Basic catalogue

To design inspiring spaces for learning – that has always been the vital challenge that VS Vereinigte Spezialmöbel-fabriken GmbH & Co. KG has set itself. As one of Europe's leading manufacturers of school furniture and a full-range supplier with a wide portfolio, this is exactly what we offer our customers: comprehensive, stimulating furnishing, spatial and media solutions for educational establishments. In addition, we offer an extensive range of services such as planning, project support and customer service.

Our products stand out for their quality, functionality and durability. As has been proved by comparisons worldwide. The issue of sustainability is extremely important for us. And so too, of course, is safety. And you will find information about both these topics in this catalogue.

We hope you enjoy browsing through it, discovering new ideas and planning your space! If you need answers to any questions, advice or project support, our qualified customer support staff will be delighted to assist you personally.

Furniture supplier and fitter for the knowledge society since 1898

VS Vereinigte Spezialmöbelfabriken GmbH & Co. KG is one of the most expert and dynamic full-range suppliers of school equipment in Europe – with a wide range permitting comprehensive equipment concepts for schools, public authorities, offices and conference spaces.

This family-owned company has been developing, manufacturing and marketing furniture and media equipment for the knowledge society for over 120 years. Its head office and sole production site is located in Tauberbischofsheim in Baden-Württemberg, Germany.

It is from here that VS controls the entire logistics chain. This includes consulting and planning by its own specialists as well as delivery, assembly and project support from customer support and service staff. In this way, it is able to develop high-performance, economically attractive end-to-end solutions for its customers.

Whereas in the past, the task was to translate reforming educational ideas into room concepts, the focus nowadays is on modern pedagogic and educational requirements: To design schools as a learning and living space for students and teachers; to provide space for variable learning settings; to create possibilities for differentiated and individual, collaborative and personal, teacher-centered and self-driven learning.

Solutions for digital learning landscapes also play an important role. "VS - Das Systemhaus" is the VS Vereinigte Spezialmöbelfabriken centre of expertise for technical all-round solutions covering every aspect of digital media. As a specialist in the integration of digital media in school and teaching environments, "VS - Das Systemhaus" can supply everything required: interactive displays and boards, peripheral equipment, support systems, safe and secure connection solutions and simple device management. The technical solutions are integrated in the corresponding room and furnishing concepts.

Reliable, sustainable, responsible

As a large, family-owned SME, VS stands for a reliable, responsible and independent business approach. The company has adopted a long-term strategy geared towards sustainability. This has given it its successful competitive position.

Continuity at the company site

VS develops and manufactures its products directly at its headquarters in Tauberbischofsheim and continuously invests in modern production facilities and highly efficient processes. This results in the creation of economically attractive furniture with convincing functionality.

Data and facts

- VS was founded in 1898 as Vereinigte Schulbankfabriken. One of the milestones in the company's history was the development of the wooden skid chair in 1950.
- VS is a family-owned company with 1,500 employees. The Managing Director is Philipp Müller.
- VS has always supported contemporary pedagogic initiatives. VS is developing comprehensive room concepts for educational establishments in the company of the Federal association for posture and movement promotion (Bundesarbeitsgemeinschaft für Haltungs- und Bewegungsförderung e.V.) and the consulting firm LernLandSchaft.

Quality and environmental standards

- Quality management system as per DIN EN ISO 9001
- Environmental management system as per DIN EN ISO 14001
- Energy management system as per DIN EN ISO 50001
- Various quality and environmental certificates awarded to VS products by external test institutes, for example Cradle to Cradle Certified, European Level, GS label for tested safety, the label "TÜV Rheinland certified: Emission-tested. Pollutant-tested", AGR Healthy Back Campaign quality label (Aktion gesunder Rücken e.V.), Greenguard certificate

Training and vocational education

- Training through seven occupational courses and six work/study courses in the industrial, technical and commercial sectors
- An in-house technical training center
- Cooperations with schools and universities
- Awarded the Dualis label by IHK Heilbronn-Franken as a company with superb training opportunities
- Gold partner of the Baden-Wuerttemberg Cooperative State University, Mosbach

Solar power installations (1)

Solar panels on factory 5

Orchard (2)

The fruit is used to produce juice which is sold to VS employees

Chip shredder (3)

PEFC-certified beechwood residue from regional forests is used to produce the raw material for the LIGNOdur press

Boiler room 3 (4)

Makes the heat generated in boiler room 1 available for factory 3 and factory 4

VS cogeneration plant (5)

Covers 40% of VS's power requirements and provides a large proportion of the space heating

Factory 6 (6)

Energy-aware building concept with energy performance certification

Loading bay (7)

We use recyclable material for furniture packaging and transport

LIGNOdur press (8)

Compacts beechwood chips to produce Lignodur table tops

Chip silos 1 and 2 (9)

Store for the waste wood from VS's production activities, used for boiler room 1

Solar power installations (10)

Solar panels on factory 1

VS canteen (11)

In-house catering for VS employees and guests

Paint shop (12)

Exclusive use of environmentally friendly, water-based paints for over 20 years

Committed to environmentally friendly production

Since 2009, VS has been a member of the UN Global Compact, the world's largest initiative for responsible corporate management. Based on ten universal principles, the initiative pursues the vision of a sustainable global economy for the good of all humankind. As a member, VS is committed to conducting its business activities in the light of these principles and requires its suppliers to do the same.

The high value-added achieved at the company headquarters guarantees end-to-end quality and environmental standards that are continuously verified thanks to certified management systems. The internal suggestions procedure and improvement management approach also aim to achieve ongoing resource savings.

This approach adheres to our corporate philosophy of being responsible in our use of natural resources and minimizing the environmental impact of our production activities. Our aim, wherever possible, is to provide our customers with products manufactured using environmentally respectful processes.

Corporate philosophy

- We produce furniture to meet the highest quality requirements. We design our production operations to be consistent and environmentally responsible in order to have the smallest possible impact on natural resources. Our suppliers are also committed to adhering to our strict quality and environmental policy.
- We use natural raw materials with the smallest possible impact on the environmental balance. Our production processes are safe and environmentally friendly. Waste from production operations is disposed of in an environmentally responsible manner. We recycle wood, steel, plastic and other end-of-life materials.
- All our production activities are continuously monitored to ensure minimized pollutant emissions and raw materials consumption.
- We make our energy consumption as efficient as possible, optimize the use of raw materials and favour the use of renewable forms of energy.

VS garden 2000 m² (13)

Organic cultivation of fruit and vegetables, supply to the VS canteen and sales to VS employees

Shredded wood press (14)

Processes the waste wood from the wood apprenticeship workshop to produce shredded wood that is used for energy

Extinguishing water pond (15)

Rainwater catchment container for supplying the extinguishing system and flushing the toilets in the administrative building

Boiler room 1 (16)

Cost-effective and CO₂-efficient Heat production from wood chips (waste wood arising internally)

District heating pipeline (17)

Underground connection between the energy production centres in boiler rooms 1 and 3 for the fast, loss-free conveyance of heat

Powder-coating plant (18)

Modern system with high recovery level

Factory 3.2 (19)

Fully equipped with LED lighting

Loading bays (20)

We use recyclable material for furniture packaging and transport

Examples of our sustainable production

- As far as possible, VS prefers to use renewable sources to meet its energy requirements. The level of renewables as a proportion of total consumption is currently over 40 percent.
- Since August 2015, we have been operating a gas-fired cogeneration system with a capacity of 841 kilowatts. This covers 40 percent of VS's total electricity consumption.
- To ensure that our furniture is long-lived even when subject to heavy use, we use only highly stable and extremely strong steel tubing manufactured to precise tolerances.
- Tubular steel frames are powder-coated with epoxy resin. This solvent-free technology also ensures that high ecological standards are met. We also use state-of-the-art powder coating systems with high recovery levels.
- Polypropylene waste, for example from scrapped seat shells, is crushed, processed to form a granulate and returned to the production process as recycled material.
- Beechwood offcuts and chips are re-used in production to form new table tops using a patented process. Compacted under heat and high pressure, the wood waste combines to form stable, resistant shaped parts.

