MOTOTRBO™ MAKE YOUR BUSINESS MORE EFFICIENT AND BETTER CONNECTED

TRANSFORM YOUR WORKPLACE WITH DIGITAL TECHNOLOGY.

Your people are on the job, in the field, on the factory floor, moving across campus or throughout the city. Whether they're moving freight or providing security, repairing roads or restoring power lines, you need to keep them all connected, everywhere they go.

How do you equip them with technology that is easy to use? Improve their performance and increase productivity? The answer is as simple, seamless and scalable as MOTOTRBO.

Our robust, future-ready, standards-based solution is so flexible and versatile, it can be customized to fit your unique business, coverage and application needs. MOTOTRBO is the complete business-essential solution with portable radios, mobile radios, repeaters, accessories, data applications and services.

THE DIGITAL DIFFERENCE

MOTOTRBO offers a robust, standards-based solution that can be tailored to meet your unique coverage and feature needs. This versatile portfolio provides a complete system of portable radios, mobile radios, repeaters, accessories, data applications, and services – a comprehensive communication solution for your business.

MOTOTRBO offers a multitude of features and benefits. TDMA digital technology provides twice the calling capacity (as compared to analog or FDMA radios) for the price of one frequency license. Integrated voice and data capabilities support integrated applications including MOTOTRBO Text Messaging Services and an integrated GPS module is included for use with your third-party location tracking applications. Also, Motorola's Application Developer Program accommodates custom data applications so that you can adapt radios to support your specific business tasks.

And digital voice processing plus enhanced call signaling can help to assure faster and more reliable calls. Other features such as enhanced battery life, IP57 immersibility for portables, and the ability to operate in both analog and digital modes make it easy and affordable to adapt MOTOTRBO for the unique needs of your operation, and migrate to a digital two-way radio platform at your own pace.

Whether you're working in harsh conditions, noisy environments, long shifts or looking for discreet communication, MOTOTRBO accessories and batteries stand up to the task and stand out in the field. We designed and developed a complete portfolio of solutions with this exclusive, leading-edge technology. Our accessories and batteries are specially designed to perform optimally with our portable and mobile radios.

We created our patented IMPRES technology as an integral part of our two-way radio audio accessories, batteries and chargers. Users who rely on IMPRES Smart Audio and Smart Energy systems call them innovative and indispensable. We call IMPRES the intelligent way to communicate – offering enhanced performance and exceptional capabilities between your radio and accessories, your battery and charger, your workforce and workplace.

IMPRES SMART AUDIO ACCESSORIES

Our IMPRES Smart Audio is a Motorola-exclusive solution that provides exactly what businesses and agencies seek: two-way audio quality that's loud, clear and intelligible in digital and analog modes.

EXCEPTIONALLY CLEAR AUDIO

IMPRES audio accessories communicate with the radio to help suppress ambient noise, improve voice intelligibility and amplify loudness – even in noisy situations and difficult weather. So if you're a security officer with an IMPRES remote speaker microphone clipped to a lapel or a hospitality manager wearing an earpiece, you can carry on a conversation with clarity, simplicity and certainty.

STOP ADJUSTING VOLUME

Are your employees on surveillance and discreet conversation is expected? Trying to talk above the roar of the crowd in a stadium? When they need to speak quietly or at normal volume but not directly into the microphone, enhanced Audio Gain Capability (AGC) can make all the difference. This IMPRES feature detects changes in voice levels and automatically increases or decreases microphone gain so the receive end doesn't have to adjust volume levels repeatedly.

CUSTOMIZE TO YOUR WORKSTYLE

IMPRES accessory buttons can be programmed with "shortcuts" in addition to the programmable buttons available on your radio. You can use your accessory to access additional important features, such as private calls, with just a touch.

IMPRES SMART ENERGY SYSTEM

For the line worker on a long shift or the public works officer laboring overtime to restore power, the job stops when their radio stops operating. Our innovative IMPRES battery charging and reconditioning system streamlines and automates battery maintenance. It draws on our exclusive technology to communicate between your battery and charger to help lengthen battery life and extend talk time.

AUTOMATES BATTERY MAINTENANCE

You want to be sure you get the most out of every battery by maximizing its life. With IMPRES you can, because it automates battery maintenance. IMPRES integrates

reconditioning capability into the charger along with the means to evaluate battery usage and determine the best time to recondition it. By automating maintenance, IMPRES optimizes your battery's life.

ELIMINATES OVERCHARGING

IMPRES batteries can be left in their IMPRES chargers for extended periods without heat damage from the charger. If radios are accidentally left in the charger – overnight, over a weekend or longer – there's no worry about shortening your battery's life. Because the IMPRES charger automatically monitors battery capacity batteries are safely charged to the right capacity and always ready to go.

BETTER DATA FOR BETTER DECISIONS

IMPRES batteries store critical usage information so you don't have to. Each two-line IMPRES charger display presents key data at a glance, so you can make informed decisions about battery replacement. Data includes key information such as: actual battery capacity, time remaining to complete charging, and each battery's unique serial number. If you're operating a large fleet of batteries, IMPRES battery data reader is a valuable diagnostic tool to evaluate individual IMPRES batteries. IMPRES Battery Fleet Management collects and consolidates that data automatically, so you can quickly and easily identify when batteries need to be replaced.

