## F O R E W O R D

Property tax is a very important source of revenue for all local units of government: cities, townships, school districts, special districts and county government. The State Government of Minnesota has not levied a property tax since 1966.

Property Taxes Levied in Minnesota is divided into five sections. Section I is a review of the Minnesota property tax system. It discusses property valuation and how tax levies and mill rates are determined. Section II contains historical data (from as far back as 1925) and shows how taxes and values have changed over the years. Section III looks at current year values, both market and assessed, of the various classifications of property. Section IV is devoted to current year tax data, including information on taxes levied and credits. Section V consists of information on mobile home values and taxes.

REVIEW OF THE MINNESOTA PROPERTY TAX SYSTEM  
TAXES PAYABLE IN 1987

Property tax is the major source of revenue for local governmental units and school districts in the state of Minnesota. The State has not levied a property tax since 1966. The property tax is an ad valorem tax, (a tax in proportion to value). It is levied in one year based on the assessment as of January 2nd and becomes payable in the following year. For example, in this bulletin, the current year tables include taxes levied based on assessments made on January 2, 1986, due and payable in 1987. The property tax on a particular parcel of property is primarily based on its market value, the total assessed value within the taxing district, and the property tax budget requirements of all local governmental units located within the taxing district.

The following is a general description of and background information on the property tax system in Minnesota and the laws which were applicable to taxes payable in 1987.

1. Determination of Values

A. Assessors

The county assessor is appointed by the County Board of Commissioners and is approved by the State Commissioner of Revenue. The term of office for assessors is four years. The county assessor has various duties prescribed by law, among which are the following: keeps local assessors advised of changes in assessment laws, instructs local assessors in property classification and determination of values, and is ultimately responsible for final assessments based on the values reported to him by local assessors and assistants.

B. Taxable Property

The assessor, aided by his deputy and local assessors, determines the estimated market value of all taxable properties within his jurisdiction as of January 2 of each year, except state-assessed properties such as public utilities, railroads, air-flight property and minerals. All properties within a taxing district are reassessed once every four years. One-fourth of the parcels within the taxing district are assessed each year so that all parcels can be reassessed at least once in a four-year period. (Property which is exempt from taxation is assessed once every six years--see Exempt Property, on the following page).

After the market values have been determined, the properties are assigned a classification according to how the property is used, i.e., commercial, agricultural homestead, etc. Each classification has a percentage rate which is applied to the market value to determine the assessed value. The assessed value is the value used in determining mill rates.

Note: Prior to the 1972 assessment, the market value was divided by three to arrive at an "adjusted market value." The various classification rates were then applied to the adjusted market value to determine the assessed value. Thus, assessed values for taxes payable in 1972 were approximately one-third of what they were for taxes payable in 1973. Since mill rates are in part based on assessed value, mill rates for payable 1972 were approximately three times what they were for payable 1973. (See Table 1, page 25.)

### C. Exempt Property

Certain types of property are exempt from ad valorem taxation. These properties are reassessed once every six years, with the most recent assessment being made in 1986. Information about exempt property has been included in this year's bulletin (Table 33, figures 2 and 3, pages 97, 98 and 101.)

Exempt real property includes Indian lands, public property, educational facilities, religious and charitable institutions. Exempt personal property includes farm livestock, farm machinery, furniture, inventories, and tools and machinery of service/retail/wholesale/manufacturing businesses, furnishings of rental units if the rental value is subject to sales tax, and containers in the possession of the consumer during consumption if the sale of the commodities is subject to the sales tax. Household goods are also exempt as are intangibles such as stocks, bonds and insurance policies.

Since 1973 exempt property also includes the value of commercial/industrial tools, implements, machinery, and equipment which is attached to or installed in real property for use in business or production activity conducted thereon, excepting public utility attached machinery.

### D. Property Classifications

As mentioned before, after market values are determined, properties are given classifications according to use. This property classification system was developed by the 1913 Legislature. Beginning in 1914, the following four classes of property were used to determine assessed values:

Class 1 - Iron Ore (mined or unmined), assessed at 50% of full and true value.

Class 2 - Household goods and personal effects, assessed at 25%.

Class 3 - Unplatted real estate, livestock, farm produce, inventories and manufacturers' tools, assessed at 33 1/3%.

Class 4 - All other properties, primarily urban real estate, assessed at 40%.

In 1933, the Legislature made a significant change in the classification system by giving a preferential percentage rate to homestead property. The following two classifications went into effect in assessment year 1934.

Class 3b - Unplatted real estate used for a homestead, assessed at 20% on the first \$4,000 of full and true value, and 33 1/3% on value over \$4,000.

Class 3c - Platted real estate used for a homestead, assessed at 25% on the first \$4,000 of full and true value, and 40% on value over \$4,000.

Since 1941, there have been changes in the property classification laws made during every legislative session. The next major reform to the property tax system came in 1967 with the passage of the "Tax Reform and Relief Act." The tax relief programs created by the Act were designed to reduce the burden of local property taxes by reducing the costs of local government and providing taxpayers with reimbursements linked to

property tax payments. The state took increased fiscal responsibility for local costs. Under this Act all farm livestock and machinery were exempted from property taxation. Businesses were given the option to exempt either inventory or tools and machinery. Other property tax relief programs not relating to the property classification system were also enacted, such as the homestead credit, renters' credit, senior citizen income tax credit, local government aids and elimination of the state property tax levy.

Today, the property classification system has evolved into many classes of property and assessment percentages accordingly. Included in this bulletin is a listing of classification percentages from taxes payable 1972 through 1987 (table 12, page 37). Following is a listing of the property classifications used for the 1986 assessment, taxes payable in 1987.

#### REAL PROPERTY

Class	Year Enacted	Description	Percent of Market Value
1a	1933	Residential homestead*	
		1st \$65,000 market value	18%
		Excess of market value over \$65,000	28%
1b	1953, 1969 & 1974	Paraplegic veterans, homesteads of blind and permanently and totally disabled persons	
		1st \$32,500 market value	5%
		\$32,500 to \$65,000 market value: agricultural	14%
		Excess of market value over \$65,000: agricultural	18%
		\$32,500 to \$65,000 market value: residential	18%
		Excess of market value over \$65,000: residential	28%
1c	1959	Commercial seasonal recreational residential not used for more than 200 days per year which includes a portion used as a homestead by the owner	12%
2a	1933	Agricultural homestead	
		1st \$65,000 market value	14%
		Excess of market value over \$65,000	18%
2b	1957	Timberland	18%
2c	1923	Agricultural non-homestead	18%
3a	1981	Commercial, industrial, public utility land and buildings, railroad operating property:	
		1st \$60,000 market value	28%
3a	1974	Commercial, industrial, public utility land and buildings, railroad operating property:	
		Excess over \$60,000 market value	43%

\* Townhouse property is classified and valued as all other homestead real estate. Value is added for each unit's share of the development's common areas.

