

UFC Integrated Routing Closure

B - C Length

The UFC fibre splice closure is the largest fibre splice closure from HellermannTyton. With a large number of ports for larger fibre cables, the UFC is suited to all FTTX, backhaul and trunk applications.

Features and benefits

- Maximum fibre splice capacity
 - 360 when using SE MKII trays (C Length)
 - 1440 when using SC-B MKI tray (C Length Double Stack)
- 28 round ports and 2 oval ports
- Positive fibre management to ensure consistent 30mm minimum fibre bend radii throughout
- Fibre storage area
- Bi-directional fibre routing
- Bottom of Stack and Top of Stack crossover points on Double Stack Closures.
- Accommodates SC, SC-B and SE trays
- Maximum 12 splices per tray without double stacking
- 3A and ANT splice options available
- Splitter accommodation
- Cablelok compatible for all port sizes
- Quick release cover
- Optional pressure release valve

UFC Base Configuration

Technical Description

The UFC Integrated Routing (IR) closure is available with a Cablelok (Polypropylene) or Heatshrink (Flame Retardant Polypropylene) base. The base configuration of 28 round ports and 2 oval ports covers a cable diameter range of 4.0 – 29.0mm when using Cablelok mechanical seals and 6.0 – 35.0mm when using heatshrink.

The mounting system is manufactured from Grade 304 stainless steel and the backplanes are aluminium extrusions. The UFC offers a range of tray configurations offering a maximum capacity of 60 SE-IR MKI or 120 IR SC-B MKI trays when using a double stack configuration.

A maximum of 30 SE-IR MKII or 60 IR SC-B MKII trays can be fitted in to the UFC using the single stack configuration (double stack configuration is not available when using MKII trays). The UFC closure can be supplied with splice trays offering either 3A or ANT splice bridges.

UFC IR C-Length and B-Length Closures with baskets and SE-IR MKII fibre splice trays.

UFC IR C-Length Double Stack, C-Length and B-Length Single Stack Closures with baskets and SC-B fibre splice trays.

The position of the mounting system allows easy access for the routing of the fibre on to the trays and provides space for the storage of fibre loops. The trays and fibre optic routing module are white which makes it easy to see the colour of the fibre elements as they are routed through the positive fibre management system. Fibre slot retaining blocks guide fibre elements in to the IR system, the foam pad on the retainer is partially cut through to accommodate a range of fibre counts.

All IR system cover plates are coloured blue identifying them as removable parts allowing access to the fibre and the fibre slot retaining block and tray retaining clips are coloured red to aid in identification if they are dropped.

UFC Integrated Routing Closure continued.

B - C Length Splice Tray Options

Supplied with IR Single Element SE MKII or SC-B MKII

Features and benefits

- Positive fibre management - minimum bend radius 30mm
- Splice positions at the front of the tray
- 2 fibre entry ports
- SC-B MKII
 - Moulded splice holder fins for heatshrink (3A) splice protectors
 - Maximum splice capacity of 12 fibres
- SE-IR MKII
 - 2 mounting positions for splice inserts (shown with 3A inserts)
 - Maximum splice capacity of 24 fibres (double stacked)
 - Optical splitter accommodation up to 60 x 7 x 4mm

SC-B MKII Fibre Splice Tray with moulded splice holder fins (front view).

UFC Tubed Closure

A - C Length

The UFC fibre splice closure is the largest fibre splice closure from HellermannTyton. With a large number of ports for larger fibre cables, the UFC is suited to all FTTX, backhaul and trunk applications.

Features and benefits

- Maximum splice capacity up to 864 fibres when using NZDF SE-A trays (C Length Double Stack)
- 28 round ports and 2 oval ports
- Accommodates Hellipse NZDF SE-A or SMF SE-A trays
- Maximum 24 splices per tray without double stacking (SMF SE-A trays)
- Splitter accommodation
- 3A and ANT splice options available
- Cablelok compatible for all port sizes
- Quick release cover
- Optional flash test valve and/or grounding feed-through

UFC Base Configuration

UFC C-Length Double Stack Closure.

Hellipse NZDF SE-A Fibre Splice Trays

UFC A-Length Closure with basket.

Technical Description

The UFC closure is available in a range of lengths with either a Cablelok (Polypropylene) or Heatshrink (Flame Retardant Polypropylene) base. The base configuration of 28 round ports and 2 oval ports covers a cable diameter range of 4.0 – 29.0mm when using Cablelok mechanical seals and 6.0 – 35.0mm when using heatshrink.

