Gentlemen:

BELLEFONTE NUCLEAR PLANT (BLN) - NPDES PERMIT NO. AL0024635 - RENEWAL APPLICATION

Enclosed are two copies of NPDES Forms 1 and 2C and the NPDES Supplementary Information Form for renewal of the BLN permit (Enclosure 1). A check for the appropriate permit fee is being provided under separate cover.

Proposed changes to the permit are requested and justified in Enclosure 2. Except for various changes for clarification and some reductions in monitoring frequencies, the permit application package reflects the current permit and subsequent correspondence (last issued May 8, 1985). While construction efforts at BLN have been reduced considerably (fuel load for Unit 1 is now projected for July 1993 instead of 1988), we have retained all of the discharges in the permit for continuity and operational flexibility.

Because of the reduction in the construction effort at BLN, some of the previously active discharges presently have no flow. For purposes of Form 2C, Item V, past Discharge Monitoring Report data have been summarized where applicable. For those operational discharges which have not previously had a discharge, waste characterization based on similar discharges at TVA's other nuclear plants have been used.

If you have any questions concerning the enclosed information, please call Madonna Martin at (615) 632-6695 in Knoxville, Tennessee.

Sincerely,

Martin E. Rivers, Director
Environmental Quality

FORM 1 GENERAL

U.S. ENVIRONMENTAL PROTECTION AGENCY

GENERAL INFORMATION

Consolidated Permits Program

(Read the "General Instructions" before starting.)

I. EPA I.D. NUMBER: F AL5640090002 (F/A) C D

GENERAL INSTRUCTIONS

If a preprinted label has been provided, affix it in the designated space. Review the information carefully; if any of it is incorrect, cross through it and enter the correct data in the appropriate fill—in area below. Also, if any of the preprinted data is absent *(the area to the left of the label space lists the information that should appear)*, please provide it in the proper fill—in area(s) below. If the label is complete and correct, you need not complete Items I, III, V, and VI *(except VI-B which must be completed regardless)*. Complete all items if no label has been provided. Refer to the instructions for detailed item descriptions and for the legal authorizations under which this data is collected.

LABEL ITEMS

I. EPA I.D. NUMBER

III. FACILITY NAME

V. FACILITY MAILING ADDRESS

VI. FACILITY LOCATION

PLEASE PLACE LABEL IN THIS SPACE

II. POLLUTANT CHARACTERISTICS

INSTRUCTIONS: Complete A through J to determine whether you need to submit any permit application forms to the EPA. If you answer "yes" to any questions, you must submit this form and the supplemental form listed in the parenthesis following the question. Mark "X" in the box in the third column if the supplemental form is attached. If you answer "no" to each question, you need not submit any of these forms. You may answer "no" if your activity is excluded from permit requirements; see Section C of the instructions. See also, Section O of the instructions for definitions of bold—faced terms.

SPECIFIC QUESTIONS	MARK 'X' YES	NO	FORM ATTACHED
A. Is this facility a publicly owned treatment works which results in a discharge to waters of the U.S.? (FORM 2A)		X	
B. Does or will this facility *(either existing or proposed)* include a concentrated animal feeding operation or aquatic animal production facility which results in a discharge to waters of the U.S.? (FORM 2B)		X	
C. Is this a facility which currently results in discharges to waters of the U.S. other than those described in A or B above? (FORM 2C)	X		X
D. Is this a proposed facility *(other than those described in A or B above)* which will result in a discharge to waters of the U.S.? (FORM 2D)		X	
E. Does or will this facility treat, store, or dispose of hazardous wastes? (FORM 3)		X	
F. Do you or will you inject at this facility industrial or municipal effluent below the lowermost stratum containing, within one quarter mile of the well bore, underground sources of drinking water? (FORM 4)		X	
G. Do you or will you inject at this facility any produced water or other fluids which are brought to the surface in connection with conventional oil or natural gas production, inject fluids used for enhanced recovery of oil or natural gas, or inject fluids for storage of liquid hydrocarbons? (FORM 4)		X	
H. Do you or will you inject at this facility fluids for special processes such as mining of sulfur by the Frasch process, solution mining of minerals, in situ combustion of fossil fuel, or recovery of geothermal energy? (FORM 4)		X	
I. Is this facility a proposed stationary source which is one of the 28 industrial categories listed in the instructions and which will potentially emit 100 tons per year of any air pollutant regulated under the Clean Air Act and may affect or be located in an attainment area? (FORM 5)		X	
J. Is this facility a proposed stationary source which is NOT one of the 28 industrial categories listed in the instructions and which will potentially emit 250 tons per year of any air pollutant regulated under the Clean Air Act and may affect or be located in an attainment area? (FORM 8)		X