REAL PROPERTY

Class	Year Enacted	Description	Percent of Market Value
3b	1982	Employment Property (Enterprise Zones) 1st \$50,000 or 1st \$60,000 market value Excess over \$50,000 or over \$60,000	20% or 28% 21.5% or 38.5%
3c	1980	Vacant land	40%
4a	1971	Non-homestead residential a. Apartments with four or more units not qualifying as Title II National Housing	34%
		b. Apartment Land	34%
	1973	c. Type I & II Apartments - 4 or less stories (structures only)	34%
4b	1974	Tools, implements and machinery of an electric generating, transmission or distribution system or a pipeline system transporting or distributing water, gas or petroleum products which are fixtures to real property	33-1/3%
5a	1979	Non-homestead residential one, two or three units	28%
5b	1973	Type I and II Apartments Five or more stories (structures only)	25%
6a	1959	Seasonal residential for recreational purposes: a. Commercial, but not used for more than 200 days per year (example: resort).	21%
		b. Non-commercial (example: cabin)	21%
6b		Nonprofit community service oriented organizations	21%
7a	1969	Housing for elderly or for low and moderate income families financed by direct federal loan or federally insured loan pursuant to Title II of the National Housing Act or the Minnesota Housing Act. Structures only.	20%
7b		Housing for elderly, handicapped or lower income persons as defined in Section 8 of U.S. Housing Act.	20%
7c	1971	Housing for elderly or for low and moderate income families financed by a direct loan or insured loan from the Farmer's Home Administration and located in a municipality under 10,000 population. Structures only.	10%

REAL PROPERTY

---

Class	Year Enacted	Description	Percent of Market Value
7d		Neighborhood Real Estate Trust	20%
8		Distribution lines used primarily for supplying electricity to farmers at retail	5%
9a	1913	Unmined Iron Ore	50%
9b	1913	"Low Recovery" Iron Ore	30 to 48½%
		Severed mineral interests tax	*
10		All property not included in any other class	43%

\* 25¢ per acre annually (tax became effective January 1, 1975).  
 Each parcel is subject to minimum annual tax of \$2.00.

PERSONAL PROPERTY

Class	Year Enacted	Description	Percent of Market Value
None		Structures on leased public lands in rural areas	21% to 43%
4b		Tools, implements and machinery of an electric generating, transmission or distribution system or a pipeline system transporting or distributing water, gas or petroleum products which are fixtures	33-1/3%
None		Leased agricultural real estate of exempt land (M.S. 272.01, Subd. 2)	18%
None	1969	Owner occupied residences on leased public or railroad lands	*
None	1981	Leased homestead on land owned by occupant	*
3a**		Structures on leased public lands in urban areas	28% & 43%
		Structures on railroad operating right-of-ways	28% & 43%
		Leased all other (non-agricultural) real estate of exempt land (M.S. 272.01, Subd. 2)	28% & 43%
		Systems of electric, gas and water utilities	28% & 43%
		All other taxable personal property	28% & 43%

\* Buildings receive classification rate as if they were homesteaded real property within the scope of Class 2a, 1a or 1b, whichever is applicable.

\*\* Assessed at 28% on first \$60,000 of market value and assessed at 43% on excess.

## CLASSIFICATIONS NO LONGER ASSESSED

There is no assessment on the following former classes of property:

- 3 Personal - Inventories, stocks of merchandise of sorts, all materials, parts and supplies, furniture and equipment, manufacturer's materials, manufactured articles including the inventories of manufacturers, wholesalers, retailers and contractors, and the furnishings of a room or apartment in a hotel, rooming house, tourist court, motel or trailer camp, and tools and machinery which, by law are considered as personal property
- 3a Agricultural products in the hands of the producer
- 3j Petroleum refinery's personal property
- 3 Real - Machinery which constitutes fixtures to real estate except public utilities under ad valorem taxation

### E. Market Value Increase Limitation

The 1973 Legislature created the concept of limited market value by placing a 5% reassessment on homestead property. In 1975 this limit was repealed and the annual market value increase for any property for the 1975 through 1978 assessments was limited to 10 percent or one-fourth of the total amount of increase from the previous year, whichever was greater. In 1979 a change was made in the formula used in determining the limited market value on property for the 1979 assessment and the elimination of the limited market value on property for the 1980 assessment. For the 1979 assessment, the amount of increase in the limited market value was 10 percent of the 1978 limited market value or one-half of the difference between the 1978 limited market value and the 1979 estimated market value, whichever amount was greater. This limited market value was the base to which the property classification assessment percentages referred to in Item D above were applied to arrive at the assessed value for assessment years 1975 - 1979. Beginning with the 1980 assessment, the limited market value on property was eliminated, and the estimated market value is now the base to which the property classification assessment percentages are applied to arrive at the assessed value.

### F. Review and Equalization

As stated before, the assessor estimates the market value of the property to be taxed and assigns it to a class according to its use. This assessment is subject to review and equalization at three levels: the local (city or town) Board of Review, the County Board of Equalization, and the State Board of Equalization. It is the duty of these boards to listen to appeals and to equalize property assessments and values within classes of property and within and between the various taxing districts.

## 2. Determination of Mill Rates, Gross Tax and Net Tax

### A. Auditors

Each county elects a county auditor, who, among other things, keeps a record of all taxable property in the county, and delivers a list of property owners and their respective taxes to the county treasurer. Along with other duties, the auditor is also responsible for determining mill rates based on the property tax budgets of local governmental units.

Each local unit of government determines the amount of money it will need to fund their various services (such as fire protection, street maintenance, etc.) for the coming year. They then prepare their budgets by figuring the costs of these services and determining where the finances for the budget will come from. The finances come from various sources including parking meters, state and federal aids, fines, licenses, permits, municipal liquor stores, local sales taxes, etc. The portion of the budget that will need to be financed by property taxes is then determined.

The property tax budgets of all local taxing districts are given to the county auditor who determines mill rates by dividing the budget amounts by the taxable value. Taxable value is different from assessed value in certain taxing districts where tax increment assessed value, certain power line values and fiscal disparities contribution assessed values are present. (See Item C. Adjustments to Assessed Value listed below.) These values are subtracted from the total assessed value to get the taxable value used in calculating mill rates.

### B. Levy Limitations

Before determining mill rates, the county auditor assures that the budget levies are within certain limits. These limits, initially enacted by the 1971 Legislature, control the amount of revenue that can be raised by means of property tax levies. There are two basic overall levy limitation laws: one pertains to local government and the other pertains to school districts.

### C. Adjustments to Assessed Values

As mentioned before, taxable value is the value used in determining local mill rates. In many cases, taxable value and assessed value are the same. However, there are cases where certain values must be deducted from the assessed value to determine the taxable value. This is illustrated in Table 35, page 137. Values which are deducted are as follows.