The mounting and support system is manufactured from Grade 304 stainless steel and can accommodate up to 72 Hellipse NZDF SE-A or

SMF SE-A trays giving a maximum of 864 fibre splices based on 12 fibres per tray (when using Hellipse NZDF SE-A trays). The UFC closure can be supplied with splice trays offering either 3A or ANT splice bridges. The tubed closure and position of the mounting system allows for ease of access and traceability of the fibre on to the trays. The trays are white which makes it easy to see the colour of the fibre elements as they are routed through the fibre management system and on to the trays.

FDN-IR 29 and 53 Port Closures

A - C Length

The FDN fibre splice closure delivers fibre to individual buildings or properties. The FDN is an oval shaped fibre closure with a high drop count making it the ideal solution for built up areas where there are multiple buildings to service.

Features and benefits

- Maximum 432 when using SE MKII trays (C Length)
- 52 or 28 round ports and 1 oval port
- Positive fibre management to ensure consistent 30mm bend radii throughout
- Fibre storage basket for loop through applications
- Bi-directional fibre routing
- Accommodates SC, SC-B and SE trays
- 3A and ANT splice options
- Maximum 12 splices per tray (without double stacking)
- Splitter accommodation
- Cablelok compatible for all port sizes
- Quick release cover
- Optional pressure release valve

FDN 53 Port Base Configuration

FDN 29 Port Base Configuration

Technical Description

The FDN 29 and 53 Port Integrated Routing (IR) closures are supplied with a Polypropylene base. With base configurations of either 52 round ports and 1 oval port or 28 round ports and 1 oval port, the FDN accommodates a cable diameter range of 1.7mm – 20.0mm when using Cablelok mechanical seals.

The mounting system is manufactured from Grade 304 stainless steel and the backplane is an aluminium extrusion which is suitable for use with both the MKI and MKII trays and can accommodate up to 36 IR SE trays or 72 IR SC/SC-B trays or a combination of SE, SC and SC-B trays. The FDN closure can be supplied with splice trays offering either 3A or ANT splice bridges.

FDN IR 53 Port C-Length Closure with basket.

FDN-IR 16 and 59 Port Closures

A - C Length

The FDN fibre splice closure delivers fibre to individual buildings or properties. The FDN is an oval shaped fibre closure with a high drop count making it the ideal solution for built up areas where there are multiple buildings to service.

Features and benefits

- Maximum fibre splice capacity
 - 432 when using SE MKII trays (C Length)
 - 864 when using SC-B tray (C Length)
- 58 or 15 round ports and 1 oval port
- Positive fibre management to ensure consistent 30mm minimum fibre bend radii throughout
- Fibre storage basket for loop through applications
- Bi-directional fibre routing
- Accommodates SC, SC-B, SE trays
- 3A and ANT splice options available
- Maximum 12 splices per tray (without double stacking)
- Splitter accommodation
- Cablelok compatible for all port sizes
- Quick release cover
- Optional pressure release valve

FDN 59 Port Base Configuration

FDN 16 Port Base Configuration

Technical Description

The FDN 16 and 59 Port Integrated Routing (IR) closures are supplied with a Polypropylene base. With base configurations of either 58 round ports and 1 oval port or 15 round ports and 1 oval port, the FDN accommodates a cable diameter range of 1.7 – 29.0mm when using Cablelok mechanical seals and 6.0 – 35.0mm when using heatshrink.

The mounting system is manufactured from Grade 304 stainless steel and the backplane is an aluminium extrusions which is suitable for use with MKI and MKII trays. The closure can accommodate up to 36 SE-IR trays or 72 SC/SC-B trays or a combination of SE, SC and SC-B trays. The FDN closure can be supplied with splice trays offering either 3A or ANT splice bridges.

FDN IR 16 Port C-Length and A-Length Closures with basket and SE-IR MKII fibre splice trays.

FDN IR 59 Port C-Length and A-Length Closures with basket and SC-B fibre splice trays.

The position of the mounting system allows easy access for the routing of the fibre on to the trays and the basket provides storage space for the storage of fibre loops. The trays and fibre optic routing module are white which makes it easy to see the colour of the fibre elements as they are routed through the positive fibre management system. Fibre slot retaining blocks guide fibre elements in to the IR system, the foam pad on the retainer is partially cut through to accommodate a range of fibre counts.

All IR system cover plates are coloured blue identifying them as removable parts allowing access to the fibre, the fibre slot retaining block and tray retaining clips are coloured red to aid in identification if they are dropped.

FDN 16 and 59 Port Tubed Closures

A - C Length

The FDN fibre splice closure delivers fibre to individual buildings or properties. The FDN is an oval shaped fibre closure with a high drop count making it the ideal solution for built up areas where there are multiple buildings to service.

