**THE SOLUTION TO YOUR RACK LABELING CHALLENGES**

# CLEANBEAM™

## **REFRESH & PROTECT YOUR RACKING**

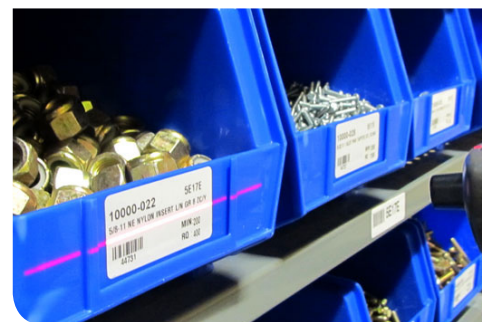

Whether your beams have seen a lot of use or are brand new, CleanBeam™ will keep them looking fresh for years to come. Just apply it right over any existing labels and damaged beams to cover them completely and protect against future wear. We will match CleanBeam™ to integrate seamlessly with your racking. Reap long-term rewards from this one-time investment.

## **EFFORTLESS, MESS-FREE LABEL REMOVAL**

Once CleanBeam™ is permanently installed on your racking, simply apply your location labels on top of it. Now, when you need to move stock or update a product, you can easily remove the location labels quickly and completely, without leaving any residue. CleanBeam™ will let you say goodbye to expensive magnets and the hassle of scraping old labels, saving you time and money!

## **CLEANBIN™ COMPLETE BIN PROTECTION**

The same CleanBeam™ technology can be used for bins as well. Now you can match the color and size of your bins and cover up old labels or apply CleanBin™ to new bins to keep them looking new. Simply apply your barcode location labels on top of CleanBin™ for easier scanability. No more stacking labels or trying to remove old labels making it easier to find and pick parts.

# DESIGN SERVICES

**HIGH QUALITY LABEL DESIGNS FOR JUST \$150**

## **WE MAKE THE LABEL DESIGN PROCESS A SNAP!**

Please consider CIS as your personal design team for your next label solution. We are happy to put our talented team of designers to work for you. Not a designer? Now you have your own virtual design team to create top quality professional designs for you.

Our fixed price concept development and design model is created to make it easy for you to receive high quality graphic design services for your company's labeling needs. We have included in this document, a simple questionnaire to help us get started on your label design. Please review and fill out the questions to the best of your abilities.

## **DEFINING THE MESSAGE**

Our CIS design team will work with you to establish the criteria that will guide the process of creating your new custom label design. Information will be gathered from phone interview(s) and a brief questionnaire. Through this process, we will identify specific communication and aesthetic criteria.

## **THE CREATIVE BRIEF**

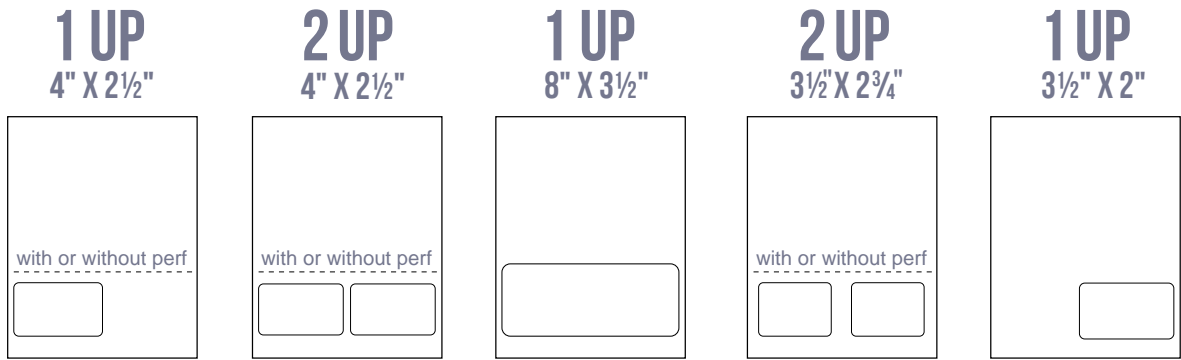

Before beginning design work, the project's functions and goals must be identified. To help clarify these objectives, we first must define your target audience, core message and theme, as well as your company's or product's "personality." This information will provide the criteria which will guide the design process.

## **THE IMPORTANCE OF DESIGN**

The quality of the design and production should encourage conscious action on the part of your target audience. Quality and clarity become both a form of promotion and an expression of the label's goals. Our CIS design team will work in collaboration with you and your team to ensure that all materials produced support this goal.