#### 1. Power Line Assessed Value

Ten percent of the assessed value of electrical transmission lines over 200KV in organized townships and cities is excluded from the value used in determining mill rates. After local mill rates are determined, the revenue produced by applying the prevailing local mill rate to the excluded 10% of value is then used to finance the power line credit for cities and organized townships (see Power Line Credit, page 222).

## 2. Tax Increment Financing Districts

Tax increment financing provides a means of financing renewal and renovation projects. Prior to the Tax Increment Financing Act of 1979, there were seven basic types of tax increment financing districts which were authorized by general or special laws:

- 1) Housing and Redevelopment Authority (M.S. Chapter 462 - Laws 1957, Chapter 810);
- 2) Port Authority (M.S. Chapter 458 - Laws 1957, Chapter 812);
- 3) Municipal Industrial Development (M.S. Chapter 473 - Laws 1967, Chapter 297);
- 4) Minnesota Rural Development Finance Authority (M.S. Chapter 362A - Laws 1971, Chapter 920);
- 5) Municipal Development District (M.S. Chapter 474 - Laws 1974, Chapter 485);
- 6) Metropolitan Housing and Redevelopment Authority (M.S. Chapter 473 - Laws 1975, Chapter 13)
- 7) St. Paul Urban Renewal (Laws 1963, Chapter 891);  
Hopkins Development Districts (Laws 1971, Chapter 548);  
Minneapolis and Robbinsdale Development Districts (Laws 1971, Chapter 677);  
Red Wing Development Districts (Laws 1971, Chapter 196);  
Duluth Development Districts (Laws 1973, Chapter 761);  
St. Paul Development Districts (Laws 1973, Chapter 764)

Today, there are basically four types of increment districts that can be set up under current statutes:

- 1) Redevelopment Districts
- 2) Housing Districts
- 3) Economic Development Districts
- 4) Mined Underground Space Development Districts

Although these types of districts have particular, distinguishing characteristics, all have one thing in common: the authority to retain the "tax increment." The "tax increment" is the difference between the original assessed value and current-year assessed value of the properties within the tax increment financing district. This tax increment value is deducted from the total assessed value of the taxing district when local mill rates are calculated. The local mill rate is applied to the tax increment value amount and the revenue from this is used to finance project debt.

For example, a district had an original assessed value of \$500,000. The current year assessed value of the property, however, increased to \$750,000. The county auditor uses only the original assessed value of \$500,000 when determining mill rates. The difference between the two values, \$250,000, is the "tax increment value". This \$250,000 value times the total local mill rate equals the tax increment amount which the county auditor distributes to the affected tax increment district.

Tax increment values and taxes can be found in Table 29, page 74.

### 3. Fiscal Disparities

The Metropolitan Development Act, more commonly known as "Fiscal Disparities", was first implemented for taxes payable in 1975. It established a new property tax system for the seven metropolitan counties of Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington. Although the law is complex, it can be briefly summarized as follows:

Forty percent of the increase in commercial-industrial (including public utility and railroad) assessed valuation in each assessment district since 1971 is contributed to an area-wide tax base. Using the factors of population and real property market value per capita, a distribution index is calculated. This index is employed in determining what proportion of the assessed value in the area-wide tax base shall be distributed back to each assessment district. This amount is referred to as distribution assessed value.

A taxing district's budget levy is reduced by the levy amount it is permitted to spread on the area-wide tax base. Its area-wide levy amount is its distribution assessed value multiplied by its prior year mill rate. The reduced budget levy divided by the taxing district's local taxable value (assessed value less contribution, tax increment, and certain power line assessed values) equals its current year levy mill rate. The local mill rate times the assessed value less contribution value is equal to the local portion of each district's property tax budget levy; whereas, the prior year local mill rate times the distribution value is equal to the area-wide portion. Each metropolitan county auditor certifies to the administrative auditor the area-wide portions of the levy for each district located within his county. The administrative auditor then computes an area-wide mill rate by dividing the total of the area-wide levies by the total area-wide tax base.

A calculated proportion of the assessed value of each commercial-industrial parcel of property is taxed based on the area-wide mill rate; the remaining value receives the local mill rate.

As a result of the aforementioned law, the property tax levy of a taxing district is not the tax amount paid by the taxpayers located within the geographic boundaries of that district. The amount they paid could be more or less than what is actually needed by the district in which they live, depending upon whether the area-wide mill rate was larger or smaller than the local mill rate and whether the contribution value was larger or smaller than the distribution value.

#### D. Mill Rate Determination

When the property tax levy portions of all taxing districts' budgets have been set and when taxable values have been determined, the levy for each district (i.e., county, city, town, school and special taxing districts) is spread against the respective taxable values to determine the local mill rates. Basically, the mill rate is calculated by dividing the property

tax budget levy by the total taxable value. For example, if a county's levy were \$1,000,000 and the total taxable value were \$50,600,000, the total county mill rate would be calculated as follows:

$$\$1,000,000 \div \$50,600,000 = .0197628 \text{ or } 19.763 \text{ mills}$$

The total of each taxing district's individual mill rates is the total local mill rate, which is applied to individual properties to determine the amount of property tax which is owed.

#### E. Mill Rate Exceptions

Under normal circumstances, mill rates are calculated by using the simple formula above. However, there are instances where mill rate calculations deviate from the norm, as follows.

##### 1. Fire Protection Districts

Township mill rates are influenced by the presence of special fire protection districts (Minnesota Statutes 1986, Section 368.85). Any organized town may, through a majority vote cast by the electors within the proposed district, establish a territory which will receive fire protection. A fire district consists of compact and contiguous property of which at least 25 percent of the total assessed value of taxable real property therein is classified as homestead property and other buildings or structures. All costs of a fire protection district are borne by the property taxpayers located within its boundaries. The cost of the fire district is reflected in a higher municipal mill rate for the concerned property. Property outside of the district does not contribute tax dollars toward this protection.

##### 2. Rural-Urban Service Districts

A factor to be considered in the calculation of city mill rates is the rural-urban service district. A rural service district and an urban service district which are adopted by ordinance constitute "separate taxing districts for the purpose of all municipal property taxes except those levied for the payment of bonds and judgments and interest thereon." (Minnesota Statutes 1986, Section 272.67.) Only unplatted lands which are rural in character and which are not developed for commercial, industrial or urban use can become rural service districts. Such land is not benefited to the same degree as other lands by municipal services financed by general taxation. An urban service district consists of all lands within the boundaries of the municipality which are not included in the rural service district. Lesser benefits within a rural service district result in lower mill rates for taxpayers within its boundaries than for taxpayers located within the boundaries of the complementary urban service district.

