TABLE OF CONTENTS continued

INTRODUCTION

This publication outlines the communications procedures, transmission formats, character sets, validation criteria, and error reject conditions for individual income tax returns filed electronically. The formats for statement records, examples of types of records, and explanations of the Acknowledgement files transmitted to electronic filers are also covered.

The File Specifications (Part 1) must be used in conjunction with the Record Layouts (Part 2) and the corresponding version of the Handbook for Authorized IRS e-file Providers of Individual Income Tax Returns, Publication 1345. Software developers and transmitters should use both publications and must transmit test returns from the IRS developed Test Package for Electronic Filers of Individual Income Tax Returns, Publication 1436, which is revised yearly. Tax preparers who use a transmission service will only need Publication 1345.

A list of IRS e-file publications is in Publication 3112, IRS e-file Application and Participation. Publication 1346, Publication 1436 and other IRS e-file publications, including Publication 1345, Handbook for Authorized IRS e-file Providers of Individual Income Tax Returns, are available on the IRS web site, www.irs.gov. You may call 1-800-829-3676 for additional copies of publications.

Beginning Tax Year 2009 and subsequent, the Publication 1346 will be maintained as a continuous living document incorporating Record Layout and Error Reject Code changes and other revisions or deletions as necessary. Nature of Change pages will be posted on www.irs.gov identifying the revisions or deletions made, when the changes outlined will be implemented and also when they will be merged into the Publication 1346.

HIGHLIGHTS FOR TAX YEAR (TY) 2012

Participant Acceptance Testing System (PATS)

PATS will begin on November 13, 2012. Please refer to Publication 1436, Test Package for Electronic Filers of Individual Income Tax Returns, for TY 2012, to create your test scenarios. PATS is required of all participants who develop software and/or transmit Individual Income Tax returns. All participants are required to create test scenarios and pass testing before transmitting production (live) returns.

I.   1040 LEGACY CONTINGENCY SUPPORTED FORMS (TY2012/PY2013):

Form 1040, Form 1040A, Form 1040EZ;

Schedule A, Schedule B, Schedule C, Schedule D, Schedule E, Schedule EIC, Schedule SE, and Schedule 8812 (formerly Form 8812);

Form W-2, Form 1099R, Form 2106, Form 2106EZ, Form 2210, Form 2441, Form 4562, Form 8283, Form 8829, Form 8863, Form 8867, Form 8880, Form 8888, Form 8949(LTGL/STGL), and Form Payment;

Trans Record A, Trans Record B, Authentication Record, Statement Record, State Records, Summary Record, and Recap Record.

II.   UPDATED FORM CHANGES:

ITIN Processing (Auto Population of TIN on Form W-2)

Beginning with TY 2011 for Form 1040 series, the Internal Revenue Service requires the manual key entry of the Taxpayer Identification Number (TIN) as it appears on Form W-2 received from the employer for all taxpayers with Individual Taxpayer Identification Numbers (ITINs) who are reporting wages. If an ITIN is involved both primary and secondary TINs must be manually entered. This applies to all Form W-2 series that can be filed electronically and does not include Forms 1099.

Please refer to Publication 1346, Attachment 1 - 11, Error Reject Code 0139, for more information on validating the ITIN.

Editorial Changes

All changes made by October 1, 201**2** are noted by a single vertical bar **(|)** in   **|**
the right margin. Deletions of entire lines are noted by a hyphen followed by
a single vertical bar **(-|).**

An attempt was made to include as many changes as possible before publication.
Any changes made after publication will be posted on www.irs.gov.

Part 2 of Publication 1346 contains the Electronic Returns Record Layouts for
Individual Income Tax Returns.

Comments and Suggestions

Please send any comments or suggestions regarding Sections 1-4, Section 12 and
Section 13 of Part 1 to: **|**

      Internal Revenue Service
      Federal/State Electronic Filing Program
      Donnie Paschall**,** SE:W:CAS:SP:ES:I, NCFB C5-370
      5000 Ellin Road, Lanham, MD 20706

Please send any comments or suggestions regarding the Publication 1346
except for Sections 1, 2, 3, 4, 12, and 13) to:

      5000 Ellin Road, Lanham, MD 20706

SECTION 1 – DATA COMMUNICATION

Electronic Filers will transmit over the Public Switched Telephone Network or through the internet to the Front End Processing System (FEPS), also known as Electronic Management System (EMS) located at the Enterprise Computing Center (ECC) at Memphis, Tennessee and Martinsburg, West Virginia. The following transmission rules apply:

Processing for 1040 e-file in 2013 (Tax Year 2012)
January 2013 – October 2013 Return Transmissions

If Fed/State or State only return and the State return included is for the following state; OR If Online Federal return only and the taxpayer's address on their Federal return is in the following state:	Return Processing Center, Site Designator and URL	Error Resolution System Correspondence
Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, APO/FPO New York	C – Andover efileD.ems.irs.gov	Fresno
North Dakota, South Dakota, Colorado, New Mexico, Texas, Nebraska, Oklahoma, Iowa, Arkansas, Louisiana, Mississippi, Alabama ----------------------------------- Foreign and U.S. Possession addresses, returns containing U.S. Possession forms, or Forms 2555/2555-EZ, Forms 8833, Forms 8854 or Forms 8891	E – Austin efileD.ems.irs.gov	Austin
Illinois, Minnesota, Wisconsin, Michigan, Indiana, Ohio, West Virginia, Missouri, Kansas	F – Kansas City efileC.ems.irs.gov	Kansas City
Florida, Tennessee, Kentucky, North Carolina, South Carolina, Georgia, APO/FPO Miami	G – Philadelphia efileD.ems.irs.gov	Kansas City
California, Alaska, Arizona, Hawaii, Idaho, Montana, Nevada, Oregon, Utah, Washington, Wyoming APO/FPO San Francisco	H – Fresno efileC.ems.irs.gov	Fresno
If Federal return only and the first two digits of the ERO's Electronic Filing Identification Number(EFIN) are:		
01,02,03,04,05,06,11,12,13,14,16,20,22,23,24,25, 26,27,51,52,54,78	C – Andover efileD.ems.irs.gov	Andover
42,45,46,47,63,64,66,70,71,72,73,74,75,76,79,84, 85,80,98	E – Austin efileD.ems.irs.gov	Austin
15,31,34,35,36,37,38,39,40,41,43,48,55	F – Kansas City efileC.ems.irs.gov	Kansas City
50,56,57,58,59,60,61,62,65,67,69	G – Philadelphia efileD.ems.irs.gov	Kansas City
30,33,68,77,81,82,83,86,87,88,91,92,93,94,95,96, 99	H – Fresno efileC.ems.irs.gov	Fresno

efileA is used for Test returns that are processed at ECC-MTB
efileD is used for Production returns that are processed at ECC-MTB
efileB is used for Test returns that are processed at ECC-MEM
efileC is used for Production returns that are processed at ECC-MEM

All Forms 8453 will be mailed to Austin

SECTION 1 – DATA COMMUNICATION

After pre-processing on the FEPS, the returns will be routed to their appropriate UNISYS machines at the ECC located at Martinsburg. All inquiries regarding transmission, rejects, problems, and PATS should be directed to ANSPC, or AUSPC as appropriate, by calling the toll-free *e*-Help Desk number at 1-866-255-0654. All inquiries regarding PATS should be directed to ANSPC and AUSPC as appropriate, by calling the toll-free *e*-Help Desk number.

NOTE: Transmitters who elect to use high-speed lines or expect to handle a large volume of electronic returns may request to lease their own dedicated line(s) at either the ECC located at Martinsburg WV or Memphis, TN. They must arrange to lease and install the lines and purchase modems or routers at both ends. See Appendix C – Digital Service Information.

NOTE: Transmitters who wish to file through their Internet Service Provider (ISP) must acquire *e*-file software that incorporates Secure Socket Layer (SSL) with a telnet/s protocol and the interface to the IRS gateway to the FEPS. See Appendix C – Internet Service information.

NOTE: The FEPS uses a menu driven interface. The IRS systems are designed to handle large volume transmissions. The practice of transmitting many small batches saturates the indices and degrades the systems. It is recommended that Internet transmitters should file no more than 500 returns per transmission in case the session terminates prior to completion. If fewer than 500 returns are to be transmitted, it is recommended these returns be filed not more than once per drain. (See processing schedule on www.irs.gov)

Dedicated, leased line transmitters may file up to 10,000 returns per transmission (Return Sequence Numbers 0000-9999); **if fewer** than 10,000 returns, the IRS recommends filing once per drain. Peak filing occurs around the "drain" times, which are listed on the *e*-file professional page at www.irs.gov.

(859) 292-0137 – **not** a toll-free call)

To assist transmitters in scripting automated logins and transmissions, see Appendix F.

NOTE: Please note that additional text has been added throughout which incorporates information retrieved from the Trading Partners Users Manual.

SECTION 1 – DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

1. FILE TRANSFER PROTOCOLS CHARACTER CODE AND FILE COMPRESSION

a. File Transfer Protocols
(1) FTP (with special permission – see note above)
(2) XMODEM-1K
(3) YMODEM-Batch
(4) ZMODEM

Transmitters may use any telecommunications software that is compatible with the above file transfer protocols.

b. Character Codes
American Standard Code for Information Interchange (ASCII)

c. File Compression
COMPRESS
GZIP (Freeware available from www.gzip.org)

NOTE: IRS does not support WINZIP or PKZIP.

2. TRADING PARTNER/TRANSMITTER INTERFACE (TPI)

The Trading Partner/Transmitter Interface (TPI) of the Front-End Processing Subsystem (FEPS) has two components: the Operating System Interface (OSI) and the Electronic Filing Systems Interface (EFSI). The OSI and EFSI prompts and messages are in upper/lower case. **The delete key (if the TP's terminal emulation software sends X'7F') or simultaneously entering the Control ("Ctrl") and Backspace keys** may be used to correct a mistake while entering the login identification and password, (OSI interface). After successful login, the transmitter can use the Backspace key (also generated by simultaneously entering the Control ("**Ctrl**") and "h" keys), (EFSI interface). All responses may be in upper or lower case EXCEPT the **login identification and password**, which are case-sensitive and must be entered with the exact case as it appears in the letter with your password and in the Transmitters Profile Data Base (TPDB).

All responses are echoed back except the password. On default prompts, the cursor will be to the right of the **colon and blank** (": ").

3. TRANSMITTER PROFILE DATA BASE (TPDB)

The Transmitter Profile Data Base (TPDB) keeps track of the sequence number for the ETIN to date. The sequence number is in the Acknowledgement Reference File Name on the FEPS. The Acknowledgement Reference File Name is composed of MMDDnnnn. The 4-digit sequence number represents the number of the transmissions to date for that ETIN. The Acknowledgement Reference File Name as well as ETIN, Julian Day and 2-digit sequence number for the Julian Day, and FEPS-assigned Global Transaction Key (GTX Key) are linked to your Acknowledgement files and can be searched by the e-Help Desk Staff Assistors to research the status of a transmission.

SECTION 1 – DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

4. ASYNCHRONOUS COMMUNICATIONS TRANSMITTER INTERFACE

After dialing the assigned telephone number to the FEPS, the transmitter must first enter the <u>carriage return</u> <cr> character, which typically can be generated by simultaneously entering the Control (**"Ctrl"**) and **"m"** keys. This alerts the Operating System to transmit an ASCII login prompt.

NOTE: Turn off call waiting (*70) before logging onto the FEPS to avoid aborted sessions. **(Check with your phone company to verify use of *70 to disable call waiting).**

5. EXAMPLES

In the examples below, boldface text indicates information sent by the transmitter. The system will echo transmitter input and send a <u>carriage return</u> **"<cr>"**, followed by <u>line feed</u> **"<lf>"** after receipt of a **"<cr>"** from the transmitter.

6. SUSPENDED TRANSMITTER

A suspended transmitter will be allowed to log into EMS to continue to receive Acknowledgements, but will not be allowed to transmit. See Section 1-Data Communication .01**.11.**a.

7. VIRUS DETECTION PROCEDURES FOR E-FILED TRANSMISSIONS FOR TRADING PARTNERS

a. The Front-End Processing System (FEPS) will scan <u>every</u> transmission.

b. If a virus is detected, FEPS will quarantine the file and immediately put a <u>transmission</u> Suspend Indicator on the Trading Partner (TP)'s profile.

c. While online, the TP (transmitter) will see "SUSPENDED", but will be permitted to pick up Acknowledgement Files.

d. The FEPS will create a Communications Error Message in a Communications Error Acknowledgement File, which will be in XML format, with the message VIRUS DETECTED and the name of the virus.

e. The next time the TP logs in, the TP will receive this ACK file, but will not be able to transmit. The TP can continue to pick up all ACK Files.

f. TP must remove infected data and call the appropriate e-Help Desk (e-HD) at 1-866-225-0654 (toll free) when ready to re-transmit.

g. The e-HD will remove the Suspend Indicator so that the TP can re-transmit the file and begin transmitting new files.

h. If another virus is detected, everything above will happen again.

SECTION 1 – DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

8. LOGON VALIDATION SPECIFICATIONS

a. <u>Transmission Inactivity</u>

Any period of inactivity for 60 seconds will cause the line to be
disconnected. It is assumed that the line is bad or that there are
problems in transmission, so the line is disconnected to prevent the
transmitter from being charged by the long-distance carrier for an
inactive open line.

b. <u>Changing File Transfer Protocol Indicator (FTP)</u>

The File Transfer Protocol indicated by the Trading Partner is
shown by menu item number 3 in brackets. If the Trading Partner has
not specified a protocol, Z-modem is assigned as a default protocol.
A Trading Partner can choose menu Item 3 to change protocol.

c. <u>Changing File Compression</u>

The FEPS assigns by default no compression on the file transfer.
If the Trading Partner wants to use UNIX compression or GZIP
compression, this can be selected from menu Item 4.
See Exhibit 4-11.

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE

The following discussion describes how a Trading Partner (TP) who
files Form 1040 will interact with the FEPS. The figures
are formatted for a word processing document and do not necessarily
display the exact spacing that is used by the FEPS.

Note: Password rules can be found in Appendix G.

The following discussion describes how a TP logs on to the system.
When a TP connects to EMS, the "Authorized Use" banner shown in
Exhibit 3-1 is displayed.

THIS U.S. GOVERNMENT SYSTEM IS FOR AUTHORIZED USE ONLY!
Use of this system constitutes consent to monitoring, interception,
recording, reading, copying or capturing by authorized personnel of
all activities. There is no right to privacy in this system.
Unauthorized use of this system is prohibited and subject to criminal
and civil penalties, including all penalties applicable to willful
unauthorized access (UNAX) or inspection of taxpayer records (under
18 U.S.C. 1030 and 26 U.S.C. 7213A and 26 U.S.C. 7431).
THIS U.S. GOVERNMENT SYSTEM IS FOR AUTHORIZED USE ONLY!

Exhibit 3-1 Authorized Use Banner

SECTION 1 – DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (continued)

The TP is then prompted for his/her login id and password as shown in Exhibit 3-2. (Note: Not only is the password not displayed, but also there is no indication of how many characters the TP has typed).

```
login: xxxxxxxx
Password:
```

Exhibit 3-2 Login and Password Prompts

a. Successful Login – No Password Change Required

If the TP correctly enters his/her EMS Login ID and password, there are several possible next steps:

- The TP may be asked to register his/her Shared Secrets as described in Section 9d.
- The TP may be asked to change his/her password as described in Section 9e.
- The official use banner and TP Main Menu may be displayed as described in Section 9h, if there are more than seven days until the TP's password expires.
- The log on process may continue as described next in this section if the TP's password expires in seven days or less.

b. Successful Login Password Change Required

If the TP's password will expire in seven days or less, then the message shown in Exhibit 3-3 is displayed and processing continues. (**Note:** "N" is replaced by the number of days remaining until the password must be changed.) Once the password has expired (90 days after the last password change) the TP must change his/her password as described in Section 9e.

```
    Password must be changed in N day(s).
```

Exhibit 3-3   Password Change in N Days

c. Unsuccessful Logon

After each unsuccessful login attempt due to the TP entering an incorrect EMS Login ID or password, the system displays the message shown in Exhibit 3-4.

```
    Login incorrect
```

Exhibit 3-4   Login Incorrect Message

After three consecutive unsuccessful login attempts, the TP is disconnected. After three consecutive unsuccessful attempts with a correct EMS Login ID and an incorrect password (in one or more sessions), the TP's account is disabled. After the next log on attempt, the TP may then use his/her Shared Secrets to re-enable the account and reset his/her password as described in Section 9f.

If the TP's account has been disabled prior to the TP's current session, the processing will continue as described in Section 9f. This would happen after a TP's account has been inactive for 45 days on a PY2011 system or the TP previously failed to provide the correct password in his/her last three consecutive attempts.

SECTION 1 – DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (<u>continued</u>)

d. Registration of Shared Secrets

There are times when a TP correctly supplies his/her EMS Login ID and
password, and then is required to register his/her Shared Secrets before
proceeding. These include:

- The TP is a new user and the TP logs in to the system for the first
  time.
- The TP is an active PY201**2** user and logs in to the system for the
  first time during the PY201**3** filing season.
- The password was reset by the EMS System Administrator upon request
  from the TP.

Initially, the TP is prompted to register his/her Shared Secrets (ETIN,
EFIN, zip code, phone number, and secret phrase). The TP is prompted to
enter the Electronic Transmitter Identification Number (ETIN) as shown in
Exhibit 3-5.

```
   Enter your ETIN:
```

Exhibit 3-5   Shared Secret ETIN Prompt

If the TP enters an ETIN that is not five digits, the message shown in
Exhibit 3-6 is displayed, and then the TP is prompted again as shown in
Exhibit 3-5 to enter his/her ETIN. If this is the third unsuccessful
attempt to enter a valid ETIN, the TP is disconnected.

```
   Invalid ETIN: must be 5 digits.
```

Exhibit 3-6   ETIN Must Be 5 Digits Message

If the TP enters a 5-digit ETIN that does not match the ETIN assigned to the
EMS Login ID entered at the login prompt, the message shown in Exhibit 3-7
is displayed, and then the TP is prompted again as shown in Exhibit 3-5 to
enter his/her ETIN. If this is the third unsuccessful attempt to enter a
valid ETIN, the TP is disconnected.

```
   Invalid ETIN.
```

Exhibit 3-7   Invalid ETIN Message

After successfully entering the ETIN, the TP is prompted to enter the TP's
Electronic Filer Identification Number (EFIN) as shown in Exhibit 3-8.

```
   Enter your EFIN associated with this ETIN:
```

Exhibit 3-8 Shared Secret EFIN Prompt

.01 IRS Front-end Processing Subsystem (FEPS)

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (<u>continued</u>)

If the TP enters an EFIN that is not six digits, the message shown in
Exhibit 3-9 is displayed, and then the TP is prompted again as shown in
Exhibit 3-8 to enter his/her EFIN. If this is the third unsuccessful
attempt to enter a valid EFIN, the TP is disconnected.

```
   Invalid EFIN: must be 6 digits.
```

Exhibit 3-9 Invalid EFIN Message

After successfully entering the EFIN, the TP is prompted to enter his/her
zip code as shown in Exhibit 3-10.

```
   Enter your zip code:
```

Exhibit 3-10 Shared Secret Zip Code Prompt

If the TP enters a zip code that is not five digits, the message shown in
Exhibit 3-11 is displayed, and then the TP is prompted again as shown in
Exhibit 3-10 to enter his/her zip code. If this is the third unsuccessful
attempt to enter a zip code, the TP is disconnected.

```
   Invalid zip code: must be 5 digits.
```

Exhibit 3-11 Invalid Zip Code Message

After successfully entering the zip code, the TP is prompted to enter
his/her phone number as shown in Exhibit 3-12.

```
   Enter your phone number:
```

Exhibit 3-12 Shared Secret Phone Number Prompt

If the TP enters a phone number that is not ten digits, the message shown in
Exhibit 3-13 is displayed, and then the TP is prompted again as shown in
Exhibit 3-12 to enter his/her phone number. If this is the third
unsuccessful attempt to enter a phone number, the TP is disconnected.

```
   Invalid phone number: must be 10 digits.
```

Exhibit 3-13 Invalid Phone Number Message

After successfully entering the phone number, the TP is prompted to enter
his/her case-insensitive secret phrase and to confirm his/her secret phrase
by re-entering it as shown in Exhibit 3-14. (**Note:** Not only are the initial
secret phrase and the re-entered secret phrase not displayed, there is no
indication of how many characters are typed by the TP.)

.01   IRS Front-end Processing Subsystem (FEPS)

    9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (<u>continued</u>**)**

```
   Enter your secret phrase:
   Re-enter your secret phrase:
```

Exhibit 3-14 Shared Secret Phrase Prompt

If the TP does not enter the same secret phrase in response to the "Enter
your secret phrase" and "Re-enter your secret phrase" prompts, then the
message shown in Exhibit 3-15 is displayed. The TP is prompted again as
shown in Exhibit 3-14 to enter his/her secret phrase. If this is the third
unsuccessful attempt to enter the secret phrase, the TP is disconnected.

```
   Secret phrases don't match.
```

Exhibit 3-15 Unmatched Secret Phrase Message

If the TP enters a secret phrase that does not meet the format requirements,
the message shown in Exhibit 3-16 is displayed, and then the TP is prompted
again as shown in Exhibit 3-14 to enter his/her secret phrase. (Note: The
secret phrase must be 1 to 20 characters long. It may contain alphanumeric
characters plus the special characters listed in Appendix G. It may not
contain spaces. The secret phrase is not case sensitive.)

```
 Invalid secret phrase: must be 1-20 alphanumeric/special chars; no spaces.
```

Exhibit 3-16 Invalid Secret Phrase Message

If the TP's responses have met the rules for Shared Secrets, the Shared
Secrets are stored and the message shown in Exhibit 3-17 is displayed.
After the TP successfully enters his/her Shared Secrets, processing
continues as described in Section 9e. with prompting the TP to enter his/her
new password if one of the following conditions exist:

- The TP is a new user and the TP logs in to the system for the first
  time.
- The password was reset by the EMS System Administrator upon request
  from the TP.
- The TP's password has expired.

Otherwise, if the TP is an existing user and successfully registers his/her
Shared Secrets, Main Menu processing continues as described in Section 9h.

```
   Registration of Shared Secrets Successful.
```

Exhibit 3-17 Shared Secrets Successfully Changed Message

(**Note:** The TP will be able to use the new Shared Secrets to reset his/her
password, if necessary, at either EMS processing center.)

If the TP has concurrent sessions, only one session can change the Shared
Secrets. If the TP attempts to change Shared Secrets in a second session,
while the first session is actively changing the Shared Secrets, the message
shown in Exhibit 3-18 is displayed and the TP is disconnected.

SECTION 1 – DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (<u>continued</u>)

```
 Shared Secrets not changed. Another session is trying to change them.
```

Exhibit 3-18 Another Login Session Changing Shared Secrets Message

If a system error occurs during the registration of Shared Secrets, the Shared Secrets may or may not have been stored. The message shown in Exhibit 3—19 is displayed and the TP's session is terminated. If the Shared Secrets were not stored, the TP is prompted for them during his/her next log on session.

```
 System error.
```

Exhibit 3-19 System Error Message

e. Changing Password

A TP is required to change his/her password before proceeding to the Main Menu when one of the following conditions occurs:

- The TP's current password has expired after 90 days.
- The TP successfully completed registration of Shared Secrets after the TP's password was reset by the EMS System Administrator.
- The new TP successfully completed registration of Shared Secrets.
- The TP did not successfully change his/her password when required during his/her previous log on session.
- The TP's account was disabled and the TP used his/her Shared Secrets to authenticate and re-enable the TP's account.

When any of these situations occur, the TP is prompted to enter a new password and to confirm his/her new password by re-entering it as shown in Exhibit
3-20.

```
   Enter new password:
   Re-enter new password:
```

Exhibit 3-20 New Password Prompts

If the TP's responses meet the rules for changing the password, the password is changed and the message shown in Exhibit 3-21 is displayed. (**Note:** Password rules can be found in Appendix G.) The TP will subsequently use the new password to log on to either EMS processing center. Main Menu processing then continues as described in Section 9h.

```
   Password changed.
```

Exhibit 3-21 Password Change Confirmation

SECTION 1 – DATA COMMUNICATION

.01 IRS Front-end Processing Subsystem (FEPS)

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (<u>continued</u>)

However, if the TP's responses to the password prompts do not meet the rules for changing the password, then an error message is displayed and the TP is prompted again as shown in Exhibit 3-20 to enter his/her password. A TP is given three tries to change his/her password.

If the TP does not enter the same password in response to the "Enter new password" and "Re-enter new password" prompts, then the password is not changed and the message shown in Exhibit 3-22 is displayed. If the TP has unsuccessfully attempted to change his/her password less than three times, the TP is prompted for his/her new password as shown in Exhibit 3-20. If this is the third unsuccessful attempt, the TP is disconnected.

```
   New passwords don't match.
```

Exhibit 3-22 Unmatched New Passwords Message

If the TP enters a new password that does not meet the rules, then the password is not changed and the message shown in Exhibit 3-25 is displayed. If the TP has unsuccessfully attempted to change his/her password less than three times, the TP is prompted for his/her new password as previously shown in Exhibit 3-22. If this is the third unsuccessful attempt, the TP is disconnected.

```
   Password rule(s) have not been met.
```

Exhibit 3-23 Password Rule Violation Message

If the TP has concurrent sessions, only one session can change the password. If the TP attempts to log on to a second session, while the first session is actively changing the password, the message shown in Exhibit 3-24 is displayed and the TP is disconnected.

```
   Login failed.  Another session is trying to change the password.
```

Exhibit 3-24 Another Login Session Changing Password Message

If a system error occurs during the change password operation, the password may or may not be changed. The message shown in Exhibit 3-25 is displayed and the TP is disconnected. The TP may need to try both his/her old and new passwords on his/her next login.

```
   System error.
```

Exhibit 3-25 System Error Message

(**Note:** A successful password change is also synchronized between processing years.)

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (<u>continued</u>)

f. Re-Enabling Account Using Shared Secrets

If a TP's account is disabled after 45 days of inactivity on a PY201**1**
system or the TP failed to provide a valid password in three consecutive
attempts, the TP is given the opportunity to enter his/her Shared Secrets to
re-enable his/her account as shown in Exhibit 3-26. If the TP calls the IRS
e-Help Desk before the TP tries to use his/her Shared Secrets, and requests
that his/her account be re-enabled, the TP may be directed to re-enable
his/her account on the system by entering the TP's Shared Secrets.

```
   This account is currently disabled.
   Do you wish to re-enable your account? Y/[N]:
```

Exhibit 3-26 Re-enable a Disabled Account Prompt

If the TP enters anything other than "Y" or "y," the TP's session is
disconnected. If the TP responds to the prompt affirmatively, the TP is
prompted to authenticate his/her account by entering the TP's previously
entered Shared Secrets as shown in Exhibit 3-27.

```
   Enter your ETIN:
   Enter your EFIN associated with this ETIN:
   Enter your zip code:
   Enter your phone number:
   Enter your secret phrase:
```

Exhibit 3-27 Shared Secrets Prompts

After the TP successfully enters his/her previously entered Shared Secrets,
the TP is prompted to enter his/her new password as described in Section 9e.

However, if the TP enters incorrect answers to any of the Shared Secrets
prompts in Exhibit 3-27, the message shown in Exhibit 3-28 is displayed, and
the system prompts the TP again for his/her Shared Secrets as shown in
Exhibit 3-27. If this is the third consecutive unsuccessful attempt (in one
or more sessions) to enter the TP's Shared Secrets, the TP is disconnected,
the account is locked, and the TP will not be able to log on again.

```
   Invalid Shared Secrets.
```

Exhibit 3-28 Invalid Shared Secrets Message

If the TP attempts to log on after his/her account has been disabled and the
TP unsuccessfully entered the Shared Secrets three times, the message shown
in Exhibit 3-29 is displayed and the TP is disconnected. (**Note:** After the
TP's account is locked, there is no prompt asking the TP whether the TP
wishes to re-enable account.) If this happens, the TP should contact the
IRS e-Help Desk to request that his/her account be unlocked.

```
   This account is locked.
   Please contact the IRS e-Help Desk for assistance.
```

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (<u>continued</u>**)**

g. EMS Unavailable

If the EMS application is not available when the TP attempts to log in, one
of two messages is displayed after the login and password prompts. If EMS
is unavailable because of scheduled down time, the message shown in
Exhibit 3-30 is displayed and the TP is disconnected.

```
EFS is currently unavailable.  Additional information may be available on
IRS quick alerts.
```

Exhibit 3-30 EFS Unavailable Message

If the EMS application is unavailable for unscheduled reasons or the maximum
number of concurrent sessions has been reached, the message shown in
Exhibit 3-31 is displayed and the TP is disconnected.

```
    EFS is busy.  Wait at least 10 minutes, then retry.
```

Exhibit 3-31 EFS Busy Message

h. EMS Main Menu Processing

Once the TP has successfully completed the login process (including
registering Shared Secrets and/or changing his/her password, if necessary),
the "last login" message is displayed as shown in Exhibit 3-32.

```
    Last login: Tue Sep 4 10:39:31 from computer name
```

Exhibit 3-32 Last Login Message

The "Official Use" banner shown in Exhibit 3-33 is then displayed.

```

        Exhibit 3-36 Invalid Main Menu Selection

.01 IRS Front-end Processing Subsystem (FEPS) continued

9. IMF TRADING PARTNER (1040) SESSION EXAMPLE (continued)

For all TPs, the current file transfer protocol is displayed in brackets next to the "Change File Transfer Protocol" menu item. Likewise, the TP's current compression method is displayed in brackets next to the "Change Compression Method" menu item. The possible file transfer protocols and compression method values are identified in Section 4 where the "File Transfer Protocols" and "File Compression Methods" menus are discussed.

It should be noted that a TP's initial compression method is "NONE." Since EMS does not auto-sense compressed files, a TP must select a compression method before submitting compressed files. If the TP has selected a compression method, his/her acknowledgment files and Transmission Status Report are compressed and returned using the selected compression method.

At any prompt, if the TP does not respond in 60 seconds the following message is displayed: "DISCONNECTING FROM EFS." and the TP is disconnected.

10. CHANGING SETTINGS

a. *Changing the Transmission Protocol*

This section explains how to change the TP's communication protocol and compression settings.

To change the transmission protocol, the TP chooses "Change File Transfer Protocol" as shown in Exhibit 4-1.

```
       MAIN MENU

    1) Logoff
    2) Receive/Send File(s)
    3) Change File Transfer Protocol [ZMODEM]
    4) Change Compression Method [NONE]
    5) Request Transmission Status Report
    6) Change Password
    7) Show State Return Menu (available for State use only)
    8) Reset Acknowledgment File(s)
    9) Change Shared Secrets

  Enter your choice:  3
```
Exhibit 4-1 Choosing Change File Transfer Protocol

When the TP chooses "Change File Transfer Protocol," the menu shown depends on whether or not the TP has been approved to use the FTP protocol (see Appendix C for FTP usage). If the TP cannot use the FTP protocol, the menu shown in Exhibit 4-2 is displayed. Brackets frame the TP's current file transfer protocol. The TP's initial setting is "ZMODEM."

```
       FILE TRANSFER PROTOCOLS MENU

    1) Return to MAIN MENU
    2) [ZMODEM]
    3) XMODEM-1K
    4) YMODEM BATCH

  Enter your choice:
```

      3)  GZIP
      4)  COMPRESS

      Enter your choice:
```

Exhibit 4-10 Initial File Compression Methods Menu Display

SECTION 1 – DATA COMMUNICATION

.01   IRS Front-end Processing Subsystem (FEPS) continued

Note: The two supported compression methods are gzip (a freeware program available at www.gzip.org) and compress (a Unix compression utility). If the TP chooses 3) GZIP or 4) COMPRESS and sends a file that was compressed using PKZIP file format 2.04g, EMS is able to decompress the file. EMS Ack files that are returned to the TPs are named based on the compression method chosen. For example, a TP sends in a file named abc.zip compressed with PKZIP 9 and chooses option 3) GZIP. The Ack file returned will have the extension beginning with .GZ. See Exhibit A-1 in Appendix A for the complete list of possible Ack file names. PKZIP and WINZIP will then decompress these files successfully. PKZIP 9 and WINZIP 9 were both successfully tested with EMS. EMS does not support the use of PKZIP's new encryption capabilities because of the "key management" issue.

The TP can change his/her compression method or return to the Main Menu. Exhibit 4-11 demonstrates the TP changing his/her compression method to gzip.

```
          FILE COMPRESSION METHODS MENU

          1) Return to MAIN MENU
          2) [None]

end the session.

.01   IRS Front-end Processing Subsystem (FEPS) continued

11. RECEIVING ACKNOWLEDGMENTS

From the Main Menu, the TP receives acknowledgment files and/or transmits
a file by choosing "Receive/Send File(s)." This section discusses
receiving acknowledgment files.