Industry standards, quality labels, certificates

VS's production facilities and sales offices are subject to regular independent inspections to guarantee compliance with the DIN EN ISO quality and environmental standards. All VS products are regularly inspected by independent institutes for quality, safety and environmental responsibility.

- School furniture from VS carries the GS ("tested safety") label, which is awarded by the TÜV inspection authority on the basis of the German legislation on product safety.
- VS products are particularly low in emissions and pollutants, as the labels "TÜV Rheinland-certified: Emission-tested. Tested for harmful substances" and the US-American equivalent, "Greenguard", prove.
- Selected furniture items pass through the Cradle-to-Cradle certification process that assesses how compatible products are with the aims of a consistent circular economy.
- All products containing wood-based materials manufactured at the Tauberbischofsheim site comply with the PEFC standard.
- Wood and wood materials used at VS are sourced from sustainably managed forests, as certification according to DIN ISO 38200 demonstrates.
- Tables and chairs are designed to take account of ergonomic factors. Their outstanding ergonomic properties are confirmed by the quality label awarded by the Healthy Back Campaign (Aktion Gesunder Rücken e.V.).

Sofas + Seats

Upholstered elements for school use

Upholstered elements provide a comfortable, welcoming ambiance for teachers' discussion and lounge areas. However, they can also be used to create cozy niches where students can retreat and provide space for a wide range of activities. Naturally, these items of furnishing are robust and easy to clean, as school use demands – but that is not what you see when you first set eyes on them. In this way, they create the perfect environment for relaxed, purposeful activity. Or just somewhere to do nothing for a while.

There is a wide selection of upholstered furniture for school use: The Lounge series with its various sofa elements and armchairs is particularly suitable for conference and quiet retreat areas in libraries and lounges. ClubLounge includes easy-to-clean armchairs, sofas and stools for students' areas. The Puzzle free-form elements can be incorporated in flexible learning environments.

The versatile Welle seating modules can be combined to create playful seating landscapes. Cloud bean bags are popular with children and young people, in particular when they just want to chill. The Shift+ Landscape rectangular, curved and angled seating elements are the right choice for a range of areas – from the classroom through to common areas – and can be rearranged whenever required.

FloorFriends

Learning at floor level

The more time children spend at school, the more important it is to have spaces in which they can feel at ease when they have free time, are enjoying break or receiving support. The elements from the FloorFriends concept for floor-level learning are perfect for this. These include comfortable mats and back support rolls. They are complemented by the Gugl occasional furniture item with its integrated storage space. Using these elements, children are also able to create their own play and learning worlds. This makes their school day lively and varied.

Detailed information on our upholstered elements and the FloorFriends can be found in the "Sofas+Seats" catalogue.

NF-Wire and Clapp-4R bring versatility to large rooms

The slender, elegant NF-Wire skid chair made from chromium-plated circular steel is both extremely stable and invitingly comfortable – a lightweight, multipurpose chair that looks great wherever it is used. The slender skid frame perfectly matches the elegant seat shell. Like the other models in the NF family of chairs, NF-Wire was developed by the Cologne-based designer Nicolai Fuhrmann.

The chair is stackable, easy to handle and can be used to equip any large space with chairs. Thanks to the stack protection with two integrated pads, the seat shell is protected against pressure and damage when stacked. With their row connectors, the chairs are always perfectly aligned.

They are perfectly complemented by a folding table such as the slender Clapp-4R. This can be tidied away quickly whenever more space is needed in the room, whether in the main hall or the canteen. A further advantage: Thanks to the U-shaped frame, it is also comfortable to sit at the front end of the table. The adjustable glide elements make it possible to even out any differences in height.

If the table is no longer needed, the U-shaped brackets under the table top are folded in and locked in place. The folding mechanism can be activated by means of a safety bracket so that there is no risk of trapped hands or fingers. After this, the tables simply have to be loaded onto the trolley and wheeled away.

Detailed information on the NF-Wire and the other chairs in the series can be found in the "NF-Chairs" catalogue.

Stacking stone The time to get moving

When break approaches, the class quickly starts to move. After periods of attention and learning, the children have to express their need to move. Only then can they pay attention and concentrate again later on.

During break, therefore, there must be an incentive to move – an environment that encourages children's motor development. With child-friendly furniture, this is simplicity itself. The stacking stones are a popular way to achieve this aim.

They are lightweight and extremely hard-working at the same time. For example, they can be quickly and easily used to form a seat circle for children and adults alike. Adults simply stack more stones up to a height that is comfortable for them. And everyone sits in a group quite naturally and close to the floor.

Playing, swaying and testing one's skills, but also learning in a colourful, playful environment: Stacking stones extend the FloorFriends concept and provide a motivating challenge for children of different age groups.

Spinning stone Always keep your balance

The stacking stones are extended by the spinning stone. This can be used alone or in combination with the stacking stones. It permits balance exercises of various degrees of difficulty. Children of all ages can find the challenge that is right for them and their motor skills are individually developed.

The stacking and spinning stones are a playful way to support and reinforce learning processes. All the sensory sensations are involved. Thanks to their shape, colour and material, they provide the basis for countless playful possibilities.

Uno-C One desk, all sizes

The new Uno-C students' desk combines a number of different benefits: The C-shaped frame offers the greatest possible freedom of movement for the legs, including when sitting down and standing up. The height-adjustable Step version makes it possible to cover all table heights from 2 to 7 as per DIN EN 1729 with just a single desk. The cross-section of the tubular steel subframe is shaped to prevent any twisting or distortion during height adjustment. As a result, the stabilizing cross-strut that is otherwise required in height-adjustable students' desks is no longer needed.

Differing desktop thicknesses are equalized by using different glide inserts. Depending on the floor material, these are available as felt, plastic or multipurpose FloorCare variants. The elongated top side of the glide element acts as kick protection.

The extensive accessories available for the Uno-C mean that each desk can be individually equipped. These include satchel hooks, storage baskets, chair suspensions or suspension rails for swivel chairs, a Gratnells tray and a privacy screen.

The students' desks are available in one- and two-seater versions. They can be moved easily using the optional castors on the front.

New space concepts Listen, learn, relax

Teaching concepts need the right space to bring them to life. Rooms that respond to different learning phases and requirements, that permit and encourage new learning experiences, that create space for communication, cooperation and creativity.

That is why, when it comes to designing spaces, the starting point for us is always the type of interaction that is to take place: Is the focus on group work? Does one person want to communicate information to a large group? Will students need to learn on their own? Will informal discussions take place? Each of these forms of interaction can be supported particularly well by the corresponding room layout.

Equipped with flexible furnishings, a learning workshop provides all the possibilities needed for creative teaching, with its different methods and organizational forms. The market place is the shared centre for multi-class or multi-year learning groups. The learning office provides peace and quiet to encourage concentrated work. Chill-out areas for students and lounges for teachers are the right place to relax and recharge one's batteries.

We have developed our space concepts in the company of experts from the worlds of pedagogics, teaching and school practice, ergonomics, interior architecture, technology, trend and behavioural research.

Their knowledge and experience have never failed to provide stimulation and new ideas and have helped us understand what schools really need.

You will find further ideas in the "Inspiring learning worlds" catalogue.

Shift+ Variable room concepts

The flexible elements of the Shift+ Base and Landscape system invite teachers and students to use furniture in ways precisely adapted to the context and to design stimulating learning environments.

Shift+ Base comprises all the table elements of the system. They form the basic furniture needed for teaching in normal daily use. With the Shift+ Landscape storage and seat modules, learning landscapes and differentiated areas within the classroom can be created without difficulty.

The desk elements are available in fixed heights in accordance with DIN EN 1729 or as height-adjustable units. The different-height storage elements can be used to design different spaces or create separated retreat areas. The seating modules are available in different seat heights to match the different age groups.

