Navy Maritime Maintenance Enterprise Solution – Technical Refresh (NMMES-TR)

NMMES-TR: Modernizing Fleet Maintenance IT

Mr. Bruce Urbon- Program Manager PMS 444

DISTRIBUTION STATEMENT A.
Distribution authorized for public release
Other requests shall be referred to PMS 444

Agenda

- Program Overview
- Industry Day Update

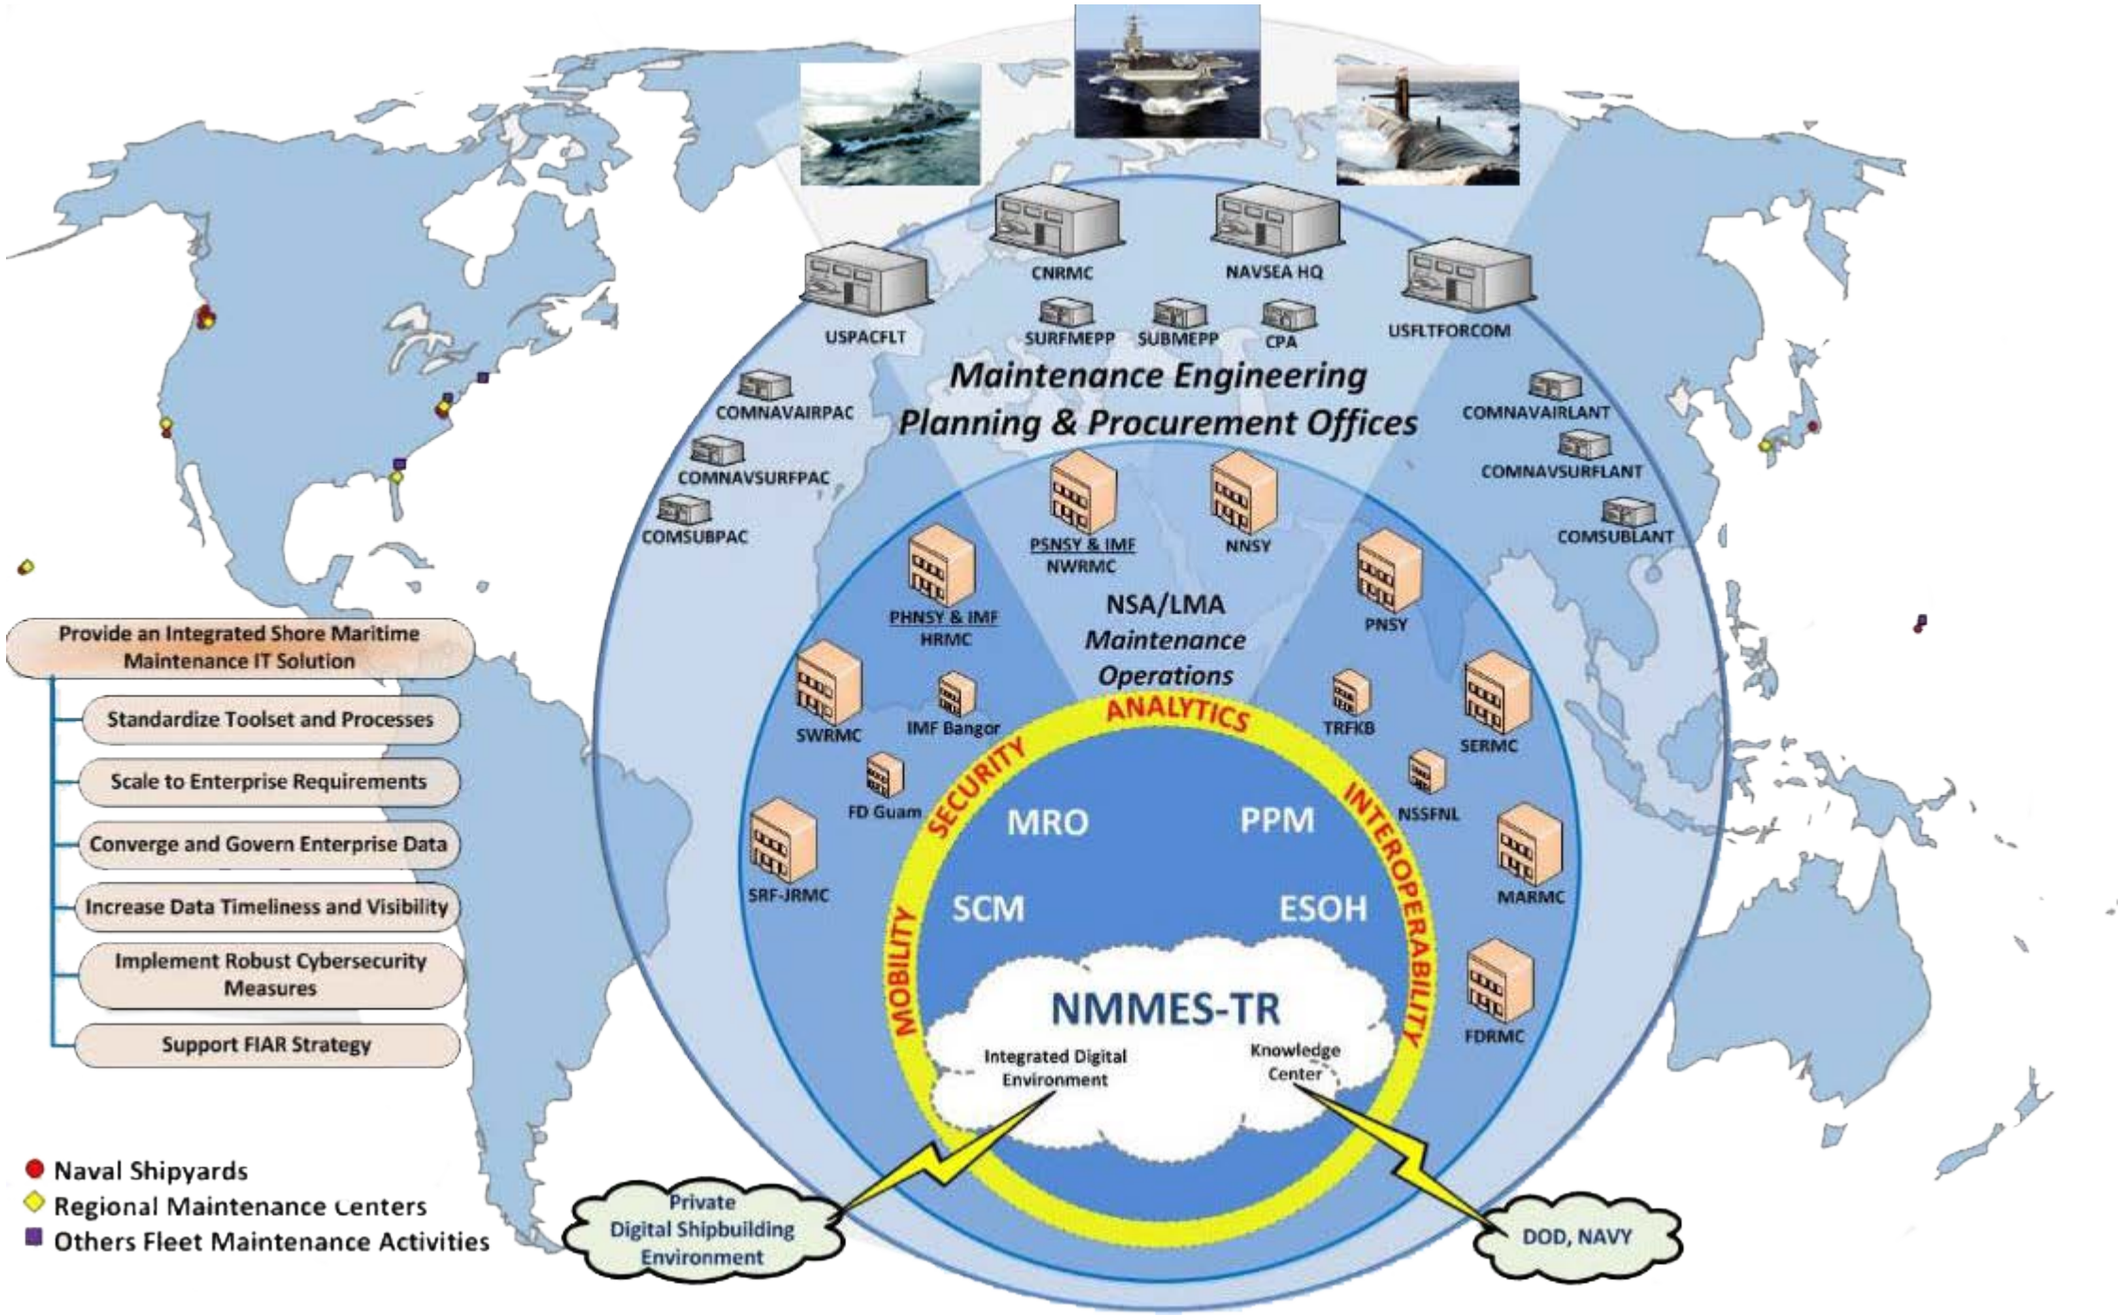
Distribution A – This is approved for public release distribution is unlimited

Background

- NMMES-TR is a Pre-Acquisition Defense Business System (DBS) Category I (BCAT I) Program that:
  - Replaces, interfaces with, and/or migrates aging existing IT systems and applications that support the performance of depot and intermediate level Fleet maintenance
  - Supports a user base of over 51,000 civilian and military personnel worldwide
  - Will leverage COTS applications and cloud-based host services
  - Will be implemented using agile and human centered design principles

Distribution A – This is approved for public release distribution is unlimited

Operational Overview



Industry Day Update

- A revised draft of the System Integrator (SI) Performance Work Statement (PWS) is posted to PMS 444's Technical Data Repository (TDR)

- NMMES-TR contracting strategy update:
  - Changes based on feedback received from both industry and the Government acquisition community
  - Capability Integration Platform (CIP) and cloud hosting services added to SI scope

- The second contract, referred to as the Applications and Cloud Services (A&CS) contract at the 1 February 2019 industry day, will now consist of business applications only and is now being referred to as "BA" (Business Applications)

Distribution A – This is approved for public release distribution is unlimited
