

# XDPL8221 50W Reference Board Engineering Report

## XDP™ Digital Power

### About this document

#### Scope and purpose

This document contains the specification, schematic, bill of materials and measurement results of the 50 W form factor board as LED driver which using the Infineon XDPL8221 dual-stage multi-mode flyback + PFC combo controller.

#### Intended audience

This document is intended for anyone wishing to design high-performance dual-stage digital flyback AC-DC converters for LED lighting based on the PFC+Flyback combo controller XDPL8221.

## Introduction

## 1 Introduction

XDPL8221 50 W reference design is a digitally configurable LED driver which has an universal input of 90 to 305 V<sub>AC</sub> or 90 to 430 V<sub>DC</sub>, and wide output load range of 16 to 48 V<sub>DC</sub> with isolated dimming interface (with CDM10VD). Please refer next page for the main design features of this board based on XDPL8221 and CDM10VD.

**Note:** *The 50 W reference design is ready for evaluation without the need of any pre-programming by the user as the XDPL8221 chip on PCB has already been burned with the default full set of working parameters configuration. Please connect the AC Input, LED output and dimming input as shown in [Figure 1](#), for the test setup.*

Figure 1 XDPL8221 50 W reference board

## 2 Design features

XDPL8221 50 W reference board as LED driver has following design features:

- Dual-stage flyback and separated power factor correction (PFC) with high-precision primary side-controlled constant voltage (CV), constant current (CC) and limited power (LP) output.
- Excellent current accuracy of typical +/-2% across universal input voltage range (90 to 305 V<sub>AC</sub> or 90 to 430 V<sub>DC</sub>) and wide output voltage range (from 16 V<sub>DC</sub> to 48 V<sub>DC</sub>)
- Integrated 600 V HV cell and PFC aux winding charge pump power supply for fast startup start time under 250 ms
- Flyback stage with multi-mode control (QR1 + DCM + ABM) enables high efficiency and low dimming output
- High power factor ( PF>0.9 ) and low input current total harmonic distortion ( iTHD < 15% ) across universal input voltage range (90 to 305 V<sub>ac</sub>) and down to 30% load
- Low Bill Of Materials (BOM)
- Configurable dimming curve to either linear or quadratic (eye-adaptive).
- Configurable minimum dimming current down to 1%
- Intelligent thermal management with adaptive temperature protection
- Active bleeder for dim-to-off function
- UART command interface to control the operation of the LED driver as well as to read out the operating status information from the digital controller XDPL8221
- Output independent forward mode auxiliary power supply for an accurate primary side regulation
- Isolated 0 – 10 V dimming interface with CDM10VD

Note: *CDM10VD is a fully integrated 0-10 V dimming interface IC from Infineon which transmits secondary auxiliary side analog voltage based signals from 0-10 V dimmer to primary side, by driving an external opto-coupler with a 5 mA current based PWM signal. For more details about CDM10VD, please visit Infineon website: <http://www.infineon.com/CDM10VD>.*

### 3 Design specification

**Table 1** and **Table 2** list the electrical specification and system protection of this reference design.

**Table 1 Electrical specification**

Specification	Symbol	Value	Unit
AC Input voltage range	$V_{IN\_AC}$	90 to 305	$V_{AC}$
DC Input voltage range	$V_{IN\_DC}$	90 to 430	$V_{DC}$
Output LED load range (includes dimming) <sup>1</sup>	$V_{LED}$	16 to 48	$V_{DC}$
Non-dimmed full output current setting <sup>2</sup>	$I_{out\_set}$	1500	mA
Total line and load regulation tolerance	-	$\pm 2$	%
Dimming input voltage range	$V_{DIM}$	0 to 10	V
Limited Maximum Power	$P_{lim}$	50	W
PWM Dimming frequency	$f_{dim}$	500 to 1500	Hz
Minimum output current setting <sup>2</sup>	$I_{out\_dim\_min}$	15	mA
Output current dimming curve <sup>2</sup>	$C_{dim}$	Linear or quadratic	-
Efficiency ( $V_{out}$ : 48 $V_{DC}$ , $I_{out}$ : 2.08A, non-dimming)	$\eta$	< 89	%
Power factor ( $V_{in}$ : 120 to 277 $V_{AC}$ +/-10%, $V_{out}$ : 29 to 48 $V_{DC}$ , >30% load)	PF	> 0.9	-
Input current total harmonic distortion ( $V_{in}$ : 120 to 277 $V_{AC}$ +/-10%, $V_{out}$ : 29 to 48 $V_{DC}$ , >30% load)	iTHD	< 15	%