Features and benefits

- Maximum 864 fibre splice capacity when using SMF SE-A trays (C Length)
- 58 or 15 round ports and 1 oval port
- Fibre storage basket for loop through applications (where specified)
- Accommodates Hellipse NZDF SE-A and SMF SE-A trays
- Maximum 24 splices per tray without double stacking (SMF SE-A trays)
- 3A and ANT splice options available
- Splitter accommodation
- Cablelok compatible for all port sizes
- Quick release cover
- Optional flash test valve and/or grounding feed-through

FDN 59 Port C-Length Closure with basket.

Hellipse NZDF SE-A Fibre Splice Trays

FDN A-Length Closure with basket.

FDN 59 Port Base Configuration

FDN 16 Port Base Configuration

Technical Description

The FDN 16 and 59 Port closures are supplied with a Polypropylene base. With base configurations of either 58 round ports and 1 oval port or 15 round ports and 1 oval port, the FDN accommodates a cable diameter range of 1.7 – 29.0mm when using Cablelok mechanical seals and 6.0 – 35.0mm when using heatshrink.

The mounting system is manufactured from Grade 304 stainless steel and can accommodate up to 36 Hellipse NZDF SE-A or SMF SE-A trays giving a maximum of 864 fibre splices based on 24 fibres per tray (when

using Hellipse SMF SE-A trays). The FDN closure can be supplied with splice trays offering either 3A or ANT splice bridges.

The tubed closure and the position of the mounting system allows for ease of access and traceability of the fibre on to the trays and the basket provides storage space for the storage of fibre loops. The trays are white which makes it easy to see the colour of the fibre elements as they are routed through the fibre management system.

CFN-IR Compact Fibre Node Closures

19 and 27 Port

The CFN fibre splice closure range offers a closure for a wide range of FTTx applications for both P2P and P2MP topologies.

Features and benefits

- Maximum 144 fibre splice capacity (M length)
- 26 or 18 round ports and 1 oval port
- Positive fibre management to ensure consistent 30mm bend radii throughout
- Fibre storage basket for loop through applications
- Bi-directional routing
- Accommodates a maximum of 12 CFN SE trays
- Off tray PLC splitter accommodation
- Cablelok compatible for all port sizes
- Quick Release cover
- Integrated closure mounting points for MOBRA, pole and facade fixing
- Optional pressure release valve/cable location/toning point

CFN R Port Base Configuration

CFN D Port Base Configuration

Technical Description

The CFN 19 and 27 Port Integrated Routing (IR) closures are supplied with a UV stable Polypropylene base. With base configurations of either 26 round ports and 1 oval port or 18 round ports and 1 oval port, the CFN accommodates a cable diameter range of 1.7 - 20.0mm when using mechanical cablelok seals.

The IR Fibre Management System (FMS) accommodates a maximum of 12 compact SE single element splice trays in the M length closure and 6 in the S length closure. The trays can be fitted with a range of fibre splice bridges including 3A and ANT.

The position of the FMS allows unrestricted access to the cable entry ports, each of which has the option of integrated cable anchoring. The loop storage basket is situated directly above the oval cable port enabling efficient routing to it and the fibre splice trays via the modular

FRBU 16 Port Closures

MX and B Length

The FRBU fibre splice closure distributes fibre directly to individual buildings or properties. The FRBU is a smaller fibre closure from HellermannTyton that is often deployed in rural and less built up locations with fewer buildings to connect.

Features and benefits

- Maximum 144 fibre splice capacity
- 16 round ports and 1 oval port
- 2 Cover Length options
- Fibre storage basket for loop through applications
- Maximum 6 Hellapon Medium trays
- Maximum 24 splices per tray (double stacked)
- Splitter accommodation
- Cablelok compatible for all port sizes
- Quick release cover
- Optional flash test valve and/or grounding feed-through

Technical Description

The FRBU 16 Port closure offers two cover lengths and is supplied with a Polypropylene base. The 16 port base configuration has 16 round ports and 1 oval port which accommodates a cable diameter range of 1.7 – 9.5mm (R Ports) and 4.0 – 15.0mm (LM port) when using Cablelok mechanical seals.

With a range of mounting systems, manufactured from Grade 304 stainless steel, the closure can accommodate a maximum of 6 Hellapon Medium trays giving a maximum of 144 fibre splices based on 24 fibres

FRBU B-Length 16 Port Closure with 3 Medium Hellapon Trays and Basket.

FRBU B-Length 16 Port Closure with 6 Medium Hellapon Trays.

FRBU 9 and 11 Port Closures

B Length

The FRBU fibre splice closure distributes fibre directly to individual buildings or properties. The FRBU is a smaller fibre closure from HellermannTyton that is often deployed in rural and less built up locations with fewer buildings to connect.

