Honeywell

Product Access Policy

Products on the pricelist are now classified in five categories: A, B, C, Virtual and New. These categories have been in place for legacy HSM products since 2013; the same categorization is now being introduced to legacy Intermec products. **Please note that for legacy Intermec products, the conditions and associated leadtime changes will not come into effect until October 2015; the classification indicated in the Pricelist is for information only at this time.**

For more easy understanding these categories carry in the Price List a corresponding color.

The categories reflect our high runners (A), medium runners (B) and low runners (C). These classifications will set clear expectations on the Lead Time and will increase our ability to meet the first promise dates.

The category Virtual is connected to our Service Contracts and Software products for which the aimed delivery is depending on the delivery of the hardware or is more a virtual transaction of the software key or contract. We are aiming to complete the virtual transaction within 3 working days.

The category New is referring to new products which will be assigned an ABC classification between 3-6 months after release, when the market trends have been reviewed and an ABC classification can be allocated per product item.

Media remains outside the scope of this categorization at this time.

The Pricelist with A, B, C, Virtual and New classifications is available on the Partner Web.

With the upcoming changes the aim is to deliver the following:

- Increased accuracy of our delivery dates.
- Better aligned Lead Times for core products and accessories considered as high and medium runners. Visibility on high/low runners, Visibility on made to order/ tailor made products (C category items), Visibility on non returnable & non cancellable (C category items).
- Quarterly review of classifications based on ordering pattern, market trends & product lifecycle.
- On a weekly basis a Lead Time map will be shared, providing you with updates on the exceptions in our supply chain including extended leadtimes and exceptional demand quantities.
- Please note: C items will be supplied within factory Lead Time and are non returnable.
- For all future orders a minimum order value is applicable. In case your sales order is not meeting the required minimum value, it still will be processed, but an administration fee will be added. You can find the minimum order value and corresponding fee on the pricelist on the partner web. Orders for demo units, Software, Service Contracts and OEM engines do not require a minimum value.
- Please ensure your purchase order specifies clearly when you have a requested delivery date that deviates from our published leadtimes.
- Amendments to orders will be accepted only within 24 hours after reception of the Order Acknowledgment.
- All cancellation requests are subject to approval and Honeywell reserves the right to charge additional fee with the minimum 10% of the ordered goods.

Computer Devices - CV41 Vehicle Mount Computer

CV41 is a fixed-mount computer for use in forklift, vehicle and stationary environments. Standard features include 8" Wide-VGA (800x480) touch screen, integrated 64-key QWERTY rugged keyboard, Bluetooth, CANBUS, and support for scanners and RFID. The quick-mount dock and field-replaceable touch/keyboard assembly make equipment maintenance fast and easy. Options include WWAN/GPS, screen defroster, remote WLAN antenna support, and the choice of either Microsoft Windows CE 6.0 (1GB RAM, 1GB SSD, 802.11a/b/g) or Microsoft Windows Embedded Standard 2009 (2GB RAM, 4GB or 8GB SSD, 802.11a/b/g/n).

Each CV41 comes with a pre-installed, pre-licensed copy of Intermec Client Pack host connectivity software featuring both a classic Terminal Emulation client and a lock-down industrial Browser client.

REQUIRED ACCESSORIES: Each CV41 computer requires a powered dock for operation (CV41001VMCRADLE). AC operation requires additional AC/DC power supply (CV41302PWRSPPLY), AC adapter cable (CV41078CABLE) and country-specific AC power cord. Order mounting kits and cables as required.

Computer Devices - CV61A Vehicle Mount Computer and Accessories

CV61 is a fixed-mount computer for use in forklift, vehicle and stationary environments. Designed for full PC performance and manageability, the CV61 computer features a choice of Windows 7 Professional or Windows XP Professional. Standard features include integrated 9-60V DC-DC power converter, 1.8 GHz Atom CPU, 12.1" XGA

(1024x768) Display, Bluetooth, 802.11a/b/g/n, and outdoor-viewable touchscreen. The CV61 mounting and accessory options make it an easy drop-in replacement for legacy CV60 computer installations.

