

A dramatic, blue-toned photograph of a sunset over the ocean. The sun is low on the horizon, creating a bright glow and sunbeams that fan out across the water. The water is dark blue with white foam from a wave in the foreground. Bubbles are visible in the lower part of the image, suggesting an underwater perspective. The sky is filled with soft, wispy clouds.

# 2020 New Products

## G Finesse Stinger

Tournament pro and Gamakatsu pro staff, Brent Ehrler, developed and fine-tuned the new G Finesse Stinger for use with the popular Neko and Wacky rig techniques. The G Finesse Stinger follows in the footsteps of similar, game-changing G Finesse hooks engineered by Gamakatsu. It features Tournament Grade Wire (TGW) which is thinner and stronger than anything else on the market, and an application of Nano Smooth Coat to decrease penetration resistance. This hook can be perfectly positioned exactly where you want it, and even moved, without damaging the bait. When the bite is tough, G Finesse opens new ways to stick it to'em. *Available in size 6 through 1/0oz. Page 16.*

## G Finesse Weedless Stinger

We heard from pro staff, Brent Ehrler, and many others, that anglers were spending far too much time tying custom weed guards with wire or heavy monofilament on their Neko rigs... because they couldn't find the right finesse hook with the right weed guard already attached. Problem solved! The G Finesse Stinger Weedless is just what the tournament trail needed. Titanium wire weed guard, Nano Smooth Coat and Tournament Grade Wire.

*Available in size 6 through 1/0 oz. Page 16.*

## B10 Stinger, TGW, Nano Smooth Coat

Our newest fly hook from our Executive series. Built using our thinner and stronger Tournament Grade Wire (TGW) and applied with our Nano Smooth Coat for less penetration resistance.

*Available in sizes 6, 4, 2, 1, 1/0 oz. Page 74.*

## Nautilus Circle Heavy Duty

To go ringed or not to go ringed... that is the question! And we've got the answer, whichever you prefer. The standard Nautilus HD hook features a ringless eye and 30% heavier wire than the regular Nautilus. (Roughly 50% less heavy than the Super Nautilus.) Whether you simply prefer the stealthiness of having less metal in the water or just have great confidence in the loop knots you've tied for years, the standard Nautilus HD hook will do the trick. You can feel the superiority by just holding it in your hand. Be careful when checking the sharpness; it doesn't differentiate between fish or fingers. *Available in 2/0 to 6/0 oz. with an NS black finish. Page 53.*

## Nautilus Circle Heavy Duty with Solid Ring

The new solid, one-piece ringed version of the Nautilus HD hook allows live bait to swim more freely, keeping it alive longer and enticing more prey to engulf its goodness. At that point, the finest high carbon steel penetrates deep and locks in tight for the battle ahead. The Ringed Nautilus HD features 30% heavier wire than the regular Nautilus and 50% less than the Super Nautilus. While its core credibility has been proven in the southern California Bluefin Tuna fisheries, there is absolute evidence of its prowess in many other heavyweight bouts with monster gamefish worldwide. Therefore, you owe it to yourself to try the Nautilus HD Ringed for all live bait techniques and bottomfish applications. Big blues and channel cats? Absolutely! Sturgeon? Oh yeah. Halibut? It's a no-brainer. Tie one on without a single regret. *Available in 2/0 to 3/0 in 5-packs, and 4/0 to 6/0 in 4-packs. Page 53.*

## Treble Stinger Rig, Fluorocarbon Leader

Bass and walleye will certainly grab hold of this stealthier version of our trailing stinger rig. We've pre-tied two inches of premium, 16-pound test fluorocarbon line instead of the coated steel wire. It works well with a wide variety of baits; however, it is most suited for trolling baits or any scenarios where fish are coming from behind and just striking the tail of the bait. Many anglers consider it mandatory for cold weather angling when fish are sluggish. *Available in sizes 12 through 8. Three per pack. oz. Page 62.*

## TW Hook

The TW stands for "Trout Worm" and is the perfect hook for those soft plastic finesse worms that require a delicate presentation. It has the right gap to accommodate the worm and hold the fish.

*Available in Bronze in new sizes 6 and 8 oz. Page 34.*

# 2020 New Products

## Tuned Tuna Plug, Ringed

Angler preferences can differ on whether to use a ringed hooked or not. And that's just fine with us because we manufacture both. Our Tuned Tuna Plug hook is now available with a welded ring. The ring provides more freedom for the hook(s) to swing unencumbered. Anglers have also found success using the ringed Tuned Tuna Plug hook for stiff rigs, thus eliminating the need for a shackle. Without reservation, they're ready for battle.

*Available in 10/0 to 12/0 in oz. packs of two. Page 59.*

## Assist 520, Ringed

In our relentless pursuit of perfection, and simplicity, we added a welded ring to our tournament-winning Assist 520 hook. The constant jiggling motion is tough on looped monofilament, fluorocarbon, and braid. We took every nuance of uncertainty out of the technique by adding a welded ring. Not only is it nearly unbreakable, but the ring is also much faster and easier to connect to the jig eye using a split ring.

*Available in 3/0 to 6/0 oz. sizes in packs of two.*

*Rigged with 160 lb. (3/0, 4/0) and 220 lb. (5/0, 6/0) braided line. Page 57.*

## Assist 620 Heavy Duty with Solid Ring

When you pursue the fish of a lifetime, chances are it's going to be really, really big; and have really, really, really sharp teeth. Take no chances! We call these "heavy-duty" Assist 620 hooks but they'll live up to tenacious-duty, gargantuan-duty or leviathan-duty equally as well. There's nothing stronger. One-piece solid rings make connections easy.

*Available in 6/0 to 8/0 oz. in packs of one. Rigged with 270 lb. (5/0, 6/0) and 400 lb. (7/0, 8/0) braided line. Page 57.*

## Jig 30 Extra Wide Gap

Designed for a wide variety of popular techniques, emerging trends, and do-it-yourself lead jig head pouring. The new 30° hook eye angle compliments the 60° and 90° jig hooks that have been the standard for decades. This extra wide gap (EWG) will handle larger baits too. The points are incredibly sticky-sharp right out of the package. Fits most 30° lead molds.

*Available in 3/0 to 7/0 oz., in NS black color. Available in bulk packs of 25 and 100. Page 45.*

## Bottom Knocker Offset

Anglers on the other side of the "big pond" have been boasting about the advantages of using an offset bottom knocker for many years now. We put them in the hands of several of our most trusted pros and tackle testers in the U.S. and waited to hear what they had to say. What a surprise, they slay bigmouths here in the States as well. Notice the finesse football head designed for fishing deep structure, and the fact that the hook eye is offset to tantalize the "lay down" action. And of course, the genuine Gamakatsu hook is as sharp as they come.

*Available in 4-packs, in 3/8, 1/2, 5/8 and 3/4 ounce sizes. Page 69.*

## Finesse Jig Head Offset

If you're familiar with the Ned rig technique, you probably haven't seen this before: An offset eye, countersunk into the jig head, with a premium forged steel Gamakatsu hook. Well, now you have. Reduce time rigging and spend more time fishing. This all-in-one design is tough to beat when bass are spooked or finicky in overfished conditions.

*Available in 4-packs, in 3/32, 1/8, 3/16, and 1/4 ounce sizes. Page 69.*

## Octopus Straight Eye NSB

West coast anglers love salmon. Salmon love herring. Herring love to rip and tear apart when you rig them with traditional hooks. Hence, the reason we designed the new Octopus Straight Eye hook. The ultra-thin, yet ultra-strong, wire slides through soft baits without damaging the tender tissue. The hook eye is narrower and smoother too, so it can slide through as well. The result is a herring with that perfect spin, followed by a chrome bright chinook or coho in the net shortly thereafter.

*Available in 8 to 4/0 sizes. oz. Page 22.*

# 2020 New Products

## Trucker Mesh Hat

Classic trucker cap style built with the quality and fit you've come to expect from Gamakatsu. Navy brim and crown with raised Gamakatsu logo lettering in white embroidery. White mesh panel and snapback, adjustable sizing clasp. *Page 80.*

## Triple Black Flat Bill Hat

Make a subtle statement, in a powerful way. Black on black on black with a raised Gamakatsu embroidered logo off-centered to the side. One size fits all snapback closure. 65/35 polyester/cotton. *Page 80.*

## G-Box 3500 Deep Utility Case

Our designers continue to expand the offering of G-Boxes because anglers keep expanding their requests for more of these intuitive storage solutions. The new G-Box 3500 is nearly 2.4" deep, so big-lipped and fat-bodied, baits fit with ease. It's 7.4" wide to accommodate stick baits, long spinners and spinner blades. The clear top lets you see what's inside and the one-handed, easy-opening design makes access exceptionally convenient. Of course, the dividers are fully adjustable too. Complete dimensions: 10" x 7.4" x 2.4".

*Page 83.*

## < Dry Bag Backpack 20L

When you need guaranteed watertight storage for long walks out to the boat, down the beach or deep into the woods, just let this Dry Bag Backpack 20L carry the load. 100% waterproof with sealed seams and breathable back padding for comfort. Top rolls and clips securely to prevent leakage. The front zippered pocket protects valuables. Compacts tightly for storage when not in use. Large enough for any overnight or multi-day trip. *Page 85.*

## Dry Bag 10L >

For extreme conditions where rain, waves, boat spray, or unforeseen accidents could really dampen the fun, store your gear in our Dry Bag 10L. 100% waterproof with sealed seams and convenient shoulder strap for easy carrying. Top rolls and clip securely to prevent leakage. The front zippered pocket is perfect for wallets, phones, licenses, or other valuables. Compacts tightly for storage when not in use. *Page 85.*

## < Backpack Tackle Storage

When you need to carry enough tackle for wherever your angling adventure may lead you, strap on our new Backpack Tackle Storage solution. Made from 1680 Denier Ballistic Nylon, it's tough, light and easy to carry. The interior pouch can be adjusted from one large compartment to two smaller ones. Exterior carry pockets on both sides are designed to hold fishing rods or water bottles. Includes two (2) G3600 and one (1) G3500D G-Boxes. Dimensions: 17" x 12" x 8". *Page 85.*

## G Finesse by Aaron Martens

**G Finesse...A Ground-Breaking Achievement In Hook Design**  
Gamakatsu entered the market on the promise of the sharpest hooks produced. It was Gamakatsu that created the "super sharp" hook category and continues to add new application-specific hooks to its offering every year.