Features and benefits

- Maximum 144 fibre splice capacity
- 10 or 8 round ports and 1 oval port
- Accommodates Hellapon Medium stacked or side hinged trays
- Fibre storage basket for loop through applications (Hellapon Medium side hinged 3 tray version only)
- Maximum 24 splices per tray (double stacked)
- 3A and ANT splice options available
- Splitter accommodation
- Cablelok compatible for all port sizes
- Quick release cover
- Optional flash test valve and/or grounding feed-through

FRBU 9 Port Base Configuration

FRBU 11 Port Base Configuration

Technical Description

The FRBU B Length closure is supplied with a Polypropylene base. With base configurations of either 10 round and 1 oval port or 8 round and 1 oval port. The 9 Port FRBU accommodates a cable diameter of 1.7 - 20.0mm when using Cablelok mechanical seals and 6.0 - 24.0mm when using heatshrink. The 11 Port configuration accommodates a cable diameter of 1.7 - 16.5mm when using Cablelok mechanical seals and 6.0 - 22.0mm when using heatshrink.

The mounting system is manufactured from Grade 304 stainless steel and can accommodate a maximum of 6 Hellapon Medium stacked or side hinged trays or 3 Hellapon Medium side hinged trays and basket,

FRBU B-Length 11 Port Closure with 6 Medium Hellapon Trays.

FRBU B-Length 11 Port Closure with 3 Medium Hellapon Trays and Basket.

giving a maximum of 144 fibre splices based on 24 fibres per tray. The FRBU closure can be supplied with splice trays offering either 3A or ANT splice bridges. The fibre basket provides storage space for the storage of fibre loops within the closure.

The tubed closure and the position of the mounting system allows for ease of access and traceability of the fibre on to the trays.

The trays are white which makes it easy to see the colour of the fibre elements as they are routed through the fibre management system and on to the trays.

FST 4 and 13 Port Closures

A Length

The FST fibre splice closure distributes fibre directly to individual buildings or properties. The FST is HellermannTyton's smallest fibre closures that is often deployed in rural and less built up locations with fewer buildings to connect.

Features and benefits

- Maximum 36 fibre splice capacity
- 12 or 3 round ports and 1 oval port
- Accommodates Hellapon Small trays
- Fibre storage basket for loop through applications (Hellapon Small 1 tray version only)
- Maximum 12 splices per tray
- 3A and ANT splice options available
- Splitter accommodation
- Cablelok compatible for all port sizes
- Quick release cover

FST 4 Port Base Configuration

FST 13 Port Base Configuration

Technical Description

The FST closure is supplied with a Polypropylene base. With base configurations of either 12 or 3 round ports and 1 oval port, the FST accommodates a cable diameter range of 1.7 – 16.5mm when using Cablelok mechanical seals and 6.0 – 22.0mm when using heatshrink (4 port only).

The mounting system is manufactured from Grade 304 stainless steel and can accommodate a maximum of 3 Hellapon Small trays or 1 Hellapon Small tray and basket, giving a maximum of 36 fibre splices

FST 13 Port Closure with 1 Small Hellapon Tray and basket.

FST 4 Port Closure with 2 Small Hellapon Tray.

based on 12 splices per tray. The FST closure can be supplied with splice trays offering either 3A or ANT splice bridges. The fibre basket provides space for the storage of fibre loops within the closure.

The tubed closure and the position of the mounting system allows for ease of access and traceability of the fibre on to the trays.

The trays are white which makes it easy to see the colour of the fibre elements as they are routed through the fibre management system and on to the trays.

Connectorised Closures - Integrated Routing

FDN-IR Closure

The FDN IR connectorised closures are available configured with splice trays, a selection of fibre connector options and pre-connectorised splitters. This allows for the quick connection or disconnection of circuits using pre-configured fibre pigtails or field terminated connectors used in a SDU network.

Features and benefits

- 48 or 32 LC/APC Connections
- Supplied with bare end to LC/APC PLC splitters
- Maximum splice capacity 134 (double stacked)
- 58 round ports and 1 oval port
- Positive fibre management to ensure consistent 30mm bend radii throughout
- Fibre storage basket for loop through applications
- Bi-directional fibre routing
- Fitted with SE-IR trays (maximum 24 splices per tray)
- Cablelok compatible for all ports
- Quick release cover
- Optional flash test valve and/or grounding feed-through

FDN 59 Port Base Configuration

Technical Description

The FDN IR AB length connectorised closure is supplied with a loop storage basket and Polypropylene base. The base configuration is 58 round ports and 1 oval port for loop through applications with a cable range of 1.7mm to 29mm when using Cablelok mechanical seals or 6mm to 35mm when using heatshrink.