The Shift+ elements can be used in a wide range of contexts – in classrooms as well as in libraries or multipurpose spaces.

You will find more detailed information in the "Shift+" catalogue.

JUMPER Every body, everywhere

Active, lively and versatile. Tough and adaptable. Air-cushioned or with shaped wooden shell. Available in two-sizes for office use and in six sizes as a school chair. With five frame variants and many different colours: JUMPER is a chair for people of different sizes and perfect for many applications from school through to office use.

JUMPER Air Active is the first school and office chair to be awarded Cradle to Cradle Certified Silver certification. Together with PantoSwing LuPo, it is therefore the most sustainable chair currently available on the market.

JUMPER is characterized by its organic, flowing lines. With its ergonomic shape, it supports the natural sitting posture and keeps the user active while sitting. The JUMPER Air with its air-cushioned seat shell provides a particularly comfortable seating experience. The napped surface structure reflects the light, creating interesting, changing colour effects. The seat shell of the JUMPER Ply is made from stained, moulded beechwood with anti-slip paint. The natural material gives every room a welcoming atmosphere.

You will find more detailed information in the "JUMPER" catalogue.

JUMPER® **Designed by Jean Nouvel**

When architects design furniture, their starting point is the space in which it is to be used. This is the holistic approach adopted by French architect and designer Jean Nouvel when creating the JUMPER. In doing so, he designed a "chair for the school of the future" which is suitable for many different uses: in classrooms from primary school, through secondary school and on to university or college, as well as at workplaces for teachers and lecturers or in team and conference rooms.

Jean Nouvel (born 1945) is one of the most influential architects and designers of the present day. His constructions have changed the face of architecture worldwide. He achieved almost overnight fame in 1987 with the Institut du Monde Arabe in Paris, a building whose design creates a cultural bridge between France and the Arab world.

Among many other awards, he has won the Pritzker Prize, the Nobel Prize for architecture, in 2008.

However, Nouvel, who was born to a family of teachers, does not only design buildings. His workshop in Paris also gives birth to furniture and everyday objects: handles, loudspeakers, a pair of sneakers. And now also a chair for VS: JUMPER.

Hokki®, Hokki®+ Height-adjustable active stool

Hokki is the solution for dynamic sitting. Thanks to its rounded base, it can move in all directions and consequently permits permanent changes of posture without difficulty. Not only is this fun, it also aids motor capabilities.

The Hokki is now also available as the height-adjustable Hokki+ variant. The two models have a height adjustment range of 38 to 50 or 50 to 68 centimetres. This makes it possible to cover all school requirements.

Just like the fixed-height Hokkis, both models of the Hokki+ possess the quality label awarded by the Healthy Back Campaign (Aktion Gesunder Rücken e.V.) and have been tested and recommended by the Bundesverband deutscher Rückenschulen e.V. (German federal back training association) and the forum Gesunder Rücken – besser leben e.V. (Healthy back for a better life).

The Hokki+ is extremely stable but also so light that even children and young people are able to carry it. The adjustment mechanism with its gas spring is immediately accessible and can be activated from anywhere under the seating surface.

The basic body of the Hokki and Hokki+ is made from recyclable polypropylene. This makes this active stool extremely scratch-resistant. Even the toughest everyday conditions pose practically no threat.

Level-LuPo and Level-VF Healthy sitting for all ages

Ergonomics plays a major role at school. That is why DIN EN 1729 defines the dimensions required of school furniture so that children and young people of all sizes can work at it productively and healthily.

Conventionally equipped classes contain chairs and tables of different sizes in one and the same room. The size of the chair is determined by the distance between the floor and the seating surface and the size of the seat shell. The table height is harmonized with this.

In **multi-year learning environments**, there is only one common table height. It is the chairs that ensure ergonomic seating. In this case, the chair size is defined by the distance from the foot support to the seating surface, the distance from the seating surface to the table top and the size of the seat shell.

The frames of the Level-LuPo and Level-VF chairs have drill holes at four different fixed heights. These make it possible to adjust the height of the foot support in accordance with the specified standard sizes as well as for further seating heights.

Two Level models have been developed for the **table height of 71 centimetres**: with seat shell S for the standard chair sizes 2 and 3, and with seat shell M for standard size 4.

For the **table height of 76 centimetres**, there are three models: with seat shell S for the standard sizes 2 and 3, with seat shell M for the standard sizes 4 and 5, and with seat shell L – in this case without foot support – for standard size 6.

In multi-year learning environments, Grattells boxes, lattice-type book storage or chair suspensions restrict the freedom of the legs and should therefore not be used.

Detailed information on the Level and the other chairs in the series can be found in the "Level" catalogue.

Body sizes in cm:

Max:	121.0	142.0	159.0	176.5	188.0	207.0
Min:	108.0	119.0	133.0	146.0	159.0	174.0

Chair sizes in cm:

Chair:	30.5	34.0	38.5	43.0	46.0	50.0
Table:	53.0	59.0	64.0	71.0	76.0	82.0

Chair and table sizes according to DIN EN 1729

Sitting properly and working ergonomically at school – for this to be possible the chairs and desks must be adapted to the body size of the different students. The DIN EN 1729 standard correlates body size with seat and/or table height and defines six chair and table sizes.

It is very important to check body sizes at regular intervals and to assign the chairs and desks accordingly. All students need the chair and desk that are right for their body size. Otherwise, their posture may be impaired and this can result in back pain or headaches.

The six chair and desk sizes set out in DIN EN 1729 are easy to distinguish due to the use of colored indicators. They range from the size 2 seat height of 30.5 centimetres through to the size 7 seat height of 50 centimetres. The corresponding table heights vary between 53 centimetres and 82 centimetres accordingly.

As a result, students who are 1.08 metres tall can enjoy the right seating and working conditions just as much as those measuring 2.07 metres.

FloorFriends

PRODUCT INFORMATION Shift-p-Up_TY_EN - 11.01.2021 - www.vs-furniture.com

Shift+ Up Platform-table-bench for presentations and floor-level learning.

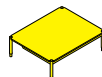

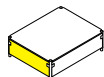

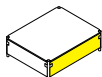

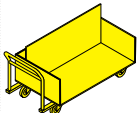

Multipurpose unit which can be used as a platform, table or bench. Stage-like landscapes of a maximum of two levels can be created from the square and triangular elements. Centre distances matching the storage room units and mats of the Shift+ series.

Frame made from circular steel tubing with all-round rectangular tube edge. The legs are equipped with conical stacking and glide elements and can be securely stacked on top of one another up to a height of two using a spring buffer. Elements located next to one another can be flexibly linked together using a rotary connector. Optionally with guide for plastic Grattells boxes.

Tops made from plywood. One side with anti-slip screen-printed structure for standing on and the other with a smooth surface for use as a table or for writing. The top can also be turned over by children without the need for any tools. The sides can be closed off with an insertable panel for use as a stage.

Transport cart for the tops and the elements inserted in one another.

The following material groups are available to choose from: Frame made of steel tube: M1.

PRODUCT INFORMATION Leaf_TY_EN - 21.01.2021 - www.vs-furniture.com

Leaf Tent element for floor-level learning.

Tent elements for creating individual withdrawal areas in the classroom for individual children or small groups. The triangular material elements can be combined with the mats from the Shift+ series to create tent configurations and nooks and crannies. Similarly, the textile sail-type elements can be fixed to any magnetic surface (cabinets from the Shift+ series) using magnetic fastenings. A tent pole, which can also be used in combination with the Gugl storage element and/or the triangular Shift+-Landscape mats, makes it possible to construct a round tent consisting of a maximum of 6 sail elements. Textile sail element, consisting of a stretch fabric and glass fibre rods for tensioning the triangular surface. With 3 fixing points on the long and one fixing point on the short side.

Tent pole, consisting of a solid wood pole with a 6-way adapter in two heights, positionable using a bayonet fixing.

Shift+-Landscape mats, optionally with 1 to 3 fixing points (see above).

Magnetic fixings to fasten the sail elements to any magnetic surface.