<sup>1</sup> Configurable in XPDL8221

<sup>2</sup> Configurable in XPDL8221

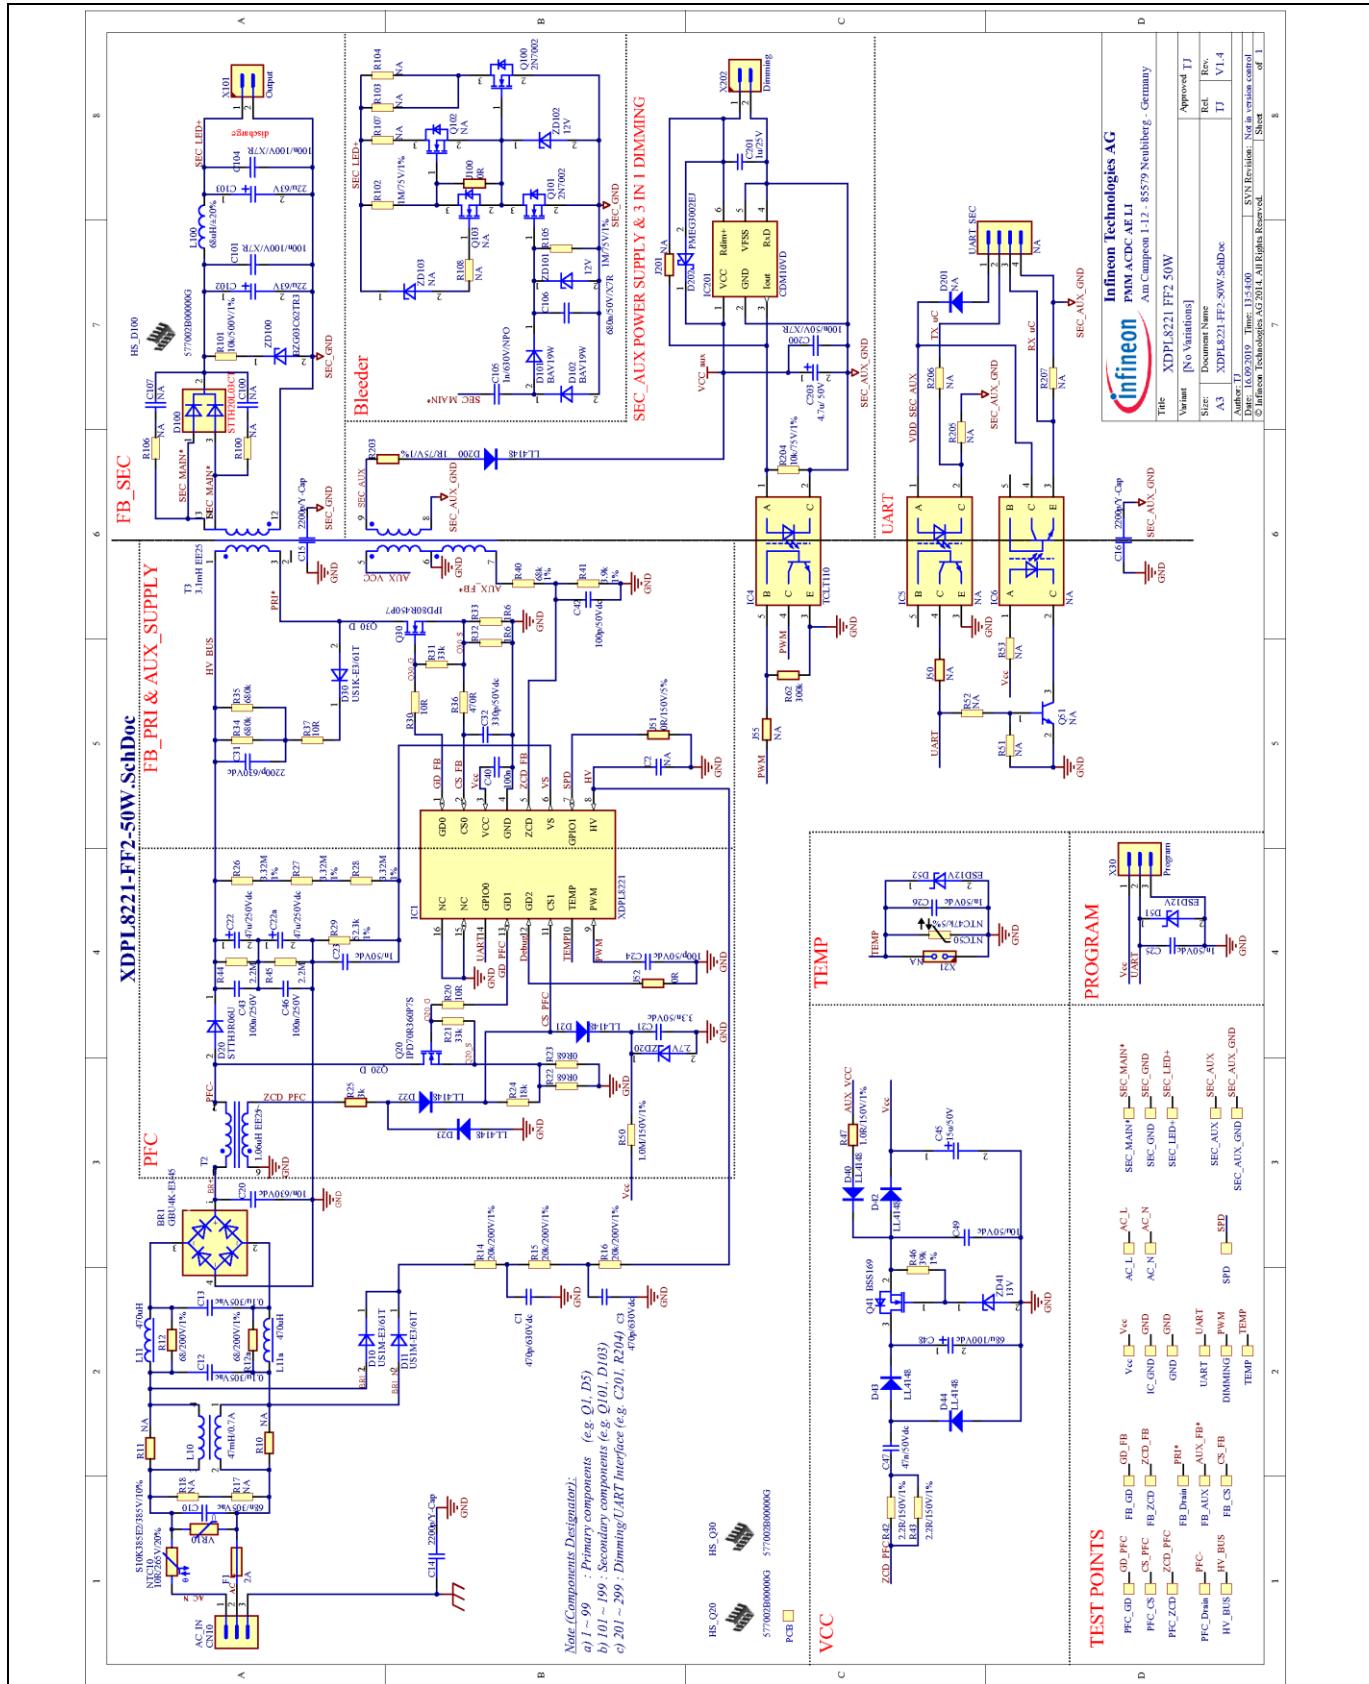

**Table 2 System protections**

<b>Protection</b>	<b>Symbol</b>	<b>Value</b>	<b>Unit</b>
Nominal Input over-voltage protection level <sup>1</sup>	V <sub>in_OV</sub>	320	V <sub>AC</sub>
Nominal Input under-voltage protection level <sup>1</sup>	V <sub>in_UV</sub>	76	V <sub>AC</sub>
Nominal output over-voltage protection level <sup>2</sup>	V <sub>out_OV</sub>	53	V <sub>DC</sub>
Nominal output over-current (average) protection level <sup>2</sup>	I <sub>out_max_avg</sub>	1500	mA
IC internal over-temperature detection threshold <sup>1</sup>	T <sub>critical</sub>	119	°C
Input over-voltage protection reaction <sup>3</sup>	Reaction_OVP_Vin	Auto-restart	-
Input under-voltage protection reaction <sup>3</sup>	Reaction_UVP_Vin	Auto-restart	-
Bus over-voltage protection level 2	Reaction_OVP2_Vbus	Auto-restart	-
Primary over-current protection level 2	Reaction_OCP2	Auto-restart	-
Output over-voltage (output open) protection reaction <sup>3</sup>	Reaction_OVP_Vout	Auto-restart	-
Output under-voltage (output short) protection reaction <sup>3</sup>	Reaction_UVP_Vout	Auto-restart	-
Output over-current (average) protection reaction <sup>3</sup>	Reaction_Iout_max_avg	Auto-restart	-
IC over-temperature protection reaction <sup>3</sup>	Reaction_TP	Auto-restart	-
Auto-restart idle time <sup>4</sup>	t <sub>auto_restart</sub>	1	s
Fast auto-restart idle time <sup>5</sup>	t <sub>fast_auto_restart</sub>	400	ms

<sup>1</sup> Protection can be disabled and its level can be configured.<sup>2</sup> Protection cannot be disabled and its level can be configured.<sup>3</sup> Protection reaction can be configured as either auto-restart or latched mode<sup>4</sup> Auto-restart time can be configured.<sup>5</sup> Fast auto-restart time can be configured.