"Over my entire career fishing Gamakatsu I envisioned making the best finesse hook in the world. **Gamakatsu's New G Finesse Series** combine **Ultra Sharp Tournament Grade Wire** with **Nano Smooth Technology** for the ultimate in hook penetration. This new technology will take my finesse fishing to a whole new level". ~ **Aaron Martens**

### G Finesse Heavy Cover Worm

The new Aaron Martens Signature G Finesse Heavy Cover Worm hook does what others can't. Extreme versatility. Martens says it best, "This hook let's me do so much, easily the most versatile soft plastics hook on the market". Featuring Aaron's custom designed keeper that holds plastics tight for endless casts without rips or tears. The rock solid keeper is made of non-corrosive tin, not plastic or lead, so it won't wear out or add unwanted weight. Like all G Finesse hooks, tournament grade wire and Nano Smooth Coat finish perfect the design. *Available in sizes 2, 1, 1/0, 2/0, 3/0, 4/0.*

### G Finesse Treble Hook ... Thinner, Stronger, Sharper, Better.

Gamakatsu continues to expand its ground-breaking G Finesse series hooks with the G Finesse Treble Hook. Designed by Tournament pro, Aaron Martens, the G Finesse Treble redefines "sharp" and "effective".

Gamakatsu's G Finesse Treble Hook is patterned after traditional O'Shaughnessy style hooks. Aaron has long been a proponent of the O'Shaughnessy hook style with its distinctive acute angle at the bottom of the hook. Martens believes the addition of the O'Shaughnessy bend, hooks and holds fish better than round bend designs. He should know, a past B.A.S.S. Angler of the Year, had three second place finishes in Bassmaster's Classics and is always in the hunt on the pro tours. When you fish as much as Aaron does, small details make a big difference. *The G Finesse Treble Hooks is available in sizes 6,5,4,3,2, 1, 1/0. Nano Smooth Coat finish.*

### G Finesse Treble Hook MH Hook

G Finesse for big, tough fish that live in the heaviest cover. Aaron Martens frequently chases them and he asked us for medium heavy G Finesse treble to meet those needs. We answered. The new G Finesse Treble MH features a tougher medium heavy, tournament grade wire for additional strength. The same Nano Smooth Coat finish and short shank promote instant hook penetration. *Available in Sizes 6, 5, 4, 3, 2, 1, 1/0.*

### G Finesse Drop Shot Hook

"I've increased my hook-up percentage by 40% ... I rarely miss a fish with this new drop shot hook. These are the sharpest, strongest, most advanced hooks of their kind on the market."

Martens has been instrumental in the development of Gamakatsu's new G Finesse Drop Shot Hook. Completely "pro-designed", Gamakatsu's new G Finesse series is a giant leap forward in fishing hook technology. "The new G Finesse Drop Shot Hook is like Gamakatsu's standard Drop Shot Hook except that I had them pull the point more towards the eye to open up the gap. Also, the hook wire, called TGW (Tournament Grade Wire) is a smaller diameter, 20% thinner, but just as strong as their other hooks." *Gamakatsu's G Finesse Drop Shot Hooks are available in sizes, 2, 1, 1/0 and 2/0. Nano Smooth Coat finish.*

# G Finesse by Shinichi Fukae

## G Finesse Swivel Shot

Drop-shot fishing for bass is nothing new but Gamakatsu's approach to it is. Our all-new Swivel Shot eliminates line twist that's commonly associated with drop shotting and vastly improves rigging efficiency. Gamakatsu's produced a revolutionary new "Twist Free" design using a premium swivel above the hook. The hook, a super-sharp Gamakatsu offset point Octopus hook, is strong enough to winch big bass out of slop --- another unique attribute of their Swivel Shot system. The Easy-Change weight system below the hook improves rigging efficiency and easy leader length adjustments without retying your rig. Pro Sennichi Fukae was instrumental in the development and testing of Gamakatsu's Swivel Shot and shared that it has been an essential element in his tournament success. Without a doubt, the Swivel Shot is an enormous leap forward in drop shot fishing that's sure to maximize angler's efficiency, increase hook-ups and land trophy-sized bass without the worry posed by conventional drop shot hooks and rigging. *Available in NS Black. Sizes: 2 - 3/0*

## G Finesse Swivel Shot Drop Shot

The original G Finesse Swivel Shot changed the game and professional anglers were eager to play. Some, like Shin Fukae, recognized the G Finesse advantage but didn't want to break from tradition entirely. The G Finesse Swivel Shot Drop Shot features our top of the line Tournament Grade Wire Drop Shot hook. Both the hook and swivel system feature the benefits of a Nano Smooth Coat finish. *Available in sizes 2, 1, 1/0 and 2/0.*

## G Finesse Swivel Shot Worm

It's more than just a new hook. It's the origination of a revolutionary new technique made possible by Gamakatsu's industry-changing G Finesse series. Pro Staff Shinichi Fukae spent the last year perfecting the concept and proving its power. We've combined our G Finesse Worm Light w/ Tin Keeper hook with the G Finesse Swivel Shot System to create the first ever Swivel Shot Worm. Unique in form, function and finesse. Texas Rig the Swivel Shot Worm to be fished in and around cover. The light wire allows for threading extremely small diameter worms, held firmly in place by the near weightless, tin keeper. The hook also features our unique Nano Smooth Coat Finish. Adding the "twist-free" advantage of the Swivel Shot allows super fast rigging without tangles. You can be assured the presentation is always perfect, and that translates into more strikes and more bent rods. *Available in sizes 1, 1/0, 2/0. Nano Smooth Coat finish.*

## G Finesse Tricky Head.

From the master finesse magician himself, Shin Fukae, comes the new Tricky Head jig head. It's the newest innovation from G Finesse. Designed to be fished with the popular shaky head technique, it brings several additional advantages to the tackle box. The Tricky Head is snag free. The weighted lead head is uniquely shaped to remain vertical during presentation, allowing the jig to bounce in and around structure while the worm or swimbait is held firmly in place by a lockdown tin keeper. You've got to see it to believe it. *Available in black or plain lead, in sizes 1/16, 3/32, 1/8 or 3/16 oz.*

## G Finesse Weedless Wacky

Gamakatsu's Tournament-winning Pro Staffer, Shinichi Fukae, never rests. On the heels of last year's new Swivel Shot Drop Shot hook, he worked tirelessly with Gamakatsu's engineers to develop the new G Finesse Weedless Wacky hook. Look closely and you'll see, it's not an ordinary weedless design. The weed guards are not plastic, they're titanium wire—solidly encased and directly molded to the hook shank. They won't come loose and they don't vibrate or add resistance. The extremely thin gauge wire retains its shape, yet is flexible enough to compress with even the gentlest nibbles. Bass won't feel a thing, until of course, the precision sharpened Gamakatsu hook does its job. The G Finesse Weedless Wacky hook features Gamakatsu's exclusive Nano Smooth Coat finish to add stealth and reduce friction for effortless hook penetration. The hook itself features Tournament Grade Wire (TGW) that is a smaller diameter, yet stronger, than other Drop Shot hooks. *Available in sizes 2, 1, 1/0, 2/0 and 3/0*

## G Finesse Worm Light with Tin Keeper

When conditions require finesse, the pros use new G Finesse Worm Light hooks. The light wire allows for threading of extremely small diameter worms with ease. Even the most fragile plastics are less likely to tear, saving on baits and increasing fishing time. The non-corrosive tin keeper doesn't add weight. Like all G Finesse hooks, the Worm Light hook penetrates with significantly less force making them substantially more effective. *Available in sizes 1, 1/0, and 2/0, all with Nano Smooth Coat Finish.*

## G Finesse Gamakatsu Tournament Snap

Gamakatsu's Tournament Snap is better by design. Primarily used on plugs for bass, walleye, salmon, strippers, steelhead, trout, panfish and other species, Gamakatsu's Tournament Snap is stainless steel and enables a full range of movement, enhancing the effectiveness of whatever plug is used. Better yet, and unlike other plug snaps, Gamakatsu's Tournament Snap will not accidentally open. The clever design of the Tournament Snap stays closed at all times as the plug eye is threaded onto the snap. It's easy and effective! Tested extensively and used under rigorous tournament conditions. *Gamakatsu's Tournament Snaps are available in two sizes, (M) Medium and (L) Large.*

## G Finesse Jig Head Wacky

Gamakatsu's Jig Head Wacky is a vast improvement over other wacky jigs. The nickel/titanium weed guard is the first indication that Gamakatsu's raised the bass fishing bar. This weed guard is small but mighty as it effectively clears hazards yet maintains its shape and rigidity under the most demanding use. The jig head is an improvement as well. Better designed to resist snags the hook eye is recessed to prevent getting hung-up in structure. Even the hook is different, a custom addition that's based on a shiner hook but modified for the Jig Head Wacky. The result is a much higher ratio of hook-ups and landed fish than any other comparable brand.

*Available in Black and Green Pumpkin. Sizes: 1/0-1/16, 1/0-3/32, 1/0-1/8, 1/0-3/16*

## G Finesse by Mike McClelland

### Mike McClelland Inspired G Finesse Hybrid Worm

The G Finesse Hybrid Worm is the brainchild of pro-staffer; Mike McClelland. He's spent more than a few hours on the water, competing in over 234 tournaments, including 10 times at the Bassmaster Classic. Mike knows the subtleties of rigging worms and soft plastic like no one else, so he and Gamakatsu's designers combined the best of his current favorite Gamakatsu worm hook and incorporated a distinctive new acute hook angle to keep baits aligned perfectly straight. Hence, the "Hybrid" name. The Nano Smooth Coat finish makes it easy to thread the thinnest finesse baits or the fattest Senkos with ease. Add industry-changing Tournament Grade Wire (TGW) to the package and things couldn't be more perfect. Take our word for it, or better yet, fish it yourself. *The G Finesse Hybrid Worm is available in sizes 1/0 to 8/0.*

## G Finesse by Brent Ehrler

### G Finesse Stinger

Tournament pro and Gamakatsu pro staff, Brent Ehrler, developed and fine-tuned the new G Finesse Stinger for use with the popular Neko and Wacky rig techniques. The G Finesse Stinger follows in the footsteps of similar, game-changing G Finesse hooks engineered by Gamakatsu. It features Tournament Grade Wire (TGW) which is thinner and stronger than anything else on the market, and an application of Nano Smooth Coat to decrease penetration resistance. This hook can be perfectly positioned exactly where you want it, and even moved, without damaging the bait. When the bite is tough, G Finesse opens new ways to stick it to'em. *Available in size 6 through 1/0.*

### G Finesse Weedless Stinger

We heard from pro staff, Brent Ehrler, and many others, that anglers were spending far too much time tying custom weed guards with wire or heavy monofilament on their Neko rigs... because they couldn't find the right finesse hook with the right weed guard already attached. Problem solved! The G Finesse Stinger Weedless is just what the tournament trail needed. Titanium wire weed guard, Nano Smooth Coat and Tournament Grade Wire. *Available in size 6 through 1/0.*

# History of Gamakatsu

Gamakatsu started producing fish hooks in 1955. At that time, they were the smallest hook manufacturer in Japan and all of their hooks were made by hand. In 1963 they introduced a new automated heating facility which catapulted them to the forefront of the Japanese market. In 1974, they introduced fully automated hook making machines and found it necessary to build a second factory in order to meet the demand they had created.

In 1976, being well established as the leading Japanese hook manufacturer, Gamakatsu started building a new factory to produce high quality fishing rods for the Japanese market.