#### F. Gross Tax

After all mill rates have been determined, the gross property tax for a parcel of property is calculated by applying the sum of the mill rates of all local taxing districts (under whose jurisdiction a property lies)

to the individual property's taxable value. As an example, a property has a taxable value of \$20,000. The gross tax would be calculated as follows:

Taxable Value	\$20,000
Total Local Mill Rate	x 84.736 mills (or .084736)
Total Gross Tax	\$ 1,694.72

#### G. Property Tax Credits

In many instances, the total gross tax will not be the total amount of property tax paid by an individual taxpayer. This is due to the existence of property tax credits. These credits are deducted from the gross tax when determining the actual amount of tax the individual property owner must pay. The property tax credits in existence for taxes payable in 1987 are as follows, listed in the order that they are deducted from the gross tax.

##### 1. Disaster Credit (MN Stat. 273.123)

The disaster credit was set up by the 1982 Legislature to provide tax relief for homeowners whose homes have been damaged by a disaster. This credit became effective for taxes payable in 1984.

The credit is based on a reassessment of the value of homestead property which is located within a declared disaster or emergency area. The county assessor determines the market value of the damaged home and this value is subtracted from the market value of the home before the disaster occurred. The difference is then multiplied by the fraction created by dividing the number of full months remaining in the year (after the disaster happened) by 12. This product is then subtracted from the pre-disaster market value to get the average market value for the year.

The county assessor reports both the assessed value based on the pre-disaster market value and the assessed value based on the post-disaster average market value to the county auditor. The difference between the two assessed values is then multiplied by the prevailing local mill rate to determine the amount of disaster credit. There is no maximum credit limitation for the disaster credit. The amount of the credit is deducted from the gross tax on the property tax statement for that parcel. The state makes payment of the credit directly to the local taxing districts. (There are no counties using the disaster credit for taxes payable in 1987).

Eligible mobile home properties can also receive the disaster credit.

##### 2. Wetlands Credit and Reimbursement (MN Stat. 273.115)

Wetlands credit and reimbursement were established by the 1979 Legislature as an incentive for owners of wetlands to keep the wetlands in their natural state, and to reimburse local taxing districts for revenues lost as a result of wetlands' tax exemption. The credit and reimbursement first became effective for taxes payable in 1981.

For taxes payable in 1987, local taxing districts are reimbursed for revenues lost due to tax exemption of qualifying wetlands of at least

one acre (2½-acre and 10-acre minimums in certain cases). The reimbursement is determined by multiplying the 1979 assessed value of the wetlands property by the current-year total mill rate for the taxing area in which the wetlands are located. Reimbursement is made only for those wetlands which had a 1979 assessed value of at least \$5.

The wetlands credit is determined by multiplying the current-year average estimated market value of an acre of tillable land (in the township or city where the wetlands are located) by the number of wetlands acres owned. This value is then multiplied by 5 mills, resulting in the amount of tax reduction. Any excess credit over the tax liability on the parcel containing the wetlands can be applied to the tax liability on any same-owner parcel which is contiguous to the parcel containing the wetlands. Owners of wetlands must apply to receive the wetlands credit.

The wetlands credit and reimbursement apply to both homestead and non-homestead property. The amount of the credit is deducted from the gross tax on the property tax statement for that parcel. The state makes payment of the credit directly to the local taxing districts. (See Table 46, page 219.)

### 3. Native Prairie Credit and Reimbursement (MN Stat. 273.116)

The native prairie credit and reimbursement were established by the 1980 Legislature as an incentive for owners of native prairie to keep the native prairie in their natural state, and to reimburse local taxing districts for revenue lost as a result of native prairie tax exemption. As with wetlands credit and reimbursement, the native prairie credit and reimbursement became effective for taxes payable in 1981.

For taxes payable in 1987, local taxing districts are reimbursed for revenues lost due to tax exemption of qualifying native prairie land of at least 10 acres (at least 5 acres in certain southern counties). The reimbursement is determined by multiplying the 1979 assessed value of the native prairie property by the current-year total mill rate for the taxing area in which the native prairie is located.

The native prairie credit is determined by multiplying average market value per acre by the number of native prairie acres in the parcel. This value is then multiplied by 15 mills to find the tax reduction amount. Any excess credit over the tax liability on the parcel containing the native prairie, can be applied to the tax liability on any same-owner parcel which is contiguous to the parcel containing the native prairie or, if there is no contiguous parcel, the excess can be applied to a parcel in the same city or township, or to a parcel no farther than two cities or townships from the parcel with the native prairie land.

As with wetlands, the native prairie credit and reimbursement apply to both homestead and non-homestead property. The amount of the credit is deducted from the gross tax on the property tax statement for that parcel. The state makes payment of the credit directly to the local taxing districts. (See Table 47, page 221.)

4. Power Line Credit (MN Stat. 273.42)

The power line credit was established by the 1980 Legislature as a means of reducing the property tax burden of those taxpayers whose properties have high-voltage electrical lines passing over them. This credit first became effective for taxes payable in 1982.

Prior to 1982, utility companies made direct payments to qualifying property owners in organized and unorganized townships to compensate them for having these high voltage lines pass over their property. Beginning with taxes payable in 1982, qualifying property owners in cities and organized townships were given a property tax credit to reduce their gross property tax. In 1983, qualifying property owners in unorganized townships were also made eligible to receive the tax credit. Since that time and for taxes payable in 1987, owners of property classified as farm, residential, apartment, etc., are given a credit which is calculated by the county auditor and applied against the gross property tax. In order to qualify for this credit, the property must be crossed by a transmission line of 200KV or more which was constructed after June 30, 1974.

For qualifying property owners in unorganized townships having these high voltage lines pass over their property, the credit is calculated as follows. A fraction, determined by dividing the length of high voltage line over the parcel by the total length of high voltage line running over all property within unorganized townships in the county, is multiplied by the total amount of the utility property tax credit fund (10% of tax revenue generated by all transmission lines in unorganized townships and lines under 69KV in organized townships) within the county for that year. The calculated amount is then deducted from the gross property tax.

For qualifying property owners in organized townships and cities, the credit is calculated as follows. A fraction, determined by dividing the length of high voltage line over the parcel by the total length of that particular line running over all property within the city or township, is multiplied by 10% of the tax revenue generated by that portion of the line within the city or township. The calculated amount is then deducted from the gross property tax.

The credit is limited to 20% of the gross tax. However, if the property containing the high voltage line right-of-way is included in a parcel which is more than 40 acres, the total gross tax is multiplied by a fraction (the numerator of which is the sum of the number of acres in each quarter-quarter section or portion thereof containing the right-of-way, the denominator of which is the total number of acres in the parcel as listed on the tax statement) before the 20% is figured. If the credit is calculated to be less than \$10, it is not given.

The amounts of the credit are distributed by the county auditor to the local taxing districts in which the properties receiving the credit are located.

5. Agricultural Preserves Credit (MN Stat. 473H.10)

The agricultural preserves credit was established by the 1980 Legislature as part of the Metropolitan Agricultural Preserves Act. The

credit was created as a means of encouraging and keeping farming within the seven-county metropolitan area. The credit first became effective for taxes payable in 1983.