Storage bag for transporting and storing the sail elements and curved glass-fibre rods.

The following material groups are available to choose from: Fabric sails: S77.

PRODUCT INFORMATION Shift-p-LSitz_TY_EN - 14.01.2021 - www.vs-furniture.com

Shift+ Landscape Soft seating elements.

Upholstered-element system consisting of carcass and seating elements.

Seating elements are linear or curved stools. Individual elements can be combined to form complete landscapes. Elements consisting of a floor plate with plastic or felt glide elements and a cushion of flame-retardant MVSS-302 foam with leatherette cover.

Seating sizes in 3 fixed heights in accordance with DIN EN 1729.

Carcass of melamine-resin-coated chipboards with glued-on plastic edge. With glued centre wall for partitioning the carcass. With rows of holes (25 mm) for adjustable shelf inserts and a perforated-plate back panel.

Function: Curved Landscape seating and cabinet elements can be combined linearly and, thanks to the matched inner and outer radii, back to back to create circular and serpentine seating/cabinet landscapes.

Fire resistance in accordance with DIN 66084 as standard in conformity with classes P-c (low) and P-b (medium) as well as for the fabrics of the group S40, optionally with additional flame retardant as per class P-a (high).

The following material groups are available to choose from: Body made of chipboard: L4; Perforated-plate: M1; Fabric cover: S40,64,81.

PRODUCT INFORMATION Stapelstein_TY_EN - 14.03.2019 - www.vs-furniture.com

Stapelstein Multifunctional sitting and play elements. FloorFriends® for floor-level learning.

Structure made from expanded polypropylene (EPP). The "stone" (180g) and "spinning stone" (268g) are lightweight, odourless, water-resistant and free from chemical propellants. Stacking stones can be stacked to save space. Multifunctional and ideal for sitting, swaying, learning and playing. Both products can be combined to create active seating of varying heights. Maximum load: 180kg.

Sets of 4 or 12 stacking stones are available.

The following material groups are available to choose from: Stapelstein Body made of EPP: C5; Kreiselstein Body made of EPP: C(grey, darkblue).

PRODUCT INFORMATION Hokki_TY_EN - 19.01.2021 - www.vs-furniture.com

Hokki, Hokki+ Stool, height-adjustable stool.

Stool made from stable, durable and extremely scratch-resistant polypropylene, fully recyclable. Comes with a lightweight foam seat shell (grey) or optionally with an extra-soft padded artificial leather cover (black). Thermoplastic base screwed to the polypropylene body.

Chair sizes in 4 fixed heights as set out in DIN EN 1729, one additional extra-large size and two sizes with gas-spring height adjustment.

Function: Offers freedom of movement in controlled conditions thanks to curved surfaces that stimulate the entire musculo-skeletal system. Easy to carry thanks to ergonomically shaped, undulating seating edge that is easy to grip and also prevents the user from slipping off. The stools are easy to transport and can be moved together to save space. Height-adjustable models with all-round activation mechanism and ergonomic depth suspension.

The following material groups are available to choose from: Body made of plastic: C2.

Students' chairs (multi-year classroom groups)

PRODUCT INFORMATION Jumper-Air-S-Level_TY_EN - 18.01.2021 - www.vs-furniture.com

JUMPER Air Level Skid chair - ergonomic seating solution for multi-year classroom groups.

Frame made from curved, powder-coated or chromium-plated circular steel tube with height-adjustable foot support (optional in 33409) that can be adapted step-by-step to the required size without any tools. Two robust cross-pieces between the skids ensure the smooth, precise guidance of the foot supports.

Student's chairs for raised seating at 71 or 76 cm-high tables. In fixed heights each with 4 foot support settings, maximum 2 of which as per DIN EN 1729.

Seat shell made from double-walled, structured polypropylene (Air) for comfortable seating with air cushion effect. With covered seat fixing and grip hole.

Equipment and options. Glide elements for hard or soft floors or dual-component multipurpose glide elements or, optionally, interchangeable glides with replaceable glide elements. For maximum number stackable with foot supports in upper "park position" (ST), see table.

Recommendation. JUMPER Air Level can be combined with school tables (without bookshelf and chair suspension) of height 71 or 76 cm.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Seat and backrest: C4.

Students' desks

PRODUCT INFORMATION Shift-p-B4Bein_TY_EN - 19.01.2021 - www.vs-furniture.com

Shift+ Base Stackable four-legged tables.

Frame consisting of welded round tubular steel legs, some of which are offset outwards, with a central edging made from rectangular steel tubing, all powder-coated. Some models have tube-in-tube Allen-key height adjustment (see table). Desks with four plastic, felt or 2C universal glide elements or with glide elements and two lockable castors.

Tables in 7 fixed heights or with 5-position Allen-key height adjustment, all in accordance with DIN EN 1729.

Table top made from melamine resin or laminate-coated chipboard with glued plastic edge or rigid CDF fibreboard or high-strength solid HPL top. The corners have 25 mm rounding.

Function: It is possible to combine the two mirrored concave-convex basic shapes in many ways to create circles, rows and groups. In the park position, the tables are stackable up to a height of six tables and are equipped with stack protection at the lower edge of the top frame.

Warning: A maximum of three stacked (unloaded) tables may be moved together on castors.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; HPL-top: L4; CDF-fibreboard: L4; Chipboard with laminate: L9.

EcoTable-R Student's table with round tubular legs.

Frame consisting of an all-round rectangular steel edging with welded-on table legs made from round tubular steel, powder-coated with coloured epoxy resin. Table with levelling screws, glide elements for hard or soft floorings or universal glide elements, or with 2 or 4 lockable castors.

Tables in 7 fixed heights or with 5-position Allen-key height adjustment, all in accordance with DIN EN 1729, as well as an additional height of 30 cm for floor-level learning.

Table top made from 19-mm or 25-mm melamine resin-coated or laminate-coated chipboard with glued plastic edge or highly rigid moulded PUR edge. In some cases also with rigid 13-mm CDF fibreboard. All models available with angled or curved (radius = 25 mm) corners.

Optionally available with a built-in plastic Gratnells box, chair suspension rails or storage basket under the table top, satchel hooks on the side and under-table screen at side opposite from user.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L3; CDF-fibreboard: L4; Chipboard with laminate: L9.

PRODUCT INFORMATION LiteTable-Schul_TY_EN - 20.01.2021 - www.vs-furniture.com

LiteTable-AL Stackable lightweight table.

Frame. The leg elements of round aluminium tube are pressed and screwed with high-strength special-alloy corner connectors to the square aluminium tube frame. The legs and frame are powder-coated. Thanks to the way in which the legs are spaced closer together and further apart in pairs, the table is stackable (ST) and can nevertheless, depending on how it is turned, be lined up against another table without gaps in between. Tables with glide elements for hard or soft floors or with 2C universal glide elements and optionally with 2 castors on legs spaced further apart.

Table sizes in 8 fixed heights in accordance with DIN EN 1729.

Table top with a chipboard top and a seamlessly cast (PUR) polyurethane safety edge or with a chipboard top and glued-on plastic plastic edge. Tops with plastic edge with edged or rounded corners.

Function. The table can be stacked thanks to the extremely lightweight, hard-wearing materials used.

Warning: A maximum of 4 stacked (unloaded) tables may be rolled on their castors.

The following material groups are available to choose from: Frame made of aluminium: M1; Top made of chipboard: L4; Top made of chipboard with PUR: L2.

PRODUCT INFORMATION LiteTable-ST-Schul_TY_EN - 20.01.2021 - www.vs-furniture.com

LiteTable-ST Stackable table.

Frame made from welded round tubular steel legs with all-round rectangular tubular steel top frame, all powder-coated. Because the inner and outer legs are arranged in pairs, the table is stackable. What is more, they can be rotated to form continuous rows. Tables with glide elements for hard or soft floorings or with 2C universal glide elements and, optionally, with two castors at the outer legs.

