SERVING SYSTEMS

Vollrath recognizes the possibility that your foodservice needs extend beyond what is available in our full collection of products. Vollrath's custom solutions give you the opportunity to create exactly what you're looking for, whether you're a chain or an independent operation. From specialized utensils to custom carts and kiosks, Vollrath can create the custom solution you need to help your business run efficiently and profitably.

Request our Serving Systems literature for more information.

CART

Completely self contained, carts are mobile, modular pieces designed to work alone or together. They can be moved as needed and provide excellent flexibility. Carts are perfect for expanding your food service offering or adding auxiliary service.

KIOSK

Designed for a fixed setting, kiosks are fully enclosed structures with larger electrical systems than carts. Kiosks can be secondary food service solutions or used on their own.

SERVING LINE

Designed for either a long, single line or a more modular design, serving lines are an option for buffet or full service. They typically focus on a particular type of food such as a salad bar, hot foods, or cold foods.

MERCHANDISING UNIT

Much larger than kiosks, big buildings typically have their own floor and are approximately 15-20' long and 8-10' deep. They work well for pop-up food service as well as merchandise shops and, while designed to be semi-permanent, can be moved with large equipment.

The average American now eats at restaurants only 74 times a year – the lowest number in more than 30 years. Yet Americans aren't cooking at home more. Instead, they're eating more prepared and packaged foods.¹ That's why foodservice has become the hottest trend in convenience stores.

GENERAL CARE AND USE

tips for all types of cookware

- Before using for the first time, remove all labels and wash in hot, soapy water to remove any manufacturing lubricants.
- Never leave cookware on heat source without food or liquid inside. Overheating in this manner may cause warping or de-lamination of metal layers and could void warranty.
- For safety and to prevent warping, allow cookware to cool before cleaning or immersing in water.
- Direct contact with salt can cause pitting. Add salt to boiling water to dissolve it.
- Salt solutions, acidic products like tomatoes, disinfectants, and bleaches can corrode cookware. Never store these items in cookware, and avoid prolonged exposure.
- All cookware will last longer and look better if washed by hand with hot, soapy water. Always scrub in the direction of the material grain. Rinse thoroughly and allow to air-dry completely.
- Use of plastic, wooden or rubber utensils is recommended.
- If label adhesive remains on cookware, wipe off with WD-40 and clean with warm, soapy water.
- To remove white film caused by starch or water minerals, rub with sponge that has been dipped in lemon juice or vinegar; then wash with hot, soapy water.
- To remove food burnt to the bottom of cookware, boil a mild solution of vinegar and water for 10 minutes to dislodge food particles.

NONSTICK COATINGS (CERAMIGUARD®, STEELCOAT X3™ AND POWERCOAT2™)

Allow nonstick coating to cool before cleaning. Hand-wash in hot, soapy water and dry immediately to preserve appearance. Use a non-woven scouring pad to remove burnt food. Avoid using abrasive cleaners, metal scouring pads, and strong solvents. When stacking pans, place liners between pans to avoid scratching nonstick surfaces. Note: Warranty is 90 days on all nonstick cookware.

CARBON STEEL COOKWARE

Pans are shipped with mineral oil applied to the pan. Wipe off oil and clean the pan using hot, soapy water. Dry immediately. After each use, clean and season. Wipe the inside and outside of the pan with unsalted cooking oil or shortening to prevent oxidation. The pan will turn a dark color as seasoning occurs after repeated use. Visit Vollrath.com for more detailed seasoning instructions.

REMOVING DISCOLORATION FROM ALUMINUM COOKWARE

Boil a solution of two tablespoons of cream of tartar to each quart of water in the cookware for ten minutes.

The trouble is, how do you ensure that your kitchen staff and servers are using the proper-size utensil? Vollrath simplifies portion control with a complete system of serving utensils, color-coded for quick and easy size selection. If your menu calls for 2 ounces of vegetables, tell your staff to use the blue Spoodle®. Serving 4 ounces of stuffing? Use a gray disher. It's that simple. No more searching through a drawer of look-alike utensils trying to read the capacity stamps.