For taxes payable in 1987, the credit is based on the assessed value of land and non-residential buildings (used for agricultural purposes) which are located in a designated agricultural preserve. The credit is based on the difference between the prevailing total local mill rate and 105% of the previous year's statewide average total mill rate within townships. The difference between the two mill rates is the agricultural preserves credit mill rate. This mill rate is then applied to the land and non-residential buildings within the agricultural preserve to determine the credit amount.

If the total local mill rate is less than 105% of the previous year's statewide average mill rate for townships, there is no credit. This credit is given only to lands meeting the requirements for designation as agricultural preserves as found in MN Stat. 473H.03. The amount of the credit is deducted from the gross tax on the property tax statement for that parcel. The state makes payment of the credit directly to the local taxing districts. (See Table 49, page 223.)

6. Enterprise Zone Credit (MN Stat. 273.1314)

The enterprise zone law was passed by the 1982 Legislature and became effective July 1, 1983. The purpose of an enterprise zone is to generate jobs and industry in economic hardship areas, and to keep existing businesses from moving out of state, by means of several types of tax reductions and credits.

When a city or an area has qualified as and been given approval for designation as an enterprise zone, it may qualify for various forms of income, sales and property tax reductions. The enterprise zone property tax credit is a state paid credit for a portion of the property taxes paid by certain commercial or industrial properties located within the enterprise zone. The amount of the credit is deducted from the gross tax on the property tax statement for that parcel. The state makes payment of the credit directly to the local taxing districts.

For taxes payable in 1987, six counties in Minnesota reported enterprise zone property tax credits. (See Table 49, page 223.)

7. State School Agricultural Credit (MN Stat. 124.2137)

School agricultural aid was established in 1933 as a means of reducing the tax rate within the school district maintenance fund for agricultural property owners. The aid was initially set up as a mill rate differential, shifting the tax burden for school district maintenance to non-agricultural properties.

In 1971, the Legislature made provisions for payment of state aid to finance the 8.3 mill difference between the agricultural and non-agricultural school mill rates. This difference in mill rates was in effect for taxes payable through 1976, when the mill rate differential was replaced by a state-paid property tax credit. From 1977-1983, the credit was based on a tax reduction equal to an amount

produced by applying certain mill rates to certain portions and types of agricultural property. For taxes payable 1984-1987, the credit is based on a reduction equal to a certain percentage of the total tax on certain portions and types of agricultural property. (These mill rates and percentages can be found in Table 18, page 48.)

For taxes payable in 1987, agricultural homestead property up to 320 acres can receive a tax reduction equal to 36 percent of the total tax levied on the assessed value of this portion of the property, excluding the house, garage and one acre. All other farm property and class 3e timberlands receive a reduction of 26 percent. Seasonal recreational property receives a reduction in tax of 15 percent. The maximum amount of tax reduction that owners of seasonal recreational property can receive is \$100. Also, the amount of the tax reduction cannot exceed the amount of the school district levy on a specific property. This credit is paid entirely to the school district by the state.

Eligible mobile home properties can also receive the 15% agricultural aid credit.

8. Homestead Credit and Taconite Credits (MN Stat. 273.13, 273.135, 273.1391)

The homestead credit is the oldest and largest state-paid property tax credit given to taxpayers. The credit was created by the 1967 Legislature to reduce the property tax burden of both residential and agricultural homeowners.

For taxes payable in 1987, the homestead credit is equal to 54% of the gross tax (less any other credits excluding the taconite credits). The credit is based on a market value limit of \$68,000 (for residential properties) and cannot exceed \$700. (See Table 14, page 44.) The amount of the credit is deducted from the gross tax on the property tax statement for that parcel. The state makes payment of the credit directly to the local taxing districts.

The taconite homestead credit was created by the 1970 Legislature. This credit benefits homeowners on the "Iron Range" of Minnesota, where taconite production companies pay a production tax in lieu of certain property taxes.

For 1987, homeowners in taconite tax relief areas receive a credit of either 57% or 66% (depending on certain criteria such as the value of the iron ore in the assessment district, proximity to mines, etc.) in addition to the homestead credit. The maximum amount of this credit is \$465 for those receiving the 57% credit and \$520 for those receiving the 66% credit. The taconite homestead credit is calculated and deducted from the gross tax after the 54% homestead credit is deducted. (See Table 16, page 46.) It is paid by the state from a portion of taconite production tax receipts.

The supplementary taconite homestead credit was created by the 1980 Legislature. This credit is given to homeowners in school districts #317 (Itasca County) and #698 (Aitkin and St. Louis counties). This credit is calculated in the same manner as the 57% taconite homestead credit. Payment of this credit is made by the state out of the general

fund. The 54% homestead credit and the regular and supplementary taconite tax relief credits are also given to eligible homesteaded mobile home properties.

#### H. Net Tax

The net tax is derived by deducting all appropriate property tax credits from the gross tax. The net tax amount is the total amount of property tax due, except in cases where there are special assessments added to the net tax.

Special assessments involve the funding of such projects as streets, curbs, sidewalks, ditches, and storm sewers. When any of these improvements are made to an individual's property, that individual is said to have benefited directly from the improvement. The amount of the special assessment is based on how much the individual property benefits from the improvement. It is not based on the value of the owner's property. Thus, special assessments are not a tax and are not included in the amounts used to determine mill rates. They are added to the individual's net property tax and are shown as a separate item on the tax statement. The special assessment amount is added to the net tax amount to determine the total amount of tax due.

### 3. Collection of Taxes

The county auditor sends a list of all property owners, and the amount of property tax each must pay, to the county treasurer.

#### A. Treasurers

It is the duty of the county treasurer to collect all taxes as determined by the county auditor, as well as special assessments, and any fines or penalties that may be involved. The treasurer prepares tax statements using the information provided by the auditor and must mail the tax statements by January 31 of each year.

#### B. Tax Payments

Property taxes may be paid to the county treasurer in two equal installments. For personal property taxes over \$50, one-half the amount must be paid by February 28, and the remaining half must be paid by June 30. For real estate taxes over \$50, half of the total tax is due by May 15, and the remaining half is due by October 15. If the personal property tax is \$50 or less, the entire amount must be paid by February 28. If real estate taxes are \$50 or less, the entire amount must be paid by May 15.

#### C. Tax Penalties

##### 1. Personal Property

Effective on July 1, 1987, if the amount of personal property tax is \$50 or less, it becomes delinquent on March 1 after it is due. If the amount is over \$50, the first half of the unpaid tax becomes delinquent March 1, and the other half becomes delinquent on July 1. In all cases, there is an eight percent penalty added to the unpaid tax at the point it becomes delinquent.