E. OTHER (specify): 9 (specify)

XI. MAP

Attach to this application a topographic map of the area extending to at least one mile beyond property boundaries. The map must show the outline of the facility, the location of each of its existing and proposed intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, and each well where it injects fluids underground. Include all springs, rivers and other surface water bodies in the map area. See instructions for precise requirements.

XII. NATURE OF BUSINESS (provide a brief description)

PRODUCTION OF ELECTRIC POWER BY THERMONUCLEAR FISSION AND OTHER ASSOCIATED OPERATIONS.

XIII. CERTIFICATION (see instructions)

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attachments and that, based on my inquiry of those persons immediately responsible for obtaining the information contained in the application, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

A. Attach a line drawing showing the water flow through the facility. Indicate sources of intake water, operations contributing wastewater to the effluent, and treatment units labeled to correspond to the more detailed descriptions in Item B. Construct a water balance on the line drawing by showing average flows between intakes, operations, treatment units, and outfalls. If a water balance cannot be determined *(e.g., for certain mining activities)*, provide a pictorial description of the nature and amount of any sources of water and any collection or treatment measures.

B. For each outfall, provide a description of: (1) All operations contributing wastewater to the effluent, including process wastewater, sanitary wastewater, cooling water, and storm water runoff; (2) The average flow contributed by each operation; and (3) The treatment received by the wastewater. Continue on additional sheets if necessary.

001A	PHOSPHATE METAL CLEANING	--------	SEE NOTE BELOW	------		10.0/yr.	.220	
001B	CHEMICAL METAL CLEANING	--------	SEE NOTE BELOW	------		1.0/yr.	.015	

Note: NO CHEMICAL CLEANING ACTIVITIES ARE PLANNED UNTIL 1992. DUE TO THE UNPREDICTABILITY OF NRC REGULATORY REQUIREMENTS AND PLANT SCHEDULES, HOWEVER, THE OPTION TO CHEMICALLY CLEAN PLANT SYSTEMS MUST BE LEFT OPEN. IT IS NOT POSSIBLE TO ESTIMATE THE VOLUME AND FREQUENCY OF WASTEWATER DISCHARGE ASSOCIATED WITH FUTURE CLEANING ACTIVITIES. VALUES GIVEN ABOVE ARE BASED ON 1984-1986 DATA.

III. MAXIMUM PRODUCTION

A. Does an effluent guideline limitation promulgated by EPA under Section 304 of the Clean Water Act apply to your facility?

[X] YES *(complete Item III-B)* [ ] NO *(go to Section IV)*

B. Are the limitations in the applicable effluent guideline expressed in terms of production *(or other measure of operation)*?

[ ] YES *(complete Item III C)* [X] NO *(go to Section IV)*

C. If you answered "Yes" to Item III-B, list the quantity which represents an actual measurement of your maximum level of production, expressed in the terms and units used in the applicable effluent guideline, and indicate the affected outfalls.

1. MAXIMUM QUANTITY a. QUANTITY PER DAY	1. MAXIMUM QUANTITY b. UNITS OF MEASURE	1. MAXIMUM QUANTITY c. OPERATION, PRODUCT, MATERIAL, ETC. *(specify)*	2. AFFECTED OUTFALLS *(list outfall numbers)*
N/A			

IV. IMPROVEMENTS

A. Are you now required by any Federal, State or local authority to meet any implementation schedule for the construction, upgrading or operation of wastewater treatment equipment or practices or any other environmental programs which may affect the discharges described in this application? This includes, but is not limited to, permit conditions, administrative or enforcement orders, enforcement compliance schedule letters, stipulations, court orders, and grant or loan conditions.

