

# Cisco Firepower NGFW

The Cisco Firepower® NGFW (next-generation firewall) is the industry's first fully integrated, threat-focused next-gen firewall with unified management. It uniquely provides advanced threat protection before, during, and after attacks.

|       | Stop more threats          | Contain known and unknown malware with leading Cisco® Advanced Malware Protection (AMP) and sandboxing.  |
|-------|----------------------------|--|
| 00    | Gain more insight          | Gain superior visibility into your environment with Cisco Firepower next-gen IPS.  Automated risk rankings and impact flags identify priorities for your team. |
| Ö     | Detect earlier, act faster | The Cisco Annual Security Report identifies a 100-day median time from infection to detection, across enterprises. Reduce this time to less than a day.        |
| Ö.    | Reduce<br>complexity       | Get unified management and automated threat correlation across tightly integrated security functions, including application firewalling, NGIPS, and AMP.       |
| and I | Get more from your network | Enhance security, and take advantage of your existing investments, with optional integration of other Cisco and third-party networking and security solutions. |

# Performance Highlights

Table 1 summarizes the performance highlights of the Cisco Firepower 4100 Series NGFW, 9300 Series Security Appliances, and select Cisco ASA 5500-X appliances.

Table 1. Performance Highlights

<sup>&</sup>lt;sup>1</sup> HTTP sessions with an average packet size of 1024 bytes

**Note:** NGFW performance varies depending on network and traffic characteristics. Consult your Cisco representative for detailed sizing guidance. Performance is subject to change with new software releases.

<sup>&</sup>lt;sup>2</sup> 1024 bytes TCP firewall performance

Cisco Firepower 2100 Series:

The industry's first 1RU NGFWs delivering sustainable performance when threat inspection is enabled

Cisco Firepower 4100 Series:
The industry's first 1RU NGFWs with 40-Gbps
interfaces

Cisco Firepower 9300:
Ultra-high-performance NGFW, expandable as your needs grow

Cisco ASA 5500-X Series:

Models for branch offices, industrial applications, and the Internet edge

# **Platform Support**

The Cisco Firepower NGFW includes Application Visibility and Control (AVC), optional next-gen IPS (NGIPS), Cisco<sup>®</sup> Advanced Malware Protection (AMP) for Networks, and URL Filtering. The Cisco Firepower 2100 Series, 4100 Series, and 9300 appliances use the Cisco Firepower Threat Defense software image. Alternatively, these appliances can support the Cisco Adaptive Security Appliance (ASA) software image.

<u>The Cisco Firepower Management Center</u> (formerly FireSIGHT) provides centralized management of the Cisco Firepower NGFW, as well as Cisco Firepower NGIPS and Cisco AMP for Networks.

The <u>Cisco Firepower Device Manager</u> is available for local management of 2100 Series and 5500-X Series devices running the Cisco Firepower Threat Defense software image.

The Cisco <u>Adaptive Security Device Manager</u> is available for local management of the Cisco Firepower 4100 Series, Cisco Firepower 9300 Series, and Cisco ASA 5500-X Series devices running the ASA software image.

<u>Cisco Defense Orchestrator</u> cloud-based management is also available for consistent policy management across Cisco security devices.

Also available, on select Cisco Firepower appliances, and direct from Cisco, is the Radware Virtual DefensePro (vDP) distributed denial of service (DDoS) mitigation capability.

## Cisco Firepower 2100 Series Appliances

The Cisco Firepower 2100 Series is a family of four threat-focused NGFW security platforms that deliver business resiliency through superior threat defense. It offers exceptional sustained performance when advanced threat functions are enabled. These platforms uniquely incorporate an innovative dual multicore CPU architecture that optimizes firewall, cryptographic, and threat inspection functions simultaneously. The series' firewall throughput ranges from 1.9 to 8.5 Gbps, addressing use cases from the Internet edge to the data center.

# Cisco Firepower 4100 Series Appliances

The Cisco Firepower 4100 Series is a family of four threat-focused NGFW security platforms. Their throughput ranges from 35 to 75 Gbps, addressing data center use cases. They deliver superior threat defense, at faster speeds, with a smaller footprint.

## Cisco Firepower 9300 Security Appliance

The Cisco Firepower 9300 is a scalable (beyond 1 Tbps when clustered), carrier-grade, modular platform designed for service providers, high-performance computing centers, large data centers, campuses, high-frequency trading environments, and other environments that require low (less than 5-microsecond offload) latency and exceptional throughput. Cisco Firepower 9300 supports flow-offloading, programmatic orchestration, and the management of security services with RESTful APIs. It is also available in Network Equipment Building Standards (NEBS)-compliant configurations.