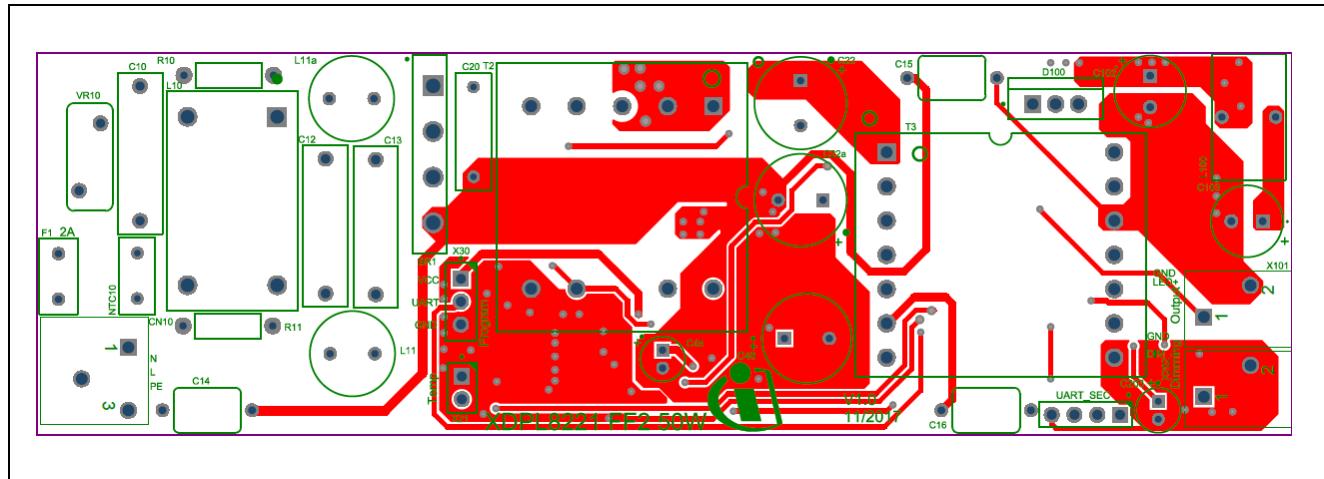

## 4 Schematic and description

**Figure 2** shows the complete schematic of the 50 W reference design:

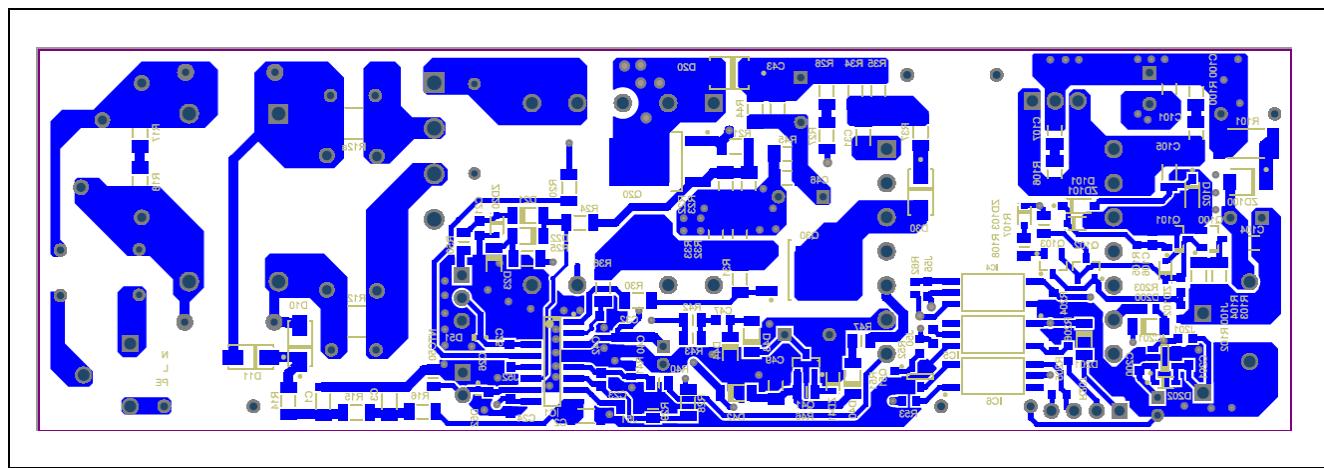

**Figure 2 Schematic of the 50 W reference design**

## 5 PCB Layout

**Figure 3 PCB Top side**

**Figure 4 PCB Bottom side**

## 6 XDPL8221 50 W Reference board measurement results

### 6.1 Operating window

The operating window of the XDPL8221 50 W reference board is measured with an electronic load, Vac = 230 V / 50 Hz at room temperature.

