Feature Products for 2009

To comply with the global trend of energy saving, MEAN WELL invests resources to develop new generation of switching power supplies imbued with green concept. From LED power supply, green adaptor, solar inverter, to high efficiency AC/DC power supplies, we are looking for higher in efficiency, lower in no load power consumption, smaller in size, and in compliance with the latest regulations all over the world.

► LED Power Supply

H LG, CLG, PLN, PLC, CEN, ELN, LP, ULP and PLP families form a complete group of LED / outdoor power solution. Ranging from 18W to 240W, with or without PFC, and comply with specific norms (UL1310, EN61347) for LED related applications.

► Slim DIN Rail Power

The new slim SDR series significantly reduce the size by 40%+ and possess up to 94% of extreme high efficiency. Relay contact style alarm signal, GL and SEMI F47 compliance are the specialties

► Green Adaptor

Ranging from 12~220W and with low no load power consumption, the green adaptor series comply with EISA 2007, EuP and Energy Star level IV or V.

► Solar Inverter

Consolidating with solar panels, TN series can construct an independent solar power system to save the precious energy.

► High Wattage Power Supply

High power has been asked frequently for moving sign, communication, and heavy machinery applications. MEAN WELL can offer 3KW single unit and up to 9KW by parallel connection.

MEAN WELL offers you an opportunity to get the free custom-standard design. Among our under development products, you are welcome to join the design procedure and let the new product fulfill your special requirement. No NRE charge, no safety costs, just contact us in time!!

► Feature Description

SDR family is our new slim DIN rail product series targeting at the growing demand of high performance DIN rail power supply in the market. Featuring up to 94% of extreme high efficiency, they can provide 120W, 240W, or 480W continuously and 150% peak power for 3 seconds up to 60°C by only free air convection. The slim design of 40mm(SDR-120) / 63mm(SDR-240) / 85.5mm(SDR-480) in width helps save the precious space on the rail and also makes it 30.7%, 43% and 51.6% smaller in size compare to its predecessor model. To fulfill the requirements of marine and semi-conductor related usage, the SDR family complies with GL and SEMI F47 norms in addition to UL, CUL, TUV, and CE certificates.

► Feature Description

DR-RDN-20 is a 20A redundancy (decoupling) module for the 24Vdc power system. Containing 2 sets of 20A Or-ing diodes with wonderful heat dissipation deployment, DR-RDN20 offers a safe option of 1+1 redundant set-up. Not only perfectly decouple power sources from each other as well as from the load, DR-RDN-20 also provides users monitoring signals for both input channels through the built-in relays.

DR-UPS40 is a 40A max. DC UPS (battery control) module for the 24Vdc power system. Accompany with external batteries, it can back-up up to 40A of current to critical loads for certain period of time depending on the capacity of batteries. With complete monitoring signals / LED indicators for DC BUS OK, Battery Fail, Battery Discharge, and the repeated Battery Test function to check the situation of external batteries, users can customize their own DC UPS system to back up critical loads and capture the status of the whole system easily.

Description

Modular series are switching power supplies with modular design that consist of two stages: front-end PFC and output modules. Using ZVS (Zero Voltage Switching) technology to realize the power factor correction, the line input is rectified into high DC voltage (around 390Vdc) by the front-end PFC stage, and then the DC output modules will transfer the operating voltage into all kinds of DC output voltages from 1.6V~53V. Right now we offer 75W, 150W, 300W single output modules and 100W dual output modules to fulfill all kinds of applications up to 14 isolated outputs. There are millions of combinations available for the Modular series. Users can configure the DC outputs they need and get the fastest solution for their own power requirement with safety and EMC certificates. No more NRE / safety application charges and long period of waiting for certificates! Providing standard products as usual, MEAN WELL offer you a revolutionary standard power solution that fulfills your custom-made request!

► Feature Description

PID-250 series is suitable for motor-based equipment with logic control circuit. CH1 with high peak power capability can provide the required surge loading while starting up the motor. The isolated 5V/5A CH2 is good for logic control usage and can still work properly even CH1 is malfunction or at any protection modes. The isolated design between CH1 and CH2 can significantly prevent noise of the motor action from entering control circuits and hence secure the accurate operation of the end equipment.