After upgrading the hook manufacturing machines in 1986, they expanded their product line. As a result, Gamakatsu Co. Ltd became a major manufacturer with a full line of high quality fishing rods, hooks, apparel, and fishing related items by 1987.

In 1988, after upgrading the automated tempering facilities and expanding the hook factory, Gamakatsu Co. Ltd opened Gamakatsu International Co., Ltd. in Thailand and Gamakatsu Shantou Co. Ltd. in China in 1989.

When anglers purchase Gamakatsu hooks, they are buying an original product made by GAMAKATSU. Many hook suppliers are using fabricated Japanese sounding names bought from several different manufacturers.

## Market Leader GAMAKATSU

Gamakatsu is the leading fish hook manufacturer in Japan. They are constantly testing new materials, trying to improve their product which already sets the standard for the rest of the industry.

In 1992 Gamakatsu USA Inc. was established to provide Gamakatsu brand hooks to the U.S. market. Obviously, Gamakatsu is well on it's way of achieving their goal of becoming the market leader in the USA and the world!

## Environment has our attention

Since 1955, Gamakatsu has strictly stuck to the theme of "Nature and Technology". We work hard to develop new, hi-tech products that benefit the outdoorsman without adversely effecting the environment.

---

*Gamakatsu's policy of technical development has always been "the best of quality". We are always searching for new ways to make our existing products better in addition to constantly looking for unique products which are not yet available. We believe that only this attitude can give our customers the best they deserve!*

---

## All over the world

Gamakatsu products are used worldwide. With offices located around the world, Gamakatsu is able to research its markets and develop unique products that meet the needs of even the most demanding anglers.

**Aaron Martens**  
Gamakatsu Pro

# History of Gamakatsu

## Invention of hooks

20,000 years ago, the invention of the fish hook marked the beginning of sport fishing. The first hooks were made of wood or bones. As technology improved, so did the hooks. Records show that copper hooks were made in Banchen 7,000 years ago and artificial flies were used in Egypt 4,000 years ago. Fishing was also a popular form of entertainment in ancient China.

Today, modern materials and manufacturing techniques have resulted in hundreds of styles of extremely high quality hooks, designed for specific types of fish and fishing methods.

## Quality of hooks

Gamakatsu hooks are the corner stone of the Gamakatsu company, and are famous worldwide. Material and technology are what makes these hooks superior to all other brands. The Gamakatsu company, in conjunction with a material manufacturer, developed a material known as High Carbon steel specifically for the manufacture of fish hooks. This material not only contains a higher percentage of carbon, but also has very few impurities. As a result, GAMAKATSU has earned Anglers' trust throughout the world. The life of a fish hook is measured by the sharpness, hardness, and viscosity of the point. Using low quality materials results in points that are weak and not truly sharp. In order to use High Carbon steel, Gamakatsu developed a unique electronic tempering process which enables hooks to be tempered in a stable condition. As a result, Gamakatsu is able to manufacture consistently high quality, extremely sharp hooks in large quantities.

## Hook producing

The methods used in creating Gamakatsu hooks is what makes it so superior to all other brands. First, only the most premium grade of high carbon steel is used. This insures against any blemishes in the metal which can weaken the hook.

Secondly, Gamakatsu has the most advanced tempering system in the world. Every hook is heated to the exact temperature that is perfect for that particular style and size then cooled in oil. This process produces hooks which are super strong, but not brittle. It is extremely difficult to achieve a balance between strength and flexibility, and it took many years for Gamakatsu to perfect this process.

Finally, and perhaps most importantly, our sharpening process is the most modern in the world, and results in a perfectly conical point that is unequaled in sharpness.

## Simply the best

Gamakatsu's dedication to producing the highest quality fish hook made, as well as the innovation they bring to the industry has kept the company at the forefront of the premium hook market. Among the innovative ideas that Gamakatsu has introduced are:

- Durability - A unique tempering process allowing us to make a hook of superior strength and durability.
- Strength - Hooks made of high carbon steel for superior strength.
- Sharpness - Conically needle honed points that are sharp from the package and stay sharp.
- Color Variation - Colored hooks in red, blue, green, gold, nickel, bronze, black, shrimp and fluorescent colors F-red, F-chartreuse, F-pink, F-orange, F-glow, F-green, F-purple to match the color of your lure or bait.
- Style Variation - Innovative hook designs like the extra wide gap (EWG) that hook and hold fish better.

Gamakatsu makes a hook for any and every fishing situation. So go ahead, tie on a Gamakatsu because it is "Simply the best!"

Aaron Martens

"Over my entire career fishing Gamakatsu I envisioned making the best finesse hook in the world. **Gamakatsu's New G Finesse Series** combine **Ultra Sharp Tournament Grade Wire** with **Nano Smooth Technology** for the ultimate in hook penetration. This new technology will take my finesse fishing to a whole new level".

~ Aaron Martens

 NANO SMOOTH COAT

Gamakatsu's G Finesse Treble Hook is patterned after traditional O'Shaughnessy style hooks. Aaron has long been a proponent of the O'Shaughnessy hook style with its distinctive acute angle at the bottom of the hook. Martens believes the addition of the O'Shaughnessy bend, hooks and holds fish better than round bend designs.

### G Finesse Treble MH

## G Finesse Worm Light with Tin Keeper

SIZES	1	1/0	2/0
Nano Smooth Coat	LS 358210(4)	358211(4)	358212(4)

NANO SMOOTH COAT

When conditions require finesse, the pros use new G Finesse Worm Light hooks. The light wire allows for threading of extremely small diameter worms with ease. Even the most fragile plastics are less likely to tear, saving on baits and increasing fishing time. The non-corrosive tin keeper doesn't add weight. Like all G Finesse hooks, the Worm Light hook penetrates with significantly less force making them substantially more effective.

## G Finesse Jig Head Wacky

SIZES	1/0-1/16	1/0-3/32	1/0-1/8	1/0-3/16
Black	LS 312411-BK-1/16(3)	312411-BK-3/32(3)	312411-BK-1/8(3)	312411-BK-3/16(3)
Green Pumpkin	LS 312411-GP-1/16(3)	312411-GP-3/32(3)	312411-GP-1/8(3)	312411-GP-3/16(3)

Gamakatsu's Jig Head Wacky is a vast improvement over other wacky jigs. The nickel/titanium weed guard is the first indication that Gamakatsu's raised the bass fishing bar. This weed guard is small but mighty as it effectively clears hazards yet maintains its shape and rigidity under the most demanding use. The jig head is an improvement as well. Better designed to resist snags the hook eye is recessed to prevent getting hung-up in structure. Even the hook is different, a custom addition that's based on a shiner hook but modified for the Jig Head Wacky. The result is a much higher ratio of hook-ups and landed fish than any other comparable brand.

## G Finesse Tricky Head

SIZES	3/0-1/16	3/0-3/32	3/0-1/8	3/0-3/16
Plain Lead	LS 370413-1/16(3)	370413-3/32(3)	370413-1/8(3)	370413-3/16(3)
Black	LS 370413-BK-1/16(3)	370413-BK-3/32(3)	370413-BK-1/8(3)	370413-BK-3/16(3)

From the master finesse magician himself, Shin Fukae, comes the new Tricky Head jig head. It's the newest innovation from G Finesse. Designed to be fished with the popular shaky head technique, it brings several additional advantages to the tackle box. The Tricky Head is snag free. The weighted lead head is uniquely shaped to remain vertical during presentation, allowing the jig to bounce in and around structure while the worm or swimbait is held firmly in place by a lockdown tin keeper. You've got to see it to believe it. Available in black or plain lead.

- A. Weedless Keel shape design glides effortlessly over and through structure
- B. Lock Down Keeper won't tear finesse plastics. Rig straight and secure every time

## G Finesse Tournament Snap

SIZES	Medium (60 lb.)	Large (80 lb.)
LS	333000-M(10)	333000-L(10)

Tournament Snap design intensifies the lures swimming action

High quality stress relieved stainless steel.

1. **TWIST & CLICK** - Hook the open end of the Tournament Snap inside the lure eye. Twist and click into place.
2. **PULL** - Keep you line tight and pull at a 90 degree angle away from the lure to finish setting.

## G Finesse by Mike McClelland

### G Finesse Hybrid Worm

Gamakatsu Hybrid Worm is the definitive choice for all of my soft plastic rigs on tour. The unique hybrid design helps me hook and land more fish than ever before. When combined with Tournament Grade Wire and Nano Smooth Coat technology, Hybrid Worm is the ultimate fish catching machine. ~ Mike McClelland

Mike McClelland

SIZES	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0
Nano Smooth Coat	LS 366211(4)	366212(4)	366213(4)	366214(4)	366215(4)	366216(4)	366217(4)	366218(4)

The G Finesse Hybrid Worm is the brainchild of pro-staffer, Mike McClelland. He's spent more than a few hours on the water, competing in over 234 tournaments, including 10 times at the Bassmaster Classic. Mike knows the subtleties of rigging worms and soft plastic like no one else, so he and Gamakatsu's designers combined the best of his current favorite Gamakatsu worm hook and incorporated a distinctive new acute hook angle to keep baits aligned perfectly straight. Hence, the "Hybrid" name. The Nano Smooth Coat finish makes it easy to thread the thinnest finesse baits or the fattest Senkos with ease. Add industry-changing Tournament Grade Wire (TGW) to the package and things couldn't be more perfect. Take our word for it, or better yet, fish it yourself.

Brent Ehrler

Tournament pro and Gamakatsu pro staff, Brent Ehrler, developed and fine-tuned the new G Finesse Stinger for use with the popular Neko and Wacky rig techniques. The G Finesse Stinger follows in the footsteps of similar, game-changing G Finesse hooks engineered by Gamakatsu. It features Tournament Grade Wire (TGW) which is thinner and stronger than anything else on the market, and an application of Nano Smooth Coat to decrease penetration resistance. This hook can be perfectly positioned exactly where you want it, and even moved, without damaging the bait. When the bite is tough, G Finesse opens new ways to stick it to'em.

TITANIUM WEEDGUARD

We heard from pro staff, Brent Ehrler, and many others, that anglers were spending far too much time tying custom weed guards with wire or heavy monofilament on their Neko rigs... because they couldn't find the right finesse hook with the right weed guard already attached. Problem solved! The G Finesse Stinger Weedless is just what the tournament trail needed. Titanium wire weed guard, Nano Smooth Coat and Tournament Grade Wire.

### Trout Treble

SIZES	18	16	14
Red	LS 273301(4)	273302(4)	273303(4)
Gold	LS 273201(4)	273202(4)	273203(4)

Developed for that discerning trout fishermen in mind. With the advances and popularity of artificial dough and paste type baits, it was only a matter of time that an added extra edge was needed. These high quality, sticky sharp trebles fit the bill. The light wire design will allow your bait to float higher and keep it more in the strike zone. Also, the fine wire design will allow for quick and deeper hook penetration.