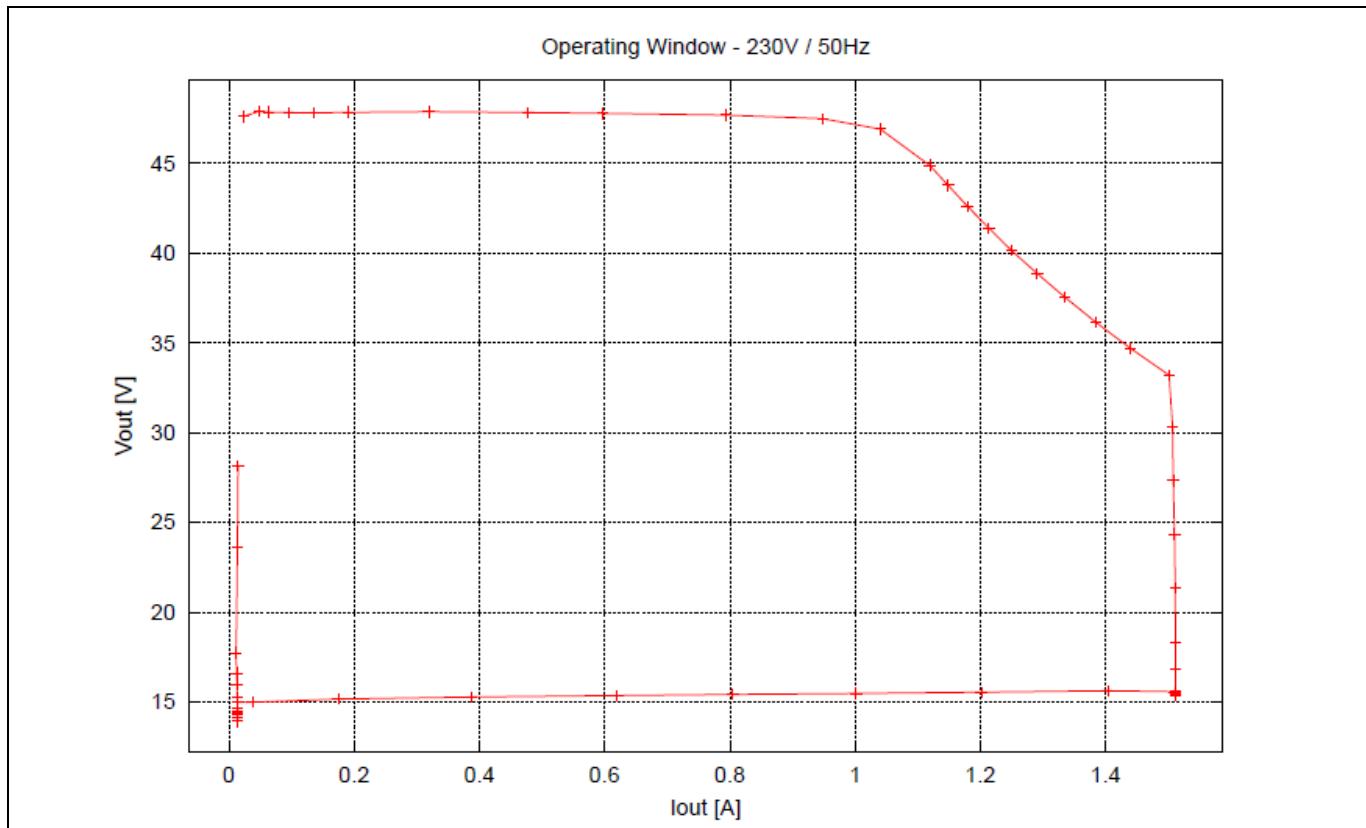

Figure 5 XDPL8221 50 W Reference board operating window

## XDPL8221 50 W Reference board measurement results

## 6.2 Performance

**Table 3 Measurement result with 6 LEDs**

## XDPL8221 50 W Reference board measurement results

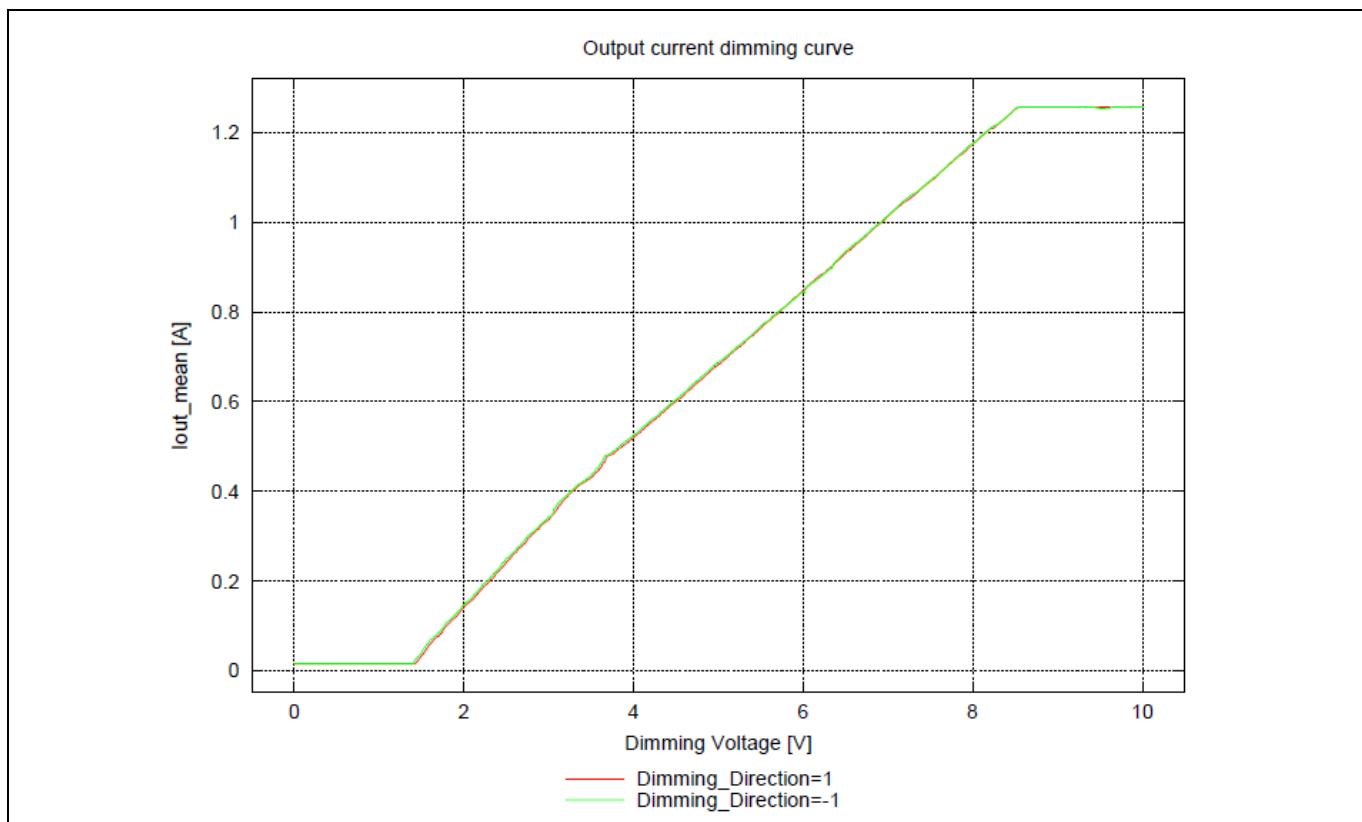

**6.3 0 to 10 V Linear dimming**

This section provides measurement results for the 0 to 10 V dimming feature. A linear curve was configured for this measurement using the .dpVision GUI. The measurement was done for an input voltage of 230 VAC, 50 Hz and an output load of 13 LEDs.