```
          MAIN MENU

          1) Logoff
          2) Receive/Send File(s)
          3) Change File Transfer Protocol [FTP]
          4) Change Compression Method [GZIP]
          5) Request Transmission Status Report
          6) Change Password
          7) Show State Return Menu (available for State use only)
          8) Reset Acknowledgment File(s)
          9) Change Shared Secrets

       Enter your choice:  2
```

Exhibit 5-1 Choosing Receive/Send File(s)

When the TP chooses the "Receive/Send File(s)" menu item, the EMS TP
Interface software checks to see if there are acknowledgment files
to be sent to the TP. If there are no acknowledgment files, the
message in Exhibit 5-2 is displayed and processing continues as
discussed in Section 6. This allows TPs to submit files even if there
are no acknowledgment files waiting for delivery.

```
     Number of Acknowledgment File(s) in outbound mailbox: 000
```

Exhibit 5-2 Zero Acknowledgment File Display

If there are acknowledgment files, the text shown in Exhibit 5-3 is
displayed. The message shows the number of acknowledgment files
waiting for delivery to the TP. All acknowledgment files waiting for
delivery to the TP are delivered before the TP can submit a file.
The count of acknowledgment files is updated every time the TP
selects item 2) Receive/Send File(s), from the Main Menu.
Additional acknowledgment files that were generated during the
session are reflected in this count.

```
     Number of Acknowledgment File(s) in outbound mailbox: 003

     Are you ready to receive files? Y/[N]: Y or y
```

Exhibit 5-3 One or More Acknowledgment Files Display

If the TP enters anything other than "Y" or "y," the Main Menu as
shown in Exhibit 5-1 is redisplayed. If the TP fails to respond
affirmatively three consecutive times he/she is disconnected.

.01   IRS Front-end Processing Subsystem (FEPS) continued

If the TP responds to the prompt affirmatively, a message notifying the TP that the file transfer is about to begin is displayed. The message depends on the protocol being used. For Zmodem, Xmodem or Ymodem, the message in Exhibit 5-4 is displayed. For FTP, the message shown in Exhibit 5-5 is displayed. The file transfer begins after the appropriate notice.

```
                    EFS ready for modem download.
```

Exhibit 5-4 Modem Download Notice

```
                    Putting File(s) by FTP.
```

Exhibit 5-5 FTP "Putting Files" Notice

All acknowledgment files are sent as separate files. If the TP is also using compression, each file is separately compressed. (See Appendix A for a description of acknowledgment file names).

If the TP interface software detects that the transmission did not complete successfully, the message in Exhibit 5-6 is displayed followed by the Main Menu (Exhibit 5-1). If this happens three times in a row, the TP will be disconnected.

```
                Error transmitting Acknowledgement File(s).
```

Exhibit 5-6 Acknowledgment File Transmission Error Message

If the TP interface software does not detect an error, the message shown in Exhibit 5-7 is displayed.

```
              Acknowledgement File(s) transmission complete.
```

Exhibit 5-7 Acknowledgement File Transmission Complete Message

SECTION 1 – DATA COMMUNICATION

.01   IRS Front-end Processing Subsystem (FEPS) continued

a. Suspended Transmitter Message

Next, the TP is asked if he/she wants to send a file. Section 12
discusses sending files. After the receive acknowledgment process
has completed, if the TP has been suspended, he/she is not allowed
to transmit new files. Instead, the message "SUSPENDED TRANSMITTER/ETIN"
is displayed, and the TP is disconnected from EMS (Exhibit 5-8).

```
                    SUSPENDED TRANSMITTER/ETIN.
                    Disconnecting from EFS.
```

Exhibit 5-8 Suspended TP Message

A suspended transmitter is allowed to log on to the EMS to continue
to receive Acknowledgements but not allowed to transmit. Suspension
occurs for the following reasons:

- Submission of a file with a virus (refer to Appendix B)
- Submission of a file with an XML threat (refer to Appendix B)
- Suspension by tax examiner for procedural reasons

Should this occur, the TP must contact the IRS e-Help Desk to request
removal of the suspended status.

.01 IRS Front-end Processing Subsystem (FEPS) continued

12. SENDING FILES

This section describes the process of transmitting files to EMS.
It details the messages and prompts for TPs registered as
transmitters.

After the receive acknowledgement process has completed, or if there
are no acknowledgment files to receive, the TP is asked if he/she
wants to send a file as shown in Exhibit 6-1.

a. Starting the Send Process

After the receive acknowledgements process has completed, or
if there are no acknowledgment files to receive, the TP is
asked if he/she wants to send a file as shown in Exhibit 6-1.

```
    Do you want to send a file? Y/[N]: Y or y
```

Exhibit 6-1 Send Tax Return File Prompt

If the TP enters anything other than "Y" or "y," the Main Menu
as shown in Exhibit 6-1 is redisplayed. If there are no
acknowledgment files for the TP to receive and the TP fails
to respond affirmatively three times in a row, the TP is
disconnected.

Otherwise, the next prompt depends on the file transfer
protocol being used. If the TP is using Zmodem, Ymodem, or
Xmodem, he/she is prompted to start the file transfer as shown
in Exhibit 6-2. SECTION 1 – DATA COMMUNICATION

```
    Enter an upload command to your modem program now.
```

Exhibit 6-2 Modem Upload Prompt

If the TP is using the FTP protocol, he/she is prompted to
supply a file name as shown in Exhibit 6-3. After supplying
the file name the TP is notified that the FTP transfer is
beginning. This notice is also shown in Exhibit 6-3.

```
    Enter the LOCAL name of the file you are sending from
    your system: myfile

    Getting file by FTP.
```

Exhibit 6-3 FTP File Name Prompt

SECTION 1 – DATA COMMUNICATION

.01   IRS Front-end Processing Subsystem (FEPS) continued

If the TP responds to the filename prompt in Exhibit 6-3 with only a
carriage return (<CR>), then the notice shown in Exhibit 6-4 is displayed.
If the TP responds with only a <CR> three times in a row, the TP is
disconnected.

```
   Invalid file name.

   Enter the LOCAL name of the file you are sending from
   your system: <CR>
```
            Exhibit 6-4   Invalid File Name Message

Once the TP has been notified that the file transfer is beginning
(Exhibit 6-2 or 6-3), the TP has 60 seconds to begin his/her file
transfer. If the EMS does not receive at least part of the TP's
file within 60 seconds, the TP is disconnected.

If the TP Interface software detects that the transmission did not
complete successfully, the message in Exhibit 6-5 is displayed
followed by the Main Menu. If this happens three consecutive times,
the TP is disconnected.

```
   Error receiving file.  You must send it again.
```
            Exhibit 6-5   Transmission Receipt Error Message

If the TP Interface software does not detect an error, the transmission
confirmation message shown in Exhibit 6-6 is displayed followed by the
Main   Menu (Exhibit 6-7).   If the TP hangs up without receiving the
confirmation message, there is no guarantee that the EMS will process the
file(s).

The transmission confirmation message contains the Global Transmission Key
(GTX Key) and the ACK File Reference Name. The GTX Key is the unique
identifier assigned by the EMS to the file sent by the TP, and is used to
track the processing of the file and its subsequent acknowledgment.   The
ACK File Reference Name is used when constructing the name of the
acknowledgment file delivered to the TP.   (See Appendix A for a
description of the GTX Key and its relationship to the ACK File Reference
Name.)

```
   Transmission file has been received with the following GTX Key:

      U20101020123423.1700                    10200001
```
            Exhibit 6-6   Transmission Confirmation Message

SECTION 1 – DATA COMMUNICATION

.01   IRS Front-end Processing Subsystem (FEPS) continued

The Main Menu is displayed again as shown in Exhibit 6-7. The TP can choose a menu item to continue or Logoff to end the session.

```
          MAIN MENU

     1) Logoff
     2) Receive/Send File(s)
     3) Change File Transfer Protocol [FTP]
     4) Change Compression Method [GZIP]
     5) Request Transmission Status Report
     6) Change Password
     7) Show State Return Menu (available for State use only)
     8) Reset Acknowledgment File(s)
     9) Change Shared Secrets

   Enter your choice:
```

.01   IRS Front-end Processing Subsystem (FEPS) continued

13. REQUEST TRANSMISSION STATUS REPORT

A Transmission Status Report may be requested from the Main Menu
shown in Exhibit 7-1. Examples of Transmission Status Reports are
contained in Appendix D. A transmission status report will show the
status of all transmissions submitted by the TP since 12:00 a.m.
five days ago. For State TPs, the report also shows the status of all
state acknowledgments that have been received and redirected to other
TPs since 12:00 a.m. five days ago. Only one report may be requested
per TP session. The report is returned to the TP in a Hypertext Markup
Language (HTML) format file that is suitable for offline viewing with a
Web browser (or other product which recognizes HTML format).

```
         MAIN MENU

      1) Logoff
      2) Receive/Send File(s)
      3) Change File Transfer Protocol [FTP]
      4) Change Compression Method [GZIP]
      5) Request Transmission Status Report
      6) Change Password
      7) Show State Return Menu (available for State use only)
      8) Reset Acknowledgment File(s)
      9) Change Shared Secrets

   Enter your choice:  5
```
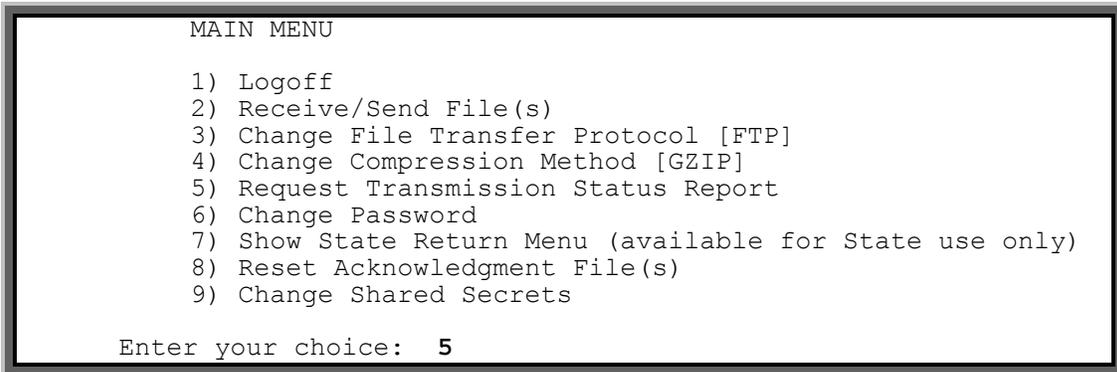

Exhibit 7-1 Choosing Request Transmission Status Report

When the TP chooses the "Request Transmission Status Report" menu
item, a message notifying the TP that the report transfer is about
to begin is displayed. The message depends on the protocol being
used. For Zmodem, Xmodem, or Ymodem, the message in Exhibit 7-2 is
displayed. For FTP, the message shown in Exhibit 7-3 is displayed.
The file transfer will begin after the appropriate message.

```
   EFS ready for Report download.
```

Exhibit 7-2 Modem Download Message

```
   Putting Report by FTP.
```

Exhibit 7-3 FTP "Putting Report File" Message

If the TP has selected compression, the report is compressed.
(See Appendix D for a description of Transmission Status Report
file names.)

.01   IRS Front-end Processing Subsystem (FEPS) continued

If the TP Interface software detects that the transmission did not complete successfully, the message in Exhibit 7-4 is displayed followed by the Main Menu. If this happens three times in a row, the TP is disconnected.

```
    Error transmitting Report File.
```

Exhibit 7-4 Report File Transmission Error Message

If the TP Interface software does not detect an error, the message shown in Exhibit 7-5 is displayed.

```
    Report File transmission complete.
```

Exhibit 7-5 Report File Transmission Complete Message

After the file transfer has completed, the Main Menu is redisplayed.

TPs can make only one report request per session. If the TP tries to request a report again, the message shown in Exhibit 7-6 is displayed followed by the Main Menu. If this happens three times in a session, the TP is disconnected.

```
    Only one Report request allowed.
```

Exhibit 7-6 Report Request Error

.01   IRS Front-end Processing Subsystem (FEPS) continued

14.   CHANGING PASSWORD

TPs are responsible for maintaining their passwords. When a TP changes his/her password at one EMS processing center, it will be propagated to the other EMS processing center. Therefore, a TP should only execute the change password procedures once per new password.

To change his/her password, the TP chooses "Change Password" as shown in Exhibit 8-1.

```
          MAIN MENU

      1) Logoff
      2) Receive/Send File(s)
      3) Change File Transfer Protocol [ZMODEM]
      4) Change Compression Method [NONE]
      5) Request Transmission Status Report
      6) Change Password
      7) Show State Return Menu (available for State use only)
      8) Reset Acknowledgment File(s)
      9) Change Shared Secrets

    Enter your choice:  6
```

Exhibit 8-1 Choosing "Change Password"

The TP is then prompted to enter his/her current password and to enter his/her new password twice as shown in Exhibit 8-2. Not only will the passwords not be displayed, but also there will be no indication of how many characters the TP has typed. The new password must meet the rules described in Appendix G.

```
    Enter current password:
    Enter new password:
    Re-enter new password:
```

Exhibit 8-2 Current and New Password Prompts

If the TP's responses meet the rules for changing the password, the password is changed and the message shown in Exhibit 8-3 is displayed. The TP will now use the new password to log into any EMS processing center. The Main Menu is then redisplayed as shown in Exhibit 8-4.

```
    Password changed.
```

Exhibit 8-3 Password Change Confirmation

```
            MAIN MENU

       1) Logoff
       2) Receive/Send File(s)
       3) Change File Transfer Protocol [ZMODEM]
       4) Change Compression Method [NONE]
       5) Request Transmission Status Report
       6) Change Password
       7) Show State Return Menu (available for State use only)
       8) Reset Acknowledgment File(s)
       9) Change Shared Secrets

    Enter your choice:
```

        Exhibit 8-4   Redisplay of Main Menu

If the TP's responses to the password prompts do not meet the rules
for changing the password, then an error message is displayed. A
TP is given at most three tries per session to change his/her password.

If the TP incorrectly enters his/her current password, the password
is not changed and the message shown in Exhibit 8-5 is displayed.
If the TP has unsuccessfully attempted to change his/her password
less than three times, he/she is prompted for his/her current and
new passwords as previously shown in Exhibit 8-2. If this is the
third unsuccessful attempt, then the Main Menu is redisplayed as
previously shown in Exhibit 8-4.

```
      Incorrect current password.
```

         Exhibit 8-5   Incorrect Current Password Message

If the TP does not enter the same password in response to the "Enter
new password" and "Re-enter new password" prompts, then the password
is not changed and the message shown in Exhibit 8-6 is displayed. If
the TP has unsuccessfully attempted to change his/her password less
than three times, he/she is prompted for his/her current and new
passwords as previously shown in Exhibit 8-2. If this is the third
unsuccessful attempt, then the Main Menu is redisplayed as previously
shown in Exhibit 8-4.

```
      New passwords don't match.
```

        Exhibit 8-6   Unmatched New Passwords Message

.01   IRS Front-end Processing Subsystem (FEPS) continued

If the TP enters a new password that does not meet the rules identified
in Appendix G, then the password is not changed and the message shown
in Exhibit 8-7 is displayed. If the TP has unsuccessfully attempted to
change his/her password less than three times, he/she is prompted for
his/her current and new passwords as previously shown in Exhibit 8-2.
If this is the third unsuccessful attempt, then the Main Menu is
redisplayed as shown in Exhibit 8-4.

```
    Password rule(s) have not been met.
```

Exhibit 8-7 Password Rule Violation Message

If it has been less than seven days since the last time the TP changed
his/her password, he/she is prompted for his/her current and new passwords
as shown in Exhibit 8-2, the password is not changed and the message shown
in Exhibit 8-8 is displayed. The TP is then returned to the Main Menu as
previously shown in Exhibit 8-4. If it has been less than seven days and
the TP needs to change his/her password, he/she should contact the IRS
e-Help Desk.

```
    Less than 7 days from last change. Password not changed.
```

Exhibit 8-8 Less Than 7 Days Message

If the TP has concurrent sessions, only one can change the password.
If the TP attempts to change his/her password in more than one session,
only one will be allowed and the message shown in Exhibit 8-9 is
displayed to the other session(s). After this message is displayed,
the TP is returned to the Main Menu as previously shown in Exhibit 8-4.

```
    Password not changed. Another session is trying to change the
    password.
```

Exhibit 8-9 Another Session Changing Password Message

If a system error occurs during the change password operation, the
password may or may not be changed. The messages shown in Exhibit 8-10
are displayed and the TP's session is terminated. The TP may need to try
both his/her current and new passwords on his/her next login.

```
    System error.

    DISCONNECTING FROM EFS.
```

Exhibit 8-10 System Error and Disconnecting Message

.01   IRS Front-end Processing Subsystem (FEPS) continued

The TP can only choose the "Change Password" menu item once during a session. If the TP chooses the "Change Password" menu item more than once, the message shown in Exhibit 8-11 is displayed immediately. If this happens three times in a session, the TP is disconnected; otherwise the Main Menu is redisplayed as previously shown in Exhibit 8-4.

Note: The TP will not go through the password prompts for this scenario.

```
     Can only choose Change Password once.
```

Exhibit 8-11 Change Password Once Message

Except in the case of a system error the Main Menu is displayed as previously shown in Exhibit 8-4 after the TP completes the change password process whether or not he/she was successful.

15. EXECUTING THE STATE RETURN MENU

The State TP chooses "Show State Return Menu" (available for State use only) to retrieve state return data, reset state return files, or to generate a "State Files to Download Report".

```
          MAIN MENU

     1) Logoff
     2) Receive/Send File(s)
     3) Change File Transfer Protocol [ZMODEM]
     4) Change Compression Method [NONE]
     5) Request Transmission Status Report
     6) Change Password
     7) Show State Return Menu (available for State use only)
     8) Reset Acknowledgment File(s)
     9) Change Shared Secrets

   Enter your choice:

Exhibit 9-18   State Files to Download Report Example

d. Receiving State Return Files

When the State TP chooses "Receive State Return File(s)" from the State
Return Menu and no state files are available to send to the State TP,
the message shown in Exhibit 9-19 is displayed followed by the State
Return Menu.

```
     No State Files to download.

          STATE RETURN MENU

          1) Return to MAIN MENU
          2) Reset State File
          3) Request State Files to Download Report
          4) Receive State Return File(s)

     Enter your choice:
```

Exhibit 9-19   No State Files to Download Message

If the State TP chooses "Receive State Return File(s)" three times in a row
and no state return files are available, the State TP is disconnected.

.01   IRS Front-end Processing Subsystem (FEPS) continued

When the State TP chooses "Receive State Return File(s)" from the State
Return Menu and there are State data files that have not been sent to the
State TP, they will be transmitted as separate files to the State TP. The
state files are transmitted to the State TP using the current default file
transfer protocol displayed on the Main Menu. The state return files sent
to the State TP will continue to be in GZIP compressed format. The
compression setting from the Main Menu is ignored for the transmission of
state return files. A message notifying the State TP that the state file(s)
transfer is about to begin is displayed. For Zmodem, Xmodem, or Ymodem, the
message in Exhibit 9-20 is displayed. For FTP, the message shown in 9-21 is
displayed. The state file transfer will begin after the appropriate notice.

```
    EFS ready for modem download.
```

Exhibit 9-20 Modem Download Notice

```
    Putting File(s) by FTP.
```

Exhibit 9-21 FTP "Putting File(s)" Download Notice

When the retrieval of state return data file(s) is successfully
completed, the message shown in Exhibit 9-22 is displayed before the
State TP is returned to the State Return Menu.

```
    STATE DATA TRANSMISSION COMPLETE
    Weekday Month Day  HH:MM:SS Time zone Year

        STATE RETURN MENU

        1) Return to MAIN MENU
        2) Reset State File
        3) Request State Files to Download Report
        4) Receive State Return File(s)

    Enter your choice:
```

Exhibit 9-22 State Data Transmission Complete Message

.01   IRS Front-end Processing Subsystem (FEPS) continued

If there are errors during the transmission of the last file,
or the State TP aborts the transmission, the communications line
is disconnected after the messages shown in Exhibit 9-23 are
displayed.

```
    STATE DATA TRANSMISSION ERRORS
    Weekday Month Day  HH:MM:SS Time zone Year

    DISCONNECTING FROM EFS.
```

16.   RESETTING ACKNOWLEDGMENT FILE(S)

This section describes how the TP can reset positive or negative
acknowledgments using either a GTX Key or an ACK File Reference Name.
After resetting the acknowledgment file(s), the TP can receive the
acknowledgment file(s) by choosing "Receive/Send File(s)" as described
in Section 5. To reset acknowledgment file(s), the TP chooses "Reset
Acknowledgment File(s)" as shown in Exhibit 10-1.

```
    MAIN MENU

    1) Logoff
    2) Receive/Send File(s)
    3) Change File Transfer Protocol [ZMODEM]
    4) Change Compression Method [NONE]
    5) Request Transmission Status Report
    6) Change Password
    7) Show State Return Menu (available for State use only)
    8) Reset Acknowledgment File(s)
    9) Change Shared Secrets

    Enter your choice:  8
```

Exhibit 10-1 Choosing "Reset Acknowledgment File(s)"

When the TP chooses the "Reset Acknowledgment File(s)" menu item from
the Main Menu, the Reset Acknowledgment File(s) Menu shown in
Exhibit 10-2 is displayed.

```
    RESET ACKNOWLEDGMENT FILE(S) MENU

    1) Return to MAIN MENU
    2) GTXKEY
    3) ACK File Reference Name

    Enter your choice:
```

Exhibit 10-2 Reset Acknowledgment File(s) Menu

.01   IRS Front-end Processing Subsystem (FEPS) continued

The TP can choose to reset an acknowledgment file by GTX Key or ACK
File Reference Name regardless of the submission file format type.
If the TP enters a character that is not one of the listed number
choices, then the invalid menu selection message, along with the
Reset Acknowledgment File(s) Menu, is displayed as shown in
Exhibit 10-3. If the TP fails to make a valid selection in three
attempts, the TP is disconnected.

```
     Invalid menu selection.  Try again.

         RESET ACKNOWLEDGMENT FILE(S) MENU

         1) Return to MAIN MENU
         2) GTXKEY
         3) ACK File Reference Name

      Enter your choice:
```

Exhibit 10-3   Invalid Menu Selection Message

When the TP chooses "GTXKEY" from the Reset Acknowledgment File(s)
Menu, the TP is asked to identify the acknowledgment file by entering
the GTXKEY as shown in Exhibit 10-4.

```
       Enter GTXKEY (SYYYYMMDDhhmmss.nnnn)
       or press Enter to return to RESET ACK MENU:
```

Exhibit 10-4   Prompt for GTXKEY

When the TP chooses "ACK File Reference Name" from the Reset
Acknowledgment File(s) Menu, the TP is asked to identify the
acknowledgment file by entering the ACK File Reference Name as shown
in Exhibit 10-5. |

```
           Enter ACK File Reference Name(MMDDnnnn)
           or press Enter to return to RESET ACK MENU:
```

Exhibit 10-5   Prompt for ACK File Reference Name

If the TP does not supply any data and just presses Enter to either of
the above two prompts, then the Reset Acknowledgment File(s) Menu is
redisplayed. If the TP supplies the ACK identification data and the
data is not in the correct format for the selected criteria, the
message as shown in Exhibit 10-6 along with the Reset Acknowledgment
File(s) Menu is displayed. The screen is not cleared before displaying
the error message and the menu, so the TP will be able to see what
he/she entered.

.01 **IRS Front-end Processing Subsystem (FEPS) continued**

```
          ACK identification data not in correct format.

      RESET ACKNOWLEDGMENT FILE(S) MENU

      1) Return to MAIN MENU
      2) GTXKEY
      3) ACK File Reference Name

   Enter your choice:
```

Exhibit 10-6 Incorrect Format Message

If the ACK identification data (GTXKEY or ACK File Reference Name) is correctly formatted but no information can be found, then the message as shown in Exhibit 10-7 along with the Reset Acknowledgment File(s) Menu is displayed. The screen is not cleared before displaying the error message and the menu, so the TP will be able to see what he/she entered.

```
              Requested ACK not found.
     Please contact the IRS e-Help Desk for assistance.

        RESET ACKNOWLEDGMENT FILE(S) MENU

        1) Return to MAIN MENU
        2) GTXKEY
        3) ACK File Reference Name

     Enter your choice:
```

Exhibit 10-7 Requested ACK Not Found Message

If the TP enters a valid GTXKEY or ACK File Reference Name, the acknowledgment is reset and the message as shown in Exhibit 10-8 along with the Reset Acknowledgment File(s) Menu is displayed. The screen is not cleared before displaying the message and the menu, so the TP will be able to see what he/she entered.

```
     Acknowledgment successfully reset.

        RESET ACKNOWLEDGMENT FILE(S) MENU

        1) Return to MAIN MENU
        2) GTXKEY
        3) ACK File Reference Name

     Enter your choice:
```

Exhibit 10-8 ACK Successfully Reset Message

.01   IRS Front-end Processing Subsystem (FEPS) continued

If the TP enters a GTXKEY or ACK File Reference Name for a file
that is not processed, the message as shown in Exhibit 10-9 along
with the Reset Acknowledgment File(s) Menu is displayed. The
screen is not cleared before displaying the error message and the
menu, so the TP will be able to see what he/she entered.

```
      Cannot reset Acknowledgment; file has not been processed yet.

          RESET ACKNOWLEDGMENT FILE(S) MENU

          1) Return to MAIN MENU
          2) GTXKEY
          3) ACK File Reference Name

      Enter your choice:
```

Exhibit 10-9 File Not Yet Processed Message

If a TP requests to reset an acknowledgment using the ACK File
Reference Name and multiple records are found (this might occur during
a disaster recovery situation), then the Acknowledgment is not reset
and the message as shown in Exhibit 10-10 along with the Reset
Acknowledgment File(s) menu is displayed. The screen is not cleared
before displaying the error message and the menu, so the TP will be
able to see what he/she entered.

```
      Cannot reset Acknowledgment; more than 1 Acknowledgment qualifies;
      use GTXKEY.

          RESET ACKNOWLEDGMENT FILE(S) MENU

          1) Return to MAIN MENU
          2) GTXKEY
          3) ACK File Reference Name

      Enter your choice:
```

Exhibit 10-10 Use GTXKEY Message

If the TP in three attempts fails to reset the acknowledgment by
entering incorrectly formatted ACK identification data, pressing
Enter without any ACK identification data, entering ACK identification
data that is not found, incorrectly formatted, or cannot be reset,
the TP is disconnected. If the TP chooses the Reset Acknowledgment
File(s) option from the Main Menu and then immediately chooses to
return to the Main Menu three times, the TP is disconnected.

.01   IRS Front-end Processing Subsystem (FEPS) continued

The TP can reset up to ten acknowledgments in a session. If the TP
attempts to reset an eleventh acknowledgment, the message as shown in
Exhibit 10-11 along with the MAIN Menu is displayed. If the TP
attempts to reset an eleventh acknowledgment three times, the TP is
disconnected.

```
  Only ten Acknowledgments can be reset in one session.

        MAIN MENU

        1) Logoff
        2) Receive/Send File(s)
        3) Change File Transfer Protocol [ZMODEM]
        4) Change Compression Method [NONE]
        5) Request Transmission Status Report
        6) Change Password
        7) Show State Return Menu (available for State use only)
        8) Reset Acknowledgment File(s)
        9) Change Shared Secrets

  Enter your choice:
```

Exhibit 10-11 Ten ACK File Limit Message

17.   Changing Shared Secrets

This section describes how the TP can change his/her Shared Secrets after
successfully logging on to the system. To change Shared Secrets, the TP
chooses "Change Shared Secrets" as shown in Exhibit 11-1.

```
        MAIN MENU

        1) Logoff
        2) Receive/Send File(s)
        3) Change File Transfer Protocol [ZMODEM]
        4) Change Compression Method [NONE]
        5) Request Transmission Status Report
        6) Change Password
        7) Show State Return Menu (available for State use only)
        8) Reset Acknowledgment File(s)
        9) Change Shared Secrets

  Enter your choice:  9
```

Exhibit 11-1 Choosing "Shared Secrets"

When the TP chooses the "Change Shared Secrets" menu item from the Main
Menu, the TP is prompted to enter the EFIN, zip code, phone number,
and secret phrase for the Shared Secrets. The TP is prompted to enter
the EFIN as shown in Exhibit 11-2.

```
  Enter your EFIN associated with this ETIN:
```

Exhibit 11-2 Shared Secret EFIN Prompt

SECTION 1 – DATA COMMUNICATION

.01   IRS Front-end Processing Subsystem (FEPS) continued

If the TP enters an EFIN that is not six digits, the message shown in
Exhibit 11-3 is displayed, and then the TP is prompted again as shown in
Exhibit 11-2 to enter his/her EFIN. If this is the third unsuccessful
attempt to enter a valid EFIN, the Main Menu is displayed as previously
shown in Exhibit 11-1.

```
   Invalid EFIN: must be 6 digits.
```

Exhibit 11-3 Invalid EFIN Message

After successfully entering the EFIN, the TP is prompted to enter his/her
zip code as shown in Exhibit 11-4.

```
   Enter your zip code:
```

Exhibit 11-4 Shared Secret Zip Code Prompt

If the TP enters a zip code that is not five digits, the message shown in
Exhibit 11-5 is displayed, and then the TP is prompted again as shown in
Exhibit 11-4 to enter his/her zip code. If this is the third unsuccessful
attempt to enter a zip code, the Main Menu is displayed as previously shown
in Exhibit 11-1.

```
   Invalid zip code: must be 5 digits.
```

Exhibit 11-5 Invalid Zip Code Message

After successfully entering the zip code, the TP is prompted to enter his/
her phone number as shown in Exhibit 11-6.

```
   Enter your phone number:
```

Exhibit 11-6 Shared Secret Phone Number Prompt

If the TP enters a phone number that is not ten digits, the message shown
in Exhibit 11-7 is displayed, and then the TP is prompted again as shown
in Exhibit 11-6 to enter his/her phone number. If this is the third
unsuccessful attempt to enter a phone number, the Main Menu is displayed
as previously shown in Exhibit 11-1.

```
   Invalid phone number: must be 10 digits.
```

Exhibit 11-7 Invalid Phone Number Message

.01   IRS Front-end Processing Subsystem (FEPS) continued

After successfully entering the phone number, the TP is prompted to enter his/her secret phrase and to confirm his/her secret phrase by re-entering it as shown in Exhibit 11-8. (Note: Not only are the initial secret phrase and the re-entered secret phrase not displayed, there is no indication of how many characters are typed by the TP.)

```
   Enter your secret phrase:
   Re-enter your secret phrase:
```

Exhibit 11-8 Shared Secret Phrase Prompt

If the TP does not enter the same secret phrase in response to the "Enter your secret phrase" and "Re-enter your secret phrase" prompts, then the message shown in Exhibit 11-9 is displayed. The TP is prompted again as shown in Exhibit 11-8 to enter his/her secret phrase.

```
   Secret phrases don't match.
```

Exhibit 11-9 Unmatched Secret Phrase Message

If the TP enters a secret phrase that does not meet the format requirements, the message shown in Exhibit 11-10 is displayed, and then the TP is prompted again as shown in Exhibit 11-8 to enter his/her secret phrase. (Note: The secret phrase must be 1 to 20 characters long. It may contain alphanumeric characters plus the special characters listed in Appendix G. It may not contain spaces. The secret phrase is not case sensitive.)

```
 Invalid secret phrase: must be 1-20 alphanumeric/special chars; no spaces.
```

Exhibit 11-10 Invalid Secret Phrase Message

If this is the third unsuccessful attempt to enter the secret phrase, the Main Menu is displayed as previously shown in Exhibit 11-1. If the TP's responses meet the rules for Shared Secrets, the Shared Secrets are changed and the message shown in Exhibit 11-11 is displayed. The Main Menu is then redisplayed as shown in Exhibit 11-1.

```
   Registration of Shared Secrets Successful.
```

Exhibit 11-11 Shared Secrets Successfully Changed Message

If the TP has concurrent sessions, only one session can change the Shared Secrets. If the TP attempts to change Shared Secrets in a second session, while the first session is actively changing the Shared Secrets, the message shown in Exhibit 11-12 is displayed and then the Main Menu is displayed as previously shown in Exhibit 11-1.

```
 Shared Secrets not changed. Another session is trying to change them.
```

Exhibit 11-12 Another Login Session Changing Shared Secrets Message

.01   IRS Front-end Processing Subsystem (FEPS) continued

If a system error occurs during the changing of Shared Secrets, the Shared Secrets may or may not be changed. The messages shown in Exhibit 11-13 are displayed and the TP's session is terminated. The TP should choose "Change Shared Secrets" from the Main Menu on his/her next log on and re-enter the Shared Secrets.