[ ] YES *(complete the following table)* [X] NO *(go to Item IV-B)*

1. IDENTIFICATION OF CONDITION, AGREEMENT, ETC.	2. AFFECTED OUTFALLS a. NO.	2. AFFECTED OUTFALLS b. SOURCE OF DISCHARGE	3. BRIEF DESCRIPTION OF PROJECT	4. FINAL COMPLIANCE DATE a. REQUIRED	4. FINAL COMPLIANCE DATE b. PROJECTED
N/A					

B. OPTIONAL: You may attach additional sheets describing any additional water pollution control programs *(or other environmental projects which may affect your discharges)* you now have underway or which you plan. Indicate whether each program is now underway or planned, and indicate your actual or planned schedules for construction. [ ] MARK "X" IF DESCRIPTION OF ADDITIONAL CONTROL PROGRAMS IS ATTACHED

AL564-009-0002

Form Approved OMB No. 158 R0173

V. INTAKE AND EFFLUENT CHARACTERISTICS

A, B, & C: See instructions before proceeding -- Complete one set of tables for each outfall -- Annotate the outfall number in the space provided. NOTE: Tables V-A, V-B, and V-C are included on separate sheets numbered V-1 through V-9.

D. Use the space below to list any of the pollutants listed in Table 2c-3 of the instructions, which you know or have reason to believe is discharged or may be discharged from any outfall. For every pollutant you list, briefly describe the reasons you believe it to be present and report any analytical data in your possession.

1. POLLUTANT	2. SOURCE	1. POLLUTANT	2. SOURCE
NONE			

VI. POTENTIAL DISCHARGES NOT COVERED BY ANALYSIS

A. Is any pollutant listed in Item V-C a substance or a component of a substance which you do or expect that you will over the next 5 years use or manufacture as an intermediate or final product or byproduct?

[ ] YES (list all such pollutants below) [X] NO (go to Item VI-B)

N/A

B. Are your operations such that your raw materials, processes, or products can reasonably be expected to vary so that your discharges of pollutants may during the next 5 years exceed two times the maximum values reported in Item V?

[ ] YES (complete Item VI-C below) [X] NO (go to Section VII)

C. If you answered "Yes" to Item VI-B, explain below and describe in detail the sources and expected levels of such pollutants which you anticipate will be discharged from each outfall over the next 5 years, to the best of your ability at this time. Continue on additional sheets if you need more space.

N/A

CONTINUED FROM THE FRONT

VII. BIOLOGICAL TOXICITY TESTING DATA

Do you have any knowledge or reason to believe that any biological test for acute or chronic toxicity has been made on any of your discharges or on a receiving water in relation to your discharge within the last 3 years?

[ ] YES *(identify the test(s) and describe their purposes below)* [X] NO *(go to Section VIII)*

N/A

VIII CONTRACT ANALYSIS INFORMATION

Were any of the analyses reported in Item V performed by a contract laboratory or consulting firm?

[ ] YES *(list the name, address, and telephone number of, and pollutants analyzed by, each such laboratory or firm below)* [X] NO *(go to Section IX)*

A. NAME	B. ADDRESS	C. TELEPHONE *(area code & no.)*	D. POLLUTANTS ANALYZED *(list)*

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

AL5640090002	001A

Form Approved OMB No. 158-R0173

CONTINUED FROM PAGE 3 OF FORM 2-C

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

FOOT NOTES:

1- DATA FROM ANALYSES OF UNTREATED TRISODIUM PHOSPHATE FLUSHING WASTE PRIOR TO ENTERING POND SUBMITTED TO ADEM IN APRIL 1983 ENGINEERING REPORT REQUESTING APPROVAL FOR ONSITE DISPOSAL VIA LAND APPLICATION. APPROVAL GRANTED MARCH 22, 1984. TO DATE THERE HAS BEEN NO DISCHRRGE THROUGH DSN 001A. HOWEVER TVA WISHES TO RETAIN THIS TREATMENT AND DISCHARGE OPTION.

2- DATA IS AVERAGE OF MARCH 10 AND APRIL 22, 1986, ANALYSES OF THE MOST RECENT UNTREATED TRI-SODIUM PHOSPHATE METAL CLEANING WASTE HELD IN THE SMALL UNLINED AND LARGE UNLINED PHOSPHATE STORAGE PONDS FOR DISPOSAL VIA LAND APPLICATION.