**MAKING GHS SIMPLE**

# GHS LABELS

## WHAT IS GHS?

GHS stands for the Globally Harmonized System of Classification and Labeling of Chemicals.

GHS is a system to standardize the way hazardous materials are classified. The idea is that the same criteria will be used all over the world to determine if a material is flammable, toxic or corrosive, etc. We are then assured that if a material is considered toxic in China it will also be so in the USA, Europe, Brazil and elsewhere around the globe.

## WHY CARE ABOUT GHS?

If you ship chemical drums or other packaging via marine transport, your GHS labeling system must use labels for those products that are certified to BS5609 specifications. You must work closely with your label supplier to make sure your labels have received BS5609 certification.

## WHAT DOES BS5609 MEAN?

It is a British Standard certification to determine the label's overall durability in marine conditions. The label must pass certain criteria to make sure it can withstand weathering, abrasion, colorfastness and adhesion.

**NEW GHS STANDARDS BEGAN IN JUNE 2015.**

**OUR PICTOGRAM & CHEMICAL LABELS ARE DESIGNED TO COMPLY WITH THE GLOBALLY HARMONIZED SYSTEM**

# BRAND PROTECTION

## SECURE PRINT SOLUTIONS

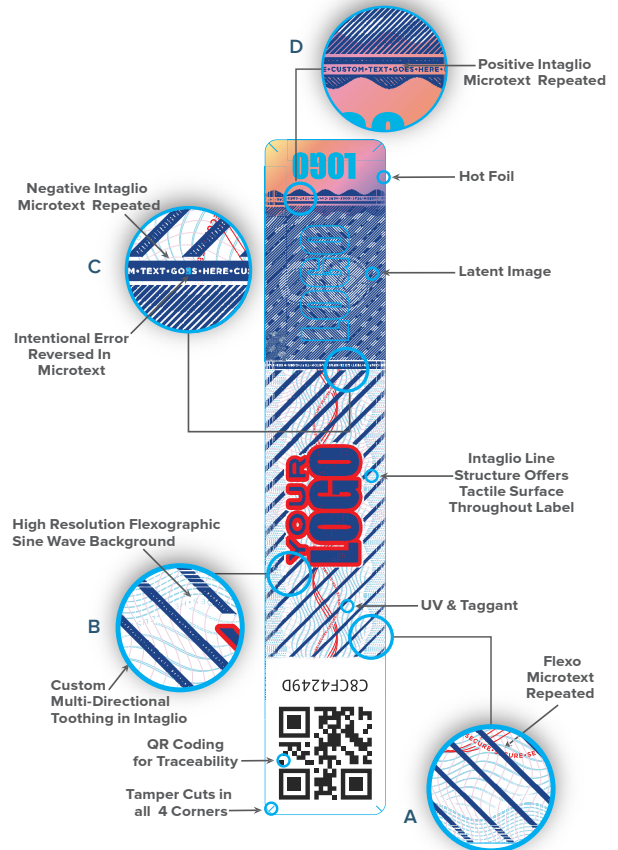

Our unique, in-line multi process print system combines intaglio printing, holographic application, rotary screen, flexographic printing, numbering, and imaging of variable data in a cost effective single-pass operation. This multiple print system allows your customers to select and integrate a wide choice of specialty inks, taggant markers, barcodes and other overt and covert security technologies into their labels and documents.

Our team has an intimate understanding of how products, packaging, marketing, supply chain and consumer awareness all interact with each other to ensure that your client's brands and assets are effectively protected. With our international presence, our security provides this protection to both commercial operations and governments worldwide.

**SECURITY PRODUCTS TO HELP BOTH COMPANIES & GOVERNMENTS PROTECT THEIR ASSETS**

## YOUR COMPLETE WAREHOUSE LABELING SOLUTION

# WAREHOUSE

### PROGRAM OVERVIEW

With all the challenges you face implementing your WMS system, why tackle it alone when you can have the backing of one of the top experts in the industry?

It takes time and resources to design, test, produce & install custom printed barcode warehouse labels and signs necessary for your project. With all this commitment and effort, successful installation is crucial.

CIS warehouse combines a thorough understanding of warehouse operations, barcode scanning and label production to help you install an individualized barcode warehouse label solution for you. We help you work through the details of your warehouse labeling needs, so you have more time and energy to focus on your company's daily operations.

