License No:

G 36269

Project:

Investigated area where work carried out in 1981, 1985 + 1988 on a shear zone approx. 65' wide with mineralization pyrite, calcite and visible gold. Removing blasted rock manually, breaking rock with

hammer, collected samples (7) and
forwarded for assaying.

7967 Quartz vein Pyrite & calcho
7968 ✓ ✓ ✓ ✓
7969 Quartz Pyrite on norite

7970 { Quartz veins chlorite shear
21 }
72 } Massive calcho & pyrite
73 } Malochite.

Assay results are appended.
sample location shown on attached MAP

Geology:

Mallard Twp. is in the Abitibi
greenstone belt, Porcupine Mining Division.
Predominant rock types are mafic
metavolcanic flows with a few local
mafic intrusives. A pervasive
sliposity in the area strikes at 30°-40°

Regional geology of Mallard is
covered in Ontario Geological
Survey report 248 Geology of
the Carleton area 1987.