EWG - EXTRA WIDE GAP

For crankbaits of all types --- there's nothing better --- it's the perfect replacement hook. First, we opened the points of this treble up slightly for even better hooking performance. The Short Shank EWG Treble converts those fish that slash at your bait into sure hook-ups. The shorter shank and wide gap design provides less room for fish to throw the hook. In fact, this attribute actually wedges the fish between the hook and the crankbait...it's the ultimate in fish holding, which means fish landing performance. That's not all. It also features Gamakatsu's exclusive "Magic Eye" that makes changing hooks a breeze. The hook's inline points run parallel to the bait creating a perfect balance point so your crankbaits run true.

### Treble EWG, Short Shank, 2X Strong (Magic Eye)

## Octopus Straight Eye

**NEW**

West coast anglers love salmon. Salmon love herring. Herring love to rip and tear apart when you rig them with traditional hooks. Hence, the reason we designed the new Octopus Straight Eye hook. The ultra-thin, yet ultra-strong, wire slides through soft baits without damaging the tender tissue. The hook eye is narrower and smoother too, so it can slide through as well. The result is a herring with that perfect spin, followed by a chrome bright chinook or coho in the net shortly thereafter.

## Octopus Light

Gamakatsu answered the call for a fine wire Octopus hook, the Octopus Light for use in drop shot and trout fishing. Gamakatsu's Octopus Light features an offset beak point for optimal penetration with bait or plastics. The smaller diameter hook wire enhances hook penetration and is a certain advantage when fishing timid or light-biting fish.

## Octopus Circle 4x Strong, Straight Eye (Inline-point), TOURNAMENT LEGAL

To comply with new angling regulations in the Gulf of Mexico, we've redesigned and reinforced our most popular circle hook. The new 4X Strong Circle Hook is built for the toughest battles in the deep sea. The straight eye, NS black finish and inline point (not offset) complies with the new rules, but doesn't reduce the hook's effectiveness. This is the new "go-to" hook charter captains and professional anglers are using for deep dropping and reef and wreck fishing. Heavy up your rods, reels and line, because the 4X Strong Circle Hook will never give up when it comes to pulling snapper and monster grouper out of their fortified hangouts.

## Octopus Circle 1x Strong, Out Barb

Will Gamakatsu's new Octopus Circle "Outbarb" 1xStrong hook change angling forever? There's a strong possibility, and for good reason. Traditional hooks place the barb on the inside of the hook bend. With certain techniques, like jigging, chunk baiting, and bottom fishing, if your line becomes limp or goes slack it could get entangled by the hook barb and possibly be nicked or cut. The outbarb design eliminates that risk. But there's more. Tests have proven that when an outbarb is combined with Gamakatsu's circle hook design, it results in deeper penetration and a higher hook retention rate. Think about it: a barb on the inner side of a hook bend is somewhat protected. A barb on the outside of the hook bend will come into contact with whatever flesh it touches and prevent movement in the opposite direction from which it entered. Consistently, Gamakatsu researchers and prostaffers documented increased retention of hooked species.

SIZES	3/0	4/0	5/0	6/0	7/0	8/0	10/0	12/0
NS Black	LS 363413(6)	363414(6)	363415(6)	363416(6)	363417(5)	363418(5)	363420(3)	363422(3)

### Walleye Wide Gap

SIZES	8	6	4	2	1	1/0	2/0
NS Black	LS 202406(10) 25 202406-25	202407(10) 202407-25	202408(10) 202408-25	202409(8) 202409-25	202410(8) 202410-25	202411(6) 202411-25	202412(6) 202412-25

In-line needle point design won't roll or twist when trolled. Light weight for live bait presentations. Forged for extra strength.

### Shiner Straight Eye

SIZES	6	4	2	1	1/0	2/0	3/0	4/0	5/0
NS Black	LS 51407(8) 25 51407-25	51408(7) 51408-25	51409(7) 51409-25	51410(6) 51410-25	51411(6) 51411-25	51412(6) 51412-25	51413(5) 51413-25	51414(4) 51414-25	51415(4)

Great hook for live shiners, crawdads, and shrimp. This style is also very popular for many different types of Catfish baits.

### Shiner Upturned Eye

SIZES	1	1/0	2/0	3/0	4/0
NS Black	LS 52410(6) 25 52410-25	52411(6) 52411-25	52412(6) 52412-25	52413(5) 52413-25	52414(4) 52414-25

Same great shape, only with an upturned eye, makes it great for snelling.

The advantage of the Big River Open Eye over conventional siwash hooks, is the unique hook design that features an additional bend at the bottom of the hook. This innovative design feature hooks and holds fish tight.

The "Open Eye" feature allows this hook to be easily attached to a split ring, barrel swivel, welded ring or hook hanger simply by closing the eye with a pair of pliers.

## Baitholder Hooks (See page 63 for snells.)

### Split Shot/Drop Shot Weedless

Gamakatsu has done it... again! Another fishing hook first with the introduction of the new Weedless Split Shot/Drop Shot Hook. The wide gap hook design is paired to a hair-trigger hand-tied, weed-guard for instant hook-ups. The weed guard maintains its shape and consistency fish-after-fish and is ultra-effective in staying weedless with exposed hook riggings.

SIZES	4	2	1	1/0	2/0	3/0

## Finesse Wide Gap Weedless

Featuring an innovative nylon weed guard, allowing you to pitch your wacky rig into the heaviest cover.

SIZES	4	2	1	1/0	2/0	3/0	4/0	5/0	6/0
NS Black	LS 230908(5)	230909(5)	230910(5)	230911(5)	230912(5)	230913(4)	230914(4)	230915(4)	230916(4)

## Wicked Wacky

SIZES	1/0	2/0	3/0	4/0	5/0
NS Black	LS 306411(3)	306412(3)	306413(3)	306414(3)	306415(3)

The new standard in wacky hook designs. Built on Gamakatsu proven Shiner hook, the Wicked Wacky features a durable hand tied weed guard that provides anglers the confidence to throw their wacky rig in and around heavy cover. In addition the Wicked Wacky takes the power drop shot to a new level. Gamakatsu designed an innovative hollow tube, hand tied on the shank. Simply run the tag end of your line through the tube, tie on your weight, and pitch into the heaviest cover for a whole new power drop shot presentation.

## Worm, Skip Gap

SIZES	1/0	2/0	3/0	4/0	5/0
NS Black	LS 266411(6)	266412(6)	266413(5)	266414(5)	266415(5)
NS Black	ZS 266411-25	266412-25	266413-25	266414-25	266415-25

There is no better hook for skipping plastics under docks and cover. The Skip Gap is a multiple use hook that is perfect for a variety of soft plastic baits. Top water buzz frogs, Texas rigging, Carolina rigging, the Skip Gap can do it all!

## Finesse Heavy Cover Worm with Tin Keeper

SIZES	1	1/0	2/0	3/0
NS Black	LS 311410(4)	311411(4)	311412(4)	311413(4)

The Finesse Heavy Cover Worm Hook is a light wire, finesse hook that features the first wide gap straight shank hook for finesse worm fishing. Just like all the Heavy Cover Hooks the Finesse features a welded eye and wire keeper that assures your worm doesn't slide down the hook.

## Heavy Cover Worm with Tin Keeper

SIZES	3/0	4/0	5/0
NS Black	LS 304413(4)	304414(4)	304415(4)

The new standard in Flip hooks has arrived. The new Heavy Cover Worm hook has been built to the highest standards to fight the biggest fish in the heaviest cover. The Heavy Cover Worm features our rock solid welded eye, perfect for tying a Snell knot with braid. Gamakatsu has worked with our top pros to design an improved keeper. Instead of a bulky heat shrink barb, the Heavy Cover Worm features a small wire keeper. The keeper has a small compact profile and is strategically placed for superior holding power.

## Super Heavy Cover Worm with Tin Keeper

SIZES	3/0	4/0	5/0
NS Black	LS 310413(4)	310414(4)	310415(4)

The Super Heavy Cover Worm Hook is indestructible with a welded eye and extra heavy duty cold-forged hook wire that will not flex. It's perfect for flipping into heavy cover or punching through thick overhead cover. The addition of an oversized barb holds hooked fish solid and the punch wire/keeper firmly secures worms so they stay rigged cast-after-cast.

## Worm, Oversize G-Mag

SIZES ONE SIZE ONLY 8/0

**No Black** LS 213418(5)

Designed to rig magnum size tubes, worms, and big swim baits.

## Worm, Extra Wide Gap (EWG)

SIZES		4	2	1	1/0	2/0	3/0	4/0	5/0
<b>No Black</b>	LS	58408(6)	58409(6)	58410(6)	58411(6)	58412(6)	58413(5)	58414(5)	58415(5)
	25	58408-25	58409-25	58410-25	58411-25	58412-25	58413-25	58414-25	58415-25

	100	74412-100	74413-100	74414-100	74415-100	
<b>Red</b>	LS	74312(5)	74313(5)	74314(4)	74315(4)	74316(3)

*SuperLine*

An EWG on steroids. This high carbon heavy wire hook was designed to fish braided line in heavy cover. For serious flipping in the tulle's, overhead mats, or pads. The EWG Superline will increase your strike to hook ratio when you need to get nasty.

Perfect when you require a quicker descent rate without increasing size or adding weights. Want to turn up the heat with a Senko? Go with a Superline for that deadly quick descent!

### Worm, Superline Extra Wide Gap (EWG), Weighted

SIZES	2/0 - 1/16	2/0 - 1/8	3/0 - 1/16	3/0 - 1/8	4/0 - 1/16	4/0 - 1/8	5/0 - 1/16	5/0 - 1/8	
NS Black	LS	74412-1/16(S)	74412-1/8(S)	74413-1/16(S)	74413-1/8(S)	74414-1/16(S)	74414-1/8(S)	74415-1/16(S)	74415-1/8(S)

The Weighted EWG Superline is a perfect compliment to the EWG arsenal. Do you need more casting distance with a soft plastic frog? This hook will get you back in the junk. Want to flip into heavy cover without the hassle of pegging a bullet sinker? Consider the EWG Weighted Superline your new best friend. The Lead is strategically placed and milled to perfection.

 EWG - EXTRA WIDE GAP

**SuperLine**

There are times when calling up fish requires a little something extra. For this purpose we designed the EWG Ringed Superline. Need to fish a Horny Toad in the slop and want it to walk? Our solid piece ring allows the bait to swing freely. Fishing a Fluke for schooling smallmouth or big spots and want that super erratic action? This is your hook. Handles braided line and heavy monofilament with ease.