3- ACCUMULATED PHOSPHATE METAL CLERNING WASTE HAS BEEN DISPOSED OF VIA LAND APPLICATION. THEREFORE SAMPLES FOR THESE ANALYSES COULD NOT BE COLLECTED.

PLEASE PRINT OR TYPE IN THE UNSHADED AREAS ONLY. You may report some or all of this information on separate sheets *(use the same format)* instead of completing these pages. SEE INSTRUCTIONS.

Form Approved OMB No. 158-R0173

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

EPA Form 3510-2C (6-80)

FOOTNOTES:

1- DATA FROM MARCH 13, 1985, GRAB SAMPLING OF THE MOST RECENT BATCH OF CHEMICAL METAL CLEANING WASTE TREATED/DISCHARGED VIA THE CONSTRUCTION S.T.P.

2- ALL CHEMICAL METAL CLEANING WASTE ACCUMULATED TO DATE HAS BEEN TREATED/DISCHARED. THERE- SAMPLES FOR THESE ANALYSES COULD NOT BE COLLECTED.

3- DATA TAKEN FROM DMRS SUBMITTED TO ADEM FOR THIS DISCHARGE FOR THE PERIOD AUGUST 1985 – JULY 1986.

PLEASE PRINT OR TYPE IN THE UNSHADED AREAS ONLY. You may report some or all of this information on separate sheets *(use the same format)* instead of completing these pages. SEE INSTRUCTIONS.

EPA I.D. NUMBER *(copy from Item 1 of Form 1)*: AL5640090002

Form Approved OMB No. 158-R0173

OUTFALL NO: 002

V. INTAKE AND EFFLUENT CHARACTERISTICS *(continued from page 3 of Form 2-C)*

PART A - You must provide the results of at least one analysis for every pollutant in this table. Complete one table for each outfall. See instructions for additional details.

Form Approved OMB No. 158-R0173

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

DIOXIN															
2,3,7,8-Tetra chlorodibenzo P- [illegible]				DESCRIBE RESULTS											

DISCHARGE SERIAL NUMBER 003

(1) Part V.A. - 1.f. -- All values based upon pump capacities; maximum 30-day and long term average values recorded during system testing and startup.

(2) Part V.A - 1.h. and i. -- Maximum daily value is from one grab sample and not from four per 24-hours.

(3) Part V.A - 2.b. and c., and Part V.B - 3.b. and c. -- Values are from grab sample analyses data from Discharge Monitoring Reports (DMR's).

(4) Part V.A - 2.d., and Part V.B - 3.d. -- Two numbers are reported in some cases; the first for maximum daily and the second for long term average.

(5) Part V.C - 1. (13B.) -- Identified in EPA report "Priority Pollutant Methodology Quality Assurance Review" by Kleopfer, Dias, and Fairless as problem priority pollutants since frequently found in blanks and samples because of laboratory contamination.

(6) Part V.C - 1. (29B) -- Source of Di - N - Octyl Phthalate assumed to be same as (5), above.

(7) DUE TO CONSTRUCTION SLOWDOWN AND THE PHYSICAL CONFIGURATION OF THE DIFFUSER SYSTEM, LOW FLOW CONDITIONS HAVE PREVENTED FLOW MEASUREMENT AND SAMPLING OF THIS DISCHARGE. DATA PRESENTED ARE FROM SAN MADES PERMIT APPLICATION SUBMITTED JANUARY 20, 1981.

Form Approved OMB No. 158-R0173

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

CONTINUED FROM PAGE 3 OF FORM 2-C

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

CONTINUED FROM PAGE 3 OF FORM 2-C

Form Approved OMB No. 158-R0173

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the Instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

Form Approved OMB No. 158-R0173

CONTINUED FROM PAGE 3 OF FORM 2-C

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

CONTINUED FROM PAGE 3 OF FORM 2-C

Form Approved OMB No. 158-R0173

PART C - If you are a primary industry and this outfall contains process wastewater, refer to Table 2c-2 in the instructions to determine which of the GC/MS fractions you must test for. Mark "X" in column 2-a for all such GC/MS fractions that apply to your industry and for ALL toxic metals, cyanides, and total phenols. If you are not required to mark column 2-a *(secondary industries, non-process wastewater outfalls, and non-required GC/MS fractions)*, mark "X" in column 2-b for each pollutant you know or have reason to believe is present. Mark "X" in column 2-c for each pollutant you believe to be absent. If you mark either columns 2-a or 2-b for any pollutant, you must provide the results of at least one analysis for that pollutant. Note that there are seven pages to this part; please review each carefully. Complete one table *(all seven pages)* for each outfall. See instructions for additional details and requirements.