At CIS warehouse, we realize that every installation is a unique project. Variables include the facility, available staff, Go Live date, budget and more.

### INITIAL CONSULTATION

No two warehouses are ever the same and that's why CIS begins with a tailored analysis of your facility's particular needs and requirements so that we can produce the labels in a way that makes the installation process efficient. All of our signs & labels are specifically designed for each unique application. We don't try to fit warehouses into one predetermined signage solution- we design customized warehouse signs for your specific needs. Don't let something as simple as poor signage stand in the way of achieving excellence for your warehouse.

### CUSTOM SIGNS & PLACARDS

Our custom warehouse signage solutions provide a consistent look to streamline aisle identification and ensure efficient location of products. With custom warehouse signs, you'll minimize the little mistakes & delays that add up to big frustrations. Try adding color elements or images to your signs to make locations and products easier to find.

### COMPLETE INSTALL & PROJECT MANAGEMENT

When you need the expertise of CIS to complete a sign or label installation efficiently, our Site Management services provide you with a great option. CIS warehouse supplies an on-site manager for the label installation to serve as your point person; managing the process from beginning to end.

Also, you will receive a complete set of services from our seasoned team of professional installers including all materials, labor and equipment necessary for your project.

***WE MAKE INSTALLING LABELS AND SIGNS IN YOUR WAREHOUSE QUICK, EASY AND ACCURATE.***

### SECTION 1. FILE FORMATS

We accept the following file formats: (any version, we have the latest software.)

**Ai**

**ADOBE ILLUSTRATOR**

This is our preferred program format.

01. Save files with all the **fonts outlined.**
02. Save as a Ai or EPS file.
03. Embed all images in color mode CMYK.
04. File's Raster settings should be 300dpi.
05. Provide all files needed. (Fonts, EPS, TIFFS)

**Ps**

**ADOBE PHOTOSHOP**

Avoid setting type in this program.

01. Ensure files are at least 300dpi and are not scaled up.
02. Save file as a CMYK Photoshop file, or EPS or TIFF).
03. Provide an unflattened version of the artwork.

**Id**

**ADOBE INDESIGN**

This is easy to convert to Illustrator.

01. Save files with all the **fonts outlined.**
02. Save as a Indesign or a EPS file.
03. Supply all files needed (Fonts, EP'S, TIFFS, You can do this easily by packaging the file.

**ADOBE ACROBAT**

If other adobe program formats are not available save as a **PDF file.**

01. Export as Hi-Res or choose option: Press Quality
02. Embedded images if possible; be sure they are at least 300 dpi
03. Outline / Convert to paths ALL FONTS.
04. Remove / turn off security options (if applicable).

**IMPORTANT  
PLEASE INCLUDE A  
PDF COPY TO PROOF  
ARTWORK AGAINST.**

**Files that are to be laser cut** will need to be saved as a PDF or a dxf file format. The artwork must be vector. The vector can come from Illustrator or C.A.D.

### SECTION 2. ARTWORK CHECKLIST & MEDIA INFO

#### MEDIA INFO

- All files supplied on disk should be accompanied with a color print out with pantone colors specified.
- Please supply necessary files only.
- Include all "placed" (EPS or TIFFS) images as separate files on the disk. This allows us to perform "Dot Gain" cutback.
- We are not responsible for damage to media or files. Send copies of files only; **PLEASE DO NOT SEND ORIGINAL FILES.**
- Disks will be returned only if it is requested.
- All media will be retained on file as a working backup. If return is requested, we are not responsible for the condition of the document or retention of any art data.

#### COLOR CHECKLIST

- Screens and solids do not always run together in flexographic printing. Solid color could be 1-2 shades lighter in order to keep the screens clean.
- Consider using a one spot color when possible and stay away from knock-outs in multiple colors (i.e. Process). A 1pt keyline of solid black or any other dark solid spot color used in the design will ensure quality reproduction.
- Bitmap/rasterized graphics should be 300dpi, saved as EPS and scaled in Photoshop.
- Allow the design to accept at least .5pt of trap.
- Digital print is incapable with some PMS colors.

#### COPY CHECKLIST

- Type sizes are no smaller than 4 pts. in positives and 5 pts. in reverse type.
- Line weights are no thinner than .35 pts. in positives and .75pts. in reverse type.
- Provide all the fonts used or outline all fonts.
- Drop shadows without a keyline can cause registration problems in flexographic printing.
- Bleeds should be .125" off cut line or fold line.
