**Equipment and Machinery in Use<sup>(1)</sup>:**

Elevating Work Platforms
Forklift with extendable arm (Lull)
Excavator

(1) List of equipment and machinery is based on field observations and is not inclusive of all equipment and machinery that may have been present at the site.

**Personnel on Site<sup>(1)</sup>:**

Personnel	Organization
Personnel	PDC
Andrew Vargas	Certified Safety
Louis Martinez III	EnTech
Joe Sbarra	Louis Berger
Anthony Controneo	Total Safety Consultant
Personnel	AEL, Solar Inc., Olympic, K&M, A&A / Empire, Tonage, Jobin, FCS, All Action Glass, Verde, Maryland Fabricators

Personnel	Organization
Michael Pokorny	URS / LiRo
Michael Balarezo	URS / LiRo
Tom Karas	URS / LiRo
Roberto Vazquez	URS / LiRo
Victor Bogatyrev	URS / LiRo
Nabil Saadi	URS / LiRo

(1) List of personnel on site is based on field observations and is not inclusive of every personnel that may have been present at the site.

**Observations:**

Time Stamp	Details
	<b>Time On-Site: 7:30 am</b>
7:30 am	EnTech set up four air monitoring stations at perimeter locations, forming a quadrangle around the anticipated work area, as specified by the CM. According to EnTech, air monitoring was occurring at the four air monitoring stations beginning at 6:35 am. The air monitoring station locations are depicted on the Sketch.
7:30 am to 2:00 pm	Solar installing electrical wiring and conduit throughout the main building and to the south of the Con Edison building.
7:30 am to 1:00 pm	Tonage bending rebar in the northwestern section of the site.
7:30 am to 2:15 pm	GC utilizing a Lull forklift to move materials around the site. GC utilizing an excavator to excavate soil from the northwestern portion of the site. The soil was stockpiled in the northwestern section of the site. At the end of the day, the stockpiled soil was covered with plastic sheeting and the plastic was weighed down with debris from the surrounding area. GC installing gravel and wooden forms in the southwestern section of the site.

Prepared By: Joseph Spinelli

IEM Representative

Time Stamp	Details
7:30 am to 1:00 pm	FCS utilizing elevating work platforms to paint walls in the eastern section of the loading level of the main building.
7:30 am to 2:00 pm	K&M utilizing elevating work platforms to install fire suppression piping throughout the building.
7:30 am to 2:00 pm	A&A / Empire installing piping throughout the main building.
7:30 am to 2:30 pm	Olympic installing and testing plumbing piping throughout the main building.
7:30 am to 2:00 pm	Verde working in the Con Edison building in the eastern section of the site.
7:30 am to 1:00 pm	Jobin utilizing elevating work platforms to install roofing and siding on the northern and southern exteriors of the main building.
7:30 am to 2:20 pm	Twenty-three trucks entered the site through the gate and the Stabilized Construction Entrance on 25th Avenue. The GC utilizes the excavator to load staged soil in the southwestern portion of the site onto the trucks. The trailers are loaded with soil, raise the tarp over the trailers and exit the site through the Stabilized Construction Entrance and the gate on 25th Avenue. According to the CM, the soil is being transported as "Material Meeting PA Clean Fill Standard" and being transported off-site for final disposal at: West Plant in Palmerton, Pennsylvania (West Plant) via Impact Reuse & Recovery Center in Lyndhurst, New Jersey (IRRC) or as "Material Meeting NJRDCSRS" and being transported off-site for final disposal at IRRC. Details are provided on the Truck Log. The GC-prepared Truck Log and Manifests are provided in Attachment A.
7:30 am to 2:30 pm	All Action Glass utilized elevating working platforms to install windows in the southeastern section of the main building.
7:30 am to 2:00 pm	Maryland Fabricators welding steel for the railings of the Con Edison building.
9:30 am to 10:00 am and 12:00 pm to 12:30 pm	Site work stops for a work break.
3:20 pm	Site work stops for the day. EnTech removes air monitoring stations.
	<b>Time Off-Site: 3:30 pm</b>

**General Observations:**

According to EnTech, particulate matter and total organic vapors were not detected at concentrations greater than the action levels.