## 2. Real Estate

All real estate taxes become delinquent on May 16. At that point, a three percent penalty is charged on unpaid homestead property tax and a seven percent penalty is charged on non-homestead property. Thereafter, on the 16th day of each month, up to and including the following October 16, an additional one percent penalty for each month is charged on the unpaid tax. If the tax is more than \$50, half may be paid by May 15 and half by October 15. If the second half is not paid by October 16, both homestead and non-homestead properties are charged an additional four percent penalty. Thereafter, an additional two percent penalty on homestead property and an additional four percent on non-homestead property is added on the 16th day of each month up to and including the following December 16, if second half taxes remain unpaid.

## 4. Mobile Homes

Mobile homes, by statute, are called manufactured homes. A "manufactured home" is defined as a structure that is transportable in one or more sections, built on a permanent chassis, and designed to be used as a dwelling, with or without a permanent foundation.

If a manufactured home meets the following criteria, it is classified, assessed and taxed as if it were real estate property:

1. The owner of the home holds title to the land on which the home is situated.
2. The home is attached to the land by a permanent foundation, or is installed at its location in accordance with the manufactured homes building code (MN Stat. 327.31 to 317.34), or is affixed to the land in a manner comparable to other real estate property in the taxing district.
3. The home is connected to public utilities, has a well and septic tank system, or is serviced by water and sewer facilities comparable to other real property in the taxing district.

If the owner of the manufactured home leases the land on which it is situated and if the manufactured home meets criteria 2 and 3 above, the home is classified as personal property, but is assessed and taxed as real property.

For the 1986 assessment, taxes payable in 1986 (see Tables 55 and 56, pages 235 to 239), manufactured homes not classified as real estate were assessed as follows:

<u>Class</u>	<u>Year Enacted</u>	<u>Description</u>	<u>Percent of Market Value</u>
None	1959	Manufactured Homes	
		Agricultural Homesteads:	
		1st \$64,000	14%
		Over \$64,000	18%
		Non-Agricultural Homesteads:	
		1st \$64,000	18%
		Over \$64,000	29%
		Non-Homestead	28%

The value of manufactured homes not treated as real estate are not used in the determination of mill rates for other real and personal property for that year, but they are taxed at the mill rate that was used for real and personal property for that year.

Manufactured homes not treated as real estate may qualify for certain property tax credits, including the homestead credit, taconite credit, disaster credit and agricultural credit (see Property Tax Credits, page 14).

The county treasurer must send out tax statements to the owners (of manufactured homes not treated as real estate) by July 15 each year. The total amount of tax must be paid by August 31 and becomes delinquent on September 1 if not paid. A penalty of eight percent is assessed on the unpaid tax.

**SECTION II**  
**Historical Data**

TABLE 1

ASSESSED VALUES, TOTAL TAXES LEVIED INCLUDING SPECIAL ASSESSMENTS  
AND STATEWIDE AVERAGE MILL RATES

Payable Year	Assessed Values				Average Tax Rate In Mills *	Total Taxes Levied
	Rural Land Including Structures	Urban Land Including Structures	Personal Property	Total

\* The statewide average mill rate is exclusive of special assessments.

\*\* The homestead base values by payable year are as follows:

1970-1972...\$ 4,000	1978...\$15,000	1981.....\$25,000 and \$50,000	1985...\$31,000 and \$62,000
1973-1976...\$12,000	1979...\$17,000	1982-1983...\$27,000 and \$54,000	1986...\$32,000 and \$64,000
1977.....\$13,000	1980...\$21,000	1984.....\$30,000 and \$60,000	1987...\$32,500 and \$65,000

(a) For payable years 1970 - 1972, due to reporting errors, Non-Homestead Real Estate contains some values that should be in Homestead Real Estate. Therefore values for these years should not be directly compared to values for other years.

(b) The market value concept was first used for taxes payable in 1973. Under this concept, assessed values and average tax rates changed considerably.

TABLE 2

## REAL AND PERSONAL PROPERTY TAXES LEVIED

Payable Year	Real Estate Levy	Personal Property Levy	Total Levy Excluding Special Assessments	Average Mill Rate	Homestead Credit	Agricultural Credit	Net Tax Payable Excluding Special Assessments	Special Assessments	Total Net Tax Payable Including Special Assessments

NOTE: Footnotes may be found on page 29.

FOOTNOTES FOR TABLES 2, 3 AND 4

NOTE: Homestead credit became effective with taxes payable in 1968;  
Taconite credit became effective with taxes payable in 1970.

- 1) Due to the elimination of the "adjusted market value" concept, the mill rate decreased to approximately one-third of the previous level. See explanation on page 3 .
- 2) Total amounts of homestead credit include the following amounts of taconite credit:

1970....\$1,012,094	1977....\$ 9,066,923	1984....\$19,416,876
1971.... 1,043,486	1978.... 9,524,963	1985.... 10,460,191
1972.... 2,814,419	1979.... 11,748,570	1986.... 10,777,180
1973.... 2,617,416	1980.... 13,006,426	1987.... 11,203,839
1974.... 3,250,178	1981.... 14,398,085	
1975.... 3,648,072	1982.... 16,412,340	
1976.... 9,263,039	1983.... 17,854,916	

- 3) Includes (or excludes in the case of net taxes) Seven County Metropolitan Contribution Levy in:

1975...\$16,672,517	1981...\$ 46,774,964	1987... \$169,633,883
1976... 20,986,439	1982... 65,019,879	
1977... 19,418,464	1983... 88,756,546	
1978... 23,075,548	1984... 107,423,873	
1979... 29,523,199	1985... 137,398,665	
1980... 36,268,483	1986... 141,184,290	

Also includes power line levy of:

1982	1983	1984	1985	1986	1987
\$367,851	\$407,699	\$395,464	\$404,262	\$420,745	\$429,381

- 4) Includes tax increment financing levy amount of:

1982	1983	1984	1985	1986	1987
\$35,141,373	\$46,425,859	\$58,154,901	\$70,761,120	\$92,355,076	\$117,465,743

- 5) Starting in 1981, the net taxes column reflects the exclusion of the following credits:

	1981	1982	1984	1985	1986	1987
Reduced Assessment Credit.....	\$11,536,758	\$14,026,852	\$ NA	\$ NA	\$ NA	\$ NA
Wetlands Credit.....	2,307,260	2,798,921	313,355	421,758	395,940	302,067
Native Prairie Credit.....	83,104	102,267	121,898	139,261	130,335	109,969
Power Line Credit.....	NA	135,506	165,373	163,997	170,884	168,707
Agricultural Preserves Credit....	NA	NA	340,215	390,855	650,582	483,676
Disaster Credit.....	NA	NA	58,582	71,575	—	—
Enterprise Zone Credit.....	NA	NA	651,896	1,013,948	1,077,931	1,042,854

1 Special Assessments are charges made to specific real estate parcels for improvements which do not benefit the entire taxing district. Special Assessments are not included in the taxing district levy when mill rates are determined.

2 School Districts do not have special assessments. However, the entries in this table are basically old school district debts that were treated as special assessments during that year in which the taxes were due. Because of their treatment, these taxes were not included in calculating the average county mill rate, the statewide average mill rate, nor were they given homestead credit for the years in which homestead credit was paid.

