**Helvetica Health Care** supplies innovative Life Science products and technologies to manage health and improve the quality of life. In partnership with our customers, our commitment is to provide unrivalled service. From our European warehouse in Geneva, Switzerland, we offer 48 hour, risk free delivery. Order tracking from despatch to receipt by our dedicated customer service team, guarantees rapid delivery, effective temperature control and product quality.

Here below our range of products :

## **BLOOD PRODUCTS**

We can provide a range of clinical / biological samples with needed characterization, special material including POSITIVE HUMAN BLOOD, PLASMA and SERUM, as well as BIOPSY SAMPLES.

Our contacts enable us to source material in more than 50 countries worldwide and provide access to a network of clinical laboratories, transfusion centers, reference centers and pathology laboratories. We can also offer prospective collection of samples, based on the parameter required and particular specifications.

We also have access to large volumes of high grade Human Serum either pooled or individual, as well as negative plasma in EDTA or Citrate. High titre HBV Subtype Ad and Ay plasma is also available. High titre HBV Subtype Ad and Ay plasma is also available.

ZEPTOGEL and SCRUBBED NYLON FIBERS are used for the separation and isolation of Human lymphocytes from whole blood samples. Lymphocytes prepared by these methods are viable cell suspensions for tissue culture, enzymatic, biochemical and immunologic studies employing small volumes of blood.

Product code	Name of the product	Sub-category 2	Product size	Shipping conditions	Webpage
0801024	Scrubbed Nylon Fibers	Blood Separation	20 grams	+25° C.	<a href="https://www.h-h-c.com/product/scrubbed-nylon-fibers/">https://www.h-h-c.com/product/scrubbed-nylon-fibers/</a>
0801195	ZeptoGel	Blood Separation	500 ml	+2° to +8° C.	<a href="https://www.h-h-c.com/product/zeptogel/">https://www.h-h-c.com/product/zeptogel/</a>
03-001-050	Purified Human Interleukin-2	Human Material	50 mL	-20° C.	<a href="https://www.h-h-c.com/product/purified-human-interleukin-2/">https://www.h-h-c.com/product/purified-human-interleukin-2/</a>
07-210-001	Adult Human Elutriated Monocytes - Frozen	Human Material	1 mL	-20° C.	<a href="https://www.h-h-c.com/product/adult-human-elutriated-monocytes-frozen/">https://www.h-h-c.com/product/adult-human-elutriated-monocytes-frozen/</a>
07-212-001	Adult Human Elutriated Lymphocytes - Frozen	Human Material	1 mL	-20° C.	<a href="https://www.h-h-c.com/product/adult-human-elutriated-lymphocytes-frozen/">https://www.h-h-c.com/product/adult-human-elutriated-lymphocytes-frozen/</a>
P2-203-050	Human AB+ Serum, Heat-Inactivated	Human Material	50 mL	-20° C.	<a href="https://www.h-h-c.com/product/human-ab-serum-heat-inactivated/">https://www.h-h-c.com/product/human-ab-serum-heat-inactivated/</a>

## CYTOKINES AND GROWTH FACTORS

CYTOKINES are small proteins important in cell signalling, which are released by cells and affect the behaviour of other cells. Cytokines include chemokines, interferons, interleukins, lymphokines and tumour necrosis factor.

While growth factors suggest a positive effect on cell division, cytokine is a neutral term with respect to whether a molecule affects reproduction. Some cytokines can be growth factors, but others have an inhibitory effect on cell growth. Some are used as "death" signals and cause target cells to undergo programmed cell death.

Cytokines are produced by a broad range of cells, including immune cells like macrophages, B lymphocytes, T lymphocytes and mast cells. They act through receptors and are of special importance in the immune system as they modulate the balance between humoral and cell-based immune responses. They also regulate the maturation, growth, and responsiveness of particular cell populations.

They are important in health and disease, specifically in host responses to infection, immune responses, inflammation, trauma, sepsis, cancer, and reproduction.