System error.

DISCONNECTING FROM EFS.

Exhibit 11-13 System Error Message

The TP can only choose the "Change Shared Secrets" menu item once during a session. If the TP chooses the "Change Shared Secrets" menu item more than once, the message shown in Exhibit 11-14 is displayed immediately. If the TP chooses the "Change Shared Secrets" menu item three times in a session, the TP is disconnected; otherwise the Main Menu is redisplayed as previously shown in Exhibit 11-1.   (Note: The TP will not go through the Shared Secrets prompts for this scenario.)

Can only choose Change Shared Secrets once.

Exhibit 11-14 Change Shared Secrets Once Message

Except in the cases of a system error or the TP selecting the "Change Shared Secrets" menu item three times, the Main Menu is displayed as previously shown in Exhibit 11-1 after the TP completes the change Shared Secrets process whether or not he/she was successful.

.01   IRS Front-end Processing Subsystem (FEPS) continued

18. LOGGING OFF THE SYSTEM

To end his/her session, TP chooses "Logoff" from the Main Menu
Exhibit 12-1.

```
            MAIN MENU

       1) Logoff
       2) Receive/Send File(s)
       3) Change File Transfer Protocol [FTP]
       4) Change Compression Method [GZIP]
       5) Request Transmission Status Report
       6) Change Password
       7) Show State Return Menu (available for State use
          only)
       8) Reset Acknowledgment File(s)
       9) Change Shared Secrets
      10) Enter your choice:  1
```

Exhibit 12-1 Choosing Logoff

The TP Interface software performs any necessary cleanup activities,
records statistical information, and then displays the message shown
in Exhibit 12-2. The TP should not hang up before receiving the
disconnect message. If he/she does hang up prematurely, EMS may not
complete its cleanup activities. This could result in the TP receiving
his/her acknowledgment files again in the next login session or having
the submission file discarded.

```
       DISCONNECTING FROM EFS.
```

Exhibit 13-1 TP Session to Pick Up Acknowledgments and Transmit
a Tax Return File

APPENDIX A

GTX Key and Acknowledgment File Name Formats

APPENDIX A

GTX KEY AND ACKNOWLEDGMENT FILE NAME FORMATS

The format of the GTX Key is SYYYYMMDDhhmmss.xxxx where S is the processing site identifier, YYYY=year, MM=month, DD=day, hh=hour, mm=minutes, ss=seconds, and xxxx=milliseconds. The GTX Key identifies the system (site identifier) that received the transmission and that will provide the transmission's acknowledgment. The site identifiers are:

   D Test system at Enterprise Computing Center at Memphis, TN (ECC-MEM)
   E Test system at Enterprise Computing Center at Martinsburg, WV (ECC-MTB)
   T Production system at ECC-MEM
   U Production system at ECC-MTB

When the Individual Master File (IMF) Participants Acceptance Testing (PATS) begins, the assigned site identifier will either be 'D' or 'E' for test transmissions. When Production filing begins, the assigned site identifier will either be 'T' or 'U' for production transmissions.

The format of the ACK File Reference Name is MMDDnnnn where MM month and DD day match the GTX Key. The nnnn number is a 4-digit sequence number generated by the EMS. The ACK File Reference Name is used to generate the acknowledgment file name.

The acknowledgment file can be positive or negative. If the acknowledgment filename ends with ".NAK", then the EMS detected an error in the file submitted by the TP and processing of the file was discontinued.

Based on the TP compression settings, the EMS acknowledgment files will be named as described in Exhibit A-1. Any version of PKZIP or WINZIP that supports the PKZIP 2.04g file format, will successfully decompress ACK files compressed with GZIP or COMPRESS. (Also see the Note on page 25 after Exhibit 4-10.)

Form and Format	ACK File Name (Note 1)	ACK File Name w/ Gzip (Note 2)	ACK File Name w/ Compress (Note 3)
94X – XML			
EMS Error Acknowledgment	MMDDnnnn.NAK	MMDDnnnn.GZ	MMDDnnnn.Z
94X XML System Acknowledgment	MMDDnnnn.ACK	MMDDnnnn.GZ	MMDDnnnn.Z
1065, 112x and 99x Families (XML)			
EMS Error Acknowledgment	MMDDnnnn.NAK	MMDDnnnn.GZ	MMDDnnnn.Z
MeF Acknowledgment	MMDDnnnn.ACK	MMDDnnnn.GZ	MMDDnnnn.Z
1040/1041 Proprietary (TRANA/TRANB/RECAP			
EMS Error Acknowledgment	MMDDnnnn.NAK	MMDDnnnn.GZ	MMDDnnnn.Z
Unisys Acknowledgment	MMDDnnnn.ACK	MMDDnnnn.GZ	MMDDnnnn.Z
XML PIN Registration			
EMS Communications Error Acknowledgment	MMDDnnnn.NAK	MMDDnnnn.GZ	MMDDnnnn.Z
EMS PIN Registration Acknowledgment	MMDDnnnn.ACK	MMDDnnnn.GZ	MMDDnnnn.Z
State ACK Transmission			
EMS Error Acknowledgment	MMDDnnnn.NAK	MMDDnnnn.GZ	MMDDnnnn.Z
EMS Acceptance Acknowledgment	MMDDnnnn.ACK	MMDDnnnn.GZ	MMDDnnnn.Z
State ACK for Trading Partner	MMDDnnnn.Sss (Note 4)	MMDDnnnn.GZ	MMDDnnnn.Z

Exhibit A-1 Ack File Names

APPENDIX A

GTX Key and Acknowledgment File Name Formats continued

Note 1:   MM = month
          DD   = day
          nnnn = 4 digit sequence number

          MMDD is taken from the GTX Key
          nnnn is a 4-digit sequence number generated by the EMS at
          the time the TP submitted his/her file.

Note 2:   GZIP preserves the uncompressed ACK file name (e.g., MMDDnnnn.ACK)
          in its archive.

Note 3:   Compress does not preserve the uncompressed ACK file name.

          If a TP submits a file that is given the GTX Key "U20101020154710.0800",
          the first four digits of the ACK File Reference Name would be "1020". The
          next four digits would be a sequence number generated by the EMS, e.g.,
          "0001".   The ACK File Reference Name would then be "10200001".   An EMS
          error acknowledgment file would be named "10200001.NAK".   An
          acknowledgment from the Unisys system would be named "10200001.ACK".   If
          the acknowledgment file is compressed with gzip it will be named
          "10200001.GZ".   If the acknowledgment file is compressed with Unix
          compress it will be named "10200001.Z".

Note 4:   For State Ack files that are redirected to a TP ETIN, the ack file
          will have the file extension "Sss" where "ss" is the standard postal
          abbreviation published in IRS Publication 1346 "Standard Postal
          Service State Abbreviations and Zip Codes." For example, the file
          extension "SMD" will be used for an ack file from the state of
          Maryland. If the State Ack file contains a code that does not appear
          in Pub 1346, then "ss" will be replaced with "XX". In this case, the
          file extension would be "SXX".

Note 5:   The acknowledgment file names shown in this appendix use upper case
          letters. These are the names as they appear on EMS. Some file transfer
          protocols and/or some operating systems may translate the names into lower
          case.

APPENDIX B
XML Error Acknowledgment Format

APPENDIX B

**XML ERROR ACKNOWLEDGMENT FORMAT
FOR DETECTED VIRUSES**

EMS checks all incoming files for viruses. If a virus is detected, EMS returns an error acknowledgment to the TP in XML format. If EMS detects a virus, the TP is placed in suspended status. Should this occur, the TP must contact the IRS e‑Help Desk to request removal of the suspended status.

Below is the format for the error acknowledgment that is returned to the TP when a virus is detected in the transmission. All TPs receive the XML format acknowledgment, even if the transmission was sent using a different IRS approved format. Note that the second line of the file, the Content-Description contains a plain English description of the problem; therefore, an understanding of XML is not required to interpret the message. The shaded areas contain the GTX key, a timestamp, and the virus name. These values vary for each returned acknowledgment. The remainder of the message is constant.

```
MIME-Version: 1.0
Content-Description: Notification that transmission file T200303211345.0100 was
rejected because it contained a virus
Content-Type: text/xml; charset=UTF-8

<?xml version="1.0" encoding="UTF-8"?>

       </Errors>
       <GTXKey>T200303211345.0100</GTXKey>
</TransmissionAcknowledgement>
```

APPENDIX B

XML ERROR ACKNOWLEDGMENT FORMAT FOR
DETECTED XML THREATS

     EMS checks incoming XML files for XML threats. If an XML threat is detected, EMS returns an error acknowledgment to the TP in XML format. The error acknowledgment contains a description of the XML threat. For certain detected threats, the TP is suspended. Should this occur, it will be reflected in the error acknowledgment and the TP must contact the IRS e-Help Desk to request removal of the suspended status.

     Two examples follow showing the format for the error acknowledgments that are returned to the TP when an XML threat is detected in the transmission. The first example is an error acknowledgment when the TP is not suspended and the second example is an error acknowledgment when the TP is suspended. Note that the second line of the file, the Content-Description, contains a plain English description of the problem; therefore, an understanding of XML is not required to interpret the message. The shaded areas contain the GTX Key, a timestamp, and the XML threat. These values vary for each returned acknowledgment. The remainder of the message is constant.

Detected XML Threat – TP is not suspended

        </Errors>
        <GTXKey>T200303211345.0100</GTXKey>
</TransmissionAcknowledgement>
```

APPENDIX B

XML ERROR ACKNOWLEDGMENT FORMAT
FOR DECOMPRESSION FAILURES

     If the TP has established a profile that uses one of the supported compression methods, then EMS will decompress the file before processing it. If there is a problem and the file fails to decompress, then the TP will receive the error acknowledgment shown below. All TPs receive the XML format acknowledgment, even if the transmission was sent using a different IRS approved format. Note that the second line of the file, the Content-Description contains a plain English description of the problem; therefore, an understanding of XML is not required to interpret the message. The shaded areas contain the GTX key and a timestamp. These values vary for each returned acknowledgment. The remainder of the message is constant.

```
MIME-Version: 1.0
Content-Description: Notification that transmission file T200303211345.0100 was
rejected because it failed to decompress
Content-Type: text/xml; charset=UTF-8

<?xml version="1.0" encoding="UTF-8"?>
<TransmissionAcknowledgement>
       <AcknowledgementTimestamp>2003-12-13T12:05:22-05:00</AcknowledgementTimestamp>
       <TransmissionStatus>R</TransmissionStatus>
       <Errors errorCount="1">
              <Error errorId="1">
                     <ErrorCategory>Unsupported</ErrorCategory>
                     <ErrorMessage>EMS received your file, but could not process
                     it.  Please check your file and re-transmit.</ErrorMessage>
                     <RuleNumber>T0000-010</RuleNumber>
                     <Severity>Reject and Stop</Severity>
              </Error>
       </Errors>
       <GTXKey> T200303211345.0100</GTXKey>
</TransmissionAcknowledgement>
```

XML ERROR ACKNOWLEDGMENT FORMAT FOR INVALID FILE FORMATS

     EMS will not process Forms 94x return transmissions that are in the EDI and Proprietary (MGT) formats. If the TP submits a file that EMS cannot recognize as IRS proprietary, combined state ACK or XML format, the following XML error acknowledgment is generated. All TPs receive the XML format acknowledgment. Note that the second line of the file, the Content-Description, contains a plain English description of the problem; therefore, an understanding of XML is not required to interpret the message. The shaded areas contain the GTX Key and a timestamp. These values vary for each returned acknowledgment. The remainder of the message is constant.

```
MIME-Version: 1.0
Content-Description: Notification that transmission file T200303211345.0100 was rejected
because it is not in acceptable format
Content-Type: text/xml; charset=UTF-8

<?xml version="1.0" encoding="UTF-8"?>
<TransmissionAcknowledgement>
        <AcknowledgementTimestamp>2003-12-13T12:05:22-05:00</AcknowledgementTimestamp>
        <TransmissionStatus>R</TransmissionStatus>
        <Errors errorCount="1">
                <Error errorId="1">
                        <ErrorCategory>Unsupported</ErrorCategory>
                        <ErrorMessage>Transmission file not in acceptable
                         format</ErrorMessage>
                        <RuleNumber>T0000-500</RuleNumber>
                        <Severity>Reject and Stop</Severity>
                </Error>
        </Errors>
        <GTXKey>T200303211345.0100</GTXKey>
</TransmissionAcknowledgement>
```

XML ERROR ACKNOWLEDGMENT FORMAT FOR FORMAT NOT VALID FOR TRANSMITTER

      If the TP submits a file in an EMS-recognized format but the TP is not registered to send forms in the submitted format, the following XML error acknowledgment is generated. All TPs receive the XML format acknowledgment. Note that the second line of the file, the Content-Description, contains a plain English description of the problem; therefore, an understanding of XML is not required to interpret the message. The shaded areas contain the format of the submitted file, the GTX Key and a timestamp. These values vary for each returned acknowledgment. "<format>" is replaced by either "Proprietary" or "XML". The remainder of the message is constant.

```
MIME-Version: 1.0
Content-Description: Notification that transmission file XYYYYMMDDHHSS.NNNN was rejected
because <format> format not valid for transmitter
Content-Type: text/xml; charset=UTF-8

<?xml version="1.0" encoding="UTF-8"?>
<TransmissionAcknowledgement>

        <TransmissionStatus>R</TransmissionStatus>
        <Errors errorCount="1">
                <Error errorId="1">
                        <ErrorCategory>Unsupported</ErrorCategory>
                        <ErrorMessage> Transmission file in <format> format not
                         valid for transmitter</ErrorMessage>
                        <RuleNumber>T0000-501</RuleNumber>
                        <Severity>Reject and Stop</Severity>
                </Error>
        </Errors>
        <GTXKey>XYYYYMMDDHHMMSS.NNNN</GTXKey>
</TransmissionAcknowledgement>
```

APPENDIX C

EMS Communications and Encryption

APPENDIX C

TABLE OF CONTENTS

EMS COMMUNICATIONS AND ENCRYPTION

EMS can accept tax returns and tax documents via a non-Web-based Internet solution or via dedicated leased lines as described below. Since December 2005, IRS-provided analog and ISDN lines were removed. However, it may be possible for a TP to use ISDN if he/she provides his/her own equipment.

C.1   Internet Service

To use the Internet service, a TP accesses EMS via his/her own Internet Service Provider (ISP) and does not need to have a static IP address. **However, the TP must use Secure Socket Layer (SSL) with Telnet/S layered on top of it.** His/her Telnet/SSL software must conform to the relevant standards:

> **RFC 854 – Telnet Protocol Specification**
> **SSL 3.0 Specification (http://wp.netscape.com/eng/ssl3)**
> **TLS 1.0 Specifications (http://www.ietf.org/rfc/rfc2246.txt)**

The TP can use one of the following encryption standards, listed in order of priority, using SSL and Telnet/S:

> AES 256-bit (FIPS-197)
> AES 128-bit (FIPS-197)
> TDES 168-bit (FIPS-197)
> RC4 128-bit

When the TP connects over the Internet, the IRS system will automatically negotiate the encryption standard so that the highest prioritized standard that is available is used.

The Telnet/SSL traffic must be transmitted to EMS on **Transmission Control** Protocol (TCP) Port 992. The TP may need to configure his/her firewall(s) to allow this traffic to pass through. **This has been the most common cause of failure to connect to EMS through the Internet.** For security reasons, most businesses routinely block traffic on ports not commonly used for security reasons. The TP connects to EMS using one of the following fully qualified Domain Name Service (DNS) names.

> **efileA.ems.irs.gov efileB.ems.irs.gov efileC.ems.irs.gov efileD.ems.irs.gov**

The EMS URL Chart with specific returns and dates, and the processing schedules for draining the test and production transmissions for processing are found on www.irs.gov.

If the TP's software allows him/her to establish concurrent sessions to the same computing center, the TP may submit files over multiple concurrent sessions. However, only one session can retrieve acknowledgment files. TPs should note that FTP is not available as a file transfer protocol when using the Internet service.

EMS Communications and Encryption continued

Configuring Terminal Emulation Software

A TP may need to provide the following information when he/she is configuring their terminal emulation software.

- **Terminal Name**. Should be something meaningful to the TP. This information is not transmitted to EMS.
- **Terminal Type**. Select a member of the Virtual Terminal (VT) family (e.g., VT100 or VT220).
- **SSL Version**. SSL3. In many terminal emulation packages this is a pull-down menu beside the Destination or Host Name and is not labeled. TLS-1 defaults since it is the latest SSL version but SSL-3 must be chosen.
- **Port 992**. This port number is often filled in automatically by the terminal emulation software if Telnet/SSL is chosen.
- **Destination or Host Name**. One of the fully qualified names listed previously.
- **Destination Host Type**. Unix.
- **User Certificate Mode**. No user certificate is required. However, EMS accepts any certificate from the TP. If the TP wants to send a certificate it can be self-generated.
- **Host Certificate**. EMS sends an Entrust certificate, which the terminal emulation software must accept.
- **Certificate Viewing**. If the TP wants to see the certificates being exchanged and the terminal emulation software supports certificate viewing, then this feature should be turned on.
- **Operating System (OS)**. If your terminal emulation software asks for an OS, it is asking about the Trading Partner's system, not the EMS system. Enter the local system parameters upon which the terminal emulation software will be running.
- **Data Characters**. Please specify eight bit data characters if your terminal emulation software does not default to it.

The IRS has tested several terminal emulation software packages supporting Telnet-SSL Many commercial and open-source packages can also be used as long as they support the Telnet specification RFC 854 and the SSL 3.0 specification. TPs are encouraged to research and evaluate different terminal emulation software packages, which can often be evaluated for free, to verify the connectivity parameters outlined above. **Additional guidance is given in C.3 and C.4**

APPENDIX C

EMS Communications and Encryption continued

C.2   Dedicated/Leased Line Service

Use of dedicated/leased line services requires authorization from the IRS. Please contact **Yudeckia L. Brothers at 202-283-0245, email Yudeckia.L.Brothers@irs.gov.**

All dedicated lines must be encrypted using at least 128-bit encryption provided by a Federal Information Processing Standards (FIPS) approved method. A TP, using the dedicated/leased line service, is responsible for choosing, procuring, and installing his/her cryptographic solution. To determine if a cryptographic solution meets FIPS standards obtain the "NIST Validation List Certification Number and Date" from the solution provider. This information can be verified by checking the **National Institute of Standards and Technology (**NIST**)** website at http://csrc.nist.gov/cryptval/. There are validation lists for each major FIPS Cryptographic Standard. Each list has a sequence number, and lists the manufacturer /supplier, date of validation, name of the implementation, its operational environment, and a further description of other characteristics. Dedicated/leased line filers must be FIPS 140-x compliant and must send to the IRS annually a NIST certificate for the device they use, which would use Advanced Encryption Standard (AES) or Triple Data Encryption Standard (TDES).

The IRS recommends the use of Internet Protocol Security (IPsec) as the cryptographic solution for the dedicated/leased line service.

The following paragraphs describe the hardware and software necessary to use the digital communication service.

C.2.1   Dedicated/Leased Lines

For a TP to connect over a dedicated line he/she must purchase the circuit. Once the TP's request for **dedicated/leased line** service is approved, the IRS provides him/her with IP addressing and routing information.

C.2.2   Communication Services

Connection to the EMS system using the digital communications services provides the TP with a Transmission Control Protocol/Internet Protocol (TCP/IP) interface. To use this service the TP must have the following:

- A system that supports the TCP/IP protocols.

- The ability to make a Telnet connection from his/her system to an EMS host.

- If the TP plans on using Secure File Transfer Protocol (FTP) for data transfer, his/her system must support an FTP server and have the ability to accept an FTP connection from the EMS. The TP must supply a user logon and password for the EMS system to use when connecting to his/her FTP server.

- A pair of routers capable of supporting communication over the digital circuit procured by the TP.

EMS Communications and Encryption continued

Once the TP establishes a connection using EMS dedicated/leased line services the following capabilities are available.

- Connecting over a TCP/IP link allows a TP to connect to any host available to him/her at the computing center.

- Backup protection. EMS systems have a fail over capability and if there is a system failure a backup system becomes available. However, TPs may need to reconfigure their routers and their communication servers if they have not initially configured them to communicate with the backup system as well as the primary system.

- Transfer of data using FTP. If a TP has a host system that supports FTP, he/she may use this as a protocol to send and receive files to the EMS system. For TPs using this transfer method the only configuration needed is to setup a user account for EMS to use and directories for EMS to use to "get" return files and "put" acknowledgment files. EMS transmits one file for each acknowledgment file available for processing. The file transfers are binary and the "#" hash mark is displayed for every 1,024 bytes of data transferred.

- File transfers over Telnet. If a TP uses TCP/IP to connect to the EMS system, his/her logon to the system is through Telnet. If the TP does not want to use FTP to transfer files, he/she may use another file transfer protocol such as Zmodem over the Telnet session. This capability is currently available in many of the Telnet application programs. The file transfer rate of Zmodem over a Telnet session is not as fast as FTP. See Sections C.3 and C.4 for more details.

- One final aspect of a TCP/IP connection to the EMS is that TCP/IP supports multiple simultaneous connections to the same host or multiple hosts. A TP may submit files over multiple concurrent sessions. However, only one session per host can retrieve acknowledgment files.

C.3   Telnet Options

If the TP uses Zmodem, Xmodem-1K, or Ymodem-batch to transfer files over the Telnet session, to be successful the TP's Telnet program must support connections that allow all eight bits of the data to pass through. This is often accomplished on the Telnet command line as "telnet –8 host". If the TP uses the "telnet -8" method, the screen display may appear distorted and after typing in the TP identification information the systems appears to be hung. If this occurs the TP should terminate his/her responses with a Line-Feed Character. On a standard keyboard, pressing the Control Key and the "j" generates this character. As an alternative to the "telnet -8" option, the TP may set binary mode before beginning a file transfer and unset binary mode upon completion of the transfer.

Most versions of Telnet have a sequence of characters (called an Escape Sequence) that, when encountered by the Telnet program, interrupts the Telnet session. Unless hidden by the TPs terminal emulation software, the TP normally sees a message displaying the Escape Sequence when the Telnet connection is first started. Although it is possible for the TP to have a successful session when an Escape Sequence exists, at some point a file transfer may abort based on its size or the data in the file.   For this reason it is recommended that the Escape Sequence be disabled, if possible. The TP should check his/her Telnet documentation to determine how to do this.

APPENDIX C

EMS Communications and Encryption continued

C.4   Zmodem Options

The most common file transfer software used over the Telnet Session is Zmodem. The package consists of the "sz" command for sending files and the "rz" command for receiving files. As with the Telnet session options described in Section C.3, there are options that may need to be invoked to achieve a successful file transfer. In addition, it is important to note that these options are not necessarily mutually exclusive from the Telnet options. It may be that having a specific Zmodem option set might mean that a Telnet option does not need to be invoked. It is recommended that TPs explore the Zmodem options first. These options are available if the TP is experiencing problems:

- **Zmodem Escape Control Characters**. This option, usually "-e", will have Zmodem watch for control characters and modify them so that they pass through undetected as control characters. The option is sometimes available on both the "sz" and "rz" commands. Other versions have the -e option available only on the "rz".

- **Zmodem Binary**. This is another option available on some versions of Zmodem. The TP should check his/her documentation for any option that attempts to make the link transparent to control character sequences.

- **Zmodem Timeout Values**. Within Zmodem there are options for how long to wait for an expected packet of data. The default is normally 10 seconds. In most cases this value should be acceptable. However, the TP should never set these values to wait forever.

- **Zmodem buffer timeout**. There may be times when the timeout values may need to be changed. This can occur with TPs, whose connection to their ISP is through a dial-up line. Because of the buffering ability of telecommunications equipment and the amount of communications equipment usually in place for an Internet connection, the amount of data that can be stored could cause an error. This can happen if a file that is to be transmitted is approximately the same size as one of the buffers present in the data link. The sending program will have completed the streaming of all the data in the file but the receiving side may not have gotten any data yet. If the sending side has its receive packet timeout set too low, it may timeout before the receiver can receive and transmit the packet.

- **Zmodem sliding window**. If this option is not enabled, the sender transmits all of a file without waiting for an acknowledgment. This results in a faster file transfer. However, some of the intermediate communications equipment may store data while it is transferred to the receiver. Sometimes this causes the sender to "get ahead" of the receiver. In this case, the TP may need to enable the sliding window option. This results in intermediate acknowledgments and a slower file transfer. The smaller the value of the sliding window setting the slower the file transfer.

- **Zmodem Debugging**. When testing the TP's Internet connectivity, the TP should become familiar with the debug capabilities of his/her Zmodem software. If the TP experiences problems with the transfer of data, generating a debug file could assist the TP and IRS system support personnel in determining the nature of the problem.

- **Crash Recovery**. EMS does not retain partial files. Therefore, if a transmission to EMS is interrupted, the TP must retransmit from the beginning of the file. For acknowledgment files and state return files, EMS can resume the transmission from where the interruption occurred in the transmission if the TP's software supports it.

APPENDIX D

Examples of Transmission Status Reports
(Browser and Text Displays)

APPENDIX D

EXAMPLES OF TRANSMISSION STATUS REPORTS

This section shows the following examples of a Transmission Status Report:

- Exhibit D-1 Browser View of State Transmission Report (When No Data is Available)
- Exhibit D-2 Text View of State Transmission Report (When No Data is Available)
- Exhibit D-3 Browser View of State Transmission Report
- Exhibit D-4 Text View of State Transmission Report
- Exhibit D-5 Excel Spreadsheet View of State Transmission Report
- Exhibit D-6 Browser View of TP Transmission Report

The Transmission Status Report is returned to the TP within a file that is suitable for display with a Web browser. The file can also be imported into newer versions of Excel as an Excel spreadsheet. The file name is MMDDhhmm_rpt.html where MM=month, DD=day, hh=hour, and mm=minute. If the TP had previously requested Unix file compression, the file name would be MMDDhhmm_rpt.html.Z. If the TP has previously selected GZIP compression, the file name would be MMDDhhmm_rpt.html.GZ. Some file transfer protocols or operating systems may translate the "Z" or "GZ" to lowercase "z" or "gz." The ACK Reference File Name column on the State and TP Transmission Reports corresponds to the uncompressed ACK File Name described in Appendix A.

ECC-MEM State Transmission Report for ETIN: 05003 **2004-03-02 00:00 – 2004-06-10 11:33**							
Transmission File Name	**TP ETIN**	**TP ACK File Name**	**ACK Reference File Name**	**Transmission Status**	**Test/ Production**	**Status Date**	**Status Time**
No data available for reporting period							

Exhibit D-1   Browser View of State Transmission Report (When No Data is Available)

TRANSMISSION STATUS DEFINITIONS

State Transmission Report

Waiting State Delivery	The acknowledgment for a State Transmission is available for the state to pick up.
Received by State	The acknowledgment for a State Transmission has been received by the state.
In Progress	The State Transmission file was received by EMS and is being processed.
Waiting TP Delivery	The acknowledgment is available for the TP to pick up.
Received by TP	The acknowledgment has been received by the TP.

TRANSMISSION STATUS DEFINITIONS

TP Transmission Status Report

Waiting TP Delivery	The acknowledgment is available for the TP to pick up.
Received by TP	The acknowledgment has been received by the TP.
In Progress	EMS has received and is processing the file.

APPENDIX E

Guidelines for Trading Partners Using EMS

APPENDIX E

GUIDELINES FOR TRADING PARTNERS USING EMS

While the following information is provided primarily for those who use scripts to control interaction with EMS, it is also useful for individuals who login and conduct their sessions "manually."

1. Use ***pattern matching, not timers,*** to control the flow of scripts. Scripts should be able to handle all messages and prompts from EMS, not just the main "retrieve acknowledgment" and "submit a file" paths. See Appendix F for an example of a script that is entirely controlled by simple pattern-matching.

2. If it is absolutely necessary to use a timer when waiting for a message or prompt, then the timer value should not be less than 100 seconds. EMS always sends a response within 100 seconds (worst case) after the last user-interaction (EMS prompt or user response). The timer in the script should function only as a "fail-safe" device in case of unanticipated system behavior.

3. Log off using the "Logoff" menu option on the main menu, instead of simply hanging up. Do not hang up until the "DISCONNECTING FROM EFS" message has been received. This is true for both scripted and human interaction with EMS.

4. When a message is received indicating that EMS is unavailable, don't try again immediately. Wait at least 10 minutes.

5. Do not login repeatedly when there is no work to do (i.e., no files to submit or acknowledgments to pick up). In most cases, EMS provides a negative acknowledgment within 10 minutes of submission if the file is not accepted for further processing. If EMS has not provided a negative acknowledgment within 35 minutes, the file, except in rare circumstances, has been forwarded to the appropriate tax-return-processing system. For 94X files, which are forwarded immediately to the tax-return-processing system, acknowledgements are available shortly after that system has processed each file. For files that are batched and "drained" at published times, acknowledgments from the tax-return-processing system will not be available for hours.

6. If a TP has multiple concurrent sessions at the same physical site using the same Login ID, only one session will retrieve acknowledgments.

APPENDIX F

Example Script to Pick Up Acks and Send a File

APPENDIX F

EXAMPLE SCRIPT TO PICK UP ACKS AND SEND A FILE

The following example is meant to illustrate how a script can communicate with EMS using only pattern-matching to control logic flow. The example is for reference only, and is not intended for actual use by trading partners.

This particular script is written in "expect", designed for a Unix operating system, and takes advantage of expect's ability to specify a set of strings and events to be watched for if there is a failure to match the string that is anticipated. It also assumes that files are to be sent and received using the FTP protocol. A script that instead used the Zmodem protocol, for example, would differ noticeably in those parts of the script that accomplish the actual sending and receiving of files.

Most "expect" commands and syntax appearing in the script are reasonably intuitive, at least for the limited purposes of illustration for which this script is intended. But it is worth mentioning that the command "send" directs output to the telnet session, while the command "send_user" directs output to "standard output", which is assumed to be directed to a local log file. Lines beginning with "#" are comments.

```
#!/opt/sfw/bin/expect  -f $1 $2 $3 $4 $5 $6

#Assign command-line parameters to local variables for convenience.
set log_id  [lrange $argv 0 0]
set passwd  [lrange $argv 1 1]
set hostid  [lrange $argv 2 2]
set retfil  [lrange $argv 3 3]
set prtocl  [lrange $argv 4 4]
set compid  [lrange $argv 5 5]

# Slow down "typing" of replies to allow for modem turnaround delays.
set send_slow {1 .1}

# Start a C-shell in which to run telnet
spawn /usr/bin/csh

# Specify set of "secondary" strings/events to be watched for if anticipated match
fails.
# These messages and events could occur at any time during processing.
#   message: "EFS is down"
#   message: "DISCONNECTING FROM EFS"
#   event:   eof (telnet session was terminated for any reason, e.g., EMS
disconnects)
expect_after {

-exact "    EFS is busy. Wait at least 10 minutes, then retry." {
        send_user "got the EFS BUSY message (abort) \n"
        exit }

-exact "    EFS is currently unavailable.  Additional information may be available
on IRS quick alerts. " {
        send_user "got the EFS UNAVAILABLE message (abort) \n"
        exit }

-exact "EFS DISCONNECTINg FROM EFS" {
        send_user "got the DISCONNECTING message (abort) \n"
        exit }

    eof   {
        send_user "tp_client disconnected (abort) \n"
        exit }
```

EXAMPLE SCRIPT TO PICK UP ACKS AND SEND A FILE continued

```
}

# When C-shell prompt appears,
#   Start a telnet session to the designated computer (hostid)
#   Exit the C-shell when the telnet session exits (even if that
#   occurs before the script runs to completion)
expect -exact "% "
sleep .1
send -s -- "telnet $hostid; exit\r"

# When login prompt from EMS is received, send username (log_id).
expect -exact "login: "
sleep .2
send -s -- "$log_id\r"

#When password prompt from EMS is received, send password (passwd)

```

EXAMPLE SCRIPT TO PICK UP ACKS AND SEND A FILE continued

```
#If there are acks to pick up, EMS will prompt for the TP to receive them.
#If not, or after they have been picked up, EMS will prompt to allow sending a
file.
#The logic below handles both possibilities.
#If there are files to pick up, the logic responds "y" to receive them.
#After they are received, it responds "y" to the prompt for sending a file,
#then responds with the local filename to be sent, because this script assumes
#that the FTP protocol is being used.
#If there are not any files to pick up, the logic responds "y" to the prompt for
sending #a file, then responds with the local filename to be sent, because this
script assumes
#that the FTP protocol is being used.
expect {
-exact "    Are you ready to receive files? Y/\[N\]: " {
                sleep .2
                send -s -- "y\r"
                expect -exact "    Do you want to send a file? Y/\[N\]: "
                sleep .2

APPENDIX G

EMS Password Rules

APPENDIX G

EMS Password Rules

A trading partner's password must conform to the following rules.