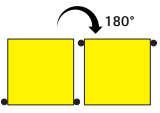

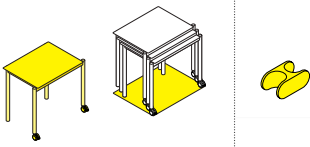

Table sizes in 7 fixed heights in accordance with DIN EN 1729.

Table top with CDF or chipboard top and continuous, molded (PUR) polyurethane safety border or chipboard top and glued plastic border. Tops with KU border available with edged or rounded corners as required.

Warning: A maximum of four stacked (unloaded) tables may be moved together on castors.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; Top made of chipboard with PUR: L2; Top made of CDF: L4.

PRODUCT INFORMATION TriTable-III_TY_EN - 13.01.2021 - www.vs-furniture.com

TriTable-III Triangular table.

Frame made from welded round tubular steel legs with rectangular tubular steel top frame, all powder-coated. Table with glide elements for hard or soft floorings or with 2C universal glide elements.

Tables in 7 fixed heights or with 5-position Allen-key height adjustment, all in accordance with DIN EN 1729, as well as an additional height of 30 cm for floor-level learning.

Table top (right-angle triangle with two equal sides) made from melamine resin or laminate-coated chipboard with glued plastic edge or with a high-density, solid HPL top, both with rounded corners (radius 25 mm).

Function: Many combinations possible to form rows or group workspaces. The tables are stackable up to a height of eight tables and are equipped with stack protection at the lower edge of the frame. Optionally available with removable plastic tray on the long table side.

Equipment: Optionally available with castor at the 90° corner or with three castors.

The following material groups are available to choose from: Frame made of steel tube: M1; Top made of chipboard: L4; HPL-top: L4; Chipboard with laminate: L9; Gratnell plastic box: C3.

PRODUCT INFORMATION JU-StudioTable-Edu_TY_EN - 19.01.2021 - www.vs-furniture.com

JUMPER StudioTable Stackable four-legged table for school use.

Frame consisting of welded legs with all-round edging made from powder-coated or chromium-plated precision rectangular steel tubing. Due to the asymmetrically positioned table top, the tables are stackable but can nevertheless be rotated to form continuous rows. The edge of the top frame is equipped with stacking and glide protection. Table with glide elements for hard or soft floorings or with 2C universal glide elements.

Table sizes in 7 fixed heights as per DIN EN 1729 as well as an additional height of 30 cm.

Table top With a 19-mm melamine or laminate-coated chipboard top and glued plastic edge or a 13-mm CDF fibreboard top.

Function. The rectangular table can be stacked by a single person due to the lightweight but tough materials. See table for maximum stacking capacity.

The following material groups are available to choose from: Frame made of steel: M1,(chrome-plated); Top made of chipboard: L4; CDF-fibreboard: L4.

PRODUCT INFORMATION Uno-C_TY_EN - 14.01.2021 - www.vs-furniture.com

Uno-C Skid desk.

Frame made C-shaped upright and flat-ended skids with plastic kick protection. Desk legs made from powder-coated or chrome-plated VS special steel tubing and cross-strut made from circular steel tubing.

Desk sizes: 6 fixed heights or with 6-stage grid height adjustment using an Allen key fixing. All products compliant with DIN EN 1729.

Desktop made from melamine-coated chipboard with continuous, moulded (PU) polyurethane safety edge or glued plastic edge, from exceptionally strong LIGNOdur safety board with soft, rounded edges, or from a high-strength HPL board (see table for dimensions and desktop types).

Equipment and options. With glide elements for hard and soft floors or 2K universal glide elements and satchel hooks. Also with screen, lattice-type book storage, plastic box or different kinds of chair suspension.

Warning: The desk height may vary depending on the type of desktop and the glide elements. Polyurethane edges are extremely tough. However, their colour may change over time.

The following material groups are available to choose from: Frame made of steel tube: M1; Top made of LIGNOdur: L1; Top made of chipboard with PUR: L2; Top made of chipboard: L4; HPL-top: L4.

PRODUCT INFORMATION FlipTable-RU-Schul_TY_EN - 13.01.2021 - www.vs-furniture.com

FlipTable-RU Table with folding top.

Construction comprising a centrally positioned tubular-steel crosspiece with an articulated bracket. Folding action can be effected with a two-hand safety actuator under the table top. With a fitting for securing the table top in the horizontal and vertical positions and optionally with a table connector.

Table top of melamine-resin-coated chipboard with PUR edge. The corners are edged.

Frame consisting of two bent powder-coated or chrome-plated steel tubes. Frame with lockable castors.

Function. When the table top is folded up, any desired number of tables can be pushed together to optimise space.

Note. PUR edges are extremely hard-wearing, but may show signs of discoloration over time.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Top made of chipboard with PUR: L2.

PRODUCT INFORMATION InteractiveTeach_TY_EN - 05.01.2021 - www.vs-furniture.com

InteractiveTeach Media teacher's workstation with storage space.

Workstation consisting of a side substructure, a rear substructure and a table top with a generously dimensioned cable flap. Carcass, cheek and table top made of melamine-resin-coated chipboard with glued-on plastic edge.

Side substructure (left or right) consisting of a carcass with material pull-out and CPU storage space behind a lockable swing door. Fitted on the side with a sliding panel for free access to the CPU cabling. A sliding table-top segments permits access from above to further storage space (e.g. for a document camera).

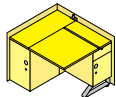

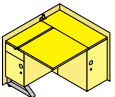

Rear substructure with a lockable swing door consisting of a cable compartment for spare cable and hardware peripherals. The compartment is accessible from above through the cable flap in the table top (see below). Further storage space at the bottom; fitted with an adjustable shelf insert and brackets for cable routing. Carcass with sheet-steel legs.

Table top comprising three segments. Sliding part on the side for access from above to the substructure. Cable flap at the rear (rear substructure) and worktop on the user side. Table top with a frame of half-oval steel tube.

Equipment. Optionally with monitor holder „Flo“.

The following material groups are available to choose from: Frame made of steel: M1; Body made of chipboard: L3; Top made of chipboard: L4.

Media rail systems

PRODUCT INFORMATION FlexiPanel-1_TY_EN - 29.01.2020 - www.vs-furniture.com

FlexiPanel for wall or cabinet mounting Media rail with one board level.

Mounting on walls or Serie 800 special add-on cabinets. When wall-mounted, it is possible to compensate for slight wall unevenness of max. 13 mm.

System consisting of two aluminium profiles positioned above one another, equipped as standard with a hook strip and optionally with an integrated picture clamping strip. Lightweight boards can easily be inserted in and removed from the one-part profiled rail. As an option, a wall-mounted, writable base surface made from enamel steel can be inserted at the back (level 0). The end of the profile is closed with a tight-fitting plastic cap.

Boards can be used on both sides and are equipped with a fabric lining that is suitable for pins, an enamel steel surface with different rulings or a laminate coating. The wood-fibre board is equipped all-round with a moulded, shock-resistant polyurethane edge.

The following material groups are available to choose from: Writing surface made of steel: E1; Pinboard made of fabric: S72; Chipboard with writable laminate: L(white).

MediaPro-II-Basic Rail.

MediaPro-II-Basic, wall-mounted media rail.

System comprising a multifunctional aluminum rail system with an integrated picture rail and a profile section for level 1 slot-in accessories and boards.

Function. VS level 1 accessories and the picture rail (see table) can be slid over each other.

Mounting. Wall-mounted with visible screw fastenings. Longer wall rail systems are combined from several 3-meter elements and if necessary a cut element. Connection is effected linearly with a concealed adapter or with a 90° corner connector for angle joints. Comes with plastic end caps as standard. Additionally, the wall protection rail should be used to prevent the system from getting dirty in the area of the lower rollers.

Accessories. 90° corner connector, wall protection rail, plastic picture hooks, boards (also height-adjustable), flip-charts, roll-charts, projection boards and aluminum suspension hooks with integrated anti-theft protection.