**Table 6 Output current at different dimming voltages with 13 LEDs**

Vdim (V)	0.50	1.00	1.50	2.00	2.50	3.00	3.50	4.00	4.50	5.00

## 7.1 Transformer specification

### ELECTRICAL SPECIFICATIONS @ 25° C unless otherwise noted:

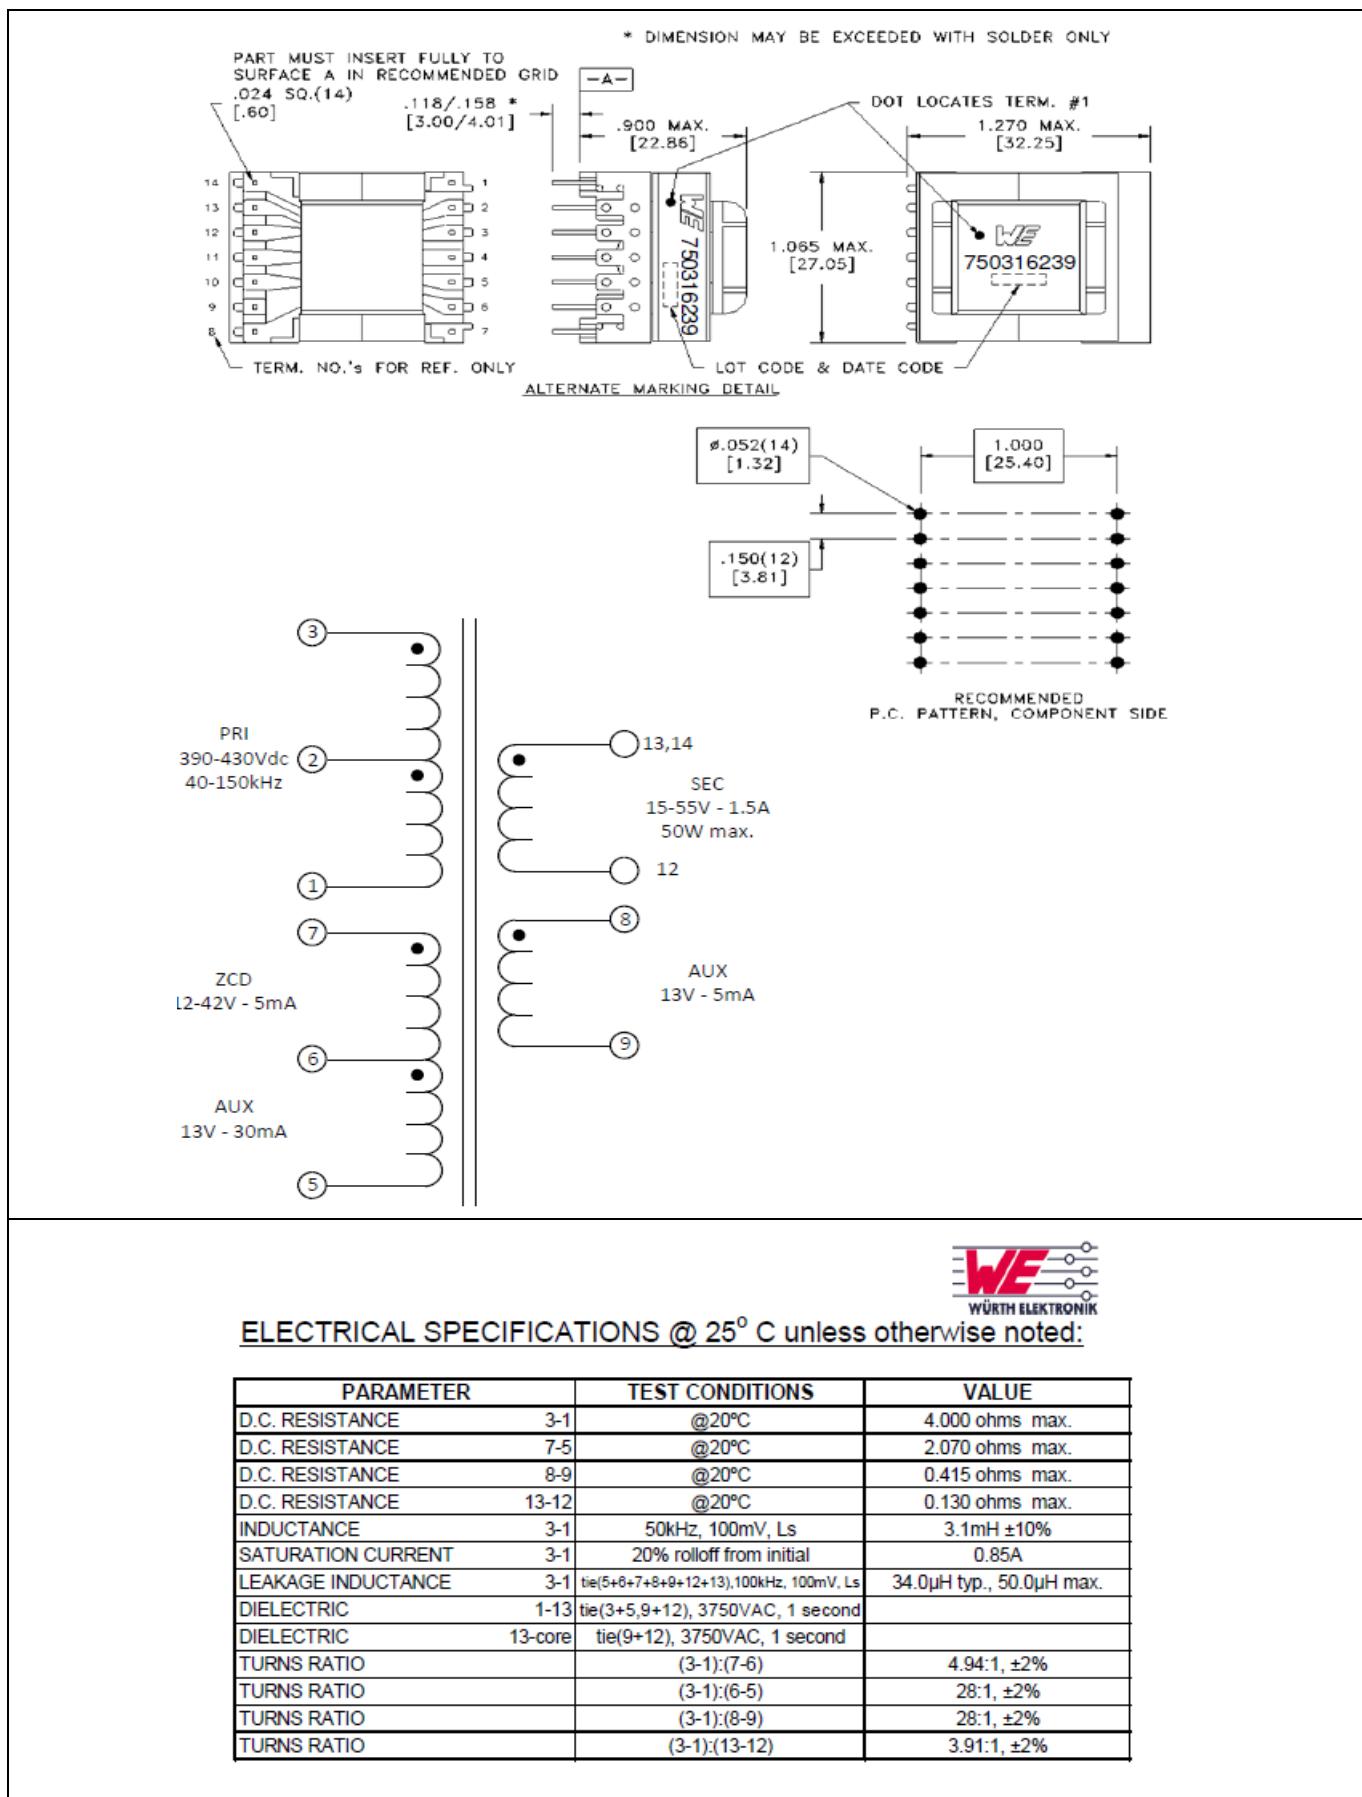

PARAMETER	TEST CONDITIONS	VALUE
D.C. RESISTANCE	2-4 tie(1+2, 4+5), @20°C	0.810 ohms max.
D.C. RESISTANCE	7-6 @20°C	0.050 ohms max.
INDUCTANCE	2-4 tie(1+2, 4+5), 10kHz, 100mV, Ls	1060.00uH ±10%
SATURATION CURRENT	2-4 tie(1+2, 4+5), 20% rolloff from initial	2A
LEAKAGE INDUCTANCE	2-4 tie(1+2, 4+5, 6+7), 100kHz, 100mV, Ls	100µH max.
DIELECTRIC	5-6 tie(4+5), 1875VAC, 1 second	
TURNS RATIO	(2-4):(7-6), tie(1+2, 4+5)	9.69:1, ±2%

## **IMPORTANT NOTICE**

The information contained in this application note is given as a hint for the implementation of the product only and shall in no event be regarded as a description or warranty of a certain functionality, condition or quality of the product. Before implementation of the product, the recipient of this application note must verify any function and other technical information given herein in the real application. Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind (including without limitation warranties of non-infringement of intellectual property rights of any third party) with respect to any and all information given in this application note.

The data contained in this document is exclusively intended for technically trained staff. It is the responsibility of customer's technical departments to evaluate the suitability of the product for the intended application and the completeness of the product information given in this document with respect to such application.

For further information on the product, technology delivery terms and conditions and prices please contact your nearest Infineon Technologies office ([www.infineon.com](http://www.infineon.com)).

## **WARNINGS**

Due to technical requirements products may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies office.

Except as otherwise explicitly approved by Infineon Technologies in a written document signed by authorized representatives of Infineon Technologies, Infineon Technologies' products may not be used in any applications where a failure of the product or any consequences of the use thereof can reasonably be expected to result in personal injury.
