Price Increase Announcement – Distributed Power Quality

Dear valued customer,

Distributed Power Quality (DPQ) will have a list price increase of roughly three to eleven percent, effective **October 1st, 2018**. Actual increases will vary by product type, and a select few products will see a higher increase to compete with current market prices.

As a manufacturer of power infrastructure products, we experience a multitude of changes that can affect our pricing models. While maintaining full integrity, meeting stringent quality standards, and protecting the interests of our shareholders, we continually strive to offer products at the best possible market prices in order to meet customer expectations. Any of the following sample factors can contribute to our pricing changes:

- Competitor price behavior
- Product feature enhancements
- Product elasticity
- Materials cost/availability (e.g. lead for batteries)
- Global economic conditions
- Local/state/federal laws & policies
- Quality and recertification
- Supply chain changes

We appreciate your support and continued efforts to promote and sell Eaton products and services. If you have questions concerning the price increase, please contact your local sales engineer.

New price files can be requested through PriceFileRequestPQ@Eaton.com.

Sincerely,
Eaton Power Quality Operations
DPQ Product Management Team

Eaton Power Quality - Price Change Notification
Effective Q4: October 1, 2018