## Extra Wide Gap (EWG) Monster

SIZES	5/0	6/0	7/0
NS Black	LS 283415(5)	283416(4)	283417(4)

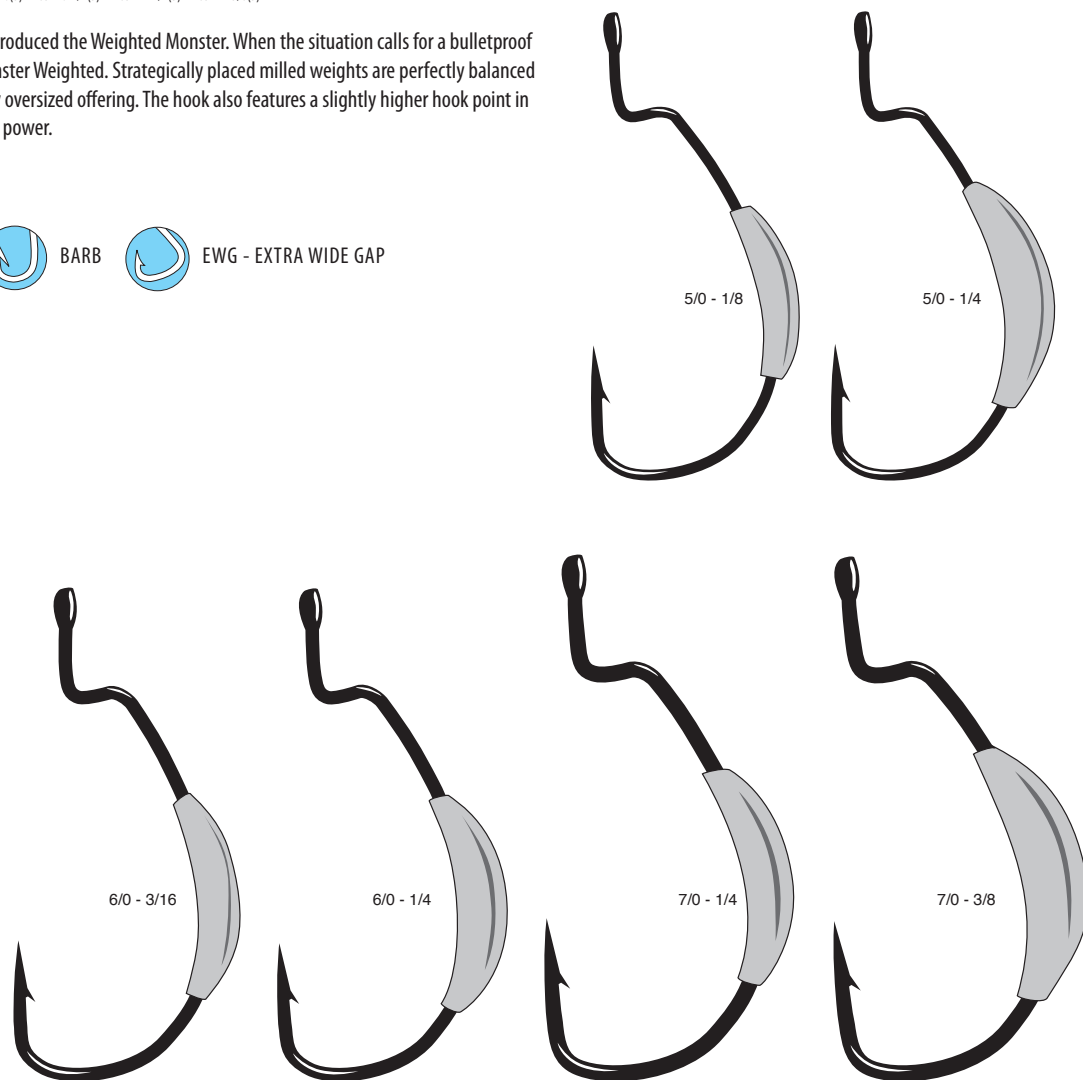

When only a high carbon heavy wire hook will do your choice should be the EWG Monster. Hard core doesn't even begin to describe the Monster. Slings a Mission Fish back in the cover? We now have the perfect hook. Loading for bear with a giant Gitzit, Double Wide Beaver, or oversized Slug-O? The Monster has you covered. Headed to El Salto, Clear Lake, or the California Delta for double digit behemoths? Gamakatsu Monster is the choice when you are taking no prisoners. Heavy line, heavy rods, big baits, and big fish is EWG Monster time!

## Extra Wide Gap (EWG) Monster, Weighted

SIZES	5/0 - 1/8	5/0 - 1/4	6/0 - 3/16	6/0 - 1/4	7/0 - 1/4	7/0 - 3/8
NS Black	LS 283415-1/8(3)	283415-1/4(3)	283416-3/16(3)	283416-1/4(3)	283417-1/4(3)	283417-3/8(3)

On the heels of the EWG Monster we have introduced the Weighted Monster. When the situation calls for a bulletproof weighted hook, look no further than the Monster Weighted. Strategically placed milled weights are perfectly balanced and serve as a keel for large swimbaits or any oversized offering. The hook also features a slightly higher hook point in relation to the eye to help aid in hook setting power.

### Superline Spring Lock

*SuperLine*

SIZES	3/0	4/0	5/0	6/0	7/0	
No Black	LS	296413(3)	296414(3)	296415(3)	296416(2)	296417(2)

The new Superline Spring Lock is based on the proven Superline EWG. The Spring Lock features a 28 degree eye with a stress relieved stainless steel center point spring lock. This is the ideal soft plastic hook when the situation requires your bait to stay locked and secure.

Go big or go home. When conditions call for big baits, Gamakatsu's new Spring Lock Monster is precisely designed to hold and position them perfectly straight and firmly attached. Weighted with 3/8 or 1/2 ounce lead, the Spring Lock Monster stands up to aggressive casts and viciously hard hook sets. The "center point" spring lock is easy to start and tighten. Baits stay straight every time and all the time. 9/0, 10/0 or 12/0 hook sizes await trophy-caliber catches.

	100 48411-100	48412-100	48413-100	48414-100	48415-100

Perfect round bend for a wider bite area and superior holding power.

### Worm, Straight Shank, Wire Guard

SIZES	2	1	1/0	2/0	3/0	4/0	5/0
<b>Bronze</b>	LS 65109(4)	65110(4)	65111(4)	65112(4)	65113(3)	65114(3)	65115(3)

Like our popular standard worm hook, only with a weed guard.

### Jig 30° Extra Wide Gap (EWG)

SIZES	3/0	4/0	5/0	6/0	7/0
NS Black 25	382413-25	382414-25	382415-25	382416-25	382417-25
NS Black 100	382413-100	382414-100	382415-100	382416-100	382417-100

Designed for a wide variety of popular techniques, emerging trends, and do-it-yourself lead jig head pouring. The new 30° hook eye angle compliments the 60° and 90° jig hooks that have been the standard for decades. This extra wide gap (EWG) will handle larger baits too. The points are incredibly sticky-sharp right out of the package. Fits most 30° lead molds

### Gamakatsu Micro Gap hooks

Offering sport fisherman the ultimate in design, the finest quality forged steel and unparalleled workmanship. Originally designed for finesse presentations for ice fishing, the Micro Gap selections are perfectly suited to many fly tying techniques as well. The fine wire design penetrated with less pressure, lessening tissue damage allowing for easier catch and release fisheries. All Micro Gap hooks are finished in NS black.

*The **Micro Perfect Gap** hook has an up-eye design for easy snelling and optimal gap for minnows or small plastics.*

*The **Micro Wide Gap** features a straight hook eye for minnow and soft plastics.*

*The **Micro V Gap** also features a straight hook eye, but adds a deep V bend to improve retention.*

## Gamakatsu G-Carp Hooks

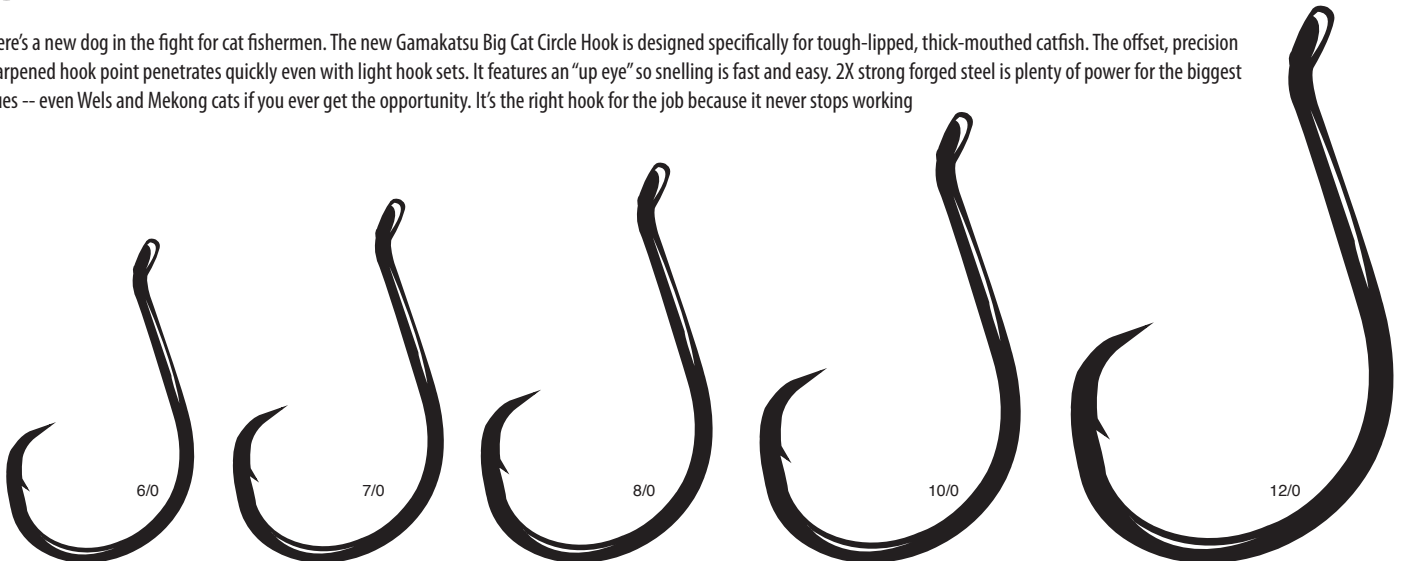

We've dialed in our carp hook selection to make it the best selling line of hooks in many European countries. There's two simple points that are critical for carp – hide the hook and hold the bait. That's why we've carefully shaped all the new G Carp hooks to hide perfectly concealed within every type of bait. Furthermore, we've included unique micro barbs to grab onto soft dough balls and putty baits and hold them in place. All G Carp hooks are forged for strength and feature the innovative **Nano Smooth Coat** for fast penetration.

## Big Cat Circle

SIZES	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0	10/0	12/0	
Ns BLACK	LS	356411(6)	356412(6)	356413(6)	356414(6)	356415(6)	356416(6)	356417(5)	356418(5)	356420(3)	356422(3)

There's a new dog in the fight for cat fishermen. The new Gamakatsu Big Cat Circle Hook is designed specifically for tough-lipped, thick-mouthed catfish. The offset, precision sharpened hook point penetrates quickly even with light hook sets. It features an "up eye" so snelling is fast and easy. 2X strong forged steel is plenty of power for the biggest Blues -- even Wels and Mekong cats if you ever get the opportunity. It's the right hook for the job because it never stops working

Saltwater Hooks

Gamakatsu®

### Live Bait with Solid Ring

SIZES	2	1	1/0	2/0	3/0	4/0
<b>No Black</b>	LS 18409R(7)	18410R(6)	18411R(6)	18412R(5)	18413R(5)	18414R(4)
<b>No Black</b>	2S 18409R-2S	18410R-2S	18411R-2S	18412R-2S	18413R-2S	18414R-2S

Our standard Live Bait hook with a solid one piece ring for a natural presentation. Much smoother than any welded ringed hook, these are designed for larger baits and heavier lines.