Required accessories: Direct Wiring Kit (203-950-001) required for vehicle installation without Heated Touch. External DC-DC Power Converter Kit (203-950-002) and Adapter Cable (VE027-8024-C0) required for Heated Touch vehicle installation. AC/DC Power Supply Kit (203-955-001) required for stationary installation. Mounting Kit, Scanner, Cables, External Keyboard as required.

Intermec Client Pack Terminal Emulation and Industrial Browser host connectivity software available separately.

Software - Enterprise Client Pack

The new Enterprise Client Pack provides both a data collection terminal emulator and a data collection and lockdown browser. It provides a common client across device architectures, and a terminal emulator and browser designed for handheld computers.

Enterprise Terminal Emulator incorporates and builds on the industry's best features for VT/ANSI, 5250, and 3270 emulation.

Enterprise Browser is a locked-down Web browser created for customers who wish to utilize web-based applications but don't want to give users complete access to the World Wide Web. Enterprise Browser restricts user access to specified applications, Web sites and other parts of the operating system. Users can only access authorized links provided on the "Home" page. With Enterprise Browser, there is more control over program flow to create directed applications and remove any end-user confusion.

Software - Launcher

Use Launcher with Intermec mobile computers to:

- Reduce support costs by locking down the configuration of a mobile computer to prevent issues caused by accidental or intentional user tampering with device settings
- Increase user productivity by eliminating access to distracting Windows Mobile features such as games and access to the web
- Reduce training costs by presenting users with an easy menu for launching mobile applications.

Launcher can also be packaged with mobile applications to give developers the ability to deliver their software in kiosk mode.

Launcher is for use with the following Honeywell mobile computers: CK3X, CK3R, CN51, 70 Series, D70e (Android only), D75e (Android only), CT50 (Android only), CV41, CV61, and VM3.

Each license includes 1 year of software maintenance which entitles user to software updates.

For more information and to download software, go to <https://www.honeywellaidc.com>.

Licenses are delivered via e-mail, therefore the License recipient's e-mail address must be provided for sales order processing.

Software - Skynax

Product Summary

For organizations connecting their mobile workforce with enterprise applications to optimize business critical activities in intermittently connected environments, Skynax is the mobility management system that provides data synchronization with the integrated management of applications, devices, users and network connections for secure, reliable, and scalable mobility. Unlike homegrown alternatives, stand-alone mobile device management, single-purpose utilities or the limited management built into many mobile application platforms, Skynax powers the worry-free operation of business critical mobility systems using a single comprehensive product that reduces cost and complexity.

Product Ordering

The following information needs to be included on the Purchase Order provided to Intermec for sales order processing:

1. Licensee: Name and mailing address of the company using the software. This is the company identification information that will be embedded in the digital license key and it identifies the legal owner of the software license.
2. License Key Recipient: Email address and telephone number of the person to receive the digital license key when it is issued. A license key will be issued as an email attachment to this named recipient.
3. Licensee Technical Contact: Name, email address and telephone number of the technical contact at the end-user company. This information is for technical support purposes.
4. Partner Technical Contact: Name, email address and telephone number of the technical contact at the Intermec partner company. This information is for technical support purposes.
5. Managed Devices: Type(s) of mobile devices that the end-user company will be using with the software.

How to Order New Licenses

To order new licenses for a new customer, first select the Skynax Edition (Entry Edition, Standard Edition or Enterprise Edition) that is appropriate for the customer's needs. Next, move to the section below, that provides the part numbers that are needed to complete an order for the selected Skynax Edition. Take note of mandatory annual software maintenance.

How to Order Additional Licenses

To order additional licenses for an existing software installation or order an extension of annual software maintenance services, you must reference the Licensee name exactly as it was given in the original purchase order (referencing the original purchase order number is also helpful) to assure that the updated license key and software maintenance service is activated for the intended Skynax system. This is particularly important for end-user customers who operate Skynax systems in multiple locations but order their licenses and maintenance renewals centrally.

