*As used for storage capacity, one gigabyte (GB) = one billion bytes and one terabyte (TB) = one trillion bytes. **Real world capacity varies depending on operating environment. ***Based on read speed and internal coating. As used for transfer rate, megabyte per second (MB/s) = one million bytes per second. Performance will vary depending on your hardware and software components and configurations. ****Number of games based on a 20GB average per game. The number of games will vary based on file size, capacity, formatting, other programs, and factors.