The mounting system is manufactured from powder coated Grade 304 stainless steel and can accommodate a maximum of 6 SE-IR trays.

FDN IR AB-Length Connectorised Closure.

SE-IR MKI Fibre Splice Trays with 2 x 3A Splice bridges (front view).

FDN IR AB-Length Connectorised Closure (side view).

Supplied with either 6 x 1:8 or 2 x 1:16 Bare End to LC/APC pre-connectorised PLC splitters and fitted with LC/APC adaptors mounted in the connector plate providing either 48 or 32 LC/APC drops.

The connectorised closure and the position of the mounting system allows for easy access for the routing of fibre on to the trays and the basket is positioned at the front of on the IR mounting system to provide storage for fibre loops.

Connectorised Closures - Tubed

FRBU 16 Port Closure

The FRBU is a smaller tubed connectorised closure, available configured with splice trays, a selection of fibre connector options and pre-connectorised splitters. This allows for the quick connection or disconnection of circuits using pre-configured fibre pigtails or field terminated connectors used in a SDU network.

Features and benefits

- 16 LC/APC Connections
- Supplied with bare end to LC/APC PLC splitters
- Maximum 24 splice capacity
- 16 round ports and 1 oval port
- Fibre storage basket for mid-span applications
- Fitted with 2 x Hellapon Small trays
- Positive fibre management to ensure consistent 30mm bend radius throughout
- Cablelok compatible for all port sizes
- Quick release cover
- Optional flash test and/or grounding feed-through

FRBU 16 Port Base Configuration

Technical Description

The FRBU 16 Port Connectorised closure is an IP68/IK09 sealed dome closure manufactured from UV stable polypropylene and meets the environmental and optical performance requirements of the European and International standards for sealed dome closures. The Cablelok base has 16 Cablelok R ports allowing for cables or ducts up to 9.5mm to be mechanically sealed to the base as well as an LM Cablelok oval port for mid-span cable deployments in both aerial and subterranean locations.

The mounting system is manufactured from Grade 304 stainless steel and is supplied with 2 Hellapon Small splice trays which house 2 x 1:8 bare end to LC/APC PLC splitters. An integral adaptor mounting plate

FRBU 16 Port M-Length Closure with 2 Hellapon Small Trays and Basket.

View of 4 x LC Quad Adaptors.

Rear view.

which manages 4 LC Quad Adaptors and a loop storage basket is fitted between the trays and the adaptor plate providing storage for excess fibre for mid-span applications. A removable connector shield is fitted to the back of the mounting support to provide additional protection to the connections once they have been installed. In-base features for closure mounting on poles, building facades or inside underground chambers enable the cover to be removed whilst the closure is still mounted allowing in-situ installation or maintenance.

Connectorised Closures - Tubed

FDN and FRBU Closures

A range of connectorised closures are available configured with splice trays, a selection of fibre connector options and pre-connectorised splitters. This allows for the quick connection or disconnection of circuits using pre-configured fibre pigtailed or field terminated connectors used in a FTTH network.

Features and benefits

- Maximum 180 fibre splice capacity
- FDN 59 Port - 58 round ports and 1 oval port
- FRBU 11 port - 10 round ports and 1 oval port
- Offers LC or SC connections
- Splitter accommodation
- Cablelok compatible for all port sizes
- Quick release cover
- Optional flash test valve and/or grounding feed-through

FDN 59 Port Base Configuration

FRBU 11 Port Base Configuration

FDN 59 Port Connectorised Closure.

FRBU 11 Port B-Length Connectorised Closure.

Technical Description

HellermannTyton offer a range of connectorised solutions in the FDN and FRBU fibre splice closures. The closures are supplied with a Polypropylene base and the mounting system is manufactured from Grade 304 stainless steel.

The connectorised closures and the position of the mounting systems allow for ease of access and traceability of the fibre on to the trays. The trays are white which makes it easy to see the colour of the fibre elements as they are routed through the fibre management system and in to the trays.

Integrated Routing Fibre Optic Splice Tray

IR Single Element SE MKI

Features and benefits

- Positive fibre management - minimum bend radius 30mm
- 2 fibre entry ports
- 2 mounting positions for splice inserts
- Option for optical splitter/3A or ANT splice bridge
- Optical splitter accommodation up to a maximum of 60 x 7 x 4mm
- Maximum splice capacity of 24 fibres (double stacked)
- Different splice bridge options allow for a splice type of up to 60mm

Single Element IR Coloured Splice Trays.