FOOTNOTES:

1- DUE TO CONSTRUCTION SLOWDOWN, THIS DISCHARGE HAS TEMPORARILY CEASED. THEREFORE SAMPLES FOR THESE ANALYSES COULD NOT BE COLLECTED. DATA VALUES SHOULD BE COMPARABLE TO THOSE PRESENTED FOR OUTFALL NO. 003.

2- DATA TAKEN FROM DMRS SUBMITTED TO ADEM FOR THE PERIOD JULY 1984 - JUNE 1985.

ENCLOSURE 2

PROPOSED CHANGES TO THE BELLEFONTE NUCLEAR PLANT
NPDES PERMIT NO. AL0024635

1. DSN 001A

For clarification purposes, change the sample type for flow monitoring from totalizer to pump log. Totalizer readings are applicable only to the sewage treatment plant (STP) effluent over a 60° V-notch weir. Under this discharge scheme, phosphate waste will be pumped from the storage pond to the STP effluent pump downstream of the V-notch weir. Pump logs will be used in order to determine the quantity of phosphate waste discharged independently from the daily quantity of STP effluent discharged.

2. DSN 001B

TVA requests that the monitoring frequency on oil and grease for this discharge be reduced from the present frequency of daily to 1/week. Since monitoring for oil and grease began in April 1986 until our most recent data in July 1986 (61 days), oil and grease levels have been all less than 5 mg/l except one day when it was 7.0 mg/l (Table 1). (Discharges from DSN001B only occurred during April through June 1986.) These concentrations are considered typical of those anticipated in the future.

3. DSNs 002 and 004

For clarification purposes, change the sample type for flow monitoring from "Weir, Grab" to "Calculation, Weir." DSN 002 flow is determined by calculation using an in-pond staff gauge and known hydraulic characteristic of the skimmer/discharge pipe. DSN 004 flow monitoring is via a V-notch weir.

TVA requests that the measurement frequency for all parameters at these two point sources of runoff be reduced from 1/week to 2/month. Monitoring data for the past 18-month period show only one noncompliance at DSN 002 which was a TSS noncompliance exceeding the permit limit by 10 percent. DSN 004 experienced only two noncompliances during this period and both were caused bgy algal blooms.

Based on past monitoring data (summarized in Table 2) and the much reduced construction activity at BLN during the upcoming permit period, TVA believes the requested reduction in monitoring frequency for these runoff points is justified.

4. DSN 005

TVA is considering a design change to the chlorination scheme at the intake pumping station. The current scheme is to inject sodium hypochlorite into the pump discharge lines. The proposal under

consideration is to introduce liquid sodium hypochlorite in the immediate vicinity of the pump suction. Under this scenario, however, the strainer backwash and trash sluice return will contain chlorine when the systems are being chlorinated. No change to the chlorination schedules will be made. The trash sluice return will continue to be discharged directly to the Tennessee River. This was possible modification discussed in an August 14 telephone conversation between William Pearse and Madonna Martin (TVA), and Treena Piznar (ADEM).

TVA requests an alternative set of effluent limits and monitoring requirements be provided in the renewed permit to cover this potential design change.

5. DSN 007

For clarification, add the following language to footnote 1: "Quantity reported by multiplying gallons times number of batches for the day."

6. DSN 011

For clarification, add the following language as footnote 2: "Flow measured on individual batches twice per week, quantity reported by multiplying gallons times number of batches per day."

7. DSN 013

Change sample type for flow monitoring at this discharge from "Grab" to "Calculation" to reflect conditions anticipated. In this regard, add the phrase "for the day" to footnote 2 immediately after the word "batches."

8. DSN 014

As previously discussed between TVA (Wally Carpenter) and ADEM (Sonja Massey), the chlorine limitations and monitoring requirements for this discharge point reflect anticipated conditions when BLN becomes operational. It was agreed that the 2-hour time limit and corresponding average free available chlorine effluent limitation are applicable only during chlorination of the condensers. Prior to operation, only the maximum limit for free available chlorine will be applicable to monitor chlorine present in the cooling tower blowdown lines due to chlorination of the essential raw cooling water (ERCW) and raw service water (RSW) systems.