Our CELLKINES™ product line consists of Human Interleukin-2 (IL-2), also referred to as T-CELL GROWTH FACTOR (TCGF). Natural Human IL-2 remains the preferred choice for lymphocyte cell stimulation in culture. Recombinant IL-2 produced in E. coli is also available.

Product code	Name of the product	Product size	Shipping conditions	Webpage
0801017	TCGF (Natural T-Cell Growth Factor, IL-2)	50 ml	-20° C.	<a href="https://www.h-h-c.com/product/tcgf-(natural-t-cell-growth-factor-il-2)">https://www.h-h-c.com/product/tcgf-(natural-t-cell-growth-factor-il-2)</a>

## DIAGNOSTICS RAPID TESTS

DIAGNOSTIC TESTS are used for screening, or to confirm or determine the presence of infection in individuals suspected of having a disease, following the report of symptoms, based on other test results. Screenings may be performed to help prevention, monitor disease prevalence, manage epidemiology or for statistical purposes.

We offer selected DIAGNOSTICS RAPID TESTS kits intended for initial screening, with excellent specificity and sensitivity, are easy to interpret and require no specialised equipment. Our HCV and HIV rapid tests are simple, qualitative tests intended for initial screening of antibodies to HCV and HIV in human serum or plasma. The tests are ideal for use in emergency situations, such as in the field, or in transplant and grafting procedures

Gonochek 11 also provides rapid and accurate test results for the confirmation of pathogens to Neisseria organisms, with a short set up time and rapid results.

## EIA KITS

Enzyme-linked immunosorbent assay (ELISA) is a biochemistry assay method that uses a solid-phase enzyme immunoassay (EIA) to detect the presence of a substance, usually an antigen, in liquid samples.

ELISA tests are commonly carried out using a micro well format and usually use antibodies in the sample linked to an enzyme, which when added to the enzyme's substrate, creates a detectable signal. The detectable signal is usually visualised by a colour change to the substrate.

We provide a range of ELISA kits which are ready to use, with break apart wells. We offer the following range of ELISAs:

- The RETROTEK™ range is designed for the detection and quantitation of retroviral antigens from the retroviruses HIV-1, SIV and HTLV found in cell culture, serum, plasma or other biological fluids
- IMMUNOTEK™ kits can detect and quantify various immunoglobulins from many species including Human, Chicken, Cow, Goat, Rabbit, Rat and Mouse.

We also provide HHV-6 IgG antibody and KSHV/HHV8 IgG antibody ELISA kits.

## **MOLECULAR BIOLOGY**

**MOLECULAR BIOLOGY** concerns biological activity at the molecular level and how genes are transcribed into RNA and how RNA is then translated into protein. It also looks at the molecular mechanisms behind processes such as replication, transcription, translation and cell function.

We offer a wide range of ready to use forward and reverse **PRIMERS**. Primers are short sequences of complementary DNA which bind to certain nucleotide sequences along the DNA strand, tending to bind onto the single strands at higher temperatures than the complete complementary strand. This means that if the temperature is cooled from 95°C to around 50-60°C, the primers will bind to the single strands before the complementary complete strands do. Good primer design is essential for a successful PCR reaction.

Our range of **MOLECULAR CONTROLS** and **STANDARDS** includes the **NATtrol™** products (Nucleic Acid Testing Control), which are the highest industry standard for molecular testing.

**NATtrol™** products are prepared from purified microorganisms grown either in cell culture, microbial culture or isolated from the plasma of infected individuals. The treatment modifies the surface proteins and renders the organisms non-infectious and refrigerator stable, while keeping it intact.

**NATtrol™** are available as full process controls to monitor extraction and amplification steps, and are also available in different formats, covering both single and multiple analytes. They are open system and can be used across different molecular testing platforms and assays.

### **NATtrol EXTERNAL RUN CONTROLS**

**EXTERNAL RUN CONTROLS** are designed as full process extraction and amplification controls to validate your molecular testing on a daily basis. These controls are available for viral, bacterial, fungal and parasite detection at low and medium reactive concentrations. A number of **NATtrols** have been developed in collaboration with leading platform manufacturers.