Technical Description

The Integrated Routing (IR) single element tray is manufactured from ABS and finished to a high specification to eliminate the risk of snagging or microbends. All retaining tabs on the tray have radius edges and rounded corners where fibre may pass. The overall dimensions of the tray are 148 x 125 x 7mm. The IR single element tray accepts a wide range of splice protector inserts and the maximum splice capacity of the tray is based on 24 double stacked heatshrink (3A) splice protectors up

to 60mm long.

The IR single element tray can accommodate 2 x 60 x 7 x 4mm optical splitters when using the optional splitter/3A or ANT splice bridge. The IR single element tray is suitable for use in the UFC-IR, FDN-IR or FML-IR closures.

Integrated Routing Fibre Optic Splice Tray

IR Single Element Splitter SE-B

Features and benefits

- Positive fibre management minimum bend radius 30mm
- 2 fibre entry ports
- Supplied with either heatshrink (3A) and splitter/3A bridge inserts or ANT and splitter/ANT bridge inserts
- Black tray colour provides high contrast to standard fibre management trays
- Maximum splice capacity of 14 fibres (heatshrink/3A)

IR SE-B Tray with Splitter and 3A splice holders.

Technical Description

The Integrated Routing (IR) single element splitter tray is manufactured from black ABS and finished to a high specification to eliminate the risk of snagging or microbends. All retaining tabs on the tray have radius edges and rounded corners where fibre may pass. The overall dimensions of the tray are 148 x 125 x 7mm. The IR single element splitter tray is supplied with an optical splitter/3A or ANT splice bridge at

the front, which will accommodate 2 x 60 x 7 x 4mm optical splitters, and a 3A heatshrink (3A) / ANT bridge at the rear. The maximum splice capacity of the tray is 14 fibres based on 14 double stacked heatshrink (3A) splice protectors up to 60mm long. The IR single element splitter trays is suitable for use in the UFC-IR, FDN-IR and FML-IR closures.

Integrated Routing Fibre Optic Splice Tray

IR Single Circuit SC-B MKI

Features and benefits

- Positive fibre management minimum bend radius 30mm
- 2 fibre entry ports
- Moulded splice holder fins for heatshrink (3A) or Crimp (ANT) splice protectors
- Maximum splice capacity of 12 fibres

Single Circuit IR 3A Coloured Splice Trays.

Technical Description

The Integrated Routing (IR) single circuit SC-B trays is manufactured from ABS and finished to a high specification to eliminate the risk of snagging or microbends. All retaining tabs on the tray have radius edges and rounded corners where fibre may pass. The overall dimensions of

the tray are 148 x 125 x 3.5mm. The tray is available in two styles which accept either 3A or ANT/Crimp splice protectors.

The IR single circuit SC-B tray is suitable for use in the UFC-IR, FDN-IR and FML-IR closures.

Integrated Routing Fibre Optic Splice Tray

IR Single Element SE MKII

Features and benefits

- Positive fibre management - minimum bend radius 30mm
- 2 fibre entry ports
- 2 mounting positions for splice inserts fitted with 3A splice holders
- Maximum splice capacity of 24 fibres (double stacked)
- Optical splitter accommodation up to 60 x 7 x 4mm

Single Element IR SE-IR MKII Coloured Splice Trays.

Technical Description

The Integrated Routing (IR) single element tray is manufactured from ABS and finished to a high specification to eliminate the risk of snagging or microbends. All retaining tabs on the tray have radius edges and rounded corners where fibre may pass. The overall dimensions of the tray are 150 x 124 x 7mm. The IR single element tray accepts a wide

range of splice protector holders at the front of the tray for ease of fibre measurement and installation. The maximum splice capacity of the tray is based on 24 double stacked heatshrink (3A) splice protectors up to 60mm long. The IR single element tray is suitable for use in the UFC-IR, FDN-IR or FML-IR closures.

Splice Protector Holders

Fibre Splice Tray Accessories

Features and benefits

- Used to secure different types of splice protector within the splice tray
- 8 options available for the most common applications
- Optical splitter/3A or ANT option

Technical Description

A range of Splice Protector Holders (Splice Bridges) to allow for different types of splice protectors in the tray. Inserts are suitable for use with HellermannTyton Hellipse NZDF-SE-A/SE-B, IR-SE and Hellapon Medium

(Style C)/Small and Hellamass Large trays. All trays accept 2 splice protector holders excluding the Hellamass Large which accepts 12 inserts.

Splice Protectors

Fibre Splice Tray Accessories

Features and benefits

- Clear sleeve allows visual location of splice
- Stainless steel rod or ceramic member to provide additional support to the joint
- 3A/6A versions available
- Suitable for fibre sizes 250/900µm
- Low shrink temperature
- Coloured anti-vibration band available

Fibre Splice Protectors (assortment shown).