## Cisco ASA 5500-FTD-X Series Appliances

The Cisco ASA 5500-FTD-X Series is a family of eight threat-focused NGFW security platforms. Their throughput ranges from 750 Mbps to 4 Gbps, addressing use cases from the small or branch office to the Internet edge. They deliver superior threat defense in a cost-effective footprint.

# Performance Specifications and Feature Highlights

Table 2 summarizes the capabilities of the Cisco Firepower NGFW 4100 Series and 9300 appliances and the Cisco ASA 5500-FTD-X appliances when running the Cisco Firepower Threat Defense image.

Table 2. Performance Specifications and Feature Highlights with the Firepower Threat Defense Image

<sup>&</sup>lt;sup>1</sup> HTTP sessions with an average packet size of 1024 bytes.

**Note:** Performance will vary depending on features activated and network traffic protocol mix and packet size characteristics. Performance is subject to change with new software releases. Consult your Cisco representative for detailed sizing guidance.

Table 3 summarizes the performance and capabilities of the Cisco Firepower 4100 Series and 9300 appliances when running the ASA image. For Cisco ASA 5500-X Series performance specifications with the ASA image, please visit the Cisco ASA with FirePOWER Services data sheet.

Dual power supplies are hot-swappable.
 Fans operate in a 3+1 redundant configuration where the system will continue to function with only 3 operational fans. The 3 remaining fans will run at full speed.
 FPR-2130 platform is designed to be NEBS ready. The availability of NEBS certification is pending.

|                                     | Efficiency (at 50% load)   | 92%  | 92%                               |  |  |  |  |
|                                     | Redundancy   | 1+1  |                                   |  |  |  |  |
| Fans                                | 4 hot-swappable fans   |  |                                   |  |  |  |  |
| Noise                               | 75.5 dBA at maximum fan speed  |  |                                   |  |  |  |  |
| Rack mountable                      | Yes, mount rails included (4-post EIA-310-D rack)  |  |                                   |  |  |  |  |
| Weight                              | 105 lb (47.7 kg) with one security module; 135 lb (61.2 kg) fully configured   |  |                                   |  |  |  |  |
| Temperature: standard operating     | Up to 10,000 ft (3000 M): 32 to 104°F (0 to 40°C) for SM-24 module 32 to 88°F (0 to 35°C) for SM-36 module at sea-level Altitude adjustment notes: For SM-36, maximum temp is 35°C, for every 1000 feet above sea level subtract 1°C |  |                                   |  |  |  |  |

<sup>&</sup>lt;sup>2</sup> DC power option is expected on Cisco Firepower 4110 and 4120 in the second half of 2016.

| Specification               | Description   |
|-----------------------------|---|
| Temperature: NEBS operating | Long term: 0 to 45°C, up to 6,000 ft (1829 m)  Long term: 0 to 35°C, 6,000 to 13,000 ft (1829-3964 m)  Short term: -5 to 55°C, up to 6,000 ft (1829 m)  Note: Cisco Firepower 9300 NEBS compliance applies only to SM-24 configurations |
| Temperature: nonoperating   | -40 to 149°F (-40 to 65°C); maximum altitude is 40,000 ft   |
| Humidity: operating         | 5 to 95% noncondensing  |
| Humidity: nonoperating      | 5 to 95% noncondensing  |
| Altitude: operating         | SM-24: 0 to 13,000 ft (3962 m) SM-36: 0 to 10,000 ft (3048 m); please see above Operating Temperature section for temperature adjustment notes  |
| Altitude: nonoperating      | 40,000 ft (12,192 m)  |

<sup>\*</sup> Minimum turn-on voltage is -44V DC

Table 7. Cisco Firepower 4100 Series and Cisco Firepower 9300 NEBS, Regulatory, Safety, and EMC Compliance

| Specification         | Description   |
|-----------------------|---|
| NEBS                  | Cisco Firepower 9300 is NEBS compliant with SM-24 Security Modules  |
| Regulatory compliance | Products comply with CE markings per directives 2004/108/EC and 2006/108/EC   |
| Safety                | <ul> <li>UL 60950-1</li> <li>CAN/CSA-C22.2 No. 60950-1</li> <li>EN 60950-1</li> <li>IEC 60950-1</li> <li>AS/NZS 60950-1</li> <li>GB4943</li> </ul>  |

# Cisco Trust Anchor Technologies

Cisco Trust Anchor Technologies provide a highly secure foundation for certain Cisco products. They enable hardware and software authenticity assurance for supply chain trust and strong mitigation against a man-in-the-middle compromise of software and firmware.

