

Large-screen productivity. Ultra-thin portability

Tecra Z40-C-105

One of Toshiba's thinnest, lightest business laptops yet, the premium 35.6 cm (14") Tecra Z40-C matches ultra-portability with a long-lasting battery and larger screen that lets you do more on the go. So you can be as productive when travelling as you are in the office. Beneath the clean design that's standard across this line-up, the high-performance Z40-C is powered by 6th-generation Intel® Core™ processors, for all the speed and responsiveness you need. Its full-size ports are made for more flexible working too, so you won't require any special adapters to use them. And because the Z40-C comes with high-level security and manageability technologies, you can protect your business data everywhere. Our latest business line-up also uses the same design, docking, software image and many other features - for compatible IT solutions that you can implement across the business. Plus, the magnesium chassis has been rigorously drop, pressure and spill-tested* by independent German institute, TÜV Rheinland, so you know it's robust enough to take on your mobile working life. For large-screen productivity that travels further, there's the Tecra Z40-C.