### **NAT CONTROLS**

We have a large range of **MOLECULAR STANDARDS**, **QUANTITATED VIRAL LOAD CONTROLS** which provide you with purified viruses at a known concentration. Our range also includes Viral RNA and DNA which can be used for your molecular research needs to ensure your PCR reproducibility. These products feature quantitated DNA from our highly purified bacteria and viruses.

Bacterial preparations are also available as Titered Organisms (live), and Purified DNA.

**PURIFIED DNA** are from a range of bacteria, fungi and recombinant strains for use as amplification controls in Nucleic Acid testing.

**PURIFIED GENOMIC DNA** is also available for amplification or detection control for the Nucleic Acid testing of Bacteriophage Lambda. **MS2 BACTERIOPHAGE** is also available at different

target levels for use as an internal control in Nucleic Acid based amplification assays to monitor reverse transcription.

As an EXTERNAL CONTROL for EIA, latex agglutination and immunochromatographic assays, we can provide Cryptococcus polysaccharide antigens. A MIXED BACTERIA PANEL is also available for testing the performance of lab staff.

## MONOCLONAL ANTIBODIES

We offer a comprehensive range of MONOCLONAL and POLYCLONAL ANTIBODIES against infectious agents. These antibodies are directed against specific human viral proteins and are highly specific in immunoassays. Our range of MONOBODIES™ can

be used in different applications including ELISA, immunoblotting and immunochemistry.

Antibodies are proteins found in the serum, known also as Immunoglobins (IgG). These are serum proteins which belong to a group of proteins called *gamma globulins*. These proteins are created by the body as a response to antigens, which are substances produced by foreign bodies whether they be carbohydrates, proteins, nucleic acids or lipids.

Antigens are harmful germs or pathogens, or other foreign substances which threaten and can alter the normal functioning of the body.

MONOCLONAL ANTIBODIES (MABs) are monospecific antibodies that are made by identical immune cells, all clones of a unique parent cell. These antibodies are produced by the body naturally as part of the immune system's response to germs, vaccines and other foreign bodies.

MABs offer advantages over polyclonal antibodies due to their homogeneity and binding specificity. As they detect one target epitope, MABs are less likely to cross-react with other proteins than polyclonal antibodies, which can recognize multiple epitopes on any one antigen.

## OXIDATIVE STRESS

Our range of OXIDATIVE STRESS assay kits and standards is designed to assist in the exploration of oxidative stress markers and metabolites in human and animal samples, as well as samples exposed to drugs and foods.

Oxidative stress is associated with increased production of reactive oxidizing species or decrease in the effectiveness of antioxidant defenses which alter the body's ability to repair the damage caused. The effects of oxidative stress depend upon the extent of these changes. Cells are able to overcome small changes and regain their original state.

Disturbances in the normal redox state of the cells can create toxic effects through production of peroxides and free radicals. These toxic effects damage the cell components, including DNA, proteins and lipids, and severe oxidative stress can cause cell death.

Oxidative stress can cause disruptions in normal mechanisms of cellular signalling. In humans, oxidative stress is believed to be involved in the development of a number of diseases including: asperger syndrome, ADHD, cancer, Parkinson's disease, Alzheimer's disease, atherosclerosis, heart failure, myocardial infarction, fragile X syndrome, Sickle Cell Disease, lichen planus, vitiligo, autism, infection, chronic fatigue syndrome and depression.

The TBARS (Thiobarbituric Acid Reactive Substances) assay has become the assay of choice for screening and monitoring lipid peroxidation, which is a major indicator of oxidative stress.

The assay can be used with many types of samples including drugs, food products and material of human and animal origin and provides standardised and reproducible results.

## QUALITY CONTROL PANELS

Performing a quality control is the best way to ensure accurate test results, so using our range of QUALITY CONTROL PANELS provides a benefit to both your patients and the reputation of your laboratory.