### Live Bait Light Wire with Solid Ring

SIZES	6	4	2	1
<b>No Black</b>	LS 220407R(7)	220408R(7)	220409R(7)	220410R(6)
<b>No Black</b>	2S 220407R-2S	220408R-2S	220409R-2S	220410R-2S

Super smooth solid one piece ring attached to the Light Wire Live Bait hook. The perfect hook for small live baits and delicate presentations.

### Live Bait Heavy Duty with Solid Ring

SIZES	1/0	2/0	3/0	4/0	5/0	6/0
<b>No Black</b>	LS 00411R(5)	00412R(5)	00413R(5)	00414R(4)	00415R(4)	00416R(4)

Heavy wire and forged for extra strength, this hook is the go to hook for big fish on big baits.

### Live Bait Heavy Duty Circle, **TOURNAMENT LEGAL**

SIZES	5/0	6/0	7/0	8/0	9/0	10/0	11/0	12/0
Ns Black	LS 210415(6)	210416(5)	210417(5)	210418(4)	210419(3)	210420(3)	210421(2)	210422(2)

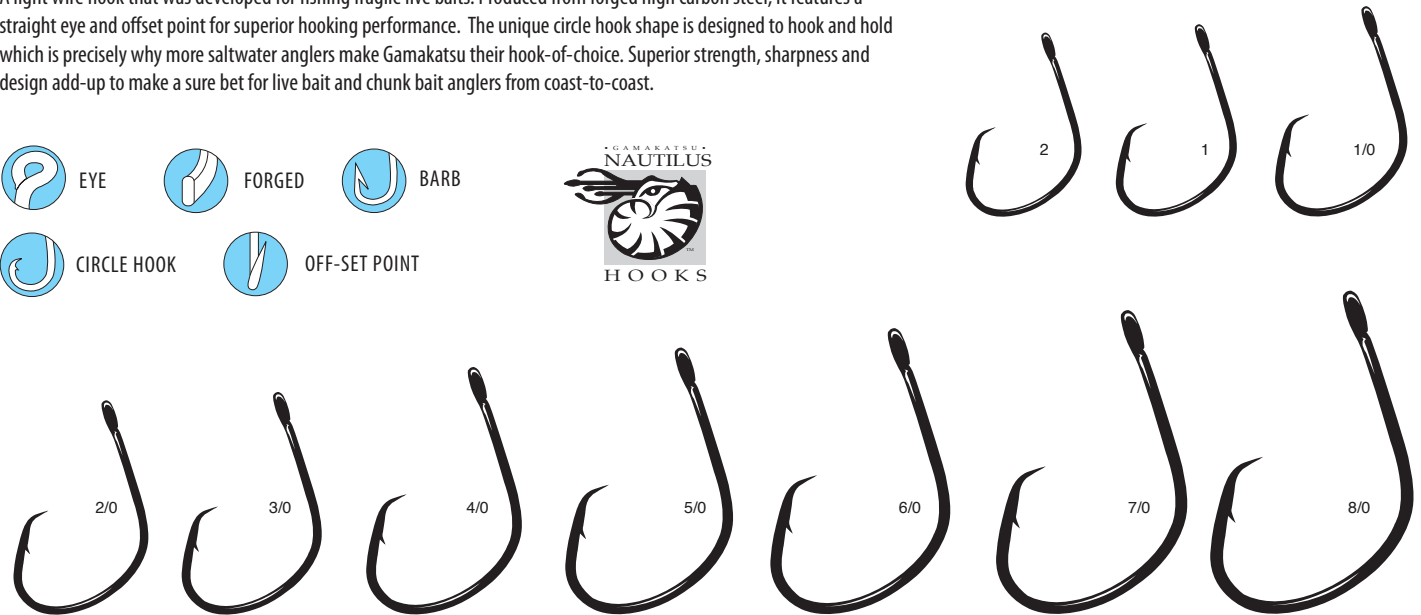

Same design as the Live Bait Heavy Duty, but with a non-offset circle hook point. The perfect hook for giant fish on big chunk baits.

### Nautilus Light

Sizes	2	1	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0
Ns Black	332409(8)	332410(8)	332411(7)	332412(6)	332413(5)	332414(5)	332415(4)	332416(3)	332417(3)	332418(3)

A light wire hook that was developed for fishing fragile live baits. Produced from forged high carbon steel, it features a straight eye and offset point for superior hooking performance. The unique circle hook shape is designed to hook and hold which is precisely why more saltwater anglers make Gamakatsu their hook-of-choice. Superior strength, sharpness and design add-up to make a sure bet for live bait and chunk bait anglers from coast-to-coast.

### Nautilus Circle

SIZES		1	1/0	2/0	3/0	4/0	5/0	6/0
LS	42410(8)	42411(7)	42412(7)	42413(6)	42414(6)	42415(5)	42416(5)	
NS Black	25	42410-25	42411-25	42412-25	42413-25	42414-25	42415-25	42416-25

One of the meanest circle hook designs around. The Nautilus grabs its prey and simply doesn't let go. This hook can be used for live bait or chunk bait presentations and has proven its strength many times.

### Nautilus Circle With Solid Ring

The most popular circle hook with solid ring, grabs its prey and simply does not let go.

SIZES		2/0	3/0	4/0	5/0	6/0
LS	42412R(5)	42413R(5)	42414R(4)	42415R(4)	42416R(4)	
NS Black	25	42412R-25	42413R-25	42414R-25	42415R-25	42416R-25

### Nautilus Circle Heavy Duty NEW

SIZES		2/0	3/0	4/0	5/0	6/0
LS	377412(7)	377413(6)	377414(6)	377415(5)	377416(5)	
NS Black	25	377412-25	377413-25	377414-25	377415-25	377416-25

To go ringed or not to go ringed... that is the question! And we've got the answer, whichever you prefer. The standard Nautilus HD hook features a ringless eye and 30% heavier wire than the regular Nautilus. (Roughly 50% less heavy than the Super Nautilus.) Whether you simply prefer the stealthiness of having less metal in the water or just have great confidence in the loop knots you've tied for years, the standard Nautilus HD hook will do the trick. You can feel the superiority by just holding it in your hand. Be careful when checking the sharpness; it doesn't differentiate between fish or fingers.

### Nautilus Circle Heavy Duty With Solid Ring NEW

SIZES		2/0	3/0	4/0	5/0	6/0
LS	377412R(5)	377413R(5)	377414R(4)	377415R(4)	377416R(4)	
NS Black	25	377412R-25	377413R-25	377414R-25	377415R-25	377416R-25

The new solid, one-piece ringed version of the Nautilus HD hook allows live bait to swim more freely, keeping it alive longer and enticing more prey to engulf its goodness. At that point, the finest high carbon steel penetrates deep and locks in tight for the battle ahead. The Ringed Nautilus HD features 30% heavier wire than the regular Nautilus and 50% less than the Super Nautilus. While its core credibility has been proven in the southern California Bluefin Tuna fisheries, there is absolute evidence of its prowess in many other heavyweight bouts with monster gamefish worldwide. Therefore, you owe it to yourself to try the Nautilus HD Ringed for all live bait techniques and bottomfish applications. Big blues and channel cats? Absolutely! Sturgeon? Oh yeah. Halibut? It's a no-brainer. Tie one on without a single regret.

### Super Nautilus Circle

SIZES	4/0	5/0	6/0	7/0	8/0	10/0	11/0
NS Black	LS 272414(6)	272415(6)	272416(6)	272417(5)	272418(4)	272420(3)	272421(2)

Made of high carbon steel, it's a heavier wire hook than our standard "Nautilus" and forged for quality and added strength. This hook has become a favorite amongst demanding saltwater fishermen.

## Octopus Circle, 4x Strong, Straight Eye (Inline-point) **TOURNAMENT LEGAL**

To comply with new angling regulations in the Gulf of Mexico, we've redesigned and reinforced our most popular circle hook. The new 4X Strong Circle Hook is built for the toughest battles in the deep sea. The straight eye, NS black finish and inline point (not offset) complies with the new rules, but doesn't reduce the hook's effectiveness. This is the new "go-to" hook charter captains and professional anglers are using for deep dropping and reef and wreck fishing. Heavy up your rods, reels and line, because the 4X Strong Circle Hook will never give up when it comes to pulling snapper and monster grouper out of their fortified hangouts.

SIZES	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0	9/0	10/0

## Double Assist 520

SIZES	2/0	4/0
Tin	LS 368512(2)	368514(2)

New vertical jigging techniques like "slow pitch" and "shore" jigging are gaining attention at a rapid rate. Many of the top anglers are using two assist hooks instead of one. Think about it, you're doubling your odds of hooking short or soft biters. Gamakatsu's Double Assist hooks are designed for fast and easy replacement on all types of butterfly, flat fall and "iron" jigs. The 6" super strong braided line loop can be adjusted to position each hook at the exact desired length, even or offset. Red heat shrink tubing on the hook shank is an added attractor and prevents chafing and bite-offs. And there's no concern of knots coming undone. Hooks are forged and barbed. Available in 2/0 and 4/0 in packages of two.

