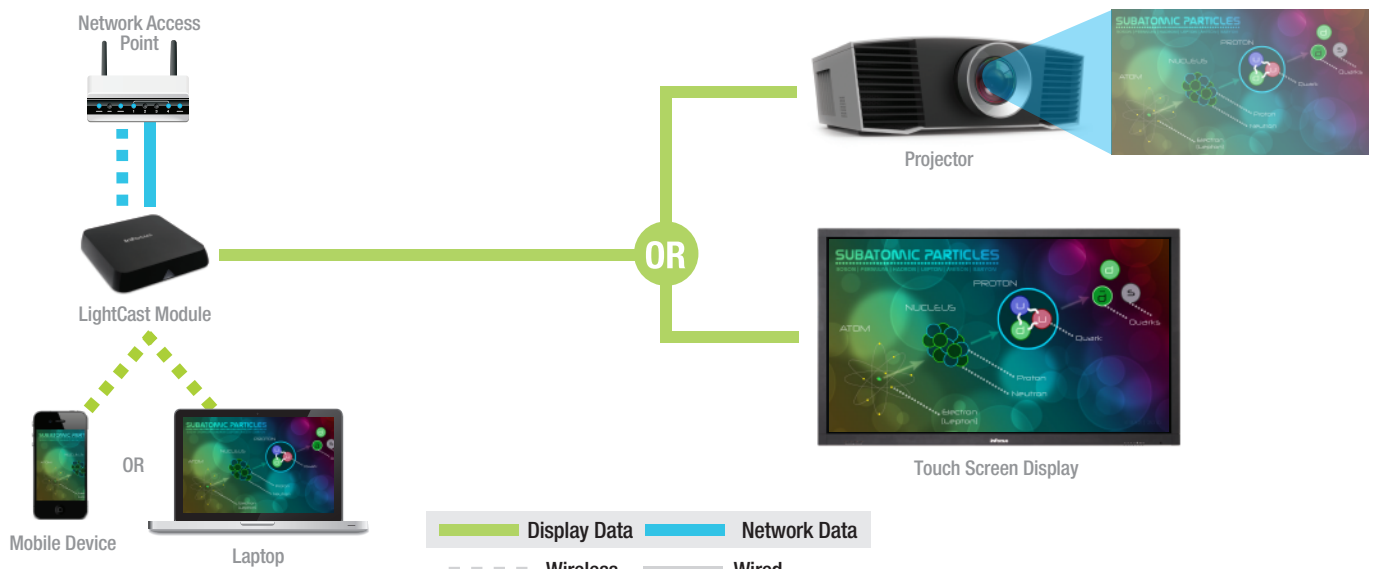

Wirelessly share your device's screen to the LightCast-connected display.

- Works with Android, Windows, Chrome OS, and Apple iOS and OSX devices
- Cast using your device's native Miracast (Android or Windows) or AirPlay (Apple) app
- Use the InFocus LightCast Sender app to cast from a Chrome device and annotate on the content you're sharing

Web Browser

Access your favorite online content and tools directly from your LightCast-connected display. No computer needed!

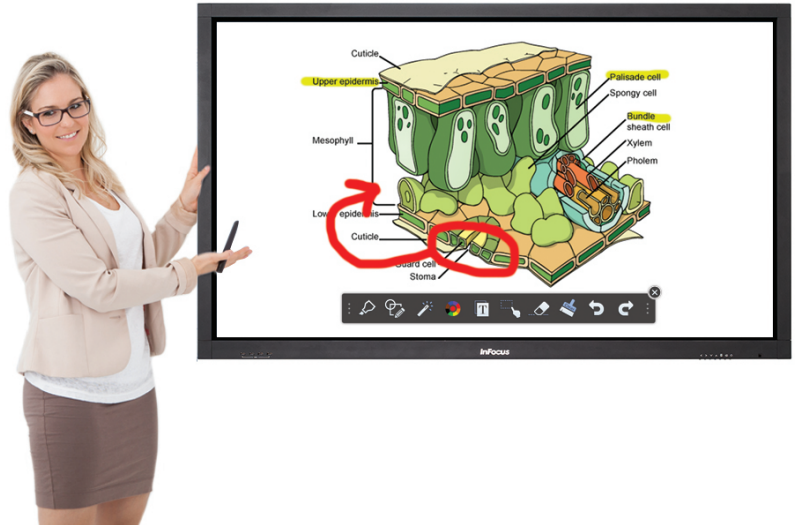

- Connect LightCast to your network via LAN or WiFi
- Schools can utilize their preferred cloud-based content or curriculum
- Convenient access to file sharing platforms, such as DropBox or Google Docs
- Easily access bookmarks or favorite sites

Interactive Whiteboard

Turn your display into a stand-alone, full-featured interactive whiteboard with the LightCast Module's built-in app.

- Connect a wireless mouse or keyboard to the LightCast Module and use the interactive whiteboard without connecting a computer
- Connect the module via USB to an InFocus touch display and utilize the power of touch on your LightCast whiteboard
- Comes with a complete collection of digital pens, highlighters, shapes, and lines in a spectrum of colors
- Create a whiteboard on a multi-screen canvas
- Paste backgrounds and images onto a whiteboard or wallpaper the entire canvas
- Collect, save, email, or print info captured on the whiteboard right from the display

Wireless Keyboard and Mouse Combo (HW-MOUSEKEYBD)

Upgrade to the Power of Touch

Maximize the potential of your LightCast Module by upgrading your display to a 70" or 80" JTouch panel from InFocus. The JTouch display enables a bright, colorful 5-point touch experience in vivid 1080p to better engage your audience. Utilize the LightCast Module to whiteboard, browse the web, and present – all with the ease and interactivity of touch.