1. Passwords must be 8 characters long.

2. Passwords must contain:

   a. at least one uppercase alphabetic character,
   b. at least one lowercase alphabetic character and
   c. at least one numeric or special character.

3. Allowable special characters are:

Exclamation Point	!	Less Than Sign	<
Pound Sign	#	Equal Sign	=
Dollar Sign	$	Greater Than Sign	>
Percent Sign	%	Question Mark	?
Ampersand	&	At Sign	@
Left Parenthesis	(	Left Square Bracket	[
Right Parenthesis	)	Right Square Bracket	}
Asterisk	*	Underscore	_
Plus Sign	+	Right Curly Brace	{
Comma	,	Left Curly Brace	}
Hyphen	-	Vertical Bar	|
Period	.	Tilde	~
Slash	/		
Colon	:		
Semi-colon	;		

4. Passwords must not contain:

   a. the login ID
   b. reverse shift of the login ID
   c. circular shift of the login ID
   d. different upper/lower case version of the login ID

5. A new password must differ by at least three characters from the current password.

6. A new password must not match any password (the last five) in the TP's EMS-maintained password history.

7. Passwords shall expire after 90 days.

8. Passwords cannot be changed within the first 7 days of the last password change.

APPENDIX I

Communication Error Messages

APPENDIX I

COMMUNICATIONS ERROR MESSAGES

Below are the Communications Error Messages that will be transmitted from the Electronic Management System (Front-End Processing Subsystem (FEPS) in a Communications Error Acknowledgement File, upon detection of a transmission validation error.

1. **"A VIRUS <Virus Name> WAS DETECTED IN THIS FILE"** -- The FEPS (Front-End Processing System has detected a virus in a transmission file and will quarantine and not process the file. The TP will be temporarily suspended. The TP must clean up the file and call their appropriate e-Help desk for permission to transmit. Please note that this error Acknowledgement is in XML format.

Below is the format for the error Acknowledgement that is returned to the TP when a virus is detected in the transmission. All TPs receive the XML format Acknowledgement, even if the transmission was sent using a different IRS approved format. Note that the second line of the file, the Content Description contains a plain English description of the problem and an understanding of XML is not required to interpret the message. The shaded areas contain the GTX key, a timestamp, and the virus name. These values vary for each returned Acknowledgement. The remainder of the message is constant.

```
MIME-Version: 1.0
Content-Description: Notification that transmission file T200303211345.0100
was rejected because it contained a virus
Content-Type: text/xml; charset=UTF-8

<?xml version="1.0" encoding="UTF-8"?>
<TransmissionAcknowledgement>
      <AcknowledgementTimestamp>2003-12-13T12:05:22-05:00
            </AcknowledgementTimestamp>
      <TransmissionStatus>R</TransmissionStatus>
      <Errors errorCount="1">
            <Error errorId="1">
                  <ErrorCategory>Unsupported</ErrorCategory>
                  <ErrorMessage><!CDATA[A VIRUS (virus name) WAS DETECTED IN
                  THIS FILE]]></ErrorMessage>
                  <RuleNumber>T0000-009</RuleNumber>
                  <Severity>Reject and Stop</Severity>
            </Error>
      </Errors>
      <GTXKey>T200303211345.0100</GTXKey>
</TransmissionAcknowledgement>
```

2. **"ACK COUNT IN TRANSMISSION RECAP RECORD DOES NOT MATCH THE COUNT OF ACKS RECEIVED"** -- The FEPS will reject the entire transmission for State acks, if the number of acknowledgements "inner envelopes" does not match the count in Field 0030 of the "outer envelope" RECAP record. *Applicable to State Acknowledgement Transmissions Only.*

3. **"ADDITIONAL TAX DATA AFTER RECAP"** -- The FEPS will reject the entire transmission when data exists after the RECAP record.

4. **"EFS IS BUSY. WAIT AT LEAST 10 MINUTES, THEN RETRY" --** The FEPS will reject the entire transmission if the FEPS is unresponsive.

5. **"EFS IS CURRENTLY UNAVAILABLE. ADDITIONAL INFORMATION MAY BE AVAILABLE ON IRS QUICK ALERTS"** -- The FEPS will reject the entire transmission if the FEPS is down because of scheduled downtime or for other planned reasons.

APPENDIX I

Communication Error Messages continued

6. **"ETIN IN INNER ENVELOPE AT RECORD nnnnnn NOT VALID"** -- The FEPS will reject the entire transmission if the ETIN in positions 84-88 of the TRANA record does not match a valid ETIN in the TP profile Data Base. ***Applicable to State Acknowledgement Transmissions Only.***

7. **"EMS RECEIVED YOUR FILE, BUT COULD NOT PROCESS IT. PLEASE CHECK YOUR FILE AND RE-TRANSMIT."** -- This error ack is returned in XML format when EMS receives a file, but fails to decompress and process it.

8. **"FIRST RECORD WITHIN INNER ENVELOPE MUST BE ACK KEY AT RECORD nnnnnn"** -- The FEPS will reject the entire transmission if there is no ACK key record as the first record within an inner envelope. ***Applicable to State Acknowledgement Transmissions Only.***

9. **"INVALID DCN VALUE DETECTED WITHIN ACK KEY RECORD AT RECORD <n>"** -- The return DCN in Field 0090 of the Ack Key record is not present and the first two digits are not zeros. Applicable to State Acknowledgement Transmissions Only.

10. **"INVALID ETIN MISMATCH IN INNER TRANA RECORD AND ACK KEY RECORD AT RECORD <n>"** -- The ETIN in Field 0060 of the inner TRANA record does not match the ETIN in the first five digits of Field 0030 of the Ack Key record. Applicable to State Acknowledgement Transmissions Only.

11. **"INVALID FORM TYPE FOR THIS EMS PROCESSING SITE"** -- The FEPS will reject the entire transmission if the letter code for the Site Designator in column 75 of the TRANA record is anything other than the specified form type for that processing site.

12. **"INVALID FORM TYPE IN INNER ENVELOPE FOR THIS EMS PROCESSING SITE AT RECORD nnnnnn"** -- The FEPS will reject the entire transmission when the FEPS is not processing for the ELF site that is in the Site Designator in the Inner TRANA record. ***Applicable to State Acknowledgement Transmissions Only.***

13. **"INVALID INNER ENVELOPE FORMAT AT RECORD nnnnnn"** -- The FEPS will reject the entire transmission if any of the following conditions are not met for the contents of the inner envelopes:

    a) each record begins with a 4 digit byte count = 0120
    b) the byte count is followed by the 4 asterisk record sentinel
    c) the record type is ACK or ACKR
    d) the last character is a #, based on the byte count in the first four digits. ***Applicable to State Acknowledgement Transmissions Only.***

14. **"INVALID INNER ENVELOPE PRODUCTION-TEST CODE. P=PRODUCTION, T=TEST AT RECORD nnnnnn"** -- The FEPS will reject the entire transmission if the production test code field in the TRANA record does not equal P or T. ***Applicable to State Acknowledgement Transmissions Only.***

Communication Error Messages continued

15. **"INVALID INNER ENVELOPE TRANA (TRANB or RECAP): WRONG LENGTH OR EMBEDDED # AT RECORD nnnnn"** -- If any of the following conditions exist in an inner envelope:

    a) TRANA record is not equal to 120 bytes in length or contains an embedded pound sign.
    b) TRANB record is not equal to 120 bytes in length or contains an embedded pound sign.
    c) RECAP record is not equal to 120 bytes in length or contains an embedded pound sign. The FEPS shall generate an error ACK File. *Applicable to State Acknowledgement Transmissions Only.*

16. **"INVALID JULIAN DAY IN THE TRANA RECORD"** -- The FEPS will reject the entire transmission when the Julian day in columns 91-93 of the TRANA record is more than two days prior to the actual receipt Julian day or more than one day after the actual receipt Julian day. *Not Applicable to State Acknowledgement Transmissions*.

17. **"INVALID PROCESSING SITE DESIGNATOR. C=ANDOVER, E=AUSTIN" F=KANSAS CITY, G=PHILADELPHIA, H=FRESNO"** EMS will reject the entire transmission when the letter code for the Site Designator in column 75 of the TRANA record is not equal to one of the alphabetic codes, OR when the actual processing site or alternate site code does not agree with the Site designator in the TRANA record.

18. **"INVALID PRODUCTION-TEST CODE – P = PRODUCTION, T = TEST"** -- **EMS** will reject the entire transmission when Test/Production indicator in column 117 of the TRANA record does not equal "T" or "P".

19. **"INVALID RECAP: WRONG LENGTH OR EMBEDDED #"** -- **EMS** will reject the entire transmission when the byte count of the last record is **not equal to** 120 and the terminus character (#) agrees with the byte count.

20. **"INVALID RECORD FORMAT IN RECORD NUMBER XXX"** -- **EMS** will reject the entire transmission when the number of bytes in a record that the Trading Partner indicates does not equal the number counted by the FEPS, **starting with the TRANA record**. The byte count begins with the 4-digit byte count followed by the 4 asterisks (****) in the record sentinel, the data, followed by the record terminus.

21. **"INVALID T/P MODE FOR PROCESSING SITE DESIGNATOR"-- EMS** will reject the entire transmission if a transmission is received and the Test/Production (T/P) indicator within the transmission does not match the processing modes allowed for the site, the transmission will be rejected.

22. **"INVALID TAX RETURN FORMAT BEGINNING AT RECORD n"** -- **EMS** will reject the entire transmission Error Ack message after the first occurrence of this validation error. For return transmissions, the FEPS will validate that every return begins with a tax return record (valid Record ID, Return type and Page number fields) and ends with a summary record. In addition, the tax return record must contain a numeric TIN that matches the TIN in the summary record. If an error is encountered, no further validation will take place after this first error is encountered.

23. **"INVALID TOTAL ACK KEY COUNT IN ACK FOR ETIN NNNNN"** -- **EMS** will reject the entire transmission if the number of Total Ack Key records in an "inner envelope", does not match the number in Field 0030 of an "inner envelope" RECAP record. *Applicable to State Acknowledgement Transmissions Only.*

Communication Error Messages continued

24. **"INVALID TOTAL ACKR COUNT IN INNER ENVELOPE RECAP AT RECORD nnnnnn."** –- **EMS** will reject the entire transmission if the number of "ACKR" records in an "inner envelope", does not match the number in Field 0100 of an "inner envelope" RECAP record. *Applicable to State Acknowledgement Transmissions Only.*

25. **"INVALID TOTAL RETURN COUNT IN RECAP RECORD" --** **EMS** will reject the entire transmission and generate this Error ACK message when the number of tax returns counted does not match the Total Return Count in columns 29-34 of the RECAP record.

26. **"INVALID TRANA: WRONG LENGTH OR EMBEDDED #"** –- **EMS** will reject the entire transmission when the byte count of the first record is less than 120 and the end-of-record indicator (#) agrees with the byte count.

27. **"INVALID TRANB: WRONG LENGTH OR EMBEDDED #"** –- **EMS** will reject the entire transmission when the byte count of the second record is less than 120 and the terminus character (#) agrees with the byte count.

28. **"INVALID TRANSMISSION TYPE CODE" --** **EMS** will reject the entire transmission when the Trading Partner's transmission type code specified in column 118 of the TRANA record is not valid. Valid codes must equal one of the following codes:

" " (blank)	= regular 1040 Electronic Filing
"O"	= Online Filing
"Z"	**=** State Acknowledgement

29. **"THE ETIN CORRESPONDING TO THE EMS LOGIN ID AND THE ETIN IN THE TRANA RECORD WERE DIFFERENT"** –- **EMS** will reject the entire transmission when the ETIN in columns 84-88 of the TRANA record does not match the login ETIN.

30. **"MULTIPLE INNER ENVELOPE TRANA/TRANB RECORDS DETECTED AT RECORD nnnnnn"** –- **EMS** will reject the entire transmission if more than one TRANA record or TRANB record exists in the same inner envelope. *Applicable to State Acknowledgement Transmissions Only.*

31. **"MULTIPLE TRANA/TRANB RECORDS DETECTED"** –- **EMS** will reject the entire transmission when multiple TRANA or TRANB or RECAP records are found within a file. *Not Applicable to State Acknowledgement Transmissions.*

32. **"NO ACKNOWLEDGEMENTS WITHIN THE TRANSMISSION" --** **EMS** will reject the entire transmission if the number of inner envelope counted is zero (0), a communications error ack will be generated and returned to the State transmitter. *Applicable to State Acknowledgement Transmissions Only.*

APPENDIX I

Communication Error Messages continued

33. **"NO INNER ENVELOPE TRANA RECORD RECEIVED AT RECORD nnnn" -- EMS** will reject the entire transmission if the first record in the inner envelope is not a correctly formatted TRANA record as follows:

    a) byte count and end of record indicator(#) do not agree or
    b) record sentinel **** is not present or
    c) TRANA is not in columns 9-14 or
    d) byte count is > 120 characters or is not numeric or
    e) CR or LF imbedded within the record.
      Applicable to State Acknowledgement Transmissions Only.

34. **"NO INNER ENVELOPE TRANB RECORD RECEIVED AT RECORD nnnn" --** If the second record in the inner envelope is not a correctly formatted TRANB record as follows:

    a) byte count and end of record indicator(#) do not agree or
    b) record sentinel **** is not present or
    c) TRANB is not in columns 9-14 or
    d) byte count is > 120 characters or is not numeric or
    e) CR or LF imbedded within the record.
      Applicable to State Acknowledgement Transmissions Only.

35. **"NO RECAP RECORD RECEIVED; POSSIBLY DUE TO A LINE PROBLEM**" – EMS will reject the entire transmission when the last record byte count and the end-of-record indicator (#) do not agree, or record sentinel (****) is not present, or "RECAP" is not in columns 9-14, or byte count is > 120 characters or is not numeric, or <CR> or <LF> is embedded within the record.

36. **"NO RETURNS WITHIN THE TRANSMISSION"** -- EMS will reject the entire transmission when there are no returns within a transmission.

37. **"NO TRANA RECORD RECEIVED"** -- EMS will reject the transmission when the first record byte count and end-of-record indicator (#) do not agree, or record sentinel (****) is not present, or "TRANA" is not in columns 9-14, or byte count is >120 characters or is not **numeric, or <CR> or <LF> is imbedded within the record.**

38. **"NO TRANB RECORD RECEIVED"** -- **EMS** will reject the entire transmission when the second record byte count and end-of-record indicator (#)do **not agree, or record sentinel (****) is not present, or "TRANB" is** not in columns 9-14, or byte count is >120 characters or is not numeric, or <CR> or <LF> is imbedded within the record.

39. **"NON-MATCHING ETIN IN INNER ENVELOPE RECAP AT RECORD nnnnn" -- EMS** will reject the entire transmission if an inner RECAP record is detected with an ETIN that does not match the ETIN in the inner envelope TRANA record. *Applicable to State Acknowledgement Transmissions Only.*

APPENDIX I

40. "PRODUCTION-TEST CODE IN TRANA RECORD DOES NOT MATCH PROFILE" --- **EMS** will reject the entire transmission when the Production/Test indicator in column 117 of the TRANA record does not match the production/test mode in the Trading Partner profile. *Not applicable to inner TRANA of State Acknowledgement Transmission.*

41. "RECORD n <record-id> NOT IMMEDIATELY PRECEDED BY SUM RECORD" – EMS will reject the entire transmission when the SUM record is missing. "n" stands for the number of the record being processed when the error is discovered and "record-id" stands for the value of the Record ID Field of record n, e.g., RECAP.

42. "THE T/P INDICATOR FOR INNER ENVELOPE AT RECORD nnnnnn MUST BE T for TEST" -- EMS will reject the entire transmission when the state transmitter is in test mode, if the T/P indicator (Field 0160) of an 'inner envelope' TRANA record is not 'T'. *Applicable to State Acknowledgement Transmissions Only.*

43. "TRANSMITTER NOT VALID FOR TRANSMISSION TYPE" --- EMS will reject the entire transmission when the Trading Partner profile in the TPDB does not allow the Transmission Type specified in column 118 of the TRANA record.

SECTION 2 – TRANSMISSION FILE FORMAT

.01   General Description

1. All transmission data must be in ASCII format. No binary fields
   may be transmitted.

2. A transmission session will normally consist of three parts:

   a. First, the communications link must be established using acceptable
      protocol.

   b. Next, the transmitter will receive the Acknowledgement transmission
      containing information about the previous transmission session, if an
      Acknowledgement file exists.

   c. Then, the return record transmission may commence. The return
      record transmission will consist of 1) a series of logical records,
      beginning with the TRANA record, 2) some number of logical return
      records, and 3) a RECAP Record.

3. All return records must be in ascending order by Declaration Control
   Number (DCN) and Return Sequence Number (RSN).

4. Two four-byte fields (the Record Control Information) must precede each
   record within a transmission. The first four-byte field is a record Byte
   Count that will contain a count of the number of bytes within the logical
   record including the four bytes for the counter itself, four bytes for
   the Start of Record Sentinel (****), and one byte for the Record Terminus
   Character (#). The second four-byte field will be the Start of Record
   Sentinel, which must be
   four asterisks (****).

5. Every record must have the Record Terminus Character (#) as its last
   significant byte.

   Note: Provisions have been made to allow for non-significant padding to
   exist following the Record Terminus Character, i.e., CR or LF may be
   added after the Record Terminus Character to fill up a physical block
   size. This is permitted to accommodate all the different computer
   systems being used to transmit data.

6. The first records on a transmitted file, the TRANA and TRANB Records,
   contain information regarding the transmitter and file format. The tax
   return records should follow these records.

SECTION 2 – TRANSMISSION FILE FORMAT

.01   General Description continued

7. The end of the logical transmission is signaled by the literal "RECAP".
    It is followed by the RECAP Record data and ends with the Record Terminus
    Character (#).

8. The TRANA, TRANB and RECAP records are fixed-length records of 120 bytes
    each. Any non-significant field should be blank-filled.

9. A tax return will consist of a variable number of fixed length or
    variable length records. The size and format of the logical record for
    each page of each schedule, form, etc., are specified in Part 2 Record
    Layouts. See Section 2 for file formats.

10. Each logical record should contain all data fields pertaining to one
    printed page of an official schedule or form, including the Form Payment,
    Authentication, Preparer Note, Election Explanation and Regulatory Explanation
    records, or to a line of a Statement Record. Therefore, the logical record
    contains an entire schedule or form, or a logical part (i.e., PG01 or PG02)
    of a schedule or form, or line of a Statement Record. See Section 8 for
    Statement Record information.

11. Each complete tax return must consist of all logical records pertaining to
    it in the following sequence:

        Form 1040/1040A/1040EZ Page 1
        Form 1040/1040A Page 2
        Schedules in alphabetical order or in Attachment Sequence Number
          order as preprinted on the official IRS form
        Forms in numerical order or in Attachment Sequence Number order as
          preprinted on the official IRS form
        (Forms W-2 and 1099-R should precede other forms, and
          Form Payment should follow other forms)
        Authentication Record
        Statement Records
        Preparer Notes
        Election Explanations
        Regulatory Explanations
        State Records
        Summary Record

14. Schedule, Form, Statement, Preparer Note, Election Explanation and
    Regulatory Records can contain additional sequential Page Records if
    the record consists of more than one printed page. (Pages are only
    numbered within a schedule, form, or statement record, not across the
    return). All records must appear in the order above with the proper
    control information. The counts of the schedules and forms must match
    the counts in the Summary Record or the return will be rejected.

13. The file should be unlabeled (no standard header or trailer records).

14. Each file must contain only complete returns.

SECTION 2 – TRANSMISSION FILE FORMAT

.01   General Description continued

15.   The page should not be generated if there are no entries on a page
record of a schedule or form. A blank page (Record ID Group only)
will cause the return to be rejected, except in cases where multiple
forms require that one page be present when the other page is present.

16.   The first logical record of a tax return (i.e., Page 1 of the
Form 1040/1040A/1040EZ) will contain the Record Control Information and Tax
Return Record Identification (ID) Group, followed by
the Return Sequence Number (RSN) and the Declaration Control Number (DCN).
The Record ID Group includes the Record ID, Return Type, Page Number,
Taxpayer Identification Number, and Tax Period.

   a. The Return Sequence Number (RSN) is a unique 16-digit number assigned
      by the transmitter to each return within a return transmission. The
      RSN includes the <u>transmitter's</u> Electronic Transmitter Identification
      Number (ETIN). The RSN consists of the following fields:

      (1) Electronic Transmitter Identification Number (ETIN) of the
          transmitter (5 numeric characters)
      (2) Transmitter Use Field, the value of which is determined by
          the transmitting electronic filer (2 numeric characters)
      (3) Julian Day of Transmission (3 numeric characters)
      (4) Transmission Sequence Number for the given Julian Day
          (2 numeric characters (00-99))
      (5) Sequence Number assigned to the return (4 numeric
          characters (0000-9999)

   b. The DCN is a 14-digit number assigned by the electronic filer to
      each return within a return transmission. The DCN must contain
      the Electronic Filer Identification Number (EFIN) of the electronic
      filer that originated the electronic submission of the return, even
      if the transmitter assigns the DCN as a service to the electronic
      return preparer. The DCN consists of the following fields:

      (1) Always "00" (2 numeric characters)
      (2) Electronic Filer Identification Number (EFIN) of the
          electronic filer (6 numeric characters)
      (3) Batch Number (3 numeric characters (000-999))
      (4) Serial Number (2 numeric characters (00-99))
      (5) Year Digit (1 numeric character)

      NOTE: When using variable format, begin bracketing field numbers
      on Page 1 of the tax return beginning with the RSN [0007].

SECTION 2 – TRANSMISSION FILE FORMAT

.02 Fixed and Variable Length Options

There are two options available for transmitting logical tax return records: fixed length (fixed format) and variable length (variable format). (The Transmitter Records TRANA, TRANB, and RECAP Record are not tax return records.)

See Section 5 for requirements related to specific field descriptions and types of characters.

1. Fixed Length Option (Fixed Format)

The fixed length option requires the complete tax return to be transmitted exactly as defined in Part 2 Record Layouts. All fields must be present. If a field contains no data, it must be blank-filled or zero-filled. An "F" in the Record Type (SEQ 0100) of the TRANS Record A (TRANA) indicates fixed-length option.

When the fixed length option is used, the following data field conventions must be followed:

a. <u>Alphanumeric Fields - Fixed Format</u>

   (1) Left-justify the field with trailing blanks.

   (2) When a "literal" is included in the field description, enter the literal value, left-justified, exactly as specified in Part 2 Record Layouts. Trailing blanks must be entered.

      NOTE: The trailing blanks are not shown in the Record Layouts.

b. <u>Numeric Fields - Fixed Format</u>

   (1) Unsigned numeric fields: Right-justify with leading zeros.

   (2) Signed numeric fields (money amounts): Right-justify with leading zeros, reserving the right-most position for the Sign. A blank (" ") indicates a gain and a minus sign ("-") indicates a loss.

   (3) Signed numeric fields that can also contain literal values: Enter signed numeric fields as described above. When entering a literal value, left-justify and blank-fill the field.

a. <u>Preparer Note, Election Explanation and Regulatory Explanation Records</u>

If less than 4,000 characters of data is present for one of these records, it is permissible to enter the Terminus Character immediately following the last significant character when filing in fixed format. If you choose to do this, be sure to adjust the byte count accordingly.

SECTION 2 – TRANSMISSION FILE FORMAT

.02 Fixed and Variable Length Options continued

 2. Variable Length Option (Variable Format)

The variable length option provides for the transmission of only
control information, including the record ID group, significant
data fields, and significant data within individual fields.
Indicate the variable length option by entering a "V" in the
Record Type (SEQ 0100) of the TRANS Record A (TRANA).

When the variable length option is used, the following data field
conventions must be followed:

a. Alphanumeric Fields - Variable Format

   (1) Left-justify data in the field. Do not enter leading
       blanks. Trailing blanks are dropped.

   (2) When a "literal" is included in the field description, enter
       the literal value, left-justified, exactly as specified in
       Part 2 Record Layouts. Only the value of the literal
       (including embedded blanks) must be entered. Trailing
       blanks are dropped.

b. Numeric Fields - Variable Format

   (1) Unsigned numeric fields: In most cases, leading zeros may
       be dropped.

       Leading zeros cannot be dropped from the following:
       Date fields, Ratio (percentage) fields and Business Code
       field of Schedule C.

   (2) Signed numeric fields (money amounts): Leading zeros are
       dropped. For a positive value, the trailing blank that
       indicates a gain is dropped. For a negative value in a
       field that can contain either a gain or a loss, the minus
       sign ("-") must be entered in the last position of the
       signed numeric field.

   (3) Signed numeric fields that can also contain literal values:
       Enter signed numeric fields as described above. When entering
       a literal value, left-justify the field; it is not necessary
       to enter trailing blanks.

.02 **Fixed and Variable Length Options continued**

c. Tax Form, Schedule, and Form Records - Variable Format

When transmitting in variable format, each Tax Form (Form
1040/1040A/1040EZ), Schedule, and Form Record will
begin with the Record Control Information (Byte Count and Start of
Record Sentinel fields) in the same fixed format shown in the record
layouts. The Record Control Information is followed by the Record
ID Group. Following the Record ID Group are the data fields. Each
data field is preceded by the applicable Field Sequence Number,
which is enclosed by square bracket field delimiters, "["and"]"
The Field Sequence Number is a 4-position number. However, it is
permissible to drop the first zero when bracketing the field
sequence number. A minimum of three positions must be present.
For example, you can use [0010] of [010] for Primary SSN of Page 1
of the Tax Return record. The Record Terminus Character (#) follows
the last data field in the record.

Example:
nnnn****RECORD ID GROUP [1st field sequence number]DATA…[next
field sequence number]DATA...# ("nnnn" is the record byte count)

NOTE: THE FOLLOWING THREE CHARACTERS "**[**" , "**]**", and "**#**" ARE
RESERVED AS DELIMITERS AND CANNOT APPEAR AS DATA CHARACTERS.
See Section 5 for information about types of characters in
electronically filed returns.

d. Preparer Note, Election Explanation and Regulatory Explanation
Records

If fewer than 4000 characters of data are present for one of
these records, the terminus character can be entered immediately
following the last significant character.

e. State Records - Variable Format

See Section 12 for file format specifications for Federal/State
Electronic Filing.

f. Statement and Summary Records - Variable Format

All data fields of the Statement and Summary Records must be
formatted as fixed length fields. If a field contains no data,
it must be blank-filled or zero-filled, as appropriate.

When transmitting in variable format, each Statement and Summary
Record will begin with the Record Control Information (Byte Count
and Start of Record Sentinel fields) in the same fixed format shown
in the Part 2 Record Layouts. This is followed by the Record ID
Group, the data fields formatted as fixed length fields, and the
Record Terminus Character (#).

See Section 8 for Statement Record information.

SECTION 3 – ACKNOWLEDGEMENT FILE FORMAT

.01 Acknowledgement File Components

1. Every transmission will be acknowledged by the return of an Acknowledgement File (ACK File) to the transmitter. The Acknowledgement File will be available from the IRS service center to the transmitter within two workdays from the original transmission. The Acknowledgement File must be retrieved before sending a return file transmission.

2. If the entire transmission is rejected by the Unisys programs, the ACK File will contain the following:

    a. The original transmitter records (TRANA and TRANB).

    b. One ACK Record Set consisting of an ACK Key Record with a "T" in the Acceptance Code field and one ACK Error Record containing a maximum of 15 transmission reject errors related to this transmission.

    c. The Acknowledgement Recap Record (ACK Recap Record) with Fields 0070 through 0120 zero-filled.

3. If the transmission is accepted, the ACK File will contain the following:

    a. The original TRANA and TRANB sent by the transmitter with Field 0180 of the TRANA record updated with an IRS entry indicating the (Front-End Processing Subsystem/Central Processing Unit) FEPS/CPU Designator.

    b. Next, an Acknowledgement Record (ACK Record Set) is sent for each recognizable return transmitted.

    c. Next, the Acknowledgement Recap Record (ACK Recap Record), which is the original RECAP Record updated with counts of the Total Accepted Returns, Total Duplicated Returns, Total Rejected Returns, Total Duplicated EFT, IRS Computed EFT Count, and IRS Computed Return Count.

    d. And finally, the FEPS-generated Acknowledgement File Name containing the GTX Key (Field 0140 in the ACK Recap Record).

4. The Acknowledgement of an individual return is the ACK Record Set. An ACK Record Set consists of one ACK Key Record for an accepted return, or one ACK Key Record followed by up to 96 ACK Error Records for a rejected return.

    a. The ACK Key Record contains information to identify the return it represents, plus a field to indicate how many (if any) ACK Error Records follow. See Section 3.02.1 for the values of the Acceptance Code field of the ACK Key Record and Section 12.08 for the State Packet Acknowledgement format.

    b. If present, each ACK Error Record will contain data defining the Error Form Record Type, Error Form Record Number, the Error Form Occurrence for multiple occurrences of schedules or forms, the Error Field Sequence Number, and the Error Reject Code describing the specific error encountered.

SECTION 3 – ACKNOWLEDGEMENT FILE FORMAT

.01 Acknowledgement File Components continued

5. An "A" in the Acceptance Code field of an ACK Key Record indicates that the associated tax return has been accepted as a filed tax return. "Returned Accepted" means your return has been successfully e-Filed. There were no upfront errors that caused the return to reject. However, due to the additional downstream processing, there may be reasons that may delay or alter the amount of an expected refund.

6. The "D" in the Acceptance Code field of an ACK Key Record indicates that the associated tax return has been identified as a duplicate return, i.e., a tax return record had previously been transmitted and accepted for that Social Security Number.

7. The "R" in the Acceptance Code field of an ACK Key Record indicates that the associated tax return has been rejected due to a fatal error involving the return format, internal consistency, or data errors in a key field. The error(s) must be corrected and the return resubmitted to the IRS to be considered a filed tax return.

8. The "T" in the Acceptance Code field of an ACK Key Record indicates that the entire transmission has been rejected.

9. The "D" in the Duplicate Code field of an ACK Key Record indicates that the DCN is a duplicate or zero.

10. The "P" in the Duplicate Code of an ACK Key Record indicates that the Primary SSN is a duplicate or zero.

11. The "S" in the Duplicate Code of an ACK Key Record indicates that the Spouse SSN is a duplicate or zero.

12. The "1" in the PIN Presence Indicator field means that taxpayer PIN is present and was entered using the Practitioner PIN method.

13. The "2" in the PIN Presence Indicator field means that taxpayer PIN is present and was entered using the Self-Select PIN method by Practitioner.

14. The "3" in the PIN Presence Indicator field means that taxpayer PIN is present and was entered using the Self-Select PIN method by Online.

15. The "4" in the PIN Presence Indicator field means that a State-Only return was filed.

    NOTE: Taxpayer PIN cannot be used with State-Only returns.

16. A "(blank)" in the PIN Presence Indicator means that a return with a PIN was rejected.

17. The "R" in the Reserved IP Address Code field of the ACK Key Record indicates that a reserved IP address is present for this return.

.01   Acknowledgement File Components continued

18.   Up to 96 ACK Error Record(s) may be furnished to the electronic filer, one for each four-position Error Reject Code. Filers should use these Error Reject Codes to determine the source of the error causing the return (or transmission) to be rejected. If more than the maximum number of reject conditions are identified, the last reject code will be "0999".

19.   The Error Reject Codes and references to validation criteria related to the error conditions are listed in Attachment 1. Filers should use this information to resolve reject conditions. When a condition cannot be resolved with the information provided, the filer should contact the e-help Desk at the applicable Submission Processing Center for assistance.

20.   The "E" in the Acceptance Code field of an ACK Key Record indicates that this return has rejected previously with either ERC 501 and/or 504 and that this subsequent submission still has some invalid data. A math notice error will be sent to the taxpayer advising of any changes made to the return as a result of this exception processing. These returns will be processed in 4 to 6 weeks from the date of acceptance. DO NOT RESUBMIT THE TAX RETURN or FILE ON PAPER.

SECTION 3 – ACKNOWLEDGEMENT FILE FORMAT

.04   How to Batch and Match Returns with Acknowledgement Files

1.   File Names

The following information is provided to filers who may not be aware of how to batch their returns and match them up later with Acknowledgement Files. Because filers request to "re-hang" Acknowledgement Files so frequently, it may be that their software is not reading and storing properly the ACK File Name(s) that appear within the ACK File Transmission. **The ACK File Name is generated by the Front-End Processing Subsystem (FEPS) as a 20 byte GTX Key and passed onto the UNISYS with the return file.** After UNISYS processing, this ACK File Name is returned with the ACK file in the RECAP record. When the ACK file is returned to the Transmitter, it is renamed to a DOS 8.3 byte format called the ACK Reference File Name with an extension. The name contains the same month and day from the GTX Key, a 4 digit sequence number assigned by the FEPS for that transmission, followed by the extension. See Figure 34 for an explanation of the extension.