We can offer you a wide choice of panels that can challenge the sensitivity, specificity and working range of your assays or be used for diagnostic development or batch release in manufacturing. Panels include representative data from current assays on the market.

Our range of VERIFICATION / VALIDATION Panels are designed to use with assays to determine the presence of antigen, antibody RNA or DNA based upon the intended use of the panel.

We also have an extensive range of SEROCONVERSION PANELS for detection of asymptomatic donors infected with HIV, HCV, HBV and EBV, as well as SURVEILLANCE PANELS and LONGITUDINAL PANELS.

Our panels are run on as many different diagnostic kits as possible to measure relevant markers of seroconversion.

All testing is performed by Certified Reference Laboratories and Domestic and International Regulatory Bodies.

Our range of SEROLOGICAL CONTROLS, the SeraCon Run Controls, are intended for use in assessing the performance of immunoassay test procedures for the qualitative determination of HBsAg, anti-HIV and anti-HCV.

Product code	Name of the product	Sub-category	Product size	Shipping conditions	Webpage
P0041	HBV-DNA (1.000 to 10.000.000 copies/ml)	Nucleic Acid Linearity and Quantification Panels	1.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/hbv-dna-(1.000-to-10.000.000-copies/ml)">https://www.h-h-c.com/product/hbv-dna-(1.000-to-10.000.000-copies/ml)</a>
P0042	HCV-RNA (500 to 250.000 copies/ml)	Nucleic Acid Linearity and Quantification Panels	1.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/hcv-rna-(500-to-250.000-copies/ml)">https://www.h-h-c.com/product/hcv-rna-(500-to-250.000-copies/ml)</a>
P0043	HIV-RNA (50 to 250.000 copies/ml)	Nucleic Acid Linearity and Quantification Panels	1.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/hiv-rna-(50-to-250.000-copies/ml)">https://www.h-h-c.com/product/hiv-rna-(50-to-250.000-copies/ml)</a>
P0044	CMV-DNA strain ad169 (100 to 100.000 copies/ml)	Nucleic Acid Linearity and Quantification Panels	1.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/cmv-dna-strain-ad169-(100-to-100.000-copies/ml)">https://www.h-h-c.com/product/cmv-dna-strain-ad169-(100-to-100.000-copies/ml)</a>
P0045	HSV-1-DNA (50 to 50.000 copies/ml)	Nucleic Acid Linearity and Quantification Panels	1.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/HSV-1-dna-(50-to-50.000-copies/ml)">https://www.h-h-c.com/product/HSV-1-dna-(50-to-50.000-copies/ml)</a>
P0046	HSV-2-DNA (50 to 50.000 copies/ml)	Nucleic Acid Linearity and Quantification Panels	1.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/HSV-2-dna-(50-to-50.000-copies/ml)">https://www.h-h-c.com/product/HSV-2-dna-(50-to-50.000-copies/ml)</a>
P0001	Sensitivity panel HBV-DNA Eurohep genotype A	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-eurohep-genotype-a">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-eurohep-genotype-a</a>
P0002	Sensitivity panel HBV-DNA Eurohep genotype D	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-eurohep-genotype-d">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-eurohep-genotype-d</a>