EXTENDED WARRANTY

When you use MOTOTRBO™ IMPRES batteries exclusively with IMPRES chargers, you can count on an 18-month capacity warranty coverage – six months longer than Motorola standard batteries.

TESTED TOUGH AND PROVEN TOUGH

IMPRES or any other Motorola batteries are Proven Tough. Time after time, in lab test after test – for Drop, Vibration and ESD (Electrostatic Discharge) – they withstand shocks, knocks, drops and shakes and outperform the leading brands. If your radio gets banged on a ride, rattled by heavy equipment or shocked by static electricity, you can depend on IMPRES batteries to stay true and stand tough.

SPEAKER MICROPHONES

WINDPORTING REMOTE SPEAKER MICROPHONES

The windporting feature dramatically lessens background noise from high winds and other severe weather conditions. The same technology helps prevent water from clogging the microphone port and distorting transmit audio, ensuring a user's confidence of clear communication.

CHARGERS

IMPRES CHARGERS

This smart energy system automatically reconditions IMPRES batteries based on actual usage, keeping them in peak condition. Talk-time and cycle life are optimized and the need for manual maintenance programs is eliminated. Its advanced conditioning features allow batteries to be safely left on the charger for extended periods of time without incurring damaging heat build-up which can decrease battery cycle life. In addition, batteries left in the charger are kept fully charged so they are always ready when needed. This rapid-rate, tri-chemistry charging system will also charge compatible non-IMPRES batteries.

REMOTE MOUNTING ACCESSORIES

Remote mounting capabilities allow you to save cabin space or hide the mobile power supply in the trunk.

PMLN5404

MOTOTRBO Mobile Remote Mount Adaptor Kit. For in-trunk installation, may also require HKN4192. 20 Inch radio power cable. Remote Mount cable also required (PMKN4074 or PMKN4073).

MOBILE ANTENNAS

WIDE AREA THROUGH-HOLE MOUNT ANTENNAS

These through-hole mount antennas are designed to direct the signal more towards the horizon, making them ideal for applications in more geographically flat regions where signal coverage is sparse and must cover a larger area.

UHF

- HAE4010**
406-420 MHz, 3.5dB Gain
- HAE4011**
450-470 MHz, 3.5dB Gain
- HAE4012**
470-494 MHz, 3.5dB Gain
- HAE4013**
494-512 MHz, 3.5dB Gain

- RAE4004**
445-470 MHz, 5dB Gain

800/900 MHZ

- RAE4163ARB**
410-430 MHz, Stubby
- RAE4164ARB**
430-450 MHz, Stubby
- RAE4168ARB**
450-470 MHz, Stubby
- RAE4166ARB**
470-490 MHz, Stubby

- HAF4026**
806-941 MHz, 3dB Gain

- HAF4013**
806-941 MHz, Stubby

- HAF4027**
806-941 MHz, 5dB Gain

URBAN THROUGH-HOLE MOUNT ANTENNAS

The signals for these through-hole mount antennas radiate vertically, making them ideal for urban environments where buildings can obstruct the signal.

UHF

- HAE4002**
403-430 MHz, 1/4 Wave
- HAE4003**
450-470 MHz, 1/4 Wave
- HAE4004**
470-527 MHz, 1/4 Wave

VHF

- HAD4006**
136-144 MHz, 1/4 Wave
- HAD4007**
146-150.8 MHz, 1/4 Wave
- HAD4008**
150.8-162 MHz, 1/4 Wave
- HAD4009**
162-174 MHz, 1/4 Wave

800/900 MHZ

- HAF4025**
806-941 MHz, 1/4 Wave

GPS ACTIVE ANTENNAS

The following antennas are intended for users who have existing mobile antennas and need to add GPS capability.

- PMAN4000**
Fixed Mount GPS Active Antenna
Discreet stand-alone GPS antenna has a semi-permanent mount easily assembled with minimal tools to vehicle roof or trunk.

- PMAN4001**
Glass Mount GPS Active Antenna

- PMAN4002**
Magnetic Mount GPS Active Antenna
Discreet stand-alone GPS antenna can be mounted either magnetically, via screw or tape to vehicle roof or trunk.

COMBINATION GPS ANTENNAS

The following through-hole mount antennas combine UHF or VHF and GPS capability. This combination antenna design with Mini U connector provides GPS tracking coverage and voice/data wireless capabilities for fleet monitoring or tracking applications.

COMBINATION GPS/UHF

- PMAE4030**
GPS/UHF - 403-430 MHz, 1/4 Wave
- PMAE4032**
GPS/UHF - 406-420 MHz, 3.5dB Gain
- PMAE4031**
GPS/UHF - 450-470 MHz, 1/4 Wave
- PMAE4033¹**
GPS/UHF - 450-470 MHz, 3.5dB Gain
- PMAE4034**
GPS/UHF - 450-470 MHz, 5dB Gain

COMBINATION GPS/VHF

- HAE6019**
GPS/UHF - 403-527 MHz, 2dB Gain
- HAE6020**
GPS/UHF - 470-527 MHz, 1/4 Wave