3 Prior to payable year 1974, no specific provisions were made for reporting special taxing districts' (specifically watersheds) special assessments. Hence, any special taxing district's special assessments were shown on this table as county special assessments. Effective with payable 1974, a separate column was provided for reporting special taxing districts' special assessments.

\* Includes tax increment financing district levy. The amounts of this levy can be found in Table 5, Page 30.

\*\* Excludes fiscal disparities contribution levy and beginning in 1982, also excludes power line levy. The amounts of both of these levies can be found in the footnotes following Table 4, Page 29.

TABLE 14

HOMESTEAD CREDIT DETERMINATION DATA  
TAXES PAYABLE 1968-1987

<u>Payable Year</u>	<u>Base</u>	<u>Rate</u>	<u>Maximum</u>	<u>Acreage</u>	<u>Market Value Limit</u>

1984	gross tax after credits	54%	\$ 650	Unlimited	\$67,000
1985**	gross tax after credits	54%	\$ 650	Unlimited	\$67,000
1986**	gross tax after credits	54%	\$ 700	Unlimited	\$68,000
1987**	gross tax after credits	54%	\$ 700	Unlimited	\$68,000

\* In 1982 a limitation was placed on the mill rate and levy used to determine homestead credit for all local taxing districts except school districts and the Metropolitan Transit Commission. If the 1982 levy of a taxing district was more than 108 percent of its 1981 levy, the total homestead credit amount was determined by the mill rate based on 108 percent of the taxing district's 1981 levy.

\*\* For taxes payable in 1985 and subsequent years, disaster credit, wetlands credit, native prairie credit, power line credit, agricultural preserves credit, enterprise zone credit and agricultural credit are deducted before the homestead credit is calculated. The homestead credit is calculated and deducted before the taconite homestead credit and supplemental taconite homestead credit are calculated.

45

\* Homestead credit determination data can be found in Table 14 page 44.  
\*\* The non-agricultural homestead credit includes tax increment financing homestead credit.

TABLE 16

TACONITE HOMESTEAD CREDIT, PERCENTAGES AND MAXIMUMS  
TAXES PAYABLE 1972-1987

Taxes Payable	Taconite Homestead Credit*		Percentages and Maximums		
	Taconite Credit Amount	Total Number Receiving	Payable Year	Percentages	Maximums
1972	\$ 2,814,419	—	1972	21 or 27%	\$150 or \$190
1973	2,617,416	—	1973	21 or 27%	\$150 or \$190
1974	3,250,178	46,753	1974	21 or 27%	\$150 or \$190
1975	3,648,072	51,504	1975	21 or 27%	\$150 or \$190
1976	9,263,039	53,828	1976	52 or 60%	\$300 or \$350
1977	9,066,923	55,951	1977 **	49.7 or 57.3%	\$287 or \$334
1978	9,524,963	59,919	1978 **	48.9 or 56.7%	\$283 or \$331
1979	11,748,570	61,090	1979	57 or 66%	\$345 or \$400
1980	13,006,426	60,794	1980	57 or 66%	\$360 or \$415
1981	14,398,085	59,728	1981	57 or 66%	\$375 or \$430
1982	16,412,340	53,218	1982	57 or 66%	\$390 or \$445
1983	17,854,916	52,237	1983	57 or 66%	\$405 or \$460
1984	19,416,876	50,321	1984	57 or 66%	\$420 or \$475
1985	10,460,191	51,587	1985	57 or 66%	\$435 or \$490
1986	10,777,180	51,361	1986	57 or 66%	\$450 or \$505
1987	11,203,839	50,862	1987	57 or 66%	\$465 or \$520

\* The Taconite Credit Amount, starting in 1981, includes the following Supplementary Homestead Credit Amount:

1981...\$ 419,537	1983...\$ 504,017	1985...\$ 311,485	1987...\$344,826
1982... 465,160	1984... 588,618	1986... 336,928	

\*\* The 1977 and 1978 percentages and maximums were adjusted due to insufficient receipts to cover the credit. The figures before adjustments were:

1977 - 52% or 60% with maximums of \$300 or \$350;  
1978 - 57% or 66% with maximums of \$300 or \$385.

(1) The farm gross tax is before the deduction of the agricultural credit. For 1974-1976, gross tax is before the deduction of the agricultural mill rate differential credit.

(2) From 1974-1983, credits may include the agricultural, homestead, taconite homestead, reduced assessment, wetlands, native prairie, power line and agricultural preserves credits.

For 1984-1987, credits may include agricultural, homestead, taconite homestead, wetlands, native prairie, powerline, agricultural preserves, disaster, and enterprise zone credits.

TABLE 22  
ADJUSTMENT AMOUNTS FOR PRIOR YEARS  
FOR REAL PROPERTY  
TAXES PAYABLE 1974 - 1987

Year	Homestead Credit(1)		Taconite Homestead Credit	Supplemental Homestead Credit(3)	Agricultural Credit(3)
	Tax Increment Financing Districts(2)	Taxing Districts

1985	45,233	3,277,627	116,895	2,872	107,155
1986	53,029	1,960,620	46,855	4,051	224,322
1987	- 83,668	1,673,131	34,015	3,079	103,253

- (1) Adjustment amounts for homestead credit may include adjustment amounts for one or more of the following: reduced assessment credit (1982), wetlands and native prairie credits and reimbursements (1982-1987), agricultural preserves credit (1984-1987), and disaster and enterprise zone credits (1985-1987).
- (2) Prior year homestead credit adjustment amounts for tax increment financing districts were first reported separately in 1981.
- (3) Prior to payable year 1977, agricultural aid was based on a state financed mill rate differential as opposed to the agricultural credit referenced in this table.

- (3) The assessed value, special taxing district levy, and total levy columns contain tax increment financing (TIF) amounts for those counties containing a TIF district. The TIF values and levies are found in Table 29, pages 75 through 77. The total levy column also includes any power line levy amount.
- (4) For 1986 and 1987, miscellaneous credits include power line, agricultural preserves, disaster and enterprise zone credits. These amounts can be found in the footnotes for tables 2, 3 and 4, page 29 for 1986 and for 1987 by county they are listed in Table 36, pages 143 to 155.

Explanation of Categorical Division of County,  
City/Township, School District, and  
Special Taxing District Levies by Major Purpose

To obtain uniform reporting from the 87 counties and to comply with the physical limitations of the Abstract of Tax Lists, the numerous authorized levies are grouped by major purpose of the levy. The county auditors are provided with instructions which detail the individual levies to be included in each category (column) on the abstract. Some are self-explanatory, while others include a wide variety of levies.

The following list is not a complete digest of all the levies. It is merely a general index to the nature of each category as found on the abstract. Tables 37 through 41 are patterned after the design of the abstract column headings.