Product code	Name of the product	Sub-category	Product size	Shipping conditions	Webpage
P0003	Sensitivity panel HBV-DNA ISS genotype A	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-iss-genotype-a/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-iss-genotype-a/</a>
P0004	Sensitivity panel HBV-DNA 2nd WHO IS (genotype A)	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-2nd-who-is-genotype-a/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-2nd-who-is-genotype-a/</a>
P0007	Sensitivity panel HBV-DNA genotype A	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-a/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-a/</a>
P0008	NHP 50 ml in Nunc-tubes	Nucleic Acid Sensitivity Panels	225 ml	-20° C.	<a href="https://www.h-h-c.com/product/nhp-50-ml-in-nunc-tubes/">https://www.h-h-c.com/product/nhp-50-ml-in-nunc-tubes/</a>
P0009	Sensitivity panel HBV-DNA genotype B	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-b/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-b/</a>
P0010	Sensitivity panel HBV-DNA genotype C	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-c/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-c/</a>
P0011	Sensitivity panel HBV-DNA genotype D	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-d/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-d/</a>
P0012	Sensitivity panel HBV-DNA genotype E	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-e/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-e/</a>
P0013	Sensitivity panel HBV-DNA genotype F	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-f/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-f/</a>
P0014	Sensitivity panel HBV-DNA genotype G	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-g/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-g/</a>
P0019	Sensitivity panel HCV-RNA genotype 1	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-1/">https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-1/</a>
P0020	Sensitivity panel HCV-RNA genotype 3 inact.	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-3-inact/">https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-3-inact/</a>
P0025	Sensitivity panel HIV-RNA group M subtype B	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-b/">https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-b/</a>
P0026	Sensitivity panel HIV-RNA group M subtype B inactivated	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-b-inactivated/">https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-b-inactivated/</a>
P0027	Sensitivity panel HIV-RNA group M subtype C	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-c/">https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-c/</a>
P0028	Sensitivity panel HIV-RNA CRF01_AE	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-crf01-ae/">https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-crf01-ae/</a>
P0030	Sensitivity panel HIV-RNA 2nd WHO IS	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-2nd-who-is/">https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-2nd-who-is/</a>
P0031	Sensitivity panel HBV-DNA genotype A inactivated	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-a-inactivated/">https://www.h-h-c.com/product/sensitivity-panel-hbv-dna-genotype-a-inactivated/</a>
P0032	Sensitivity panel HIV-RNA group M subtype A	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-a/">https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-a/</a>
P0033	Sensitivity panel HIV-RNA group M subtype D	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-d/">https://www.h-h-c.com/product/sensitivity-panel-hiv-rna-group-m-subtype-d/</a>
P0034	Sensitivity panel HIV-2 RNA subtype A	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hiv-2-rna-subtype-a/">https://www.h-h-c.com/product/sensitivity-panel-hiv-2-rna-subtype-a/</a>
P0035	Sensitivity panel HCV-RNA genotype 2	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-2/">https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-2/</a>
P0036	Sensitivity panel HCV-RNA genotype 3	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-3/">https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-3/</a>
P0037	Sensitivity panel HCV-RNA genotype 4	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-4/">https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-4/</a>
P0038	Sensitivity panel HCV-RNA genotype 5	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-5/">https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-5/</a>
P0039	Sensitivity panel HCV-RNA genotype 6	Nucleic Acid Sensitivity Panels	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-6/">https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-genotype-6/</a>
P0058	HIV-RNA quant.control	Run Controls for Nucleic Acid Testing	10.000 cp/ml	-20° C.	<a href="https://www.h-h-c.com/product/hiv-rna-quant.control/">https://www.h-h-c.com/product/hiv-rna-quant.control/</a>

Product code	Name of the product	Sub-category	Product size	Shipping conditions	Webpage
P0059	HCV-RNA quant.control	Run Controls for Nucleic Acid Testing	50.000 cp/ml	-20° C.	<a href="https://www.h-h-c.com/product/hcv-rna-quant-control">https://www.h-h-c.com/product/hcv-rna-quant-control</a>
P0060	HBV-DNA quant.control	Run Controls for Nucleic Acid Testing	100.000 cp/ml	-20° C.	<a href="https://www.h-h-c.com/product/hbv-dna-quant-control">https://www.h-h-c.com/product/hbv-dna-quant-control</a>
P0061	Sensitivity panel HCV-RNA 3rd WHO IS (genotype 1a)	Run Controls for Nucleic Acid Testing	4.0 ml	-20° C.	<a href="https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-3rd-who-is-genotype-1a">https://www.h-h-c.com/product/sensitivity-panel-hcv-rna-3rd-who-is-genotype-1a</a>
P0063	CheckControl HCV-RNA 125	Run Controls for Nucleic Acid Testing	125 cp/ml	-20° C.	<a href="https://www.h-h-c.com/product/checkcontrol-hcv-rna-125">https://www.h-h-c.com/product/checkcontrol-hcv-rna-125</a>
P0064	CheckControl HIV-RNA 125	Run Controls for Nucleic Acid Testing	125 cp/ml	-20° C.	<a href="https://www.h-h-c.com/product/checkcontrol-hiv-rna-125">https://www.h-h-c.com/product/checkcontrol-hiv-rna-125</a>
P0065	CheckControl HBV-DNA 125	Run Controls for Nucleic Acid Testing	125 cp/ml	-20° C.	<a href="https://www.h-h-c.com/product/checkcontrol-hbv-dna-125">https://www.h-h-c.com/product/checkcontrol-hbv-dna-125</a>