How to Batch Returns

Returns are to be transmitted, using the following specifications from the latest version of the Electronic Return File Specifications and Record Layouts.

a. In Part **2**, Section 1, the record layout for the TRANA, the first record in any transmission, indicates where the return file batch information is to be entered.

b. In Field 0060, the 5 digit ELECTRONIC TRANSMITTER IDENTIFICATION NUMBER (ETIN) assigned by the IRS, is entered. This is followed by TRANSMITTER'S USE CODE, 2 digits of the transmitter's choice to specify the type of returns (some transmitters use this field to identify which office or branch it belongs to or if it is a RAL return, etc.). It can also be left blank or zero filled.

c. In Field 0070, the 3 digit JULIAN DAY (001-365) follows. Field 0080 is composed of 2 digit TRANSMISSION SEQUENCE NO (00-99) for the above Julian Day.

d. In Part **2**, Section 2, the record layout for the TAX RETURN RECORD for page 1 of either the Form 1040, 1040A, or 1040EZ, indicates where the RETURN SEQUENCE NUMBER is entered, which is used for each return within the batch identified in the TRANA record above.

e. Field 0007, the 16 digit RETURN SEQUENCE NUMBER (RSN), is composed of the following sub-fields:

```
a.  ETIN of Transmitter           5n  = Field 0060 of the TRANA
b.  TRANSMITTER'S USE FIELD        2n  = Field 0060 of the TRANA
c.  JULIAN DAY
      OF TRANSMISSION              3n  = Field 0070 of the TRANA
d.  TRANSMISSION SEQUENCE NUMBER   2n  = Field 0080 of the TRANA
                                           (00-99)
e.  SEQUENCE NO. OF EACH RETURN    4n  = 0000-9999
```

NOTE: Dedicated leased line filers can file a maximum of 10,000 returns.

.04   How to Batch and Match Returns with Acknowledgement Files continued

In Field 0008, the 14 digit DECLARATION CONTROL NUMBER (DCN), is composed of the following sub-fields:

a. Always 00   2n = 00
b. EFIN of ERO   6n = (Assigned to ERO by IRS)
c. Batch Number of EROs returns 3n = 000-999
d. Serial Number of return in batch 2n = 00-99
e. Year   1n = (ending digit of tax year)

g. In Part 2, the record layout appears for the RECAP record, which ends a transmission.

h. Field 0040, the ETIN and TRANSMITTER'S USE CODE must equal the same one in Field 0060 of the TRANA.

i. In Field 0050, the JULIAN DAY must equal the JULIAN DAY in Field 0070 of the TRANA.

j. In Field 0060, the TRANSMISSION SEQUENCE NUMBER must equal Field 0080 of the TRANA.

2.   Assignment of File Name by FEPS

a. After transmitting a file, the system indicates that it was successfully received with the message: "**Transmission file has been received with the following GTX Key:**

Syyymmddhhmmss.xxxx   mmddnnnn

The Global Transaction (GTX) key is a series of unique numbers identifying the system that received it and day/time information. After the GTX key, the system generates a unique file name for the transmission that will be used as part of the Acknowledgement Reference File Name returned to the transmitter. The GTX Key is placed in field 0140 of the Acknowledgement File ACK RECAP Record. Transmissions and Acknowledgements can be matched using the 20 character GTX Key, the ETIN, and/or the ACK Reference File Name.

b. The Acknowledgement Reference File Name consists of the 4-digit numerical representation of the transmission month and day (MMDD) followed by a 4-digit sequence number for the transmissions received to date for that transmitter (0000-9999). The Acknowledgement Reference File Name will be part of the file name returned to the transmitter.

See Appendix A for more information on the ACK File Reference Name.

CAUTION: After receiving transmission 9,999, the system begins to number again with 0000 or the next available sequence number after 0000. Therefore, if large transmitters do not pick up ACK files within a few days, they may see this number repeated and not be able to identify which batch is which, or their software may overwrite a previous ACK file in their directory on their PC.

CAUTION: If more than 100 batches per ETIN in a day are filed, the transmitter should request another ETIN.

SECTION 3 – ACKNOWLEDGEMENT FILE FORMAT

.04 How to Batch and Match Returns with Acknowledgement Files continued

3. Receiving, Locating, Storing, and Matching ACK Files

   a. In Part 1, Section 3.01, the Acknowledgement File format appears. It is composed of the original TRANA and TRANB received from the Transmitter, followed by the ACK KEY Record, ACK ERR Record(s) as applicable, and the ACK RECAP record.

   b. In Part 1, Section 2.02, the ACK KEY RECORD is outlined.

   (1) Field 0030 contains the RETURN SEQUENCE NUMBER (RSN) as submitted by the Transmitter in Field 0007 of page 1, 1040, 1040A, 1040EZ.

   (2) Field 0090 contains the return Declaration Control Number (DCN), as submitted by the Transmitter in Field 0000, page 1, 1040, 1040A, or 1040EZ.

   c. In Part 1, Section 2.02, the ACK RECAP is outlined.

   (1) Field 0040 contains the ETIN plus TRANSMITTER'S USE CODE as in the original transmitter's RECAP.

   (2) Field 0050 contains the JULIAN DAY OF TRANSMISSION as in the original transmitter's RECAP.

   (3) Field 0060 contains the TRANSMISSION SEQUENCE NUMBER FOR JULIAN DAY in Field 0050, as in the original transmitter's RECAP.

   (4) Field 0140 contains the ACKNOWLEDGEMENT FILE NAME, which was generated by the FEPS in the "Transmission file has been received with the following GTX Key" message. (Software developers/transmitters must program to wait for this message and should store the File Name for comparison with the ACK File transmission when received.)

   d. In summary, the transmitter and ERO have numerous ways of matching up their batches of return files they transmitted with the ACK files they receive.

.04 How to Batch and Match Returns with Acknowledgement Files

e. CAUTION:

(1) Block zero ("0") identifies the filename. Data is transmitted starting in Block one ("1") up to Block "255" and then rolls to Block "0". The last block for the file is padded with "Ctrl Z" characters. The next transmission packet should be the End of Transmission (EOT) character (ASCII – "cntl d"). If there is another file, the next block, Block "0" will contain the next filename. Otherwise a Block "0" without a filename will be followed by the EOT character.

(2) **If using ZMODEM, Acknowledgement Files are sent as separate files within the transmission, with "zfile" and "eof" in between each file, with a "zfin" at the end of all files.** Filer's software should read for the "zfile" and "eof" and store the file under the IRS File Name in the directory for each ACK File within the ACK transmission. The Front-End Processing System is set to overwrite when sending ACK Files.

(3) Sometimes transmitters will use a different protocol if they are having problems with one. **Transmitter's software must be flexible to handle the above rules when various file transfer protocols might be used in order to parse their individual ACK files properly for correct storage in their directories.** Otherwise, transmitters may not realize they have received more than one ACK file and store multiples under one of the ACK File Names.

SECTION 4 – TYPES OF RECORDS

.01 Transmitter Records

See Part 2 Record Layouts for the exact formats of the Trans Record "A" (TRANA), Trans Record "B" (TRANB), and RECAP Record.

1. TRANA and TRANB Records*

    The first two records of a transmitted file are the Transmitter Records TRANA and TRANB. These records contain data entered by the transmitter. (The "transmitter" is defined as the firm transmitting directly to the IRS.)

2. RECAP Record

    The RECAP Record follows the Tax Return Records and is the final record of a transmitted file. The RECAP Record provides balancing counts for the tax returns contained in the transmitted file.

.02 Tax Return Records

See Part 2 Record Layouts for the exact formats of individual records listed below. All records within a tax return should appear in the order listed in Part **2**, Record Layouts or in the order of the Attachment Sequence Number preprinted on the corresponding paper form. (Refer to Section 2.01, Item 11)

All "total" fields must have a significant entry when there are amounts leading to the total. Any "total" field that has a significant entry must have at least one significant amount leading to that total. Otherwise, processing of the tax return will be delayed to resolve the discrepancy.

1. Tax Form Record

    Each tax return must begin with the Tax Form Record, which consists of Form 1040 Page 1 and Form 1040 Page 2, or Form 1040A Page 1 and Form 1040A Page 2, or Form 1040EZ Page 1.

SECTION 4 – TYPES OF RECORDS

2.   <u>Schedule and Form Records</u>

Some schedules and forms consist of multiple pages. Each page of a multiple-page schedule or form is a separate record within the tax return.

Multiple occurrences of certain schedules and forms are permitted. Refer to Attachment 11 for a list of the maximum number of schedules and forms permitted in an electronically filed tax return. When there are multiple occurrences of schedules or forms, the Page Number must be sequential within the Form/Schedule Occurrence Number of the schedule or within the Form Occurrence Number of a form.

a. Instructions for Multiple Occurrences of Schedules C:

Schedule C is a separate schedule type. The Form/Schedule Occurrence Number in the Record ID must be incremented starting with "0000001" for each schedule type. For example, if a joint return contains four Schedules C for the primary taxpayer for the secondary taxpayer, the first Schedule C will contain "0000001" in the Form/Schedule Occurrence Number, the second Schedule C will contain "0000002" in the Form/Schedule Occurrence Number, etc. If this format is not followed, the return may be rejected or the refund delayed.

The number of Schedules C cannot exceed a total of eight.

b. The "Form Payment" record is considered to be a form, although there is no equivalent paper form.

3.   <u>Authentication Record</u>

The Authentication (ATH) Record is used when the taxpayer(s) is filing an Online return and/or electing to use the Self-Select or Practitioner PIN (Personal Identification Number) for *e*-file signature option. Only one Authentication Record is permitted per tax return.

4.   <u>Statement Records</u>

Statement Records can only be used by the electronic filer when the number of data items exceeds the number that can be contained in the space provided on the printed schedule or form, or when the data must be provided on a separate continuation statement record, or when a statement of explanation is required for a specific condition.

See Section 8 for Statement Record information.

SECTION 4 – TYPES OF RECORDS

.02 **Tax Return Records continued**

5. STCGL/LTCGL Records

"STCGL" is the Short Term Capital Gain or Loss Record and "LTCGL" is
the Long Term Capital Gain or Loss Record. Each record is considered
a separate transaction. These transaction records are used when there
is a need to transmit **one** or more transactions **(for Schedule D)** with an
electronically filed return. Each Schedule D occurrence may have up to 5000
transaction records (i.e.,5000 short term and 5000 long term). The "STCGL"
and/or "LTCGL" transaction record must be transmitted prior to the parent form
(i.e., Sch. D or 8865). The "STCGL" can be submitted without the "LTCGL" and
vice versa. When the "STCGL" or "LTCGL" transaction record is present, then
"STCGL" or "LTCGL" record CANNOT be blank. All "STCGL" and/or "LTCGL"
transaction records must be in the appropriate numerical order based on
occurrence number within subpart occurrence and each set must start with
"0000001".

6. Preparer Note, Election Explanation and Regulatory Explanation Records

a. Preparer Note (NTE) records can be used by the paid preparer,
   electronic return originator or taxpayer to provide additional,
   voluntary information related to the tax return but not required
   to be attached to it.

b. Election Explanation (ELC) records are used when the taxpayer makes
   an election for certain tax treatment, status, exception or exemption
   based on an instruction for the tax form or in a related tax publication
   when there is no official IRS form designed for that purpose. The
   specific "election" must be cited followed by any explanatory or
   supporting information required. Multiple elections can be combined
   on one page record; separate page records can be used for each applicable
   election; and/or, multiple page records can be used for one election.
   The maximum number of ELC page records is 20. Enter the terminus
   character (#) after the last significant character in each ELC page
   record.

   Examples of Election Explanation statements:

   (1) Mark-to-Market Election
   To make the mark-to-market election for the current tax year, you
   must file a statement by the due date of the tax return without
   regard to extensions. This statement should be attached to either
   your current year individual income tax return or a request for an
   extension of time to file that return. The statement must include
   the following information.

   - That you are making an election under Section 475(f) of the
     Internal Revenue Code.
   - The first tax year for which the election is effective.
   - The trade or business for which you are making the election.

   (2) Net Operating Loss (NOL) Carryback Period
   You can choose not to carry back your NOL. If you make this
   choice, then you can use your NOL only in the 20-year carry forward
   period. (This choice means you also choose not to carry back any
   alternative tax NOL.)

   To make this choice, attach a statement to your original return
   filed by the due date (including extensions) for the NOL year.
   This statement must show that you are choosing to waive the
   Carry back period under Section 172(b)(3) of the Internal Revenue
   Code.

SECTION 4 – TYPES OF RECORDS

.02 Tax Return Records continued

(3) Electing to ratably accrue

If you use an accrual method, you can elect to accrue real estate tax related to a definite period ratably over that period.

Example. John Smith is a calendar year taxpayer who uses an accrual method. His real estate taxes for the real property tax year, July 1, 2006 to June 30, 2007, are $1,200. July 1 is the assessment and lien date.

If John elects to ratably accrue the taxes, $600 will accrue in 2006 ($1,200 x 6/12, July 1 – December 31) and the balance will accrue in 2007.

Separate elections. You can elect to ratably accrue the taxes for each separate trade or business and for non-business activities if you account for them separately. Once you elect to ratably accrue real estate taxes, you must use that method unless you get permission from the IRS to change. See Form 3115.

Making the election. If you elect to ratably accrue the taxes for the first year in which you incur real estate taxes, attach a statement to your income tax return for that year. The statement should show all of the following items.

- The trades or businesses to which the election applies and the accounting method or methods used.
- The period to which the taxes relate.
- The computation of the real estate tax deduction for that first year.

(4) Start-up costs election statement

If you elect to amortize your start-up costs, attach a separate statement that contains the following information.

- A description of the business to which the start-up cost relate.
- A description of each start-up cost incurred.
- The month your active business began (or was acquired).
- The number of months in your amortization period which is generally 180 months.

(5) Election to reduce basis under Section 362(e)(2)(C)

The transferor and transferee in certain Section 351 transactions can make a joint election under Section 362(e)(2)(C) to limit the transferor's basis in the stock received instead of the transferee's basis in the transferred property. The transferor and transferee may make the election by attaching the statement as provided in Notice 2005-70, 2005-41 I.R.B. 694, to their tax returns filed by the due date (including extensions) for the tax year in which the transaction occurred. Once made, the election is irrevocable. See Section 362(e)(2)(C) and Notice 2005-70.

.02 Tax Return Records continued

c. Regulatory Explanation (REG) records are similar to Election Explanation records and are used when the taxpayer cites a specific regulation for certain tax treatment, status, exception or exemption when there is no official IRS form designed for that purpose. The specific "regulation" must be cited followed by any explanatory or supporting information required. Multiple regulatory explanations can be combined on one page record; separate page records can be used for each applicable regulation cited; and/or, multiple page records can be used for one regulatory explanation. The maximum number of REG page records is 20. Enter the terminus character (#) after the last significant character in each REG page record.

Example of Regulatory Explanation statement:

(1) **Transfers to a corporation controlled by the transferor**
If a person receives stock of a corporation in exchange for property, and no gain or loss is recognized under Section 351, the person (transferor) and the transferee must each attach to their tax returns the statements required by Temporary Regulations Section 1.351-3-T.

7. State Records

State Records include the Generic Record "STbbbb0001bb" and the Unformatted Record "STbbbb0002bb". There can be only one Generic Record for each return. There can be up to nine Unformatted Records for each return. The Generic Record must be present and must precede any other State Record.

See Section 12 for specifications and examples of the State Records.

8. Summary Record

The Summary Record is the final record for each tax return. This record contains electronic filer identification data, the counts for Form, Schedule, Authentication, Statement, Preparer Note, Election Explanation, and Regulatory Explanation Records included in the return, and the paper document indicators. (A value of "1" in a paper document indicator field indicates that the paper document specified is a part of the return and has been attached to the Form 8453). It also contains the Electronic Postmark fields, the IP (Internet Protocol) fields and the Software Identification fields.

The IP Protocol Fields are defined as follows:

IP Address (SEQ 0190) – The IP address of the originating computer from which an online (to include ELF, OL and MeF) return was submitted individually, through software providers or ERO transmitters

IP E-mail Address (SEQ 0195) – Taxpayer's email address (Not a required field)

IP Date (SEQ 0200) – The original date an online (to include ELF, OL or MeF) return was submitted individually, through software providers or ERO transmitters

IP Time (SEQ 0210) – The original time an online (to include ELF, OL or MeF) return was submitted individually, through software providers or ERO transmitters

IP Time Zone (SEQ 0215) – The time zone where an online (to include ELF, OL or MeF) return was submitted individually, through software providers or ERO transmitters

.02 Tax Return Records continued

8. Summary Record continued

IP Routing Transmit Number (SEQ 0217) Not a required field – Refund
Anticipation Loan; Routing Transmit Number of a financial institution

IP Depositor Account Number (SEQ 0219) Not a required field – Taxpayer's
bank account information to which a Direct Deposit refund is routed.

SECTION 5 TYPES OF CHARACTERS

This section identifies the types of characters that are valid for an
electronically filed return. Although characters other than these may be
entered by a taxpayer on the paper form, the invalid characters are not key
entered to the electronically filed return.

THE FOLLOWING THREE CHARACTERS "[" , "]", and "#" ARE RESERVED AS DELIMITERS
AND CANNOT APPEAR AS DATA CHARACTERS. The left ([) and right (]) brackets
are used to enclose Field Sequence Numbers. The Pound Sign (#) (Record Terminus
Character) is used to indicate the End of Record.

.01 Allowable Characters

1. Alpha (A)

Upper case alpha characters only: A - Z

Literal values - Enter exact character string from the Field Description in
Part 2 Record Layouts.

2. Numeric (N)

Numeric characters only: 0 - 9

a. **MONEY AMOUNT** (N) (Signed Numeric) -

Enter whole dollar amounts (do not enter cents).

(1) Fixed format: 12 characters, right-justified with leading zeros; the
right-most position is reserved for the sign. A blank ( ) indicates a
gain and a minus sign (-) indicates a loss.

Non-significant - Zero-fill the field, reserving the right-most
position for the sign.

(2) Variable format: Leading zeros are dropped. For a positive value, the
trailing blank that indicates a gain is dropped. For a negative value
in a field that can contain either a gain or a loss, the minus sign (-)
must be present in the last position of the signed numeric field.

Non-significant - Omit the field.

SECTION 5 TYPES OF CHARACTERS

.01 Allowable Characters continued

    b. **RATIO** (R) (percentage) - Left-justify and zero-fill for both fixed
       and variable formats. DO NOT ENTER A DECIMAL POINT. Other than the
       exception listed below, ratio fields contain six numeric characters
       with the decimal point assumed to be between the left-most and the
       second left-most positions. If less than 100%, precede with a zero.

          Examples: 25.32% = 025320, 105% = 105000

          (1)   EXCEPTION: "Rate" fields on Form 4136 equal six numeric
                characters. The decimal point is assumed to precede the
                left-most position. Transmit all six positions,
                left-justified and zero-filled.

                Examples: Rate .183 = 183000
                            Rate .03967 = 039670
                            Rate .17   = 170000

    c. **EIN** (Employer ID Number) (N), e.g., if no EIN is present on
       Schedule C or Schedule F - for fixed format, blanks should be
       entered; for variable format, the field should be omitted.

    d. **ZIP CODE** (N) should be left-justified. For fixed format, if there
       are only five Zip Code characters, the seven remaining positions
       can be either blank-filled or zero-filled. For variable format,
       if there are only five Zip Code characters, transmit the five
       numeric characters.

    e. **DATE** (DT) - M = Month, D = Day, Y = Year (YYYY, YYYYMM, YYYYMMDD); if
       date is not known or covers various dates, enter zeros unless otherwise
       specified in the record layout field description. Leading zeros cannot
       be dropped from date fields for both fixed and variable formats.

       If a date field is not defined as "DT" in Part 2 Record Layouts,
       then the Field Description will specify the required date format.

    f. **OTHER UNSIGNED NUMERIC FIELDS** (N)

       (1) Fixed format: Enter the numeric characters, right-justified and
           zero-filled.

           Non-significant - Blank-fill (unless otherwise specified in the
           Record Layout for that field).

SECTION 5 TYPES OF CHARACTERS

.01 Allowable Characters continued

(2) Variable format: For most unsigned numeric fields other than ratio, EIN, Zip Code, and date fields, leading zeros may be dropped.

Leading zeros cannot be dropped from the Business Code field of Schedules C

Non-significant - Omit the field.

3. Alphanumeric (AN)

Upper case alpha characters A - Z; numeric characters 0 - 9; and special characters in cases listed below.

Literal values - Enter exact character string from Field Description in Part 2 Record Layouts.

Non-significant - For fixed format, blank-fill; for variable format, omit the field.

a. Special Characters - Only the following are permitted in certain cases: Ampersand (&); blank ( ), often shown in the record layouts as "b"; comma (,); hyphen (-); less-than (<); percent (%); plus (+); and slash (/).

b. Special Symbols and their hexadecimal conversion characters for ASCII are below:

Symbol	ASCII Hex	Symbol	ASCII Hex
[	5B	-	2D
]	5D	&	26
#	23	/	2F
<	3C	%	25

SECTION 5 TYPES OF CHARACTERS

.02   Special Cases for Special Characters

1.   Form 1040

     Name Line 1: A - Z; ampersand (&); blank ( ); hyphen (-); and less-than (<).

     Name Line 2: A - Z; 0 - 9; ampersand (&); blank ( ); hyphen (-); percent (%)
     for "in care of" address; and slash (/).

     Street Address: A - Z; 0 - 9; blank ( ); hyphen (-); and slash (/).

     City: At least three characters must be entered; A - Z; blank ( );
     APO/DPO/FPO - Refer to Attachment 4.

     State: A - Z - Refer to Attachment 3.

     Dependent Names: A - Z; blank ( ); and hyphen (-). A space cannot precede or
     follow the hyphen (-).

2.   Forms W-2/ 1099-R
     Employer Name: A - Z; 0 - 9; ampersand (&); comma (,); hyphen (-); plus (+);
     and slash (/).

     City/State/Zip: A - Z; 0 - 9; comma (,); and hyphen (-).

3.   Foreign Employer/Payer Address on Forms W-2/1099-R

     Employer/Payer State: Period (.).

4.   Employee, Recipient/Winners with Foreign Address on Form W-2/1099R

     Employee/Recipient/Winner State: Enter Period (.).

5.   Other Schedules/Forms with Similar Fields

     Follow character set instructions for fields that most resemble those
     listed above.

6.   Summary Record

     IP Address: 0-9, A-F, period (.), colon (:), or space. |

SECTION 6 - CRITERIA FOR FILER FRONT-END CHECKS

.01 Refund Delay Conditions

The following conditions may delay the refund and/or change the refund amount.

1. Taxpayer owes back taxes, either individual or business (refund offset).

2. Taxpayer owes delinquent child support (refund offset).

3. Taxpayer has certain delinquent federal debit, such as student loans, etc. (refund offset).

4. The last name and social security number of the primary taxpayer must be the same as on last year's return or the return will be delayed at least one week for re-matching.

5. The Estimated Tax payments reported on the return do not match the Estimated Tax payments recorded on the IRS Master File. This generally occurs when:

   a. The spouse made separate Estimated Tax payments and filed a joint return, or vice versa; or

   b. The return was filed before the last Estimated Tax payment was credited to the account.

6. The taxpayer has a Schedule E claiming a deduction for a questionable tax shelter.

7. The taxpayer is claiming a blatantly unallowable deduction.

8. The taxpayer is considered to be a first-time filer. A first-time filer is defined as an taxpayer who has not filed a tax return as a primary or secondary taxpayer during the previous ten years.

SECTION 6 - CRITERIA FOR FILER FRONT-END CHECKS

.02 SSN Validation

Refer to Attachment 9 for valid ranges of Social Security/Taxpayer Identification Numbers.

.03 Optional Validation of Routing Transit Number (RTN)

Verify the validity of the Routing Transit Number by computing the check digit, which is the ninth digit of the RTN. There may be instances in which the RTN is valid in format and equal to an actual number used by a financial institution, but is not yet on the Financial Management Organization Master File (FOMF). In these cases, the tax return would be rejected.

The steps are as follows:

1. Multiply each of the first eight digits of the RTN by the appropriate multiplier (the first digit multiplied by 3, the second by 7, the third by 1, the fourth by 3, the fifth by 7, the sixth by 1, the seventh by 3, and the eighth by 7).

2. Add all the products.

3. Subtract the sum of all the products from the next multiple of ten.

4. The remainder is the check digit, which must be equal to the ninth digit of the RTN.

    Note: If the sum of the products is evenly divisible by 10, the check digit is zero (0).

5. Example:

    If 120139013 were the RTN, verify the check digit as follows:

    a. Multiply each of the first eight digits, 12013901, by 37137137 respectively:

Routing Transit Number	1	2	0	1	3	9	0	1
Constant Multiplier	X3	X7	X1	X3	X7	X1	X3	X7
	3	14	0	3	21	9	0	7

    b. Add the products: 3 + 14 + 0 + 3 + 21 + 9 + 0 + 7 = 57

    c. Subtract the sum of all the products from the next multiple of ten: 60 - 57 = 3

    d. The remainder is the check digit: 3

    e. If the check digit does not equal the ninth digit of the RTN, verify that the first eight digits of the RTN were correctly entered from the source document and re-compute if appropriate.

       Note: If the check digit does not match, the refund cannot be directly deposited.

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

The instructions in sub-sections 7.01 through 7.04 must be carefully followed to avoid delaying returns for error conditions. They must be included in electronic filers' programs as consistency tests and in the data entry instructions.

The Primary SSN, Primary Name Control, State Abbreviation, and Zip Code should be key verified to avoid lengthy delays caused by mismatches with existing taxpayer information in IRS records or by undeliverable refund checks.

.01 Name Controls for Individual Tax Returns

1. Primary Name Control (SEQ 0050) of Form 1040/1040A/1040EZ must equal the first four significant characters of the primary taxpayer's last name. No leading or embedded spaces are allowed. The first left-most position must contain an alpha character. Only alpha, hyphen, and space are allowed. Omit punctuation marks, titles and suffixes.

    Spouse's Name Control (SEQ 0055) of Form 1040/1040A/1040EZ, Dependent Name Control (SEQ 0172, 0182, 0192, 0202, 0212) of Form 1040/1040A, Qualifying Child Name Control (SEQ 0007, 0077) of Schedule EIC must meet the same criteria.

    The hyphen (-) is the only special character allowed in the IMF Name Control.

    Note: The taxpayer names shown below are fictitious. They were constructed by random selection to appear realistic. Any resemblance to actual names is purely coincidental.

Individual Name	Name Control	General Rule
a. John Brown	BROW	
Mary Smith & John Jones	SMIT	
Ralph Teak	TEAK	a. The Name Control generally
Dorothy Willow	WILL	consists of the first four
Joe McCedar	MCCE	characters of the primary
Joe McCarty	MCCA	taxpayer's last name.
Torn MacDouglas	MACD	
Joseph MacTitus	MACT	
John Hardy, Minor	HARD	
April May Jordan	JORD	
b. John Lea-Smith	LEA-	
Thomas A. El-Oak	EL-O	b. The hyphen (-) is the only
Rana Al-Smadi	AL-S	special character allowed in
John O'Neil	ONEI	the Individual Name Control.
Ann O'Spruce	OSPR	
Mark D'Magnolia	DMAG	NOTE: When a taxpayer's last
John O'Willow	OWIL	name contains an apostrophe (') ignore/disregard the apostrophe when establishing the Name Control.
c. Dannette B	B	c. The Name Control may contain
James P. Ai	AI	less than four characters
John A. Fir	FIR	(if applicable).
John Ao, Sr.	AO	
John En, Sr.	EN	NOTE: The first character must be an alpha. Use blanks (when appropriate) to fill in the remaining positions.

.01 Name Controls for Individual Tax Returns continued

Individual Name	Name Control	General Rule
d. Daniel P. Di Almond	DIAL	d. Taxpayer names such as "Van",
Mary J. Van Elm	VANE	"Von", "Vander", "Al", "El",
Susan L. Von Birch	VONB	"Abu" and "Di" are considered
Aya Abu Sham	ABUS	part of the Individual Name
Donald Vander Oak	VAND	Control.
Otto Von Hickory	VONH	
Nabil Al Feyez	ALFE	NOTE: See the "Asian-Pacific
Amr El Bayoumi	ELBA	Names" section for exceptions
		to this rule.
e. Janet C. Redbud Laurel	LAUR	e. When two last names are shown
Dee (Plum) Birch	BIRC	for an individual, derive the
Mary Johnson Garcia	GARC	name control from the second
		last name of the primary
		taxpayer.
f. Joan Hickory-Hawthorn	HICK	f. When two last names for an
Dale Redwood-Cedar	REDW	individual are connected by
John Lea-Wren	LEA-	a hyphen, derive the Individual
		Name Control from the first
		last name.
g. Dell Ash & Linda Birch	ASH	g. On a joint return, whether the
Trey & Joan Eucalyptus	EUCA	taxpayers use the same or
Linda Birch & Dell Ash	BIRC	different last names, derive
Mary Smith & Mike Best	SMIT	the Individual Name Control from
		the PRIMARY taxpayer's last name.
		NOTE: The PRIMARY taxpayer is the taxpayer listed first on the tax return.

2. Consider certain foreign suffixes as part of the last name (i.e., Armah-Bey, Paz-Ayala, Allar-Sid). Particular attention must be given to those names that incorporate a mother's maiden name as a suffix to the last name. This practice is common in Hispanic names. Consider the mother's maiden name as part of the surname for Name Control purposes.

Examples:

Individual Name	Name Control	General Rule
a. Abdullah Allar-Sid	ALLA	a. When "del," "de," or "de la"
Jose Alvarado Nogales	ALVA	appear with a Hispanic name,
Juan de la Rosa Y Obregon	DELA	include it as part of the
Pedro Paz-Ayala	PAZ-	Individual Name Control.
Donald Vander Neut	VAND	
Otto Von Wodtke	VONW	
John Smith Gonzalez	GONZ	
Maria Acevedo Smith	SMIT	
John Garcia Garza Hernandez	GARZ	
Elena del Valle	DELV	
Eduardo de la Rosa	DELA	
Pablo De Martinez	DEMA	
Miguel de Torres	DETO	
Juanita de la Fuente	DELA	
B.A. De Rodriguez	DERO	
M.D. de Garcia	DEGA	

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.01 Name Controls for Individual Tax Returns continued

Individual Name	Name Control	General Rule

b. Juan Garza Morales
   Maria Lopez y Moreno
   Sylvia Juarez de Garcia
	GARZ
	LOPE
	JUAR
		b. When two Hispanic last names are shown for an individual, derive the Name Control from first last name.
		
		NOTE: This rule may not accurately identify all Hispanic last names, but it does provide consistency in IRS Hispanic Name Controls.

3. Below are examples of Asian-Pacific last names and the derivative Name Control. Some Indo-Chinese names have only two characters.

Individual Name	Name Control	General Rule
a. Binh To <u>La</u>	LA	a. Some Asian-Pacific last names
b. Nam Quoc <u>Tran</u> & Thuy Thanh Vo	TRAN	b. Asian Pacific females rarely change their last names due to marriage.
c. Dang Van <u>Le</u> Nhat Thi <u>Pham</u>	LE PHAM	c. When "Van" (male) or "Thi" (female) appears with an Asian-Pacific name, do not include it as part of the name control.
d. Kim Van <u>Nguyen</u> & Thi Tran	NGUY	d. The name "Nguyen" is a common last name used by both male and female Asian-Pacific taxpayers.
e. <u>Kwan</u>, Kim Van & Yue Le	KWAN	e. The last name may appear first on the name line. NOTE: On the signature line, the last name often appears first.
f. Yen-Yin <u>Chiu</u> Jin-Zhang <u>Qui</u>	CHIU QUI	f. Asian-Pacific first names often include a hyphen (-). Rarely is an Asian-Pacific taxpayer's last name hyphenated.