Trust Anchor capabilities include:

- Image signing: Cryptographically signed images provide assurance that the firmware, BIOS, and other software are authentic and unmodified. As the system boots, the system's software signatures are checked for integrity.
- Secure Boot: Secure Boot anchors the boot sequence chain of trust to immutable hardware, mitigating
  threats against a system's foundational state and the software that is to be loaded, regardless of a user's
  privilege level. It provides layered protection against the persistence of illicitly modified firmware.
- Trust Anchor module: A tamper-resistant, strong-cryptographic, single-chip solution provides hardware authenticity assurance to uniquely identify the product so that its origin can be confirmed to Cisco, providing assurance that the product is genuine.

# Firepower DDoS Mitigation

Firepower DDoS Mitigation is provided by Radware Virtual DefensePro (vDP), available and supported directly from Cisco on the following Cisco Firepower 9300 and 4100 series appliances:

| Cisco Firepower Model | ASA image | FTD Image |
|-----------------------|-----------|-----------|
| 9300 - SM-44          | yes       | yes       |
| 9300 - SM-36          | yes       | yes       |
| 9300 – SM-24          | yes       | yes       |
| 4150                  | yes       | yes       |
| 4140                  | yes       | yes       |
| 4120                  | yes       | yes       |
| 4110                  | no        | yes       |

Radware vDP is an award-winning, real-time, behavioral DDoS attack mitigation solution that protects organizations against multiple DDoS threats. Firepower DDoS mitigation defends your application infrastructure against network and application degredation and outage.

# **DDoS Mitigation: Protection Set**

Firepower's vDP DDoS mitigation consists of patent-protected, adaptive, behavioral-based real-time signature technology that detects and mitigates zero-day network and application DDoS attacks in real time. It eliminates the need for human intervention and does not block legitimate user traffic when under attack.

The following attacks are detected and mitigated:

- SYN flood attacks
- Network DDoS attacks, including IP floods, ICMP floods, TCP floods, UDP floods, and IGMP floods
- Application DDoS attacks, including HTTP floods and DNS query floods
- Anomalous flood attacks, such as nonstandard and malformed packet attacks

#### **Performance**

The performance figures in Table 8 apply to all Cisco Firepower 4100 series models.

Table 8. Key DDoS Performance Metrics for Cisco Firepower 4100 Series

| Parameter                                 | Value                                |
|---|--------------------------------------|
| Maximum mitigation capacity/throughput    | 10 Gbps                              |
| Maximum legitimate concurrent sessions    | 209,000 connections per second (CPS) |
| Maximum DDoS flood attack prevention rate | 1,800,000 packets per second (PPS)   |

The performance figures in Table 9 are for Cisco Firepower 9300 with 1 to 3 Security Modules irrespective of Security Module type (SM-24, SM-36 or SM-44).

**Table 9.** Key DDoS Performance Metrics for Cisco Firepower 9300 with 1, 2, or 3 Security Modules.

| Parameter                                 | Firepower 9300 with 1 Security Module | Firepower 9300 with 2 Security Modules | Firepower 9300 with 3 Security<br>Modules |
|---|---------------------------------------|--|---|
| Maximum mitigation capacity/throughput    | 10 Gbps                               | 20 Gbps                                | 30 Gbps                                   |
| Maximum legitimate concurrent sessions    | 209,000 connections per second (CPS)  | 418,000 connections per second (CPS)   | 627,000 connections per second (CPS)      |
| Maximum DDoS flood attack prevention rate | 1,800,000 packets per second (PPS)    | 3,600,000 packets per second (PPS)     | 5,400,000 packets per second (PPS)        |

# Ordering Information

### **Cisco Smart Licensing**

The Cisco Firepower NGFW is sold with Cisco Smart Licensing. Cisco understands that purchasing, deploying, managing, and tracking software licenses is complex. As a result, we are introducing Cisco Smart Software Licensing, a standardized licensing platform that helps customers understand how Cisco software is used across their network, thereby reducing administrative overhead and operating expenses.

With Smart Licensing, you have a complete view of software, licenses, and devices from one portal. Licenses are easily registered and activated and can be shifted between like hardware platforms. Additional information is available here: <a href="http://www.cisco.com/web/ordering/smart-software-licensing/index.html">http://www.cisco.com/web/ordering/smart-software-licensing/index.html</a>. Related information, on Smart Licensing Smart Accounts, is available here: <a href="http://www.cisco.com/web/ordering/smart-software-manager/smart-accounts.html">http://www.cisco.com/web/ordering/smart-software-manager/smart-accounts.html</a>.