## WESTERN BLOT

Simian Immunodeficiency Virus (SIV), is the lentivirus most closely related to Human HIV. SIV infection in monkeys is the preferred model for studying the effectiveness of vaccines and pathogenesis against Human HIV infection.

The ZeptoMetrix WESTERN BLOT is for in vitro detection of antibodies to SIV in serum or plasma, and is available in 10 or 30 strip kit formats.

We also offer a bench top, western blot processor, the AUTOBLOT 3000. It controls incubation times, dispensing volumes and washing programs. 10 user defined protocols can be programmed.

Western blotting is a technique used in cell and molecular biology to separate and identify specific proteins from a complex mixture of proteins extracted from cells. In this technique, a mixture of proteins is separated based on their molecular weight, through gel electrophoresis, which acts as a molecular sieve.

Results are then transferred to a nitrocellulose membrane producing a band for each protein. The membrane is then incubated with labelled antibodies specific to the protein of interest to produce a colored band.

## **HHC Terms and Conditions of Sale**

### **General**

These general terms and conditions of sale and supply apply to all supplies of goods and services (hereafter called goods) referred to in the offer or in the seller's order confirmation, unless agreed otherwise in writing.

The purchaser's conditions of purchase are not applicable even if no specific objection has been made to them.

Acceptance of the goods signifies in all cases recognition of these conditions by the purchaser. In so far as these conditions do not contain any regulations, the Swiss law of obligation applies.

All communications relating to transactions made under these conditions must be in written form, by letter, fax or email; the written form may be renounced only by written agreement.

### **Offers**

Offers made by the seller are, subject to special agreement, binding only if accepted immediately by the purchaser and are in any case subject to these general terms and conditions of sale and supply. Offers are valid for 30 days except a specific validity date is specified.

### **Orders**

Orders for supplies become binding upon confirmation of the order by the seller. This will be given in writing following clarification and acceptance of all details. Verbal or written agreements and changes to orders that have been placed likewise require written confirmation by the seller in order to become valid.

The seller may agree in writing to the cancellation or alteration of a confirmed order if the state of the works permits. Any costs arising from the cancellation or alteration of an order will be borne by the purchaser.

### **Delivery Terms**

Next day dispatch if in stock item for orders received Monday to Wednesday am. Non stock items or orders received after 12.00 Wednesday will be dispatched the following Monday.

### **Payment Terms**

Unless otherwise stated in our order confirmation or quotation or varied by written agreement, terms of payment of payment are ex works Geneva, net 30 days from date of invoice.

Payment by Mastercard / Visa / Amex is available on line through the PayPal system.

If the purchaser fails to meet a deadline for payment, interest at a rate of 1% for each month that starts from the date the payment was due, may be applied without a written reminder.

If the purchaser is in default with payments for supplies he has already received, the seller has the right to rescind in writing the part of the order not yet executed without allowing any further time and to cancel all orders already confirmed but not yet executed. The purchaser must compensate the seller fully for damages arising there from.

Payment of the amounts due for supplies delivered may not be refused upon any grounds. The purchaser is not entitled to set-off any amount without the prior written agreement of the seller. If the purchaser does not comply with the terms of payment or if he is unable to make payment, all outstanding credit balances become due for payment irrespective of the agreed payment deadlines and may be claimed by the seller

### **Force Majeure**

Events of force majeure release the seller from the fulfilment of his supply obligations. In such events the purchaser renounces claims of any kind.