Software - SmartSystems Management

With release of SmartSystems version 4.0 Console, server-side Autodeploy 15, 50 or 200 licenses to access premium features are not required. Devices with SmartSystems 4.0 (and beyond) client, will require a per-device license in order to access premium features.

NOTE: Customers with pre-4.0 version of SmartSystems client do not require any device license when connected to SmartSystems 4.0 Console.

Please check with your Sales representative if you have questions on Autodeploy licenses.

SmartSystems Management License enables advanced configuration and reporting of device health properties which includes Ready-to-Work indicators and detailed battery/memory/storage/scanner/connectivity statistics. It also enables automated software distribution of OS updates to a group of devices as well as running reporting services. This license is also required for reporting device health as well as multi-device provisioning of newly introduced PM43/PC43/PC23 printers. In addition, this license enables management of peripheral PR2/PR3 printers via primary Mobile Computers (needs SmartSystems 4.X reference client).

License purchase provides an activation key delivered via e-mail. Due to e-mail delivery the License recipient's e-mail address must be provided for sales order processing. No separate Maintenance license is required for this Product.

How to Order new Licenses:

To order new licenses for a new customer understand how many licenses the customer needs and quote that many SOTICLIENT part numbers. If the customer wants' to purchase additional years of support (STRONGLY RECOMMENDED that you sell equivalent to years of service of the hardware) they can use any of the SOTIMAINXYR Skus.

How to Order additional Licenses:

To order additional licenses you must visit ACTIVATE.SOTI.NET and enter your current registration key. Following the instructions on the page will allow a customer to enter additional licenses and support months via the wizard. This will produce an EMAIL that can be sent to you to quote the price of the solution. Based on the SOTICLIENTNOMAIN and the SOTIMAINONEMONTH part numbers.

Companies that want to buy one license or only work with one or two mobile computers should purchase their PocketController product, not MobiControl. Intermec does not resell PocketController as it is for use with less than 10 devices, it can be purchased and downloaded from the SOTI.net website for less than the price of a MobiControl license.

RFID - RFID Accessories

Honeywell RFID antennas and cables for the IF2 and IV7 readers. The IF2 reader uses a reverse polarity TNC jack (RP-TNC-J) connector. It requires cables that use a reverse polarity TNC plug (RP-TNC-P) connector. The IV7 uses a reverse polarity SMA jack (RP-SMA-J) connector for FCC frequencies and a standard polarity SMA jack (SMA-J) connector for ETSI frequencies. For FCC frequencies, the IV7 requires a cable with a reverse polarity SMA plug (RP-SMA-P) connector. For ETSI frequencies, the IV7 requires a cable with a standard polarity SMA plug (SMA-P) connector. The FCC antennas with a reverse polarity type N jack connector (RP-N-J) require a cable with a reverse polarity type N plug (RP-N-P). Similarly, ETSI antennas with a standard polarity type N jack connector (N-R) require a cable with a standard polarity type N plug (N-P).

Engaging Honeywell RFIDDeploy services or qualified Intermec Partner expertise will ensure the selection of the appropriate RFID devices.

Note: Global Services contracts availability varies per region. Services such as Service Made Simple (SMS) are available in the EU, USA & Canada. For countries outside of the EU, USA & Canada, please contract a Honeywell representative to confirm availability.

Prices are recommended resell prices only. HSM Distributors and Partners are free to define their own prices.

Honeywell official pricelist is the one regularly updated and published on this site.

All prices are subject to change without notice and will be confirmed upon reception of orders.

Although we have combined the legacy price guides, if you are ordering directly from Honeywell you will still need to continue with the existing process of placing split orders to each of the corresponding order management teams through your normal route.

We will provide further updates as this situation changes.

Thank you for your understanding and patience.