# Cisco Smart Net Total Care Support: Move Quickly with Anytime Access to Cisco Expertise and Resources

Cisco Smart Net Total Care<sup>™</sup> is an award-winning technical support service that gives your IT staff direct anytime access to Technical Assistance Center (TAC) engineers and Cisco.com resources. You receive the fast, expert response and the dedicated accountability you require to resolve critical network issues.

Smart Net Total Care provides the following device-level support:

- Global access 24 hours a day, 365 days a year to specialized engineers in the Cisco TAC
- Anytime access to the extensive Cisco.com online knowledge base, resources, and tools
- Hardware replacement options include 2-hour, 4-hour, next-business-day (NDB) advance replacement, as well as return for repair (RFR)

- Ongoing operating system software updates, including both minor and major releases within your licensed feature set
- Proactive diagnostics and real-time alerts on select devices with Smart Call Home

In addition, with the optional Cisco Smart Net Total Care Onsite Service, a field engineer installs replacement parts at your location and helps ensure that your network operates optimally. For more information on Smart Net Total Care please visit: <a href="http://www.cisco.com/c/en/us/services/portfolio/product-technical-support/smart-net-total-care.html">http://www.cisco.com/c/en/us/services/portfolio/product-technical-support/smart-net-total-care.html</a>.

#### **Select Part Numbers**

Tables 9, 10, and 11 provide details on part numbers for Cisco Firepower NGFW solutions. Please consult the Ordering Guide for additional configuration options and accessories.

Table 10. Cisco Firepower 2100 Series: Select Product Components

| Part Number (Appliance Master Bundle)  | Description  |  |
|--|--|--|
| FPR2110-BUN  | Cisco Firepower 2110 Master Bundle                                   |  |
| FPR2120-BUN  | Cisco Firepower 2120 Master Bundle                                   |  |
| FPR2130-BUN  | Cisco Firepower 2130 Master Bundle                                   |  |
| FPR2140-BUN  | Cisco Firepower 2140 Master Bundle                                   |  |
| Part Number (Network Module)   | Description  |  |
| FPR2K-NM-8X10G=  | Spare Cisco Firepower 8-port SFP+ network module                     |  |
| Part Number (Appliances)   |  |  |
| FPR2110-NGFW-K9  | Cisco Firepower 2110 NGFW Appliance, 1RU                             |  |
| FPR2120-NGFW-K9  | Cisco Firepower 2120 NGFW Appliance, 1RU                             |  |
| FPR2130-NGFW-K9  | Cisco Firepower 2130 NGFW Appliance, 1RU, 1 x Network Module Bays    |  |
| FPR2140-NGFW-K9  | Cisco Firepower 2140 NGFW Appliance, 1RU, 1 x Network Module Bays    |  |
| Hardware Accessories   |  |  |
| Please consult the ordering guide for accessories including rack mounts, spare fans, power supplies, and solid-state drives (SSDs) |  |  |
| Cisco Firepower 2100 Series NGFW Select Licenses   |  |  |
| L-FPR2110T-TMC=  | Cisco Firepower 2110 Threat Defense Threat, Malware, and URL License |  |
| L-FPR2120T-TMC=  | Cisco Firepower 2120 Threat Defense Threat, Malware, and URL License |  |
| L-FPR2130T-TMC=  | Cisco Firepower 2130 Threat Defense Threat, Malware, and URL License |  |
| L-FPR2140T-TMC=  | Cisco Firepower 2140 Threat Defense Threat, Malware, and URL License |  |
| Note: These optional security services licenses can be ordered with 1-, 3-, or 5-year subscriptions.                               |  |  |

#### Cisco Services

Cisco offers a wide range of service programs to accelerate customer success. These innovative services programs are delivered through a unique combination of people, processes, tools, and partners, resulting in high levels of customer satisfaction. Cisco Services help you protect your network investment, optimize network operations, and prepare your network for new applications to extend network intelligence and the power of your business. For more information about Cisco services for security, visit <a href="http://www.cisco.com/go/services/security">http://www.cisco.com/go/services/security</a>.

## Cisco Capital

# Financing to Help You Achieve Your Objectives

Cisco Capital<sup>®</sup> financing can help you acquire the technology you need to achieve your objectives and stay competitive. We can help you reduce CapEx. Accelerate your growth. Optimize your investment dollars and ROI. Cisco Capital financing gives you flexibility in acquiring hardware, software, services, and complementary third-party equipment. And there's just one predictable payment. Cisco Capital is available in more than 100 countries. Learn more.