### Assist 510

SIZES	1	1/0	2/0	3/0	4/0
Tin	LS 219510(4)	219511(4)	219512(3)	219513(3)	219514(2)

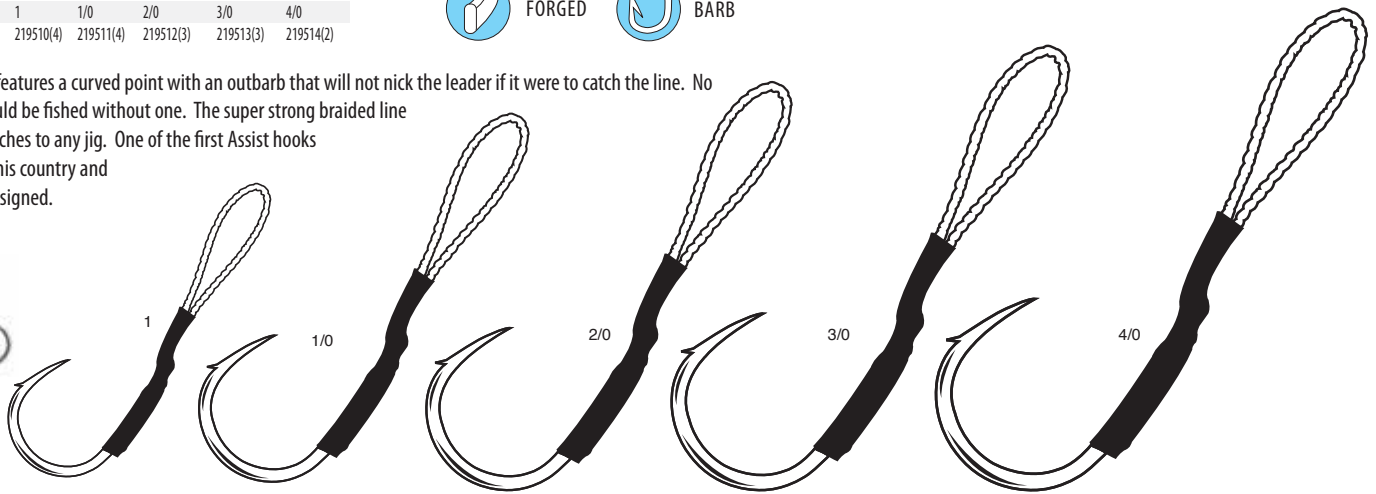

FORGED

BARB

The Assist 510 features a curved point with an outbarb that will not nick the leader if it were to catch the line. No vertical jig should be fished without one. The super strong braided line loop easily attaches to any jig. One of the first Assist hooks introduced in this country and still the best designed.

### Tuned Assist Hd

SIZES	8/0	10/0
Tin	LS 270518(1)	270520(1)

This new addition to our Assist hook line up is for deep jigging and big fish. These heavy duty assist hooks come in two sizes, 8/0 and 10/0 with 270lb braided line. Both feature a solid ring at the top for easy and secure attachment to the jig.

### Magnum Assist

SIZES	8/0	10/0
NS Black	LS 256418(2)	256420(2)

Featuring a 200lb. braided line loop and our 4x Strong Octopus hook in 8/0 and 10/0, the Magnum Assist is perfect for larger Halibut jigs and deep drop speed jigs.

### Steel Assist With Magic Eye Swivel

SIZES	3/0	5/0

BARB

NEW

In our relentless pursuit of perfection, and simplicity, we added a welded ring to our tournament-winning Assist 520 hook. The constant jigging motion is tough on looped monofilament, fluorocarbon, and braid. We took every nuance of uncertainty out of the technique by adding a welded ring. Not only is it nearly unbreakable, but the ring is also much faster and easier to connect to the jig eye using a split ring.

Rigged with 160 lb. (3/0, 4/0) and 220 lb. (5/0, 6/0) braided line.

### Assist 620 Heavy Duty with Solid Ring

NEW

When you pursue the fish of a lifetime, chances are it's going to be really, really big; and have really, really, really sharp teeth. Take no chances! We call these "heavy-duty" Assist 620 hooks but they'll live up to tenacious-duty, gargantuan-duty or leviathan-duty equally as well. There's nothing stronger. One-piece solid rings make connections easy.

Rigged with 270 lb. (5/0, 6/0) and 400 lb. (7/0, 8/0) braided line.

**Big Eye Circle** **TOURNAMENT LEGAL**

Our standard circle hook designed with a big eye for rigging heavier monos or dacrons. Also good for chunking for tuna and halibut.

## Tuned Tuna Plug with Ring

**NEW**

SIZES	10/0	11/0	12/0
TIN	LS 379520(2)	379521(2)	379522(2)

Angler preferences can differ on whether to use a ringed hooked or not. And that's just fine with us because we manufacture both. Our Tuned Tuna Plug hook is now available with a welded ring. The ring provides more freedom for the hook(s) to swing unencumbered. Anglers have also found success using the ringed Tuned Tuna Plug hook for stiff rigs, thus eliminating the need for a shackle. Without reservation, they're ready for battle.

### Tuned Tuna With Welded Eye

SIZES	8/0	9/0	10/0	11/0
TIN	LS 369018(3)	369019(3)	369020(2)	369021(2)

A great hook for Stiff Rigs and other trolling applications. The forged needle point helps ensure a solid hook set. New welded eye will not open or flex.

### Magic Eye Tuna Plug 3X

SIZES	3/0	4/0	5/0	6/0	7/0
TIN	LS 365513(5)	365514(5)	365515(5)	365516(4)	365517(4)

You've likely heard about the advantages of using tandem Gamakatsu double, single-point hooks instead of factory trebles on your favorite tuna plugs. Hookup ratios increase and releases are far kinder to our finned friends. Magic Eye Tuna Plug 3X Hooks make rigging the system dramatically easier because the hook eyes are beveled so they slide right on a split ring without needing special pliers or tools. It's faster, easier and foolproof. Attach with hook points opposed.

A premier bait hook for salmon eggs. Also great for floating dough baits.

## Walleye LG Two Hook Rig

Hook Size	6	4
Line Size	8	10
<b>Ns Black</b>	LS 278307-08(10)	278308-10(10)

Two hook rig with adjustable top hook. Includes glowbead and tube.

## Treble Stinger Rig, Wire Leader

Hook Size	12	10	8	6
<b>Ns Black</b>	364404(3)	364405(3)	364406(3)	364407(3)

It's widely known that trailing stinger rigs are the ticket for catching short-biting walleyes when jigging in cold water conditions. For years, seasoned anglers have painstakingly tied their own stinger rigs using premium Gamakatsu hooks. Now, we've done all the work for you. Gamakatsu Treble Hook Stinger Rigs are 100% ready to use and will outlast most others on the market. A coated steel wire is machine crimped and then dipped in a durable rubberized coating; allowing it to hang perfectly behind your jig or bait. And since they're connected to a premium Gamakatsu treble hook, they'll stay sticky sharp, fish after fish, after fish. Save time. Save money. Keep fishing longer with Gamakatsu Treble Hook Stinger Rigs.

## Treble Stinger Rig, Fluorocarbon Leader

**NEW**

Hook Size	12	10	8
<b>Red</b>	378304(3)	378305(3)	378306(3)

Bass and walleye will certainly grab hold of this stealthier version of our trailing stinger rig. We've pre-tied two inches of premium, 16-pound test fluorocarbon line instead of the coated steel wire. It works well with a wide variety of baits; however, it is most suited for trolling baits or any scenarios where fish are coming from behind and just striking the tail of the bait. Many anglers consider it mandatory for cold weather angling when fish are sluggish.

## EWG Walleye Snell

Hook Size	Line (LB)	Stock #
6	8	228307-08(3)
4	8	228308-08(3)

As barbless hook regulations expand, Gamakatsu has met the challenge with a better designed, sharper and stronger Barbless Octopus hook. Designed expressly for the application, Gamakatsu's Barbless Octopus hooks feature a slightly wider gap that provides better fish-holding benefits than traditional barbed Octopus hooks. These hooks comply with state regulations requiring "barbless hooks". Proven effective for a variety of species, Gamakatsu's Barbless hooks are now available in pre-tied mooching rigs. Tied on premium monofilament line with 6 foot leaders, Gamakatsu Barbless Mooching Rigs are packaged individually.

Hook Size	Line (lb)	Stock #
3/0 Chartreuse	30	372313-C-30(3)
3/0 Flame Red	30	372313-FR-30(3)

When the sockeye start running, you better be ready to get in the game fast. With our Sockeye Rigs, you are geared up in seconds. Tied on 30 lbs. leaders with sticky sharp 3/0 Red Octopus hooks, available in 2 colors - chartreuse or flame red. Nothing is easier or faster, except maybe your limit. We've done the work for you to maximize your time on the water.

### Top And Bottom Rig

Hook Size	Line (lb)	Stock #
2	30	238409(1)

Designed primarily for bottom fishing, this rig uses two size 2 NS Black Baitholder hooks attached to a 40lb. leader so they stick out about 4" from the main line and are spaced about 10" apart. It includes a barrel swivel at the top of the rig and a cross lock for easy weight attachment at the bottom.

### Fluke Rig With Teaser

Hook Size	Line (lb)	Stock #
2/0 White/Red	40	239412-RW(1)
2/0 White/Chartreuse	40	239412-CW(1)

Two different color combination fluke rigs available in a size 2/0 hooks with a 40 lb. leader. The Fluke Rigs feature a spinner blade and a teaser made with synthetic hair material that is more tooth resistant and durable in saltwater. The teasers are in either red and white or a chartreuse and white combination with either red or green beads to match. They also feature a 3 way swivel with a crosslock to attach the weight.

## Striper Rig

Hook Sizes	4/0	5/0	6/0	7/0	8/0
NS Black	305414-40(2)	305415-40(2)	305416-40(2)	305417-40(2)	305418-40(2)

Striper fishermen are a demanding group. Striper anglers have asked for a dependable pre-tied rig to meet their needs and Gamakatsu has answered. The Striper Rig features a proven Octopus hook, tied on 28" of premium 40 lb. monofilament. The rig also includes a high quality #4 SPRO barrel swivel rated at 130 lb. This rig is sure to give any striper fisherman the confidence they need to catch that trophy of a lifetime.

## Striper Rig With Sliding Sinker Lock

Hook Size	Line (lb)	Stock #
5/0	80	241415(2)

This rig features a 5/0 NS Black Baitholder hook snelled to a 80 lb. clear leader with a 100 lb. barrel swivel and a sliding sinker lock that goes on the main line above the swivel.

## Wacky Head

SIZES	2	2	2
WEIGHT	LS 1/32	1/16	1/8
	282309-1/32(4)	282309-1/16(4)	282309-1/8(4)

Gamakatsu is known for its innovative and functional designs, the "Wacky Head" jig is no exception. With its unique flat shape, the "Wacky Head" will entice the finickiest of biters with its side to side rolling type action. Also to add to its attraction is the red epoxy head, and a short shank wide gap designed hook.

### Skip Gap Head

SIZES	3/0-1/8	3/0-3/16	4/0-3/16	4/0-1/4
Brown	293413-BR-1/8(4)	293413-BR-3/16(4)	293414-BR-3/16(4)	293414-BR-1/4(4)
Green Pumpkin	293413-GP-1/8(4)	293413-GP-3/16(4)	293414-GP-3/16(4)	293414-GP-1/4(4)

Gamakatsu has developed its own jig head based on the Skip Gap worm hook. It has the same innovative bend that holds your bait secure on the hook. There are no barbs or pegs that can tear apart a small finesse worm. The unique bend lends itself to simplicity and will change the way you shakily fish.

### Stand Up Alien Head

SIZES	3/0-1/8	3/0-3/16	3/0-1/4	3/0-5/16
Black	309413-BK-1/8(4)	309413-BK-3/16(4)	309413-BK-1/4(4)	309413-BK-5/16(4)

Looking for the quintessential stand-up jig head? Gamakatsu's developed the answer with its all-new Stand-Up Alien Head. Perfect for rock or hard bottom fishing, The innovative keeper pin holds plastics without tearing. The benefit is a better presentation, more casts and more mileage out of your plastics. Features a NS Black finesse hook and is available in Green Pumpkin and Black jig heads.