The following material groups are available to choose from: Rail made of aluminium: M(anodisé).

System. Projection boards for slotting into the MediaPro-II rail systems. The elements can be easily slid.

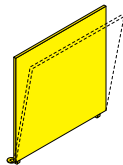

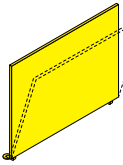

Function. Level 1 boards can be slid over elements of the picture rail and the magnetically adherent strip. Level 2 boards can also be slid over level 1 slot-in elements.

Projection areas. Sturdy, lightweight design with anodized aluminum edging and rounded safety corners. Aluminum safety hanging fittings with integrated rollers and unhinging retainer at the top. Aluminum-colored plastic spacer wheels at the bottom.

Board surfaces in coated matt white for slide, film, daylight, LCD and video projections. Board function. Tilting.

Note. The model can only be used in each case within one system, i.e. MediaPro-Basic or Comfort or Premium, and the corresponding level.

The following material groups are available to choose from: Projection surface: E(matt white).

PRODUCT INFORMATION LiteBench-ST_TY_EN - 20.01.2021 - www.vs-furniture.com

LiteBench-ST Stackable bench.

Frame made from welded round tubular steel legs with all-round rectangular tubular steel top frame, all powder-coated. Because the inner and outer legs are arranged in pairs, the bench is stackable. What is more, they can be rotated to form continuous rows. The edge of the top frame is equipped with stacking and glide protection. Benches with glide elements for hard or soft floorings or with 2C universal glide elements.

Seat sizes in 6 fixed heights in accordance with DIN EN 1729.

Seat top Consisting of a CDF or chipboard top and glued (KU) plastic border. Available with edged or rounded corners as required.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; Top made of CDF: L4.

	Size as per DIN EN 1729 h = 310 ● 2 h = 350 ● 3 h = 380 ● 4 h = 430 ● 5 h = 460 ● 6 h = 510 ● 7

Upholstery elements

PRODUCT INFORMATION Shift-p-LSitz_TY_EN - 14.01.2021 - www.vs-furniture.com

Shift+ Landscape Soft seating elements.

Upholstered-element system consisting of carcass and seating elements.

Seating elements are linear or curved stools. Individual elements can be combined to form complete landscapes. Elements consisting of a floor plate with plastic or felt glide elements and a cushion of flame-retardant MVSS-302 foam with leatherette cover.

Seating sizes in 3 fixed heights in accordance with DIN EN 1729.

Carcass of melamine-resin-coated chipboards with glued-on plastic edge. With glued centre wall for partitioning the carcass. With rows of holes (25 mm) for adjustable shelf inserts and a perforated-plate back panel.

Function: Curved Landscape seating and cabinet elements can be combined linearly and, thanks to the matched inner and outer radii, back to back to create circular and serpentine seating/cabinet landscapes.

Fire resistance in accordance with DIN 66084 as standard in conformity with classes P-c (low) and P-b (medium) as well as for the fabrics of the group S40, optionally with additional flame retardant as per class P-a (high).

The following material groups are available to choose from: Body made of chipboard: L4; Perforated-plate: M1; Fabric cover: S40,64,81.

PRODUCT INFORMATION LiteTable_TY_EN - 20.01.2021 - www.vs-furniture.com

LiteTable-AL Stackable lightweight table.

Frame. The leg elements of round aluminium tube are pressed onto and screwed to the rectangular aluminium tube top frame using high-strength corner connectors. The legs and top frame are powder-coated. Tables can be stacked thanks to the inner and outer legs arranged in pairs. However, depending on how they are turned, they can be arranged in rows without gaps. The top frame is equipped with stacking and gliding protection. Tables have glide elements for hard or soft floors or 2C universal glide elements and optionally 2 castors on the outer legs.

Table sizes in 9 fixed heights in accordance with DIN EN 1729.

Table top with a chipboard top and glued-on plastic plastic edge. Edged or rounded corners.

Function. Because the materials used are extremely lightweight and yet robust, the table can be stacked by a single person. Optionally, depending on the setup, table connectors (Model 21003) can be used.

Warning: A maximum of 4 stacked (unloaded) tables may be moved on their castors. The trapezoidal combinations shown in the table cannot be realised.

The following material groups are available to choose from: Frame made of aluminium: M1; Top made of chipboard: L4. Further products on this page: Compass-LuPo.

	These combinations cannot be realised.	* w-d footprint

LiteTable-ST Stackable table.

Frame made from welded round tubular steel legs with all-round rectangular tubular steel top frame, all powder-coated. Because the inner and outer legs are arranged in pairs, the table is stackable. What is more, they can be rotated to form continuous rows. The edge of the top frame is equipped with stacking and glide protection. Tables with glide elements for hard or soft floorings or with 2C universal glide elements and, optionally, with two castors at the outer legs.

Table sizes in 9 fixed heights in accordance with DIN EN 1729.

Table top Consisting of a CDF or chipboard top and glued plastic border. Available with edged or rounded corners as required.

Optionally it is also possible to use table connectors depending on the table arrangement (model 21003).

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; Top made of CDF: L4.

Further products on this page: Compass-Soft.

PRODUCT INFORMATION Clapp-4Q_TY_EN - 19.01.2021 - www.vs-furniture.com

Clapp-4Q Folding table with square tubular legs.

Frame consisting of two rectangular tubular steel edgings along the long side, screwed rigidly to the table top. The two U-shaped leg brackets made from square tubular steel are activated by means of a folding mechanism with safety bracket and then locked in place when open or closed. The leg brackets are chrome-plated or coloured and edgings are black powder-coated with epoxy resin. The table legs have levelling screws, glide elements for hard or soft floorings.

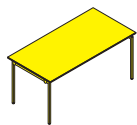

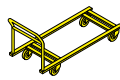

Table height 74 cm

Table top made from 19-mm melamine resin-coated chipboard with glued plastic edge or from highly rigid 13-mm HPL solid board. Equipped with angled corners in all cases.

Equipped with stack protection to prevent scratches and damage to surfaces. A stacking cart can be used to transport the folded tables.

The following material groups are available to choose from: Frame made of steel: M1,(chrome-plated); Top made of chipboard: L4; HPL-top: L4.

JUMPER StudioTable stackable four-legged table.

Frame consisting of welded legs with all-round edging made from powder-coated or chromium-plated precision rectangular steel tubing. Due to the asymmetrically positioned table top, the tables are stackable but can nevertheless be rotated to form continuous rows. The edge of the top frame is equipped with stacking and glide protection. Table with glide elements for hard or soft floorings or with 2C universal glide elements.

Table height 74 cm

Table top With a 19-mm melamine-coated or laminate-coated chipboard top and glued plastic edge or a 13-mm CDF fibreboard top.

Function. The table can be stacked by a single person due to the lightweight but tough materials. See table for maximum stacking capacity.

The following material groups are available to choose from: Frame made of steel: M1,(chrome-plated); Top made of chipboard: L4; CDF-fibreboard: L4.

PRODUCT INFORMATION FlipTable-RU_TY_EN - 13.01.2021 - www.vs-furniture.com

FlipTable-RU Table with folding top.

Construction comprising a centrally positioned tubular-steel crosspiece with an articulated bracket. Folding action can be effected with a two-hand safety actuator under the table top. With a fitting for securing the table top in the horizontal and vertical positions and optionally with a table connector.

Table top is a melamine-resin laminated, veneered or linoleum covered chipboard with glued-on plastic or beech edges. Choice of square or round corners.

Electrification. Optionally by means of a fold-down textile trough on both sides.

Cable outlet. Optionally with an electronics box for system and data connections.

Frame consisting of two bent powder-coated or chrome-plated steel tubes. Frame with lockable castors.

Function. When the table top is folded up, any desired number of tables can be pushed together to optimize space.

Note. PUR edges are extremely hard-wearing, but may show signs of discoloration over time.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Top made of chipboard with PUR: L2; Top made of chipboard: L3; Top made of linoleum: L8; Top veneered: F1.