Technical Description

HellermannTyton's range of fibre splice protectors are specifically designed for the mechanical and environmental protection of fused fibre splices. The splice protectors consist of clear heat shrinkable tubing to allow for visual location of the splice

prior to heat shrinking with a pre-installed stainless steel (3A/6A) reinforcing rod. The tubing has a wide operating range -45°C to +100°C and a full recovery temperature of 120°C.

Cable Glands

Fibre Optic Enclosure Accessories

Features and benefits

- Cable range coverage from 5mm to 18mm
- Supplied in multiples of 5
- M25 Gland suitable for use with MDU S4 or MDU S5
- M20 Gland suitable for use with MDU S3, MDU S4 or MDU S5

Technical Description

A range of M20 and M25 cable gland kits each of which contain 5 x cable glands. The cable gland is fitted in to the cable entry

port which is secured to the enclosure to provide additional fibre management and support.

Selection of M25 Cable Glands.

MDU Locks

Fibre Optic Enclosure Accessories

Features and benefits

- Polished chrome finish
- Supplied with 2 keys for MDU S3 or MDU S5
- Triangular Key option for MDU S5 only

Technical Description

A 10.5mm 4 pin radial pin tumbler lock suitable for use with the MDU S3 wall box. The lock has a polished chrome finish and is supplied with a 13mm flat cam, two keys and all fixings.

An 8mm industry standard Triangular drive (tri-drive) cam lock which is suitable for use with the MDU S5 wall box. The lock has

a chrome plated finish and is supplied with 30mm flat cam and all fixings. Key supplied separately

A 20.5mm quarter turn cam lock suitable for use with the MDU S5 wall box. The lock has a chrome plated finish and is supplied with a 30mm flat cam, two keys and all fixings.

MDU Anchor Kits

Fibre Optic Enclosure Accessories

Features and benefits

- Provides strain relief to fibre optic cables maximum diameter 13mm or fibre optic cables with solid strength members
- Simple installation
- Suitable for use with MDU S3, MDU S4 or MDU S5

Technical Description

Two anchor kits for use within the MDU S3, MDU S4 and MDU S5. Both kits are used to secure the cable and strength member inside the enclosure. Designed to

ensure that no undue stress is put upon the fibre cables which may affect the optical performance.

MDU Seals

Fibre Optic Enclosure Accessories

Features and benefits

- Single seal to manage 24 x 7mm drops for MDU S4 or MDU S5
- Single seal to manage 24 x 5mm drops for MDU S3
- Loop through seal for cable diameter 3.0mm to 14.0mm
- Quick and simple to install

Technical Description

There are two different seals available for the MDU S3, MDU S4 and MDU S5. Both provide excellent cable and tube management for incoming and outgoing cables to the enclosures.

The S4 and S5 drop seal can accommodate up to 24 x 7mm drop cables/tubes, whereas the S3 drop seal

can hold up to 24 x 5mm drops.

The loop through seals for both the S4/S5 and S3 can accept a cable diameter of 3.0mm through to 14.0mm, again providing an excellent seal into the enclosure while making the cable more secure.

MDU S4/S5 24x7mm and MDU S3 24x5mm Multi Drop Seals.

MDU S4/S5 3-14mm Loop Through Seal.

MDU S3 3-14mm Loop Through Seal.

Fibre Adaptors

SC Adaptors

Features and benefits

- A range of high performance Single Mode SC Adaptors
- SC SX or SC DX versions
- APC + UPC

Technical Description

The fibre adaptor is used to mate two connectors together aligning the ferrule of the connectors keeping the fibres in perfect alignment and minimising losses. The fibre adaptors fool proof design and audible click mechanism provide a secure inter-connect.

The adaptor is supplied with secure fit dust caps which have a high mechanical

retention ensuring they remain in place if they are accidentally knocked or encounter excessive vibration.

All fibre adaptors and connectors comply with the IEC874-14 standard ensuring interoperability.

Fibre Adaptors

LC Adaptors

Features and benefits

- A range of high performance Single Mode LC Adaptors
- APC + UPC
- LC SX, DX + Quad versions

Technical Description

The fibre adaptor is used to mate two connectors together aligning the ferrule of the connectors keeping the fibres in perfect alignment and minimising losses. The adaptor has a simple to use latched

lever mechanism which prevents accidental disconnection and precision housing for optimum performance. All fibre adaptors and connectors comply with the IEC874-14 standard ensuring inter-operability.

Fibre Pigtails

LC and SC Pigtails

Features and benefits

- A range of single mode pigtails
- LC and SC Connectors
- Manufactured to ISO standards
- Pre-terminated connector saves installation time on site
- 1m or 1.5m lengths
- 600µm and 900µm tight buffered fibre optic cable
- Pre-tested with test results supplied

Technical Description

The LC Pigtails are manufactured using 600µm or 900µm tight buffered cable in OS2 as standard.