SQUEEZE DISPENSERS

ADDING FLEXIBILITY & VERSATILITY
TO YOUR DISPENSING NEEDS

Traex® Squeeze Dispensers COLOR CONFIGURABLE

- Twin Tip™ and Tri Tip™ dispensers allow you to portion condiments more quickly and easily than ever
- 24 oz wide-mouth Color•Mate™ squeeze dispensers available in seven bright, translucent polyethylene colors, allowing you to identify contents and track fill levels at a glance
- Bottles and caps are dishwasher safe
- Bottles are NSF® certified; does not apply to caps

STEP 1

- Locate desired dispenser style in the table below.

STEP 2

- Add desired numerical cap color suffix to replace TT at end of item number (brown 01, red 02, yellow 08, clear 13, blue 44, purple 54, vista green 191). See NOTE below.

STEP 3

- For 24 oz wide-mouth Color•Mate™ squeeze dispensers, add desired numerical bottle and cap color suffix to replace BB and TT after the dash (-) (brown 01, red 02, yellow 08, clear 13, blue 44, purple 54, vista green 191). If both bottle and cap are the same color, the last two digits get dropped.

NOTE: When building an item number, the bottle color is indicated by the first 2 digits (BB) after the dash (-) and the cap color is the last two digits (TT) (e.g., 2808-1344 indicates a clear bottle with a blue cap). If both bottle and cap colors are the same color, the last two digits get dropped (e.g., 2808-13 indicates a clear bottle with a clear cap).

How to Order SIGNATURE WAREWASHING RACKS

Step 1 CHOOSE THE TYPE OF RACK YOU NEED

FULL-SIZE RACKS

Pages 244-247

HALF-SIZE RACKS

Pages 248-249

Step 2 MEASURE

- Take the physical glass, mug, or stemware you need to accommodate and flip to page 243. The chart will determine the appropriate rack height as well as number of compartments to fulfill your needs.
- Visit Vollrath.com for an online Signature rack measuring tool.

Visit Vollrath.com/warewashingconfigurator for an online Warewashing guide

Step 3 SELECT YOUR BASIC RACK COLOR

- Select the color of the basic rack and add the sixth digit to the basic rack number
- Full-size racks are available in all eight colors
- Half-size racks are available in light green and cocoa only
- Not all racks come in all colors; see individual pages for color offerings

1

2

3

4

5

6

7

9

Step 4 CONSIDER A COLOR-CODED TOP RISER

- To indicate the style of glass/stemware or the facility where the rack is used, you can color-code the top riser of Vollrath compartment racks. Just code the seventh digit of the item number with the desired color number listed at the bottom of the previous page. It's a perfect system for resorts, hotels, clubs, and institutions. Optional methods of color coding are available upon request.

<i>Example</i>	5 2 7 1 6	+3	+6	= 5271636
Red rack is code 3 Grey top is code 6	Five-digit item number for basic 36-compartment X-Tall Rack	Red base	Grey top riser	Seven- digit code

Step 5 STANDARD & CUSTOM IMPRINTING

- STANDARD IMPRINTING:** Vollrath gives you the option for rack identification by imprinting the glass symbol and name on each rack. Letters will appear in white ink only, 1/2" high. To order symbol imprinting, simply identify the symbol name after the seven-digit rack model number, as in the example below.

Example:

52711-11 Beer

52715-66 White Wine

Please note: The above number represents the rack ordered, the color selected, the top riser color, and the symbol imprinting. If both a custom logo and a glass symbol are specified, the logo will appear on one side and the glass symbol on the other. Contact your DSM for a custom form to submit with your order.

- CUSTOM IMPRINTING:** You can have your racks personalized with your company name, logo, or any other text. Maximum size of imprint is 1" H x 2.5" L in white ink only. Camera-ready art required. There is a one-time charge for preparation of the die plus a nominal charge per rack personalized. Allow 5 days for a die to be produced once artwork is approved.

Note: Racks are made to order and cannot be returned

Signature Full-Size Rack Sizing Template

- DETERMINING RACK HEIGHT: Place the base of glass or mug piece on bottom edge of this page. Or remove page and stand it on edge on a flat surface next to your glass or mug. Then select rack type with appropriate number of risers by referring to the crossbar immediately above your glassware piece on the chart.
- DETERMINING NUMBER OF COMPARTMENTS: Place an inverted glass on the diagram. Looking directly downward on the glass, make sure the greatest diameter of the glass or mug is within the appropriate square. When measuring cups or mugs, be sure to allow for extension of handles. All Vollrath compartment racks have dividers of equal dimension top and bottom to protect glassware during the vigorous wash cycle.