Therefore, for clarification and to reflect reduced construction activity onsite, add a footnote as follows: "Discharge limitations and monitoring requirements applicable only during direct chlorination of the condenser circulating water (CCW) system for control of biofouling. The daily maximum discharge limitation (0.5 mg/l) and measurement frequency (1/week) for free available chlorine shall be applicable at all other times."

9. DSN 015

For clarification to reflect anticipated conditions, revise the following: delete footnote 1; change the sample type for flow monitoring to read "Calculation"; and change the numerical designation of footnote 2 to footnote 1, and add a new footnote 2 with the following language: "Flow measured on individual batches once per month, quantity reported by multiplying gallons times number of batches for the day."

10. Land Application Monitoring Requirements and Limitations

An April 17, 1981, letter from ADEM approved the use of evaporation/pereolation ponds which are now used as storage ponds for land application of phosphate metal cleaning waste. Groundwater monitoring requirements for wells B1 and B2 down-gradient of the ponds were set by ADEM in the 1981 letter and later amended (frequency reduced from weekly to quarterly) in an April 19, 1985, ADEN letter. TVA believes it to be prudent to identify all monitoring requirements for the land application program at BLN in one place. Since monitoring requirements and limitations for the application sites are present in the permit, TVA requests that the reissued permit identify the groundwater monitoring requirements associated with the storage ponds and suggest this be done in the area of Part I, Page I-1q or Page I-1r, relating to land application requirements.

11. Schedule of Compliance

TVA request Part I.C. of the Schedule of Compliance be revised to align the preoperational nonradiological aquatic monitoring program with the current schedule for Unit 1 fuel loading (1993). Accordingly, Part 1.C.1.c.(3) should be changed to read: "Collect an additional two years of fisheries, non-fisheries, and water quality data beginning in February, two years before fuel load of Unit 1."

TVA believes this change is necessary because by 1993 the aquatic data base will be ten years old. Two years of data immediately preceding fuel load are required to reestablish baseline information and evaluate the outcome of trends observed in the 1985 preoperational assessment. Based on the current Unit 1 fuel load date, preoperational monitoring would be initiated in February 1991. Several revisions may also be required to the preoperational monitoring study plan submitted to ADEM on June 3, 1980, as amended February 5 and November 17, 1981, to incorporate information gained from the 1985 assessment along with more state-of-the-art monitoring techniques.

12. Schedule of Compliance

Part I.C.1.d.(5) in the present permit has a typographical error in the sixth line. "Unit 2" in this line should actually read "Unit 1."

13. Part III.K.

BLN is referred to here as having a "once through raw cooling water system." Except for blowdown, BLN has a closed condenser cooling water system.

TABLE 2

DISCHARGE CHARACTERISTICS FOR DISCHARGE SERIAL NUMBERS (DSN) 002 AND 004 AT BELLEFONTE NUCLEAR PLANT FROM JANUARY 1985 THROUGH JUNE 1986

DSN 002

Parameter	Daily Maximum	Daily Average	Daily Minimum
Total Suspended Solids	110 mg/l*	23 mg/l	3 mg/l
Settleable Solids	0.01 ml/l	0.01 ml/l	0.01 ml/l
pH	8.4 S.U.		7.0 S.U.

*The next highest daily maximum value was 46 mg/l. Therefore, there was only one noncompliance for TSS (10/23/85) during the 18-month reporting period.

DSN 004

Parameter	Daily Maximum	Daily Average	Daily Minimum
Total Suspended Solids	67 mg/l	16 mg/l	1 mg/l
Settleable Solids	0.01 ml/l	0.01 ml/l	0.01 ml/l
pH	9.3 S.U.*		7.1 S.U.

*There were two pH noncompliances (one on 5/20/85 and another on 5/21/85) during the 18-month reporting period. Both noncompliances were caused by algal bloom.

TABLE 1

DISCHARGE CHARACTERISTICS FOR DISCHARGE SERIAL NUMBER 001B AT BELLEFONTE NUCLEAR PLANT FROM APRIL 1986 THROUGH JULY 1986

BELLEFONTE-LINED PCNL DISCHARGE. 1986