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.01 Name Controls for Individual Tax Returns continued

4.   Below are examples of Name Control for Native Americans:

Individual Name	Name Control	General Rule
a. Earline Old Person	OLDP	a. Native American surnames may contain several words.
Spike Big Horn	BIGH	
Spike Bighorn	BIGH	
Mary Between Lodges	BETW	
Gail George Moonface	GEOR	
Night & James Lou		NOTE: Begin the Name Control with the first word of the surname (unless the taxpayer is already established with a different name control that agrees with the name control from the Social Security Administration (SSA)).
Mary Her Many Horses	HERM	

5.   Below are examples of Name Controls for Estates:

Individual Name	Name Control	General Rule
a. Frank Walnut, Estate	WALN	a. The Name Control is the first four characters of the individual's last name.
Alan Beech, Exec.		
Estate of Jan Popular	POPU	
Jane J. Maple Estate	MAPL	
		NOTE: The decedent's name may be followed by Estate on the name line.

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.02 Name Line 1 Format

1. Name Line 1 (SEQ 0060) of Form 1040/1040A/1040EZ can have no leading or consecutive embedded spaces. The only characters allowed are alpha, ampersand (&), hyphen (-), less-than sign (<), and space. The left-most position must be alpha. The less-than sign replaces the intervening space to identify the primary taxpayer's last name.

2. The hyphen (-) and less-than sign (<) cannot be preceded by or followed by a space.

3. The ampersand (&) must be followed by a space then alpha.

4. All apostrophes (') and any other punctuation characters, except the hyphen (-), must be omitted from names and the alphabetic characters shifted to the left in their place (e.g., O'Shea = OSHEA).

5. Numeric characters in name components must be replaced by alphabetic Roman Numerals (e.g., Charles 3rd = CHARLES III).

6. When a suffix such as "JR" or "III" is part of the name, enter a less-than sign (<) between the suffix and the last name. Do not enter a space before or after any less-than sign; the less-than sign takes the place of a space.

    Titles such as "M.D." or "Ph. D.", which are not part of a given name, may be omitted.

7. Name Line 1 CANNOT CONTAIN MORE THAN 35 CHARACTERS.

    If information in Name Line 1 exceeds 35 characters, truncate using the following priority:

    a. Substitute the initial for the second given name.

    b. Omit the second initial of the secondary taxpayer, if necessary.

    c. Omit the second initial of the primary taxpayer, if necessary.

    d. Substitute initials for the secondary taxpayer's given name.

    e. Substitute initials for the primary taxpayer's given name.

.02 **Name Line 1 Format continued**

8. Enter taxpayer names as follows:

   a. For <u>one taxpayer</u>: Enter first name, a space, middle name or middle initial, a less-than sign (<), last name. (The last name of the individual must be contained within this name line field.) If there is a suffix, enter a less-than sign (<) between the last name and the suffix.

   b. For <u>two taxpayers</u> with <u>same</u> last name: Joint returns <u>must</u> contain one ampersand (&) between taxpayers' first names. The taxpayer whose first name is associated with the Primary SSN used on the return must be entered first, and the last name of that taxpayer must be identified by a preceding less-than sign (<).

   c. For <u>two taxpayers</u> with <u>different</u> last names: If the spouse uses a different last name, enter the primary taxpayer's first and last names as above for one taxpayer's name, but after the last name, add another less-than sign (<) followed by an ampersand and the full name of the spouse. A maximum of two less-than signs are permitted. Any suffixes should follow the primary taxpayer's last name only.

   Examples:*   Enter as:

   John C. (Brown), III   JOHN C<BROWN<III
   John M. (Brown), M.D.   JOHN M<BROWN
   Henry A. (Carter)   HENRY A<CARTER
   Frank N. (De Porta)   FRANK N<DE PORTA
   Timothy (Jackson), 2nd   TIMOTHY<JACKSON<II
   Carl A. (Jones) & Angie Myer   CARL A<JONES<& ANGIE MYER
   Charles (Jones) & Diane D. Jones, M.D.   CHARLES & DIANE D<JONES
   Florence E. (Jones) MD   FLORENCE E<JONES
   Alfred (Newman), Minor   ALFRED<NEWMAN<MINOR
   James R. (O'Donnell)   JAMES R<ODONNELL
   James (Oliver-Keogh), 3rd   JAMES<OLIVER-KEOGH<III
   Lillie B. (Owen-Smith)   LILLIE B<OWEN-SMITH
   J. B. (Smith) Jr. & Ann Trent   J B<SMITH<JR & ANN TRENT
   John A. (Smith), III & Ann Smith, M.D.   JOHN A & ANN<SMITH<III
   John A. and Jane B. (Smith)
   JOHN A & JANE B<SMITH

   d. For <u>other than Joint Return and deceased taxpayer</u>: Enter the literal "DECD" after the surname of the deceased taxpayer (e.g., John A<Doe<DECD or John A<Doe<JR DECD).

   e. For <u>a Joint Return</u> with the <u>same last name</u> and <u>Primary taxpayer</u> <u>is deceased</u>: Enter the literal "DECD" after the first name and/or initial of the deceased taxpayer (e.g., John A DECD & Jane B<Doe or John A DECD & Jane B<Doe<JR).

   f. For <u>a Joint Return</u> with the <u>same last name</u> and <u>Secondary taxpayer</u> <u>is deceased</u>: Enter the literal "DECD" after the first name and/or initial of the deceased taxpayer (e.g., John A & Jane B DECD<Doe or John A & Jane B DECD<Doe<SR).

.02 Name Line 1 Format continued

g. For a Joint Return with different last names and either the Primary OR the Secondary taxpayer is deceased: Enter the Literal "DECD" after the surname of the deceased taxpayer (e.g., John A<Doe<DECD & Jane B Smith or John A<Doe<III DECD & Jane B Smith; John A<Doe<& Jane B Smith DECD or John A<Doe<JR & Jane B Smith DECD).

h. For a Joint Return with the same last name and both taxpayers are deceased: Enter the literal "DECD" after the first name and/or initial of the deceased taxpayer (e.g., John A DECD & Jane B DECD<Doe or John A DECD & Jane B DECD<Doe<JR).

i. For a Joint Return with different last name and both taxpayers are deceased: Enter the literal "DECD" after the surname of the deceased taxpayer (e.g., John A<Doe<DECD & Jane B Smith DECD or John A<Doe<SR DECD & J B Smith DECD).

* Parentheses indicate the last name of the taxpayer with Primary SSN.

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.03 Street Address Format

1. The Street Address (SEQ 0080) of Form 1040/1040A/1040EZ
    contains the house number and street, route number, post office box,
    or box number. Enter college, building, or post office branch as the
    address if no other mailing address is given. If there is no address
    information, the literal "NONE" must be entered in the Street Address field.

2. Do not use the "#" symbol, "No.", or "Number" as a prefix to an
    apartment, house, P.O. Box, or route.

3. Always add "ST", "ND", "RD", "TH" to a numbered street or avenue.
    Examples: 1 = 1ST; 2 = 2ND; 3 = 3RD, etc.

4. Enter one-half as 1/2 (no spaces).

5. Plurals for apartment, avenue, road, street, etc., are entered as APTS,
    AVES, RDS, STS, etc.

6. Replace a period with a space.

7. For military overseas addresses, enter the letters "APO" or "FPO" in the
    first three left-most positions of the City field. Refer to Attachment 4
    for list of valid APO/FPO City/State/Zip Codes.

8. Words may be abbreviated unless the word is a proper name. Refer to
    Attachment 2 for list of acceptable abbreviations.

    Examples: Enter as:

    3 Ave.   3RD AVE
    Circle Drive   CIRCLE DR
    Lane Building   LANE BLDG
    Northeast Street   NORTHEAST ST
    South Court Street   S COURT ST
    Third Street   THIRD ST

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.04 **Name Line 2 Format**

Name Line 2 (SEQ 0070) of Form 1040/1040A/1040EZ is used for a street   address
that requires two lines or for an "in care of" address (e.g. on decedent   returns).
Caution should be used to ensure personal information (i.e. Social
Security Number, occupation) is not erroneously entered in the Name Line 2 field.

```
    Example 1:   Mr. John Jones
                 In care of Alice B. Smith
                 801 Brown St.

     Enter As:   JOHN JONES             (Primary First Name, Primary Last Name)
                 % ALICE B SMITH        (Name Line 2)
                 801 BROWN ST           (Street Address)

    Example 2:   Mr. John Jones DECD
                 In care of Alice B. Smith Exec
                 801 Brown St.

     Enter As:   JOHN JONES DECD        (Primary First Name, Primary Last Name)
                 % ALICE B SMITH Exec.  (Name Line 2)
                 801 BROWN ST           (Street Address)
```

If two addresses are present, enter the actual mailing address in the Street
Address field. Enter the post office box in the Street Address field only if
the post office does not deliver mail to the street address. The remaining
address should be entered in the Name Line 2 field. Do not enter a post office
box in the Name Line 2 field.

```
    Example 3:   Mr. John Jones
                 80 Erie Street Apartment 5
                 Great Lakes Resort

    Enter As:    JOHN JONES             (Primary First Name, Primary Last Name)
                 GREAT LAKES RESORT     (Name Line 2)
                 80 ERIE ST APT 5       (Street Address)

    Example 4:   Mr. John Jones
                 1 Lost Way
                 P.O. Box 1502

    Enter As:    JOHN JONES             (Primary First Name, Primary Last Name)
                 1 LOST WAY             (Name Line 2)
                 PO BOX 1502            (Street Address)

    Example 5:   Mr. John Jones
                 P.O. Box 150
                 State University

    Enter As:    JOHN JONES             (Primary First Name, Primary Last Name)
                 STATE UNIVERSITY       (Name Line 2)
                 PO BOX 150             (Street Address)
```

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2 1099-R, 2441

The business Name Control consists of four alpha and/or numeric characters. The ampersand (&) and hyphen (-) are the only special characters permitted in the Name Control. The Name Control can have fewer than four characters. Blanks may be present only as the last two positions of the Name Control.

1. **Individuals (Sole Proprietorships)**

    Always use the first four characters of the individual's (sole proprietor's) last name.

    Examples:

Name Control Underlined	Name Control
Arthur P. Aspen	ASPE
Jane & Mark Hemlock The Sunshine Cafe	HEML
John and Mary Redwood	REDW

2. **Estates**

    Always use the first four characters of the last name of decedent. The last name of the decedent may be followed by the word "Estate" in the first name line.

    Examples:

Name Control Underlined	Name Control
Estate of Jay Gold	GOLD
Homer J. Maroon Estate	MARO
Frank White Estate Alan Baker Exec.	WHIT

.05 Business Name Controls for Forms W-2, 1099-R, 2441 continued

3. Partnerships

Determine the Name Control using the following order of selection:

a. Derive the Name Control for partnership entities from the trade
   or business name of the partnership. Omit the word "The" when it is
   followed by more than one word. Include the word "The" when it is
   followed by only one word.

   Examples:

Name Control Underlined	Name Control
<u>Alab</u>aster Group B.J Fuschia, M.L. Magenta, & R. T . Indigo Ptrs.	ALAB
The <u>Gree</u>n Parrot	GREE
Harold J. Crimson & Bernard L. Ochre et at Ptr. <u>Howa</u>rd Azure Development Co.	HOWA
W.P Plum & H.N. Lavender dba <u>P & L </u>Pump Co.	P&LP
<u>Rose</u> Restaurant	ROSE
<u>The B</u>lues	THEB
<u>Viol</u>et Drywall Finishers William Wheat, Gen. Ptr	VIOL

b. If no trade or business name is present, derive the Name Control from
   the surname of the first listed partner.

   Examples:

Name Control Underlined	Name Control
<u>Burg</u>undy, Olive & Cobalt, Ptrs.	BURG
Bob <u>Oran</u>ge & Carol Black	ORAN
G.H. <u>Orch</u>id et al Ptrs.	ORCH
A.B., C.D., & E.F. <u>Turq</u>uoise	TURQ

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, 1099-R, 2441 continued

 4. Corporations

   a. Use the first four significant characters of the corporation name.

   Examples:

Name Control Underlined	Name Control
11th Street Inc.	11TH
Falcon Field Plow Inc.	FALC
J.R. Oriole Inc.	JROR
P & P Company	P&PC
Purple Martin Ltd.	PURP
RS Corporation	RSCO
Whippoorwill Homeowners Assn.	WHIP
Y-Z Drive Co.	Y-ZD
ZZZ Club	ZZZC

   b. When determining a corporate Name Control, omit the word "The" when it is followed by more than one word. Include the word "The" when it is followed by only one word.

   Examples:

Name Control Underlined	Name Control
The Meadowlark Co.	MEAD
The Swan	THES

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, 1099-R, 2441 continued

   c. If an individual name contains the following abbreviations, use
      corporate Name Control rules.

      SC – Small Corporation
      PA – Professional Association
      PC – Professional Corporation
      PS – Professional Service

      Examples:

Name Control Underlined	Name Control
<u>Carl</u> Sandpiper M.D.P.A.	CARL
<u>John</u> Waxwing PA	JOHN
<u>Sam S</u>parrow SC	SAMS

   d. When the organization name contains the word "Fund" or "Foundation,"
      corporate rules still apply.

      Examples:

Name Control Underlined	Name Control
The <u>Jose</u>ph Eagle Foundation	JOSE
<u>Kath</u>ryn Canary Memorial Fdn.	KATH

   e. Corporate Name Control rules apply to local governmental organizations
      and to chapter names of national fraternal organizations.

      Examples:

Name Control Underlined	Name Control
<u>City</u> of Fort Hulsache Board of Commissioners	CITY
<u>Hous</u>e Assn. Of Beta XI Chapter of Omicron Delta Kappa	HOUS
<u>Rho A</u>lpha Chapter Epsilon Alpha Tau Fraternity	RHOA
<u>Waxw</u>ing County Employees Association	WAXW

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, 1099-R, 2441 continued

5. Trusts and Fiduciaries

Derive the Name Control from the name of the trust, using the following order of selection:

a. For individuals, use the first four characters of the last name.

Examples:

Name Control Underlined	Name Control
Richard L. <u>Aste</u>r Charitable Remainder Unitrust	ASTE
Testamentary Trust U/W Margaret <u>Bals</u>am Cynthia Ivy & Laura Iris	BALS
Donald C. <u>Bego</u>nia Trust FBO Mary, Karen, & Michael Violet	BEGO
Jonathan <u>Peri</u>winkle Irrevocable Trust FBO Patrick Redwood Chestnut Bank TTEE	PERI

b. For corporations, use the first four characters of the corporate name.

Examples:

Name Control Underlined	Name Control
<u>Dais</u>y Corp. Employee Benefit Trust	DAIS
<u>Mari</u>gold Association Charitable Lead Trust	MARI
<u>Morn</u>ingglory Church Endowment Trust John J. Waxbean, Trustee	MORN

.05 Business Name Controls for Forms W-2, 1099-R, 2441 continued

c. For numbered trusts and GNMA Pools, use the first digits of the trust number disregarding any leading zeros and/or trailing alpha characters. If there are fewer than four numbers, use the letters "GNMA" to complete the Name Control.

Examples:

Name Control Underlined	Name Control
GNMA Pool No. 00<u>100</u>B	100G
ABCD Trust No. 00<u>1036</u>, Lotusbank TTEE	1036
Trust No. <u>1219</u>0, FBO Margaret Lily	1219
00<u>20</u>, <u>GNMA</u> POOL	20GN

d. If none of the above information is present, use the first four characters of the last name of the trustee (TTEE) or beneficiary (FBO).

Examples:

Name Control Underlined	Name Control
Testamentary Trust Edward <u>Blue</u>bell TTEE	BLUE
Trust FBO The <u>Cher</u>ryblossom Society	CHER
Trust FBO Eugene <u>Euca</u>lyptus	EUCA
Michael <u>Tuli</u>p Clifford Trust	TULI

Note: "Clifford Trust" is the name of a type of trust.

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.05 Business Name Controls for Forms W-2, 1099-R, 2441 continued

6. Other Organizations

a. The only organization that will always be abbreviated is Parent Teachers Association (PTA). The Name Control is "PTA" plus the first letter of a State, whether or not the state name is present as part of the name of the organization.

Examples:

Name Control Underlined	Name Control
Parent Teachers Association of San Francisco	PTAC
Parent Teachers Association Congress of Georgia	PTAG

b. If the business name contains an abbreviation other than "PTA," the Name Control is the first four characters of the abbreviated name.

Examples:

Name Control Underlined	Name Control
A.I.S.D	AISD
R.S.V.P. Post No.245	RSVP

c. The Name Control is the first four characters of the national title.

Examples:

Name Control Underlined	Name Control
Local 210 International Canary Assn.	INTE
Laborers Union, AFL-CIO	LABO
Post 3120, Veterans of Space Wars of U.S. Dept. of Georgia	VETE

.05 **Business Name Controls for Forms W-2, 1099-R, 2441 continued**

    d. When an individual name and corporate name appear, the Name Control is the first four letters of the corporate name.

       Example:

Name Control Underlined	Name Control
Barbara J. Zinnia <u>ZZ Gr</u>ain Inc.	ZZGR

    e. For churches and their subordinates (i.e., nursing homes, hospitals), derive the Name Control from the legal name of the church.

       Examples:

Name Control Underlined	Name Control
<u>St. Be</u>rnard's Methodist Church Bldg. Fund	STBE
Diocese of Kansas City <u>St. Ro</u>se's Hospital	STRO
<u>St. Si</u>lver's Church Diocese of Larkspur	STSI

SECTION 7 – FORMATS FOR NAME CONTROLS, NAME LINES, AND ADDRESSES

.06 Foreign Employer/Payer Address on Forms W-2/1099-R

   1. Employer/Payer Name Line 2: Foreign Street Address - If none, enter "NONE".

      Employer/Payer Address: Foreign city, province or postal code.

      Employer/Payer City: Foreign country name. Do not abbreviate the country name.

      Employer/Payer State: Period (.).

   2. Employee, Recipient/Winners with Foreign Address on Form W-2/ 1099-R

      Employee/Recipient/Winner Street Address: Foreign Street Address. If none, enter "NONE".

      Employee/Recipient/Winner Address Continuation: Foreign city, province or postal code

      Employee/Recipient/Winner City: Foreign Country Name. Do not abbreviate country name unless absolutely necessary.

      Employee/Recipient/Winner State: Enter Period (.).

SECTION 8 - STATEMENT RECORDS

.01 General Information

Statement Records are transmitted as part of the tax return and can only be used when the Field Description in the Record Layouts contains "STMbnn". Statement Records follow the Tax Form, Schedules, Forms and Authentication Records and precede the Preparer Note, Election Explanation, Regulatory Explanation, State and Summary Records.

See Section 10.02 for Error Reject Codes pertaining to Statement Records.

See Part 2 Record Layouts for the fields that can contain "STMbnn" and to determine how the data fields should be formatted.

See Part 2 Record Layouts Section 5 for the Statement Record Layout.

.02 Types of Statement Records

There are two types of Statement Records:

1. **Optional Statement Records** are used only when there are <u>not enough occurrences</u> in the Record Layouts for all the occurrences of a field needed for a particular schedule or form. An optional Statement Record must contain at least four Statement Lines. Fields that can contain a reference to an optional Statement Record are identified in the Record Layouts by an asterisk (*) before the Field Sequence Number. Related fields, which are identified by a plus sign (+), must be included in the Statement Record.

    Example:
        A taxpayer files Schedule A to claim a deduction for three types of other taxes paid, but the Record Layout for Line 8 of Schedule A only allows for one occurrence of "Other Taxes Type" (SEQ *0130) and "Other Taxes Amount" (SEQ +0135). A statement reference is entered in the field "Other Taxes Type" (SEQ *0130) of Schedule A, and each Statement Line (03-05) of the corresponding Statement Record will contain the type and amount for each of the other taxes paid.

2. **Required Statement Records** are used only when a statement of <u>explanation</u> is necessary. A required Statement Record must contain at least three Statement Lines and the second line must be blank. Fields that can contain a reference to a required Statement Record are identified in the Record Layouts by an at-sign (@) before the Field Sequence Number. Unlike optional statement fields, which can contain either data or a statement reference, required statement fields can contain a statement reference only.

.02 Types of Statement Records continued

> Example:
>   A taxpayer files Schedule A to claim a deduction for interest paid
>   on a mortgage by the taxpayer and another person, but the Form 1098
>   was received by the other person. The taxpayer is required to provide
>   the name and address of the other person. A statement reference is
>   entered in the field "Form 1098 Name/Address" (SEQ @0165) of Schedule A,
>   and the name and address are entered in Statement Line 03 of the
>   corresponding Statement Record.

.03 Statement Record Format

1. Each line of a Statement Record is counted as a separate record and
    must contain the Byte Count, Start of Record Sentinel, Record ID Group
    (Fields 0000 through 0006), Statement Data (Field 0010) and the Record
    Terminus Character. Each line is a fixed-sized record of 123 bytes
    whether transmitting in fixed or variable format. Delimiters "[" and
    "]" are not used on statement records.

2. Each statement line of the Statement Record contains the 80-character
    Statement Data.

    When the total length of the related fields is less than 80 characters,
    the line must be blank-filled to equal the length of 80 characters.

    When the total length of the related fields exceeds the 80-character
    length of the Statement Data (Field 6) of the Statement Record, the
    information must be provided in two parts. The second part is actually
    a separate "continuation" Statement Record, which requires a separate
    statement reference and statement number. Fields that can contain a
    reference to continuation statement record are identified by an asterisk
    and a plus sign (*+) before the Field Sequence Number.

3. The individual data fields of Statement Records are not keyed to Field
    Sequence Numbers. Therefore, all data fields must be formatted as fixed
    length fields, so that the data will appear in the correct positions.
    If a field contains no data, it must be blank-filled or zero-filled, as
    appropriate.

4. Each Statement Reference on the tax return must have a corresponding
    Statement Record.

5. The total number of Statement Records cannot exceed the total number of
    Statement References entered in the tax return.

.03 **Statement Record Format continued**

6. A maximum of 30 Statement References can be entered in a tax return.

7. A Statement Record can contain a maximum of two pages. The first page can contain a maximum of 50 lines. The second page can contain a maximum of 49 lines. There is an absolute limit of 99 statement lines permitted for each tax return.

   When the second page of a Statement Record is used, data fields are entered on the first line (LN51) of Page 02 in the same format used for lines 03 - 50 of Page 01.

   Note: If desired, the line numbering for Page 02 can begin with "LN01", instead of "LN51"; however, do not enter titles and column headings in the first two lines of Page 02, regardless of the line numbering style used.

8. The Statement Reference and the corresponding Statement Record contain a Statement Number, which can equal any number from 01 to 99. The Statement Reference Numbers on the tax return must be in ascending numerical sequence and must be referenced in the same order as the transmission sequence of the schedules and forms. A Statement Number cannot be used more than once.

   Note: Although Statement Numbers must be in ascending sequence, they do not have to be in consecutive numerical sequence.

9. The first line of the first page of a statement record (PG01 LN01) will contain a literal description (title) of the statement record. It is recommended that the name and page of the schedule or form precede any other descriptive information entered on this line (e.g., "SCHEDULE B PAGE 1 Schedule B Interest Income").

10. An optional statement record must contain at least four lines. The second line of the first page of an optional statement record (PG01, LN02) contains the column headings from the schedule or form (e.g., "ST PROP DESCRIP", "DATE.."), with the headings spaced as they would appear on the printed form).

11. Each subsequent line of an optional statement record (LN03 to LN99) contains the related data fields in the format in which they appear in the record layouts. It is imperative that the data fields are entered in the statement record with the exact length and format defined in the record layouts.

12. A required statement record must contain at least three lines. The second line of a required statement record (LN02) must be blank.

13. Each subsequent line of a required statement record is used as needed for a narrative statement of explanation or to supply any additional information required.

SECTION 8 – FORMATS FOR STATEMENT RECORDS

.04 Examples of Optional Statement Records

  1. Optional Statement Record - Page 01 and Page 02 (Fixed or Variable
      Format)

      The following example includes Page 01 and Page 02 of a Statement
      Record for Schedule B. The Statement Reference Number "STM 01" is
      entered in the field "Interest Payer 1" (*SEQ 0030) of Schedule B.

      Page 01 Line 01:
      ---------1---------2---------3---------4---------5---------6
      0123****STM 01   PG01 333003333 LN01 **bbbbbbbbbbbbbbbbbb**
      SCHEDULE B INTEREST INCOME**bbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb
      bb**#

      Line 01 of Page 01 contains the name (and page number if present) of
      the schedule or form and a title describing the information contained
      in the statement record. Blanks may be placed before the text in
      Line 01 to "center" the title.

      Page 01 Line 02:
      ---------1---------2---------3---------4---------5---------6
      0123****STM 01   PG01 333003333 LN02 **bbbbbbbbbbbbbbbbbb**
      INTEREST PAYER**bbbbbbbbbbbbbbbbbbbbbbbb**AMOUNT**bbbbbbbbbbbbbbbbbbbb
      bb**#

      Line 02 of Page 01 contains column titles (headers) for an Optional
      Statement Record. The spacing of the column titles is determined by
      the filer, allowing for easy readability.

      Page 01 Line 03:
      ---------1---------2---------3---------4---------5---------6

      0123****STM 01   PG01 333003333 LN03   FIRST NATIONAL BAN
      K**bbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb**00000000350 **bbbbbbbbbbbbbbb
      bb**#

      Line 03 is the first line containing data for individual fields.
      The data fields are entered in the statement lines as they would be
      entered on the schedule or form. In this example, the first data
      field is alphanumeric with a length of 50 characters. The information
      for this field equals 19 characters, including embedded blanks, so the
      remaining 31 characters are blank-filled.

      The next data field is a signed numeric field with a length of 12
      characters. A money amount field must contain 11 numeric characters
      followed by a blank for a positive amount, or by a minus sign for a
      loss. In this example, the value of the money amount is 350, so the
      entry is right-justified and zero-filled with eight zeros, allowing
      for a blank in the 12th position.

      The total of the maximum lengths of the two data fields in this example
      equals 62 characters (50 + 12). The length of the Statement Data must
      equal 80 characters, so 18 blanks follow the last character of the
      second data field.

.04 **Examples of Optional Statement Records continued**

Page 01 Line 04:
```
---------1---------2---------3---------4---------5---------6
0123****STM 01      PG01 333003333 LN04    LOTS OF MONEY MARK
ETbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb00000000200 bbbbbbbbbbbbbbbbb
bb#
```

Lines 04 - 50 of Page 01 are used to report additional interest.

Page 01 Line 50:
```
---------1---------2---------3---------4---------5---------6

0123****STM 01      PG01 333003333 LN50    CREDIT UNIONbbbbbb
bbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb00000004800 bbbbbbbbbbbbbbbbb
bb#
```

In this example, interest has been received from more than 48 payers, so Page 02 of the same Statement Record will be used.

Page 02 Line 51:
```
---------1---------2---------3---------4---------5---------6

0123****STM 01      PG02 333003333 LN51    FORTY NINE SAVINGS
 AND LOANbbbbbbbbbbbbbbbbbbbbbbbbbb00000006000 bbbbbbbbbbbbbbbbb
bb#
```

Data fields are entered on the first line (LN51) of Page 02 in the format used for lines 03 - 50 of Page 01. Although "LN51" is used as the number of the first line of Page 02 in this example, the line numbering for Page 02 can begin with "LN01", if desired. In either case, do not enter titles and column headings in the first two lines of Page 02.

Lines 51 - 99 (or 01 - 49) of Page 02 are used as needed.

.04 Examples of Optional Statement Records continued

2. Optional Statement Record (Fixed or Variable Format)

The following is an example of the first part of a two-part Statement
Record for Schedule E Page 2 Part III. The second part is actually a
separate Statement Record with its own Statement Reference Number, but
is referred to as a "continuation" Statement Record.

For the first part of the Statement Record in this example, the Statement
Reference Number "STM 02" is entered in the field "Estate/Trust Name A"
(*SEQ 1790) of Schedule E.

Line 01:
```
---------1---------2---------3---------4---------5---------6

    bb#
    ```

SECTION 8 – FORMATS FOR STATEMENT RECORDS

.05 Reporting Money Amount Fields and Totals

The following "total" fields on the tax form, schedules, and forms should reflect the total of the money amount fields reported on the related Statement Record. If a Statement Record is not present, the applicable money amount should be entered in the specific field and repeated in the "total" field.

Schedule/Form	SEQ #	Identification
Form 1040 Page 1	0590	Total Other Income
	0697	Total Alimony Paid
	0735	Total Other Adjustments
Form 1040 Page 2	1136	F8882 Literal
Schedule A	0140	Total Other Taxes Amount
	0410	Total Unreimbursed Employee Business Expense Amount
	0435	Total Other Expenses
	0495	Total Other Expenses
Schedule B	0025	Total Seller Financed Mortgage Amount

SECTION 9 - VALIDATION – TRANSMISSION RECORDS

Balance Due Returns and Refund Returns can be included in the same transmission.

If any of the following reject conditions exist in a Transmission Record, the entire transmission will be rejected.

For a detailed description of Error Reject Codes, see Publication 1346 Attachment 1.

.01 General Transmission Reject Conditions

ERC 0805, 0823, 0825

.02 TRANS Record A (TRANA) Reject Conditions

ERC 0439, 0824

.03 RECAP Record Reject Conditions

ERC 0830, 0831, 0832, 0840

SECTION 10 - VALIDATION - TAX RETURN

.01 **General Reject Conditions**

For a detailed description of Error Reject Codes, see Publication 1346 Attachment 1.

ERC 0001, 0010, 0014, 0030, 0033, 0034, 0035, 0044, 0045, 0500, 0501, 0502, 0503, 0504, 0505, 0506, 0507, 0508, 0509, 0510, 0511, 0512, 0513, 0515, 0516, 0517, 0521, 0524, 0525, 0526, 0527, 0528, 0600, 0999

.02 **Statement Record Reject Conditions**

ERC 0005, 0050, 0051, 0052, 0053

.03 **Tax Return Record Identification (Record ID) Reject Conditions**

ERC 0003, 0028, 0029, 0031, 0032, 0060, 0061, 0062, 0064, 0529

SECTION 10 - VALIDATION - TAX RETURN

.04 Tax Return Carry-Forward Lines

In general, the amount on the Tax Form (Form 1040 and Form 1040A) must equal
the amount carried from the following schedules and forms. Refer to the
specific Error Reject Code in Section 11 or Attachment 1 for exceptions and
additional conditions pertaining to the Error Reject Code.

	Field on the Tax Form:				**Field from the Schedule or Form:**	
ERC	SEQ#	Identification		Sch/Frm	SEQ#	Identification
0076:	0380	Taxable Interest	=	Sch B/	0290	Taxable Interest
0077:	0394	Total Ordinary Dividends	=	Sch B/	0525	Total Ordinary Dividends
0099:	0440	Business Income/Loss	=	Sch C	0710	Net Profit (Loss)
0078:	0450	Capital Gain/Loss	=	Sch D	2400	Combined Net Gain/Loss
						or
					2540	Allowable Loss

0186:	Sch C	0703 Total of Home Business Expense	=	8829	0450	Schedule C Allowable Expenses
0184:	Sch E	Income/Loss				
					0630	Net Farm Rent (Loss)
0251:	8615	0100 Child Taxable Income	=	1040/ 1040A	0820	Taxable Income

SECTION 11 – VALIDATION – SPECIFIC SCHEDULES AND FORMS

The first eight sub-sections of Section 11 contain Error Reject Codes pertaining to the tax form, organized as follows:

```
11.01  Tax Form - Forms 1040, 1040A, and 1040EZ
11.02  Forms 1040, 1040A and 1040EZ
11.03  Direct Deposit Information - Forms 1040, 1040A, and 1040EZ
11.04  Forms 1040 and 1040A only
11.05  Form 1040 only
11.06  Form 1040A only
11.07  Form 1040EZ only
```

The remaining four sub-sections include Error Reject Codes for the following:

```
11.09  Specific Schedules
11.10  Specific Forms
11.11  Short Term Capital Gain/Loss (STCGL) and
       Long Term Capital Gain/Loss (LTCGL)
11.12  Authentication Record
11.13  State Records
11.14  Summary Record
```

For a detailed description of Error Reject Codes, see Publication 1346, Attachment 1.

.01 Tax Form - Form 1040, Form 1040A and Form 1040EZ

ERC 0004, 0006, 0007, 0016, 0019, 0020, 0021, 0022, 0023, 0024, 0071, 0105, 0126, 0233, 0234, 0299, 0531, 0532, 0610, 0611, 0612, 0613, 0614, 0615, 0767, 0770, 1014, 1119, 1156

.02 Form 1040, Form 1040A, and Form 1040EZ

ERC 0063, 0072, 0075, 0103, 0104, 0108, 0109, 0146, 0192, 0204, 0295, 0300, 0303, 0409, 0417, 0418, 0600, 0606, 0614, 0617, 0709, 0769, 1015, 1016, 1019, 1025, 1026, 1032, 1033, 1034, 1035, 1037, 1038, 1049, 1051, 1068 1137, 1240

.03 Direct Deposit Information for Form 1040, Form 1040A, and Form 1040EZ

ERC 0019, 0105, 0233, 0234, 1111, 1119

.04 Form 1040 and Form 1040A

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.01 General Description

Federal/State Electronic Filing is a cooperative one-stop filing program
between IRS and state tax administration agencies. This program allows
the filing of both federal and state income tax returns through the IRS
Electronic Filing System. This effort represents one of the Service's
programs in support of burden reduction for the tax preparation community
and the taxpayers they represent.

The IRS will function strictly as a "data conduit" for electronic state
returns. The term "data conduit" defines a strictly controlled process
to receive, temporarily store, and then provide correctly formatted state
data to the state tax administration agency.

1. State-Only Filing

Any Federal/State *e*-file participant has the option of participating in
State-Only *e*-filing. Taxpayers will have the choice of filing a State
Return without the standard Form 1040 attached for the following instances:

- Previously rejected state *e*-file return
- State return input separately from Federal return
- Part-year resident state return
- Multiple state returns for one taxpayer
- Non-resident state returns
- Married filing separately with state, but filing jointly with
  Federal return

2. Federal/State *e*-file Returns with Foreign Addresses

IRS *e*-file accepts Federal/State *e*-file returns with Foreign Addresses,
including the U.S. possessions of Puerto Rico. These returns will be processed
at the Austin Submission Processing Center.

Note: Puerto Rico is not considered foreign addresses. Please use the
domestic address fields for these returns. However, they are processed
at the Austin Submission Processing Center.

3. State Acknowledgements

The Internal Revenue Service provides State Acknowledgement service on its
Front End Processing System known as EMS (Electronic Management System).
Participating Federal States can transmit their State Acknowledgements to
EMS for trading partners to pick up when they pick up their Federal
Acknowledgement.

.02 Federal/State Filing - Participating States

Seven states will participate in the 2012 Federal/State *e*-file Program. |

Each state will issue its own publications to detail the state's software
specifications and testing requirements. Software developers will need to
contact the appropriate state to obtain electronic filing publications.
An updated roster of state coordinators is available on www.irs.gov.

SECTION 12 – FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.03 Data Communications

All *e*-file returns will be transmitted to two transmission centers, Martinsburg Submission Processing Center (ECC-MTB) and Tennessee Computing Center (ECC-MEM). The data communications procedures described in Section 1 will be the same for transmitting Federal/State electronic returns as for transmitting federal electronic returns.

The following chart reflects the 7 participating Federal/State supporting the TY 2012/ PY2013 Legacy Contingency plan. Federal/State electronic returns are to be transmitted based on the following state home service center relationship.

Home Service Center	Transmit Site	States Supported
Andover	ECC-MTB*	DE MD NJ
Austin	ECC-MTB	OK
Kansas City	ECC-MEM**	No State Supports Legacy IMF Contigency Plan
Fresno	ECC-MEM	No State Supports Legacy IMF Contigency Plan
Philadelphia	ECC-MTB	GA KY SC

IRS will reject Federal/State returns that are not submitted to the correct home service center. The correct home Submission Processing Center is always the center supporting the state of the taxpayer's residence. In other words, if it is a Federal/State electronic return, always transmit it to the home Submission Processing Center that supports the state. For federal returns only, the ERO should always transmit to supporting home service center. For online federal returns, transmission should be based on taxpayer's address.

* ECC-MTB represents Martinsburg, West Virginia
** ECC-MEM represents Memphis, Tennessee

SECTION 12 – FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

04. **Record Format General Description**

The fifth series of federal records (after return, schedule, forms, and statement records) are the electronic state records. There are two different electronic state records, the "generic" and the "unformatted". A combination of these records make up the state return packet. The IRS record layouts for the generic and unformatted records are specified in the Part 2 Record Layouts.

The state records should be formatted following IRS and state specifications. All the tax information that the state requires is included in the state packet. The IRS does not augment the state packet in any way. The state records are considered logical records and all the specifications provided in Section 2 apply except for the following:

 1. The counts entered in Number of Logical Records in Tax Return (SEQ 0040) and Number of Form Records (SEQ 0090) of the Summary Record must include a count for each state packet.

 14. Increase the counts in Number of Logical Records in Tax Return (SEQ 0040) and Number of Form Records (SEQ 0090) by "1" for each state packet, whether there are one or ten records in the state packet. The IRS will reject the return if these counts are not accurate.

.05 **File Format General Description**

The Federal/State electronic filing process requires that participating electronic filers comply with the following file specifications:

 1. A state packet cannot be filed without the associated federal return. The IRS will not accept more than one state packet per electronic return. The state packet can be associated with a federal refund, zero-balance or balance due return.

 2. The state packet must be placed after the federal statement records and before the preparer notes record. Any other order will cause return rejection.

SECTION 12 - FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.06 File Format Fixed and Variable Length Options

Electronic filers can transmit Federal/State returns using the fixed or variable length options described in Section 2. State records transmitted to IRS using the variable format option are expanded by IRS into fixed format before the records are provided to the state. Some states require copies of the federal return within the unformatted state records. Since IRS expands these records to fixed format before they are provided to the state, in order for states to receive a "variable" format within the fixed format the following specifications apply to state records:

  1. No data field in any state record should contain the following stream of characters or the return will be rejected by the Data Communications Subsystem:

      ****TRANA, ****TRANB, ****1040 PG01, ****RECAP, ****SUM.

  2. State records must not contain the following data characters: "[" "]" "#" "*" within the state's variable format. These are reserved by the IRS for use as delimiters.

  3. The following delimiters must be used to transmit the unformatted state records as variable to the state:

          "{" instead of "[" and
          "}" instead of "]" and
          "$" instead of "#" and
          "!" instead of "*".

      The hexadecimal representations of these characters are:

Symbol	ASCII Hex		Symbol	ASCII Hex
[	5B		}	7B
]	5D		}	7D
#	23		$	24
*	2A		!	21

  4. The IRS Record Layouts for generic and unformatted records contain the only valid Field Sequence Numbers for IRS processing. Any Sequence Number transmitted that is not listed, or any Sequence Number transmitted that duplicates a prior Sequence Number will cause rejection.

.07 Types of Characters

The character specifications provided in Section 5 for ALPHA, NUMERIC, and ALPHANUMERIC apply to state records. The section "Special Cases for Special Characters" does not apply to state records. For example, each state may have requirements which are different from IRS requirements for formatting the taxpayer's name and address.

SECTION 12 – FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.08 Validation of State-Only Returns

1. State-Only return data will contain a Form 1040, Page 1 record, state return packet, and a Summary record. The State Abbreviation of the Form 1040 (SEQ 0087) must contain the value "SO", indicating that: (1) State-Only return data is attached, (2) State-Only processing will be performed, and (3) Form 1040, Page 2 and foreign 1040 processing will be bypassed.

2. The State-Only return should always be transmitted to the Center that supports that particular state. State-Only returns with Foreign addresses will be processed at Austin Submission Processing Center.

4. If the State Abbreviation (SEQ 0087) is equal to "SO" in variable format of the Form 1040 Page 1 record, then the highest sequence number present cannot be greater than the Address Indicator (SEQ 0097). If the State Abbreviation field is equal to "SO" in fixed format of the Form 1040 Page 1 record, then all fields beyond the Address Indicator field must be blank.

5. The Primary SSN of the State-Only 1040 record (SEQ 0010) must equal the SSN of the attached State generic record and the Taxpayer Identification Number of the Summary record (SEQ 0002).

6. The Primary SSN (SEQ 0010) and Primary Name Control (SEQ 0050) of State-Only 1040 record must match data from the IRS Master File.

6. The Secondary SSN (SEQ 0030) and Secondary Name Control (SEQ 0055) of State-Only 1040 record must match data from the IRS Master File.

7. The RECAP Record will contain a new count for the total number of State-Only returns (SEQ 0130).

.09 Validation of Federal/State e-file returns with Foreign addresses

1. Addresses from the U.S. possessions will be formatted as U.S. addresses. Addresses from the foreign countries will be formatted using new foreign country address fields.

2. All returns with a foreign address will be transmitted at the Austin Submission Processing Center.

3. The following IRS Error Reject Code is used exclusively for errors in the Foreign State return packet.

    0419 STATE RECORD

    State Record – If Address Indicator (SEQ 0097) on the Tax Return is equal to "3" (indicating a foreign country), then the following fields must be present: Foreign Street Address (SEQ 0077), Foreign City, State or Province, Postal Code (SEQ 0087), and Foreign Country (SEQ 0098); and the following fields cannot be present: Street Address (SEQ 0080), City (SEQ 0085), State Abbreviation (SEQ 0095) and Zip Code (SEQ 0100).

    If Address Indicator (SEQ 0097) on the Tax Return is not equal to "3", then the following fields cannot be present: Foreign Street Address (SEQ 0077), Foreign City, State or Province, Postal Code (SEQ 0087), and Foreign Country (SEQ 0098).

    0430 STATE RECORD

    State Record – If State Abbreviation (SEQ 0095) equals "AS", "GU", "MP", "PR" or "VI"; or Address Ind SEQ (0097) on the State Only 1040 equals "3" it must be processed at Austin.

SECTION 12 – FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.10   Acknowledgement File for Federal/State-Only Transmissions

Each file of electronic returns transmitted by an electronic filer will normally be acknowledged within forty-eight hours of receipt and, if the Federal/State return is accepted, the state packet will be available to the State Agency from the Internal Revenue Service for retrieval within twenty-four hours of IRS Acknowledgement.

The ACK Key Record received by the transmitters will contain a State Packet Code. This code indicates whether a state packet was filed in conjunction with the accepted or rejected federal return. IRS acceptance of the federal return and receipt of the state packet **does not imply state Acknowledgement or acceptance of the state tax return**.

The State Packet Code in the ACK Key Record will be blank if there is no state packet associated with the federal return, or will consist of the two character state abbreviation contained in the State Code field of the generic record. This is the only field in the ACK Key Record that is changed due to the presence of a state return packet. The Expected Refund or Balance Due field, the Duplicate Code field, and EFT Code field refer only to the federal return.

The state records are identified in the ACK Error Record by the Form Record Id Type ("STbbbb"),and Form Number ("0001bb" or "0002bb") Page Number and Form/Schedule Number.

Once a state packet is available for state retrieval, filers need to contact the respective state to resolve taxpayer problems. Error resolution for state returns is the responsibility of the state tax administration agency. The IRS will purge state packets thirty days from IRS acknowledgement of federal return acceptance. Electronic filers must contact the states to obtain state Acknowledgement of state return receipt.

.11   State Acknowledgement File Transmitted by State Agencies to EMS

The Internal Revenue Service provides State Acknowledgement service on its Front End Processing System, known as EMS (Electronic Management System). Participating Federal States can send their State Acknowledgements to EMS for trading partners to pick up when they pick up their Federal Acknowledgement.

There will be a new state abbreviation code in the State Acknowledgement Reference File Name extension. For example: "SSC", the first "S" represents state acknowledgement and the last two letters "SC" represent the state abbreviation code for South Carolina.

NOTE: "Transmitter" in the outer envelope refers to the state (the state is a transmitter sending state ACKS to the IRS). "Transmitter" in the inner envelope refers to the tax return transmitter, the recipient of the State Acknowledgements.

1. The State will transmit state tax return acknowledgements in the IRS 120 byte format. The State Acknowledgements must be able to interface with EMS as outlined in Publication 1346 Part 1, Section 1, Data Communications.

2. The State will transmit Acknowledgement files to EMS with an outer TRANA, an outer TRANB, at least one inner TRANA, at least one inner TRANB, and at least one ACK Key Record, at least one inner RECAP, and an outer RECAP Record. It may contain zero or multiple ACK Error Records, The ACK Error Records can only be present when there is an accompanying ACK Key Record.

.11   State Acknowledgement File Transmitted by State Agencies to EMS continued

3. The Acknowledgement file transmission may consist of Acknowledgement files for multiple Trading Partners.

4. Field 0170 of the TRANA Record must be "Z" equal State Acknowledgement file.

5. If the transmission is successful, the state will receive a message, "Transmission file has been received with the following GTX Key:_____".

6. EMS will read and process the ETIN in Field 0060 of the "inner envelope" of the TRANA Record and place the Acknowledgement File in "Transmitters" outbound mailbox.

7. The Trading Partner will receive all acknowledgements that are in status Waiting TP Delivery when the Trading Partner receives acknowledgements, whether the source is Federal or State.

8. Acknowledgements are archived 14 calendar days after Acknowledgements are picked up.

9. Transmitters must contact the State regarding rejections, taxpayer problems or any other questions that may arise about the state acknowledgement. See Section 12.19 of Publication 1346 for the State Agency contacts.

10. Transmitters/Trading Partners (TPs) should download, at least every five days, the Transmission Status Report to be sure they have received all of their ACK Files. If they are missing an ACK file and have the GTX key, they can call the IRS e-help to re-hang it.   If they do not obtain the report; they need to call the State Help Desk to obtain the GTX key for a specific return's ACK file and then call IRS to re-hang the specific file.

11. The State must download the State Transmission Report, at least every five days, and store every state and individual TP's GTX Key from the report and associate it with each Social Security Number. When a TP inquires about an ACK File for a specific return, the State Help Desk can give them the TP's GTX Key to be used when the TP calls IRS e-help to re-hang an ACK File.

SECTION 12 – FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

11a. <u>Processing and Validations of State Acknowledgement (Outer Envelope)</u>

<u>Note: Lower case "b" = blank</u>

Outer TRANA:
- Byte Count must be 120 bytes
- Start of Record Sentinel "****"
- Record ID Field must be TRANAb (all caps)
- Field 0040 Processing Site
- Field 0060 (ETIN) must be valid in TPDS and must match ETIN in logon
- Field 0160 (Production-Test Code) must match T/P code in Transmitters profile data base
- Field 0170 (Transmission Type Code) must be a "Z" = State ACK
- Record Terminus Character must be a "#" sign
  Note: Validation for Julian Day is not a requirement for States

Outer TRANB:
- Byte Count must be 120 bytes
- Start of Record Sentinel "****"
- Record ID Field must be TRANBb (all caps)
- Record Terminus Character must be a "#" sign

Outer RECAP:
- Byte Count must be 120 bytes
- Start of Record Sentinel "****"
- Record ID Field must be RECAPb (all caps)
- Field 0030 (Total Inner TRANA Count) must equal number of TRANA records in the (Inner Envelopes)
- Field 0040 ETIN must = TRANA ETIN Field 0060
- Field 0140 Acknowledgement File Name (GTX Key) for transmission must be blank (IRS will populate)
- Record Terminus Character must be a "#" sign

11b. <u>Processing and Validations of State Acknowledgement (Inner Envelope
      Format)</u>

> Inner TRANA:
> - Byte Count must be 120 bytes
> - Start of Record Sentinel "****"
> - Record ID Field must be TRANAb (all caps)
> - Field 0040 (Processing Site) must match valid processing site
> - Field 0060 (ETIN) must match valid TP ETIN in Transmitter
>   Profile Data Base
> - Field 0160 (Production-Test Code) must be P or T; if Outer = T,
>   then Inner must equal "T"
> - Field 0170 (Transmission Type Code) must be "Z" = State
>   Acknowledgement
> - Record Terminus Character must be a "#" sign
>
>
> Inner TRANB:
> - Byte Count must be 120 bytes
> - Start of Record Sentinel "****"
> - Record ID must be TRANBb (all caps)
> - Record Terminus Character must be a "#" sign
>
>
> Inner ACK KEY:
> - Byte Count must be 120 bytes
> - Record Sentinel "****"
> - Record ID Field must be ACKbbb (all caps)
> - Field 0130 (State Packet Code) must be a valid 2 ltr state code
> - Record Terminus Character must be a "#" sign
>
>
> Inner ACK Error is Optional:
> - Byte Count must be 120 bytes
> - Start of Record Sentinel "****"
> - Record ID Field must be ACKRbb (all caps)
> - Record Terminus Character must be a "#" sign
>
>
> Inner RECAP:
> - Byte Count must be 120 bytes
> - Record Sentinel "****"
> - Record ID Field must be RECAPb (all caps)
> - Field 0030 (Total ACK Key Count) must equal number of
>   ACK Key Records
> - Field 0040 (ETIN) must match Inner TRANA Field 0060 ETIN
> - Field 0100 (Total ACK Error Count) must equal number of
>   ACK Error Records
> - Field 0140 Acknowledgement File Name (GTX Key) for transmission
>   must be blank (IRS will populate) Record Terminus Character must
>   be a "#" sign

SECTION 12 – FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.12   Transmission Status Report

A Transmission Status Report is available for States to download that
will show the status of the Acknowledgement files when selected from the
main menu. The State Report will show the "outer envelope" GTX Key of
original State transmission, ETIN for each Acknowledgement file in the
"inner envelope" GTX key assigned to trading partner's acknowledgement,
and current status of each Acknowledgement.

The Trading Partner's report shows the status of their transmissions
and acknowledgements.

The reports will show the last 5 calendar days of transactions for
successfully processed files, showing what was picked up and not
picked up by Trading Partners. Acknowledgements are archived
14 calendar days after Acknowledgements are picked up. Transmissions
that are rejected will not be included in the report. If no data is
available, you will receive a message, "No Data Available."

See Section 1 – Data Communications for more information about the
Transmission Report.

SECTION 12 – FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.13   State ACK Record - Outer Envelope TRANA

1.   Transmission Information Record – A

STATE ACKNOWLEDGEMENT FILE USE ONLY
OUTER ENVELOPE

Legend: Req'd and V = data must be present and it will be checked by IRS.
        Rec = Recommended, data is not mandatory by IRS, but recommended.
        Opt = Optional, Field is available for states to use.

Field No.	Identification	Form Ref.	Length	Field Description
	Byte Count		4	"0120" [Req'd & V]
	Start of Record Sentinel		4	Value "****" [Req'd & V]
0000	Record ID		6	Value "TRANAb" [Req'd & V]
0010	Employer Identification Number of Transmitter [state] EIN		9	N [Req'd, not V]
0020	Transmitter [state] Name		35	AN [Req'd, not V]
0030	Type Transmitter		16	Blank or "Preparer's Agent" [Opt]
0040	Processing Site		1	"C" = Andover "E" = Austin "F" = Kansas City "G" = Philadelphia "H" = Fresno (See Processing Site Chart in Section 1) [Req'd & V]
0050	Transmission Date		8	YYYYMMDD [Req'd, not V]
0060	Electronic Transmitter [state] Identification Number [ETIN]		7	N [ETIN plus Transmitter's Use Code] First 5 bytes are Required, the other 2 must be 00-99 [Req'd & V]
0070	Julian Day		3	N [Req'd, not V]

.13   State ACK Record - Outer Envelope TRANA continued

1.   Transmission Information Record – A continued

SECTION 12 – FEDERAL/STATE ELECTRONIC FILING SPECIFICATIONS

.17 Validation of State Records

Most standard reject conditions for state records are listed in the preceding section. Additionally, filers must follow these specifications or the state record(s) could be rejected.

1. The state packet consists of the state generic record followed by all associated unformatted records for the taxpayer. A maximum of one state generic record, and zero to twenty-five unformatted records can be contained in a packet. <u>Only one state packet is allowed per federal return.</u>

2. A generic record must be present in each state packet. Only one generic record is allowed per state packet. The generic record must precede any unformatted records for that tax return.

3. An unformatted record is not required; however, up to twenty-five unformatted records are allowed per state return packet. If more than twenty-five are present, the entire return is rejected with Error Reject Code 0045.

4. The Header Section in the generic and unformatted records (SEQ 0000 through SEQ 0020) must be present.

5. The Record IDs in both the generic and unformatted records are checked for consistency. If inconsistent, the record is rejected. The Record ID consists of 26 characters, broken down as follows:

```
Record ID Type                  6    (Both Records "STbbbb")
Form Number                     6    (Generic Record "0001bb"
                                     Unformatted Record "0002bb")
Page Number                     5    (Both Records"PG01b")
Taxpayer Identification Number  9    N (Primary SSN)
Filler                          1    blank
Form/Schedule Number            7    N (Generic"0000001"
                                     Unformatted "0000001 to "0000025")
```

6. The State Code represents the taxpayer's residence state. The taxpayer's residence state may be different than the state of the taxpayer's address. State return packets are distributed to states based on the state code in the generic record. The state code must be a valid Legacy Federal/State Electronic Filing state. Valid states in Tax Year 2012 are:

```
Kentucky........KY    Georgia.........GA    New Jersey......NJ
Maryland........MD    Oklahoma........OK    Delaware........DE
South Carolina..SC
```

The state code must be consistent throughout the generic record and all associated unformatted records for the taxpayer.

.17 Validation of State Records continued

7. The State Direct Deposit/Direct Debit Section should be blank if there is no direct deposit or direct debit at the state level. There is no connection between the federal and state direct deposit or direct debit fields since these can differ. Taxpayers may elect to have the federal and state direct deposit or direct debits in the same account, or they can choose different accounts.

8. If there is an entry in the State Direct Deposit/Direct Debit Section the IRS will verify the state Routing Transit Number (RTN). If the state RTN is not listed on the current Financial Organization Master File (FOMF) an indicator will be set for the state's future use. The return will not be rejected.

9. The following Entity Section fields of the generic record must be significant or the returns will be rejected by the IRS: Name Line 1 (SEQ 0060), Address Line 1 (SEQ 0075), City (SEQ 0085), State Abbreviation (SEQ 0095), and Zip Code (SEQ 0100).

10. Any entry in the Consistency Section of the Generic Record, must equal the corresponding Federal Tax Form entry. If an entry is significant (i.e., not blank), it will be compared to the federal return. If a Consistency Section entry does not match the corresponding federal entry, the return will be rejected.

    To the extent possible, the Sequence Numbers for Forms 1040, 1040A, and 1040EZ are the same for the equivalent fields. If no Sequence Number is given, the field does not exist for that form.

Generic Record Consistency Section	1040	1040A	1040EZ
	----Sequence Number----		
0150 Federal Filing Status----------------	0130	0130	(See note)
0155 Total Federal Exemptions------------	0355	0360	(See note)
0160 Wages, Salaries, Tips---------------	0375	0375	0375
0165 Taxable Interest--------------------	0380	0380	0380
0170 Tax Exempt Interest-----------------	0385	0385	0385
0175 Dividends---------------------------	0394	0394	
0180 State/Local Income Tax Refund--------	0420		
0185 Taxable Social Security Benefits-----	0557	0557	
0190 Keogh Plan and SEP Deductions--------	0650		
0195 Adjusted Gross Income---------------	0750	0750	0750
0200 Standard/Itemized Deductions---------	0789	0789	
0205 Earned Income Credit----------------	1180	1180	1180

    Note: The Generic Record Federal Filing Status (SEQ 0150) and the Total Federal Exemptions (SEQ 0155) can contain an entry when the corresponding federal form is a Form 1040EZ and IRS will not reject the Federal/State return.

    SEQ 0032 of the Generic Record is for IRS Use Only. IRS will populate this field.

.17 Validation of State Records continued

11.   The numeric fields (SEQ 0350 – SEQ 0675), if not blank, will be
        checked for format.

12.   The IRS will check the Declaration Control Number (DCN) in the federal
        Form 1040, 1040A, or 1040EZ against the Declaration Control Number
        (SEQ 0020) of the Generic and Unformatted Records and reject both the
        federal and state returns if these are not equal.

13.   The IRS will check the Return Sequence Number (RSN) in the federal
        Form 1040, 1040A, or 1040EZ against the Return Sequence Number (SEQ 0023)
        of the Generic Record and reject both the federal and state returns if
        these are not equal.

14.   The IRS will check all Federal/State returns for the following fields on
        Form(s) W-2: If "State Income Tax 1" (SEQ 0400) contains a positive value,
        then "State Name 1" (SEQ 0370) should contain a Standard Postal State
        Abbreviation. If "State Income Tax 2" (SEQ 0470) contains a positive
        value, then "State Name 2" (SEQ 0440) should contain a Standard Postal
        State Abbreviation. If this is not done, both the federal and state
        returns will be rejected with Error Reject Code 0405.

15.   If the federal return is an online return, the associated state return
        must also be an online return. IRS will check the Online-State-Return
        (SEQ 0049) indicator of the state Generic Record. If these do not match,
        the Federal/State return will be rejected.

16.   The following IRS Error Reject Codes are used exclusively for errors in
        the state return packet:

            0009   RESERVED

        The unformatted state record in fixed format exceeds the maximum length.

            0400   STATE RECORD

        The Generic Record must be present in the state data packet.

        An Unformatted Record was present without the Generic Record, or the
        Unformatted Record preceded the Generic Record.

            0401   STATE RECORD - STATE CODE (SEQ 0010)

        The State Code (SEQ 0010) in the Header Section of the Generic Record
        must be valid for the processing service center.

        The State Code must be consistent throughout Generic and associated
        Unformatted Records for the return.

        Exception: If State Abbreviation (SEQ 0095) of State Only Return equal
        "AS", "GU", "MP" "PR", or "VI" allow returns to be processed in Austin.

.17 **Validation of State Records continued**

0402   STATE RECORD - ENTITY SECTION

All "Required Entry" fields in the Entity Section of the Generic Record (SEQ 0060, 0075, 0085, 0095, 0100) must be present.

0403   STATE RECORD - CONSISTENCY FIELDS

Any entry present in the Consistency Section of the Generic Record must equal the corresponding federal Tax Form entry.

0404   STATE RECORD - DECLARATION CONTROL NUMBER (DCN)

The DCN (SEQ 0020) of the Generic Record must equal the DCN of the federal Tax Form.

The DCN (SEQ 0020) of the Generic Record must equal the DCN (SEQ 0020) of the Unformatted Record.

0405   STATE RECORD - FORM W-2 CHECK

Each Form W-2 associated with a State Record must contain a valid State Abbreviation in State Name (SEQ 0370, 0440) when there is a significant entry in State Income Tax (SEQ 0400, 0470).

0406   STATE RECORD

A valid two-digit EFIN Prefix Code is permitted, if not assigned to a processing site, when State Data is present; or when Processing Site equals "E" Austin and at least one of the following is present: Form 2555, Form 2555-EZ, Form 4563, Form 5074, Form 8689, Form 8833, and/or Form 8891; an Address Ind (SEQ 0097) of the Tax Form equal to "3"; a State Abbreviation (SEQ 0087) of the Tax Form equal to "AS", "GU", "MP", "PR", or "VI".

0407   STATE RECORD - RETURN SEQUENCE NUMBER (RSN)

The Return Sequence Number (RSN) (SEQ 0023) of the Generic Record must equal the RSN of the Federal Tax Form.

0408   STATE RECORD - ONLINE RETURN INDICATOR

When Online-State-Return (SEQ 0049) of the Generic Record is equal to "O", the Transmission Type Code (SEQ 0170) of the TRANS Record A (TRANA) must equal "O", and vice versa.

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

IRS has two electronic signature options available for taxpayers to sign their tax returns, the Self-Select PIN and Practitioner PIN methods.

Questions or comments regarding Section 13 should be sent to:

Internal Revenue Service
John Manaras, W:CAS:SP:ES:I, NCFB C5-372
5000 Ellin Road
Lanham, MD 20706
Phone: (202) 283-3080

01.   What is the Self-Select PIN Method?

The Self-Select PIN method is one option for taxpayers to use when signing their electronic tax return. The PIN is any five numbers (except ALL zeros) the taxpayer chooses to enter as their electronic signature. A PIN is needed for each taxpayer if filing a joint return, and each can choose any five numbers. If the taxpayer is filing through an Electronic Return Originator (ERO), or using Tax Preparation Software, the taxpayer Date of Birth and Prior Year Adjusted Gross Income (AGI) or Prior Year PIN/Electronic Filing PIN from the original return must also be entered for authentication.

If the prior year information is not available taxpayers may now obtain an Electronic Filing PIN as an alternate authenticator.

If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN. The taxpayer consents to the ERO's choice by completing and signing Form 8879, IRS e-file Signature Authorization containing the intended taxpayer PIN. The taxpayer PIN can be systemically generated or manually assigned into the electronic format and/or the signature authorization form. However, the ERO must receive the signature authorization signed by taxpayer(s) before they transmit the return or release it for transmission to the IRS.

See Questions and Answers for the Self-Select PIN Method at the end of this Section.

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

02.   Taxpayer Eligibility Requirements for the Self-Select PIN Method

The following taxpayers **are eligible** to use this option:

- Taxpayers who are eligible to file Form 1040, 1040A or 1040EZ for Tax Year 201**2**.

- Taxpayers who did not file for Tax Year 201**1**, but have filed previously.

- Taxpayers who are age 16 or older on or before December 31, 201**2**, who have never filed a tax return.

- Primary taxpayers under age 16 who have filed previously.

- Secondary taxpayers under age 16 who have filed in the immediate prior year.

- Military personnel residing overseas with APO/FPO addresses.

- U.S. Citizens and resident aliens residing in the U.S. Possessions of the U.S. Virgin Islands, Puerto Rico, American Samoa, Guam and the Commonwealth of the Northern Mariana Islands, or with foreign country addresses.

- Taxpayers filing a Form 4868 (extension of time to file) or Form 2350 (extension for certain U.S. citizens living aboard).

- Those who are filing on behalf of deceased taxpayers.

- Taxpayers using a tax practitioner and required to file the following forms, which must be attached to Form 8453, U.S. Individual Income Tax Transmittal for an IRS e-file Return:

  o Appendix A, Statement by Taxpayer Using the Procedures in Rev. Proc. 2009-20 to Determine a Theft Loss Deduction Related to a Fraudulent Investment Arrangement
  o **Form 8283**, Non-Cash Charitable Contributions, Section A (if any statement or qualified appraisal is required) or Section B, Donated Property, and any related attachments (including any qualified appraisal or partnership Form 8283)

The following taxpayers **are NOT** eligible to participate:

- Primary taxpayers under age 16 who have never filed.

- Secondary taxpayers (spouse) under age 16 who did not file in the immediate prior year.

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

03.   What is the Practitioner PIN method?

The Practitioner PIN method is another electronic signature option for taxpayers to e-file using a five digit PIN. The taxpayer chooses any five digits, except ALL zeros, as their PIN signature and must use an Electronic Return Originator (ERO) to e-file under this method. A PIN is needed for each taxpayer if filing a joint return, and each can choose any five numbers.

NOTE: The taxpayer's Date of Birth and Prior Year Adjusted Gross Income or Prior Year PIN or their Electronic Filing PIN are not required.

The Practitioner PIN method offers another signature option as well for EROs to use in preparing and transmitting Forms 1040, 1040A and 1040EZ to IRS.

If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN. The taxpayer consents to the ERO's choice by completing and signing an IRS e-file signature authorization (Form 8879) containing the intended taxpayer PIN. The taxpayer PIN can be systemically generated or manually assigned into the electronic format and/or the signature authorization form. However, the ERO must receive the signature authorization signed by taxpayer(s) before they transmit the return or release it for transmission to the IRS.

See Questions and Answers below for the Practitioner PIN method.

04.   Taxpayer Eligibility Requirements for the Practitioner PIN Method

The following taxpayers <u>are eligible</u> to use this option:

- Taxpayers who are eligible to file Forms 1040, 1040Aor 1040EZ
  for Tax Year 201**2**.
- Military personnel residing overseas with APO/FPO addresses.
- U.S. citizens and resident aliens residing in the U.S. Possessions
  of the U.S. Virgin Islands, Puerto Rico, America Samoa, Guam and the
  Northern Mariana Islands, or with foreign country addresses.
- Taxpayers filing a Form 4868 (extension of time to file).
- Those who are filing on behalf of deceased taxpayers.

There is no age restriction on who can use the Practitioner PIN method; e**veryone that's eligible** to e-file is eligible **to use the Practitioner PIN method.**

.05   Data Validation

The following information must be present for the taxpayer when using the Self-Select PIN option for e-file:

<u>Primary Taxpayer:</u>

> Social Security Number
> Name Control
> Date of Birth
> Prior Year Adjusted Gross Income (AGI)
>   (prior to any adjustment or change by IRS) or
> Prior Year PIN or
> Primary Electronic Filing PIN
>
> **NOTE:** Taxpayers may provide either prior year AGI or prior year PIN or
> Electronic Filing PIN (EFP), or all three. Only one has to match to be
> authenticated.

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

.05   Data Validation continued

<u>Spouse, When Married Filing Jointly:</u>

>   Spouse Social Security Number
>   Spouse Name Control
>   Spouse Date of Birth
>   Prior Year Adjusted Gross Income (AGI)
>   (prior to any adjustment or change by IRS)or
>   Prior Year PIN or
>   Spouse Electronic Filing PIN
>
>   **NOTE:** Taxpayers may provide either prior year AGI or prior year PIN or
>   Electronic Filing PIN (EFP), or all three. Only one has to match to be
>   authenticated.

<u>Special Circumstances</u>:

If taxpayers filed a joint return for Tax Year 20**11** and want to file separate
returns for Tax Year 201**2,** they will each enter the same AGI or their PIN from
the 20**11** joint return on their separate returns for Tax Year 201**1**.

If taxpayers did not file jointly for Tax Year **2011**, they are required to
provide their respective AGI amount or PIN.

If a return was not filed for Tax Year **2011**, the taxpayer is required to
enter zero "0" in the AGI field. (Prior Year PIN field should be left blank)

If taxpayers filed Form 1040PR for Tax Year **2011**, the taxpayer is required to
enter zero "0" in the AGI field. (Prior Year PIN field should be left blank)

>   <u>Note</u>: Taxpayers who filed their **2011** tax return after November 30, 2012
>   are eligible to use the Self-Select PIN for *e*-file. However, these
>   taxpayers will need to submit zeros for their Adjusted Gross Income.
>   In the event their return is rejected due to a mismatch of AGI, they
>   can resubmit their return using their actual values. The extract
>   creating the eligible Self-Select PIN file is created in December and
>   due to processing constraints, late filers may or may not be included.
>   Late filers can still use the Self-Select PIN.

05.   <u>**Data Validation continued**</u>

<u>Validation of Data</u>:

Date of Birth   An exact match on day, month and year against
                             Social Security Administration records is required
                             for all online returns with or without the
                             Self-Select PIN usage. If a married filing jointly
                             (MFJ) return is filed through a practitioner
                             electronically and taxpayer(s)uses the Self-Select
                             PIN(s) to sign their return, the date of birth for
                             the primary taxpayer and spouse are required.
                             However, their tax return will not reject if the
                             Dates of Birth do not match. The Date of Birth
                             Validity Code (Field 0117) will be present in the
                             Acknowledgement Record. The Date of Birth Validity
                             Code identifies whether validation of the Date of
                             Birth (DOB) is required; and if the DOB is required,
                             whether the DOB matched on the IRS File or not.

Prior Year Adjusted   The Prior Year AGI is entered in whole dollar
Gross Income   amounts. There will be a one dollar
                             tolerance level.

Prior Year PIN   The Prior Year PIN is the five digit PIN used to
                             sign the return in the previous year.

Electronic Filing PIN   Five digit PIN generated by IRS to be used as an
                             alternate authenticator when the prior year
                             information is not available. This is a one time use
                             PIN. A new one will be generated each year.

Primary/Spouse   The Personal Identification Number (PIN) is
Signature PIN   self-selected or agreed to by the taxpayer. A PIN
                             is required for the primary and secondary taxpayer.
                             PIN is composed of 5 digits. All zeros are not
                             permitted. The spouse can use the same PIN as the
                             primary. The PIN is used on the current year tax
                             return as the taxpayer's signature.

Assignment of   If the taxpayer agrees, it is acceptable for an ERO
Taxpayer PIN   and/or software program to generate or assign the
                             taxpayer PIN. The taxpayer consents to the ERO's
                             choice by completing and signing an IRS *e*-file
                             signature authorization (Form 8878 or 8879) containing
                             the intended taxpayer PIN. The taxpayer PIN can be
                             systemically generated or manually assigned into the
                             electronic return format and/or the signature
                             authorization form. However, the ERO must receive
                             the signature authorization signed by the taxpayer(s)
                             before they transmit the return or release it for
                             transmission to IRS. This guideline refers to returns
                             filed using the Self-Select or Practitioner PIN method.

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

.06 IRS *e*-file Signature Authorizations Form 8878 and 8879

1. Form 8879, IRS *e*-file Signature Authorization, is used to authorize an Electronic Return Originator to enter the taxpayer's self-select personal identification number (PIN) as the taxpayer's signature on electronically filed Forms 1040, 1040Aand 1040EZ income tax returns. Form 8879 is provided as a convenience when the taxpayer is unavailable or unable to return to the office, or it is inconvenient for the taxpayer to personally sign the electronically prepared income tax return. Form 8879 is then maintained by the ERO, should not be sent to the IRS.

2. If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN. The taxpayer consents to the ERO's choice by completing and signing an IRS e-file signature authorization containing the intended taxpayer PIN. The taxpayer PIN can be systemically generated or manually assigned into the electronic format and/or the signature authorization form. However, the ERO must receive the signature authorization signed by taxpayer(s) before they transmit the return or release it for transmission to the IRS. This guideline refers to returns filed using the Self-Select or Practitioner PIN method.

3. The ERO will provide Form 8879 to the taxpayer along with a copy of the completed tax return personally or by U.S. mail, private delivery service, e-mail, Fax Transmission or an Internet web site. Upon review of their tax return, the taxpayer(s) complete Part II of Form 8879 with their PIN, signature and date. The taxpayer must return the form to the ERO either personally, by U.S. mail, private delivery service, or FAX transmission. The ERO must retain the completed Form 8879 as instructed on the form.

6. When finalized, Forms 8879 and 8878 and instructions for use with Tax Year 201**2** *e*-file will be available at www.irs.gov (click on "Forms and Pubs", then "Forms and Instructions"). Tax Year 201**2** forms will be posted on the IRS website as soon as possible; however, they may not be available at the time this document is published.

7. Beginning Tax Year 2005, Forms 8879 and 8878 were revised to include the Electronic Funds Withdrawal (EFW) statement in the Part II. When either of these forms is used a separate EFW statement does not have to be provided to the taxpayer.

8. Exhibits of Forms 8879 and 8878 can be found under www.irs.gov.

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

.07   Jurat/Disclosure Guidelines

1.   This section provides guidelines for the jurat/disclosure language that is to be included in software packages for electronically filed returns.

2.   In all instances, the appropriate jurat/disclosure text must be provided to taxpayers prior to the presentation of fields used to enter signature(s) (e.g. PIN) and related authentication information (e.g. Date of Birth and Adjusted Gross Income).

3.   It is imperative that all taxpayers who use the Electronic Funds Withdrawal feature are provided with the appropriate Electronic Funds Withdrawal (EFW) text for their review. Only the approved EFW text displayed in this publication is to be used. The approved EFW text (selection D1) is displayed separately and has not been included in samples for Jurat/Disclosure Version A, C or D provided.

4.   Online software products must provide the capability for taxpayers to view the jurat/disclosure statements on the input screen.

5.   When Form 8879 and 8878 is used, the Electronic Withdrawal statement is provided to the taxpayer in Part II of the form. See Section 13.06.

6.   Software products intended for use by tax professionals may also provide functionality to print a graphic equivalent of the jurat/ disclosure statements for taxpayers to sign as an alternative to viewing and signing the statement on the input screen. A graphic equivalent may be appropriate when the taxpayer will not be present to review the completed return in the presence of the ERO, and has elected to authorize the ERO to enter the taxpayer(s) Self-Select PIN(s).

7.   The jurat/disclosure text selections are located in Section 13.08 of this document. Samples of the jurat/disclosure versions A, C or D are included in Section 13.09.

9.   Use the guidelines below, and notes on the text selections for jurat entry field format.

Jurat Entry Field Format Guidelines			
Field	Length	Characters	Format/Notes
Dates – (e.g. signature dates, Date of Birth)	Eight	All numeric	MMDDYYYY *(must convert to YYYYMMDD for record layouts)*
Taxpayer's PIN	Five	All numeric	Cannot be all zeros
ERO or Paid Preparer PIN	Eleven	All numeric	First six positions = Electronic Filing Identification Number (EFIN); last five positions = Self-Selected numeric
Money Fields	Twelve maximum	All numeric	Dollars ONLY, zero fill if no prior year AGI

.07 Jurat/Disclosure Guidelines continued

10. The following table includes the valid Jurat Disclosure Codes for
    electronically filed Tax Year 201**2** Forms 1040, 1040A and 1040EZ. |
    .

    The codes (e.g. P1,C1,T1) in the third column identify the possible
    selections for each jurat version.

11. Some text selections are required only when a specific condition
    exists. The jurat version display pages include a reference to
    these selections. Complete text is displayed on the page entitled
    "Special Condition Text Selections". Text for these selections
    MUST BE included when they apply to the taxpayer's filing situation.
    For example, include Selection D1 for all returns with an Electronic
    Funds Withdrawal (EFW), **NOTE:** Decedent returns can not
    be filed on Form (PR).

Jurat/ Disclosure Code	Title	Required Screen/ Graphic Selections	Comments
	Tax Year 2012 Jurat Disclosure Codes | **Form 1040 Series – Forms 1040, 1040A, 1040EZ** |

	• If Decedent return with Form 1310 attached, also include…	T8	
	• With electronic funds withdrawal (See Selection D1 explanations to follow)	E1,P1,C1,T6	
BLANK			Form 8453 is required to submit attachments that cannot be e-filed.

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATION

.08 Jurat Language Text Selections

1. This section identifies the various Perjury, Consent to Disclosure, and Electronic Funds Withdrawal (EFW) text selections (components) used to develop jurat language statements for electronic filing tax preparation software.

2. The software shall provide the capability to incorporate these statements into the appropriate jurat text for presentation to taxpayer(s) for their review.

3. Use the table in .06 above and the displays in this section to determine the appropriate components or building blocks to develop jurat statements for Form 1040 series returns.

Perjury Statement Selections

Selection P1
Perjury Statement – use this selection when electronically filing
Form 1040, 1040A, or 1040EZ) with Self-Select PIN

Perjury Statement
Under penalties of perjury, I declare that I have examined this return, including any accompanying statements and schedules and, to the best of my knowledge and belief, it is true, correct, and complete.

Selection P2 (Reserved)

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

.08 Jurat Language Text Selections continued

Consent to Disclosure Selections

A Consent to Disclosure is to be included on the screen for all electronically filed returns and documents.

Selection C1
Consent to Disclosure - use this selection for electronically filed Form 1040 Series returns

---

Consent to Disclosure
I consent to allow my Intermediate Service Provider, transmitter, or Electronic Return Originator (ERO) to send my return to IRS and to receive the following information from IRS: a) an acknowledgement of receipt or reason for rejection of transmission; b) the reason for any delay in processing or refund; and, c) the date of any refund.

ERO Declaration

Selection E1
ERO Declaration and Signature - use this selection and ERO PIN entry when return is transmitted by an Electronic Return Originator (ERO). For use with Self-Select and Practitioner PIN methods.

ERO Declaration
I declare that the information contained in this electronic tax return is the information furnished to me by the taxpayer. If the taxpayer furnished me a completed tax return, I declare that the information contained in this electronic tax return is identical to that contained in the return provided by the taxpayer. If the furnished return was signed by a paid preparer, I declare I have entered the paid preparer's identifying information in the appropriate portion of this electronic return. If I am the paid preparer, under the penalties of perjury I declare that I have examined this electronic return, and to the best of my knowledge and belief, it is true, correct, and complete. This declaration is
based on all information of which I have any knowledge.

ERO Signature
I am signing this Tax Return by entering my PIN below.

ERO's PIN ___ ___ ___ ___ ___ ___ ___ ___ ___ ___ ___
              (enter EFIN plus 5 Self-Selected numeric)

.08   Jurat Language Text Selections continued

Electronic Funds Withdrawal Consent Selections

Include an Electronic Funds Withdrawal Consent statement only when taxpayer has selected the Electronic Funds Withdrawal option

Selection D1
Electronic Funds Withdrawal Consent for Forms 1040, 1040Aor 1040EZ
Statement MUST BE included with all Electronic Funds Withdrawal (EFW) returns

---

Electronic Funds Withdrawal Consent

If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an ACH electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of my Federal taxes owed on this return and/or a payment of estimated tax, and the financial institution to debit the entry to this account.   This authorization is to remain in full force and effect until I notify the U.S. Treasury Financial Agent to terminate the authorization. To revoke (cancel) a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537. Payment cancellation requests must be received no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment. I further acknowledge that the personal identification number (PIN) below is my signature for my electronic income tax return and, if applicable, my Electronic Funds Withdrawal Consent.

Note: *Many Software products are designed to include Form 8879 or 8878 (e.g. as required for Practitioner PIN method returns), if Form 8879 or 8878 is not used for an EFW return or document you must still provide EFW consent language to the taxpayer as above.*

.08   Jurat Language Text Selections continued

Taxpayer Signature Selections

Selection T1
Use this signature selection when filing a Form 1040, 1040A or 1040EZ and the Self-Select PIN method will be used to sign the return