All LC Pigtails are tested prior to despatch and individually bagged with individual test certificates.

Rear Mounting Storage Bracket

Fibre Optic Enclosure Accessories

Features and benefits

- Dual use; MDU mounting and drop cable storage
- Stores up to 4m of drop cable
- Allows easy removal of MDU to working level
- Integrated hook to hang the MDU from
- Multiple anchor points
- Grey Powder coated stainless steel

Technical Description

The Rear mounting storage brackets have been designed to allow for effective MDU wall mounting at both low and high levels.

The MDU is fitted to a back plate which then secures to the wall mounted storage bracket.

It allows engineers to safely remove the MDU and bring it down to working level. The back plate also features a hook system

that allows engineers to hang the MDU off the storage bracket and offers flexibility in working methods and environments.

The storage bracket has been designed to hold and store up to 4 metres of drop cable. A number of anchor points are located around the bracket to allow for multiple cable tie points, ensuring stability and security for the stored drop cable.

Mounting Brackets

V Shaped Mounting Bracket

Features and benefits

- Suitable for use with the AFN and FFE enclosures
- Offers management for a maximum of 2 enclosures
- Powder coated stainless steel

Technical Description

A V shaped pole mounting bracket designed to provide mounting positions for 2 enclosures and which is suitable for use with the AFN and the FFE.

Anchoring is provided at the base of the bracket for incoming cables. The bracket is

manufactured from powder coated stainless steel and designed not to exceed the width of the pole top. The bracket can pre-loaded with the enclosures and then secured to the pole.

V Bracket for the AFN and FFE.

TYPE	Height (H)	Width (W)	Depth (D)	Description	Article-No.
MB-AFN/FFE-V-BRKT	384	179	201	V Shaped Mounting Bracket for AFN and FFE.	857-40577

All dimensions in mm. Subject to technical changes.

Mounting Brackets

Universal Mounting Bracket

Features and benefits

- Suitable for use with the AFN and FFE enclosures
- Angled or flat mounting on to pole
- Cable management for a maximum of 24 x 6mm duct/drop cables
- Cable retention hooks and loop storage for incoming cables
- Multiple mounting positions for each enclosure type:
 - AFN - 4 positions
 - FFE - 3 positions
- Offset fixing points for ease of installation

Technical Description

A pole mounting bracket designed for use in aerial applications for the HellermannTyton Aerial Fibre Node (AFN) and Fibre Facade (FFE) enclosures.

The MB-AFN/FFE-AF-PB-002 mounting bracket is manufactured from powder coated stainless steel and has been designed to offer the option of being mounted at an angle or flat on to the pole. Separate offset screw fixing or strap mounting points for angled and flat orientation allow for a quick and easy fix to the pole.

Multiple mounting positions have been designed in to the bracket for the enclosure, 4 for the AFN and 3 for the FFE, to allow for accurate positioning and cable management.

The bracket can also be mounted upside down. This allows two brackets to be fitted side by side whilst maintaining all of the fibre management features. Retaining hooks and cable anchor points are provided to manage the incoming duct/cables as they transition from the loop storage area in to the AFN/FFE.

The loop storage area will manage up to 30m of 6mm duct or cable and two drop cable hooks and velcro cable tie fixing points offer duct/ cable management and support for a maximum of 24 x 6mm duct/drop cable.

Universal Mounting Bracket for the AFN and FFE.

Mounting Brackets

AFN Mounting Bracket - 400mm

Features and benefits

- Designed to be used with the AFN Enclosure
- Anchoring and cable management for up to 24 customer drops
- Manufactured from powder coated stainless steel

Technical Description

The universal pole mounting bracket, suitable for use with the Aerial Fibre Node, provides secure anchoring for up to ten metres of ultra lightweight cable and 24 distribution drop fibres.

Constructed from powder coated stainless steel and designed not to exceed the

width of the pole-top the bracket can be preloaded with the enclosure and then secured to the pole.

The bracket has been designed with a front loading storage basket to allow for secure storage of excess cables.

Cablelok

R, B, S, T, LM and L Port Cablelok

Features and benefits

- Cable range coverage from 1.7mm – 29.0mm
- Port closure plug available
- Supplied in multiples of 1 and 10
- Supplied with installation lubricant sachets

Technical Description

Cablelok is a mechanical seal manufactured from external grade flexible polychloroprene. There are 6 Cablelok port sizes which cover a cable range of 1.7mm – 29.0mm including a port plug for blocking unused drop ports.