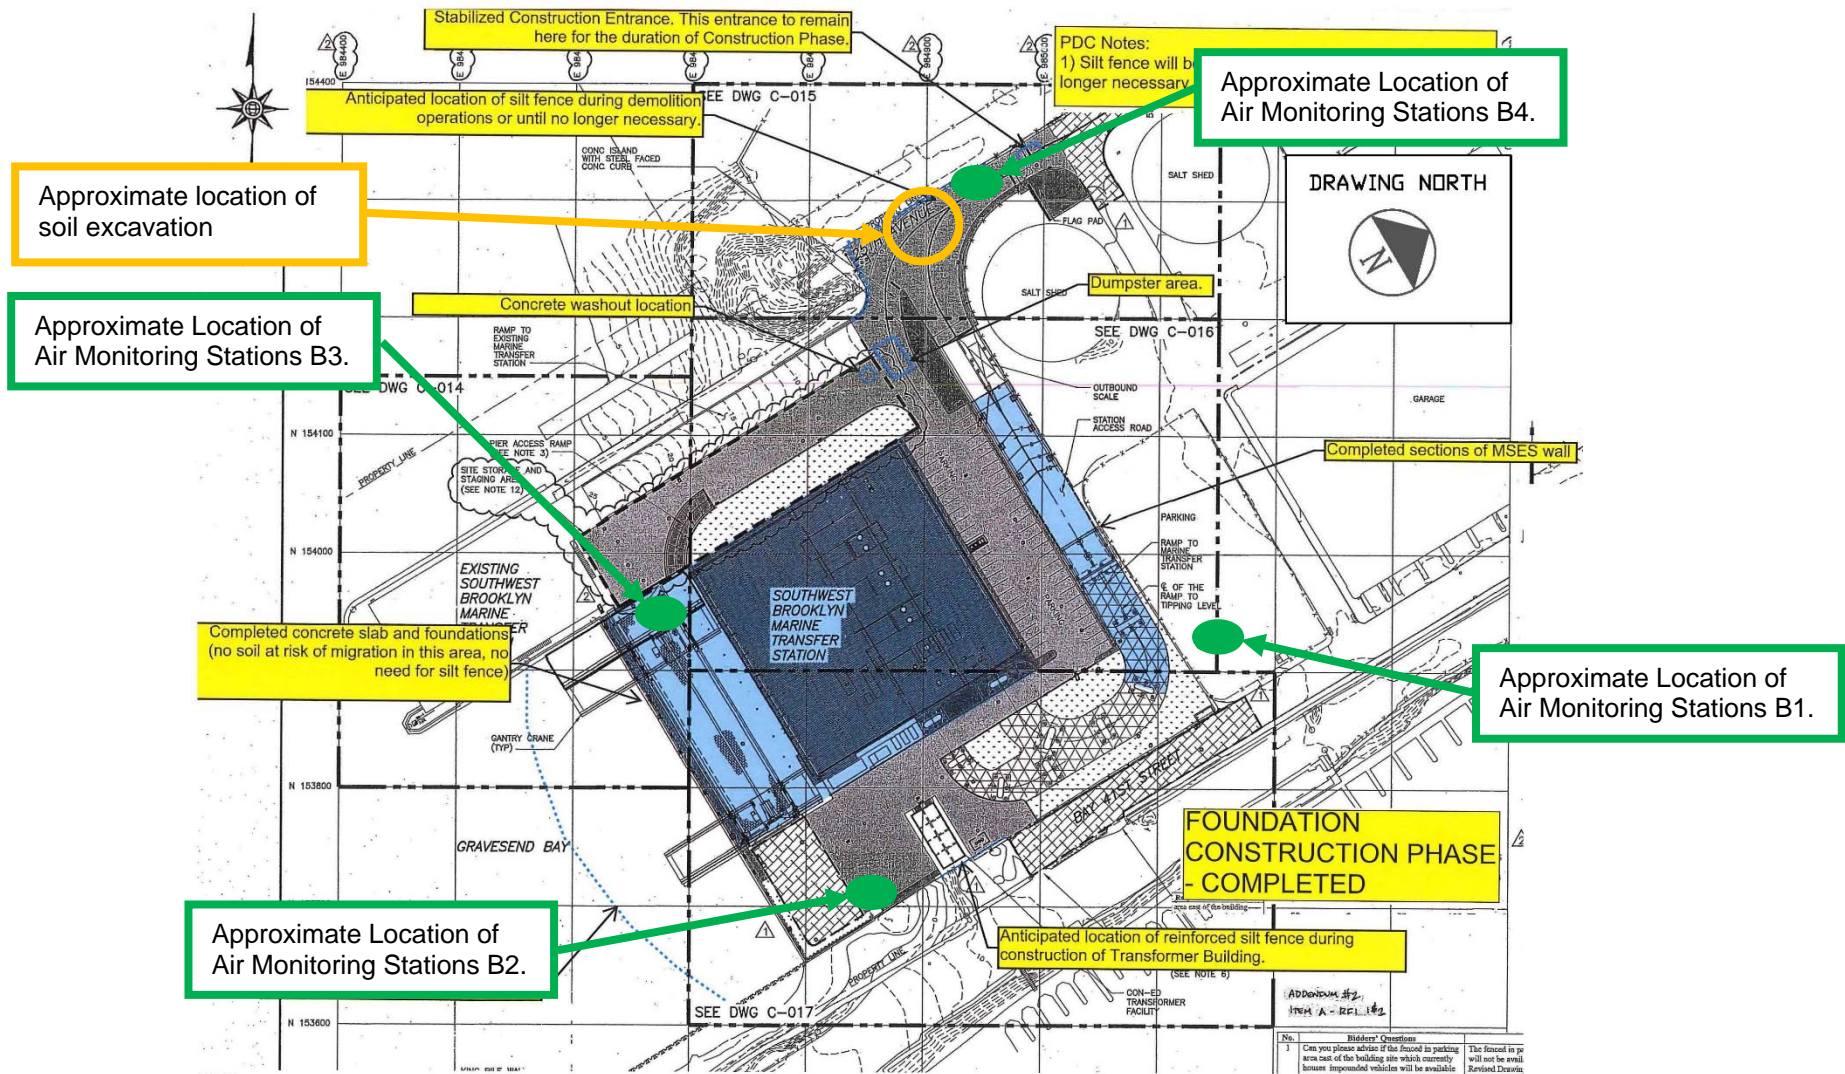

The GC was observed implementing dust suppression at the site by wetting down the ground surface with water from the water tank truck at 7:50 am and 1:55 pm.