Instances of force majeure include, inter alia, mobilization, war, sabotage, strike, lock-out, revolution, orders from the authorities, embargo, flooding, storm, fire and other elemental occurrences as well as all other unforeseen factors such as interruption of the power supply, delayed or defective supply of raw material or breakdown of machinery or tools at the seller's works or at those of one of his sub-contractors.

Force majeure events also include transport difficulties or delays, late availability of means of transport, traffic delays.

### **Reservation of Title**

The seller remains the owner of the goods until he has received the payment owed for them in full.

The purchaser is obliged to take the necessary measures to protect the supplier's property. The purchaser concedes to the seller the absolute right to have the reservation of title recorded in the official register at the purchaser's registered offices.

The processing, reshaping or blending of the supplied goods by the purchaser does not affect the seller's title. If the goods supplied are processed or blended with other objects not belonging to the seller, he acquires joint ownership of the new object in proportion to the value of the goods supplied at the time of processing.

The purchaser will for the duration of the reservation of title protect the goods supplied at his own expense and will insure them against theft, fire, lightning, water and damage

from the elements. Furthermore he will take all necessary steps to ensure that the seller's claim to title is neither diminished nor revoked.

### **Minimum Order Level**

HHC has no minimum order level.

### **Shipping Costs**

#### **For deliveries within the European Union :**

Free delivery for orders with total value above EUR 725, CHF 762, GBP 544 and USD 820. For orders below these values, shipping costs are charged.

Dry ice orders :

Free delivery for dry ice orders with total value above EUR 925, CHF 972, GBP 694 and USD 1046. For dry ice orders below these values, shipping costs are charged.

For combined orders each minimum has to be applied as the different products will be shipped separately.

#### **For deliveries outside the European Union :**

Shipping costs are not included in our price. The best delivery solution is submitted (courier TNT, DHL, Fedex or airfreight) considering the most cost effective way of transportation that can guarantee the delivery in the best conditions.

### **Duties and taxes**

#### **For deliveries within the European Union :**

All orders within the European Union (Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Germany, Denmark, Estonia, Greece, Spain, Finland, France, United Kingdom, Hungary, Ireland, Italy, Lithuania, Luxemburg, Latvia, Malta, Netherlands, Poland, Portugal, Rumania, Sweden, Slovakia, Slovenia) are delivered as **intra-Community supplies, exempt from VAT** (Incoterm DDP "destination") and duties (**intra-Community delivery – exempt from VAT in conformity with article 262 ter 1 of the C.G.I., general taxation code** (Article 138-1 Council Directive 112/2006/EC)).

#### **For deliveries outside the European Union :**

Importation costs, VAT and any relevant additional expenses are at the charge of the receiver (incoterm EX WORKS Geneva, Switzerland).

### **Guarantee**

The seller's liability for defects in the goods supplied is restricted to free replacement or repair of the goods for a guarantee period of six months from the time of dispatch of

the goods or until the expiry date of the product. The goods replaced by perfect goods become the property of the seller.

Furthermore the purchaser has no claims of any kind against the seller, in particular any ongoing rights to substitution, reduction or compensation for damages arising through defective supply. Excluded in particular are all claims by the purchaser for compensation for indirect or consequential damages (including lost orders, income or profits, recall costs, interruption of work, claims by third parties) and for all other costs that the purchaser may incur in connection with the supply of the defective goods.

A complaint does not entitle the purchaser to withhold payment of the price of the goods in question.

### **Product Liability**

The seller is liable for the goods supplied within the scope of the law.

### **Place of jurisdiction and applicable law**

The place of jurisdiction for the seller and the purchaser is the registered offices of the seller. However the seller has the right to take action against the purchaser at his registered offices. The legal relationship is subject to Swiss law, with the express exclusion of the United Nation's Convention on Contracts for the Sale of Goods (Vienna Convention).
