FEATURE

The snake cable is an extremely flexible and rugged type of cable, suitable for indoor and outdoor applications. Each audio pair consists of two insulated and twisted conductors of 0.14mm^2 with a high density shielding to prevent any influence of hum, noise or electromagnetic fields from external equipment. Each balanced audio pair has an outer PVC jacket. Then all audio pairs are also covered with a PVC jacket of fireproofing and waterproofing. The snake cable is suited for all kinds applications for stage audio connections of live shows, disco, concerts, pubs, saloons...

FEATURE

This is high quality balance microphone cable. It is a very compact cable for indoor and outdoor applications. The cable consists of a flexible PVC jacket and OFC copper. It has different diameters. The durable shielding with spiral style or textile style gives an excellent protection against interference of all kinds of electromagnetic fields such as dimmers, motors or power cables. All the material follows ROHS requirement. The seres can be used in fixed installations or for internal wiring of audiorack systems where compact cabling is needed.

FEATURE

The instrument cable is a high performance cable with NON-noise. long unbalanced leads for equipment. All the cord has double protector PVC jacket. The two ways shielding textile style and spiral style can be chosen. The cable consists of a flexible PVC jacket and Polypropylene silk Jacket which are all following ROHS requirement, OFC copper and is easy to handle. The diameter of this cable is O.D.6.5mm. Of course, there are some different colors you can select.

The series cable can be used for all the audio equipment working and connecting.

FEATURE

These cables are high quality and flexible double isolated loudspeaker cables. They are suitable for using in indoor as well as outdoor applications.
Each conductors is fitted with a hight flexible jacket made of PVC which is following the ROHS requirement. These conductors are twisted.
There are 2 cords to 8 cords, and the diameter is from O.D.5.5mm to O.D.14.0mm for you to choose.
These cables have been designed for connection of loudspeakers in fixed or mobile sound systems.

FEATURE

The audio cable is parallel designed, high quality balanced & unbalanced signal cable for indoor fixed or mobile applications. There are Flexible PVC jacket, transparent jacket or Polypropylene silk Jacket that can be chosen to use. The inner conductors is fitted by a durable shielding with spiral style. This gives an excellent protection against interference of all kinds of electromagnetic fields such as dimmers, motors or power cables.

This cable uses flexible PVC jacket or transparent jacket. All the material use the environmental protections'one, which is following the ROHS requirement

This series cable is"all-round" signal cables which are suited for all kinds of applications where reliable signal transmission is needed.

AC005

The series is a Elementary mono microphone cable for indoor and outdoor and can be used for mobile and fixed applicants, The cable has high quality flexible Jacket made of Environmental protection's flexible PVC, which follows ROHS requirement, and OFC copper and is easy to handle, One insulated conductors of 0.23mm² is provided inside the cable. It is an "all-round" microphone cable and is suited for all kinds of applications where reliable signal transmission is needed.

AC006

The DMX series cables are high quality and professional signal cable with flexible, antiabrasive and low corrosive gas emission PVC/NBR overall jacket. All the shield including the braided and twisted are tinned copper. And the conductors are twisted with the aluminum foil. which ensures the great strength, 100% shield and flexibility of the cable. It is suitable for all the applications indoor or outside.