► Special Models Suitable for High Surge Current

GS06 and GS15 also have models with "constant current limiting" instead of "hiccup type" as the overload protection which are suitable for peak load usage. Please refer to the overload curves that specify the output voltage / output current characteristics of these two overload protection types. If you are interested in the models with "constant current limiting" function, please contact with your sales representative for details!

Want to get a free design?

If you can't find a suitable product from MEAN WELL's product line and your SPEC also can't be modified from any of our standard product, MEAN WELL offers you an opportunity to get the free custom-made design which is called CDM (Cooperate Design Manufacturer). Unlike ODM which can only fulfill the needs of one customer, our CDM products tend to cover the requirements of more customers and hence can boost the production volume and drag down the costs for all the customers.

Following is the list of our under development CDM products, you are welcome to join the design procedure and let the new product fulfill your special requirement. No NRE charge, no safety costs, just contact us in time!!

General Information

Quotation

- Most of our standard products are available and in stock through our global authorized distributors. Please contact your local distributor for prompt service. Please let us know if you are unable to find Mean Well's distributor information in your local area.
- Written quotations are valid for 60 days from the date quoted unless otherwise specified. Customers are responsible for all banking related charges outside of Taiwan.

Order

- Orders must be placed to Mean Well by mail, e-mail, or fax. Please do not place your order by phone. For international business, Mean Well will provide order confirmations with scheduled delivery dates. If you fail to receive an order confirmation within 2 working days, please reconfirm your order.
- Minimum order amounts per shipment are determined by our local distributor's stock capability. Please contact our sales representative for details.
- We encourage customers to place long-term orders. However, order cancellations or reschedules must be made 45 days prior to the scheduled shipping date.

Delivery

- For our standard products, Mean Well usually keeps around 2-8 weeks safety stock (based on the past 3 months sales record) for prompt delivery of small / medium quantity orders. For large quantity or new product orders, 3-5 weeks lead-time is needed.

Return

- All returned goods must have a RMA (return material authorization) number marked on each carton. Contact Mean Well for a RMA number. All goods must be shipped as "freight prepaid" unless confirmed by our sales representatives.

Warranty

- Products found to be defective within 30 days from the date of receipt can be returned for credit or exchange. After the initial 30 days, Mean Well will repair the goods according to our warranty period. Contact Mean Well for further information on credit or a RMA number. Goods should be shipped as "freight prepaid" to Mean Well and Mean Well will repair and return the defective units (freight prepaid) within 7 working days. If the warranty period has expired, a repair charge (20% of original purchase price or min. USD 5.00/pc) will be charged.
- If customers do the repair by themselves, Mean Well can provide reasonable quantity of free components for repair purpose.

Attention

- We make every effort to ensure the accuracy of information in the catalog. If there is any discrepancy between the data presented in our catalog and the SPEC, the SPEC sheets should take precedence (please refer to www.meanwell.com for the latest SPEC information). We cannot take any responsibility of any consequence arising due to error or change in specification. We suggest customers conduct a sample test for evaluation and approval before placing a formal order.
- For continuing product improvement, Mean Well reserves the right to revise any information in this catalog without further notification.

The EMC directive applies to component power supplies

- Mean Well ensures that all of the power supplies with CE declaration are designed to meet EMC directives and are verified by an independent certified lab agent with a test report prepared. However, there are 2 categories for power supplies: One is a stand-alone power supply, such as laboratory power supplies which can be tested under EMC individually. The other category is a component power supply such as an enclosed power supply and open PCB power supply. These power supplies are considered a component which will be installed into a final equipment. Since EMC performance is affected by the final installation of a product, Mean Well cannot guarantee that the final equipment will meet EMC directives. Final product manufacturers must re-confirm that their product meets EMC directives.

RoHS Announcement

- To minimize the environmental impact and take more responsibility to the earth we live, MEAN WELL applies manufacturing that complies with Directive 2002/95/EC of the European Parliament - RoHS (Restriction of Hazardous Substances) since Sep. 2005. Please refer to the declaration on our web site for more detail information.