### Superline Swim Bait Head

SIZES	4/0 - 1/8	4/0 - 3/16	4/0 - 1/4	5/0 - 3/8	5/0 - 1/2
Clear	LS 353414-1/8(3)	353414-3/16(3)	353414-1/4(3)	353415-3/8(3)	353415-1/2(3)
Pearl White	LS 353414-PW-1/8(3)	353414-PW-3/16(3)	353414-PW-1/4(3)	353415-PW-3/8(3)	353415-PW-1/2(3)

Until now, you simply couldn't find a premium, swim bait jig head with a premium Gamakatsu hook. The new Superline Swim Bait Head changes all that. The head profile is streamlined for a natural action. Choose premium painted heads or unpainted for anglers that prefer a do-it-yourself custom look. A heavy wire, 60-degree Superline hook performs optimally with braided line and heavy monofilament. Completing the package, The Spring Lock keeper holds all soft plastic swim baits secure and tight.

## Round 26

SIZES	1/0	1/0	2/0	2/0	3/0	3/0

SIZES	1	1	1
WEIGHT	LS 1/16	3/32	1/8
	506410-1/16(4)	506410-3/32(4)	506410-1/8(4)

When new tournament techniques emerge, our pro-staff are usually holding the rod. Case in point, the new Finesse Jig Head is designed to optimize the "Ned Rig." It's all about precise positioning of small soft plastics in a manner that translates into that slow, gliding fall that big bass can't resist. The spring keeper and light wire #1 hook are critical features. Lead heads are unpainted allowing for easy customization.

1 - (1/16 oz.)

1 - (3/32 oz.)

1 - (1/8 oz.)

### Crappie Jig Head

SIZES	2	2	2
WEIGHT	LS 1/16	3/32	1/8
	507409-1/16(5)	507409-3/32(5)	507409-1/8(5)

Designed for tournament focused crappie anglers. This premium design, specialized Crappie Jig Head, features a sticky sharp Gamakatsu hook fully molded through the lead head. The smooth eye won't burr even the lightest line. A heavy-duty spring lock keeper encircles the shank for nearly half its length. Soft plastics won't move a millimeter with this innovation. #2 light wire jig hooks in NS black.

2 - (1/16 oz.)

2 - (3/32 oz.)

2 - (1/8 oz.)

### Finesse Jig Head Offset

SIZES	1/0	1/0	1/0	1/0
WEIGHT	LS 3/32	1/8	3/16	1/4
	386411-3/32(4)	386411-1/8(4)	386411-3/16(4)	386411-1/4(4)

1/0 - (3/32 oz.)

1/0 - (3/16 oz.)

1/0 - (1/8 oz.)

1/0 - (1/4 oz.)

If you're familiar with the Ned rig technique, you probably haven't seen this before: An offset eye, countersunk into the jig head, with a premium forged steel Gamakatsu hook. Well, now you have. Reduce time rigging and spend more time fishing. This all-in-one design is tough to beat when bass are spooked or finicky in overfished conditions.

### Bottom Knocker Offset

SIZES	1/0	1/0	1/0	1/0
WEIGHT	LS 3/8	1/2	5/8	3/4
	383411-3/8(4)	383411-1/2(4)	383411-5/8(4)	383411-3/4(4)

1/0 - (3/8 oz.)

1/0 - (5/8 oz.)

1/0 - (1/2 oz.)

1/0 - (3/4 oz.)

Anglers on the other side of the "big pond" have been boasting about the advantages of using an offset bottom knocker for many years now. We put them in the hands of several of our most trusted pros and tackle testers in the U.S. and waited to hear what they had to say. What a surprise, they slay bigmouths here in the States as well. Notice the finesse football head designed for fishing deep structure, and the fact that the hook eye is offset to tantalize the "lay down" action. And of course, the genuine Gamakatsu hook is as sharp as they come.

**Gamakatsu** has been making premium quality hooks since 1955. Every hook is made using Gamakatsu's own high quality, high carbon steel and is meticulously crafted to the highest of standards. Unlike other hook manufacturers, Gamakatsu hooks are made in their own facility which is one of the most technologically advanced in the world and their consistency is unmatched. What you'll find in this catalog are 35 styles of super sharp, super strong fly hooks made for the serious fly tyer and fly angler who will settle for nothing but the best. While an investment in a good fly rod, fly reel, fly line and the knowledge on how to properly use them can enhance the fly fishing experience, the hook is the one piece of equipment at the end of it all that has to hang on to the object of pursuit. Don't settle for anything less than Gamakatsu quality.

**The Executive Series - The most advanced fly hook available.**

Executive Series fly hooks offer some very unique designs like the R10B Retainer Bend and the C13U Keel Balance. Hooks like the S10 series of hooks have beak points that allow for effortless penetration, especially with light tippets and a slightly wider gap. They also have a shank length just a little longer than standard dry fly hooks. While the R10B and C13U are matte black, the B10S Stinger hooks and the rest of the Executive series have a beautiful NS Black finish that not only looks good, but is also very corrosion resistant. There's no other hook series like it.

- Corrosion Resistant N.S. Black Finish
- Beak Points
- Unique Designs

**Traditional Series - A necessity for patterns of time honored tradition.**

The Traditional Series hooks are mostly all bronze finished, have needle points, and are designed to match up in style and size with other popular hook brands. The key difference being the quality of the steel used in them and the sharpness of the hook. The Traditional Series hooks also feature the traditional Salmon/Steelhead tapered loop up eye hooks, but in non-traditional finishes like Red in addition to the traditional NS Black finish. The styles all match, but the quality is unmatched.

- Traditional Sizing
- Traditional Bronze Finish
- Gamakatsu Strength and Sharpness

**Saltwater Series - The most complete line of salt water fly hooks.**

By far and away the finest selection of Saltwater fly hooks available. 9 styles featuring our most popular SC15 and other hooks ranging in sizes from 18 to 10/0. The SC15 is used for many different patterns but is also a great hook for tube flies. The SP11-3L3H makes a great popper hook. There's a hook style for every saltwater application imaginable. Every Saltwater Series fly hook is made from the highest quality high carbon steel and has a durable tin plating or NS black finish for corrosion resistance. Because of the steel used, even the 3x strong hooks are surprisingly light for their size and their strength is unparalleled. These hooks will hold a point much better than stainless steel hooks and are sticky sharp right out of the bag. No sharpening is ever needed before fishing with a Gamakatsu hook and because they're not stainless, they will eventually corrode out of a fish's mouth if the hook is taken deep and cannot be removed. From the flats to blue water, there's no hook selection better than this.

- Corrosion Resistant Tin Finish
- Nine styles to choose from
- Innovative designs

### G-Box 3200, Utility Case

- Size 8.1" x 5.7" x 1.6".
  - Great for terminal tackle and small lures.
  - Micro Rib System- Micro Adjustable Dividers.
  - Easily opened with one hand.
  - Does not open when dropped.
  - Tackle stays in place and does not go to other compartments.
  - Rounded corners easy to get out of tackle bags or boat compartments.
- Item #G3200

Micro Rib System - Micro Adjustable Dividers

### G-Box 3600, Utility Case

- Size 10.8" x 7.4" x 1.7".
  - Great for plastic baits and hardbaits.
  - Micro Rib System- Micro Adjustable Dividers.
  - Easily opened with one hand.
  - Does not open when dropped.
  - Adjustable Layout Vertically and Horizontally.
  - Tackle stays in place and does not go to other compartments.
  - Rounded corners easy to get out of tackle bags or boat compartments.
- Item #G3600

### G-Box 3500D Deep Utility Case

**NEW**

- Size 10" x 7.4" x 2.4".
  - Great for plastic baits and hardbaits.
  - Micro Rib System- Micro Adjustable Dividers.
  - Easily opened with one hand.
  - Does not open when dropped.
  - Adjustable Layout Vertically and Horizontally.
  - Tackle stays in place and does not go to other compartments.
  - Rounded corners easy to get out of tackle bags or boat compartments.
- Item #G3500D

Our designers continue to expand the offering of G-Boxes because anglers keep expanding their requests for more of these intuitive storage solutions. The new G-Box 3500 is nearly 2.4" deep, so big-lipped and fat-bodied, baits fit with ease. It's 7.4" wide to accommodate stick baits, long spinners and spinner blades. The clear top lets you see what's inside and the one-handed, easy-opening design makes access exceptionally convenient. Of course, the dividers are fully adjustable too.

### G-Box 3700, Utility Case

### G Finesse Dry Backpack

- Waterproof PVC Material.
- Backpack design with adjustable waist strap.
- Velcro and latch closure sinches down for water tight transport.

Item #BAG001

Secure your gear and keep it dry with our Waterproof Backpack. Double sealed seams are impervious to moisture even when submerged. The top closures open wide for easy access, then roll down tight and buckles quick to protect contents. Padded shoulder straps and waist belt complete the package.

### Dry Bag Backpack 20L

NEW

- Waterproof PVC Material.
- Backpack design with adjustable straps.
- Velcro and latch closure sinches down for water tight transport.

Item #BAG004

When you need guaranteed watertight storage for long walks out to the boat, down the beach or deep into the woods, just let this Dry Bag Backpack 20L carry the load. 100% waterproof with sealed seams and breathable back padding for comfort. Top rolls and clips securely to prevent leakage. The front zippered pocket protects valuables. Compacts tightly for storage when not in use. Large enough for any overnight or multi-day trip.

NEW

### Dry Bag 10L

- Waterproof PVC Material.
- Convenient shoulder strap.
- Velcro and latch closure sinches down for water tight transport.

Item #BAG003

For extreme conditions where rain, waves, boat spray, or unforeseen accidents could really dampen the fun, store your gear in our Dry Bag 10L. 100% waterproof with sealed seams and convenient shoulder strap for easy carrying. Top rolls and clip securely to prevent leakage. The front zippered pocket is perfect for wallets, phones, licenses, or other valuables. Compacts tightly for storage when not in use.

### Backpack Tackle Storage

NEW

- Backpack design with adjustable waist strap.
- Comfortable 3d mesh padding.

Item #BAG005

When you need to carry enough tackle for wherever your angling adventure may lead you, strap on our new Backpack Tackle Storage solution. Made from 1680 Denier Ballistic Nylon, it's tough, light and easy to carry. The interior pouch can be adjusted from one large compartment to two smaller ones. Exterior carry pockets on both sides are designed to hold fishing rods or water bottles. Compacts tightly for storage when not in use. Includes two (2) G3600 and one (1) G3500D G-Boxes. Dimensions: 17" x 12" x 8".

### Gamakatsu Luxxe fishing line

A PE based filament, that is much stronger than classic braided line.

It is a 4 strand braided line, along with the PE fibers makes it more abrasion resistant and has less memory. In turn the benefits are less tangles, and better casting distances.

Available in the following test # 8, 10, 12, 14, 16.

TEST#	8	10	12	14	16
164 YD Spool	19511-08	19511-10	19511-12	19511-14	19511-16