```
I am signing this Tax Return/Form and Electronic Funds Withdrawal Consent, if
applicable, by entering my PIN below.
--------------------------------------------------------------------------------

Special Condition Text Selections
Use with Jurat/Disclosure Codes A, C or D
Tax Year 2012

The Special Condition Text Selections below are to be used with Jurat/Disclosure Code A, C or D as appropriate. These statements do not have to be provided to all taxpayers, but they MUST be provided when the Special Condition applies. The jurat language A, C or D displays on the previous pages refer to the text below but do not include the entire text in the display.

Selection D1
Electronic Funds Withdrawal Consent for Forms 1040, 1040Aand 1040EZ
(Include this statement only with Electronic Funds Withdrawal returns if Form 8879 was not completed).

> **Electronic Funds Withdrawal Consent**
>
> If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an ACH electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of my Federal taxes owed on this return and/or a payment of estimated tax, and the financial institution to debit the entry to this account. This authorization is to remain in full force and effect until I notify the U.S. Treasury Financial Agent to terminate the authorization. To revoke (cancel) a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537. Payment cancellation requests must be received no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment. I further acknowledge that the personal identification number (PIN) below is my signature for my electronic income tax return and, if applicable, my Electronic Funds Withdrawal Consent.

See additional information regarding the electronic funds withdrawal (EFW) consent under the selection D1 explanation in Section 13.08.

.10 Validation of Electronic Signatures for e-file

The following Error Reject Codes are used for electronic signatures:

NOTE: Error Reject Code definitions can be found in Publication 1346, Part 1, Attachment 1.

01. General Error Reject Code for Electronic Signature
ERC 0689 and 1150

02. Online PIN Error Reject Codes
ERC 0681, 0682 and 0696

03. Practitioner PIN Error Reject Codes
ERC 0695, 0697, 0698 and 0699

04. Self-Select PIN Error Reject Codes
ERC 0670, 0671 and 0694

05. The following Error Reject Codes are valid for Online, Practitioner and Self-Select PIN methods:
ERC 0668, 0669, 0672, 0674, 0675, 0676, 0677, 0678, 0679, 0680, 0683, 0684, 1150, 1151, 1155 and 1156

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

.11 Frequently Asked Questions for preparing and e-filing your own tax return
Why is my date of birth required with this method?

The Date of Birth is required as part of the authentication process for the taxpayer. It will be matched against Social Security Records. The return will not be rejected if the Date of Birth does not match. However, the Acknowledgement Record will contain the field Date of Birth Validity Code. It will advise you if the dates of birth submitted were valid or mismatched. The following values will be returned:

- "0" = Date of Birth Validation Not Required
- "1" = All Dates of Birth Valid
- "2" = Primary Date of Birth Mismatch
- "3" = Spouse Date of Birth Mismatch
- "4" = Both Dates of Birth Mismatch

How can I get my prior year information if I do not have it?

You may call the IRS toll free number at 1-800-829-1040. If you can provide certain information to the Customer Service Representative (such as your name, SSN, and current address), you may receive the prior year original AGI amount or prior year PIN over the phone or you may request a free transcript. Allow 7 to 10 days to receive the transcript. Be sure to ask for the original AGI.
If your prior year information is unavailable, you may be able to obtain an Electronic Filing PIN.

If my spouse and I are filing jointly, do we both need a PIN?

Yes, each taxpayer must sign using a PIN. You will each choose any five digits, except all zeros, as the electronic signatures.

What happens if I use the same PIN as some one else?
It is acceptable for two taxpayers to choose the same five digit PIN.
The taxpayer's personal information (Social Security Number, Date of Birth and original Adjusted Gross Income or Prior Year PIN/Electronic Filing PIN from the 20**11** tax return) provided to the IRS is used to verify the taxpayer's identity.

My filing status this year is not the same as my filing status last year, what Adjusted Gross Income (AGI) or PIN do I use?

If the change is **to** Married Filing Jointly, then you will your individual original total Adjusted Gross Income amount or PIN from their respective 20**11** tax returns.
If the change is **from** Married Filing Jointly, then you will use the same original total Adjusted Gross Income amount or PIN from the 20**11** joint return.

What AGI amount should I use to file jointly this year if I have a different spouse than
last year?

Use the AGI amount or PIN from the joint return filed with the ex-spouse.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

What AGI amount should I use when my spouse earned all the wages?

Both taxpayers on the joint return will use the total AGI amount from the originally filed return. The AGI amount should not be divided between the primary and the spouse.

If the return was filed late, what Prior Year AGI amount should be used?

If the 2011 tax return was not received and processed by the IRS by November 30, 2012, enter "0" (zero) for the AGI amount. If the return is rejected due to mismatch of the Prior Year AGI, resubmit the return using the actual values.

If a 2010 tax return was not filed, what amount should be entered the Prior Year AGI or prior year PIN?

Enter "0" (zero) for the original Prior Year AGI. Do not leave this field blank. However, the Prior Year PIN/Electronic Filing PIN field should be left blank.

Are all taxpayers who file electronically required to pay any balance due electronically?

No. Taxpayers who prefer to pay by check or money order should file Form 1040-V, Payment Voucher.

Can the taxpayer electronically file a joint return if the spouse is unable to sign because he or she is serving in a combat zone, or a qualified hazardous duty area, and the taxpayer does not have a power of attorney or other statement?

If your spouse is unable to sign the return because he or she is serving in a combat zone (such as the Persian Gulf Area, Yugoslavia, or Afghanistan), and you do not have a power of attorney or other statement, you can sign for your spouse. Attach a signed statement to your return that explains that explains that your spouse is serving in a combat zone. For more information on special tax rules for persons who are serving in a combat zone, or who are in missing status as a result of serving in a combat zone, see Publication 3, Armed Forces' Tax Guide.

If the returns rejects, where are Error Reject Code explanations located?

The Error Reject Codes can be found in the Publication 1346, Electronic Return File Specification and Record Layouts for Individual Income Tax Return for TY 2012, Part 2, Attachment 1.

If the taxpayer had an ITIN (IRS Individual Taxpayer Identification Number) when they filed their 2011 tax return, but now have a SSN this filing season (TY2012), what Prior Year AGI amount should be used?

If the taxpayer had ITIN when they filed their 2011 tax return, but now have an SSN to file their 2012 tax return, they should use "0" (zero) as the Prior Year AGI amount.

What Prior Year PIN should be used when the return originally rejected and the corrected return was retransmitted with a different PIN?

The PIN from the accepted e-filed return must be used.

<u>SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS</u>

.12   Frequently Asked Questions for an Electronic Return Originator

How would my client get a copy of their Prior Year PIN?

EROs will need to provide taxpayers with documentation that has the PIN on it. Tax Preparation software should be capable of providing the taxpayer with a copy of the PIN used in their current tax return so that it will be available for them to use as an authenticator next year. As a suggestion, the PIN can be preprinted on the signature line of the tax return to avoid additional paper generation.

If the prior year information is unavailable, the taxpayer may be able to obtain an <u>Electronic Filing PIN</u>.

What is an ERO EFIN/PIN?

The ERO PIN is the ERO's electronic signature. For consistency, each ERO is encouraged to use the same 11 numbers for their ERO PIN on all returns for this filing season. The first six positions of your ERO PIN must be your EFIN and it must match the EFIN in the DCN. You may select any five digits except all zeros for the next five positions.

Will the ERO EFIN/PIN be acknowledged?

If the ERO EFIN/PIN is not present, the return will reject displaying an error reject code.

What is Form 8879, *IRS e-file Signature Authorization*?

Form 8879 is the declaration document and signature authorization for an e-filed return filed by an electronic return originator (ERO). Complete Form 8879 when the Practitioner PIN Method is used or when the taxpayer authorizes the ERO to enter or generate the taxpayer's personal identification number (PIN) on his or her e-filed individual income tax return.

Where can a copy of Form 8879 be obtained?

Some tax preparation software includes Form 8879, IRS e-file Signature Authorization format. A copy can also be obtained from IRS website, keyword Form 8879. A Spanish version, Form 8879-SP, is also available on the site.

Can the taxpayer give me their PIN verbally to enter in their electronic return?

Yes, a taxpayer can provide their PIN verbally. However, you must receive a completed Form 8879, *IRS e-file Signature Authorization,* from the taxpayer before you submit the return or release it for transmission to the IRS.

Is it acceptable for the ERO to choose the same PIN for multiple clients?

Yes, it is acceptable to assign the same PIN for multiple clients.

Where can I find a list of ERO and taxpayer responsibilities when using the Self-Select PIN Method?

As an ERO, your responsibility is to provide the taxpayer with Form 8879 along with their return for review. You are required to generate or enter the header information, all five tax return line items in Part I, and the ERO firm name in Part II. You may also systemically generate or manually assign the taxpayer's PIN in Part II.

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

Frequently Asked Questions for an Electronic Return Originator - CONTINUED -

What is my responsibility as an ERO using Form 8879 when the taxpayer completed their own return?

As an ERO, your responsibility is to complete Form 8879 based on the return information you received from the taxpayer. You are required to generate or enter the header information, the five tax return line items in Part I, and the ERO firm name in Part II. You may also systemically generate or manually assign the taxpayer PIN in Part II.

What is my responsibility as an ERO using Form 8879 when another return preparer completed the taxpayer's return?

As an ERO, your responsibility is to identify the paid preparer in the appropriate fields of the electronic return record, regardless of who prepared the return. For example, if a collected return is signed by a paid preparer, the ERO must enter the paid preparer's identifying information in the appropriate portion of the electronic return record. Complete Form 8879 based on the return information you received from the taxpayer. You are required to generate or enter the header information, the five tax return line items in Part I, and the ERO firm name in Part II. You may also systemically generate or manually assign the taxpayer PIN in Part II. Page 1 and 2 of the tax return should be retained until the end of the calendar year.

Can a preparer enter the taxpayer's PIN on an Application for Extension of Time to File?

Yes. Form 8878, *IRS e-file Signature Authorization for Form 4868 and Form 2350,* is available for taxpayers to authorize the ERO to input their PIN on Forms 4868 and 2350. Form 8878 is included in some software packages. A copy can be obtained from the IRS website, keyword Form 8878. Spanish version, Form 8878-SP, is also available on the website.

Do I have to mail Form 8879 and Form 8878 to the IRS?

Do not send Form 8879 to the IRS unless requested to do so. Retain the completed Form 8879 for 3 years from the return due date or IRS received date, whichever is later.

Is it acceptable for an Electronic Return Originator (ERO) to electronically image and store Form 8879 and Form 8878 and meet the document retention requirement?

Forms 8879 and 8878 may be retained electronically in accordance with the recordkeeping guidelines in Rev. Proc. 97-22, which is on page 9 of Internal Revenue Bulletin 1997-13 at Internal Revenue Bulletin 1997-13.

SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS

.13 Practitioner PIN Method Questions and Answers

The Practitioner PIN method does not require the taxpayer to provide their Prior Year AGI amount or Prior Year PIN. When using the Practitioner PIN Method, taxpayers must always appropriately sign a completed signature authorization form. Taxpayers, who use the Practitioner PIN Method and enter their own PINs in the electronic return record after reviewing the completed return, must still appropriately sign the signature authorization form.

Who is eligible to use the Practitioner PIN Method?

The following taxpayers are eligible to use the Practitioner PIN Method:

- Taxpayers who are eligible to file Form 1040, 1040Aor 1040EZ for Tax Year 201**2**.

- Military personnel residing overseas with APO/FPO addresses.

- U.S. citizens and resident aliens residing in the American Possessions of the Virgin Islands, Puerto Rico, American Samoa, Guam and Northern Marianas, or with foreign country addresses.

- Taxpayers filing a Form 4868 (Extension of Time to File).

There is no age restriction on who can use the Practitioner PIN method; everyone is eligible to use the Practitioner PIN method.

What forms or supporting documents must the ERO submit with Form 8453, *U.S. Individual Income Tax Transmittal for an IRS e-file Return***?**

The following forms or supporting documentation must be attached to

Form 8453, *U.S. Individual Income Tax Transmittal for an IRS e-file Return*:

- Appendix A, Statement by Taxpayer Using the Procedures in Rev. Proc. 2009-20 to Determine a Theft Loss Deduction Related to a Fraudulent Investment Arrangement

- Form 1098-C, *Contributions of Motor Vehicles, Boats, and Airplanes* (or acceptable documentation/required donor documentation)

- Form 2848, *Power of Attorney and Declaration of Representative* (or POA that states the agent is granted authority to sign the return)

- Form 3115, *Application for Change in Accounting Method*

- Form 3468, *Computation of Investment Credit* (if Historic Structure Certificate is required) attach a copy of the first page of NPS Form 10-168a, Historic Preservation Certification Application (Part 2 - Description of Rehabilitation), with an indication that it was received by the Department of the Interior or the State Historic Preservation Officer, together with proof that the building is a certified historic structure (or that such status has been requested)

- Form 4136, *Credit for Federal Tax paid on Fuels* (if certificate and/or reseller statement is required)-attach the Certificate for Biodiesel and, if applicable, Statement of Biodiesel Reseller or a certificate from the provider identifying the product as renewable diesel and, if applicable, a statement from the seller

- Form 5713, *International Boycott Report*

<u>**SECTION 13 – ELECTRONIC SIGNATURES SPECIFICATIONS**</u>

      -CONTINUED-

- Form 8283, *Non-Cash Charitable Contributions, Section A* (if any statement or qualified appraisal is required) or *Section B, Donated Property, and any related attachments (including any qualified appraisal or partnership Form 8283)*

- Form 8332, *Release of Claim to Exemption for Children of Divorced or Separated Parents (or certain pages from a post-1984 decree or agreement, see instructions)*

- Form 8858, *Information Return of U.S. Persons with Respect to Foreign Disregarded Entities*

- Form 8864, *Biodiesel and Renewable Diesel Fuels Credit* attach the certificate for Biodiesel and, if applicable, Statement of Biodiesel Reseller or a certificate from the provider identifying the product as renewable diesel and, if applicable, a statement from the reseller

- Form 8885, *Health Coverage Tax Credit, and all required attachments*

- Form 8949, *Sales and Other Dispositions of Capital Assets (Form 1040)* (or a statement with the same information), if you elect not to include your transactions on the electronic short-term capital gain (loss) or long-term capital gain (loss) records

How long should an ERO retain and make available to the IRS the form 8453?

A copy of the Form 8453 and supporting documents that cannot be electronically transmitted are required to be retained until the end of the calendar year.

How does the Practitioner PIN Method benefit the ERO?

The Practitioner PIN Method offers an additional signature option for EROs to use in preparing and transmitting Form 1040, 1040Aor 1040EZ to IRS. Neither the Date of Birth nor the Prior Year Adjusted Gross Income amount or Prior Year PIN is needed to use the Practitioner PIN Method.

Where can I find a complete list of EROs and Taxpayer responsibilities when using the Practitioner PIN Method?

Responsibilities are located on page 2 of Form <u>8879</u>, "*IRS e-file Signature Authorization*".

What is the purpose of Form 8879, "*IRS e-file Signature Authorization*"?

Form 8879 is the declaration document and signature authorization for an e-filed return filed by an electronic return originator (ERO). Complete Form 8879 when the Practitioner PIN Method is used or when the taxpayer authorizes the ERO to enter or generate the taxpayer's personal identification number (PIN) on his or her e-filed individual income tax return.

Where can I obtain a copy of Form 8879?

Some tax preparation software includes form 8879, IRS e-file Signature Authorization format. A copy can also be obtained from the IRS website, keyword Form 8879. A Spanish version, Form 8879-SP, is also available on the site.

Practitioner PIN Method Questions and Answers-CONTINUED-

Do I mail Form 8879, *IRS e-file Signature Authorization*, to the IRS?

Do not send Form 8879 to the IRS unless requested to do so. Retain the completed Form 8879 for 3 years from the return due date or IRS received date, which ever is later.

Are all taxpayers who file electronically required to pay any balance due electronically?

No. Taxpayers who prefer to pay by check or money order should file Form 1040-V, Payment Voucher. Form 8879, *IRS e-file Signature Authorization*, can not be used to transmit any payments.

Can the taxpayer use the same PIN next year?

Yes, or they may choose a new PIN.

Can two taxpayers select and use the same PIN to sign their return?

It is acceptable for two taxpayers to choose the same five digit PIN. The taxpayer's personal information provided to the IRS is used to verify the taxpayer's identity.

Do both taxpayers filing a joint return need a PIN?

Yes, each taxpayer must sign using a PIN.

Can the taxpayer electronically file a joint return if the spouse is unable to sign because he or she is serving in a combat zone or a hazardous duty area, and the taxpayer does not have a power of attorney or other statement?

If your spouse is unable to sign the return because he or she is serving in a combat zone (such as the Persian Gulf Area, Yugoslavia, or Afghanistan), and you do not have a power of attorney or other statement, you can sign for your spouse. Attach a signed statement to your return that explains that your spouse is serving in a combat zone. For more information on special tax rules for persons who are serving in a combat zone, or who are in missing status as a result of serving in a combat zone, see Publication 3, Armed Forces' Tax Guide.

How do I know the IRS received the taxpayer's PIN?

When you receive your Acknowledgement Record, all accepted returns will have the PIN Presence Indicator. One of the following values will be returned:

- "1" = Practitioner PIN

- "2" = Self-Select PIN by Practitioner Used

- "3" = Self-Select PIN by Online Used

- "4" = State Only. No PIN

- "Blank" = Return Rejected with PIN

SECTION 13 - ELECTRONIC SIGNATURES SPECIFICATIONS

Practitioner PIN Method Questions and Answers-CONTINUED-

What is an ERO EFIN/PIN?

The ERO PIN is the ERO's electronic signature. For consistency, each ERO is encouraged to use the same 11 numbers for their PIN on all returns for this filing season. The first 6 positions of your ERO PIN must be your EFIN and it must match the EFIN in the DCN. You may select any 5 digits, except all zeros, for the next five positions.

Where can I find the Error Reject Codes for the Practitioner PIN Method?

The Error Reject Codes can be found in the Publication 1346, "*Electronic Return File Specifications and Record layouts for the Individual Income Tax Returns for TY2012*, Part 1, Attachment 1."

If my client used the Practitioner PIN Method to sign their return, how is an election for certain tax treatment, status, exception or exemption based on an instruction for the tax form or in a related tax publication submitted?

If your client uses the Practitioner PIN Method to sign their return, and is making an election for certain tax treatment, status, exception or exemption based on an instruction for the tax form or in a related tax publication, an Election Explanation Record (ELC) must be used if there is no official form designed for the election. Your tax software, however, must support the Election Explanation Record. Practitioners should not attach a copy of the election to the Form 8453, U.S. Individual Income Tax Transmittal for an IRS e-file Return.

Can the taxpayer verbally provide their PIN to be entered in their electronic record?

Yes, a taxpayer can provide their PIN verbally. However, you must receive a completed Form 8879, *IRS e-file Signature Authorization*, from the taxpayer before you submit the return or release if for transmission to the IRS.

Is it acceptable for the ERO to choose the same PIN for multiple clients?

Yes, it is acceptable to assign the same PIN for multiple clients.

What is the EROs responsibility in using Form 8879 when the taxpayer has completed their own return and just need it transmitted?

As an ERO, your responsibility is to complete Form 8879 based on the return information you received from the taxpayer. You are required to generate or enter the header information, the five tax return line items in Part I, and the ERO firm name in Part II. You may also system generate or manually assign the taxpayer PIN in Part II.

Can Form 8879 be used to request an extension of time to file?

No. Form 8879, *IRS e-file Signature Authorization for Form 4868 or Form 2350*, must be completed.

Why is Form 8878 needed for Form 4868 filers if there is no signature requirement on Form 4868?

A Form 8878 is required by Form 4868 filers when they need to make an Electronic funds Withdrawal and they want to authorize the ERO to enter the taxpayers PIN. Form 8878 is not required for Form 4868 when there is no Electronic Funds Withdrawal.

Practitioner PIN Method Questions and Answers-CONTINUED-

Can a preparer enter the taxpayer's PIN on a Application for Extension of Time to File?

Yes. Form 8878, *IRS e-file Signature Authorization for Application for form 4868 and Form 2350*, is available for taxpayers to authorize the ERO to input their PIN on Forms 4868 or 2350. A copy can be obtained from IRS website, keyword 8878. A Spanish version, Form 8878-SP, is also available on the website.

NOTE: The Practitioner PIN Method can not be used when filing Form 2350.

What should I do if my client is unable to return to my office to input his/her PIN on an Application for an Extension of Time to file?

Your client my authorize you to input his/her PIN by completing from 8878. Provide this form to the taxpayer along with a copy of the extension of time to file application for their review. It is not necessary for both taxpayers e-filing a joint extension application to authorize the ERO to enter their taxpayer PIN. See additional instructions on form 8878.