PRODUCT INFORMATION M-Table-Office_TY_EN - 13.01.2021 - www.vs-furniture.com

M-Table

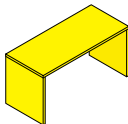

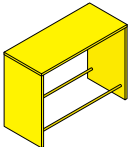

Side table in standing and sitting heights.

Construction consisting of two side elements, a seat plate and a stable, centrally-positioned double cross beam, each made of CPL or veneer-coated chipboard. Additional steel connecting fittings for increased stability. Both side pieces with glide elements

Table height of 76 cm and 106 cm for raised sitting or 120 cm as stand-at table.

Installation. For use in corridors, auditoriums, or in rooms with high safety requirements – also with floor fixing.

The following material groups are available to choose from: Chipboard with laminate: L4; Top veneered: F1.

PRODUCT INFORMATION Ne-ReTi_TY_EN - 05.01.2021 - www.vs-furniture.com

NetWork Basic table.

Constructed of four-sided, half-oval shaped top frame and round legs, both of powder-coated or chrome-plated steel tube. Functional gap between table top and supporting frame accepts accessories and adapters for the linking of further tables and tops.

Electrification is available through a grid cable basket which is hinged on both sides or clip-on plastic modules. The cable outlets are holes with plastic or aluminium inserts.

Table heights are fixed or adjustable in either steps or continuously with a winding handle. Legs fitted with levelling screws or castors.

Table top is a melamine-resin laminated, veneered or linoleum covered chipboard with glued-on plastic or beech edges. Choice of square or round corners.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Top made of chipboard: L3; Top made of linoleum: L8; Top veneered: F1.

NetWork Add-on table.

Constructed of four-sided, half-oval shaped top frame and round legs, both of powder-coated or chrome-plated steel tube. Functional gap between table top and supporting frame accepts accessories and adapters for the linking of further tables and tops.

Electrification is available through a grid cable basket which is hinged on both sides or clip-on plastic modules. The cable outlets are holes with plastic or aluminium inserts.

Table heights are fixed or adjustable in either steps or continuously with a winding handle. Legs fitted with levelling screws or castors.

Table top is a melamine-resin laminated, veneered or linoleum covered chipboard with glued-on plastic or beech edges. Choice of square or round corners. The angled top insert of leather-covered steel sheet can be positioned in the corner and allows a greater table depth and thus optimum spacing from the monitor.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Top made of chipboard: L3; Top made of linoleum: L8; Top veneered: F1.

PRODUCT INFORMATION Pareto-C_TY_EN - 05.01.2021 - www.vs-furniture.com

Pareto height-adjustable, transport-optimized desk with C-type foot.

Design in accordance with DIN EN 527-1 consisting of two asymmetrically positioned tubular steel cross-pieces and welded brackets.

Substructure consisting of two C-type feet made from powder-coated metal with round, square or rectangular uprights and skids with angular ends. Electrically-driven height-adjustment with one- or two-stage telescoping uprights, optionally with display, memory, collision protection and child safety protection. Table legs can be folded for ease of transport.

Table top made from melamine-resin, veneer or linoleum-coated chipboard with edged corners.

Electrical connections (optional) by means of a folding metal cable tray with round cable chain.

Cable outlet through a maximum of three metal outlets (left, centre, right) or a cable flap positioned on the left or right.

Accessories for electrical connection (Schuko power socket) and CPU holder with retaining strap.

The following material groups are available to choose from: Frame made of steel tube: M2; Top made of chipboard with plastic/beechn edge:: L6; Top made of linoleum: L8; Top veneered: F1.

Serie 2000 (partition walls)

PRODUCT INFORMATION S2000-P-23_TY_EN - 05.01.2021 - www.vs-furniture.com

Serie 2000 Typ P. Folding screen (2/3 parts).

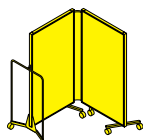

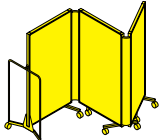

System consists of 2 or 3 flexibly-jointed, mobile, free-standing screen.

Construction is based on a four-sided frame of aluminium profile and a filling element. Add-on elements are connected by a flexible joint and can be easily folded together.

Filling elements: 1. Melamine-resin laminated chipboard. 2. chipboard laminated with a vitreous-enamelled metal sheet to which magnets adhere (at level 155 cm). 3. From a lightweight top with fabric covering. 4. A melamine-resin laminated sound-absorbing panel with slits. 5. A translucent double-ribbed board.

Supporting element consists of short struts each with 2 castors and a supporting castor. For safety reasons paravent screens in kindergartens and schools must be fitted with a push-handle.

The following material groups are available to choose from: Frame made of aluminium: M(anodisé); Stabiliser and foot made of aluminium: M(arctic, black RAL 9011); Writing surface made of steel: E(white); Fabric cover: S46,52,73,74,78,79,80; Acoustic surface made of chipboard: L3.

Shift+ (storage space)

PRODUCT INFORMATION Shift-p-LRegal_TY_EN - 11.01.2021 - www.vs-furniture.com

Shift+ Landscape Mobile shelf units.

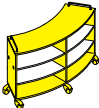

Constructed from glued linear and curved (60°) body on steel crosspiece with 4 or 5 (60°) tech castors, 2 of them lockable. Optionally with 4 or 5 adjustable feet.

Body made from melamine resin-coated chipboard with glued (KU) plastic edge. With glued central panels to subdivide the body. With rows of drill holes (25 mm) for shelf inserts and perforated sheet visible back panel. With back panel and storage space on both sides depending on model.

Function (options): With shelf inserts or wardrobe hooks (4-way or 8-way) and magnets on the outside surfaces for docking-on further cabinet elements. Curved Landscape seat, table and cabinet elements can be combined in rows or as circular and undulating seating/cabinet landscapes thanks to the harmonized internal and external radii.

Sliding handles (optional) made from steel on the top of the body.

The following material groups are available to choose from: Body made of chipboard: L4; Perforated-plate: M1.

PRODUCT INFORMATION Shift-p-LTaschen_TY_EN - 11.01.2021 - www.vs-furniture.com

Shift+ Landscape Mobile storage cabinets.

Constructed from glued linear body on steel crosspiece with 4 tech castors, 2 of them lockable. Optionally with 4 adjustable feet.

Body made from melamine resin-coated chipboard with glued (KU) plastic edge. With glued central panels to subdivide the body, fixed, glued construction shelf and a perforated sheet visible back panel. Some available with plastic boxes on guide rails (see table). Optionally with protective rubber mats on the shelves.

Function (options): It is possible to define compartments for satchels, wardrobes with 4-way or 8-way hooks or plastic Gratnells boxes for each cabinet unit (row) individually depending on the size of the cabinet. With magnets on the external surfaces for docking-on further cabinet elements.

Sliding handles (optional) made from steel on the top of the body.

The following material groups are available to choose from: Body made of chipboard: L4; Perforated-plate: M1; Gratnell plastic box: C3.

TECHNICAL DESCRIPTION S800-Vor1_TB_EN - 05.01.2021 - www.vs-furniture.com

Serie 800 Preliminary remark - grid system.

Series 800 element cabinets are made from melamine-resin-coated chipboard with glue-on plastic or beech edge. Cabinets are available in 6 widths, 6 heights and 2 depths. One height grid (1FH) corresponds to 375 mm. Add-on cabinets are available 1, 2 and 3FH without [1] and with [2] base for a ladder rail to be installed (cf. table). In addition, many models (without technical built-in components) can be variably shortened in the width, height and depth dimensions in five-millimetre increments and thus built for a perfect fit in all room situations.

Top shelves are placed on the side walls and thereby form a cleanly structured top cover for low cabinets.

Cabinet fronts (2 cm) and further protruding parts such as handles for example are not taken into consideration in the depth specifications.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGUV Regel 108-007) must be secured to the wall or floor.

The following material groups are available to choose from: Front made of chipboard: L3; Body and bases made of chipboard: L3; Front veneered: F1.

