KVM Accessories

Belkin Secure KVM Mounting Brackets

PART #	DESCRIPTION
F1D006	Desk mount for F1DN10xB/C/P
F1D008	Desk mount for F1DN104E/F/Q/W

Belkin Secure Desktop Controller Unit (DCU)

| PART #	DESCRIPTION
F1DN002R	4 Button DCU for 4 port Belkin Secure KVM Switches, with LCD Display
F1DN003R	3 Button DCU for 4-16 port Belkin Secure KVM Switches, with LCD Display

Belkin Secure CAC Reader

PART #	DESCRIPTION
F1DN005U	USB Smart Card/CAC Reader

Belkin Smart Cables

Cybersecurity Solutions

THE CHALLENGE

Exponential increases in cyber-attacks present a constant risk to companies' data, IP, and critical infrastructures; thus highlighting the need to extend network isolation to the desktop.

THE SOLUTION

Belkin offers a wide set of NIAP Protection Profile 3.0 certified products designed to maintain air-gap isolation at the desktop while improving operator efficiency and effectiveness.

The ultimate security solution

All Belkin secure switching products are equipped with a host of security features including:
- Optical data diodes assuring unidirectional data flow.
- No shared resources between physically isolated computers.
- Strong authentication and filtering of connected USB devices.
- Secured EDID communication ensuring protection of connected monitors.

Tamper proof system

All Belkin secure switching products are equipped with an end-to-end tamper proof system including:
- Active always-on anti-tamper system disabling product once switch's electronic circuitry is accessed or tampered with.
- A holographic security tamper-evident label on switch enclosure to indicate if product has been opened or compromised.
- Heavy-duty tamper-resistant enclosure with built-in mounting option for simpler desktop deployment.
- Secure "tear-away" packaging for secure delivery of product.

Differences between secure KVM and secure KM switches

Belkin KVMs securely switch control of video, audio, keyboard and mouse between computers. The benefits are many including better space efficiencies, better worker productivity and reduced cost by eliminating extraneous peripherals.
Belkin KMs switch only keyboard, mouse and audio while displays are connected directly to their respective computers, enabling full situational awareness across up to 32 monitors. KMs automatically and seamlessly switch channels as operators move the cursor from one monitor to another.

Who are we?

Belkin, a proven technology leader for more than 30 years, provides high-quality customized solutions that align seamlessly to enhance the technologies that businesses, schools, government agencies and other professional organizations depend on for their growth and success. Belkin is dedicated to developing innovative solutions to address the challenges of the modern workplace.
