

Dedicated to professionals

Satellite Pro R50-C-12N

With a combination of performance and reliability, the 38.1cm (15") Satellite Pro R50-C notebook is ideal for any professional environment. Not only can you feel confident in the fast processing speeds of the device's Intel® Core™ architecture, but you can also feel reassured by a solid design that's built to withstand the pressures of daily use. Add to that a heavy typer keyboard and a 3D sensor for data protection and you have a device that's built to last. And with the latest integrated Intel® Premium Wi-Fi and LAN, the Satellite Pro R50-C won't date quickly either – making it more cost effective in the long run. The benefits don't end there: the Satellite Pro R50-C has an advanced system that supports silent working, a matt LCD screen for sharp visuals and a full size keyboard – making it both user- and office-friendly. Meanwhile, a Kensington lock offers security for the device itself, and pre-installed McAfee software provides protection for all your data on the inside. You can even take control of your power consumption using the pre-installed Toshiba Eco Utility. As the starting point in a wide range of Toshiba business devices, the Satellite Pro R50-C is the affordable way to meet all your professional needs.