Serie 800		1FH	2FH	3FH	4FH	5FH	6FH	
Cabinet	File height (37,5)

TECHNICAL DESCRIPTION S800-Vor2_TB_EN - 05.01.2021 - www.vs-furniture.com

Serie 800 Preliminary remark - carcass construction.

Serie 800 element cabinets are supplied fully glued or disassembled, with eccentric connectors. The row of holes (dia. 3 mm) at a grid distance of 25 mm can be used right through.

Shelf carriers (load class L75) are screwed into standard-equipped cabinets [1] and screwed and inserted into individually equipped cabinets [2].

Adjustable shelf inserts [3] made from chipboard (up to a width of 80 cm), coreboard (width 40 - 120 cm) and sheet steel (width 80 - 120 cm) have a concealed mounting for the shelf carriers.

Vertical carcass structures are fashioned by glued and, in the case of disassembled cabinets, by construction shelves [4] with eccentric connectors.

Horizontal carcass structures are fashioned by middle partitions flush with the carcass [5] or set back [6]. These are glued or, in the case of disassembled cabinets, equipped with eccentric connectors. Middle partitions flush with the carcass permit the use of separately closing single swing doors. Set-back partitions are combined with double swing doors.

Bases are a structural component of the carcass construction made from chipboard [7] or are positioned as a steel base [8] at heights of 75 and 40 mm below the carcass. Both base types have precision height adjustment by means of an Allen key [9] through the bottom shelf. The chipboard base can be fitted with a base cover strip flush with the front/door [10]. Base recesses [11] on the back are possible in the case of floor strips.

Wardrobe and washbasin cabinets are provided with plastic ventilation outlets on the top and bottom edges of the door.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGUV Regel 108-007) must be secured to the wall or floor.

TECHNICAL DESCRIPTION S800-Vor3_TB_EN - 13.10.2017 - www.vs-furniture.com

Serie 800

Preliminary remark - swing doors.

Series 800 element cabinets can be fitted with two different door hinges for the opening angles 110° [1] or 270° [2]. 110° door hinges cannot be seen from the outside and have damped door closing. Both hinges are available for single and for double swing doors in accordance with the carcass structure.

Single swing doors [3] are available hung on either the left or the right. The hanging side can be freely defined for widths up to 60 cm.

Double swing doors [4] are fitted with a flexible plastic impact strip.

Bow handles (steel, plastic and wood), knob handles und inset handles (round) are available to choose from.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGUV Regel 108-007) must be secured to the wall or floor.

TECHNICAL DESCRIPTION S800-Vor4_TB_EN - 05.01.2021 - www.vs-furniture.com

Serie 800

Preliminary remark - closing of swing doors, sliding doors and roller shutters.

Serie 800 element cabinets are available with swing doors (see Preliminary remark - swing doors) and with assorted sliding doors and roller shutters.

Lockable single and double swing doors [1] are equipped with cylinder or turning-knob locks and a locking rod with striker on the top and bottom shelves. [7] Bow handles (steel, plastic and wood), knob handles and inset handles (round) are available to choose from.

Glass sliding doors [2] (optionally lockable) made from single-layer safety glass are equipped with a roller guide and a rail system made from aluminium. A pressure-cylinder lock locks the door.

Chipboard sliding doors [3] (optionally lockable) are locked by a pressure-cylinder lock. [7] Bow handles (steel, plastic and wood), knob handles and inset handles (round and rectangular) are available to choose from.

Vertical roller shutters [4] (optionally lockable) made from plastic are fitted on 5FH cabinets with a horizontal strip handle [5] over the entire cabinet width. All cabinets are equipped with a strip handle with catch. A roller-shutter lock locks the roller shutter.

The keys will fold [6] and are supplied with a spare key located in the plastic lid in the case of customer-defined locking or locking based on a locking plan.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGVV Regel 108-007) must be secured to the wall or floor.

TECHNICAL DESCRIPTION S800-Vor5_TB_EN - 13.10.2017 - www.vs-furniture.com

Serie 800

Preliminary remark - closing of drawers and lockers.

Series 800 element cabinets are available with swing doors (see Preliminary remark - swing doors) and with assorted drawers and lockers.

Drawer cabinets [1] (optionally lockable) are available with 1 or 2 rows of drawers which are equipped in each case with central rod locking and a lock in the top drawer. [5] Bow handles (steel, plastic and wood), knob handles and inset handles (round) are available to choose from.

Locker cabinets [2] (always lockable) are available with simple case locks or with combination locks. All without handles.

Suspension filing cabinets and wide drawers [3] (optionally lockable) are available with central rod locking and a lock in the top drawer. Pulling out several drawers at once is disabled.

Keys are folding [4] and are supplied on delivery with a spare key integrated in the plastic cap.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGUV Regel 108-007) must be secured to the wall or floor.

TECHNICAL DESCRIPTION S800-Vor6_TB_EN - 13.10.2017 - www.vs-furniture.com

Serie 800 Preliminary remark - wardrobe.

Series 800 element cabinets with swing doors can be equipped from 4FH as wardrobe cabinets. 3 different wardrobe systems are used, depending on the width and depth dimensions.

[1] Width less than 50 cm, depth = 42.5 cm: Centrally positioned 3-point hook under the hat shelf (max. load 35 kg).

[2] Width from 50 cm, depth = 42.5 cm: Pull-out wardrobe rod under the hat shelf (max. load 6 kg).

[3] Width from 40 cm, depth = 58.0 cm: Laterally positioned wardrobe bar under the hat shelf (max. load 50 kg).

Wardrobe cabinets are equipped with plastic ventilation outlets [4] on the top and bottom edges of the door. Hat shelves [5] are located in 4FH-high cabinets at position 3FH and in 5FH- and 6OH-high cabinets at position 4FH. 6FH cabinets also have an additional adjustable shelf insert.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGUV Regel 108-007) must be secured to the wall or floor.

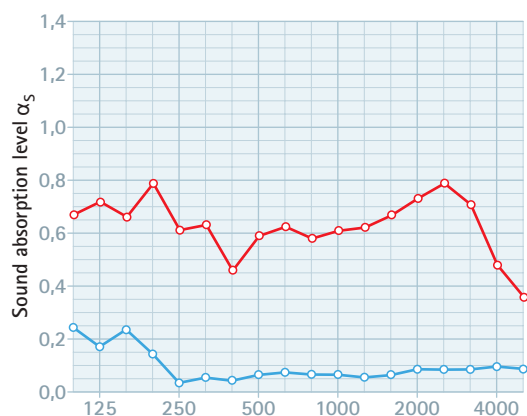

TECHNICAL DESCRIPTION S800-Vor7_TB_EN - 14.02.2018 - www.vs-furniture.com

Serie 800 certified as belonging to sound absorption class C.

The swing doors and roller shutters of Serie 800 units can be acoustically enhanced in order to improve sound absorption in rooms in which noise reverberates. This is achieved by using perforated surfaces for the swing doors and roller shutters.

Swing doors certified as belonging to sound absorption class C: The sound absorption properties of Serie 800 cabinets equipped with perforated swing doors in a reverberation chamber were determined in independent measurements performed according to DIN EN ISO 354. In addition, the determined sound absorption level was rated as being of sound absorption class C in accordance with DIN EN ISO 11654. Other measured characteristic values: Noise Reduction Coefficient $NRC=0.65$; Sound Absorption Average $SAA=0.64$ (according to ASTM C 423-09).

Roller shutters certified as belonging to sound absorption class C: The sound absorption properties of Serie 800 cabinets equipped with perforated roller shutters in a reverberation chamber were determined in independent measurements performed according to DIN EN ISO 354. In addition, the determined sound absorption level was rated as being of sound absorption class C in accordance with DIN EN ISO 11654. Other measured characteristic values: Noise Reduction Coefficient $NRC=0.60$; Sound Absorption Average $SAA=0.65$ (according to ASTM C 423-09). Standard surfaces are not eligible for classification (NOC).