County Levies

<u>Column Heading</u>	<u>Items Included Within Column Heading</u>
General. . . . .	General revenue, county or regional jail construction, other county buildings, public employees' retirement and social security funds, employees on leave from the state, ambulance service, health department and county controlled hospital districts, mental health services, nursing homes, cattle testing, agricultural societies and extension committees, civil defense, correction centers, probation services, sheltered workshops, senior citizen recreation programs, historical societies, insect and weed control, solid waste programs, parks and monuments, voting machines.
Indebtedness. . . . .	General obligation, state loans, debt portion of other levies.
Road and Bridge . . . . .	Road and bridge, repair and maintainance.
Welfare . . . . .	General assistance, aid to dependent children, aid to blind and disabled persons, medical assistance, administration expense, purchase and delivery of social services.
County and/or Regional Library. . .	County library, contracts for library service.

Miscellaneous . . . . . Public examiner's post-audit expense, state reassessment costs, judgments, armories.

County Special Assessments. . . . . See (\*) after City/Town Special Assessments.

CITY/TOWNSHIP LEVIES

<u>Column Heading</u>	<u>Items Included Within Column Heading</u>
General Revenue - Tort . . . . .	Tort liability insurance.
General Revenue - All Other. . . . .	All other regular and general fund purposes, relief for paid and volunteer firemen, police security funds, airports, ambulance and health services, civil defense, aquatic vegetation, water pollution, insect control, fire and police protection, community correction and activity centers, dump grounds and sewage disposal, commemorative purposes, parks, recreation, musical entertainment, library, cemetery, voting machines.
Indebtedness. . . . .	General obligations, state loans, hospitals, parking facilities, water, sewer bonds, indebtedness of dissolved villages, and all other debt within any fund.
Road and Bridge. . . . .	Road work, road drainage, bridge repairs.
Miscellaneous. . . . .	Advertising, comprehensive planning, judgments, state post-audit expense, permanent improvement and replacement fund.
City/Township Special Assessments. .	See (*) below.

\* Property taxes categorized as special assessments are not determined through the use of a mill rate as are ad valorem property tax levies. Instead, the dollar amount of a special assessment is paid by the property owner who benefits from the improvement regardless of the cash value of the owner's property. Examples of special assessments are ditches, curbs, gutters and storm sewers. If public property is improved by a special assessment, however, such as a courthouse sidewalk, every property owner pays a portion of its costs. The improvement is financed through proper funds within the county or municipality's total ad valorem levy.

SCHOOL DISTRICT LEVIES

Each of the following categories relate directly to the type of school property tax levy reported on the form entitled "Levy Limitation and Certification - 1986 Payable 1987".

<u>Column Heading</u>	<u>Items Included Within Column Heading</u>
Maintenance. . . . .	Administration, operation and maintenance of school programs and buildings, includes salaries, fuel and supplies.
Transportation . . . . .	Transportation costs, including bus service.
Community Service. . . . .	Community oriented activities, not limited to any age group.
Capital Expenditure. . . . .	Equipment and capital improvements not covered by bond issues.
Indebtedness . . . . .	Debt service payments on general obligation bonds, state loans. Most debt is incurred due to a building program.
 Area Vocational Technical Institute	
Debt Service. . . . .	Debt Service payments on AVTI bonds.
Maintenance . . . . .	All vocational school costs except debt.
 Intermediate Area Vocational Technical Institutes	
#287 - Suburban Hennepin County	
#916 - Ramsey-Washington County	
#917 - Dakota County	
These three intermediate AVTIs share an overlapping taxing authority with their K-12 component school districts.	
Debt . . . . .	Debt service payments on AVTI bonds.
Maintenance. . . . .	All vocational school costs except debt.

## SPECIAL TAXING DISTRICT LEVIES

Although special taxing districts exist with great variance among the counties, general categories are established in this section of the abstract. If special taxing districts exist in a county, the levies are entered separately for tort liability, all other revenue and debt. There are 11 main categories of special taxing districts as described in "1985 Tax Levy Authorizations and Limitations" as prepared and published by the Department of Revenue.

1. Hospital District
2. Watershed District
3. Sanitary Sewer District
4. Housing and Redevelopment Authority
5. Regional Development Commission
6. Metropolitan Airport Commission
7. Metropolitan Council
8. Metropolitan Transit Commission  
(seven county metro and St. Cloud)
9. Park District
10. Port Authority
11. Regional Railroad Authority  
(Hennepin County)

For purposes of the Abstract of Tax Lists, mosquito control districts are also considered to be a separate special taxing district category.

## TOTAL REAL AND PERSONAL PROPERTY TAX BY TAXING DISTRICT FOR PAYABLE YEAR 1987

160

	County	26.3%
	Town	2.0%
	City	16.4%
	Contribution Tax	5.2%
	Tax Increment Financing	3.6%
	School District	44.0%
	Special Taxing District	2.5%
	Total	100% *

Total Gross Tax = \$ 3,277,322,315

\* Power Line is less than 0.1% of the total gross tax.

Dakota	3,792,779	59,505	9,794,333	543,429	3,479,972	17,670,018
Hennepin	15,529,915	14,147	32,089,168	3,161,297	17,647,282 *	68,441,809
Ramsey	9,870,057	43,742	19,911,166	1,832,904	12,007,500	43,665,369
Scott	604,065	47,971	1,903,100	111,539	1,200,627	3,867,302
Washington	1,931,218	118,767	5,500,199	464,090	2,815,044	10,829,318
SEVEN COUNTY TOTAL	\$ 35,556,857	\$ 494,167	\$ 82,620,778	\$ 7,019,381	\$ 43,938,356	\$ 169,629,540

\* This is the amount of 1987 distribution tax actually levied for Hennepin County. The amount of distribution tax deducted from Hennepin County's payable 1987 property tax levy is \$17,838,654. The \$191,372 difference is an adjustment that was made to offset the 1986 distribution tax which was levied for the Hennepin County Regional Railroad when it had no property tax levy for taxes payable 1986. To compensate for this inadvertent (the distribution tax is determined before property tax levies are certified) 1986 over-levy, the \$191,372 was carried forward to 1987 and used to reduce the county government's distribution levy.

NOTE: THE TAX ON THE POWER LINE PROPERTY OF ELECTRIC, LIGHT AND POWER COMPANIES IS DIVIDED INTO TWO CATEGORIES. TRANSMISSION LINES ARE ASSESSED AT 43% OF MARKET VALUE, WHILE DISTRIBUTION LINES ARE ASSESSED AT 5% OF MARKET VALUE. THE TAX RATE FOR BOTH IS THE COUNTYWIDE AVERAGE MILL RATE FOR ALL PURPOSES.

\*Excludes tax of \$2,620,463, an assessed value of \$16,540,638 and a market value of \$33,081,276 for minerals.

Nominal Tax Rate is net tax payable divided by assessed value.

Effective Tax Rate is the net tax payable divided by the indicated market value.
