Series 50,52,56 Fittings

Kuhnke System Logic Devices

Miniature Metric Brass Fittings

Series 50

Brass metric sized fittings provide a full family of connectors for most applications in miniature pneumatics. Machined from solid brass stock, fittings are dependable, easy to install and reduce space requirements.

Series 50 fittings also include quick connect couplings and brass manifolds.

Series 52, 56

Instant push-in fittings provide a fast means of connecting pneumatic systems. Air connections are made by pushing tubing into fitting. Removal of tubing is done by pressing in on the brass collar, releasing tube. Series 52 fittings are designed for 5/32 inch (4mm) tubing and are constructed with a brass base and an anodized aluminum collar. Series 56 push-in fittings are constructed the same except have molded collars, and accept 1/8 inch (6mm) tubing.

Technical Specifications

Operating Pressure;

0-175 PSI or vacuum.

Material:

Series 50 – Brass
Series 52 – Brass, anodized aluminum sleeve.
Series 56 – Brass, Polyamide sleeve.

Port/Thread:

M5, G 1/8, G 1/4 Metric

Port Washers:

Nylon or Buna N

Type of tubing:

Fittings accept most non-rigid nylon or plastic (polyamide) tubes. See specific fittings for wall thickness limitations.
